

Exam Content

Exam 1 – Chapters 1-5 inclusive.

Exam 2 – Chapters 6-9 inclusive.

Final Exam – This will be cumulative, but will have an emphasis on the newer material which has not yet been covered in an exam (chapters 10-14).

The final exam will be all multiple choice and True/False, similar to the first portions of the midterms. This is because it is a late exam and we would not have the time to get the Long Answer portions graded.

The midterm exams will include a combination of different types of problems - a good number will be conceptual, there will be some requiring calculations like the CAPA (but more straightforward than the difficult CAPA problems), and there will be some hand graded ones similar to the tutorial problems/long answer problems.
