

## TUTOR LIST

### Department of Chemistry and Biochemistry Fall 2009

This is a list of tutors for specified courses which the Department of Chemistry and Biochemistry certifies for government-funded tutoring programs. This list does not restrict tutoring by other individuals or of other courses by the listed tutors, unless the tutoring service must be certified by the Department.

The primary criterion for selection for this list was previous service as a TA in the course(s) for which the tutor is certified. ***TA'S MAY NOT TUTOR FOR MONEY IN COURSES IN WHICH THEY CURRENTLY SERVE AS A TA, NO MATTER WHETHER THE STUDENT IS OR IS NOT IN THEIR SECTION.***

For additions or deletions to this list, please see Anne McWilliams, Director of Undergraduate Academic Affairs, Ekeley M199.

### **SOME THINGS TO CONSIDER UPON HIRING A TUTOR:**

The tutor's main function is to help the student understand concepts and apply this understanding to chemical problems; problem-solving logic and methodology will probably be emphasized.

Because you have to pay a tutor, you should prepare to make the most efficient use of his/her time. You should already have a familiarity with the course material, even if you do not understand it all. You should work, or at least attempt, the assigned problems before a tutorial session. You should formulate a list of questions to ask your tutor, questions about problems you have worked on, but do not understand. If you are prepared, the tutor can probably help you overcome your difficulty quickly and easily. If not, you will probably waste both your money and your time.

A tutor does not know what will be on an exam. He/she will not guarantee a passing grade nor take responsibility for your performance in a course - and will probably not feel obligated to help you if you have not opened a book in weeks. Finally, you should realize that tutors are most often students themselves and may have priorities in their own work which limit the amount of time they can spend helping you.
