

ANKED CONSISTENTLY AMONG THE VERY BEST IN THE NATION and set at the base of the Rocky Mountains, Colorado Law has been the gold standard for natural resources, energy, and the environment since the 1950s. Today's faculty members are international leaders and scholars who are deeply committed to creative teaching.

Colorado Law's innovative environmental and natural resources curriculum, with broad-based courses and practicum opportunities, provides you with the key range of competencies needed to become a multi-disciplinary practitioner. As a leader and innovator in developing legal professionals, we help prepare you for a successful career from private practice to public service.

From the students' perspective, the program is extensive, rich, and diverse. On any given day students may be studying the initiatives of Teddy Roosevelt and other giants in the field, meeting with scientists to discuss the impact of oil and gas fracking on rivers and groundwater aquifers, taking a field trip to an Indian reservation to observe the tribe's timber harvesting program, debating the merits of a controversial case in front of the Supreme Court, or actually appearing in court or before regulatory agencies as part of the excellent American Indian Law Clinic.

Cheschense

CHARLES WILKINSON
Distinguished Professor
Moses Lasky Professor of Law
Chair of Getches-Wilkinson Center Board

ACADEMICS

Colorado Law's curriculum provides you with a strong platform on which to build your career. In addition to the opportunity to take affiliated courses in environmental studies, we employ a solid foundation in the fundamentals of law, robust theoretical inquiry, doctrinal and policy analysis, real world experience, legal reasoning tools, and professional skills. We will train you to be ready for a world of constant change.

"Colorado Law offers its students a unique, multi-disciplinary approach to water law. The professors draw from related areas such as engineering, hydrology, hydrogeology, and geography. The departure from black letter law results in young lawyers that have a firm grasp on the key water issues facing the West."

"I've had wonderful opportunities in the ar-

eas of environmental law and policy making

over the years. I have no doubt that none of

this would be possible had I not been a part

of Colorado Law's environmental and natural

resources program, and learned from Charles

Wilkinson, David Getches, and others."

CLINICS

GETCHES-GREEN NATURAL RESOURCES AND ENVIRONMENTAL LAW CLINIC

One of the first in the nation, students engage in litigation and advocacy aimed at protecting the natural resources of the Rocky Mountain region.

AMERICAN INDIAN LAW CLINIC

Established in 1992, this clinic was among the first of its kind in providing quality legal representation to low-income Native clients with specific Indian law-related problems.

DUAL DEGREES & CERTIFICATES

JD/Master in Environmental Studies JD/PhD in Environmental Studies JD/Master of Urban Regional Planning (CU-Denver) **Graduate Energy Certificate** Interdisciplinary Graduate Certificate Program in Environment, Policy, and Society LLM in Natural Resources Law

CARFFRS

Our commitment to helping you excel in your professional endeavors comes through the individualized support of our Career Development Office. With four career advisors with JDs, we will connect you with employers and help you succeed in the current job market. The depth and breadth of experiences, theory, and skills you will gain will enable you to make meaningful contributions as environmental and natural resource practitioners upon graduation. Our 7,000+ alumni network provides you access to and support from leaders across the nation.

JOURNALS

Colorado Natural Resources, Energy, and Environmental Law Review

"Colorado Law helped me tremendously in my job search. The Career Development Office alerted me to the Presidential Management Fellow (PMF) opportunity and assisted me through the various assessment stages. In addition to help from faculty members, Colorado Law also put me in touch with alumni who have been hired through the PMF program."

STEPHEN CHESTERTON ('11) U.S. Forest Service Washington, D.C.

"The professors and coursework at Colorado Law provided me with the technical and practical skills necessary to pursue a diverse legal career in private practice, as an Assistant United States Attorney, and in-house counsel."

University of Colorado Law Review Annual Natural Resources Symposium

"We are enthusiastic about employing Colorado Law graduates. We know they will have a solid understanding of natural resources, energy, and environmental law. We also know they will be committed to the challenge of solving our region's complex environmental problems and will enhance our reputation with the quality of their work."

KARIN P. SHFI DON President Western Resource Advocates

"The law clerks and lawyers we have hired over the years have always been very insightful. They are tenacious and know how to determine what needs to be done to accomplish our goals, which is what we want."

HERRICK LIDSTONE, JR. ('78) Attorney and Shareholder Burns, Figa & Will PC

GETCHES-WILKINSON CENTER FOR NATURAL RESOURCES, ENERGY, & THE ENVIRONMENT

As the nexus of Colorado Law's efforts to solve the most pressing natural resource problems facing the state, region, nation, and globe, the center serves the people of the American West, the nation, and the world through creative, interdisciplinary research; bold, inclusive teaching; and innovative problem solving in order to further true sustainability for our lands, waters, and environment.

Named for two giants in the field, David Getches and Charles Wilkinson, the Getches-Wilkinson Center serves as the convener and platform for thought leadership on diverse and increasing interwoven topics ranging from environmental justice to climate change, public lands management to energy development, and the governance of the Colorado River to tribal resource management.

The center derives its energy from its student researchers, as students are directly involved in research, problem solving, and thinking on these issues.

STUDENT FIELD RESEARCH

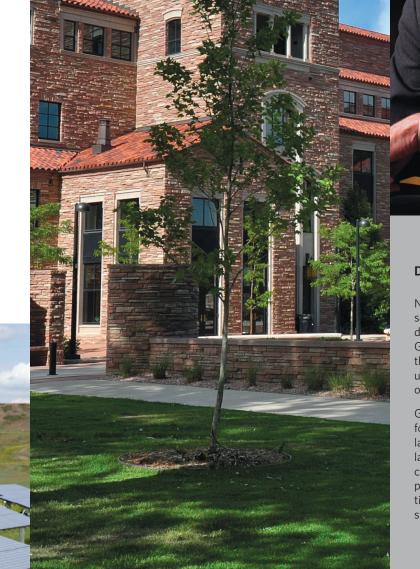

In addition to doing research for the center, you have the opportunity to travel to and participate in national and international programs and projects. Recently students have helped clients with water rights for acequias in rural Colorado; investigated legal issues regarding land use and climate change in Brazil, Indonesia, Mexico, and other tropical forest countries; researched energy poverty in Peru; worked on renewable energy and climate adaptation projects with tribes in the American West; and focused on water rights in the Klamath River Valley in the Pacific Northwest.

DAVID GETCHES

Namesake of the Getches-Wilkinson Center and an iconic former dean at Colorado Law, David Getches, is an enduring figure in the history of Indian Law and natural resources law not only in Colorado, but in the American West.

Getches was a tireless advocate for protecting natural resources, land, and water. For Getches, the law of the American West was connected to the land and the people who live there, and he continually conveyed this idea to his students.

FACULTY

WILLIAM BOYD

ASSOCIATE PROFESSOR MA, PhD, University of California, Berkeley; JD, Stanford University

Professor William Boyd was an associate at Covington & Burling in Washington, D.C., where he provided energy and environmental regulatory and policy advice. He also served as minority counsel and American Association for the Advancement of Science Congressional Science and Technology Policy Fellow with the U.S. Senate Committee on Environment and Public Works.
