

2004-2005 Scholars Cohort

Andre Brooks
Majors: Communication
Mentor: Dr. Karen Tracy
Research Interest: My research interest is blacks in U.S. education. This interest sparked from of my experience in predominate black schools until college.

Janice Denad
Majors:
Mentor: Dr
Research Interest: Attempt to computationally regenerate the high stall angle of flexible thin wings of micro air vehicles.

Natalie Nunez
Major: Environmental Studies
Mentor: Dr.
Research Interest:

Brant Torres
Major: English
Mentor: Dr.
Research Interest: I'm interested in exploring Crevecoeur's conflation and (con)fusion of ontological and epistemological understandings with the physical spaces that people inhabited in order to attempt to create a prototype or exemplum of/for the American identity.

Jeremy Johnson
Major:
Mentor: Dr.
Research Interest: Can a simulation be made to accurately depict a realized distributed manipulation system using the Programmable Vector Field control theory. Is there a limit of actuation at which this theory fails to control near equilibria.

Kur Kur
Major: Psychology
Mentor: Dr.
Research Interest: I will specifically look at Sudan and Nigeria to examine how does the threat of ethnic conflict affect or shape the politics of African states, and why and when do the multi ethnic nations succeed or fail?

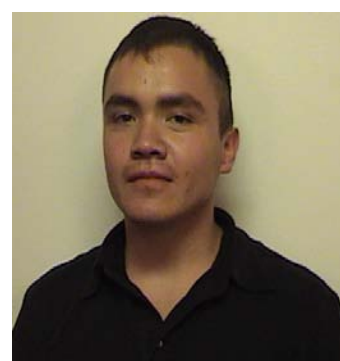

Carol Trujillo
Major: English
Mentor: Dr.
Research Interest:

Lisa Xiong
Major: Psychology
Mentor: Dr.
Research Interest: My research project examines the strategies among American women community workers or activists use to manage the conflict between addressing racial, ethnic and gender issues.

Ginnie Logan
Majors: History and Education with an emphasis in social studies
Mentors: Dr.
Research Interest: My study explores the female gender role of the Nation of Islam as it relates to black women who join the organization between the years 1960 and 2000.

Angelo Maestas
Major:
Mentors: Dr.
Research Interest: This is an exploratory study of the schooling experiences of third generation Mexican American students in an urban public high school. It attempts to explore the interactions between students and educators by interviewing 15-20 high school students.

PaKou Xiong
Major: Integrated Physiology
Mentor: Dr.
Research Interest:
