SUB-TOTAL SCORE: 60 \times 5 = 300 Max

6. COST PROPOSAL (score based on example below) = 300 Max

TOTAL SCORE: 600 Max

NOTES:
1. Agencies are encouraged to include additional criteria that reflect the unique characteristics of the project under each category to help determine the submitter's overall qualifications.
2. Weights are to be assigned prior to evaluation and are to be consistent on all evaluation forms.
3. Rating: 0.0-1.0 = Unacceptable 1.1-2.0 = Poor 2.1-3.0 = Fair 3.1-4.0 = Good 4.1-5.0 = Excellent
4. Total score includes the sum total of all criteria. Note: A passing score (as a percentage of the total points available) is to be established prior to evaluation.

EXAMPLE

1. Insert total score from each evaluator's GENERAL QUALIFICATIONS (SUBMITTAL) FORM (A) and INTERVIEW SELECTION/EVALUATION FORM (A1) only. Note: The maximum score for qualifications is 400 points and is equivalent to the maximum points available for qualifications. Therefore, each firm’s score is determined as a percentage of the maximum points available.
2. Add all evaluators’ total scores and divide by the number of evaluators to determine the average score for each firm’s qualifications.
3. Determine score from each evaluator’s TECHNICAL (DESIGN) / COST SELECTION/EVALUATION FORM (A2). Note: The maximum score for design is 300 points. Determine score for each firm’s cost proposal with the lowest cost being equivalent to a maximum score of 300 points. To score each cost proposal, use the example formula.
4. Add the average Qualifications score to the Technical (Design) / Cost proposal score to determine the cumulative score.
5. Numerically rank all firms with the highest scoring firm being the most qualified.
