Stone work continues as the masons work from face to face in a counterclockwise direction around the building. Interior mechanical and electrical work is also underway. Site work begins on the north side of the building in a couple weeks. 

As always, feel free to contact Stephen Graziano with any questions or concerns.

Garage Outage thru June 9
The Euclid Parking Garage is currently closed until June 9. PTS is encouraging patrons to use other pay lots as well as on-street pay spots. When the garage reopens, the NW exit will be closed and the pedestrian exits will be at the NE and SE corners, with ADA egress at the NE exit.

North Side Work in Phases thru Summer
The site work on the north side of the building will take place in phases over the summer. This will affect the sidewalk between the UMC and 18th Street. Pedestrian detours around the work will occur beginning June 12 and continuing until the end of September. They will be well-marked with signage and maps. Please refer to the attached map for more detail. Please remember that this is a dismount zone for bikers and skateboarders. Thank you for your patience.

Limited Access to Service Area
The service area between the UMC and the CASE building remains closed to pedestrian and non-essential auto traffic. The gates are manned during construction hours and open during non-construction hours.

Dismount Zones
Please help encourage bikers and skateboarders to abide by the marked dismount zones around the site.

Please continue to help us encourage pedestrians, bikers, and commuters to find alternate routes around the site to reduce congestion and maintain the safest environment possible throughout the project.
Temp ADA Ramp uses one side of existing stairs, which side is yet to be determined.
