LEEDS FAST FACTS

SEEKING MUTUALLY BENEFICIAL PARTNERSHIP OPPORTUNITIES

RECRUIT
Hire Leeds students and alumni as full-time employees and employ interns. Undergraduate students, MBA and MS Programs students, graduates and alumni are highly qualified and ready to join your team. We will work closely with your organization to identify the best recruiting model for your business needs.

INVEST
Support the Leeds School of Business mission through philanthropic investments and the creation of a mutually beneficial partnership. Your company will benefit from the increased brand visibility, greater community presence and the opportunity to become a key stakeholder within the highly regarded Leeds network. We will work with you to identify how your philanthropic goals can lead to robust investment opportunities with lasting value.

INTERACT
Connect with the Leeds School's national and international community of alumni, parents, corporations and friends. Grow your personal and professional network by attending global and industry-related networking events, join one of Leeds School's strategic boards, host a group of students at your business, or connect with alumni services. We will connect you to the Leeds community and explore opportunities to partner in shared growth.

INSPIRE
Play an integral role in the development of students and future leaders. Share your expertise: speak to a class, be a professional mentor, host "consulting" projects, or judge case competitions. Interact with student organizations focused on diversity, real estate, sustainability, entrepreneurship, social responsibility and the core business disciplines of accounting, finance, information systems, management and marketing. Become a part of the learning experience while gaining new insights and exposure to a dynamic group of future business leaders.
