Description of the Field:
The energy industry encompasses a variety of products and services, including electricity, natural gas, oil, and renewable energy technology. It examines issues of energy acquisition and energy trading worldwide.

Some career paths in the energy field may target an engineering or business background, but many opportunities exist that target a wider scope of skills. Career paths in policy making, policy analysis, and policy research often do not require a technical background, but knowledge of the energy field and an understanding of finance, development, and the environment can increase competitiveness depending on the interest area.

Adapt for a Changing World

Insider Advice & Trends:
The demand continues for candidates with business backgrounds as a result of consumer utility industry deregulation, advancements in alternative energy sources, and a growing demand of current sources of energy in the third world.

Environmental impact and increased attention to energy conservation provides new and opportunities for graduates with an interest in technology and policy issues for private industry and governments.
