I. GENERAL INFORMATION

A. INTRODUCTION

The University of Colorado at Boulder seeks a Design Build Entity (D/B) for design and installation of a removable aluminum fence to be located at Folsom Stadium, and bids for installation of eight stone monuments to be built on the stadium plaza. The aesthetic design of the fence will match the existing fence at Franklin Field. The stone monuments will match the University campus building vernacular and will mark the south west and south east entrances to the stadium. The fence panels will be removable to provide safety for guests attending events at the stadium.

The selected Design Build Entity (D/B) is required to provide all necessary design and construction services in accordance with State statutes and as indicated in the RFP.

A sample copy of the Design / Build Agreement is contained within the RFP. Specified lump sum prices are required upon presentation of the Technical (Design)/Cost Proposal.

B. INTENT

The Design / Build method of project delivery has been selected in an attempt to contract with knowledgeable and creative firms that can provide the design and construction of the fence panels and queuing panels either directly or in collaboration with manufacturers of these types of structures.

UCB intends to select a Design Build Entity (D/B) who will design and construct the project as described within. The process to be used in the selection of a (D/B) is described in detail in Section III, SELECTION PROCESS. In summary, responses to the RFP will be evaluated by a panel(s) of individuals who will be involved in the project and/or understand the required services associated with Design / Build. Qualifications, Technical (Design) and cost will be considered in the final ranking of firms.

As indicated, the UCB will utilize Design / Build Services for construction of the project as described within.

Notice is hereby given to all interested parties that all firms will be required to meet minimum requirements to be considered for this project. To be considered as qualified, interested firms shall, as a minimum:

1. Be a licensed general contractor in Colorado.
2. Provide Design / Build services within the last five (5) years for at least two projects in excess of $500,000.00 construction cost, utilizing the expertise available through their Colorado office.
3. Demonstrate specific Design / Build experience in other project types of similar scale and complexity.
4. Demonstrate a bonding capability up to $500,000.00 for an individual project coincidentally with current and anticipated workloads and provide letter from surety that affirms this capability.

C. STATEMENT OF WORK

The Design Build Entity (D/B) is expected to provide design and construction services generally consistent with those performed by the Design / Build construction community except as superseded by the State’s standard Design / Build Agreement as contained within as Appendix B.

A Design Development and Construction Document approval process will be used subsequent to acceptance of a Technical (Design) / Cost proposal. During the pre-construction/design phase, the Design Build Entity (D/B) shall provide required documents and will utilize their skills and knowledge of design and construction to manage the Design Development and Construction Documents process, and provide pre-construction services (i.e., arrange for design review and approval by UCB, arrange for subcontracts, bonding, arrange for the procurement of labor and materials, develop a detailed project schedule, etc.).

It will be the responsibility of the design-build entity to provide the necessary services/work which includes but are not limited to the following:

1. Prepare a complete project design and provide all required services in accordance with the project plan, this RFP, and all applicable codes and regulations.

2. Provide all design and construction services to implement the goals of the project, including but not limited to architectural, civil, electrical, structural, and any specialty design consultants as required; construction services including supervision, subcontracting, scheduling, administration, and management.

3. Oversee and perform the complete design and construction processes.

4. Develop and update schedules.
