How do I make a high school visit?

1. Contact the high school. Don't be afraid to cold call. Good contacts are:
   - Assistant principal
   - Career center/counselor
   - Math or science teacher (it relates to their class!)
   - Note - many high schools have pre-engineering or STEM (science, technology, engineering and math) programs

2. Find out how much time is available and know exactly where the presentation will be located.
3. Prepare! We have provided presentations, active learning exercises and additional readings.
4. Arrive early and plan to stay a little late. You may get the opportunity to talk with students before or after the presentation.
5. Leave behind print materials available on the K-12 Outreach website (i.e., posters, flyers, weblinks, etc.).
