

Table of Contents

Important and Emergency Phone Numbers	6
Forward	7
Letter from Chancellors Peterson and Shockley-Zalabak	8
Chapter 1 - Introduction	
1. Purpose of the Radiation Safety Handbook.....	9
2. Fundamentals of Radiation Safety.....	9
Background Radiation	9
Common Units	9
ALARA	10
Time, Distance, Shielding	11
Chapter 2 - Laboratory Licensing	
1. Introduction	12
2. Laboratory Licensing	12
New Licenses	12
License Amendments	13
License Renewal	14
Inactive Licenses	14
License Termination	14
3. Responsibilities	15
4. Laboratory Signs and Labels	15
5. Laboratory Audits	15
6. State Inspections	15
Chapter 3 - Radioactive Materials Management	
1. Introduction	16
2. Purchasing	16
Radioactive Materials Delivery Address	17

3.	Storage of Radioactive Materials	17
4.	Use of Radioactive Materials	18
	Designated Areas	18
	Shielding	18
5.	Radioactive Materials Inventory	18
6.	Transfer of Radioactive Materials	18

Chapter 4 - Radiation Surveys

1.	Introduction	20
2.	Contamination Surveys	20
3.	Area Surveys	21
4.	Survey Instruments	22
5.	Freezer Frost Surveys	23
6.	Equipment Transfer / Disposal / Resale Surveys	23

Chapter 5 - Waste: Radioactive and Mixed

1.	Introduction	24
2.	Waste Containers	25
3.	Restricted Materials	25
4.	Container Contents Sheets	26
5.	Radioactive Waste Pick-up Requests	26
6.	Sealed Source Disposal	27

Chapter 6 - Training

1.	Introduction	28
2.	Basic Radiation Safety Training	28
3.	Refresher Training	29
4.	Laboratory Contact Training	29

5.	Support Staff Training	29
6.	Sealed Source User Training	29
7.	X-ray Machine User Training	30
8.	Emergency Responder Training	30

Chapter 7 - Sealed Sources

1.	Introduction	31
2.	Storage of Sealed Sources	31
	Tier I Sealed Sources	31
	Tier II Sealed Sources	32
	Generally Licensed Devices	32
3.	Use of Sealed Sources	32
4.	Gas Chromatographs and Electron Capture Detectors	32
5.	Liquid Scintillation Counters	33
6.	Portable Gauges	33

Chapter 8 - Exposure Control

1.	Introduction	34
	Dose Limits	34
	Relative Risk	34
	Personnel Monitoring	35
2.	Dosimetry	35
	Whole Body	36
	Extremity	36
	Embryo / Fetus	36
3.	Bioassay	37
4.	Environmental Monitoring	37

Chapter 9 - Mishaps and Emergencies

1.	Introduction	38
----	--------------------	----

2.	Unsealed Radionuclide Spill Clean-up	38
	Contamination in the Laboratory	38
	Personnel Contamination	39
	Ingestion / Inhalation of Radioactive Materials	39
3.	Leaking Sealed Sources	39
4.	High Radiation Exposure	39

Chapter 10 - X-ray Machines

1.	Introduction	40
2.	Purchasing	40
3.	Analytical X-ray Devices	40
	Summary of Part 8 Requirements	41
	Equipment Requirements	41
	Area Requirements	41
	Operating Requirements	42
	Personnel Requirements	42
4.	Medical (Human Use) X-ray Devices	43
5.	Security and Storage	43
6.	Transfers	43
	Glossary	44 - 56
	Appendices	57 - 77
