Class Structure

3:30 PM Welcome

A short introduction to class:

- Trail Mail - Barb reads "trail mail" comments and questions received from students. Your input and ideas matter! We want to hear from you!
- Day in Space - We hear about current events and happenings in space so we can make connections between class and real world work and endeavors. Student led.
- Knock on Your Window + other things

3:20 PM Awakening

Prior to the start of class, we'll play a selection of space-related movies, music, etc. to get you in the right mindset for day.

3:45 PM Your Path

It's okay to meander! It's okay to fail! Just learn a lesson along the way! Our special guests take the stage and we hear about their life, career, struggles, triumphs, and hopefully an embarrassing story or two.

4:00 PM STARS

Student **T**eams **A**sk **R**enowned **S**pecialists:
What questions do you have for our special guest? In your Pathway teams, you'll prepare a series of questions before class and then join our guests on the stage for a short interview. Student led.

4:10 PM Connections

How does today's topic connect back to CU Boulder, you, and your major? Barb and our special guest will show us these connections and share how you can be a part of this exciting work.

4:40 PM Q/A or Surprise

Class wrap up and final thoughts plus an occasional surprise. Most guests stay after class to answer as many questions as students have

4:25 PM Pathway Outstanding Transporter

Let's go explore! Barb and our special guest will climb into the Pathway Outstanding Transporter to go on a journey in time, space, or scale to a destination related to the day's topic and/or the special guest's research.

4:35 PM Future

What does the future hold? What are the next big challenges to tackle? We'll hear from our special guest about something they find particularly compelling. Maybe you'll be inspired to take on a new mission!
