

Thanks to all who came to the [Cider and Cookies Event](#) last Tuesday evening at the Gerlands' apartment: it was a tremendous turnout and tremendous fun. [Kate, Nora, Duma, and I](#) look forward to [hosting another open house event soon!](#) You'll see a lot of flock events coming up this week. [These are "open" flock events, meaning that it is possible for non-flock members to join:](#) take a look at the offerings and, if one looks especially fun, just email that flock leader and say that you'd like to join. See below for our flock leaders' smiling faces and emails, and don't forget to get a punch on your attendance tracker!

# Visual Arts, Majors, and Careers

**By Chelsea Magyar**

Kate Harper bugged her dad for the Sunday cartoons when she was little. She made her own cartoons, giving drawings to friends, covering sheets of paper with alien planets, and developing an interest in visual arts with a comic style.

Now a CU freshman who lives in Smith Hall, Harper studies studio art. She still likes cartoons. She enjoys drawing caricatures and figures with emotion and movement.

While art interests Harper, she knows majoring in it poses risks.

"It's an education that for a lot of people never really pays off, but I know that if I can find some sort of specialty and combine it with something really practical, then I don't have as much to be scared about. But I don't know, you can't really predict stuff like that."

Harper wants to combine art with something like business or graphic design. In high school, she created various logos for different school groups, and the football team even paid her to design a t-shirt. "If I could find something to maybe combine with the graphic design stuff and the cartooning stuff, I would love that."

Harper does not know where her art will take her, but she keeps drawing. She tries to draw every day, whether for her art class or for pleasure on the side.
