The Challenge of Inclusion, Seen from Beyond.

Seen in retrospect, a seemingly impossible hurdle can become a positive turning point in one’s life, a step forward and up. Director of Honors RAP Oliver Gerland will illustrate this point by drawing on his experiences as parent of a child with disabilities and as artistic collaborator of young adults with disabilities. It is useful, he will argue, to regard the challenges associated with increased “diversity and inclusion” from the perspective of having benefited from them.
