Office Phone: 492-5186
e-mail: fred.glahe@colorado.edu
Home Phone: 443-1716

Econ 3080, Intermediate Macro Theory, is a prerequisite for this course.

There will be two examinations, in addition to the final examination, given on the dates indicated below. There will be no makeups given for these examinations.

The objective of this course is to provide a comprehensive and integrated introduction to contemporary international finance and open economy macroeconomics. To achieve this objective, the most important developments in international finance and open economy macroeconomics will be presented in a manner such that they will be accessible to those who have had an introductory course in principles of economics and intermediate macroeconomics. Uniting the various topics that will be examined are their implications for domestic and international economic policy. The main tools of exposition will be algebra, calculus and graphical analysis. The theoretical concepts covered in this course will be illuminated in terms of historical and contemporary events.
