*Research at CU-Boulder is often interdisciplinary and/or involves awards administered by campus centers or institutes. Thus, some faculty have "home" departments, but some or all of their research is administered through another unit. These awards are not included in the column to the left. This column provides the additional value of awards for faculty work in an affiliated center, institute, or other department.

dollar value of awards received
(in millions)

awards RECEIVED

During fiscal year 2001-02, OCG received 1,693 sponsored project awards representing a total dollar value of \$229 million. This is about a 5 percent increase in award dollars compared to the previous fiscal year. The total dollar value of sponsored project awards has increased every year from fiscal year 1981-82, except for fiscal year 1995-96 (primarily reflecting a variation in the way that NOAA provided funding to operate one of CU-Boulder's joint institutes).

Most Boulder campus academic departments and disciplines receive sponsored project awards. Thus CU-Boulder students in a broad range of majors benefit from sponsored project activity. In addition, the Boulder campus attracts funding from a wide variety of sources. CU-Boulder has been especially successful in obtaining federal government funding, with approximately 90 percent of all sponsored project funding coming either directly or indirectly from federal government agencies.
