Jane Menken Annual Distinguished Lecture

Presented by the CU Population Center

Why Population Trends Matter

Public Lecture

Monday, March 17th 2014
3:30 pm - 5:00 pm
IBS Building, Room 155 A

Projecting Mortality at the end of the Epidemiological Transition

Research Presentation

Tuesday, March 18th 2014,
10:30 am - 12:00 pm
IBS Building, Room 155 A

Dr. Bongaarts is a Vice President of the Population Council and a distinguished scholar. His research examines fertility determinants, population-environment relationships, the demographic impact of the AIDS epidemic, population aging, and population policy options in the developing world.

He serves as chairman of the Panel on Population Projections of the National Academy of Sciences, National Research Council. He is a member of the Royal Dutch Academy of Sciences, the US National Academy of Sciences, and a fellow of the American Association for the Advancement of Science.

The annual lecture honors Distinguished Professor and Director of IBS, Dr. Jane Menken who came to CU-Boulder following many productive years at Princeton University and the University of Pennsylvania. With a renowned research career focused on fertility dynamics, population policy and HIV/AIDS and child mortality in developing countries, Dr. Menken is a member of the National Academy of Science, a former President of the Population Association of America, and a Laureate of the International Union for the Scientific Study of Population.
