Teaching and Learning Consultants
The Teaching and Learning Consultants (TLCs) engage teaching and learning communities that create rich student learning experiences. TLCs are available to consult with faculty, lead small group sessions and facilitate workshops.

Education Researcher
The Education Researcher (ER) consults on the design of evaluations of technologies integrated into courses, and assists in collecting and interpreting course-related data. The ER also evaluates ASSETT services.

Student Fellows
Student Fellows (SFs) are undergraduate partners who consult with faculty on integrating technologies into their classes, providing in- and out-of-class technical support for their students, and collect classroom observation data.

Faculty Fellows
Faculty Fellows are A&S faculty who stimulate departmental and cross-departmental explorations of technology integrations with evidence-based, active, student-centered learning approaches. Fellows engage in deep and focused discussions, provide departmental leadership and resources for best teaching practices, and serve as ambassadors and liaisons for ASSETT.

Special Interest Groups
Special Interest Groups (SIGs), are small groups of interdisciplinary faculty who meet a few times each semester to discuss scholarly readings on teaching and learning challenges. Discussions guide participants in developing practical course design solutions to implement.

Learning Events
Throughout the year, we offer a variety of workshops, community meet-ups, and other learning opportunities. Be sure to look for information about upcoming events through our flyers, monthly newsletters, and website.

Survivor Strategies: Teaching Large Enrollment Courses
When class sizes grow, faculty often encounter challenges in creating an effective and engaging learning environment. Learn how six A&S faculty members and a teaching assistant successfully taught large introductory level courses.

Survivor Strategies: Student Survival Tips: Make Studying & Learning more Successful
Many students may become frustrated after receiving a lower than expected grade on exams or tests. The Survival Tips for Students guide provides practical research-based tips for studying more efficiently.

Hybrid Learning Resources
Since Hybrid Learning is new to many students, we’ve provided recommended statements, guidelines, and questions that are useful when creating a syllabus for your hybrid course.

Syllabus Archive
The Syllabus Archive contains syllabi files that are available to view and download.
