Job Outlook

Depending on the field, many areas of employment within Geography is expected to grow about as fast as the average for all occupations through 2016. Some of the areas in high demand are Cartographers and Photogrammetrists, Surveyors, Geoscientists, Urban and Regional Planners, and Mapping Technicians. The widespread availability and use of advanced technologies, such as GPS, GIS, and remote sensing, will continue to increase both the accuracy and productivity of these workers, resulting in modest overall growth in employment.
