One Earth Future

Website: https://oneearthfuture.org/

Organization Address: 525 Zang Street, Broomfield, Colorado 80021

Organization Description:

OEF is a nonprofit, nongovernmental organization with a vision of developing effective systems of global governance to achieve a world beyond war, leading to our tagline “Peace Through Governance.” As an operating foundation, OEF focuses on both researching and developing ideas, and implementing those ideas in practical projects and programs. For further information, visit www.oneearthfuture.org to review our mission, vision, and values, and examples of past events. OEF is a well-funded organization that is interested in attracting best in class employees who show exemplary commitment and work ethic.

**One Earth Future has three open PIIE internships for 2017. Please review all!**

Position #1 Title: Graphic Design Intern

Desired Start Date and End Date: June 2017

Position Description:

One Earth Future Foundation (OEF) seeks a summer 2017 intern to work with OEF communications staff in the design of print and digital materials in support of the foundation and its various programs. This position is based in Broomfield, Colorado, does not include travel, and has a targeted start of June 2017 depending on candidate school schedule and availability.

PRIMARY RESPONSIBILITIES:

- Aid in the design of various marketing materials including but not limited to: brochures, booklets, info-sheets, reports, business cards, name badges,
event signage, etc.

- Edit, color correct, and crop photographic images for use in publications, web, and social media.
- Attend OEF program team meetings to determine communications needs and work with OEF’s Communications Manager to create plan for completion.

Qualifications:

- Candidates must be pursuing or have completed an undergraduate degree in Graphic Design or a related field.
- Interest in working in the non-profit, international development, or related field.
- Solid Experience using Adobe Creative Suite (Illustrator, Photoshop, InDesign).
- Ability to work independently or on a team with strong attention to detail.
- Strong data visualization skills – ability to take dense, research-based materials and simplify into clear, concise infographics.
- Strong verbal and written communication skills.
- Experience updating content to Drupal-based websites a plus.
- Experience maintaining Social Media accounts for an organization also a plus.
Position #2 Title:  Fisheries Science Intern, Lake Victoria

Desired Start Date and End Date:  June 2017

Position Description:

Secure Fisheries (part of One Earth Future) advances sustainable fisheries through science-based analysis in Somalia and the Lake Victoria region and coordinates with regional stakeholders to fight IUU fishing in the Indian Ocean. Our program has a comprehensive approach to improving fisheries governance and combatting IUU fishing. Working at the state, regional, and global levels with three complementary focus areas, Secure Fisheries: promotes sustainable management of Somali fisheries, improves food and economic security in the Lake Victoria Basin, and combats IUU fishing in the Indian Ocean. In support of these focus areas, Secure Fisheries provides science-based reporting on fisheries resources. See further information at: www.securefisheries.org.

Secure Fisheries is leading a multi-year study on the impacts of aquaculture development in Lake Victoria. This study provides insight into the potential for aquaculture in East Africa, the implications for wild fisheries and global and local supplies of fish, and the impact on regional economic development. Secure Fisheries seeks a full-time intern to help us compile and analyze new data from field work in Lake Victoria. This position is based in Broomfield, Colorado, does not include travel, and has a targeted start of March/June 2017 depending on candidate school schedule and availability.

The intern will work on a range of projects that include but are not limited to:

- Conducting a gap analysis for aquaculture in Lake Victoria
- Analyzing fisheries data collected by gillnet and trawl sampling
- Relating catch per unit effort over time to the distribution of fish we see today
- Characterizing the price earned by fishers for different species in different months
- A project tailored to the skillset of the applicant

Contact Information
If you have any questions, please contact the PIIE Program Director, Dylan Mark, at 303-492-3707 or dylan.mark@colorado.edu
Qualifications:

The ideal candidate will have a background in marine science, oceanography, ecology, or related fields. Specific skills and requirements include:

- Undergraduate degree preferred; junior or senior-level college students with demonstrated data analysis skills (e.g., GIS, statistics, computer science) are also encouraged
- Knowledge and experience analyzing fisheries data
- Demonstrated research and writing skills
- Data management skills
- Interest or experience studying international maritime issues
- Proficient with IT applications, including Microsoft Office (especially Word, Excel, and PowerPoint); knowledge of Adobe products and R is a plus
- Excellent organizational skills and ability to manage multiple assignments and competing priorities
- Willingness to work on different types of tasks and projects
Position #3 Title: Sustainable Fisheries Intern (Somalia/Somaliland)

Desired Start Date and End Date: June 2017

Position Description:

Secure Fisheries advances sustainable fisheries through science-based analysis in Somalia and the Lake Victoria region and coordinates with regional stakeholders to fight IUU fishing in the Indian Ocean. Our program has a comprehensive approach to improving fisheries governance and combatting IUU fishing. Working at the state, regional, and global levels with three complementary focus areas, Secure Fisheries: promotes sustainable management of Somali fisheries, improves food and economic security in the Lake Victoria Basin, and combats IUU fishing in the Indian Ocean. In support of these focus areas, Secure Fisheries provides science-based reporting on fisheries resources. See further information at: www.securefisheries.org.

Secure Fisheries is building off its report, Securing Somali Fisheries, with a more in depth analysis of Somali maritime resources and activities. Secure Fisheries seeks a full-time intern to conduct research on the sustainability of Somali fisheries in support of this work. The intern will work with Colorado-based and Somali colleagues. This position is based in Broomfield, Colorado, does not include travel, and has a targeted start of March/June 2017 depending on candidate school schedule and availability. The intern will report to the Associate Director of OEF Research. This position is based in Broomfield, Colorado, does not include travel, and has a targeted start of June 2017 depending on candidate school schedule and availability.

PRIMARY RESPONSIBILITIES:

The intern will work on a range of projects that include but are not limited to:

- Providing research and analysis support to Secure Fisheries' scientific assessment of Somali fisheries
- Participating in surveys of Somali coastal communities
- Completing a sustainability analysis for key fisheries resources
- Conducting a spatial analysis of maritime activities in Somali waters using
ArcGIS or QGIS

Qualifications:

The ideal candidate will have a background in fisheries, international development, or international business. Specific skills and requirements include:

- Preference for Somali speaker (written and spoken)
- Undergraduate degree required
- Knowledge and experience analyzing fisheries data
- Demonstrated research and writing skills
- Demonstrated ArcGIS and/or QGIS experience
- Data management skills
- Interest or experience studying Somali maritime issues
- Proficient with IT applications, including Microsoft Office (especially Word, Excel, and PowerPoint); knowledge of Adobe products is a plus
- Excellent organizational skills and ability to manage multiple assignments and competing priorities
- Willingness to work on different types of tasks and projects
