COURSE OBJECTIVE
Economics is basically about decision making. The first job of an economist is to provide clarity in our decision making process. Whenever we are faced with multiple choices, we have to go through a process of finding the most appropriate one. Economics is divided into two fields: Microeconomics and Macroeconomics. In this course, we will study Macroeconomics. The course is organized as follows: At the beginning, we will focus on some concepts from Microeconomics; and then we will devote most of our time to study Macroeconomics issues. We will put special effort on the understanding of the determinants of four phenomena: level of unemployment, the general level of prices, economic growth, and international economic issues. To analyze them we will use: basic economic theory, graphical and simple algebraic tools, and historical cases. I found all these issues very interesting and useful for life. I hope that at the end of the semester you share this opinion.

TEXTBOOK

MEETING SCHEDULE
This section of ECON 2020 is scheduled to meet on TR, 11:00 a.m.-12:15 p.m. in room G020 of the Duane Physics Building.

GRADING
The following criteria will be used to assign your grades:
1) Recitation (25%). Your recitation grade will depend on three things:
   a.- Problem Sets (60%)
   b.- Quizzes (30%)
   c.- Attendance (10%)
2) Four Exams (75%). There will be four exams during the semester. Only three of them will be taken into account to determine your grade. The lowest score will be dropped automatically.
GENERAL POLICIES
* No late problem sets will be accepted under any circumstances.
* There will be no make-up exams.
* If you will need extra time on any of the exams, please contact me as soon as possible.
* If you have a scheduling problem for the final exam, please contact me as soon as possible.
* All University deadlines will be observed.

MINIMUM EXPECTATIONS IN CLASS
It is important that an atmosphere that facilitates the maximum opportunity for learning is present at all times. Although attendance is an expectation for all students, it is not a requirement. However, there is a positive relationship between class attendance and performance in the course. Course material not in the textbook will be presented so attending lecture is helpful to getting a good grade and maximizing your learning experience. It is expected that all students present on a given day, be attentive, polite and not a source of distraction to the instructor or any other student. Questions and comments, of course, are always encouraged! Every effort will be made to make the classroom experience both profitable and enjoyable for all.
