

University of Colorado at Boulder
Leeds School of Business
5-year BS/MS BA Concurrent Degree Program in Accounting

Students who seek admission to the Concurrent BSBA/MSBA Degree Program in Accounting, and who expect to graduate with both degrees in May 2016, must submit the two attached applications to Geri Lameman in KOELBEL S405F no later than Tuesday, July 15, 2014. There is no application fee or deposit. You do not need get letters of recommendation for the concurrent program. With your application form, you do need to attach 1.) an updated copy of your Progress Report from the Undergraduate Advising Office or degree audit and 2.) a copy of your Unofficial Transcript.

Certified Public Accountant (CPA) Education Requirements

The Concurrent Program prepares students for a variety of rewarding career paths, while specifically meeting the long-term educational requirements to sit for the CPA exam in Colorado.

Admission Criteria

Criteria for admission to the Concurrent Program include a minimum of 3.0 cumulative overall GPA, and a minimum of 550 on the GMAT exam. We will consider the best score out of two tries on the GMAT exam. Admission is competitive.

Internships

Students who have been admitted to the Concurrent Program can get professional accounting work experience through an internship. Most internships are available during Spring semester (busy-season), though some are available over the summer. Accounting interns must be paid, and must receive overtime pay where appropriate. Students who enroll in and complete the requirements of ACCT 6000 (which includes documentation of working at least 300 hours) can receive 3 credits of Pass/Fail credit. These 3 hours may be applied toward the undergraduate business elective requirement, assuming the student does not exceed restrictions on Pass/Fail credits toward the BS degree.

Busy-season internships are available each year during the first two thirds of the spring semester. Internships begin early January and end the Friday before Spring Break. During late March/April of the spring semester, students will take a compressed version of an advanced accounting course, and complete an independent research project on a current topic directly related to their internship experience.

Please see Geri Lameman, MS Accounting Program Assistant, (KOELBEL S405F, e-mail leedsmsa@colorado.edu) if you have questions about the Program. Once admitted to the BS/MS program, students should review their degree plans with the MS Program Director, prior to registering for classes each semester.

University of Colorado Boulder
Application for Admission to the Concurrent Bachelor's/Master's Degree Program

Student Instructions: Please complete the top portion of this form and return to your department along with any required department information for evaluation of admissions qualifications.

	major code	major code	specialization

I understand that:

- ✓ if admitted to this program that I must be released from any other double degree or double major program.
- ✓ if admitted to this program, the 4-year guarantee for graduation will not be applicable to my enrollment.
- ✓ I am working toward completion of both undergraduate and graduate programs simultaneously and that I must complete all the degree requirements to receive both degrees at the end of the program. If I withdraw from the program and complete the requirements for the bachelor's degree as described in the policies, I may receive a bachelor's degree. If I wish to pursue a regular master's degree or a doctoral degree after withdrawing from or completing this program, I must apply and be admitted to the Graduate School. All Graduate School minimum standards apply to eligibility for admission to the Graduate School; department-specific requirements may be waived by the department as approved in the department's concurrent degree proposals. In this case, courses may not be overlapped.
- ✓ to comply with Title IV Higher Education regulations, CU-Boulder students pursuing a concurrent bachelors/master's degree will automatically be changed to graduate status after the completion of 130 credit hours (or 145 credit hours for a student in the College of Engineering and Applied Science). Students at graduate status are assessed graduate tuition rates and are no longer eligible for COF. In addition, graduate students receiving financial aid are considered "independent" and are no longer eligible for aid requiring undergraduate status.
- ✓ the accounting concurrent degree program requires 150 credit hours to complete.

I have read the departmental policies and requirements for this program.
