

The Honors CU-LEAD Scholars Program

Program Overview

The Honors CU-LEAD Scholars Program is offered through the College of Arts & Sciences and provides students with small classes in which the expectation is high quality interaction between students and faculty as well as among the students themselves. The program offers enhanced opportunities for faculty-student mentoring and research and personalized advising through the Honors office. The goal of Honors at CU is to provide students with a small college liberal arts “neighborhood” within the dynamic “city” that is CU.
