- Class Time: 12:30-1:45 Tuesdays and Thursdays
- Room: Hellems 271
- Office Hours: 2:00-3:00 Tuesdays and Wednesdays
- Office: Economics 14 C (Behind Room 14 in the Economics Basement.)
- Email: roblesj@spot.colorado.edu (Please include 'micro' in subject)
- Recitation: Wednesday at 4:00 in Econ 13
- Date of Final: Monday Dec 14, 3:30-6:30
- Requirements: Biweekly homework 10%
  Midterm (Following Classical Demand Theory) 30%
  Final 60%

Problem Sets

Course Description
This is the first semester course in microeconomic theory for a Ph.D. student in economics. We will spend approximately nine weeks on classical preference theory, choice theory, demand theory and production. (Chapters 1, 2, 3, 5 in the text. Kreps's text is a good second reference for this material.) This is followed by approximately four weeks of decisions under uncertainty and the expected utility hypothesis. (Chapter 6 in the text and a significant amount of outside material.) We will wrap up with approximately three weeks of General Equilibrium Theory. (Chapter 10 in the text. Ross Starr's text "General Equilibrium Theory: an introduction" is a great reference for this material.)
