“Choosing the Leeds School of Business Supply Chain Management master's program was one of the best decisions I could have made after earning my undergraduate degree. Rapidly growing career opportunities, and the ability to make a significant impact in this field, made the choice that much more appealing. My expectations have been far exceeded.”

Tanner Ryan

MS Programs

Leeds School of Business
UNIVERSITY OF COLORADO BOULDER

Be specialized.

Located at the foot of the Rocky Mountains, the University of Colorado Boulder has a breathtaking view from campus.

But don't just come for the view.

Come build a specialized skill set that will set you apart. At the Leeds School of Business, you can jump-start your career with a master's degree program that provides a concentrated, in-depth education with a specialized area of focus. All of these programs prepare students for a range of exciting high-growth job opportunities.

Accounting

Select from two programs: a fifth-year concurrent BSBA/MSBA program, or a stand-alone program, which is designed to be completed in 18 to 21 months. The program's educational requirements provide the foundation for the skills you will need to become a CPA. Ninety-five percent of accounting students in the 2014 class had a job at graduation.

Business Analytics

This 12-month program focuses on the exciting and fast-growing field of "big data." Learn how businesses use analytics in direct marketing, site selection and customer relationship management decisions. The signature one-semester faculty and company supervised internship offers both academic and practical hands-on experience.

Finance

This 12-month program offers a firm grounding in general finance and specializes in two tracks, Investment Management or Corporate Finance/Consulting. There are additional enrichment seminars, from teamwork and leadership to ethics and corporate social responsibility—all designed to give you specific skills to pursue a career in a variety of financial fields.

Real Estate

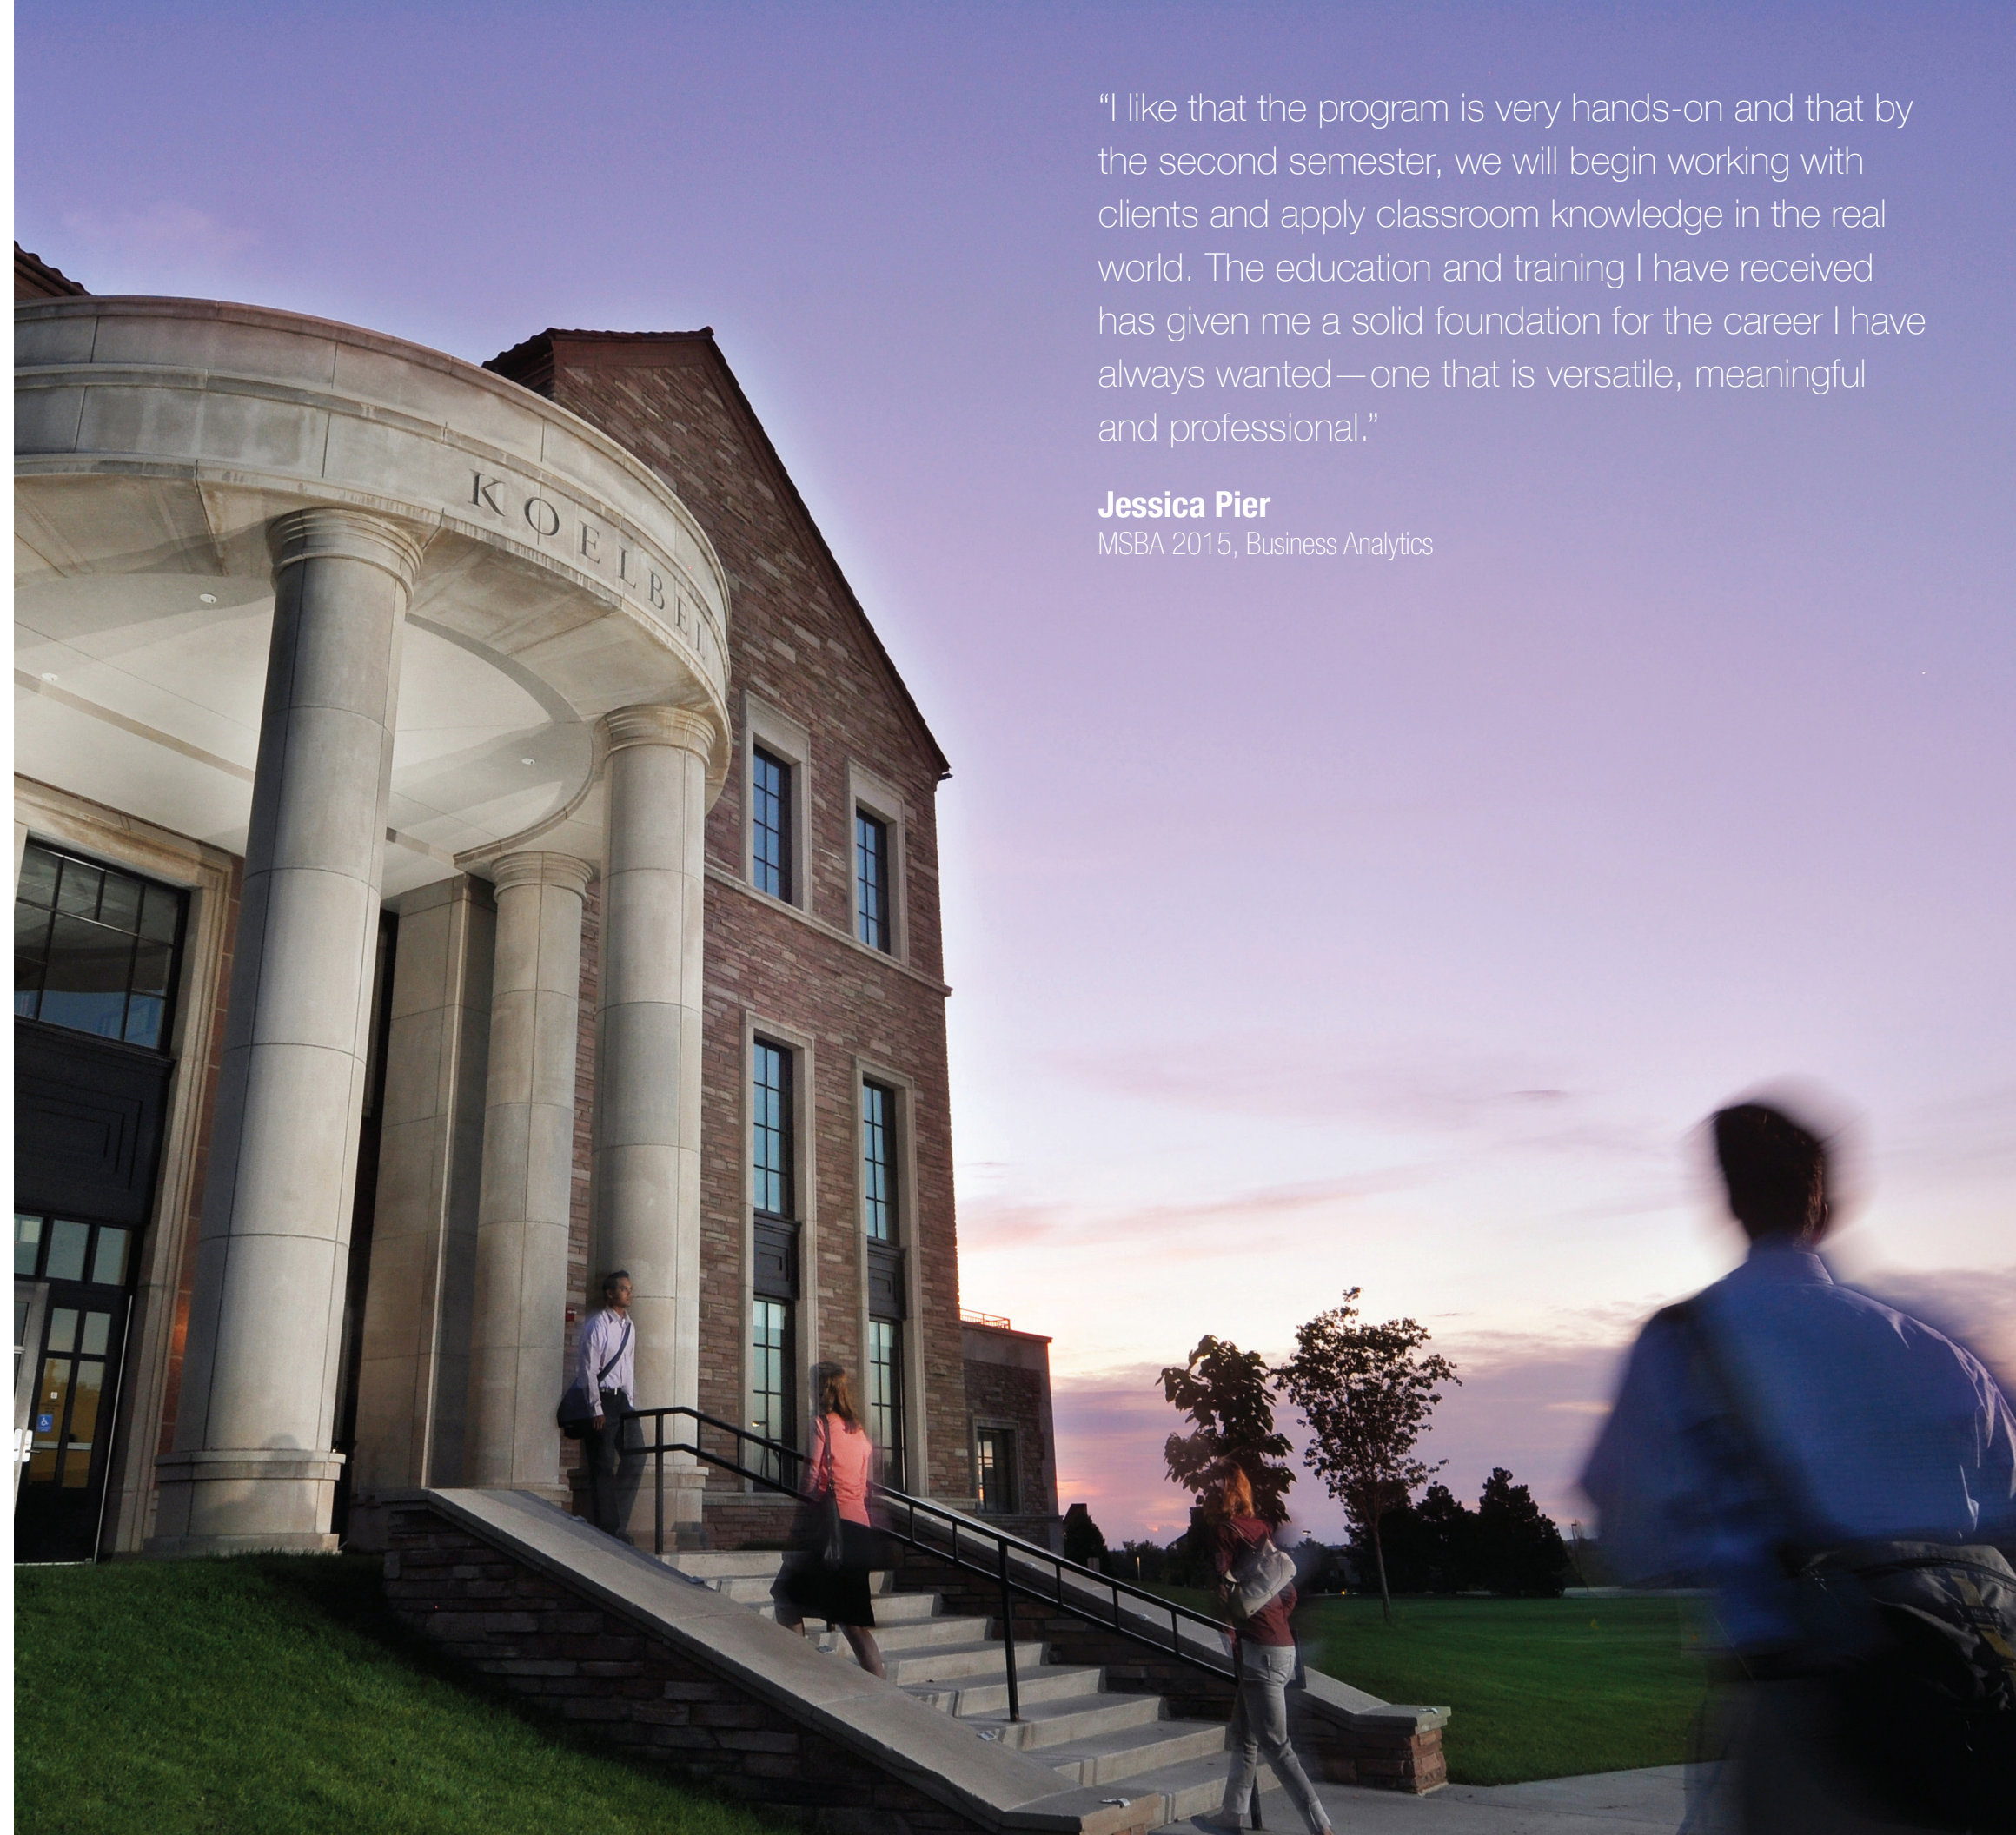

This 12-month program offers extensive course work and an application of materials that will prepare you for a career in the financial, management, development and operations aspects of real estate. Select from two tracks, Development Management or Asset Management. The program incorporates a multitude of opportunities for students to interact with industry leaders in classes and at events.

Supply Chain Management

This 12-month program includes a signature one-semester faculty and company supervised internship that offers both academic and practical hands-on experience. The curriculum is designed to develop technical and quantitative skills by carefully integrating big data analytics and supply chain quantitative methods (e.g., optimization, decision modeling). This blend of skills is a rare commodity demanded by employers.

"I like that the program is very hands-on and that by the second semester, we will begin working with clients and apply classroom knowledge in the real world. The education and training I have received has given me a solid foundation for the career I have always wanted—one that is versatile, meaningful and professional."
