Dear Graduate:

One of the greatest honors for the University of Colorado Board of Regents, the institution’s governing board, is to be part of a graduation ceremony. Your success is a success for us all. Your degree is a measure not only of an accomplishment of dedication and talent, but also notice to the world that you have the intellectual gifts and discipline to contribute greatly to our community.

Your commencement ceremony, like every University of Colorado graduation since 1935, will close with the reading of the timeless Norlin Charge. Today “marks your initiation in the fullest sense of the fellowship of the university, as bearers of her torch, as centers of her influence, as promoters of her spirit.” Each year, the University of Colorado grants thousands of bachelor’s, master’s, professional and doctoral degrees to some of the greatest minds in our country and the world. Today, we proudly add your name to this notable group of individuals. Congratulations on your hard-earned accomplishment.

Sincerely,

The Regents of Colorado

Front Row: Linda Shoemaker, District 2 (Boulder); Kyle Hybl, Chairman, District 5 (Colorado Springs); Irene Griego, Vice Chair, District 7 (Lakewood); Sue Sharkey, District 4 (Castle Rock).
Dear Graduate,

Congratulations, your hard work has brought you to this day. But your work is not done. In fact it is only beginning. Our future as a society rests in your hands. The University Seal you will soon see stamped on your diploma depicts a lamp in the hands of youth with a Greek inscription that reads: “Let Your Light Shine.”

At the University of Colorado Boulder we have aspired to give you a love of lifelong learning and empowered you to lead the way with your youthful light.

You are in the morning of life and the transformative experience of college has prepared you for career and contribution in a diverse world and a global economy. In your academic career at CU-Boulder you have learned valuable lessons in critical thinking, civil discourse, collaborative decision-making and creative solutions, skills admired by employers and essential in a complex society.

Since 1882, when six young people graduated from the university as its first class, the University of Colorado has been conferring degrees to prepare graduates to succeed in a constantly changing world. Just as you carry on the legacy of our first alumni, your path of achievement and accomplishment will be followed by future generations.

Congratulations. You have earned it. Hold your flame high.

Sincerely,

Bruce D. Benson
President of the University of Colorado

Philip P. DiStefano
Chancellor of the University of Colorado Boulder
Norlin Charge to the Graduates

The first commencement at the University of Colorado was held for six graduates on June 8, 1882, in the chapel of Old Main. It was not until 40 years later, on September 4, 1922, that the first summer commencement was held. Since the first commencement in 1882, 342,814 degrees have been awarded by the University of Colorado Boulder. The traditional Norlin Charge to the graduates was first read by the late President George Norlin to the June 1935 graduating class.

You are now certified to the world at large as alumni of the university. She is your kindly mother and you her cherished sons and daughters.

This exercise denotes not your severance from her, but your union with her. Commencement does not mean, as many wrongly think, the breaking of ties and the beginning of life apart. Rather it marks your initiation in the fullest sense into the fellowship of the university, as bearers of her torch, as centers of her influence, as promoters of her spirit.

The university is not the campus, not the buildings on campus, not the faculties, not the students of any one time—not one of these or all of them. The university consists of all who come into and go forth from her halls, who are touched by her influence, and who carry on her spirit. Wherever you go, the university goes with you. Wherever you are at work, there is the university at work.

What the university purposes to be, what it must always strive to be, is represented on its seal, which is stamped on your diplomas—a lamp in the hands of youth. If its light shine not in you and from you, how great is its darkness! But if it shine in you today, and in the thousands before you, who can measure its power?

With hope and faith, I welcome you into the fellowship. I bid you farewell only in the sense that I pray you may fare well. You go forth, but not from us. We remain, but not severed from you. God go with you and be with you and us.

Academic Dress

In 1896, the colleges and universities in the United States adopted a uniform code governing academic dress. Those who are receiving a master's or doctoral degree from the University of Colorado wear hoods lined with the university colors, silver and gold. The velvet border of the hood indicates the degree and usually follows the same code as the color of the tassels.

The Oxford cap, usually referred to as a mortarboard, has a long tassel that is fastened by a button on the top. Candidates for baccalaureate degrees wear the tassel pendant over the right front of the cap before the degree is conferred, and over the left thereafter. The color of the tassel on the bachelor's cap indicates the field of study, with the exception of the BA degree whose candidates wear white tassels indicating the arts.

The Presidential Chain of Office and the University Mace were created by Mary Sartor, MFA, University of Colorado Boulder. Both were gifts to the university by Mr. and Mrs. David G. Hawthorn, class of 1924.

Colorado gold and silver are used in both pieces to symbolize the importance of these minerals to the history of the state. The chain’s gem stones also consist entirely of minerals from Colorado.

The chain, created in 1980 for the inauguration of President Arnold R. Weber, holds three suspended pendants. The back pendant is the seal of the state of Colorado surrounded by a golden ribbon representing the golden circle of knowledge. The top pendant in the front is the seal of the University of Colorado surmounted by an arch set with diamonds and topaz, signifying the necessary link between the search for knowledge and its practical application to the world beyond the university. The laurel wreaths that decorate the bottom of the seal symbolize honor and success. At the center of the bottom pendant is a gold topaz indicating the quest for knowledge. The surrounding ring is paved with fragmented cubes and diamonds.

The University of Colorado Mace was created for the commencement ceremonies of May 1984. The foot of the scepter is encased in sterling silver bound in 14-karat gold, ending in an intaglio of the seal of Colorado. The shaft of the mace was carved from a black walnut tree thought to have been one of the saplings given to the settlers of the Colorado Territory by President Abraham Lincoln.

Sterling silver is also used in the crown, and the university seal is bound in gold and supported by an inner rod of gold surrounded by eight arching tapered silver ribs. At the base, the motto of the university, translated as “Let your light shine,” circles the crown in Greek characters. The wooden staff is bound at intervals in gold and silver rings.

The University Seal

In its history, the University of Colorado has used three different seals. The current seal, adopted in 1908, depicts a male Greek classical figure sitting in front of a pillar and holding a scroll. Next to the figure, laurel branches frame a burning torch. The inscription in Greek reads “Let Your Light Shine.” The seal’s designer, Henry Read of Denver, chose the classical motif because Greek civilization “stands as the criterion of culture.” The laurel symbolizes honor or success; the youth suggests the “morning of life”; and the scroll represents written language.

From 1893 to 1908, the university seal was a copy of Wyon’s medallion, “Science Trims the Lamp of Life.” In this version, a Greek woman knelt before a lamp, and stalks of mariposa lilies decorated the border. Before 1893, an adaptation of the Colorado state seal was used, but it was never adopted by the Board of Regents.

The seal is used primarily on official documents, such as diplomas and transcripts that have been issued on behalf of the university. The Board of Regents uses the seal on its official documents and publications. The seal also appears on the President’s Chain of Office, the University Mace, regent regalia, and various formal publications.

Charles “Chuck” W. Hull

In the Wikipedia description of 3D printing, a process used to make plastic or metal objects and models for medicine, industry and education, Charles “Chuck” W. Hull is cited as the inventor. Without his far-reaching vision and engineering expertise, there would be no models of tumors and organs to guide surgeons, no complex parts used in cars and machines and no prototypes designed by student project teams.

Hull grew up in the Colorado towns of Clifton and Gateway and is a graduate of Central High School in Grand Junction. In 1959, he earned an associate’s degree in science and engineering from what is now Colorado Mesa University. After receiving a bachelor’s degree in engineering physics from the University of Colorado in 1961, Hull began his career as an engineer with Bell & Howell, followed by a term as engineering manager with DuPont before joining UVP Inc., a manufacturer of UV products. While at UVP, Hull developed the idea that later became 3D printing. In 1986, Hull co-founded 3D Systems to further develop his technology and make it commercially viable. Not only did he invent the solid imaging process known as stereolithography, but he and 3D Systems also developed the .stl file format that allowed the successful communication of data between computer-aided design software and the printing of 3D objects. With the founding of 3D Systems, he initiated the 3D printing industry and continues to lead it today with cutting-edge innovations ranging from state-of-the-art production of 3D printers that have changed the game of manufacturing to the first home-certified 3D printer, the award-winning Cube.

Hull has over 90 U.S. patents and more than 20 other patents around the world in ion optics and rapid prototyping, while 3D Systems has over 400 U.S. patents. Calling him the “Father of 3D Printing” is no exaggeration. Today, nearly 30 years after the founding of his company, 3D printing and rapid prototyping have made their way into mainstream automotive, aerospace and medical device manufacturing, to name just a few. As executive vice president and chief technology officer for 3D Systems, Hull continues to advance the technology.

Numerous professional organizations have recognized Hull for his accomplishments and impact on society, most recently the Industrial Research Institute’s Achievement Award (2015), the European Inventor Award (2014), the National Inventors Hall of Fame (2014), the Economist’s Innovation Award (2013) and an Honorary Doctorate in engineering from Loughborough University in the U.K. (2005).

The Board of Regents is pleased to award the honorary degree Doctor of Science, honoris causa, to Charles W. Hull for his innovations in engineering and as a strong advocate for education and training for students.
It is often said when one door closes, another door opens. Life’s difficulties intervened while Antonio “Tony” Mendez was pursuing a visual arts education at CU in 1959. Unable to continue due to financial constraints, Mendez left the university after his first year to work as an illustrator and tool designer for Martin Marietta where he designed components for the Titan IIIC ICBM (intercontinental ballistic missile). In 1965, the CIA hired Mendez as an espionage artist for the Technical Services Division, specializing in the support of clandestine and covert CIA operations. His work in the agency focused on forging documents and creating disguises for undercover operatives in espionage work in support of national security.

Most notably, he engineered and conducted the “Canadian caper,” the successful exfiltration of six American diplomats hiding in the Canadian embassy in Tehran during the Iran hostage crisis of 1979, a feat for which he was awarded the Intelligence Star for Valor. The 2012 movie *Argo*, directed by and starring Ben Affleck, is based on the daring rescue. During his time with the CIA, Mendez served his country with distinction in times of great turbulence, showing dedication, creativity and courage. By the time Mendez retired in 1990, he had been promoted to SIS-2, the equivalent of a two-star general, and was also awarded the CIA’s Intelligence Medal of Merit and two Certificates of Distinction. On the 50th anniversary of the CIA in 1997, he was one of 50 officers chosen from tens of thousands who had worked at the CIA, who were awarded the Trailblazer Medallion. In 2000, he received the Order of the Sphinx Cross for serving the Allied cause for freedom behind enemy lines.

After his retirement, Mendez served as a consultant to the U.S. Intelligence Community. He is the author of three nonfiction books: *Master of Disguise: My Secret Life in the CIA*, *Spy Dust* and *Argo: How the CIA and Hollywood Pulled Off the Most Audacious Rescue in History*. An award-winning artist, Mendez has had scores of exhibits in the U.S. and abroad. He is a founding board member of the International Spy Museum. As he battles Parkinson’s, Mendez is an active spokesman helping raise funds for new treatments for the debilitating disease.

While Mendez may not have been able to finish his degree at CU, he nonetheless carries special memories and joy about his experience and has shared that energy with the parents of CU students.

The Board of Regents is pleased to award the honorary degree Doctor of Humane Letters, *honoris causa*, to Antonio “Tony” Mendez in recognition of his incomparable contributions to the nation.
Honorary Degree

Polly Dix Schaafsma

Polly Dix Schaafsma is considered one of the world’s foremost authorities on aboriginal rock art and has contributed significantly to both the cultural and scientific development of the American Southwest through her studies. Her influence on the field of rock art studies covers a wide swath of geographical territory and time. Not only has she spent over half a century documenting and interpreting rock art, she has also changed the way historians, anthropologists and archaeologists understand the pre-contact period in the present day Southwest. Through frequent collaborations with Native peoples, Schaafsma greatly enhanced the understanding of contemporary Pueblo and Navajo peoples. These collaborations in turn enriched her understanding of complex theoretical issues in the areas of art, history and anthropology.

Schaafsma has also expanded our understanding of Katchina ceremonialism, Navajo cosmology and Pueblo warfare, and she shed light on the interaction of southwestern tribes with cultures in Mesoamerica. In 1974, Schaafsma and her husband, Curtis, published a path-breaking article marshaling all of the known archaeological evidence on the topic of the origins of Katchina ceremonialism.

In 1962, Schaafsma earned a master’s degree in anthropology from CU-Boulder. She served as a graduate assistant to the late Joe Ben Wheat, who was a professor of natural history, an archaeologist and the first curator of anthropology for the Museum of Natural History at CU-Boulder. In addition to publishing seminal overviews of aboriginal rock art in New Mexico, Utah and Chihuahua, and writing monographs on Canyon de Chelly National Monument, Chaco National Historic Park and several other sites, Schaafsma has authored and co-authored 10 books and 50 articles and book chapters in leading academic publications. Her writings cover a broad range of topics, including Pueblo kiva murals, war imagery and ideology, Katchina origins, shamanism and magic, visual ecology, sacred bundles and warfare versus ritual violence, among others.

Three of her most popular books are *The Rock Art of Utah* (still in print and selling after 34 years), *Rock Art in New Mexico* (revised and reprinted in 1975 and still selling) and *Rock Art of the Southwest* (now in its 10th printing since 1980). Her work is highly regarded by tribal elders and Native scholars and she has become a household name among naturalists, photographers, amateur archaeologists and government field agents.

The Board of Regents is pleased to award the honorary degree Doctor of Science, *honoris causa*, to Polly Schaafsma for her pioneering contributions to the understanding of aboriginal rock art in the American Southwest.

Since 1990, graduating seniors at CU Boulder have been creating an infinite impact through the Senior Class Gift Program. It is an honor to recognize those who are wearing a blue contribution cord today. They have personally donated to the Seniors Creating Future Buffs Scholarship. The Senior Class has come together this year to make a lasting difference at the university by providing prospective students with the chance to attend CU. This scholarship provides graduating seniors with the opportunity to give back to the heart of the university, its students. Because of the generosity of our students, the scholarship will forever ensure the quality of the university that we are so lucky to call our alma mater. This is our chance to make an infinite impact. Thank you and Congratulations to the Class of 2016!

The CU Parents Association created the CU Proud Award to honor students who, by an act of courage, compassion, character, service, integrity and/or initiative, set the standard for their peers and make us proud to call them one of our own. Students earning this honor are wearing a silver cord.

Daniels Scholars are well-rounded leaders who are committed to working hard to earn a bachelor’s degree. They embrace the chance to learn, adhere to high ethical standards, and enjoy giving back to their communities and families. CU-Boulder Daniels Scholars have created a strong community for supporting one another throughout their journey. This graduation cord acknowledges all of the challenges each scholar has overcome and celebrates all of their successes. It is an honor to wear this teal and white cord that pays tribute to a man, Bill Daniels, who has made their dream of achieving a college degree an attainable reality.

CU-Boulder is proud to recognize those students graduating today who have served in our country’s armed forces (veterans) as well as those who will serve upon graduation (ROTC commissionees). These students can be identified by the red, white and blue cords they are wearing with their graduation regalia.

The idea of Forever Buffs, and a continuing lifelong relationship with the University of Colorado, is particularly special for graduates of CU Legacy families. The CU-Boulder Alumni Association proudly presents a black and gold cord in recognition of the tradition and generational bonds to CU represented by these graduates and their families.

The royal purple cords are given to the American Institute of Chemical Engineers (AIChE) leadership team. AIChE is the world’s leading organization of chemical engineers, which consists of student members to industry professionals. These cords signify the honor and pride associated with leading the AIChE membership at CU.
For Your Safety

The University of Colorado Boulder works diligently to provide for the safety of our graduates, their families and their friends during the spring 2016 Commencement Exercises. You can do your part by noting the following:

- Once you are seated in Folsom Stadium, locate the nearest exit to your seat. If you are seated on the field level, you should exit north (toward Dal Ward Athletic Center).
- Listen carefully and follow any instructions which may be issued by the master of ceremonies or other public safety authority.
- Parents should keep their children with them at all times.
- Pay particular attention to the safety of any elderly persons or persons with disabilities.
- If directed to evacuate Folsom Stadium, please move away from the stadium and remain outside until you have been given an “all-clear” by a public safety authority.
- If necessary, seek assistance from a robed commencement marshal, uniformed police officer, or designated security guard.

Thank you, and congratulations to our spring 2016 graduates!
Diplomas and Diploma Covers
In addition to the general commencement ceremony, many programs, colleges and schools hold recognition ceremonies for graduates and their families. Diploma covers typically are made available during these recognition events. If you are not attending a college, school or departmental ceremony, you may pick up a diploma cover at the Office of the Registrar, Regent Administrative Center 101, weekdays from 9 a.m. to 4 p.m.

Diplomas are mailed to most graduates who satisfactorily complete all degree requirements approximately eight weeks after final grades are posted. However, doctoral degree recipients may pick up their diplomas on Monday, May 9, between 8 a.m. and 4 p.m. in Graduate Student Services, Regent Administrative Center 1B53 (lower level). If you are not able to pick up your diploma on that day, it will be mailed to your diploma address as listed in MyCUInfo by the Office of the Registrar.

New for spring 2016 graduates, the University of Colorado Boulder is offering a digitally secure certified electronic diploma (CeDiploma). CeDiplomas may be reserved now through MyCUInfo. See www.colorado.edu/registrar/diplomas/electronic-diplomas.

Social Media
Join the conversation and celebrate the accomplishments of our newest alumni on social media! Use #ForeverBuffs on your photos and stories, follow @CUBoulder and @CUBoulderAlumni on Twitter and Instagram, and check out the highlights of commencement at colorado.edu/social.

International Flags
The international flags on display represent the countries of many of our international students graduating today. Graduating students may request to have the flag of their country represented at the ceremony through the Office of International Education. While the Office of International Education makes every effort to honor requests, there is limited display space and not all country flags are available.

This program is produced jointly by the Office of the Registrar and Strategic Relations, and is printed on recycled paper.
