Bertram Morris (1908-1984) was born in Denver. Educated at Princeton and Cornell, he taught at the University of Colorado from 1942 until his retirement in 1977. He published several books including The Aesthetic Process, Philosophical Aspects of Culture, and Institutions of Intelligence.

Bertram Morris is remembered as much for his committed involvement in the social issues of his community as for his scholarly work. In 1955 he began an outreach program at Manual High School in Denver that still continues. In 1973 he was given a special award by the American Civil Liberties Union of Colorado for his efforts on behalf of academic freedom and his work to improve conditions at the Boulder County Jail.

As an expression of admiration and gratitude, the Philosophy Department established this colloquium when Bertram Morris retired in 1977.

Help Us Continue the Bertram Morris Colloquium on Social Philosophy

University faculty, staff, former students, and friends of Bertram Morris have now contributed approximately $22,200 to our endowment campaign. Our goal for the endowment is $40,000. Please help us reach it—send your tax-deductible contribution to the University of Colorado Foundation, Boulder, CO 80309.

Eleventh Annual
Bertram Morris Colloquium on Social Philosophy

Ethics and Medical Technology

February 27 and 28, 1987

Cosponsored by the Department of Philosophy
University of Colorado at Boulder and Boulder Community Hospital and the United Medical Staff of Boulder
The Department of Philosophy presents the 11th annual Colloquium on Social Philosophy in honor of its colleague, Prof. Beatrice. This event is open to the public and features presentations on various topics related to social philosophy.

The Colloquium discusses several key issues, including:
1. The use of advanced medical technology to address social problems.
2. Ethical dilemmas in organ transplantation.
3. The role of technology in decision-making for organ donation.
4. The impact of medical technology on health care systems.
5. The ethical implications of new medical technologies.

The Colloquium is open to the public and will feature presentations by leading experts in the field of social philosophy.
