What is Splunk?

You see servers and devices, apps and logs, traffic and clouds. We see data - everywhere. Splunk® offers the leading platform for Operational Intelligence. It enables the curious to look closely at what others ignore—machine data—and find what others never see: insights that can help make companies more productive, profitable, competitive and secure.

Splunk is seeking CU-Boulder students for summer internships!

As an intern at Splunk, you are eligible to apply for a $10,000.00 scholarship!

What:

CU-Boulder students interning at Splunk are eligible to win a $10,000.00 scholarship to be used towards academic efforts. Students must submit a letter of recommendation and an essay about their internship to Lisa Lovett at Career Services by July 15, 2017. Career Services will review the submissions and determine winners by August 10, 2017.

When:

Application deadline: July 15
Winners announced: August 10

Eligibility:

- Graduate students as well as undergraduate students continuing enrollment into the fall semester (after your summer Splunk internship)
- GPA: 3.2 or higher
- Preference will be given to Computer Science Majors
- You must have your internship supervisor submit a letter of recommendation, indicating his/her support of your receiving the scholarship
- Write an essay addressing these points:
  - What attracted you to Splunk?
  - How your internship was relevant to your coursework and career plans.
  - Write about a project you initiated.
  - What surprised you about Splunk?
  - Your advice to future Splunk interns.
