Course Description
This is a graduate survey course in labor economics. The first 4 weeks of class will be a mini-course in applied econometric tools. The remaining 11 weeks of the semester will cover 3 key topic areas in labor economics: labor supply, human capital, and economics of the family.

A primary goal of this course is to teach you to read and understand papers beyond the superficial “introduction and conclusion” summary. Over the course of the semester, we will discuss approximately 20 papers in class. Using the attached schedule, you are expected to bring a copy of the paper on the appropriate day, to have read the paper prior to class, and to be prepared to answer questions regarding the content of the paper if asked to do so.

There will be 3 problems sets.

The tentative schedule for the problem sets is:
PS#1- Differences-in-Differences, Panel Data, due 9/13
PS#2- Instrumental Variables, Labor Supply Due 9/27
PS#3- Measurement Error, Limited Dependent Variables, Due 10/18

In addition to a midterm (10/8) and final, students will be required to write an executive summary of an existing paper (Due 11/15) and a research proposal (Due 12/13)

The final grades in the course will be determined by:
Midterm Exam: 25%, Final Exam: 35%, Problem Sets: 15%, Executive Summary 10%, Proposal 15%
