

Considering collaborative spaces with shared equipment?

A LASP employee works in a shared vacuum chamber. Spring 2010

Think of   as a model!

Laboratory for Atmospheric and Space Physics
University of Colorado Boulder

- Culture valuing equipment & space sharing
- Equipment managed by technical staff
- Space recognized as a community asset
- Sharing culture explained to all prospective employees
- Scientists, staff, & engineers work as a team on equipment/lab capabilities & research proposals
- Collaborative, team approach results in research proposals of the highest quality & competitiveness
