

Department of Aerospace Engineering Sciences

Faculty Mentor / Student Meetings

Please see your faculty mentor once every semester. This person will normally remain your mentor throughout your undergraduate years here in the Department of Aerospace Engineering Sciences at the University of Colorado at Boulder.

Topics of conversation include your specific interests and direction in aerospace engineering, research opportunities, in-depth aerospace course information (i.e. which Professional Area Electives to take based on career or research interests, etc.), graduate information (graduate schools and how to prepare for graduate school), career development and aerospace engineering in general. S/he wants to get to know you and how you are doing!

Please get a signature from your faculty mentor on this form when you meet and return the form to Claire Yang in ECOT 633 or Lauren Cole in ECOT 631 **by 12:00 PM Noon on October 31st, 2014** .
