July 2, 2002

ENERGY AND ENVIRONMENTAL POLICY EXPERT JOINS CU NATURAL RESOURCES LAW CENTER ADVISORY BOARD

Deana Perlmutter, Senior Vice President and Manager of The Dutko Group Companies-Denver, has joined the Natural Resources Law Center Advisory Board. “Deana has been a strong force for regulatory and policy change to encourage and assist industries in utilizing advanced technologies,” said Jim Martin, Center Director. “She has worked closely with senior officials throughout the federal, state and local government, making her a valuable addition to our already strong Board.” Perlmutter focuses her efforts on national energy and environmental technology policy, with a particular focus on sustainability. She assists clients in the regulatory and policy arenas in forwarding technological solutions to environmental challenges and in developing public policy initiatives through partnerships between government and private industry. She was the key Industry Liaison to the White House Conferences on Environmental Technology and one of the principal architects of the Partnership for Advanced Technology in Housing (PATH) program, a Presidential initiative to accelerate the development and use of advanced technologies to improve the quality, durability, environmental efficiency and affordability of housing. The Dutko Group Companies, Inc. is a public policy management company based in Washington, DC, which helps clients resolve conflicts when the policy debate conflicts with bottom line business concerns.

The Natural Resources Law Center is a research and educational program at the University of Colorado Law School. The mission of the Center is to promote sustainability in the rapidly changing American West by informing and influencing natural resource laws, policies, and decisions. Through a comprehensive program of research, education, and advice, the Center seeks to inform and influence legal and policy decisions on western natural resources.

The Center marks its 20th anniversary this year.
