GEOGRAPHY 4103/5103
INTRODUCTION TO GEOGRAPHIC INFORMATION SCIENCE

LECTURES: T/R 12:30–1:45pm GUGG 205 LABS: R 3:30–6:20pm & F 9-11:50am, KESDA Lab (GUGG 6)

INSTRUCTOR: Stefan Leyk
stefan.leyk@colorado.edu

ASSISTANT: Johannes H. Uhl
johannes.uhl@colorado.edu

OFFICE HOURS: R 2:00-3:15pm, or by appt.
GUGG 201F

OFFICE HOURS: M 9:30-10:30am; T 2-3pm
KESDA Lab

UNDERGRADUATE LAB ASSISTANTS: Katharine V. Gregory, Emily K. Gulick & Jesse Nestler

OVERVIEW: This course introduces the theoretical concepts and use of Geographic Information Systems (GIS). It focuses on the nature of geographic information, the management of geospatial data and available methods for geographic analysis and modeling provided by a GIS. Lectures focus on the theoretical basis of GIS. During lab sessions students will be able to apply the concepts and techniques presented in lectures. The aim of this course is that students understand elementary GIS theory, have a working knowledge of ArcGIS, and be able to develop GIS-based solutions for spatial problems. Class Homepage can be found here: http://www.colorado.edu/geography/leyk/GIS1/Introduction.html

PREREQUISITES: GEOG 2053, 3053 or similar, a course in Introductory Statistics (such as GEOG 3023); familiarity with file management tasks in Windows.

LECTURES: Lectures emphasize concepts, present some case studies as well as instructions for specific lab exercises, and will include room for discussion. Attendance to lecture is highly recommended – you will see why! Attendance is REQUIRED for student presentations! Please turn off your cell phone during class.

LABS: You must register for one lab session, meeting every week, and attend full lab periods to pass the class. Four points will be taken off your final course grade for each missed lab, unless you have written permission in advance from the professor. Lab assignments are due at the beginning of the following lab session. Late lab assignments will be downgraded 20% per (working) day beginning on the due date. Students must hand in all lab assignments by 8pm Friday 11 December 2015 to receive a passing grade, even if they are submitted too late to receive any points. Please turn off cell phones during labs.

Students are required to back up their own data and assignments; we do not have backup facilities available in KESDA (but online). It is recommended to purchase at least one 2 GB flash drive and dedicate it to this class.

READING DISCUSSION & SHORT ESSAYS: Each student has to submit two short essays on two out of FOUR topics covered during Reading Discussions of no more than 750 words length each (excluding references). Graduate students have to submit on topics other than the one they present. See instructions on the homepage for more details.

READING DISCUSSION LEAD AND FINAL PAPER (GRAD STUDENTS ONLY): Groups of grad students will lead one out of four reading discussions and present the topic to the class. They will meet with Stefan before the session to discuss topics, strategies and material to be used. Each group will also submit a final paper on the chosen topic. See instructions on the class homepage for more details.

GRADING: The class grade is based on 260 (undergrad) / 330 (grad) points in total.

- 2 submitted short essays (out of 4 topics covered in reading discussions) - (40 points, NO late submission; essays to be submitted on paper BEFORE the reading discussion)
- 4 quizzes (60 points)
- 9 lab assignments (150 points; attendance required, lab submissions due at the beginning of next lab session; points are 20% docked per day for late submissions beginning on the due date)
- Class participation and attendance (10 points)

- Graduate presentations and final essays (70 points; presentation on reading topic of their choice and leading a discussion (35), final paper (35)).

Please Note: Make-up exams will be given only for documented medical emergencies! No incompletes!
### Schedule Fall 2015

</table>

Note: B10 (33-35) refers to pages 33-35 in Bolstad’s chapter 10.
Readings indicated in italics are the papers you have to read for the reading discussions.
Other author names in non-italics refer to additional readings on specific topics.

### TOPICS & READINGS FOR READING DISCUSSIONS:

RD1 **GIS Applications**: TBD. Suitable readings will be provided once graduate presenters have signed up

RD4 **Scale in GIScience**: Goodchild (2011), Marceau (1999), Montello (2001)
Readings (available on class homepage; *reading discussion material)

Disability
If you qualify for accommodations because of a disability, please submit a letter from Disability Services to your professor a letter from Disability Services in a timely manner (for exam accommodations provide your letter at least one week prior to the exam) so that your needs can be addressed. Disability Services determines accommodations based on documented disabilities. Contact Disability Services at 303-492-8671 or by e-mail at dsinfo@colorado.edu. If you have a temporary medical condition or injury, see Temporary Medical Conditions: Injuries, Surgeries, and Illnesses guidelines under Quick Links at Disability Services website and discuss your needs with your professor.

Religious observances
Campus policy regarding religious observances requires that faculty make every effort to deal reasonably and fairly with all students who, because of religious obligations, have conflicts with scheduled exams, assignments or required attendance. In this class, please let the instructor know about such conflicts as soon as you studied the schedule for this semester in particular the exam dates.

Policy on Classroom Behavior
Students and faculty each have responsibility for maintaining an appropriate learning environment. Those who fail to adhere to such behavioral standards may be subject to discipline. Professional courtesy and sensitivity are especially important with respect to individuals and topics dealing with differences of race, color, culture, religion, creed, politics, veteran's status, sexual orientation, gender, gender identity and gender expression, age, disability, and nationalities. Class rosters are provided to the instructor with the student's legal name. I will gladly honor your request to address you by an alternate name or gender pronoun. Please advise me of this preference early in the semester so that I may make appropriate changes to my records. See policies at http://www.colorado.edu/policies/classbehavior.html and at http://www.colorado.edu/studentaffairs/judicialaffairs/code.html#student_code

Policy on Discrimination and Harassment
The University of Colorado Boulder (CU-Boulder) is committed to maintaining a positive learning, working, and living environment. The University of Colorado does not discriminate on the basis of race, color, national origin, sex, age, disability, creed, religion, sexual orientation, or veteran status in admission and access to, and treatment and employment in, its educational programs and activities. (Regent Law, Article 10, amended 11/8/2001). CU-Boulder will not tolerate acts of discrimination or harassment based upon Protected Classes or related retaliation against or by any employee or student. For purposes of this CU-Boulder policy, "Protected Classes" refers to race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, or veteran status. Individuals who believe they have been discriminated against should contact the Office of Discrimination and Harassment (ODH) at 303-492-2127 or the Office of Student Conduct (OSC) at 303-492-5550. Information about the ODH, the above referenced policies, and the campus resources available to assist individuals regarding discrimination or harassment can be obtained at http://www.colorado.edu/odh

Policy on Plagiarism
All students of the University of Colorado at Boulder are responsible for knowing and adhering to the academic integrity policy of this institution. Violations of this policy may include: cheating, plagiarism, aid of academic dishonesty, fabrication, lying, bribery, and threatening behavior. All incidents of academic misconduct shall be reported to the Honor Code Council (honor@colorado.edu; 303-735-2273). Students who are found to be in violation of the academic integrity policy will be subject to both academic sanctions from the faculty member and non-academic sanctions (including but not limited to university probation, suspension, or expulsion). Other information on the Honor Code can be found at http://www.colorado.edu/policies/honor.html and at http://www.colorado.edu/academics/honorcode/

Department of Geography Code of Conduct
In the Department of Geography, instructors strive to create an atmosphere of mutual trust and respect in which learning, debate, and intellectual growth can thrive. Creating this atmosphere requires that instructors and students work to achieve a classroom in which learning is not disrupted. At the most basic level, this means that everyone attend class, be prepared with readings and assignments completed, and that students pay attention. This means no conversations with friends, reading the newspaper, coming late, or leaving early. Such behavior is disruptive to the instructor and to your fellow classmates.

These basics of classroom etiquette are an important means of building and showing mutual respect. Inevitably, however, disagreements will arise. Sometimes these disagreements will be about content, sometimes about grades or course procedures, and sometimes they will be about the treatment of participants in the class. In order to facilitate the resolution of these disagreements, the following guidelines should be followed by everyone:

- All interactions must be guided by mutual respect and trust.
- If you are bothered by some aspect of the class, identify what it is that is bothering you and center the discussion on that issue.
- Address issues that concern you early. Problems are easier to resolve before they fester.
- Consider whether it is best to address your concerns in class or in a separate appointment with the instructor. Remember, behavior that disrupts your fellow classmates is not acceptable.
- Abusive speech or behavior will not be tolerated in any interaction between students or between student and instructor. If an instructor feels that your speech or behavior is abusive, you will be asked to leave the room. If you believe an instructor has become abusive, you may leave the room and talk with the department chairperson. Debate and discussion can continue when all parties proceed with mutual respect.
- If mutual respect cannot be restored, either you or the instructor may take the issue to the department chairperson or the Campus Ombuds Office.
