

Student of the Month

Brian Larsen is a 4th year PhD student working for Prof. Conrad Stoldt in the Mechanical Engineering department. His research involves bioengineering nanoparticles for biomedical applications, including biosensing techniques and molecular magnetic resonance imaging. He performs his research in collaboration with the Barbara Davis Center for Juvenile Diabetes at the University of Colorado Health Science Center.

Prior to his graduate career at CU-Boulder, he earned his B.S. at the Illinois Institute of Technology in Chicago and was a Mechanical Engineer for two years at Siemens Medical Solutions in Illinois.

After completion of his PhD, he plans to pursue a career in academia. In his free time, he enjoys archery, pottery, and cricket.
