Introduction and Academic Calendar

The 1993-94 University of Colorado at Boulder Catalog contains a summary of campus facilities, programs, and services; descriptions of colleges, schools, and individual departments; and degree requirements, course descriptions, and listings of faculty. This edition of the catalog should be referred to for current course descriptions and University policies. Students are subject to the degree, major, and certification requirements in effect at the time they formally enter a program. For additional information, students should consult their dean’s office.

Because the catalog is compiled well in advance of the academic year it covers, changes in programs, policies, and the academic calendar may well occur. Up-to-date information may be obtained by consulting departmental advisors, checking departmental bulletin boards, and reading the Registration Handbook and Schedule of Courses as well as registration materials distributed each semester.

All catalog information is subject to change without notice or obligation.

Academic Calendar
The campus operates year-round on a semester system, with fall and spring semesters of 16 weeks each and a 10-week summer session.

SUMMER SESSION 1993
June 3-4 (Thurs.-Fri.)—Orientation and registration for first 5-week term and 8- and 10-week terms.
June 7 (Mon.)—Classes begin, 7:30 a.m.
July 5 (Mon.)—Independence Day holiday.
July 8-9 (Thurs.-Fri.)—Final examinations for first 5-week term.
July 12 (Mon.)—Registration for second 5-week term.
July 13 (Tues.)—Classes begin for second 5-week term.
July 29-30 (Thurs.-Fri.)—Final examinations for 8-week term.
Aug. 12-13 (Thurs.-Fri.)—Final examinations for second 5-week and 10-week terms.
Aug. 14 (Sat.)—Commencement.

FALL SEMESTER 1993
June through July—New student orientation and registration (see page 22).
Aug. 25 (Wed.)—Classes begin, 8:00 a.m.
Sept. 6 (Mon.)—Labor Day holiday.
Nov. 25-26 (Thurs.-Fri.)—Thanksgiving holidays.
Dec. 8 (Wed.)—Last day of classes.
Dec. 9-10 (Thurs.-Fri.)—Reading days.
Dec. 10-17 (Fri.-Fri.)—Final examinations.
(the first final examination is given at 7:30 p.m. on Friday, December 11).
Dec. 18 (Sat.)—Commencement.

SPRING SEMESTER 1994
Jan. 5-6 (Wed.-Thurs.)—New student orientation and registration.
Jan. 12 (Wed.)—Classes begin, 8:00 a.m.
Jan. 17 (Mon.)—Martin Luther King, Jr. holiday.
Mar. 21-25 (Mon.-Fri.)—Spring break.
May 2 (Mon.)—Last day of classes.
May 3-4 (Tues.-Wed.)—Reading days.
May 5-11 (Thurs.-Wed.)—Final examinations.
May 13 (Fri.)—Commencement.

The University’s calendar committee requests that make-up time be provided to students who may be absent for religious reasons.

Pueblo, term expires 1994
NORWOOD L. ROBB
Littleton, term expires 1996
ROBERT E. SIEVERS
Boulder, term expires 1996
DAVID W. WINN
Colorado Springs, term expires 1994

Staff
H.H. ARNOLD
Secretary of the Board of Regents and of the University. B.A., LL.B., University of Colorado.

Administrative Officers
Universitywide
JUDITH E.N. ALBINO
President of the University. B.J., Ph.D., University of Texas.
GLEN R. STINE
Vice President for Budget and Finance. B.S., Michigan State University; M.P.A., University of North Carolina; Ed.D., Harvard University.
RICHARD A. THARP
Vice President and University Counsel. B.A., DePauw University; J.D., University of Colorado.
CHRIS D. ZAFIRATOS
Vice President for Academic Affairs and Research, and Dean of the Systemwide Graduate School; Professor of Physics. B.S., Lewis and Clark College; Ph.D., University of Washington.

Boulder Campus
JAMES N. CORBRIDGE, JR.
Chancellor; Professor of Law. A.B., Brown University; L.L.B., Yale Law School.
BRUCE R. EKSTRAND
Vice Chancellor for Academic Affairs and Dean of Faculties; Professor of Psychology. B.A., M.S., Ph.D., Northwestern University.
JEAN DELANEY
Vice Chancellor for Student Affairs. B.A., M.A., University of Colorado.
STUART TAKEUCHI
Vice Chancellor for Administration. B.A., Occidental College; M.P.A., Cornell University; Ph.D., University of Colorado at Boulder.

Affirmative Action/
Equal Opportunity Policy
The University of Colorado at Boulder does not discriminate on the basis of race, color, national origin, sex, age, disability, creed, religion, or veteran status in admission and access to, and treatment and employment in, its educational programs and activities. The University takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal opportunity to all students and employees.

The Department of Human Resources is responsible for educational and employment opportunity, implementation of affirmative action programs, and coordination of Titles VI and VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1973, the Vietnam Era Veteran’s Readjustment Act of 1974, and section 504 of the Rehabilitation Act of 1973. For further information about these provisions, or about issues of equity, discrimination, or fairness, write Garnett K. Tatsum, Director of Affirmative Action and Services, 1511 University Avenue, Campus Box 475, CU-Boulder, Boulder, CO 80309-0475, or call (303) 492-9706.

University of Colorado Catalog (USPS 651-060). 262 Stadium Building, Campus Box 384, Boulder, Colorado 80309-0384. Volume 1993, No. 2, March/April. Published four times a year: January/February, March/April, May/June, August/September. Second class postage paid at Boulder, Colorado. POSTMASTER: Send address changes to University of Colorado Catalog, Campus Box 7, University of Colorado at Boulder, Boulder, Colorado 80302.
The University of Colorado

At its first session in 1861, the territorial legislature of Colorado passed an act providing for a university at Boulder. The University was formally founded in 1876, the same year that Colorado became the Centennial State. Between 1861 and 1876, Boulder citizens donated land south of town and made gifts from $15 to $1,000 in order to match the $15,000 appropriated by the state legislature for construction of the University. The cornerstone for Old Main, the first University building, was laid in 1875. The University opened its doors on September 3, 1877, with 44 students, a president, and one instructor. Today the University system includes the main campus at Boulder and campuses at Colorado Springs, Denver, and the Health Sciences Center in Denver. The campuses have a combined enrollment of approximately 44,500 students. Each campus has a special function in Colorado higher education.

The Boulder campus offers an educational atmosphere that is exceptional in the quality of its programs, courses, students, faculty, and facilities. The 786-acre Boulder campus, which includes the Mountain Research Station, is recognized as the leading comprehensive research university in the Rocky Mountain region.

The University of Colorado at Colorado Springs, situated on a 420-acre campus, provides programs and faculty to meet the university-level needs of the Pikes Peak area and southern Colorado.

The University of Colorado at Denver, located in downtown Denver, provides programs especially sensitive to the needs of the urban population and environment. The Denver campus shares library, laboratory, classroom, and recreational facilities with Metropolitan State College and the Community College of Denver’s Auraria branch on the Auraria Higher Education Center campus.

The 40-acre campus of the University’s Health Sciences Center is also located in Denver. In addition to housing the Schools of Medicine, Dentistry, Nursing, and Pharmacy, the Health Sciences Center also includes the University Hospital and Colorado Psychiatric Hospital. The University Hospital became a separate entity in 1991.

Eight renowned research institutes are also affiliated with the center. CU ranks 20th among public universities in total research volume and 11th among public universities in federally funded research. Sponsored research within the University system represents annual awards amounting to almost $220 million. Various agencies of the federal government are the principal sources of these funds for research and training contracts and grants. The University’s research activity is also supported by appropriations from the state of Colorado, private foundations, and private donors.

University Administration

The University of Colorado is governed by an elected, nine-member Board of Regents, charged by the state constitution with the general supervision of the University and the exclusive control and direction of all its funds and appropriations, unless otherwise provided by law. The board conducts its business at regular monthly meetings, in special meetings open to the public, and through committees. The president is the chief administrative officer of the four-campus system and is responsible for providing leadership to the University.

On the Boulder campus, the chancellor is the chief academic and administrative officer and is responsible for conducting campus affairs in accordance with Regental policy. The vice chancellor for academic affairs is responsible for planning and implementing all academic and research activities. The vice chancellor for student affairs is responsible for providing direct academic support programs, for student administrative support of academic programs, and for the support of student life on campus. The vice chancellor for administration is responsible for campuswide activities that provide administrative support, goods, and services to persons and organizations engaged in instruction, research, and public service on campus.

Faculty participation in campus governance takes place through the Faculty Senate and the Faculty Assembly. Students participate through the University of Colorado Student Union (UCSU) and the United Government of Graduate Students (UGGS).

Campuses of the University

To meet the needs of its students, the University offers numerous fields of study. The Board of Regents of the University of Colorado reserves the right to establish enrollment levels for all academic areas. Colleges and schools on the four campuses are listed below.

BOULDER CAMPUS
College of Architecture and Planning
College of Arts and Sciences
College of Business and Administration
College of Engineering and Applied Science

THE BOULDER CAMPUS

The mission of the University of Colorado at Boulder (CU-Boulder) is to lead in the discovery, communication, and use of knowledge through instruction, research, and service to the public. As a comprehensive university, CU-Boulder is committed to the liberal education of students and to a broad curriculum ranging from the bac-
caluare through the postdoctoral levels. The educational experience of CU-Boulder, therefore, is distinguished by the wide scope of its programs and course offerings, the notable reputation of its research facilities, the diversity of its student body, and the professionalism and dedication of its faculty.

The Boulder campus offers more than 4,000 courses in over 140 fields of study. There are approximately 60 academic programs available at the bachelor’s level, 50 at the master’s level, and 40 at the doctoral level. These programs represent a full range of disciplines in the humanities, the social sciences, the physical and biological sciences, the fine and performing arts, and the professions. CU-Boulder is fully accredited by the North Central Association of Colleges and Schools. (See college and school sections of the catalog for additional accreditation information.)

In 1967 the University of Colorado became the only institution in the Rocky Mountain region to enroll as a member of the Association of American Universities (AAU). AAU membership consists of 58 leading graduate and research-oriented institutions of higher education in the United States and Canada.

Research conducted at CU-Boulder is supplemented by research institutes devoted both to the advancement of knowledge in particular areas and to graduate training. Many of these institutes have developed international reputations. Included among them are the Cooperative Institute for Research in Environmental Sciences (CIRES), the Institute for Behavioral Genetics (IBG), the Institute of Behavioral Science (IBS), the Institute of Cognitive Science (ICS), the Institute of Arctic and Alpine Research (INSTAAR), the Joint Institute for Laboratory Astrophysics (JILA), and the Laboratory for Atmospheric and Space Physics (LASP). (For a detailed description of these institutes and other important research facilities associated with the University, see the Graduate School section of this catalog.)

To enhance its research capabilities and to provide collaborative opportunities with government and business, CU-Boulder has developed a 200-acre research park east of the main campus. The park provides expanded room for research agencies that work closely with University researchers, including the cornerstone tenant of the park, the Advanced Technologies division of US West Inc.

Teaching and research programs on the Boulder campus are closely integrated with the National Center for Atmospheric Research (NCAR), including the High Altitude Observatory (HAO), the National Institute of Standards and Technology (NIST), and the National Oceanic and Atmospheric Administration (NOAA).

The educational environment of a research university is characterized by a broad range of experiences in many different settings. While the classroom is the location for most instructional activities, laboratories, seminars, and field work are also important features of the undergraduate and graduate experience. Some programs encourage off-campus internships and training; also, study abroad programs have gained popularity. For students whose interests cross traditional disciplinary lines, a number of interdisciplinary programs are available.

With a total enrollment of just over 25,000 students, CU-Boulder is the largest campus in the four-campus system. The student population comes from every state in the nation and more than 80 foreign countries. Many different ethnic, religious, academic, and social backgrounds are represented, fostering the development of a multicultural academic community that enriches each student’s educational experience.

Full-time instructional faculty members number over 960, with more than 90 percent holding doctorates or appropriate terminal degrees. The faculty includes nationally and internationally recognized scholars with many academic honors and awards, including Tom Ceci, winner of the 1989 Nobel Prize in chemistry. Twelve of the faculty are members of the National Academy of Sciences; seven are members of the National Academy of Engineering; and nine are included in the membership of the American Academy of Arts and Sciences. Most faculty members, including full professors, teach both undergraduate and graduate classes.

Faculty members incorporate their research and creative activities directly into instructional programs.

Undergraduate Enrollment and Graduation Rates

CU-Boulder’s fall 1992 entering freshman class numbered about 3,600. Of these, 52 percent were males, 45 percent residents of Colorado, and 11 percent members of underrepresented minority groups (African Americans, Hispanics, and Native Americans). Seventy-two percent enrolled in the College of Arts and Sciences, 14 percent in the College of Engineering and Applied Science, 11 percent in the College of Business and Administration, and fewer than 4 percent combined enrolled in the College of Architecture and Planning and the College of Music. Almost 20 percent of all students at CU-Boulder transfer to another college or school within the University before they graduate.

Of the most recent group of students available for study (freshmen who entered CU-Boulder between 1986 and 1988), 35 percent graduated within four years; 60 percent graduated within five years; and 66 percent graduated within six years. Eighty-one percent of students who entered in fall 1991 returned for their second fall semester, and 71 percent of those who entered in fall 1990 remained enrolled in their third year. Both graduation rates and second-year persistence rates have increased steadily since 1981.

* The master of arts in art education is still officially offered on the Boulder campus, although the program is being phased out for entering students.

All undergraduate programs in the College of Arts and Sciences lead to the bachelor of arts degree.

The College of Business and Administration offers the bachelor of science degree in business administration. Areas of emphasis within the degree program include accounting, entrepreneurship and small business management, finance, information systems, international business, marketing, operations management, organization management, personnel/human resource management, real estate, tourism and recreation, and transportation and distribution management. Areas of emphasis within the Graduate School of Business Administration, for the master of science degree include accounting, finance, management science, marketing, and organization management.

Within the School of Journalism and Mass Communication, sequences are offered at the baccalaureate level in advertising, newspaper, broadcast news, and broadcast production management. The Ph.D. in journalism and mass communication is awarded as a Ph.D. in communication.

For further information on the content of the programs listed above and the official degree designations, refer to the appropriate catalog sections (references are included in the index). Additional graduate and professional programs are located on other campuses of the University; see the Graduate School section of this catalog.

The Campus Setting

The University of Colorado at Boulder is located at the foot of the Rocky Mountains, at an altitude of 5,400 feet. The Flatirons, a range of towering rock formations, are visible from nearly everywhere on campus. The climate is temperate, with generally pleasant days and cool evenings. On the average, the area enjoys about 340 sunny or partly sunny days each year. The main campus covers 600 acres and includes over 150 buildings constructed of rough-cut Colorado sandstone with red tile roofs. The rural Italian architectural style evolved from a master plan developed by Philadelphia architect Charles Klauder in 1917. The Norlin Quadrangle, including the original Old Main building, is listed in the State and National Register of Historic Places. The campus has been noted as one of the most aesthetically pleasing in the country.

Boulder County encompasses five ecological zones, from 5,000 feet above sea level (plains grassland) to 14,000 feet (alpine tundra). Downtown Boulder is only 20 miles from the Continental Divide and some of the most spectacular scenery in the United States.

The city of Boulder, an attractive community of about 85,500 people, is committed to preserving its beautiful natural environment and is surrounded by 20,000 acres of protected open space.

Contemporary environmental design and renovated historical buildings combine to give the city a pleasant, well-planned atmosphere. The natural beauty of the locale attracts a variety of individuals to the area: scientists, business people, and professionals, as well as writers, artists, and craftspeople. Consequently, the city is a center of high technology enterprise, scientific research, and cultural activity.

Denver, the state's capital city, is 30 miles from Boulder. Denver offers the attractions and resources of a metropolitan area and is easily accessible from the Boulder area by traveling on U.S. 36, also known as the Denver-Boulder Turnpike. Denver's international airport is served by most major carriers and is located 20 minutes north of downtown Denver. Denver and Boulder are connected by a public transportation system.

Summer Session

Summer session at CU-Boulder, an integral part of the University's year-round program, offers students a variety of opportunities for study, individual development, and recreational activity. Summer students can choose from more than 500 courses, allowing progress toward a degree in almost every area of study.

The summer session lasts 10 weeks; courses meeting for shorter terms (1.5, 5, or 8 weeks) are scheduled within the 10-week session.

In addition to resident faculty of the University, leading scholars from around the nation and the world teach, give lectures, and participate in seminars and forums throughout the summer.

Completing summer session offerings, a rich calendar of events includes performances in repertory by members of the Colorado Shakespeare Festival, musical productions presented at the Colorado Gilbert and Sullivan Festival, and performances by members of the Colorado Dance Festival and the Colorado Music Festival. Organized recreational activities are offered through the Student Recreation Center.

To order a summer catalog, write the Office of Admissions, Campus Box 30, CU-Boulder, Boulder, CO 80309-0030, or call (303) 492-2456. The summer catalog is usually available by mid-February.

Young Scholars Summer Session

The Young Scholars Summer Session (YSS) is a program designed for college-
bound high school honor students between their junior and senior years. YSSS provides a stimulating and rewarding introduction to college by offering university-level courses limited to 20 students per class conducted by faculty with a reputation for excellent teaching. Students select one course and earn 3 semester hours of college credit. YSSS students live and study together in a residence hall near the center of campus, and can participate in the numerous recreational and cultural activities available during the Colorado summer.

For further information, write to the Young Scholar Summer Session, Campus Box 273, CU-Boulder, Boulder, CO 80309-0073, or call (303) 492-5421.

Continuing Education

The University's Division of Continuing Education provides educational programs for adults in the community and state that go beyond the Boulder campus. Continuing education offers credit and noncredit courses as well as workshops and seminars taught by University-approved instructors. Some workshops and seminars also attract national and international enrollments.

These continuing education services are used by government and business organizations, students working to meet academic requirements, and individuals studying to improve skills, knowledge, or understanding in a variety of subjects. Directed at nontraditional students, these learning activities are provided at a variety of times and locations most convenient to participants.

Self-supported through tuition and fees, the Division of Continuing Education offers credit courses in such fields as computer science, arts, humanities, social sciences, and human relations. Noncredit programs are offered in commercial design, management, computer applications, and real estate. Methods of instruction include classroom learning, guided correspondence study, individualized instruction, audioconferencing, and satellite teleconferencing.

For more information, write the Division of Continuing Education, 1221 University Avenue, Campus Box 178, CU-Boulder, Boulder, CO 80309-0178, or call (303) 492-5148 (toll free in Colorado, 1-800-352-5839; out of state, 1-800-331-2801).

CAMPUS FACILITIES AND RESOURCES

Advising Resource Center

Opened to the University community in the spring of 1990, the Advising Resource Center in Willard 400 seeks to provide comprehensive advising services to students who are undecided about their major or are thinking of changing their major to another college. Faculty advisors in the center work closely with the colleges and schools and with individual departments across campus to provide up-to-date information about curriculum and core requirements. Informational flyers on the different majors are in production, and training is available to assist advisors across campus. The center is also home to the campuswide preprofessional advisor, for those students who are preparing for study in medicine, law, or other professional fields (see the section titled Preprofessional Programs). For further information, or to make an appointment, call (303) 492-8811.

Anderson Language Technology Center

The Anderson Language Technology Center (ALTEC) is a state-of-the-art facility supporting the study of foreign languages and cultures at the University. A large library of materials offers videocassettes, videotapes, computer programs, audiotapes, and reference books.

Computing facilities consist of an interactive video lab and a computer classroom for foreign language word processing, tutorial programs, and an international communication network. The audiovisual area has carrels for independent study of video and audiotapes, as well as rapid duplicators for audiotapes. In addition, there are viewing rooms for small groups; equipment for viewing foreign videotapes, a media classroom with a large-screen video projector, and video and audio production facilities. The center receives live satellite broadcasting from around the world.

Located in newly remodeled quarters in Hollema Hall and under the direction of the College of Arts and Sciences, ALTEC is open to the entire University community. During the academic year, the Department of Fine Arts also hosts a visiting artist program. This acclaimed series brings 12 to 15 internationally known contemporary artists to campus for lectures, performances, and shows in the galleries. These events are free and open to the public.

Computing Resources

Computing and Network Services (CNS) maintains a campuswide network of computing facilities in support of administration, teaching, and research.

Major computing resources include a cluster of Digital Equipment Corporation VAX minicomputers, an IBM RS/6000 minicomputer, a Digital DECstation 5000/240s, a Sun Sparstation 2, and a Sequent Balance parallel processor. These computers are available for interactive processing through remote sites located in buildings across campus, through data communications networks, and via dial-up ports.

CNS also maintains 36 computing laboratories equipped with personal computers, scientific workstations, and specialized software. These facilities are generally available, for both classes and individual use. Facilities include Macintosh labs, a statistics lab, a graphics lab, and several instructional labs with SUNs, NeXT, Digital, and IBM systems. Some of the labs are focused on specific disciplines or applications, such as statistics or graphics, while most are available for general purpose use.

The DISC Center (Demonstrations and Information on Small Computers) in the lower level of the Environmental Design building maintains an array of the newest equipment and software for review and evaluation. In addition to the resources that CNS provides, a large number of departments support their own extensive computing facilities for administration and special research and instruction.

CNS is responsible for the major datacommunications networks on campus (Information Systems Network and Ethernet), which provide communications within the campus and gateways to national computing facilities. These networks allow CU-Boulder faculty, staff, and students to access a host of computing resources, including the University Libraries' bibliographic and information systems; to exchange electronic mail with other faculty, staff, and students on the campus or around the world; and to gain access to national resources such as supercomputing centers, databases, and research institutes. CNS participates in a number of state and regional networking activities, including Colorado SuperNet.
WESTNET, and NSFnet. CNS manages CUnet, the campus electronic information system, which provides more than 100 databases including schedules, calendars, job listings, available courses, the telephone directory, faculty course questionnaire, weather, and much more. CNS also works with campus departments in designing and developing local area networks.

The Administrative Systems Group of CNS provides a full range of support for administrative computing at CU-Boulder, including systems development and maintenance, computing site management, and office consulting. UNIXOps, a CNS subsidiary, offers UNIX system administration and operation for campus customers.

CNS offers a wide range of computing support services, including student and professional advisors, seminars and workshops, documentation, and articles in the CNS newsletter, Digit.

Coors Events/Conference Center
The Coors Events/Conference Center is a multipurpose facility used for events such as educational conferences, seminars and meetings, convocations, and commencement ceremonies, as well as cultural, entertainment, and athletic activities that enhance and further the objectives of the University.

The main arena of the center seats between 8,500 and 12,000, depending on event configuration. The conference level offers six air-conditioned, carpeted rooms, which can seat from 40 to 200 persons.

The center also has a complete teleconferencing capability with down-link satellite antennas, video monitors, video projector, and an 18' x 24' projection screen in the arena.

Fiske Planetarium and Science Center
Fiske is considered one of the finest planetarium facilities in the world. Seating 213 people in its star theatre, it is the largest such facility between Chicago and Los Angeles. The planetarium is equipped with a Zeiss Model VI starprojector and an automated projection control system that operates hundreds of projectors and has the capacity to present over a half dozen pre-recorded star shows at any given time. In addition to its use as a teaching facility for astronomy and other classes, the planetarium is used for star talks, star shows, laser shows, and space science presentations to school children and the general public in the Boulder-Denver area.

Heritage Center
The Heritage Center, located in the oldest building on campus, is a museum that reflects the 117-year history of the University of Colorado. Exhibits tell the CU story in seven galleries, from the early history of student life as portrayed in a complete set of Colorado yearbooks to the engineering flag and CU football carried by alumnus Elliot Onituka on the ill-fated flight of the space shuttle Challenger. Other exhibits include the University's exploration of outer space, an architectural history of the Boulder campus, a history of CU athletics, accounts of the careers of distinguished CU alumni, and an overview of the University's history.

Located on the third floor of Old Main, the Heritage Center is open Tuesday through Friday from 10:00 a.m. until 4:00 p.m., and before and after every home football game. Special tours can be arranged by calling 492-6529.

Libraries
The University Libraries are central to teaching, study, and research at CU-Boulder. The Libraries system includes a main library (Norlin) and five branch libraries (Business, Earth Sciences, Engineering, Math-Physics, and Music). The School of Law operates its own library (see the School of Law section for information). The combined collections contain more than two million printed volumes and more than three million items in other formats. The libraries subscribe to more than 20,000 periodicals, journals, and serials.

The central library (Norlin) contains collections in the humanities, social sciences, and life sciences; general reference; special collections; interlibrary loan and access (circulation) services; and the card catalog and public access catalog (PAC) terminals. The reference department collection includes major print and computerized indexes and other materials. The department provides a variety of services, including free and fee-based computer searches.

The government publications department collects documents from state, federal, and other governments. It has been a depository for United States government publications since 1879 and is also a regional United Nations depository. The department's technical report center has more than one million government-sponsored research reports from such agencies as the Department of Defense, the Department of Energy, the National Aeronautics and Space Administration, and the National Technical Information Service.

The special collections department has approximately 50,000 volumes, including papyrus documents, medieval manuscripts, some of the earliest printed books from fifteenth-century Europe, volumes from eighteenth- and nineteenth-century England and the United States, and distinguished mountaineering and photographic collections. The western history/University archives department has extensive manuscript and photographic collections.

The interlibrary loan department extends the services of the libraries by borrowing research materials not in its collection from other libraries for students, faculty, and staff. As a member of the Center for Research Libraries, the University Libraries also make an international research collection available to campus borrowers.

Macky Auditorium Concert Hall
Originally built in 1912, Macky Auditorium Concert Hall is one of Colorado's premiere concert halls. The 2,047-seat venue features classical and popular musical concerts, dance performances, lectures, and films. It is home to the Arts Series, the Boulder Philharmonic Orchestra, the Macky Auditorium Travel Film Series, and College of Music ensembles. For information on all events, call the box office at (303) 492-6309.

Museum
The University of Colorado Museum houses extensive collections in anthropology, botany, geology, and zoology. It preserves and studies over three million specimens and objects from throughout the Rocky Mountain region, making it a primary resource for faculty and student research. A program of foreign and domestic specimen and information exchange has given the museum an international reputation.

Through internships and assistantships, the museum provides professional experience to students in the field and in the laboratory. Museum faculty members teach courses in museum studies, as well as in their areas of specialty, which include southwestern and Central American archaeology and ethnology, plant systematics, malacology, entomology, and vertebrate paleontology. Participation in museum-related research is encouraged by financial support to selected qualified students through the Walker Van Riper and William Henry Burr Funds.

The exhibit halls are open daily to the public. The Hall of Earth contains minerals, rocks, and fossils, and focuses on local geology. The Hall of Life shows animals of Colorado and the Rocky Mountain region. The
Hall of Humanity contains prehistoric Native American southwestern textiles. The museum's gallery presents four or five special exhibitions each year.

Music

Offering over 400 public concerts annually, the College of Music is a musical force in the Boulder-Denver metropolitan area. In addition to faculty and student recitals, the college features its own symphony orchestra, bands, and choirs in regular concerts. Music for many tastes is also provided through smaller performing organizations on the Boulder campus such as the Jazz Ensemble and the Collegium Musicum, the University's early-music group.

Guest artists, speakers, and special events provide a vibrant and diverse musical atmosphere at the University. Acclaimed artists Renato Capocchi, Gunther Schuller, Nathaniel Merrill, Roberta Peters, and the Takacs String Quartet have appeared on campus, in addition to annual events like the Festival of Christmas and the Colorado Lyric Theatre Festival.

Sommers-Bausch Observatory

Located on the Boulder campus, the Sommers-Bausch Observatory has 16-, 18- and 24-inch aperture Cassegrain telescopes for introductory astronomy classes and for graduate student research. Ancillary instrumentation is available for direct imaging and spectroscopy and includes an advanced technology CCD camera. The observatory is also open to the public on Friday evenings for viewing of the planets, stars, and nebulae, as weather permits.

Student Recreation Center

Funded largely by student fees, the Student Recreation Center is one of the finest facilities of its type in the country. The center includes a 25-yard swimming pool and a 14 foot diving well, a patio for sunbathing, an ice arena used for hockey, broomball, and skating, handball/racquetball, squash, and tennis courts, a multi-use gymnasium, dry heat saunas, a free weight room, a dance/aerobics room, three regulation-sized basketball courts with a one-tenth mile running track suspended overhead, and a fitness systems room with Cybex and cardiovascular equipment.

Current fee-paying students, their guests, and other members may take advantage of the facilities by showing their student ID or membership card. A variety of sports equipment, including volleyball sets, tents, sleeping bags, backpacks, snowshoes, and cross-country skis, can be checked out overnight for a nominal fee.

Members may also participate in a wide range of team sports including ice hockey, rugby, swimming, diving, speed and figure skating, lacrosse, soccer, baseball, and many others through the club sports program.

The Recreation Center also offers many other programs geared toward specific interests and instructions. The outdoor program offers students the opportunity to learn about the outdoors through special trips featuring rock climbing, backpacking, rafting, hiking, cross-country skiing, snowshoeing, and scuba diving, in addition to educational presentations. Through the instructional program, members may participate in noncredit classes at various levels of instruction in aquatics, aerobics, skating, tennis, fitness, CPR and first aid, martial arts, lifeguard training, yoga, and dance. The intramural program offers leagues, tournaments, and special events in basketball, soccer, broomball, tennis, handball, squash, touch football, badminton, softball, and other sports.

Theatre and Dance

Newly remodeled facilities for theatrical and dance presentations include the University Theatre, the beautiful outdoor Mary Rippon Theatre, the Loft Theatre, and the Charlotte York Irey Dance Studio.

The Department of Theatre and Dance presents eight major productions each academic year. The 1992 season included Execution of Justice, The Imaginary Invalid, the musical Cabaret, and two major dance concerts.

The Colorado Shakespeare Festival, presented each summer in the outdoor Mary Rippon Theatre, is produced by the Department of Theatre and Dance. One of the few repertory groups in the nation to have completed the entire Shakespearean canon, the festival has had 35 years of distinguished history, and features the most advanced students in the CU-Boulder theatre and dance program as well as outstanding performers and technicians from advanced training programs throughout the country. Recent guest artists have included directors Robert Benedetti, Libby Appel, and Robert Cohen, and actors Tony Church of the Royal Shakespeare Company, Val Kilmer, and Jimmy Smits.

University Memorial Center

The University Memorial Center (UMC) is a focal point for campus activities, programs, and services. An official state memorial dedicated to those who died in past wars, the UMC has also been designated a multicultural center designed to promote understanding among all cultures represented in the University and the community.

At the heart of the UMC are its programming facilities and services. The facility, host to over 12,000 meetings each year, is a forum for a variety of speakers, seminars, concerts, films, and special events. The UMC is the home of the University of Colorado Student Union (UCSU) and its many operations, as well as the United Government of Graduate Students (UGGS). It also provides office space for more than 80 student organizations. The Dennis Small Third World Center, the Off-Campus Housing Office, and the Environmental Center are also located in the UMC.

The facilities include a reception desk for campus information, the University Book Center, meeting rooms, a copy center, a computerized ticket service, banking and check cashing facilities, a flower shop, a travel agency, an art gallery, music listening rooms, and a games area. Also located in the UMC are two 450-seat dining areas and a kiosk-style cafeteria that includes a fast food grill, a deli, full-meal service, a pizza parlor, a bakery, Mexican food, ice cream, and a salad, fruit, and soup bar. The UMC also furnishes a complete catering service.
University Policies, Programs, and Services

ACADEMIC ADVISING

Academic advising is an integral part of undergraduate education. The goal of all academic advising is to assist students in making responsible decisions as they develop educational plans compatible with their potential and with their career and life goals. Advising is more than the sharing of information about academic courses and programs; it includes encouraging students to formulate important questions about the nature and direction of their education and working with them to find answers to those questions. Advisors will confer with students about alternative course schedules and other educational experiences, but students themselves are responsible for selecting the content of their academic program and making progress toward an academic degree.

As students progress through their academic programs, their questions and concerns change. CU-Boulder offers a system of faculty, staff, and student academic advisors to address these ongoing and multifaceted concerns. It is expected that students, with their own unique needs and interests, will each require the help of several different types of academic advisors before they graduate.

All students should have a primary advisor in their academic department. These departmental advisors are generally faculty members who understand the nature of the academic program and can work with students on how it can best address individual interests and goals. Other advisors in departments, dean’s offices, and across campus are also there to help. Staff advisors can be contacted on a regular basis to maintain up-to-date information on academic policies, procedures, and deadlines. Student peer advisors provide valuable perspectives and current information on programs and opportunities.

Students should refer to college, school, and departmental advising materials for specific details on their advising programs.

Within the advising system on the Boulder campus, both students and advisors have responsibilities.

Students are responsible for:

a. knowing the requirements of their particular academic program, selecting courses that meet those requirements in an appropriate time frame, and monitoring their progress toward graduation;
b. consulting with appropriate advisors designated to handle the kind of questions or concerns they have;
c. scheduling and keeping academic advising appointments in a timely manner throughout their academic career, so as to avoid missing advising only during busy registration periods; and
d. being prepared for advising sessions (for example, by bringing in a list of questions or concerns, having a tentative schedule in mind, and/or being prepared to discuss interests and goals with their advisor).

Advisors are collectively responsible for:
a. helping students clarify their values, goals, and potential, and to understand themselves better;
b. helping students understand the nature and purposes of a college education;
c. providing accurate information about educational options, requirements, policies, and procedures;
d. helping students plan educational programs consistent with the requirements of their degree program and with their own goals, interests, and abilities;
e. assisting students in the continual monitoring and evaluation of their educational progress; and
f. helping students locate and integrate the many resources of the University to meet their unique educational needs and aspirations.

ACADEMIC RECORDS

Class Level

Class level is based on the total number of semester hours passed, as follows:

<table>
<thead>
<tr>
<th>Class</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0-29.9</td>
</tr>
<tr>
<td>Sophomore</td>
<td>30-59.9</td>
</tr>
<tr>
<td>Junior</td>
<td>60-89.9</td>
</tr>
<tr>
<td>Senior</td>
<td>90 and above</td>
</tr>
</tbody>
</table>

The normal course load for most undergraduate students is 15 to 17 credit hours a semester.

Course Load

The following are the most widely used general definitions of full-time course load. For further information and guidelines, students should see specific college and school sections of this catalog. Students who receive financial aid or veterans benefits or who live in University housing should check with the appropriate office regarding course load requirements for eligibility purposes.

UNDERGRADUATE COURSE LOAD

A full-time undergraduate student is one who is enrolled for 12 or more semester hours in the fall or spring semester or at least 6 semester hours in the summer term.

GRADUATE COURSE LOAD

A full-time graduate student in the fall or spring semester is one who is enrolled for 5 semester hours in course work numbered 5000 or above, or at least 8 semester hours in a combination of undergraduate/graduate/professional coursework acceptable for graduate credit, or any number of thesis hours. A maximum of 15 semester hours may be applied toward the degree during the fall and spring semesters.

A full-time graduate student in the summer term is one who is enrolled for at least 3 semester hours in course work numbered 5000 or above, or 4 semester hours in a combination of course work, or any number of thesis hours. The maximum number of graduate credits that may be applied toward a degree during the summer session is 6 semester hours per 5-week term and 10 semester hours per 10-week summer session, not to exceed 10 semester hours for the total summer session.

Good Academic Standing

Good academic standing in most undergraduate colleges and schools requires a 2.00 grade point average (GPA). Students should consult their dean’s office regarding college or school minimum GPA requirements and special policies on probation and dismissal.

Grading System

The following grading system is standardized for all colleges and schools of the University. Each instructor is responsible for determining the requirements for a course
and for assigning grades on the basis of those requirements.

<table>
<thead>
<tr>
<th>Standard Grade</th>
<th>Credit Points Per Each Hour of Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = superior/excellent</td>
<td>4.0</td>
</tr>
<tr>
<td>A- =</td>

</tr>
<tr>
<td>F = failing</td>
<td>0.0</td>
</tr>
</tbody>
</table>

Grade Symbols
IF = incomplete—regarded as F if not completed within one year
IW = incomplete—regarded as W if not completed within one year
IP = in progress—thesis at the graduate level
P = passing—under the pass/fail option, grades of D- and above convert to a P. Other specified courses may also be graded on a pass/fail basis.
NC = registration on a no-credit basis
W = withdrawal or drop without discredit
*** = class grades were not submitted when final grades were processed, or student is currently enrolled in the course

EXPLANATION OF IF AND IW
An IF or IW is an incomplete grade. Policies with respect to IF/IW grades are available in the individual college and school dean’s office. Use of the IF or IW is at the option of the course instructor and/or the academic dean’s office.

Students must ask for an incomplete grade. An IF or IW is given only when students, for reasons beyond their control, have been unable to complete course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given.

If an instructor decides to grant a request for IF or IW, the instructor sets the conditions under which the course work can be completed and the time limit for its completion. The student is expected to complete the requirements within the established deadline and not retake the entire course.

It is the instructor’s and/or the student’s decision whether a course should be retaken. If a course is repeated, it must be completed on the Boulder campus or in Boulder evening classes. The student must re-register for the course and pay the appropriate tuition.

The final grade (earned by completing the course requirements or by retaking the course) does not result in deletion of the IF or IW from the transcript. A second entry is posted on the transcript to show the final grade for the course.

At the end of one year, IF and IW grades for courses that are not completed or repeated are regarded as F or W, respectively. Requests for an extension of time to complete the course beyond the one-year deadline will normally not be approved by the academic dean’s office.

GRADE POINT AVERAGE
The overall University of Colorado grade point average is computed as follows: the credit hours and the credit points are totaled for all courses; then the total credit points are divided by the total hours attempted. Courses with grade symbols of P, NC, *** (blank grade), W, IP, IW, and IF are excluded when totaling the hours.

Grades of F earned for courses graded on a pass/fail option are included in the GPA. IFs that are not completed within one year are calculated as F in the GPA at the end of the one-year grace period.

<table>
<thead>
<tr>
<th>Credit Earned per Hour</th>
<th>Credit Points</th>
<th>Credit Hours</th>
<th>Points in Course</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
<td>4</td>
<td>16</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
<td>4</td>
<td>14.8</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
<td>4</td>
<td>13.2</td>
</tr>
<tr>
<td>P</td>
<td>0.0</td>
<td>3 (exclude)</td>
<td>—</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
<td>3</td>
<td>0.0</td>
</tr>
<tr>
<td>IW</td>
<td>0.0</td>
<td>4 (exclude)</td>
<td>—</td>
</tr>
<tr>
<td></td>
<td></td>
<td>15</td>
<td>44</td>
</tr>
</tbody>
</table>

Total = 44 = 2.93 GPA

If a course is repeated, both grades earned are used in determining the University GPA. Grades received at another institution are not included in the University of Colorado GPA, and the undergraduate GPA is calculated separately from the graduate GPA.

Students should refer to their academic dean’s office for individual grade point average calculations as they relate to academic progress and graduation from their college or school.

GRADE REPORTS
Grade reports are normally available within two to three weeks after the end of the semester. Grade reports are automatically mailed at the end of fall semester to students’ local mailing addresses. At the end of spring semester and summer session, grade reports are mailed to students’ permanent addresses.

In-State and Out-of-State Tuition Classification
Tuition classification is governed by Colorado statutes and by judicial decisions that apply to all state-funded institutions in Colorado and is subject to change without notice.

New students are classified as in-state or out-of-state residents for tuition purposes on the basis of information provided on their application for admission and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Applicants and students who feel their classification is incorrect or who have become eligible for a change in in-state status must submit a petition with documentation in order to have their status changed. The necessary petition forms, deadlines for submission, and an explanation of the Colorado tuition classification statute are available from the Tuition Classification Coordinator, Regent Administrative Center 105, Campus Box 68, CU-Boulder, Boulder, CO 80309-0068, telephone (303) 492-6868, FAX (303) 492-4884.

BASIC REQUIREMENTS FOR ESTABLISHING COLORADO RESIDENCY
The age of majority in Colorado for tuition-classification purposes is 21.

Unemancipated students less than 21 years of age have the same legal residence as their parents. Therefore, the parents of such students become applicants and have to meet legal requirements established by the state of Colorado for in-state residency classification.

To be eligible for in-state classification, applicants must show 1) intent to establish permanent domicile in Colorado, and 2) after the establishment of such intent, applicants must maintain legal residence in Colorado for the 12 months preceding the term for which in-state status is being applied.

Evidence of Domicile
Evidence of Colorado domicile includes actions that would normally be expected of any permanent resident. Factors that constitute proof of domicile are:

- Payment of Colorado state income tax
- Colorado driver’s license
- Colorado vehicle registration
- Voter registration in Colorado
- Permanent employment or acceptance of future permanent employment in Colorado. (Note: Employment offered by the University to students is not considered permanent.
- Ownership and permanent occupancy of residential real property in Colorado
Graduation from a Colorado high school
Continued permanent residence in Colorado

Note: By meeting the above listed criteria for in-state residency classification, students are not necessarily qualified for residency status. For further information and a determination of residency status, please contact the Tuition Classification Coordinator.

No single factor constitutes conclusive proof of domicile. All factors, positive and negative, are considered. All of the listed factors are not necessary, but individuals should take actions on those factors that are appropriate in their circumstances.

Unemancipated Minors
Students who are not yet 21 years old and depend on their parents or court-appointed legal guardians for financial support are considered "unemancipated minors." As such, they qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, or if the students reside elsewhere. To qualify through a parent or guardian, the parent-child or guardian-child relationship must exist for at least one year. Unmarried students whose parents move to Colorado or whose parents move to Colorado between their twentieth and twenty-first birthdays must establish legal residence in Colorado by age 21 to be eligible for in-state status (effective one year after their parents' move to the state).

Unmarried students whose parents move to Colorado before their twentieth birthday are entitled to in-state status if they (the students) move to the state by age 22.

Students lose eligibility for in-state tuition if they (or their parents, if the students are unemancipated minors) maintain domicile outside Colorado for one year or more, unless the parents have lived in Colorado at least four years and meet other requirements.

Classification Notes
In-state classification becomes effective at the beginning of the first term after one year of legal residence in Colorado. Changes of classification never take effect midterm.

Students who give false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal action.

Residents of participating western states enrolled in graduate programs approved by the Western Regional Graduate Program are entitled to in-state tuition rates. Students should call or write the tuition classification office or their academic department for further information.

Active-duty members of the armed forces of the United States or Canada on permanent duty station in Colorado and their dependents (as defined by military regulations) are eligible for in-state classification, regardless of domicile or length of residence.

Official Transcripts
The official transcript includes the complete undergraduate and graduate academic record of courses taken at all campus locations or divisions of the University of Colorado. It contains the signature of the registrar and the official, embossed seal of the University. Official transcripts are primarily used to support applications for transfer to other academic institutions and for employment purposes.

On the Boulder campus, transcripts may be ordered in person, by phone, by FAX, or by mail from the Office of the Registrar, Transcript Section, Regent Administrative Center 105, Campus Box 68, CU-Boulder, Boulder, CO 80309-0068, (303) 492-8987, FAX (303) 492-4884. Ordering transcripts by telephone is the most efficient method.

Students may request a complete transcript from the registrar of any University of Colorado campus. If students attend more than one campus, it is not necessary to request a transcript from each campus.

There is no charge for official transcripts, which are prepared at the student’s request. Typically, transcript requests are processed within three to five working days in a first-in, first-out order. However, for a rush transcript fee, official transcripts and unofficial FAX transcripts are processed in one working day. A student having financial obligations to the University that are due and unpaid cannot be granted a transcript. Transcripts sent to students are labeled "issued to student." Copies of transcripts from other institutions cannot be furnished.

Official transcripts that include end-of-term grades are available approximately two weeks after final examinations. A transcript that is to have a degree recorded will be available approximately six weeks after graduation.

Unofficial Transcripts
The unofficial transcript is also the complete academic record at the University of Colorado. It is primarily used for advising and counseling within offices on campus and within offices at other University of Colorado campuses. Unofficial transcripts do not carry the embossed seal of the University. Copies are available at the Office of the Registrar in the foyer of Regent Administrative Center 105 at a cost of $1.00.

Credit by Examination
In certain limited instances, students enrolled in a degree program may earn additional credit by examination without otherwise registering for and taking certain courses. Information on participating colleges and schools and an application for credit by examination may be obtained from the Office of the Registrar at Regent Administrative Center 105. The application specifies procedures to be followed and provides spaces for the signatures required for approval: the instructor, the department chair, the dean of the college or school in which the course is offered, and the student's dean, if different. The fee for each examination is not included in the regular tuition but is assessed separately at a fixed rate equivalent to the minimum resident tuition rate charged for 0-3 credit hours for the current semester. Fees are payable in advance and are nonrefundable.

Stops
A scholastic, dean's, financial, or miscellaneous stop may be placed on a student's record for a number of reasons. A stop may prevent that student from registering, returning to school, obtaining an official transcript, or receiving a diploma. The student should remove each stop as quickly as possible by contacting the campus office that placed the stop. General inquiries may be addressed to the Office of the Registrar.

Rights and Privacy Act
Periodically, but not less than annually, the University informs students of the Family Educational Rights and Privacy Act of 1974. The act was designed to protect the privacy of education records, to establish the right of students to inspect and review their education records in all offices, and to provide guidelines for the correction of inaccurate or misleading data through informal and formal hearings. Students also have the right to file complaints with the Family Educational Rights and Privacy Act (FERPA) office concerning alleged failures by the institution to comply with the act.

Local policy explains in detail the procedures to be used by the institution for compliance with the provisions of the act. Copies of the policy can be found in the government publications office in Norlin Library, the Law Library, and the Office of the Registrar.

The registrar has been designated by the institution to coordinate the inspection and review of student education records located in various University offices. Students wishing to review their education records must complete a request form in the Office of the
Registrar. Requests should list the item or items of interest. Records covered by the act will be made available within 45 days of a request.

Students may not inspect the following as outlined by the act: financial information submitted by their parents, confidential letters that they have waived their rights to review, or education records containing information about more than one student, in which case the institution will permit access only to that part of the record that pertains to the inquiring student. Records that may be inspected include admissions, academic, and financial files and cooperative education and placement records.

The following items of student information have been designated by the University of Colorado as public or "directory" information: name, address, telephone number, dates of attendance, registration status, class, major field of study, awards, honors, degree(s) conferred, past and present participation in officially recognized sports and activities, physical factors (height, weight) of athletes, and date and place of birth. Such information may be disclosed by the institution for any purpose, at its discretion.

No other information regarding a student's education records may be disclosed to anyone without the written consent of the student, except to personnel within the institution, to officials of other institutions in which the student seeks to enroll, to persons or organizations providing the student with financial aid (this includes the parents upon whom the student is financially dependent), to accrediting agencies carrying out their accreditation functions, and to persons in an emergency to protect the health or safety of the student or other persons.

Currently enrolled students may withhold disclosure of directory information under the Family Educational Rights and Privacy Act of 1974. To withhold disclosure, students should inquire at the registrar's office before the eleventh day of classes in a term. Once requested, the nondisclosure will remain in effect until the student is no longer enrolled or requests that the nondisclosure request be discontinued. The University of Colorado assumes that failure on the part of any student to specifically request the withholding of directory information indicates individual approval for disclosure.

Boulder campus students should request the form that describes the Family Educational Rights and Privacy Act from the Office of the Registrar, Regent Administrative Center 105.

CAMPUS POLICIES

Academic Integrity
A university's intellectual reputation depends on maintaining the highest standards of intellectual honesty. Commitment to those standards is a responsibility of every student and every faculty member at the University of Colorado.

Breaches of academic honesty include cheating, plagiarism, and the unauthorized possession of exams, papers, or other class materials that have not been formally released by the instructor.

CHEATING
Cheating may be defined as using unauthorized materials or giving or receiving unauthorized assistance during an examination or other academic exercise. Examples of cheating may include: copying the work of another student during an examination or other academic exercise, or permitting another student to copy one's work; taking an examination for another student, or allowing another student to take one's examination; possessing unauthorized notes, study sheets, or other materials during an examination or other academic exercise; collaborating with another student during an academic exercise without the instructor's consent; and/or falsifying examination results.

PLAGIARISM
Plagiarism may be defined as the use of another's ideas or words without acknowledgment. Examples of plagiarism may include: failing to use quotation marks when quoting from a source; failing to document distinctive ideas from a source; and/or fabricating or inventing sources.

UNAUTHORIZED POSSESSION OR DISPOSITION OF ACADEMIC MATERIALS
Unauthorized possession or disposition of academic materials may include: selling or purchasing examinations or other academic work; taking another student's academic work without permission; possessing examinations or other assignments not formally released by an instructor; and/or submitting the same paper for two different classes without specific authorization.

SANCTIONS
Breaches of academic honesty will result in disciplinary measures that may include: a failing grade for a particular assignment; a failing grade for a particular course; and/or suspension for various lengths of time or permanent expulsion from the University.

PROCEDURES
Each college and school has developed procedures to enforce its statement or code of academic honesty. The procedures generally contain a requirement that a student accused of academic dishonesty be notified of specific charges, that the student be given an opportunity to respond to the charges before an unbiased individual or panel, and that the student be notified in writing of the decision or recommendation made by the individual or panel reviewing the charges. If a student wishes to appeal a case, the student should request a listing of the procedures used by his or her school or college and follow the requirements therein.

Breaches of academic honesty are under the purview of each college and school pursuant to the Laws of the Regents, Article V, Section C. For further information and for individual college and school policies, students should consult their dean's office.

Alcohol and Other Drugs
In order to create the best possible environment for teaching and learning, the University of Colorado at Boulder affirms its support for a responsible alcohol and illegal drug policy for the campus. It is the responsibility of the University community to create a positive environment in which all students, faculty, and staff can flourish.

The University complies with all federal, state, and local laws concerning alcohol and illegal drugs. Students are responsible for becoming acquainted with the basic policies on alcohol and illegal drugs and for observing them. University policies regarding alcohol consumption and illegal drug use are described in several publications: Students' Rights and Responsibilities Regarding Standards of Conduct and Alcohol and Drug Policy, available in the Office of Student Conduct; A Guide to Residence Hall Living, available at the Department of Housing; and the Student Handbook, distributed to new students in the fall and spring. In addition, Wardenburg Student Health Center provides individual and group counseling for students with substance abuse problems.

For further information on campus policies, call the Office of Student Conduct, (303) 492-5550; for policies within campus housing, call the Department of Housing, (303) 492-6580; and for information on campus substance abuse programs, call Wardenburg Student Health Center, (303) 492-5654.

Environmental Health and Safety
At CU-Boulder, the safety of students, faculty, staff, and the public is considered to be of paramount importance, and every person
is urged to cooperate fully to ensure that campus facilities, procedures, activities, and practices are safe. The Boulder campus Department of Environmental Health and Safety was established to implement a safety program that includes but is not limited to occupational safety, radiation safety, hazardous materials and waste management, teams for emergency response and asbestos abatement, waste water monitoring, laboratory safety and industrial hygiene, fire protection, review and approval of plans for remodeling, renovation, and construction projects, facility safety, sanitation, general campus premises safety, accident investigation and prevention, and safety training seminars.

Contact the Department of Environmental Health and Safety at (303) 492-6025 to discuss any safety or health matter and for assistance in developing a departmental safety program.

Final Examination Policy
It is the policy of the University of Colorado at Boulder to adhere to the final examination schedule as published in the Registration Handbook and Schedule of Courses each semester. While it may be appropriate not to give a final in some cases, such as laboratory courses, seminars, and colloquia, final examinations should be given in all other undergraduate courses. Unless otherwise notified in writing during the first week of classes, students should assume that an examination will be given.

In addition to the principles stated above, the following guidelines should be followed by all faculty members and administrators in order to assure fairness and the best possible educational experience for students.

1. The scheduled final examination period should be considered an important part of the course and used as a final examination period or for additional instruction.
2. The final examination in a course should be given as scheduled and not at other times, even if the faculty member and all students in a course agree to such a change.
3. The week of classes preceding the scheduled final examination period should be used primarily for continued instruction and may include the introduction of new material. No hourly examinations are to be given during the week preceding final examinations.
4. Individual students may be granted a variance from these policies, provided the instructor is satisfied that the exception is based on good and sufficient reasons (such as religious observances), and such an exception for an early or late examination will not prejudice the interests of other students in the course.
5. When students have three or more examinations on the same day, they are entitled to arrange an alternative examination time for the last exam or exams scheduled on that day. Such arrangements must be made no later than the end of the sixth week of the semester (i.e., at the end of the drop period). Students are expected to provide evidence that they have three or more examinations to qualify for exceptions.
6. This policy applies to all undergraduate students, including seniors. Graduating seniors should not be exempted from final examinations. Such exemptions are inappropriate on both procedural and academic grounds.

Personal Safety on Campus
The University of Colorado at Boulder is a community of scholars, students, and staff who support academic freedom and the learning process in an environment characterized by civility and respect for others. Harassment of an individual or a group interferes with the freedom to pursue academic goals and is inconsistent with the mission of the University. The University is concerned with all forms of harassing behavior, ranging from verbal abuse to physical assault, and is committed to creating a safe environment conducive to personal and academic growth.

Students, faculty, and staff have the responsibility to refrain from, prevent, and report behavior that threatens or harasses their colleagues and to assist victims. Campus resources are available to aid victims in a confidential and sensitive manner. At the same time, actions will be initiated against anyone found guilty of harassment, with due process provided for the accused.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs, and special prevention programs, such as the Nightride and Nightwalk escort services. Emergency telephones have been located on campus to provide direct access to the police dispatcher. See the University’s parking and traffic map in the Parking Services Office for exact locations of these phones.

In compliance with the Federal Crime Awareness and Campus Security Act of 1990, students and employees receive (at the start of the fall semester) an annual publication that provides detailed information on campus security policies and programs, including crime rate information. Additional copies may be obtained from the University Police Department.

Members of the University community are encouraged to report any incident of harassment to the administrator closest to the situation and/or the University Police at (303) 492-6666. Other resources include the Office of Student Conduct at (303) 492-5550 and the Ombudsman Office at (303) 492-5077.

Sexual Harassment
It is the policy of the University of Colorado at Boulder to maintain the University community as a place of work, study, and residence free of sexual harassment or exploitation of students, faculty, staff, and administrators. Sexual harassment is prohibited on campus and in University programs. The University is committed to taking appropriate action against those who violate the University’s policy prohibiting sexual harassment.

No reprisal or retaliation of any kind shall be taken against any individual for complaining about sexual harassment or for participating in any procedure to redress a complaint of sexual harassment. However, this protective University policy does not preclude disciplinary actions against individuals who are found to have made intentionally false and malicious complaints of sexual harassment.

Sexual harassment is defined as conduct that is unwelcome and consists of sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature when 1) submission to such conduct is made either explicitly or implicitly a term or condition of an individual’s employment or academic work, 2) submission or rejection of such conduct by an individual is used as the basis for employment or academic decisions affecting that individual, or 3) such conduct has the purpose, or effect, of interfering with that individual’s work or academic performance by creating an intimidating, hostile, or offensive working or educational environment. Sexual harassment may occur between persons of the same gender or of different genders.

For information on procedures regarding sexual harassment, contact the Ombudsman Office at (303) 492-5077.

Smoking Policies
Campuswide smoking regulations are not intended to deny smokers their prerogatives, but rather to limit the potential adverse effects of smoking in closed and restricted spaces in University facilities.

Smoking is prohibited in 1) all buildings and offices affiliated with the Boulder campus, except those specifically identified as designated smoking areas; 2) all areas that
are identified by "No Open Flame" warning signs; 3) any University facility used as a meeting room unless the person conducting the meeting announces that smoking will be permitted; and 4) the high-risk buildings of Old Main, Woodbury, Fiske Planetarium, TB No. 9, and Hunter.

Designated smoking areas include private offices with permanent floor-to-ceiling walls and a door, shared offices (with the agreement of all residents), and other designated hallways and lounges in campus buildings.

For more information on the campus smoking policy, please refer to the General Procedures Manual or the Office of the Vice Chancellor of Administration.

Student Conduct

CU-Boulder has established a code of conduct that draws upon certain philosophical concepts central to the general welfare of the University community. The University is committed to maintaining the campus community as a place of study, work, and residence free from abuse, intimidation, and harassment, where everyone is treated with respect and courtesy. Thus, students must accept responsibility to respect the physical welfare of all persons in the University community; to maintain an atmosphere conducive to education and scholarship; to keep property that belongs to the University or to members and guests of the University community from misuse or harm; to respect the personal safety and individual rights of all in the University community; to conduct themselves in accordance with accepted standards of social behavior; to refrain from any conduct that is injurious towards the welfare of the University community; and to abide by the regulations of the University and the laws of the city, state, and nation while on University-owned and controlled property (University premises).

It is imperative that students become thoroughly familiar with the University Standards of Conduct and Misconduct Subject to Disciplinary Action in order to fully understand their responsibilities as members of the University community and to avoid jeopardizing their relationship with the University.

MISCONDUCT SUBJECT TO DISCIPLINARY ACTION

One of the most important aspects of administrative due process is the provision of a statement regarding the kinds of conduct that may lead to University disciplinary action. While the specific intent to commit an act is important in determining whether a standard of conduct has been violated and in deciding upon appropriate sanctions, students are responsible for their actions even when these actions are due to negligence. Prohibited conduct for which a student is subject to discipline is as follows:

1. Obstruction, disruption, or interference with teaching, research, disciplinary proceedings, emergency responses, or other University activities, including public service functions or other authorized activities, on University premises. This includes interfering with the freedom of expression of others on University premises or failing to comply with the lawful directions of University officials acting in performance of their duties.

2. Obstruction or interference with the freedom of movement of students, school officials, employees, and invited guests on University premises.

3. Prohibited entry to or use of University facilities, defined as unauthorized entry or use of University property or facilities for illegal purposes or purposes detrimental to the University. This includes violation of federal, state, or local laws or of University policies or regulations while on University premises.

4. Forgery, falsification, alteration, or use of documents, records, or instruments of identification to gain any unentitled advantage in the University.

5. Theft or damage to University property or the private property of students, school officials, employees, and invited guests when such property is located upon University premises. This includes the unauthorized copying and distribution of copyrighted materials licensed to the University. This also includes possession of known stolen property.

6. Possession of firearms, explosives, or other dangerous weapons within or upon University premises. This policy does not apply to any police officer or other peace officer while on duty authorized by the University, or others authorized in writing by the chief of the University of Colorado at Boulder Department of Police (UCPD) or a designee of the chief.

A dangerous weapon is defined as any object or substance designed to inflict a wound, cause injury, or incapacitate. Weapons may include, but are not limited to, BB guns, pellet guns, slingshots, martial arts devices, brass knuckles, bowie knives, daggers or similar knives, or switchblades. Any harmless instrument designed to look like a firearm, explosive, or dangerous weapon that is used by a person to cause fear in or assault another person is expressly included within the meaning of a firearm, explosive, or dangerous weapon. Weapons used for sporting purposes can be stored with the UCPD.

7. Harassment and/or hazing in all forms (including ethnic or sexual), including but not limited to striking, laying hands upon, treating with violence, or threatening to do bodily harm to another person, or other treatment of an abusive, taunting, or alarming nature.

8. Inflicting sexual contact or sexual intrusion upon or engaging in sexual penetration with any person without that person's consent. Such conduct is "without consent" when no clear consent is given; when inflicted through force, threat of force, or coercion; or when inflicted upon a person who is unconscious or otherwise without the physical or mental capacity to consent, e.g., when someone is under the influence of alcohol or drugs.

9. Conduct on University premises that threatens or endangers the health or safety of any person, including but not limited to physical abuse, physical restriction, or coercion. This includes tampering with, impairing, disabling, or misusing fire protection systems such as fire detectors, sprinklers, alarms, and extinguishers.

10. Possession, use, manufacture, distribution, or sale of alcoholic beverages on University premises contrary to law and/or University policy. Being under the influence of alcohol is not viewed by the University as an excuse for student misconduct.

11. Possession, use, manufacture, distribution, or sale of illegal drugs upon University premises. Being under the influence of illegal drugs is not viewed by the University as an excuse for student misconduct.

12. Off-campus: physical abuse, physical restriction, coercion, or harassment of any person including sexual harassment or sexual assault; significant theft; distribution, sale, or manufacture of illegal drugs (including the possession of a sufficient quantity to indicate intent to sell); damage, theft, or unauthorized possession of University property; forgery, falsification, alteration, or use of University documents to gain any unentitled advantage; or violation of any criminal law that indicates the student is a threat to the safety or security of the University and members of the University community.

Any time questions arise regarding the application of University standards, or students feel that another person has subjected them to behavior that interferes in any manner with their rights, students are encouraged to contact the Office of Student Conduct, Willard Administrative Center 223, CU-Boulder, Boulder, CO 80309-0132, (303) 492-5550.
EXPENSES

Estimated Expenses

Expenses for students attending the University of Colorado at Boulder vary, depending on whether they live on or off campus, their program of study, state residency (tuition classification), family size, personal needs, and individual interests.

It is difficult, therefore, to provide exact statements of total expenses. The following approximate costs per academic year were established for full-time undergraduate arts and sciences students living on the Boulder campus in 1992-93. The Board of Regents reserves the right to change the costs for tuition and fees and room and board at any time, and it should be expected that costs will be higher for 1993-94.

<table>
<thead>
<tr>
<th>In-state</th>
<th>Out-of-state</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tuition and fees</td>
<td>$2,540</td>
</tr>
<tr>
<td>Room and board</td>
<td>$3,664-4,240</td>
</tr>
<tr>
<td>Total</td>
<td>$6,204-6,780</td>
</tr>
</tbody>
</table>

The cost of attending only fall or spring semester would be one-half of the amount shown above. Students planning to attend summer session should take into account estimated expenses indicated in the Summer Session Catalog available from the Office of the Registrar in mid-February. Additional costs would include books, supplies, special residential academic program fees, transportation, entertainment, health insurance, and any other personal needs or interest items or services. Some courses carry laboratory or other fees for practical activities. Consult the Registration Handbook and Schedule of Courses for notation of special fees.

Tuition and fees for 1993-94 were not set when this catalog went to press in early 1993. The tuition rates per semester for the 1992-93 school year are listed at right.

Note that a surcharge is assessed for each semester credit hour over 18 hours. Zero or fractional credit is regarded as 1 hour in assessing tuition and fee charges. No-credit (NC) courses are not free of charge: tuition for courses taken for no credit is the same as for courses taken for credit.

Students simultaneously enrolled in programs leading to two different degrees will be assessed tuition for the college or school with the higher tuition rate, according to the schedule at right.

* The student RTD bus pass program fee entitles students free unlimited rideship on local and express bus routes. Regional routes are available to student riders for an extra $1.00 each ride.
Miscellaneous Fees

STUDENT HEALTH INSURANCE
All Boulder campus students are encouraged to maintain adequate health insurance. Students who are enrolled for more than 5 credit hours will automatically be charged for the University of Colorado Student Union (UCSU) health insurance plan. In order to waive the insurance, students must complete and submit a waiver form to Wardenburg Student Health Center (WSHC) by the published deadline. Waiver forms are available at WSHC. Please see the Wardenburg Student Health Center section of this catalog for further information, or call the WSHC Insurance Office at (303) 492-5107.

Approved doctoral candidate students who desire to purchase the UCSU health insurance plan may do so without paying additional student fees. However, those doctoral students who choose to waive the additional student fees will not be eligible for the reduced student rate at WSHC.

MATRICULATION FEE
There is a one-time nonrefundable matriculation fee of $15 for new degree students. This fee is assessed at the time of initial registration and covers adding and dropping courses and official transcript orders. Non-degree students who are admitted to degree status are assessed the $15 matriculation fee at the time of their first registration as degree students.

LATE REGISTRATION FEE
A late registration fee may be charged to students who are authorized to register after their assigned registration period. The late registration fee is $20 for the first working day, $25 for the second working day, and a maximum of $30 beginning the third working day and thereafter. This fee is separate and distinct from any penalty that may be assessed for late payment of tuition and fees.

ENROLLMENT DEPOSIT
All new students must confirm their enrollment at the University by returning a completed confirmation form and an enrollment deposit of $200 (both in-state and out-of-state students). The deposit is non-refundable and must be paid by all students, regardless of financial aid awards. Students who have paid the deposit and who decide not to attend CU-Boulder forfeit their deposit. Deposits received after enrollment levels have been reached will be returned.

The enrollment deposit is not credited towards tuition and fees. Instead, it is refunded when a student graduates or officially withdraws from CU-Boulder within established dates and guidelines, after paying any outstanding University obligations.

Tuition and Fee Regulations

DROP/ADD TUITION ADJUSTMENT
Adjustment of tuition and fees is made on drop/add changes as published in the Registration Handbook and Schedule of Courses.

TUITION CLASSIFICATION
Students are classified as in-state or out-of-state residents for tuition purposes on the basis of information provided on their application for admission and other relevant information. For more information, see the Academic Records section of this catalog, page 10.

STUDENTS REGISTERED ON MORE THAN ONE CAMPUS
Students registering for courses on more than one campus of the University during a single term pay tuition and fees to each campus at the rate appropriate to the number of credits for which they are registered on that campus. Boulder campus students qualified to use the concurrent registration option pay Boulder campus rates for the total hours enrolled at all campuses.

NONDEGREE STUDENTS
Nondegree students with a prior baccalaureate degree are assessed tuition at the graduate student rate. Nondegree students without any prior baccalaureate degree are assessed tuition at the undergraduate rate.

UNIVERSITY EMPLOYEES
Any permanent employee may enroll for not more than 6 free semester hours of credit (and any permanent part-time employee for a proportionate number of hours of credit) in any academic year (summer, fall, spring) on a space-available basis beginning on drop/add day. Time taken to attend classes during normal working hours shall be made up and shall be limited to one course during any term. Persons appointed for less than full time are not eligible for release time during assigned hours. For details, call the student billing department in the Bursar's Office.

MASTER'S CANDIDATE FOR DEGREE
Out-of-state students enrolled as master's candidate for degree, who need only to take a comprehensive examination for a master's degree, will pay for 3 semester hours at 60 percent of the 3-semester-hour charge for out-of-state graduate students. In-state master's candidate for degree students will pay for 3 semester hours at the graduate in-state rate.

APPROVED DOCTORAL CANDIDATES
A student admitted as an approved doctoral candidate is registered for 7 dissertation hours.

Students not making use of campus facilities may petition the Graduate School for 3-credit-hour status. Consult the Graduate School for petition deadlines. Continuous registration for dissertation hours during fall and spring semesters is required until completion of the dissertation defense. Out-of-state students enrolled for doctoral dissertation will pay 60 percent of the out-of-state per-hour rate for each semester hour of enrollment. In-state students enrolled for doctoral dissertation will pay the in-state per-hour rate for each semester hour of enrollment.

Payment of Tuition and Fees

UNIVERSITY BILLS
Students enrolled at the University of Colorado at Boulder are responsible for full payment of all tuition, fees, and University residence hall charges (when applicable) noted on their schedule/bill. The bill also includes financial aid awards, credits, and teaching assistant tuition adjustments. Housing deposits are not applied to the schedule/bill until spring semester.

Failure to receive an official University schedule/bill does not relieve any student of responsibility for payment by the published deadline. To avoid assessment of late (5%+$50), service charges (1 percent per month), a late registration fee ($20-$30), and possible withdrawal from future terms, tuition and fees must be paid by the deadline published in the Registration Handbook and Schedule of Courses. Subsequent bills will reflect adjustments and additional charges made throughout the semester. For further information, call the student billing department in the Bursar's Office.

DEFERRED PAYMENT PLAN
Students may apply for a deferred tuition payment plan by filling out a tuition deferment agreement. The agreement must be completed and submitted to the Bursar’s Office by the tuition payment deadline each semester. Students should consult the Registration Handbook and Schedule of Courses for specific instructions relating to deferred tuition policies and deadlines.

This plan allows students to pay tuition and fees in two installments. At least one-half of the obligation must be paid in the first installment. The deferred balance is subject to a finance charge of 1 percent per month (equal to a maximum annual percentage rate of 12 percent), beginning the first day of class. Payments under the
deferred tuition plan are due approximately the second and sixth week of classes. If either portion of the deferred payment is not received by the published deadline, the unpaid balance is subject to late and/or service charges, and the student may be subject to withdrawal from future terms. The Board of Regents reserves the right to revise or eliminate this program at any time. Tuition and fee balances of less than $100 are not deferrable, and the deferred payment plan is not available for summer session.

FAILURE TO MAKE PAYMENT
Failure to make the required payment by the stated deadline will result in any or all of the following actions:

1. The student may be withdrawn for all future terms at CU-Boulder and must apply for readmission.
2. No transcripts, diplomas, or certification materials are issued for the student until the bill is paid in full.
3. The student will still be responsible for full tuition and fees, as well as a service charge (1 percent per month) and a late charge according to the following schedule:

<table>
<thead>
<tr>
<th>Balance Due</th>
<th>Late Charge</th>
</tr>
</thead>
<tbody>
<tr>
<td>$10.00-99.99</td>
<td>$5.00</td>
</tr>
<tr>
<td>$100.00-299.99</td>
<td>$10.00</td>
</tr>
<tr>
<td>$300.00-499.99</td>
<td>$20.00</td>
</tr>
<tr>
<td>$500.00-699.99</td>
<td>$30.00</td>
</tr>
<tr>
<td>$700.00-899.99</td>
<td>$40.00</td>
</tr>
<tr>
<td>$900.00 and over</td>
<td>$50.00</td>
</tr>
</tbody>
</table>

4. The student will become ineligible for all University services.

All outstanding financial obligations must be paid before a student can reapply to the University or attempt to re-register.

PERSONAL CHECK POLICY
Any student writing a bad check to the University may be subject to disenrollment, to cancellation of registration, to late charges, and to service charges: a $17 returned check charge will also be assessed, in addition to the amount due the University. The student may also be liable for collection costs and prosecution under the Colorado Criminal Statutes. The University of Colorado at Boulder is a member of the Boulder Credit Bureau. Specific inquiries concerning reporting should be directed to the collections department in the Bursar’s Office.

Withdrawal Policy Regarding Tuition and Fees
Students who pay their $200 enrollment deposit and register for classes for any given semester are obligated to pay full tuition and fees for that semester, unless they officially withdraw from the University.

Tuition and fee obligations for withdrawing students are as follows:

a. If students withdraw on or before the third Friday of instruction, the full amount of their enrollment deposit is retained by the University.

b. After the third Friday of instruction through the fifth Friday of instruction, 40 percent of full tuition and mandatory fees is assessed.

c. After the fifth Friday of instruction through the seventh Friday of instruction, 60 percent of full tuition and mandatory fees is charged.

d. After the seventh Friday of instruction, 100 percent of full tuition and fees is due the University.

Students should refer to the current Registration Handbook and Schedule of Courses for any changes, as the Board of Regents reserves the right to revise this schedule at any time. Refer to the appropriate Summer Session Catalog for information on the withdrawal policy and refund schedule for summer terms.

It is the responsibility of students to have all special services fees removed at the time of withdrawal. Otherwise, these fees become a financial obligation.

Students who do not pay the full amount due the University at the time of withdrawal must make arrangements for payment with the student debt management department in the Bursar’s Office. All withdrawals are handled through the Office of the Registrar, Regent Administrative Center 105.

Auditing
All persons who wish to attend regularly scheduled classes and who are not registered students must obtain auditor’s status. Auditors, whether in-state or out-of-state, pay in-state tuition for 3 semester hours per fall, spring, or summer term and receive class instruction and library privileges only. An auditor’s card must be presented to the instructor when requesting permission to attend a class. Cards may be obtained from the student billing department in the Bursar’s Office in Regent Administrative Center after classes begin.

To qualify as an auditor, an individual must be 21 years of age or older. Persons are not eligible to audit courses if they are under suspension from the University. Auditors may attend as many courses as they wish (except those courses with laboratories or where equipment is used), provided they have permission from the instructor.

If a regular degree student wishes to participate in a class without receiving credit, the student must register for the course for no credit. Tuition for courses taken for no credit is the same as for courses taken for credit. Auditors should note that the Office of the Registrar does not keep any record of courses audited; therefore, credit for these courses cannot be established. See Grading System and Drop/Add.

FINANCIAL AID
Approximately 50 percent of CU-Boulder students receive financial aid each year from federal, state, University, and private sources. In most cases, grants are supplemented by long-term loans and/or part-time employment (work-study) to meet students’ financial eligibility.

The Office of Financial Aid, located in the Environmental Design Building, is open from 9:00 a.m. to 4:00 p.m., Monday through Friday. During office hours, aid counselors are available on an appointment basis to talk with prospective students and/or their parents with regards to financing their education at CU-Boulder. Students and parents may also obtain general information by calling the automated phone answering system at (303) 492-5091. General financial aid information is available as well as office hours, directions, application materials, information on scholarships and scholarship search services, and other financial aid information.

Applying for Financial Aid
Students who wish to apply for financial aid should submit the free application for federal student aid. Students are encouraged to submit their application as soon as possible after January 1. Awards are made in early April, so all financial information must be on file in order to be considered for funds. Financial aid is awarded as long as funds are available. Please note that students must be admitted to the University before their financial aid application can be considered. However, prospective students should not wait for formal acceptance to Boulder before applying for financial aid. In addition, the Office of Financial Aid will require students and/or parents to submit signed copies of federal tax returns.

The Office of Financial Aid will send an official award offer and acceptance agreement once each application has been received and the information has been verified. As long as the student has been accepted to the University in a degree-granting academic program. Funds awarded by CU-Boulder are limited and are made to students on the basis of their demonstrated financial eligibility.

Students who apply for financial aid at CU-Boulder are responsible for knowing
and complying with the reasonable academic progress policy. Briefly, the policy requires students to maintain a 1.00 grade point average (GPA) at the end of any semester, and a 2.00 GPA at the end of four semesters. Students must also complete at least 65 percent of the hours they attempt. In addition, students are subject to a maximum number of credit hours they can attempt to complete their degree. Students are encouraged to read the complete policy, published in a fact sheet available in the Office of Financial Aid.

Financial Aid Programs

The Pell Grant program provides grant assistance to undergraduate students who have no previous baccalaureate degree.

The Supplemental Educational Opportunity Grant (SEOG) provides grant assistance to undergraduate students with no previous degree who demonstrate high need. Preference for this grant is given to students who also receive a federal Pell Grant.

The Colorado Student Grant is a state-funded grant program that awards funds to Colorado resident undergraduate students. Like any other grant, it does not have to be repaid.

The Colorado Student Incentive Grant is partly funded by the federal government and partly by the state of Colorado. Funds are awarded to Colorado resident undergraduate students with high need.

The Perkins Loan is a loan program with a 5 percent interest rate that is awarded to undergraduate students who demonstrate financial eligibility. CU-Boulder awards Perkins Loans primarily from its own funds, which are generated from former students repaying these loans. Repayment of the loan begins six months after students leave school or cease to be enrolled on at least a half-time basis. Students have up to ten years to repay the loan.

The federal Stafford Loan (formerly Guaranteed Student Loan) program offers a federally subsidized, low-interest loan to undergraduate and graduate students who demonstrate financial eligibility. The program is a cooperative effort among lenders, guarantee agencies, and the federal government. Students are eligible for varying amounts of money during the course of their college attendance, depending on their need level and their academic year in school. Repayment of the loan begins six months after students leave school or cease to be enrolled on at least a half-time basis.

The federal PLUS Loan is a loan for parents of dependent students. The PLUS has a variable interest rate and repayment begins on the day the loan is disbursed. The maximum amount that can be borrowed each year is the cost of attendance less any other financial aid received. Parents must qualify based on a review of credit history and must complete the financial aid application.

The Supplemental Loan for Students (SLS) is a loan similar to the PLUS, only it may be borrowed by independent students. In some cases, dependent students may borrow under this program, but exceptions must be fully documented and approved by a financial aid counselor. Students are required to complete a financial aid application.

The Work-Study program provides employment opportunities for both graduate and undergraduate students. Work-study is a need-based program and students must qualify for this source of assistance through the aid application process. Students awarded work-study will need to review the job opportunities posted at the UMC, room 165 to obtain their own job. Students are advised that work-study does not appear on their bill; they are paid every other week during the academic year in accordance with the number of hours worked.

The Office of Financial Aid also assists students in obtaining part-time employment when they are not awarded work-study. The Job Location and Development (LJD) program is located in UMC 165. This program provides individualized job counseling and emphasizes locating and developing part-time off-campus employment opportunities for students.

CU Scholarships and Grants are awarded on the basis of merit and/or need. These types of assistance do not have to be repaid. Institutional scholarships are funded by donations to the University. Grants given by CU-Boulder are funded either by the University or by various sponsoring groups on campus. Students seeking information about merit and need-based scholarships administered by CU-Boulder are encouraged to obtain a free copy of the publication entitled Guide to Institutional Scholarships 1993-95. This publication can be obtained in the Office of Financial Aid, Environmental Design Building, Room 2 or UMC 165.

HOUSING

Residence Halls

Living on campus in a University residence hall is considered an important part of student life. Twenty-one residence halls accommodate almost 6,000 students in single rooms, double rooms, multiple occupancy rooms, and apartments. All halls are coeducational, but specific wings and floors house occupants of the same gender.

Each fall the residence halls welcome more than 3,000 entering freshmen to their new home at the University. Subject to the availability of space, all freshmen are required to live in a residence hall for two academic-year semesters (a summer term does not count as an academic semester), unless they are married or live with parents and have permission to commute. Requests for permission to reside off campus for other reasons are considered on their merits, taking into account individual circumstances.

The residence halls provide a range of services and programs designed to support the intellectual, social, and personal growth of single student residents. All residence halls, for example, have tutoring services available to residents at little or no cost. Some halls offer special facilities, such as a dark room, computer room, an academic skills lab, or music room. Further, mini-courses are offered on subjects such as photography and cardiopulmonary resuscitation, and a variety of academic and social programs are sponsored by residence hall and other University staff.

The residence hall dining service hours are planned to be convenient for most students' schedules, and self-serve salad bars are available at noon and evening meals. Steak nights, ice cream socials, and late-night coffee and cookie breaks during exam week are among the special activities planned during the semester.

For more information about University housing options and/or permission to reside off campus, prospective students may write the Assistant Director of Housing, 64 Hall, CU-Boulder, Boulder, CO 80310.

FARRAND AND SEWALL RESIDENTIAL ACADEMIC PROGRAMS

Two residence halls, Farrand and Sewall, house distinctive liberal arts programs. The Farrand residential academic program, designed for students in the College of Arts and Sciences, is a coeducational program that offers 400 freshmen and sophomores the opportunity to enjoy the benefits of a small liberal arts college while taking advantage of the resources of a large university. The emphasis in Farrand is on participation in classes, student government, in special programs, and in creative projects. Each semester students are required to take at least one course in Farrand. For information, write the Academic Program Director, Farrand Hall, Boulder, CO 80310, or call (303) 492-8848.
The Sewall Residential Program is limited to approximately 330 freshman and sophomore students. At the heart of the Sewall experience is the academic program in American Culture and Society, which requires that students take one course (3 credits) each semester. Courses satisfy core curriculum requirements in most colleges of the University. Although the Sewall program is designed for students enrolled in the College of Arts and Sciences, students from other colleges may apply. However, enrollment for non-Arts and Sciences students is limited. In addition to the required courses, Sewall students may enroll in certain sections of some popular University lecture courses. For information, write the Program Director, Sewall Residential Academic Program, CU-Boulder, Boulder, CO 80310, or call (303) 492-6004.

During the 1992-93 academic year, both Farrand and Sewall charged $500 in additional fees for their academic program. For more detailed information on the Farrand and Sewall programs, consult the College of Arts and Sciences section of this catalog.

Kittredge Honors Program
The major goal of the Kittredge Honors Program (KHP) is to build a sense of community among a small group of honors students who live near one another, but are not isolated from the rest of the Kittredge community. KHP students interact with other high-ability students and, because honors courses are offered in Kittredge, have the opportunity to take a course in their residence hall. Students also have the opportunity to plan special programs and events and to develop the program itself.

Freshmen and sophomores become eligible to participate in KHP through the Arts and Sciences Honors Program. Upper-division students may maintain involvement in the program through nonresidential activities.

For additional information, students should write to the Honors Center, Campus Box 184, CU-Boulder, Boulder, CO 80309-0184, or call (303) 492-3695.

ENGINEERING AND SCIENCE RESIDENTIAL PROGRAM
Freshmen and sophomores studying engineering and natural science who live in Aden, Brackett, Cockerell, and Crosman Halls may participate in this coeducational program. Sponsored by the College of Engineering and Applied Science and the Department of Housing, and supported by the College of Arts and Sciences, this program offers residents specialized tutoring, extensive computer-system access, and professional counseling and advising. An additional estimated fee of $65 per semester covers the support activities.

OTHER ACADEMIC PROGRAMS IN THE RESIDENCE HALLS
The Council on Academic Programs in the Residence Halls (CAPRH) develops academic programs in CU-Boulder's residence halls. Some of the projects that have been funded include a music program in Cheyenne Arapaho Hall; a preceptor program, primarily for business students; a faculty luncheon program in the halls; and special arts and sciences core curriculum courses that are presented directly in the halls. All programs facilitate greater interaction between faculty and students, and foster the integration of students' academic life with their campus residence hall life. Interested students, faculty, and staff are encouraged to participate in the planning and submission of projects to the council.

ROOM AND BOARD RATES PER SEMESTER
Residence hall room and board rates per person, per semester, for the 1992-93 academic year have been established as follows. A modest rate increase should be expected for the 1993-94 academic year. Rates are higher for the Sewall and Farrand residential academic programs. As noted, there is also an additional fee for the Engineering and Science Residential Program.

Board and single room $2,120
Board and double room $1,832

APPLICATION FOR RESIDENCE HALL HOUSING
New freshman and transfer students receive housing application materials from the Department of Housing after they have confirmed their intent to attend the University. The packet includes a housing brochure, the residence halls application, two copies of the residence halls agreement, and a return envelope. The housing forms should be returned directly to the Residence Halls Reservation Center. The earliest these forms are received, the better chance students have of being assigned to the residence hall of their choice.

Space for the fall term can normally be assured for all freshmen who apply for housing by early May. However, due to heavy demand for limited hall space, the University cannot always guarantee that freshmen who apply for housing late (usually after mid-to late May for the fall term) will find space available in the residence halls. If this is the case, students are so advised and are given appropriate instructions regarding wait lists and/or assistance in securing off-campus housing.

Application for admission to the University and application for housing are two separate transactions. Application for housing does not guarantee admission to the University, nor does admission to the University guarantee that housing will be available. For information regarding admission notification and confirmation procedures, see the Undergraduate Admission section of this catalog.

An advance payment ($100 in 1992-93), which is applied toward spring semester room and board, is required to reserve residence hall accommodations. Students should note that residence hall facilities are reserved on a first-come, first-served basis.

All housing agreements are for the full two-semester academic year or remainder thereof. A liquidated damage fee is charged if the student withdraws from a residence hall during the period of the agreement.

Family Housing
The University offers a variety of studio, one-, two-, and three-bedroom furnished and unfurnished apartments for student families. The University Family Housing Children's Center provides day care for the children of University housing residents, University staff, University students, and others in the community. Family housing residents have first priority. For information, write the Family Housing Office, 1350 Twentieth Street, CU-Boulder, Boulder, CO 80302.

Off-Campus Student Services
Off-Campus Student Services (a service of UCSU) maintains listings of rooms, houses, and apartments for rent in the Boulder community as well as lists of students looking for roommates. Students may come to the office in UMC 336 to obtain a set of computerized rental listings (available for a small fee), to use the free telephones in their rental or roommate search, and to talk with assistants about the Boulder area.

Office assistants also advise students about leases, security deposits, effective shared rooming techniques, and ways to avoid landlord/tenant problems. The office sells Boulder maps for $1.50 and provides free copies of the Boulder Tenants' Guide, an easy-to-understand summary of tenants' rights and responsibilities; the Boulder model lease; tips for successful rooming techniques; and handouts on furniture rental, moving tips, local banking services, and other off-campus housing-related matters. Each spring the office sponsors an off-campus housing fair where landlords, property managers, and related businesses offer their services to students in a trade-show fashion.
For additional information, students may write to the Off-Campus Housing Office, Campus Box 206, CU-Boulder, Boulder, CO 80309-0206 or call (303) 492-7053. Office hours are 9:00 a.m. to 4:00 p.m., Monday through Friday. During July and August, the office is also open on Saturdays from 10:00 a.m. to 2:00 p.m.

PROGRAMS

Alumni Association
The CU-Boulder Alumni Association, housed in the Koenig Alumni Center, sponsors a wide range of activities and programs to benefit students, former students, graduates, parents, and the University. By fostering loyalty among CU-Boulder alumni and providing opportunities for involvement, the Alumni Association creates a foundation for lifelong contact with the University.

Students can join the Student Organization for Alumni Relations, an active, vibrant group that provides leadership for Homecoming and the annual Teaching Recognition Awards, among other activities. After leaving CU-Boulder, alumni can become involved in their local alumni chapters and the Alumni Association’s constituent organizations, such as the Black Alumni Association, the Hispanic Alumni Association, the Asian Pacific American Alumni Association, or one of several academically based groups.

Parents of CU-Boulder undergraduates can also support the University through the CU Parents Association.

By joining the Alumni Association, one of its chapters, or constituent groups, alumni and parents become powerful ambassadors for CU-Boulder in their communities. Finding and recruiting the best students, including those from minority groups, has proven to be one of the most valuable contributions alumni and parents can make. The association also encourages advocacy on behalf of the campus by keeping alumni and parents informed through various publications tailored to their interests. News about alumni, coupled with candid coverage of CU-Boulder and the people and issues affecting it, helps maintain mutually supportive relationships between the campus and its friends.

For additional information, call (303) 492-8484.

Artist Series
The Artist Series features a wide array of internationally renowned performing artists. From the hot sounds of jazz, to the rhythms of world music and dance, to the finest of the classical repertoire—don’t miss the excitement! Branford Marsalis, Tito Puente, Vladimir Ashkenazy, Yo-Yo Ma, DanceBrazil, and Ballet Hispanico are just a few of the outstanding performers who have appeared in recent Artist Series events. Student discounts are available. Call (303) 492-8008 for a free brochure.

Clubs and Organizations
Clubs and organizations of almost every description are available on the CU-Boulder campus including over 200 academic, political, social, religious, and recreational groups. The Animal Rights Group, Ski Club, Interfraternity Council, United Campus Ministries, Student Ambassadors, Black Student Alliance, Program Council, College Republicans, and the Residence Hall Representative Council are examples of student organizations which offer a variety of opportunities for students to become involved with others on campus.

All clubs and organizations provide an excellent way for students to become involved in current events, student activities, and community service. For more information, interested students can contact the University of Colorado Student Union’s Club Guide, available in UMC 333, in the Student Union Information Office in the Student Union, or call 492-6366.

Colorado Space Grant College
The Colorado Space Grant College provides undergraduate and graduate students with hands-on experience in building, flying, and operating space experiments, as well as in analyzing data from engineering and science experiments. Students in a variety of disciplines are trained to fly NASA and the U.S. space program into the twenty-first century. Space Grant College students receive at least two years of actual research experience in space science and engineering before they graduate. They have exciting opportunities to apply their classroom learning, and they are especially attractive to prospective employers.

Scholarships, research assistantships, and/or independent research credit is awarded to select students who complete the course entitled Introduction to Space Experimentation (APAS 3060 or ASEN 3060). This course is the gateway to the space track and provides a broad perspective on space experimentation. It surveys the scientific and technical research that can be accomplished from space, and the engineering principles and tools needed to make that research possible. A seminar series associated with the course provides additional perspective on the technical, social, and political aspects of space exploration.

Research Opportunities
Space grant students gain valuable hands-on experience in space science and engineering projects by participating in one of several research efforts. The payload flown on the space shuttle is one of a series of student-run research projects to be flown with the ATLAS shuttle missions.

Other space grant students, with students from colleges and universities throughout Colorado, are working on the Colorado Student Ozone Atmospheric Rocket (CSOAR), scheduled for launch in fall 1992. The CSOAR payload, designed to examine atmospheric ozone, will be launched on an Orion series sub-orbital rocket from the NASA Wallops Island Flight Facility in Virginia.

For further information, contact the Colorado Space Grant College, Campus Box 520, CU-Boulder, Boulder, CO 80309-0520, (303) 492-3141.

CU Opportunity Program
The CU Opportunity Program (CUOP) provides access and educational opportunity to students from ethnic minority backgrounds (e.g., American Indian, Asian American, African American, and Hispanic), migrant backgrounds, and educationally or economically disadvantaged backgrounds. CUOP offers a comprehensive educational support program that includes admissions and financial aid assistance; freshman core academic courses; tutorial services; and academic, personal, and career counseling. The program is distinctive in its approach to quality education, in its way of providing educational opportunities to undergraduates, and in its sense of educational values and academic commitment.

A network of support programs and professional staff members work to ensure CUOP students’ success at the University. Programs providing educational support services are the CU Opportunity Program, Office of Admissions; the University Learning Center; and Counseling and Career Services: A Multicultural Center.

CU OPPORTUNITY PROGRAM, OFFICE OF ADMISSIONS
This program conducts recruitment efforts that provide minority and disadvantaged students with information about undergraduate educational opportunities available to them at the University. Students receive admissions counseling and financial aid advising and are assisted in the application
process. Because all students have not had equal opportunities to prepare for university work, additional admission consideration is available.

**University Learning Center**
The University Learning Center offers a comprehensive academic support program designed to ensure the academic competency expected of all University students. This includes an innovative academic program that offers introductory freshman courses; a study skills center for math and science, writing, and reading; individualized and small group tutoring; video and computer-assisted instruction; and weekly skills workshops.

The center also gives precollegiate academic assistance to ethnic minority youth in Colorado and the Rocky Mountain region. It reaches out to high school and junior high school students, providing them with a chance to succeed in a structured academic environment and offering them access to Boulder’s educational opportunities. Current projects include the American Indian Upward Bound Program, the Precollegiate Development Program, and the Academic Excellence Program.

**Counseling and Career Services: A Multicultural Center**
The center offers a broad array of counseling and community support activities, and tailors those activities to meet each student’s educational, career, and personal goals. This student-centered counseling philosophy focuses on providing guidance to young adults who are in the process of defining their academic and personal lives.

**Fraternities and Sororities**
Over 3,200 students currently participate in CU-Boulder’s 41 social fraternities and sororities. Emphasizing service, leadership, scholarship, and involvement in campus life, most of the organizations have houses off campus where members can live after their freshman year. The University is working through its Greek Liaison to establish an educational, growth-oriented environment for fraternity and sorority students that integrates them more fully into the campus community.

The Greek system is autonomous from the University and not subject to its direct control. Additional information may be obtained by calling the Panhellenic and Interfraternity Council Office, (303) 492-6359, or the University Greek Liaison, (303) 492-5425. Information about Black Greek organizations may be obtained by calling the Black Student Alliance office, (303) 492-1863; Latino organizations can be reached through the United Mexican American Students office, (303) 492-6571.

**Honor Societies**
One way in which outstanding student scholarship is recognized at the University of Colorado at Boulder is through national and local honor societies. The national honor society, Phi Beta Kappa, founded in 1776 at the College of William and Mary in Virginia, was established at CU-Boulder in 1904. Phi Beta Kappa recognizes outstanding scholastic achievement in the liberal arts and sciences. The campus also has a chapter of Sigma Xi, an honor society for scientists. Sigma Xi’s goals are to advance scientific research, to encourage communication among scientists, and to promote the understanding of science.

Other national honor societies with local chapters at Boulder are Beta Gamma Sigma (business), Kappa Delta Pi (education), Tau Beta Pi (engineering), Kappa Tau Alpha (journalism), Order of the Coif (law), and Pi Kappa Lambda (music). The criteria for membership in honor societies and their activities vary. For more information on both national and local societies, consult the individual college and school sections of this catalog or associate deans’ offices.

**Intercollegiate Athletics**
The University of Colorado is a member of the Big Eight Conference and sponsors teams in a variety of intercollegiate sports. Competing at the national level, the Colorado Buffaloes pride themselves on many individual and team championships. In 1991, CU-Boulder claimed national championships in both football and skiing.

Men’s varsity sports include football, basketball, cross-country, track and field, skiing, golf, and tennis. Women’s varsity sports include basketball, cross-country, track and field, skiing, tennis, and volleyball.

Folsom Field, a 51,748-seat stadium, serves as the home of the Colorado Buffalo football team. The basketball team practices and competes in the Coors Events/Conference Center, a facility that seats 11,199 people. The golf and tennis teams use local clubs as their headquarters, and the CU-Boulder ski team takes advantage of Colorado’s many ski resorts, including its home mountain, Lake Eldora. The women’s volleyball team uses both the Coors Events/Conference Center and Balch Fieldhouse for matches and practices.

Boulder’s diverse terrain and a running-conscious community combine to create a vigorous atmosphere for track and cross-country training.

**International Education**
The Office of International Education serves as a liaison for international activities among academic departments, administrative units, foreign universities and governments, and U.S. governmental agencies and foundations. This liaison stimulates and provides administrative support for students and faculty members who desire to study or conduct research overseas, for foreign students, faculty members, and visitors who come to the University of Colorado, and for all members of the University community who wish to develop an international dimension in their teaching, research, or study.

Specific functions include expediting the exchange of students and faculty, arranging the programs of foreign visitors, promoting special relationships with foreign universities, and advising on international scholarships. The office also houses the Center for International Research and Education Projects (CIREP), which promotes the international interdisciplinary activities of Boulder’s faculty through fellowships, and encourages linkages between CU-Boulder and foreign institutions for collaborative ventures among faculty members.

The Office of International Education maintains a small resource library and information service. The office arranges study tours and study abroad programs around the globe. Students interested in international studies are encouraged to consult the Office of International Education for information about study abroad opportunities abroad. International student identification cards and EUSA passes are also available through the office.

**Study Abroad Programs**
The Office of International Education offers over 35 different study abroad programs around the globe. Traditional junior-year-abroad programs, in which a student is placed directly in a foreign university for a full academic year, are available at the American University in Cairo, Egypt; the Universities of Bordeaux and Grenoble, France; the Universities of Regensburg and Tubingen, Germany; and Uppsala University in Sweden. Programs where students may study for a semester or an academic year include the Nova Scotia College of Art and Design, Canada; the University of Costa Rica in San Jose; the Instituto Tecnologico y de Estudios Superiores de Monterrey, Mexico; the Hebrew University in Jerusalem, Israel; the University of Wollongong, Australia; and the Universities of East Anglia and Lancaster, England. CU-Boulder is also a member of the International Student Exchange Program, in order to encourage semester and full-year exchange programs with the devel-
oping nations of the world in Africa, Asia, and Latin America.

Generally, students must have completed a minimum of two years of college-level work with a B average or better and have studied at least two years of the appropriate language to qualify for these programs.

Qualified students not interested in being fully integrated in a foreign university system may elect special programs for foreign students abroad. These students may study central and east European studies in Czechoslovakia, Hungary, or Poland; architecture and design, international business, or liberal arts in Copenhagen at Denmark's International Study Program; humanities, area studies, social sciences, and Spanish language courses in the Dominican Republic, Guadalajara, and Alicante, Granada, or Madrid, Spain; French language and civilization in Rennes, France; Chinese language and area studies in Beijing and Nanjing, China; and Japanese language and area studies in Osaka or Tokyo. All of these programs, except in Osaka, Japan, offer semester-long study abroad opportunities. Many also offer a full-year option. The language requirement for these programs varies. Some programs offer instruction only in English while others choose the language of the host country.

Students who wish to spend a summer abroad studying language may choose from programs in Beijing, China; Annecy, France; Kassel, Germany; Guadalajara, Mexico; or Alicante, Spain. Area studies and language courses are available at the Hebrew University in Jerusalem, Israel. Specialized short-term summer and winter interim programs are offered in conjunction with specific academic departments. Students may study art history in Italy, comparative European architecture and planning in western Europe, the arts and music in London, or international finance in London.

All participants in University of Colorado study abroad programs remain enrolled at the University and all credit earned while abroad is considered earned in residence. Most study abroad credits are recorded on a pass/fail basis, but are exempt from all pass/fail restrictions in the College of Arts and Sciences and most other colleges and schools. Financial aid from the University can be applied to program costs in most cases. Special study abroad scholarships are available to program participants.

More information about study abroad programs is available at the Office of International Education, Campus Box 123, CU-Boulder, Boulder, CO 80309-0123, (303) 492-7741.

FOREIGN STUDENT AND SCHOLAR SERVICES

The University of Colorado has welcomed foreign students and scholars for many years. Currently more than 1,000 foreign students and over 400 postdoctoral scholars and visiting faculty members from more than 80 countries are on campus. Foreign Student and Scholar Services, a part of the Office of International Education, provides information and assistance to foreign students and visiting scholars regarding university regulations and procedures, immigration requirements, liaison with sponsors and home governments, and any other matters that are of special concern to students and scholars from other countries. All foreign students and visiting foreign scholars are urged to check in at Foreign Student and Scholar Services upon arrival at the University and to maintain contact with the staff during their stay at the University. For further information, foreign students and scholars, call (303) 492-8057.

INTERNATIONAL ENGLISH CENTER

The University's International English Center (IEC) provides intensive English-language instruction to students from all parts of the world. Classes are offered in eight-week sessions at six levels of English-language proficiency and in all language skills. The program is designed to prepare international students for academic study at colleges and universities in Colorado and elsewhere in the United States. At advanced proficiency levels, IEC students are permitted to enroll concurrently in selected academic courses as additional preparation for a degree program.

The IEC's fast-paced schedule is particularly appropriate for University of Colorado applicants who have been informed by the Office of Admissions that they are academically qualified but cannot be granted admission because of inadequate English-language proficiency. Such students are automatically eligible for study at the IEC. For IEC students who have not applied to CU or any college or university in the United States, the IEC provides academic placement assistance.

As a unit of CU's Division of Continuing Education, the IEC offers non-intensive classes in English as a second language for non-English-speaking visitors or local residents.

Full information may be obtained by mail from the International English Center by mail to Campus Box 63, in person at the IEC offices at 1333 Grandview Avenue, by telephone, (303) 492-5547, or by facsimile (FAX), (303) 492-5515.

Orientation

Orientation activities are important in introducing new students to campus programs and services. Students are given the opportunity to receive academic advising, to meet faculty, staff, and other students; and to obtain information on college requirements, student services, and campus activities. Because each college has its own unique orientation program, students should call or write their respective college for more information. Some colleges require attendance at orientation sessions; most colleges include parents in their orientation programs.

In addition, each fall entering freshman, transfer, and graduate students are invited to participate in new student welcome, activities and events specially planned to familiarize new students with the campus. A feature of the program is the chancellor's welcome to the University.

Rocky Mountain Film Center

The Rocky Mountain Film Center (RMFC) is perhaps best known for presenting the International Film Series, which celebrated its fiftieth anniversary during the 1991-92 season. A special program within the IFS is the First Person Cinema, an avant-garde series featuring personal appearances by internationally famous artists in both video and film. This program is the world's longest-running continuous forum for alternative cinema.

In addition to providing a venue for contemporary films, independent documentary cinema, and classic motion pictures, RMFC serves as a resource to both the university and the larger community for practical, theoretical, and critical issues concerning film. Fulfilling this capacity, RMFC offers instruction on video equipment and computer graphics, holds video production workshops, and operates an equipment desk for the rental of filmmaking and video gear. RMFC also hosts numerous special events and programs, including national solicitations for grants, fellowships, and foundation projects; and the Academy of Motion Picture Arts and Sciences Student Academy Awards.

Housed in the CU Film Studies Department, the Rocky Mountain Film Center is a media arts center serving the Boulder/Denver community and the Rocky Mountain region with film and video access, screenings, information, and education. On campus, it performs a valuable service as a vehicle for multicultural awareness.

For further information or schedules, call (303) 492-1531 anytime.
Semester at Sea
In fall 1990, an agreement was signed with the University of Pittsburgh’s Institute for Shipboard Education encouraging CU-Boulder undergraduate students, faculty, and staff to participate in the Semester at Sea program. Designed to be a “global” experience, students live and learn aboard the S.S. Universe on a 100-day voyage around the world. Students enroll for at least 12 hours of course credit during the semester and participate in traditional class work as well as international field work. Credits earned are transferable back to CU-Boulder.

The shipboard curriculum provides students with a series of insights into various societies and allows them to analyze and discuss what they observe. Students not only develop the ability to understand new cultures as they are encountered, but also gain the intellectual tools that allow them to relate past experiences to future situations. Similarly, they are called upon to examine crisis issues of global concern, such as those relating to the environment, population, foreign policy interrelationships, and economics, in the context of the nations they visit. During the semester, the ship truly becomes a campus and the world a laboratory for study.

For information on courses, itineraries, and costs, contact the Semester at Sea office in UMC 313, (303) 492-5351.

Senior Auditor Program
During the fall and spring semesters, the University of Colorado at Boulder offers a senior auditor program to residents of the state who are 55 years of age or over. Senior auditors attend classes on a tuition-free, space-available basis. No record is kept of attendance; no examinations are taken for credit; and class participation is at the discretion of the instructor. Senior auditor privileges include the use of the University’s libraries. For information, call (303) 492-8484.

Undergraduate Research
CU-Boulder offers several ways for undergraduate students to participate directly in research and creative work. Through such involvement, students acquire knowledge and skills seldom attained through classroom experience alone. Project results sometimes are presented at national professional meetings or published in scholarly journals.

College of Arts and Sciences Honors Program
Students in the program have the opportunity to collaborate with faculty on research and creative projects in any area of the college. Some students select highly individualized projects, while others become involved with major ongoing research programs. Each student who wishes to graduate with honors is required to complete a senior thesis. The thesis is usually a research paper or creative essay, depending upon the project. The thesis experience stresses intellectual independence and introduces students to proper research methods and creative techniques in preparation for graduate or professional work. See the Honors Program section of this catalog for detailed information.

Independent Study
Independent study course work provides students the opportunity to become involved in projects of their own choice. Projects could include writing a play, doing laboratory research, or designing a space-shuttle experiment. The number of credit hours earned depends upon the scope of the project. In all cases, work is done under the supervision of a faculty member and should be arranged as early in the semester as possible. Departmental and faculty approval is required, and all deadlines must be met. Students should consult with their associate dean’s office about any special provisions.

Undergraduate Research Opportunities Program
The Undergraduate Research Opportunities Program, or UROP, sponsors undergraduate students who wish to work in partnership with a faculty member on a research or creative project. UROP involves students in all areas of research—from writing proposals, to conducting research or pursuing creative work, to analyzing data and presenting results. Interested students must identify a project and a faculty sponsor and then submit a proposal. Projects are designed around an aspect of the faculty sponsor’s research or involve research or creative work of the student’s own design. Proposals are evaluated on a competitive basis. Students are awarded up to $750 in stipends and/or expense allowances to support their projects. A limited number of $2,000 summer research fellowships is offered to enable students to spend the entire summer engaged in research. UROP also publishes Ascent: The Journal of Undergraduate Research. For information concerning opportunities for undergraduate research, contact the UROP office in Norlin M400H, (303) 492-2596.

United Government of Graduate Students
The United Government of Graduate Students (UGGS) represents more than 5,000 graduate students, law students, and business students on the Boulder campus. UGGS, the graduate student link to the Graduate School and other administrative bodies, actively pursues goals intended to enrich the quality of life on campus and the quality of graduate work for the University. As such, UGGS is committed to full health and child care benefits for graduate student employees of CU, elimination of the mandatory Athletic Department fee, clarification of policies regarding research and teaching assistants, improved teacher training programs, and providing a multicultural campus.

UGGS holds bimonthly meetings during the academic year and monthly meetings during the summer. Graduate students from each department choose or elect representatives for the legislative governing body; UGGS officers are elected from among the departmental representatives. All are welcome to the general meetings.

For further information on the United Government of Graduate Students, call 492-5068, or drop by at UMC 327.

University of Colorado Student Union
Through the University of Colorado Student Union (UCSU), students make policies and control many Boulder campus facilities and programs. Based on its budget of more than $16 million, half of which comes from student fees and the other half from self-generated revenues, UCSU is the nation’s largest student government. UCSU operates facilities such as the Wardenburg Student Health Center, the University Memorial Center (UMC), the Student Recreation Center, and the campus radio station, KUCB. UCSU also offers students access to a resource test file, off-campus housing assistance, legal counseling, and many other services.

UCSU is divided into executive, legislative, and judicial branches. The UCSU Executives, elected each spring by fee-paying students, head the executive branch. In representing the students, the executives work with the board of regents and the CU administration on University policies and decisions. Support staff includes student administrators who work in key administrative offices and serve as liaisons between the student body and the administration.

The legislative branch of UCSU is composed of an 18-member Legislative Council.
Nine seats are occupied by representatives of the colleges and schools; the remaining nine seats are occupied by elected representatives-at-large. The joint boards on which council members serve include the environmental, recreation, health, finance, cultural events, UMC, and KUCB Access in radio and special student services boards. The Appellate Court is UCSU's judicial branch. The seven students appointed by the executives as justices to the Court are responsible for interpreting the UCSU constitution and ruling on specific appeals brought before them.

For more information regarding UCSU and getting involved, please call 492-7473 or stop by UMC 333 between 9:00 a.m. and 4 p.m.

Veterans' Services

The Veterans' Services Office is part of the Office of Financial Aid and helps eligible students apply to the Department of Veterans' Affairs for educational benefits. As a condition of receiving benefits, prospective students must be accepted to a degree program at CU-Boulder, or acceptance must be imminent.

A certified copy of Copy 4 of the DD-214 is required in order to apply for educational benefits as a veteran; this form is available from local county clerk and recorders' offices without charge. The certified copy must have the raised seal of the county clerk. If the veteran has used educational benefits any time since discharge from active duty, a certified copy of Copy 4 of the DD-214 is not necessary. Persons on active duty who wish to take advantage of their educational benefits under any of these programs should contact their base education officer for eligibility requirements.

CU-Boulder is approved for veterans benefits under the following programs:

Veterans' Educational Assistance Program (VEAP), Chapter 32. Students must have entered active duty on or after January 1, 1977, and before July 1, 1985, and have participated in the program while in the service.

New GI Bill, Chapter 30. Students must have entered active duty on or after July 1, 1985 and participated in the program while in the service. Also eligible are those veterans who entered active duty before January 1, 1977, and who served continuously on active duty through June 30, 1988 (or June 30, 1987, with at least a four-year obligation to the Selected Reserve).

Dependents' Educational Assistance Act, Chapter 35. Students between the ages of 18 and 26 who feel they are eligible to receive educational benefits due to the death of a parent in active military service or a parent's service-connected disability should establish their eligibility with the local Department of Veterans' Affairs regional office.

Children and spouses of 100-percent-disabled veterans may also qualify. Applicants must provide the VA file number and a certified copy of their birth certificate to the Veterans' Affairs Office in order to initiate the educational benefits. Those students eligible for social security benefits under the Restored Entitlement Program for Survivors (REPS) should contact the Veterans' Affairs Office or the local Department of Veterans' Affairs regional office.

Selected Reserve Educational Assistance Program, Chapter 106. Students may be eligible if they enlisted, reenlisted, or extended an enlistment in the Selected Reserve or National Guard for a period of six years beginning on or after July 1, 1985. Each student must provide the Veterans' Affairs Office with a Notice of Basic Eligibility, DD-2384, from the reserve or guard unit.

Disabled Veterans, Chapter 31. Veterans may be entitled to vocational rehabilitation benefits of tuition, fees, books, and a monthly stipend if they meet the following conditions: they were discharged from the service under other-than-dischargeable conditions; they have a service-connected disability for which they are receiving or could elect to receive VA compensation; and the Department of Veterans' Affairs determines they need rehabilitation services and assistance to overcome an employment handicap or to improve their capacity for independent living in their family and community. Applications are available in the Veterans' Affairs Office. Interested persons should contact the Department of Veterans' Affairs Vocational Rehabilitation at (303) 980-2777.

Payment. Students may request advance payment by completing the proper forms at the Veterans' Affairs Office at least 60 days before the start of a term (they must not have used the benefits in the 30 days preceding the term). The advance paycheck for the first month (or partial month) and the succeeding month is delivered to the Veterans' Affairs Office. The next educational benefit check and subsequent checks are sent to the student's address for that enrollment period.

The office has a counselor on staff to assist students with planning academic schedules in relation to VA regulations. Financial aid counseling is also available. The office is located in the Office of Financial Aid, Environmental Design, room 2. For further information, call (303) 492-7322.
Enrollment deposits are refunded to students upon graduation or official withdrawal from CU-Boulder within established dates and guidelines. All refunds are reduced by any outstanding financial obligations. Refunds are issued no more than eight weeks after graduation or two weeks after official withdrawal.

The $200 deposit is required of all degree students. New students are required to pay the deposit when they first confirm their intent to enroll at CU-Boulder, and are not permitted to register until the enrollment deposit is paid.

All questions regarding the deposit policy should be directed to the Office of the Registrar, Regent 105, (303) 492-6970.

Credit/No Credit

Students who wish to take course work for no credit should indicate this at the time they register for courses or during the final schedule adjustment period; changes in credit registration are not permitted after this time. Tuition is the same whether or not credit is received in a course.

Pass/Fail (P/F)

Students should refer to the college and school sections of this catalog to determine the number of pass/fail credit hours that may be taken in a given semester or credited toward a bachelor’s degree. Procedures for requesting pass/fail enrollment can be found in each semester’s Registration Handbook and Schedule of Courses.

Students who wish to register for a course on a pass/fail basis should do so at the time they register or during the schedule adjustment period. Changes to or from a pass/fail basis may be made only during those times.

All students who register on a pass/fail basis appear on the class roster, and a letter grade is assigned by the instructor. When grades are received in the Office of the Registrar, those courses that require a P/F designation are automatically converted. Grades of D- and above convert to grades of P. A grade of F remains an F.

Exceptions to the pass/fail regulations are permitted for certain courses that are offered only on a pass/fail basis.

Schedule Adjustment Deadlines

Specific schedule adjustment (drop/add) deadlines for each fall and spring semester are announced in that semester’s Registration Handbook and Schedule of Courses. Summer deadlines are published in the Summer Session Catalog.

1. Students are allowed to drop and add courses during the final schedule adjustment period with no signatures required, unless enrollment levels are reached earlier. There are no caps allowed after the final schedule adjustment period. Students may drop classes during the schedule adjustment period without being assessed tuition and fees for them. Individual colleges and schools may have further restrictions.

2. After final schedule adjustment, the instructor’s signature is required to drop a course. The signature indicates that the student is passing the course; students who are failing the course are not permitted to drop. Courses dropped after the deadline noted in the Registration Handbook and Schedule of Courses appear on the transcript with a grade of W and no tuition adjustment is made.

3. Six weeks after classes begin in a fall or spring semester, a course may not be dropped unless there are documented circumstances clearly beyond the student’s control (for example, accident or illness). In addition to obtaining the instructor’s signature, students must petition their dean’s office for approval to drop the course. Petitions normally are not approved after this date.

4. Students dropping all of their courses should refer to the Withdrawal section below for further information.

Variable Credit

All independent study courses and, occasionally, other regular courses are offered on a variable credit basis. Students must designate the number of credit hours they wish to receive for the course at the time of registration. Consult the Registration Handbook and Schedule of Courses for variable credit hour ranges for particular courses.

Time Out Program

The Time Out Program (TOP) is a planned leave program for currently enrolled Boulder students who are in good standing in their college or school and whose dean approves their leave. Students on TOP may leave for one semester or one year to pursue academic or nonacademic interests, and they do not need to reapply to the University. Students may take courses at another campus of the University of Colorado or at another college or university while on TOP. TOP will guarantee participating students a place in their current college or school and in their current major when they return to classes. In addition, students may apply for transfer to a different college or school upon returning to CU-Boulder, provided they observe all policies, procedures, and deadlines. Certain restrictions do apply, however, for some colleges and schools. Students are informed of registration procedures by mail.

Additional information and a TOP application can be obtained from the Office of the Registrar in Regent Administrative Center 105. A nonrefundable $30 program fee is required at the time of application to TOP. The TOP application must be submitted no later than the six-week drop deadline for the semester the student begins TOP.

Note: Students registered for the semester they plan to begin TOP must formally withdraw. See the withdrawal section below. Call (303) 492-8673 for further information.

Withdrawal Procedures

Before classes start, students may withdraw by dropping all of their classes via CU Connect, by filling out a withdrawal form in the Office of the Registrar, Regent Administrative Center 105, or by sending a letter of withdrawal to the Office of the Registrar, Campus Box 20, CU-Boulder, Boulder, CO 80309-0020.

Once classes begin in a fall or spring semester, students must complete a withdrawal interview in the registrar’s office. During the summer, students may withdraw by dropping their last class or by filling out a withdrawal form in the registrar’s office. In any term, students are not permitted to withdraw after the last day of classes.

Failure to withdraw officially will result in a failing grade being recorded for every course taken in a term and makes a student liable for the full amount of tuition and fees for that term. See the withdrawal policy regarding tuition and fees on page 17 for further information on charges and refunds.

Rules for withdrawing may vary with each college and school. Students anticipating a withdrawal should consult with their dean’s office and with the Registration Handbook and Schedule of Courses or Summer Session Catalog for specific withdrawal procedures. More information is available in the Office of the Registrar, Regent Administrative Center 105, (303) 492-8673.

Students who withdraw from either a fall or spring semester and then wish to return to the University must reapply for admission. Reapplication is not necessary for those students on leave through the Time Out Program.

Other Registrations

CONCURRENT REGISTRATION

Boulder campus students who are unable to obtain courses required for their degree program on the Boulder campus may be allowed to register for up to two courses or
6 credit hours, whichever is greater, on another University of Colorado campus.

Note: Graduate students should check with the Office of the Registrar for exceptions to the home-campus registration requirement and limitation on credit hours at the host campus.

This option is only available during the academic year, and not during summer session. The course work must be required for their degree program, they must have their dean's permission, they must be enrolled for at least one course on the Boulder campus, and enrollment levels must not have been reached on the other campus.

Students taking required courses in the College of Business and Administration or in the Graduate School of Business Administration may only exercise the concurrent registration option if they are in their graduating semester; business students who are two semesters from graduating and who cannot obtain a course necessary to complete a prerequisite sequence may also be allowed to use this option. The course must be required for graduation and not be offered on the Boulder campus, or the course must conflict with another required course in which the student is enrolled. Students from other colleges and schools who wish to take business courses must have the approval of the Boulder campus College of Business and Administration in addition to the approval of their own college or school before submitting the concurrent registration form.

Boulder students exercising this option will pay tuition for their total credit hours at Boulder campus rates. Concurrent registration forms and instructions are available at the Office of the Registrar in Regent Administrative Center 105, between 9:00 a.m. and 4:00 p.m., after the drop/add period has begun at the other campus.

INTERCAMPUS REGISTRATION

Boulder campus students who wish to take course work on another campus of the University of Colorado may be able to register on that campus independent of Boulder campus registration. However, those students must apply for admission to and follow the registration procedures established by the other campus. Students should check with their dean's office for approval. Arts and sciences students may not register at the University of Colorado at Denver or the University of Colorado at Colorado Springs, except in the summer.

LATE REGISTRATION

Students in certain categories may be allowed to register late for any given semester. These categories, however, cannot be designated until just before the semester begins. Late registration will then continue on a day-by-day basis until enrollment levels are met, or until the schedule adjustment deadline, whichever comes first.

Students who fail to complete registration during their assigned registration period are subject to a late registration fee if late registration is held for their category.

Graduate students registering as candidates for degree or for thesis hours must register during the assigned registration period or be subject to the late registration fee if late registration is held for their category. For further information, call (303) 492-6970.

REGISTRATION FOR FACULTY AND STAFF

All permanent faculty and staff who wish to apply for the 1-6 free credit hours they are granted each year must take a copy of their current personnel action form (PAF) to the Bursar's Office, Regent 150. New nondegree students, and nondegree students who have taken a break from course work, must turn in a nondegree student application (available in the Bursar's Office) as well as their current PAF.

Faculty and staff members who are applying to a degree program should follow the regular application procedures of the Office of Admissions. However, in order to apply for the 1-6 free credit hours, they should submit their application form and current PAF to the Bursar's Office. After one semester, new degree students will become continuing students and are automatically set up to register for each semester, although application for any of the remaining 1-6 free credit hours must be made each semester.

To take advantage of the free semester credit hours, faculty and staff must wait until after schedule/bill distribution to register. However, the PAF should be submitted by the deadline published in the Registration Handbook and Schedule of Courses or Summer Session Catalog; registration materials are issued when the PAF is received. Faculty and staff who have used their free credit hours for the year may register early with their appropriate registration group and pay applicable tuition and fees for the course(s).

Faculty and staff should refer to the current Registration Handbook and Schedule of Courses or call the Bursar's Office at (303) 492-5381 for registration dates and additional information.

Commencement

Graduation ceremonies are held in May, August, and December, and are open to the public with no tickets required. The May and August commencements are held outdoors, weather permitting, and the December ceremony is held in the Coors Events/Conference Center on campus. At each commencement, the president of the University and the chancellor of the Boulder campus deliver commencement addresses and degrees are conferred. Details are sent to graduating students approximately one month before each ceremony. For further information, call the Commencement Office, (303) 492-7205.

Only doctoral and law graduates receive their diplomas at commencement. All other graduates may pick up their diplomas in the Office of the Registrar approximately two and one-half months after the ceremony. Diplomas not picked up at that time are mailed to students at the address provided on the diploma address card they return to the Commencement Office.

SERVICES

 Academic Media Services

Dedicated to making the learning experience interesting, meaningful, and memorable, Academic Media Services (AMS) supplies the campus with films, video and audiotapes, slides, transparencies, computer graphics, and a variety of audiovisual equipment. Staff members, assisted by a cadre of student employees, work closely with faculty in 55 self-service media-equipped classrooms and 9 operator-assisted, media-equipped lecture halls.

Video programs are produced on campus, shown on the campus TV network, and broadcast to sites along the Front Range. Repair of personal computers and peripherals is offered by qualified AMS technicians. Camcorders, TV/VCR units, and projectors are available at the AMS rental center. AMS is located in Folson Stadium, Room 360 (Gate 7, 9, or 11); phone (303) 492-8282.

Child Care

The University Family Housing Children's Center, which includes infant, toddler and preschool-compatible programs, is located adjacent to the Boulder campus. The professionally staffed and state-licensed center primarily serves the children of University family housing residents. The center is open from 7:00 a.m. to 5:30 p.m., five days a week. Further information and rates may be obtained by calling (303) 492-6185.

Communication Disorders Clinic

The Communication Disorders Clinic provides a complete range of speech, language, and hearing services to students, faculty, and members of the community. Services include evaluation and treatment programs for hearing, articulation, voice, and stutter-
ing problems. Programs for children and adults with language problems related to learning disabilities, strokes, head injury, developmental delays, and other concerns are available on an individual and group basis. The clinic also houses a parent/infant/toddler program, integrated preschool classrooms, and various adult programs including a stuttering group, a pragmatics group, and a Parkinson's group. The clinic dispenses and services hearing aids and offers instruction on using aids and on speech reading. For more information about the clinic's programs and services, call (303) 492-5375.

Counseling and Career Services: A Multicultural Center

The center offers programs and activities for all members of the University, including students, faculty, and staff of all ethnic and sociocultural backgrounds.

COUNSELING SERVICES

Individual Counseling and Therapy. The center offers counseling to individuals, couples, and families in order to meet a variety of career, academic, and personal needs. People seek assistance for many reasons, from developing a sense of competence in a new environment to meeting increased academic or social demands, and from making career decisions and resolving interpersonal conflicts to participating in an individualized development plan. In addition to professional staff counselors and psychologists, undergraduate paraprofessional peer counselors provide student-to-student assistance, academic counseling and serve in an active student outreach effort.

Groups and Workshops. Group counseling and workshop programs provide small group experiences and workshops in skill development and personal growth. Issues and concerns addressed by the groups include assertiveness, minority and cultural support, parenting, and career and personal interest exploration. In addition, educational workshops are offered throughout the year on stress management, eating disorders, drug and alcohol awareness, relationship skills, perfectionism, and grief and loss.

Center for Educational and Career Transition. The center provides educational, personal, and career counseling for students, faculty, and staff, and for persons considering returning to college work at CU-Boulder.

Cross-Cultural Consultation. Training and consultation services that develop effective and positive responses to the diversity within the University community are available to students, faculty, and staff. In addition, assistance is available in the areas of cross-cultural communication and counseling skills.

Ethnic Student Support Program (ESSP). Career, academic, and personal counseling are available for students of color and other designated students as they pursue their education at the University. Students work with counselors and peer counselors to develop educational plans that will help them achieve their academic, career, and personal goals.

Consultation. Consultation is designed to support the efforts of those who work within the University community. A team of consultants works with academic departments, staff units, and student groups to resolve conflicts, build collegial cooperation, and improve management and supervision, as well as in team building, short- and long-term planning, and other specific requests.

Testing. The administration and interpretation of career, self-assessment, and English skills tests are available through the center. The tests include the Strong Interest Inventory, Colorado Educational Interest Inventory, Harrington-O'Shea Career Interest Inventory, Myers-Briggs Type Indicator, and the Michigan Test of English Language Proficiency.

Contacting Counseling. Center resources and services may be requested by visiting Willard Administrative Center 134 anytime between 8:00 a.m. and 5:00 p.m., Monday through Friday, or by calling (303) 492-6766 or 492-5667 for an appointment. In the event of an emergency during working hours, a professional is available for immediate assistance.

All center services are free of charge unless otherwise indicated. All contacts are confidential.

CAREER-RELATED SERVICES

The center also offers career planning, cooperative education/internship programming, and assistance in finding post-graduate employment. Career development should be an integral part of a student's higher education, and students are encouraged to use these services throughout their University experience. Located on the ground floor of Willard Administrative Center, the Career Services office is open year-round and serves University alumni as well as students. Fees are charged for co-op and career assistance services. Telephone (303) 492-6541.

CAREER PLANNING

Individual Career Counseling. Individual career counseling is available to help students make informed career plans and decisions and to develop strategies for conducting a job search. Counselors are available on an appointment basis.

Video-taped Practice Interviews. Students have the opportunity to develop skills and techniques useful in interviews for employment or graduate or professional school admissions. A video-taped mock interview, in which a counselor plays the role of the interviewer, helps the student understand the interview process and prepare for it. The student and the counselor review the tape and evaluate the student's interview strengths and weaknesses.

Career Library. Information about thousands of occupations, educational institutions, and apprenticeship/internship opportunities is located in this library. Many other career-related books and resources are available, including job vacancies, job market studies, employer directories, job search literature, and employer information (recruiting brochures, annual reports, etc.).

Discover is a computerized career counseling system with information on 425 occupations, graduate schools, self-assessment, career decision-making, and job strategies. Discover is available by appointment.

The library is open Monday through Friday from 8:00 a.m. to 5:00 p.m.

Workshops. Workshops are held throughout the year to sharpen students' job-hunting and career-planning skills. Topics include skills and interests analyses, resume writing, job search strategies, interviewing, and career planning. Students are encouraged to attend an appropriate workshop before seeing a counselor.

Alumni Career Network. Over two thousand CU alumni have volunteered to assist students and fellow alumni with their careers. These alumni offer informational interviews, internships, job leads and referrals, "shadow experiences," and other forms of personalized career assistance. The alumni file is located in the career library and students are welcome to look through it at any time.

COOPERATIVE EDUCATION/ INTERNSHIPS

The cooperative education/internship program offers students the opportunity to gain preprofessional work experience while still in school. The intent of the program is to provide academically relevant work experience that complements students' studies and enhances their career potential. Part-time and full-time placements are available.

The Co-op Process. Co-op counselors help students through all the details of gaining a co-op or internship placement: counseling, interviewing, helping students compete for placement, and following up
with placement evaluations once students have been employed. Readmission procedures are also taken care of by the counselors. All students are required to attend a one-hour orientation session to familiarize themselves with the co-op philosophy and procedures.

The co-op office coordinates on-campus interview schedules with prospective co-op candidates. Students who apply to employers not interviewing on campus learn of opportunities through the career center. Students are also referred to opportunities through a computer matching system. Students enrolled in the co-op program receive software for data sheet and resume preparation.

Cooperative education opportunities are open to students from all colleges, at both the undergraduate and graduate level. To be eligible for co-op, a student must be enrolled full-time in a degree program at the University's Boulder campus and must have a grade point average of 2.00 or better. Second-semester sophomores and students at more advanced grade levels are encouraged to apply.

CAREER ASSISTANCE SERVICES
These services are available to all graduating students.

On-Campus Interviewing. Many employers come on campus to interview candidates for career positions throughout the country. They are interested in students from all areas of study, but focus largely on business and engineering graduates. Students are encouraged to come in early in their senior year to take advantage of this opportunity. Students enrolled in this program receive software for data sheet and resume preparation.

CU Career Connection. This phone bulletin board enables students to access current job vacancies in business, education, government, and nonprofit organizations 24 hours a day. The listings are professional positions requiring college degrees. CU Career Connection is available to students as early as three months prior to graduation as well as after graduation.

Placement Credentials. Students can place letters of recommendation on file with the career office and have them sent out when needed to support applications for graduate or professional schools and for educational employment.

NATIONAL AND INSTITUTIONAL TESTING
The center administers the following tests: GMAT, GRE, LSAT, MCAT, SAT, Achievement, and TOEFL. Registration and information packets for these tests can be picked up at the west entrance to Willard Administrative Center at CU-Boulder.

The department also administers the ACT-Residual, CLEP (to test out of classes in biology, general chemistry, general psychology, introductory sociology, and calculus with elementary functions), the Graduate School Foreign Language Test (to test out of a CU-Boulder foreign language requirement), and the MAT. The following exemption tests from arts and sciences requirements are also administered: geography, quantitative reasoning, and mathematical skills, undergraduate foreign language (French, German, Russian, and Spanish), and written communication. Registration and information sheets for these tests can be picked up in Willard 134, Monday through Friday, during regular business hours. For updated recorded information on these tests, please call 492-0363 at any time.

DISABLED STUDENT SERVICES
The purpose of the Office of Services to Disabled Students (OSDS) is to assist disabled students in taking part in the academic, social, and cultural life of the University. Services are provided on an individual basis and include assistance with admission, registration, housing, financial aid, counseling, and personal needs. On-campus transportation serves students who are permanently or temporarily disabled. In addition, attendant services are available to assist physically disabled students. OSDS also provides reader services for blind students and interpreters for deaf students, as well as a TTY-TDD phone system for the hearing impaired.

The Learning Disabilities Program, another service of OSDS, is structured around a diagnostic prescriptive model, and assists students with learning disabilities so they can better adapt to the academic environment.

For further information about services to disabled students, call (303) 492-8671 or write OSDS, Willard Administrative Center 331, Campus Box 107, CU-Boulder, Boulder, CO 80309-0107.

FACULTY TEACHING EXCELLENCE
For further information on either of the programs described below, please call (303) 492-4985.

FACULTY TEACHING EXCELLENCE PROGRAM
The Faculty Teaching Excellence Program strives to improve undergraduate education through faculty development. The program supports all faculty members on the Boulder campus who wish to enhance their teaching strategies. This support comes in the form of observation and videotape consultations, in-class surveys of student feedback, and workshops and symposia on teaching and learning. Recently implemented services include a teaching portfolio consultation to assist faculty in creating their own dossier documenting their performance as teachers and a two-day teaching orientation for new faculty in August titled "Becoming a Teacher."

The program now offers a number of publications on pedagogy to assist faculty with their teaching. These include two volumes of essays titled On Teaching: A Compendium of Good Teaching Ideas, a teaching handbook for new faculty called Getting Started, and regularly distributed reprints of research articles in the series Memo to the Faculty.

PRESIDENT'S TEACHING SCHOLARS PROGRAM
The President's Teaching Scholars Program aims to produce a sustaining group of skilled faculty who are advocates of and consultants for teaching excellence at all four campuses of the University. Faculty selected for the program design and develop projects aimed at strengthening confidence in the art and craft of teaching and by establishing communities of faculty colleagues interested in specific teaching pedagogy. In addition, the scholars are asked to share their teaching acumen outside the University community and to exemplify the skills, talents, and characteristics of superior teachers.

OMBUDSMAN OFFICE
The Ombudsman Office facilitates communication, understanding, problem solving, and effective conflict management among the constituents of the University—students, faculty, staff, and administrators.

The Office maintains impartiality and confidentiality in working with individuals and operates independently of the usual administrative authorities. Ombudsman duties include hearing concerns, complaints, and grievances; investigating such concerns; referring individuals to other University resources when appropriate; serving as a neutral mediator in problem solving and conflict resolution; helping to identify and evaluate options with all parties; and conducting workshops on conflict management.

The staff is familiar with the organizational structure of the University and can provide current information about campus services, programs, policies, and procedures.

For more information, please contact the Ombudsman Office in Willard Administrative Center 302, Campus Box 112, (303) 492-5077.
Parking Services
Parking availability at CU-Boulder is limited even though two new parking structures were recently completed to help with the lack of space. Parking in a campus lot requires a permit, which may be purchased from Parking Services at 1050 Regent Drive in the Police-Parking Building.

Development of a computer-based, mail-in application system for student parking permits is under way. Call the permit information line at (303) 492-3550 or Parking Services at (303) 492-7384 for permit sales information.

Students buying a permit must present their photo ID and current vehicle registration at the time of purchase. Student permit fees range from $60 to $100 per semester for fall 1992 and spring 1993. Most permits are sold at the Coors Events Center at the start of each semester. Student permit fees may be transferred to your tuition bill.

Faculty/staff permit fees range from $15 to $25 per month through June 30, 1993. They are available by cash payment or payroll deduction. Please call (303) 492-7384 for faculty/staff permit information.

Visitor parking is available in the Euclid Autopark located on the northeast corner of 18th and Euclid. Visitors may also park at any of the more than 600 parking meters on campus. A limited number of temporary parking permits are available for special needs. Visitor parking locations are highlighted on the campus parking map.

Bicycles parked on campus must be registered with Parking Services at a cost of $5 for four years. Bicycles bearing valid registrations from other jurisdictions may be registered with Parking Services at no charge. Unregistered bicycles parked on campus may be impounded. Bicycle registrations are sold at the bicycle registration booth southeast of the music building. Please call (303) 492-2322 for bicycle parking and registration information.

Campus parking regulations are revised annually, and are strictly enforced. Vehicles in violation of campus parking regulations may be ticketed or towed. Copies of parking regulations, including complete parking and traffic information, may be obtained at Parking Services, 1050 Regent Drive, Boulder, CO 80309-0502. Call (303) 492-7384 for additional information.

Photo ID Cards
All students must show their photo ID to obtain student services such as those provided by the University Libraries, Wardenburg Student Health Center, and the Student Recreation Center.

New students can have their ID cards made any time after they have confirmed their admission to a degree program at CU-Boulder. Students must present some type of photo identification to receive a University of Colorado photo ID card. Photo ID cards are issued in UMC 25 from 11:00 a.m. to 4:00 p.m., Monday through Friday. While the initial photo ID card for degree students is free, there is a charge for replacement cards. Students need to have cards validated each semester when they receive their schedule/bills. Meal stickers placed on ID cards are provided by residence hall dining rooms.

Research and Information
The Office of Research and Information is located on the second floor of Willard Administrative Center. The office handles information needs for all units within the Division of Student Affairs, including publications and institutional research on recruitment and retention of students. The office also administers the faculty course questionnaire (FCQ), which gives students the opportunity to evaluate their courses and instructors. For further information, call (303) 492-7067.

University Learning Center
The University Learning Center (ULC) offers academic support services designed to assist students in improving their learning potential.

Academic Excellence Program. The Academic Excellence Program is located in Room 305 of the University Memorial Center. The program offers academic, logistical, and counseling assistance to qualified students including those who will be the first generation in their family to receive a college degree, are low-income, and/or who have a physical or learning disability. It also offers cooperative learning study seminars, individual study sessions, workshops and individual proctoring of tests. Topics include note-taking, reading strategies, test preparation, etc.

Fall Institute Program. Through this program the ULC offers courses in writing and college algebra, as well as support services in English as a second language, science, study skills, and academic advising to a selected group of freshman students who have been provisionally admitted to CU-Boulder.

Tutorial Services. The Tutorial Services Program (TSP) offers an array of flexible services that can be customized to meet the needs of individual students: consultation, one-to-one and group tutorials, workshops, test proctoring, and referrals. Scholarships are available to qualified students.

Location. The ULC administrative office and tutorial services are located in Willard 309, (303) 492-5474. Other ULC facilities are located in Norlin Library, lower level, room 11B-136, (303) 492-1416 and room 305 of the UMC.

Victim Assistance
Students, faculty, and staff who have been victims of a crime or involved in an accident may find caring support at the Office of Victim Assistance. Knowledgeable, professional staff work with victims by contacting parents, professors, and campus and community services. Come by the Office of Victim Assistance, Wardenburg 236, Monday through Friday between 8:00 a.m. and 5:00 p.m. or call 492-8855. Voice mail messages may be left after regular office hours, and a staff member will return the call.

Wardenburg Student Health Center
Wardenburg Student Health Center (WSHC) is fully accredited health clinic staffed by board-certified physicians in internal medicine, family practice, and psychiatry, in addition to other board-certified and eligible health care providers. WSHC is accredited by the Joint Commission on Accreditation of Healthcare Organizations. As a service to the University of Colorado Student Union (UCSU) and the Joint Health Board, WSHC is committed to providing quality health care at a reasonable cost. Services are available to care for eligible patients during illness and injury, and to help maintain or improve physical and mental health.

The following persons may use WSHC: all students, including spouses, continuing education, and SAVE students who pay a user fee; University faculty and staff (through workers' compensation and other University-sponsored benefit programs); and campus visitors who do not live or work in the Boulder area (i.e., conference participants, parents, and visiting faculty) on an urgent-care basis. Faculty and staff are also eligible to use WSHC for immunization shots (flu, travel, measles). A user fee is required for summer session students and students who were enrolled in the previous spring semester and will be enrolled in the coming fall semester.

Confidentiality
A personal health record is established at the time of the patient's first visit to WSHC. A complete medical history form is required. The record is maintained at WSHC for seven years after the date of the last visit. Following this seven-year period, the record is destroyed. Patients may obtain the original health record after the required reten-
tion period through a written request. The Medical Record Department can be contacted for specific procedures.

Medical records are not part of the University record system and are not included in educational records. Medical information can be released only with the patient's written authorization, upon court order, or to meet the requirements of local, state, or federal statutes.

**HOURS**

**Clinic**

**Fall and Spring Semesters**
Monday-Friday 8:00 a.m.-6:00 p.m.
Saturday 10:00 a.m.-2:00 p.m.

**Summer Session**
Monday-Friday 7:30 a.m.-4:30 p.m.
Saturday 10:00 a.m.-2:00 p.m.

**Semester Breaks & Holidays**
Coincide with campus hours (or as posted)

**After-Hours Urgent Care**
Available during the fall and spring semesters after regular clinic hours: Monday through Friday from 6:00 p.m. to 10:00 p.m.; from 2:00 to 10:00 p.m. on Saturday; and 10:00 a.m. to 10:00 p.m. on Sunday, with the exception of semester breaks and holidays. Services and hours of operation may change without prior notice.

**GENERAL TELEPHONE NUMBERS**
Administration (303) 492-5661
Billing Information (303) 492-4196
General Information (303) 492-5101
Immunization Office (303) 492-2055
Insurance Office (303) 492-5107
Medical Clinic Appointments (303) 492-5432

Most patients are seen through scheduled appointments. However, if patients cannot wait for an appointment due to the nature of the injury or illness, they may be seen immediately in the WSHC Acute Care Clinic. The after-hours care entrance is located adjacent to the southwest parking lot. Students should bring their student ID card for eligibility verification.

**AVAILABLE SERVICES**

**Allergy Clinic**
Complete allergy evaluations, testing, and injections are available through the WSHC board-certified allergist. Patients' own allergens may be administered by nurses who will set up regular injection schedules.

The **Cold Clinic** self-care program is designed to help patients recognize minor cold symptoms. A nurse will obtain a throat culture, and treatment information is provided. No appointment is necessary.

**Community Health Education** addresses public health issues and provides health education within the campus community.

Presentations address such topics as birth control, sexually transmitted diseases, AIDS/HIV, stop smoking programs, blood pressure, sexual assault, foods and moods, nutrition and sports, wellness, and health fairs. Professional staff or student peer educators facilitate the presentations.

**Dental Clinic** provides routine and acute care services. Extensive and complicated dental problems are referred to local specialists.

**General Medical Clinic** services are available by appointment. The Acute Care Clinic is available without an appointment for injuries and sudden illnesses.

**Immunizations** are available on a walk-in basis, 8:00 a.m.-4:30 p.m., Monday through Friday. As of July 1, 1992, Colorado law requires all freshmen and transfer students born since January 1, 1957, to provide proof (two doses each) of immunization for measles, mumps, and rubella. Failure to comply will result in a hold (stop) on registration for the following semester.

**Laboratory**: ASCP-certified technologists provide on-site comprehensive diagnostic testing. The laboratory is fully accredited by the College of American Pathology.

**Nutritional Counseling** is available by appointment for weight control, eating disorders, sports nutrition, special diets, and basic nutrition.

**Pharmacy**: Registered pharmacists staff the Apothecary, a fully accredited pharmacy operated by the School of Pharmacy. Prescriptions are accepted from any licensed physician or dentist and over-the-counter medications and prescriptions may be purchased at competitive prices.

**Physical Therapy** offers treatment with a physician's referral for injuries, postural disorders, and other musculoskeletal problems.

**Psychiatry Clinic** services include crisis intervention and short-term psychotherapy for individuals, couples, and groups. All medical/psychiatric records are strictly confidential and are maintained separately from the WSHC medical records and university academic records.

**Radiology Department** offers radiographed X-rays ordered by physicians.

**Sexual Health Services** offers counseling to individuals, couples, and groups through the Psychiatric Department (fall and spring semesters only).

**Specialty Clinics** offer board-certified specialists in neurology, orthopedics, and dermatology on a referral basis for consultation and treatment follow-up.

**Sports Medicine Clinic**. A team composed of orthopedists and physical therapists works with patients in the treatment of sports-related injuries.

**Stress Management and Biofeedback** offers stress management training for the prevention and treatment of physical symptoms that are stress-related.

**Substance Abuse Program** includes treatment programs, confidential professional counseling, and education.

**Surgery Clinic.** A surgeon is available for consultation and minor outpatient surgery.

**Travel Clinic.** Individuals planning to visit foreign countries have the opportunity to discuss health risks and obtain required immunizations. Advice on mountaineering and high altitude issues is also available.

**Victim Assistance Program** provides Boulder campus community with a centrally located office to provide caring support to students, faculty or staff who have been the victim of a crime or involved in an accident or other traumatic incident.

**Volunteer Program** provides on-campus opportunities for students and nonstudents to work in a medical atmosphere with professional staff.

**Women's Health Clinic.** Physicians and nurse practitioners perform annual exams, prescribe contraceptives, order pregnancy tests, and treat infections and other health problems.

**HEALTH INSURANCE AND FEE INFORMATION**

The University offers health insurance coverage for students and spouses at a competitive rate. The University-sponsored health insurance plan pays 100 percent of most medical expenses incurred for the treatment of sickness or injury. Eligible patients who are not insured through this plan may still receive services at a reduced cost. A summary fee schedule is available upon request through the Insurance Office, (303) 492-5107.

Business office personnel are available to answer questions and accept payments. WSHC mails a monthly statement to each patient that can be used for filing claims with insurance companies. Payment for services should be made to the University of Colorado, in care of the WSHC Business Office.

All prescribed medications by WSHC incur a charge that is not covered by student fees or by the University-sponsored student health insurance plan.

When WSHC is closed, care may be received at Boulder Community Hospital or at another health care facility. Payment for such services, however, is the patient's responsibility.
The Office of Admissions welcomes inquiries regarding undergraduate application procedures. Through the admission process, the University seeks to identify applicants who will successfully complete a collegiate academic program. Admission is based on many criteria, such as graduation from high school or its equivalent through the General Educational Development (GED) test, results of the Scholastic Aptitude Test (SAT) or the American College Test (ACT), and evaluation of work taken in high school and at other educational institutions. In addition, attention is given to applicants’ written comments concerning their backgrounds and academic goals.

Inquiries relating to undergraduate admission to the University of Colorado at Boulder may be addressed to:

Office of Admissions
Regent Administrative Center 125
Campus Box 30
University of Colorado at Boulder
Boulder, CO 80309-0030
492-6301

For admission requirements to the Graduate School, see the Graduate School section and individual college and school sections of this catalog.

VISITING THE CAMPUS

Prospective students and their parents are welcome to visit the office at any time, Monday through Friday, from 9:00 a.m. to 4:00 p.m. Interviews are not used in the decision-making process.

Walking tours of the campus guided by Boulder students start at the University Memorial Center (UMC) second floor lobby each weekday at 10:30 a.m. and 2:30 p.m. Information sessions with an admissions representative are offered each weekday at 1:20 p.m. at a separate location. Saturday tours are available in October, November, March, April, July, and August at 10:30 a.m. To make a reservation for any tour or information session and for room locations, call the Office of Admissions at (303) 492-6301. Reservations for Saturday tours are required at least one week in advance.

Visitation Programs

An excellent way to become acquainted with the campus is to participate in one of the campus visitation programs specially designed for prospective students.

The Be a CU Student for a Day programs offer prospective students the opportunity to visit the campus on a school day, take a tour, attend classes with current CU students, and have lunch with campus representatives in a residence hall. These programs are held throughout the academic year on selected Wednesdays and Fridays.

The CU Sampler programs, held on selected Saturdays, also introduce prospective students and their parents to the campus and its academic programs. Highlights include a sample lecture, a campus tour, student/faculty panel discussions, lunch in a residence hall; and a chance to meet with faculty advisors and financial aid, housing, and other campus representatives. Programs are usually planned for March, July, and November.

For the student who aspires to a career in engineering, the Engineering Open House is held once a year. Students and their parents have the opportunity to meet the dean, tour engineering facilities, explore engineering career options, and have lunch in a residence hall.

Inquiries regarding the above programs should be directed to the Office of Admissions, Regent Administrative Center 125, Campus Box 30, CU-Boulder, Boulder, CO 80309-0030, telephone (303) 492-6301. Reservations are required for each program.

POLICY ON DIVERSITY

An environment supportive of diversity is one that benefits all. It is an environment that challenges stereotypes, provides role models and support groups, enhances maximum interaction between individuals, and promotes a sensitivity toward others.

—From Challenging the Summit, Strategic Plan, University of Colorado at Boulder, 1987

Admission policies of the University are designed, first and foremost, to assure that admitted students are well prepared to handle demanding academic expectations. Admission is competitive; there are more fully qualified applicants than can be offered qualifications are selected.

However, in selecting from the group of qualified applicants, additional consideration is given to prospective students whose presence will add to the diversity of the community. The educational experiences of all students are thereby enhanced, as is the academic environment, thereby fostering a diversity of ideas.

Examples of students who receive additional consideration for admission include applicants from parts of the state of Colorado, the nation, and the world that are not well represented in this community; applicants from rural backgrounds; applicants from families with little or no experience of higher education; and applicants who have special talents and experiences.

Services Supporting Diversity

CU-Boulder provides admission consideration and support services for students from ethnic minority backgrounds (African American, American Indian, Asian American, and Hispanic) and for students from educationally or economically disadvantaged or migrant backgrounds.

Support activities include admission and financial aid assistance; tutorial services; and academic, personal, and career counseling.

The Office of Admissions provides information about undergraduate educational opportunities available at CU-Boulder. Prospective students receive admission counseling and financial aid advising to help ensure their applications are processed correctly and on time. For more information, contact the CU Opportunity Program, Office of Admissions, Campus Box 30, CU-Boulder, Boulder, CO 80309-0030. (303) 492-8516.

ALL APPLICANTS

Application and Admission Notification

Applications for fall, summer, and spring terms may be submitted starting the previous September. Applicants are notified of admission decisions on a rolling basis beginning October 1 for spring and November 1 for summer and fall.

Typically, applications received and completed (including all required credentials) by
the dates listed below receive full and equal consideration for admission. After these dates, consideration can be given only when places are still available.

**APPROXIMATE DATES FOR EQUAL**

**CONSIDERATION OF APPLICATIONS**

(Exact deadline dates are available from the Office of Admissions)

<table>
<thead>
<tr>
<th>Fall and Summer</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshmen</td>
<td>February 15</td>
</tr>
<tr>
<td>All Others</td>
<td>April 1</td>
</tr>
</tbody>
</table>

Early application with complete credentials is always encouraged in order to be considered for admission before enrollment levels are reached.

The University reserves the right to deny admission to applicants whose total credentials reflect an inability to assume those obligations of performance and behavior deemed essential by the University and relevant to any of its lawful missions, processes, and functions as an educational institution.

**Confirmation Procedures**

All admitted students are encouraged to confirm their intent to enroll as soon as possible after receiving their admission notice and confirmation form. Admission must be confirmed by returning the completed confirmation form and the required enrollment deposit of $200.

Confirmation forms and deposits received by the dates listed below, or by later dates assigned by the Office of Admissions, are accepted. After these dates, confirmations can be accepted only if space is still available.

Students who have paid the deposit and who decide not to attend CU-Boulder forfeit their deposit. Deposits received after enrollment levels have been reached are returned.

After students have attended CU-Boulder, their deposits are refunded upon graduation or official withdrawal from the University within established dates and guidelines. Refunds are reduced by any outstanding University financial obligations.

**APPROXIMATE DATES FOR ASSURED**

**ACCEPTANCE OF CONFIRMATIONS**

(Exact deadline dates are available from the Office of Admissions)

<table>

<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshmen</td>
<td>May 1</td>
</tr>
<tr>
<td>All Others</td>
<td>May 15</td>
</tr>
</tbody>
</table>

**Credentials**

To be considered for admission, applicants must submit complete and official credentials as required by their desired program of study. Prospective students must supply documentation of every part of their previous educational background. Failure to submit transcripts from all institutions previously attended is cause for cancelling the admission process or for dismissal. All credentials presented for admission to CU-Boulder become the property of the University and may not be returned to the applicant.

**Preprofessional Programs**

Admission to a preprofessional area of study, such as pre-journalism and mass communication or pre-nursing, does not guarantee later admission to the professional degree program; a student must submit a separate application to professional school at the appropriate time. Students cannot earn a degree in a preprofessional program.

Students interested in one of the undergraduate health sciences programs offered at the University of Colorado Health Sciences Center (UCHSC) in Denver (child health associate, dental hygiene, medical technology, nursing, or pharmacy) may complete preprofessional work on the Boulder campus, where special preprofessional advising is available. Admission preference to all UCHSC programs is given to Colorado residents.

Normally, CU-Boulder students who are not Colorado residents can take the preprofessional courses required for entrance to health sciences programs in other states, as well as those for entrance to Colorado programs that are open to nonresidents.

For more information, see the Preprofessional Programs section of this catalog.

**Teacher Certification**

Through the School of Education, students interested in elementary or secondary school teaching may take programs approved for Colorado certification in connection with the liberal arts programs offered at CU-Boulder. Interested students should see an advisor in the School of Education during their first semester at the University.

Elementary teacher certification includes kindergarten through sixth grades. Secondary teacher certification includes teaching endorsements in drama, English, selected foreign languages, mathematics, science, and social studies. Teacher certification programs are also available in art and music for grades kindergarten through 12.

Persons holding a baccalaureate degree who seek initial teacher certification must submit the required application and credentials to the School of Education. Certified teachers with a baccalaureate degree who seek only a renewal of the certificate currently held and who do not require institutional endorsement or recommendation may qualify for the University's nondegree student classification (see the Nondegree Students section of this catalog).

Refer to the School of Education section of this catalog for further information about teacher certification. Interested students may also write the School of Education, Office of Teacher Education, Campus Box 249, CU-Boulder, Boulder, CO 80309-0249, for application and deadline information.

**FRESHMAN STUDENTS**

**Admission Criteria**

Prospective freshmen are considered on an individual basis relative to a prediction of academic success in the college to which they apply. The strongest predictors are appropriate course preparation, grades earned in those courses, class rank, and the results of either the SAT or the ACT. Admission officers review these and other factors that have a bearing on academic success; only those students for whom success can be predicted are offered admission.

Some of the colleges typically have more qualified freshman applicants than there are places. Therefore, admission is competitive, and students with the highest qualifications are selected. Among qualified applicants, some preference is given to students who will add to the diversity of the community.

Applicants whose records reflect nontraditional grading systems, unusual curricula, no rank-in-class information, or high school equivalency through the GED test will receive careful consideration and are urged to apply.

**Minimum Academic Preparation Standards (MAPS)**

Effective with students who graduated from high school in 1988 or later, CU expects new freshman and transfer students to have completed courses that meet certain minimum academic preparation standards (MAPS). The MAPS for specific CU-Boulder colleges are listed on page 37. Prospective students who have not completed all the suggested courses may be admitted on an individual basis.

MAPS requirements not met in high school may be met through equivalent college-level course work before or after enrollment at CU-Boulder. A semester course completed at the college level substitutes for a year in high school.

**How to Apply**

1. Obtain a Guide to Admission and Application from the Office of Admissions,
   Regent Administrative Center 125, Campus Box 30, CU-Boulder, Boulder, CO 80309-0030, telephone (303) 492-2456, Colorado
residents may also obtain an application packet from their high school counselor. (Students from other countries who are not citizens or permanent residents of the United States must request special application materials from the CU-Boulder Office of Admissions.)

2. A complete application must include the following credentials:
   a. the application for admission;
   b. a nonrefundable $40 application fee (check or money order, not cash, made payable to the University of Colorado);
   c. a transcript of all high school work completed, including rank-in-class information and a list of courses in progress for the entire year;
   d. a copy of GED test scores and a certificate of high school equivalency with an official transcript of any high school work completed (grades 9 through 12), if the applicant is not a high school graduate;
   e. required SAT or ACT test scores (the only applicants who are exempt from submitting test scores are those who have completed more than 30 semester hours of college work at the time of review); and
   f. the required audition, if the student is applying to the College of Music.

The fact that college entrance test scores (SAT or ACT) are not available does not mean an applicant should delay sending the application and credentials. However, if test scores are available at the time of application, they may be posted on the official high school transcript in place of or in addition to being reported directly by the testing service.

Applicants who are currently attending high school should give their completed application to their counselor. Applications must include the nonrefundable $40 fee, transcript, grade point average, and rank-in-class information in a single mailing packet. Processing of an incomplete application will be delayed until all required information is received.

**College Entrance Tests**

Prospective students in high school should take a college entrance test at the end of their junior year or early in their senior year. Results from SAT or ACT tests taken in January or later may be received too late for those who wish to be considered for summer or fall admission of the same year. The University of Colorado accepts either the SAT or the ACT for admission. Students who are not satisfied with the scores on their first test are urged to retest at the earliest possible date. For admission purposes, the University will consider the highest scores. Achievement tests are not required; however, scores may be submitted if they are taken.

For exact testing dates and further information regarding college entrance tests, consult with a high school counselor, write or call the Office of Admissions, or write to the following:

- College Board ATP (SAT)
  P. O. Box 6201
  Princeton, NJ 08541-6201

- ACT Registration (ACT)
  P.O. Box 414
  Iowa City, IA 52243

**Advanced Placement Program**

The University participates in the Advanced Placement program of the College Board. Official scores must be sent to the University directly from the College Board. For detailed information regarding applicability of advanced placement credit to CU-Boulder degree programs, refer to the chart on page 38.

**Applicants Not Granted Admission**

An applicant who is not granted admission as an entering freshman may wish to consider transferring to the University after successful study elsewhere. The Office of Admissions urges such students to complete at least one full year (24-30 semester credit hours) of college-level course work at another college or university, giving special attention to courses that will provide sound academic preparation for future transfer to CU-Boulder. These courses should include any minimum academic preparation standards (MAPS) not met in high school. See the MAPS requirements on page 37.

**TRANSFER STUDENTS**

Applicants are considered transfer students if they have enrolled for any college-level course work (at another institution, at another campus of the University of Colorado, or as nondegree students at the Boulder campus), full-time or part-time, since graduating from high school. Applicants are not considered transfer students if the only college-level classes they have taken were while enrolled in high school. To be considered for admission, transfer students must report all previous college work and have a high school diploma or its equivalent.

Transfer applicants who have completed less than one full year of college-level work (24-30 semester hours) by the time they plan to enroll at CU-Boulder are considered for admission on the basis of freshman criteria, including minimum academic preparation standards (MAPS) as listed on page 37. In addition, all transfer applicants who graduated from high school in 1988 or later are expected to have completed MAPS before enrolling at CU-Boulder.

**Assured Transfer Opportunities**

Colorado community or junior college students may qualify for assured transfer opportunities at CU-Boulder. Prospective students should be aware that academic criteria are established by the faculty of each Boulder college and school and vary according to discipline and year of proposed transfer.

Transfer guides are available in Colorado community college advising offices. These guides provide information on CU-Boulder admission requirements, graduation requirements, and course equivalencies.

The Colorado community college core curriculum agreement as signed by CU-Boulder assures that students entering the College of Arts and Sciences who complete the core at their community college and have it certified by the community college will receive credit equivalent to the lower-division degree requirements of the college. If students have not completed the core, they will have courses evaluated on a course-by-course basis. Normally, a maximum of 60 semester credit hours can transfer from community or junior colleges into the College of Arts and Sciences.

Students transferring to a program outside of the College of Arts and Sciences need to work with advisors and use the transfer guide to assure that appropriate courses are taken prior to transfer. Students wishing to enter the College of Architecture and Planning or the College of Engineering and Applied Science should be aware that because of the structure of the curriculum, transfer may be encouraged as early as the beginning of the sophomore year. Academic programs vary in terms of the maximum number of hours that may be transferred from the community or junior college.

**Admission Criteria**

Transfer students are selected for admission on an individual basis. A good college grade point average is not, by itself, a guarantee of admission because the courses a student has taken in college are as important as the grade point average. Furthermore, grade point average requirements may vary from term to term, depending on the overall quality of the applicant group and the number of transfer spaces available for a given college or school.

All transfer students need to submit SAT or ACT scores, except those who have completed more than 30 semester hours of college work at the time of review.

All students must submit a high school transcript and an official transcript from each collegiate institution attended. Students who are not high school graduates must submit copies of a certificate of high school equivalency and GED scores in addition to the
Courses in progress are not considered in computing the cumulative grade point average.

**College of Architecture and Planning**
Transfer students with a cumulative college grade point average of 2.75 or better are considered for admission on an individual basis. Admission preference is given to students who have taken college-level courses in architecture, planning, or environmental studies. Completion of courses in related fields of social science, natural science, fine arts, or humanities is also considered in admission review.

**College of Arts and Sciences**
Transfer students with a cumulative college grade point average of 2.50 or better are considered for admission on an individual basis.

**College of Business and Administration**
Transfer students with a cumulative college grade point average of 2.75 or better are considered for admission on an individual basis. Preference is given to those applicants who have completed courses (including calculus) equivalent to those taken by CU-Boulder business students. These courses are listed in the model degree program in the College of Business and Administration section of this catalog.

**School of Education**
Programs for elementary and secondary teacher certification are available through the School of Education. All persons seeking teacher certification must apply to the teacher certification program through the School of Education. Teacher certification is awarded in addition to a regular bachelor’s degree; all teacher certification candidates at the undergraduate level must be working toward a bachelor’s degree in another CU-Boulder college or school.

To be considered for admission to the School of Education, a grade point average of 2.50 or better and the completion of 56 semester hours (or 84 quarter hours) of course work is required. A personal interview may also be required.

During the first semester of enrollment in education courses, students must pass competency tests covering spelling, English language, and mathematics, provide written verification of successful experience with youth, and meet an oral competency requirement.

**College of Engineering and Applied Science**
Transfer students with a cumulative college grade point average of 2.75 or better are considered for admission on an individual basis. The College of Engineering and Applied Science expects transfer applicants to have taken course work relevant to an engineering curriculum. Prospective transfer students are required to have completed at least one year of college-level calculus and at least one semester each of calculus-based physics and general college chemistry before they enroll at Boulder. Chemical engineering students should have completed two semesters of general college chemistry before enrolling at CU-Boulder.

**School of Journalism and Mass Communication**
Applicants must have a minimum of 60 semester hours (or 90 quarter hours) of appropriate college-level course work passed or in progress. Applicants must also have an overall grade point average of at least 2.50 and an average of 2.50 in at least 6 semester hours of journalism coursework prerequisites (CU-Boulder course equivalents are Contemporary Mass Media and Mass Media Writing). Applicants with fewer than the required hours or without journalism coursework must apply to the College of Arts and Sciences as a pre-journalism and mass communication major.

**College of Music**
Transfer students with a cumulative college grade point average of 2.00 or better are considered for admission on an individual basis. The College of Music also requires an audition. Further information may be found in the College of Music section of this catalog.

**Minimum Academic Preparation Standards (MAPS)**
Effective with students who graduated from high school in 1988 or later, CU expects all new freshman and transfer students to have completed courses that meet certain minimum academic preparation standards (MAPS). The MAPS for specific CU-Boulder colleges are listed on page 37.

MAPS requirements not met in high school may be met through equivalent college-level course work before or after transfer to CU-Boulder. A semester course completed at the college level substitutes for a year in high school.

**How to Apply**
1. Obtain a Guide to Admission and Application from the Office of Admissions.
2. A complete application must include the following required credentials:
   a. the application for admission;
   b. a nonrefundable $40 application fee (check or money order, not cash, made payable to the University of Colorado);
   c. a transcript of all high school work completed;
   d. a copy of GED test scores and a certificate of high school equivalency with an official transcript of any high school work completed (grades 9 through 12), if the applicant is not a high school graduate;
   e. required SAT or ACT test scores (the only applicants who are exempt from submitting test scores are those who have completed more than 30 semester hours of college work at the time of review); and
   f. an official transcript from each college or university attended (except the University of Colorado).

Note: Former degree students who have attended CU-Boulder within the last four years and have previously submitted their high school transcripts, ACT or SAT test scores, and college transcripts to the Boulder campus Office of Admissions need not do so again. However, if they have attended another college or university since last attending CU-Boulder, those additional transcripts must be submitted.

**Transfer of College-Level Credit**
The Office of Admissions performs an initial evaluation of transfer credit after applicants have been admitted and have confirmed their intent to enroll. A complete evaluation of transfer credit cannot be made until all official credentials have been received.

The evaluation is made using the official transcripts sent directly to the University from each of the applicant's previous colleges. Official transcripts exhibit the official seal and signature of the registrar. Transcripts that are marked "student copy," "issued to student," or "unofficial" are not accepted as official.

The initial evaluation may list course work in progress at the time of confirmation as "pending." In order to complete the admission and transfer of credit process, all transcripts of attempted work must be received by the Office of Admissions as soon as possible. Transfer students should arrange to have their final official transcript sent directly to the Office of Admissions after they complete their last term and before they enroll at CU-Boulder.

After an evaluation of transfer credit has been completed, an evaluation report is mailed by the Office of Admissions.

There is no guarantee that all transfer credit will apply to a specific degree program. The dean's office of each college and school has ultimate responsibility for supervising the student's degree program and for determining how transfer credit applies to a specific degree program. Since graduation requirements at CU-Boulder vary from col-
lege to college, a reevaluation of transfer credit is required if a student changes colleges or schools after enrolling.

Listed below are some general guidelines for accepting transfer credit.

MINIMUM GRADES FOR TRANSFER

Only courses taken at a college or university of recognized standing with grades of C- (1.70) or better are accepted for transfer. Grades of pass, satisfactory, and honors are accepted for transfer, however, each college and school at CU-Boulder places a limitation on the number of pass hours that may be applied toward a degree.

CREDIT FROM TWO-YEAR COLLEGES

Each college and school at CU-Boulder determines the maximum number of semester hours that may transfer from a two-year postsecondary institution. Limits vary in each college and school.

CREDITS FOR CORRESPONDENCE WORK

Each college and school determines the maximum number of credits taken through correspondence programs that are accepted toward a baccalaureate degree.

COLLEGE-LEVEL WORK TAKEN DURING HIGH SCHOOL

College-level work taken during high school is evaluated in accordance with general guidelines for transfer credit at CU-Boulder. College-level work taken concurrently with a high school program may be used to satisfy MAPS requirements.

ADVANCED PLACEMENT EXAMINATIONS

Credit for College Board Advanced Placement examinations cannot be evaluated from college or high school transcripts; score reports from the College Board must be submitted directly to the University for evaluation. For further information, refer to the chart on page 38.

COLLEGE-LEVEL EXAMINATION PROGRAM

Credit for College Board subject examinations of the College-Level Examination Program (CLEP) in general biology, general chemistry, general psychology, introductory microeconomics, introductory microeconomics, introductory sociology, and calculus with elementary functions may be granted for a score of at or above the 67th percentile. This credit is applied toward degree requirements at the discretion of the student’s dean. Not all colleges accept CLEP credit for all subjects. Refer to the appropriate college dean’s office for the policy of that college.

Credit for CLEP subject examinations cannot be evaluated from college or high school transcripts; score reports must be submitted directly from the College Board. CLEP general examinations are not accepted for credit at CU-Boulder.

INTERNATIONAL BACCALAUREATE EXAMINATIONS

Credit may be granted for approved International Baccalaureate (IB) examinations with higher level passes when the grade is 4 or better. An IB certificate or diploma must be submitted for evaluation.

MILITARY CREDIT

Credit for military schooling is evaluated upon receipt of Form DD 214, “Service Separation Certificate.” Only work that has received an upper-division baccalaureate recommendation by the American Council on Education (ACE) can be awarded credit. This work, however, is transferred and recorded at the lower-division level. Foreign language credit taken through the State Department, Department of Defense, or Defense Language Institute is assigned the recommended ACE credit.

CREDIT BY EXAMINATION

This option provides limited opportunities for students to take an examination and earn credit for a course without registering for or taking the course. Specific courses must be approved for credit by examination. Students may want to exercise this option if they do not receive transfer credit for a course they have taken at a previous college. Information on participating colleges and schools, requirements, and an application for credit by examination are available at the Office of the Registrar, Regent Administrative Center 105, Campus Box 68, CU-Boulder, Boulder, CO 80309-0068, telephone (303) 492-6097. Permission of the instructor, the department chair, the dean of the college or school in which the course is offered, and the student’s dean (if different) is required for approval. An examination fee is charged.

TRANSFER COURSE WORK NOT ACCEPTED BY THE UNIVERSITY

The following course work will not transfer and will not count toward a degree at Boulder:

1. Courses identified by CU-Boulder as remedial, i.e., necessary to correct academic deficiencies, such as remedial English, mathematics, science, and developmental reading.

2. Vocational-technical courses that are offered at two-year and proprietary institutions. Exceptions may be granted only by the CU-Boulder dean responsible for the student’s curriculum. When exceptions appear to be warranted, appropriate department heads make recommendations to their respective deans regarding credit for such courses.

3. Courses in religion that constitute specialized religious training or that are doctrinal in nature.

4. Credits earned for work experience or through a cooperative education program.

5. Credits earned in physical education activity courses.

TRANSFER CREDIT CONVERSION

Many campuses operate on the quarter system, with the academic year divided into three terms. Other campuses, including CU-Boulder, operate on a two-term or semester system. Course credits from quarter system institutions must be converted from quarter hours to semester hours or credits. One quarter credit is equivalent to two-thirds of a semester credit. To calculate how many semester hours are equivalent to a certain number of transferable quarter hours, multiply the number of quarter hours by two-thirds and round off the total to the nearest tenth. For example, 4 quarter hours x 2/3 = 2.67 or 2.7 semester hours of credit; 6 quarter hours x 2/3 = 2 semester hours of credit.

Intrauniversity Transfer Students

Students wishing to change colleges or schools within the CU-Boulder campus must obtain an application from the college or school to which they wish to transfer.

For more information on recommended course work in preparation for intrauniversity transfer (IUT) and other criteria, students need to consult college and school sections of this catalog or talk with an academic advisor in the program to which they plan to transfer. Most colleges and schools do not accept intrauniversity transfer students during the summer. It is important to note that admission to a college through the IUT process is competitive, and not all students who apply are admitted. Decisions are based on course preparation, hours completed, grade point average, and other criteria the specific college or school deems appropriate.

OTHER APPLICANTS

Foreign Students

The University invites applications from qualified foreign students. Approximately 1000 foreign students from 50 countries study at CU-Boulder. Applications for admission are processed by the Office of Admissions. Assistance after admission is provided by Foreign Student and Scholar Services, located in the Office of International Education. Intensive English
instruction is offered by the International English Center. Boulder offers a full range of services to foreign students, including a host family program, orientation, special programs and activities for foreign students, and personal attention to individual needs. Foreign applicants are those who will apply for or who already have a temporary nonimmigrant United States visa or immigration status. Applicants who have established permanent resident status in the United States are not considered foreign. These students should follow application and admission procedures for undergraduates or graduates as described elsewhere in this catalog.

Foreign students who wish to pursue a full-time program of study at the undergraduate or graduate level should write or call the Office of Admissions, Regent Administrative Center 125, Campus Box 65, CU-Boulder, Boulder, CO 80309-0065, telephone (303) 492-2446, to obtain a foreign student application form and instructions. Prospective graduate students should also write to the specific department in which they are interested. The letter should be addressed to the specific department, CU-Boulder, Boulder, CO 80309. Consult the catalog directory for departmental telephone numbers and addresses.

FOREIGN NONDEGREE STUDENTS

Students who hold temporary nonimmigrant visas or temporary immigration status may gain admission as nondegree students only with the approval of an advisor in Foreign Student and Scholar Services in the Office of International Education. The University of Colorado at Boulder does not issue Forms I-20 or assume any immigration responsibility for nondegree students. Therefore, foreign nondegree students must maintain appropriate immigration status independent of the University.

Foreign nondegree applicants should write to or call Foreign Student and Scholar Services, Environmental Design Building, Campus Box 123, CU-Boulder, Boulder, CO 80309-0123, telephone (303) 492-8057, to obtain the appropriate application and instructions.

FORMER BOULDER CAMPUS STUDENTS

CU-Boulder degree students who are not currently enrolled on the Boulder campus must submit a new application for admission. Students who have attended any college or university since their last attendance at CU-Boulder should refer to the Transfer Students (How to Apply) section of this catalog.

Degree students who withdraw from CU-Boulder during the fall or spring semester must reapply for admission. Degree students who withdraw from CU-Boulder during summer session need not reapply to continue into the fall semester.

A nonrefundable $40 application fee is required. If the student is changing from a previous college or school, the change should be noted on the application. Otherwise, it is assumed that the student is returning to the same field of study. If a college or school change is requested for which the student is not eligible, the student will need to request consideration for his or her previous program.

Nondegree Students

The nondegree student classification meets the needs of those students who wish to take University courses but who do not currently intend to work toward a degree at the University of Colorado. With the exception of high school students who have completed the approval process, nondegree students must be 18 years of age or older and have a high school diploma or its equivalent to qualify for admission. For admission in a spring or fall semester, students need approval from Continuing Education. For summer admission, students will need Office of Admissions approval.

If students have been denied regular undergraduate admission, they may not enroll as nondegree students in the space-available (SAVE) program offered through the Division of Continuing Education for the term for which they sought admission. Nondegree student admission does not guarantee future admission to any degree program.

In the fall and spring semesters, permission to register for regularly scheduled Boulder campus courses is contingent on availability of space. Nondegree students are not permitted to enroll in College of Business and Administration courses during the regular academic year. However, summer session nondegree students are allowed to take business courses subject to completion of appropriate prerequisites.

Nondegree students may take independent study course work through the Colorado Consortium for Independent Study. Students register for this option through the Division of Continuing Education.

Nondegree students may also register for courses on a pass/fail basis, with the exception of Boulder evening and individualized instruction courses. Courses that are taken on a pass/fail basis are counted in the hours of pass/fail course work permitted according to the rules of the college or school to which students are admitted if they change to degree status.

Nondegree students who have completed 6 semester hours of credit must maintain a 2.00 cumulative grade point average. Failure to maintain the required grade point average will result in suspension.

For fall and spring semesters, nondegree students register through the Division of Continuing Education. Further information may be obtained by writing or calling the Division of Continuing Education, Campus Box 178, CU-Boulder, Boulder, CO 80309-0178, telephone (303) 492-5148.

Prospective nondegree students for summer session may obtain further information from the Office of Admissions, Campus Box 30, CU-Boulder, Boulder, CO 80309-0030, telephone (303) 492-2456.

High school juniors who are interested in attending CU-Boulder the summer before their senior year are encouraged to apply for summer session as nondegree students. Also, the Young Scholars Summer Session is a specially designed program for high school students between their junior and senior years. For more information, see that section in this catalog.

Foreign students who want to apply to the University as nondegree students should read the Foreign Students section above. Students interested in teacher certification should refer to the School of Education section of this catalog.

NONDEGREE STUDENTS TRANSFERRING TO A DEGREE PROGRAM

Students who are currently enrolled or have been enrolled at any CU campus as nondegree students may apply for admission to an undergraduate degree program by submitting an undergraduate admission application to the Office of Admissions with complete credentials and the nonrefundable $40 application fee.

Applicants must have earned a high school diploma or its equivalent, and all previous college-level work must be reported on the application. A high school transcript, ACT or SAT scores, and an official transcript from all colleges and schools attended (outside the University of Colorado system) must be sent directly to the Office of Admissions.

A degree-seeking applicant may transfer a maximum of 12 semester hours taken as a nondegree student on any University of Colorado campus. There are opportunities for advising at mandatory orientation programs. It is important that nondegree students who wish to transfer credits to a Boulder campus degree program actively seek academic advising from the appropriate dean's office once they have been accepted into a degree program.

Acceptance of credit toward degrees at the University changed in 1970. Nondegree stu-
Students enrolled before that date may transfer credit in accordance with provisions in effect between January 1969 and August 1970. Transfer of credit to another college or university is within the discretion of the degree-granting institution.

Students wishing to transfer to a graduate degree program should refer to the Graduate School section of this catalog.

Second Undergraduate Degree Applicants

Students may apply for a second undergraduate degree at the University of Colorado at Boulder, but should explore the various options in graduate study available at the University before doing so. Students applying for a second undergraduate degree must follow transfer admission guidelines, and those students who are admitted must keep in mind that all college and major requirements must be met in order to complete degree programs satisfactorily. Restrictions mandated by general University policies, as well as specific college and school policies, include the following:

a. Applicants may not apply to the major in which they received their first undergraduate degree.

b. Applicants must apply to a specific major. Applications for an open option or undetermined major cannot be considered.

c. Second undergraduate degree applicants in the College of Architecture and Planning are encouraged to investigate graduate programs.

d. Credit hours earned as a nondegree student at the University of Colorado may not be used toward major degree requirements for a second degree in the College of Arts and Sciences.

e. Students who have already completed an undergraduate degree in any area cannot be considered for a second undergraduate degree in the College of Business and Administration. They are strongly encouraged to investigate graduate study.

1. The School of Education offers graduate degrees and teacher certification programs only.

Students from Other CU Campuses

Students who wish to transfer to Boulder from another University of Colorado campus (Colorado Springs, Denver, or the Health Sciences Center), from CU Study Abroad, or from CU Continuing Education should refer to the Transfer Students section of this catalog. These students must send a high school transcript, ACT or SAT scores, and an official transcript from each college or university attended (outside the University of Colorado system) to the Office of Admissions. Currently enrolled students are not required to pay the application fee. Some admission preference is shown to applicants transferring from degree programs at other campuses of the University of Colorado.

MINIMUM ACADEMIC PREPARATION STANDARDS—MAPS

One unit equals one year of high school study or one semester of college course work.

ARCHITECTURE AND PLANNING

16 units: 4 of English; 3 of mathematics; 3 of natural science (includes physics and/or biology); 3 of social science; 2 of a single foreign language; and 1 academic elective.

ARTS AND SCIENCES

16 units: 4 of English (includes 2 of composition); 3 of mathematics; 3 of natural science (includes 2 of laboratory science, 1 of which must be either chemistry or physics); 3 of social science (includes 1 of U.S. or world history and 1 of geography—if U.S. history is used to meet the history requirement, then the geography requirement may be met with 1/2 unit of geography and 1/2 unit of world history); and 3 of a single foreign language.

BUSINESS AND ADMINISTRATION

16 units: 4 of English (includes 2 of composition); 4 of mathematics; 3 of natural science (includes 2 of laboratory science) 2 of social science; 2 of a single foreign language; and 1 academic elective (oral communication courses, such as speech, debate, and theatre, are recommended—does not include high school business courses).

The MAPS listed above for the College of Business and Administration apply only to those students entering CU-Boulder before fall 1994. In fall 1994 and later, business students will be required to meet the MAPS of the College of Arts and Sciences.

ENGINEERING AND APPLIED SCIENCE

16 units: 4 of English; 4 of mathematics (includes at least 2 of algebra, 1 of geometry, and 1 of college preparatory mathematics that must include trigonometry, analytic geometry, and elementary functions); 3 of natural science (includes 1 of chemistry and 1 of physics); 2 of social science; 2 of a single foreign language; and 1 academic elective.

Prospective engineering students are encouraged to complete the 4 units of mathematics courses before attempting calculus or pre-calculus courses.

MUSIC

15 units: 4 of English; 3 of mathematics; 3 of natural science; 2 of social science; 2 of a single foreign language; and 1 in the arts.

Note: The college faculties strongly encourage all students to include courses or activities in the fine and performing arts such as music, dance, theatre, and the visual arts.

Policies Concerning MAPS Deficiencies

Students who graduated from high school in the spring of 1988 and later are required to complete in secondary school the minimum academic preparation standards (MAPS) of the CU-Boulder college to which they apply. In some cases, students who are otherwise admissible may be admitted even though they have not met the MAPS. In those instances, students are required to complete the appropriate MAPS courses through courses taken at other institutions of higher education; additional high school credits; or approved credit-by-examination programs.

The policies of the Boulder campus with respect to completing MAPS course work after enrollment are as follows:

1. Appropriate missing MAPS course work is included in the hours for graduation.

2. All course work toward fulfillment of the MAPS must be taken for a letter grade.

3. Students are required to enroll in and complete at least one MAPS course each term, beginning in the first term of enrollment, until such time as all MAPS are completed. This policy applies to new freshmen, to transfer students, and to students transferring from other academic units on the Boulder campus and from other campuses of the University. Failure to comply with this requirement will result in suspension at the end of the term in which the student ceases to complete missing MAPS units.

4. All students who first enroll in one academic unit at CU-Boulder and who subsequently transfer to another unit are required to meet the MAPS specific for the new unit, irrespective of their completion of MAPS units in their previous college or school.

5. Students in double-degree programs must meet MAPS requirements of both degree-granting units.

6. Students must consult with a CU-Boulder academic advisor (or their college's academic survival guide) to determine which specific courses may be used to meet a MAPS requirement.

7. Students who graduate from a foreign high school are exempt from MAPS.

* Credits may apply to graduation in the specific college or school.
* Does not apply. Computer science majors, bioengineering, and premedical option students check with faculty advisor.
* Check with faculty advisor, CHEM 1111 fulfills departmental requirements in all areas. CHEM 1131 fulfills chemical engineering and computer science requirements.
* Check with faculty advisor in major department.
* Does not apply.
The CU-Boulder College of Environmental Design and CU-Denver School of Architecture merged to form the College of Architecture and Planning in fall 1992. As of the printing of this document, plans for possible revision of programs offered on the Boulder campus were not final, and the information contained herein is subject to change.

Through its environmental design program on the Boulder campus, the College of Architecture and Planning offers the only undergraduate preprofessional education in the fields of architecture and planning in the state of Colorado. Study at the undergraduate level leads to the bachelor of environmental design (B. Envd.) degree.

At the undergraduate level, the college takes a broad and integrated view of the design professions. In recent years the problems and opportunities facing the design professions have changed dramatically. These changing conditions demand a broader educational experience than the individual professions traditionally have supplied.

To prepare students for these conditions, the college expects students to take a wide range of courses in the humanities, the arts, and the sciences, in order to examine the world and contemporary society from a variety of viewpoints.

Unlike undergraduate education in many fields, architecture and planning students receive practical experience under the direct supervision of the college’s professors and outside professional designers. From the first day of the freshman year, students integrate and synthesize knowledge gained in studio and related lecture courses.

The College of Architecture and Planning also provides required core courses throughout the curriculum in which students from all design disciplines study shared problems together. Architects, interior designers, landscape architects, urban and regional planners, building technologists, and engineers need to understand each other’s perspectives and increasingly work together on the complex issues facing the design of the built environment.

Facilities

Facilities for academic programs in architecture and planning at CU-Boulder are provided in the Environmental Design building. On its lower floors are administrative and faculty offices, lecture rooms, and exhibit space.

A media center, photographic laboratory, slide library, and drawing studios supplement design studios, which are available throughout the building. Studio space is provided for all students for academic use during the entire semester and is available throughout the day and evening.

Beginning and advanced computer facilities, including graphic capabilities, are also available to students. An urban design simulation lab provides students with a facility for testing possible patterns of growth and development in the urban environment.

Career Opportunities

Architecture

Most students entering the profession of architecture aim to become licensed architects. The requirements for licensure vary from state to state. CU-Boulder students may work toward licensure in Colorado by earning a bachelor of environmental design degree, working six years in an internship, and passing the state license exam. Alternatively, students may earn an architecture degree accredited through the National Architecture Accrediting Board (NAAB), work approximately three years in an internship, and pass the state license exam.

In Colorado, the only NAAB-accredited degree available is the master of architecture (M.Arch.) offered by the College of Architecture and Planning at CU-Denver. Although the master of architecture program at CU-Denver normally requires three and one-half years of study for completion, students who have completed the architecture option in the program at CU-Boulder may be considered for advanced standing and complete the degree in about two years.

The route of a B.Envd. plus an M.Arch. opens up more options for students, should they decide to practice in another state. Since preprofessional degree programs are not accredited by the NAAB, the B.Envd. alone is not accepted as sufficient education to become a licensed architect in many states. Nor is a B.Envd. accepted as sufficient education to become certified as an architect by the National Council of Architectural Registration Boards. NCARB certification makes it easier to become licensed in additional states.

Advanced Standing at CU-Denver: The following courses, completed with a B or better in the architecture option at CU-Boulder, substitute for the first-year requirements in the M.Arch. program at CU-Denver:

- AREN 4035 and 4045 (Architectural Structures 1 and 2)
- AREN 4050 and 4060 (Environmental Systems 1 and 2)
- ARCH 3114 and 3214 (History of Architecture)
- ENVD 4112 and 4212 (Architectural Graphics 1 and 2)
- ENVD 4310 and 4410 (Architectural Studio 3 and 4)

In addition, graduates from the environmental design program at CU-Boulder must have completed the prerequisites of college physics (PHYS 2010) and college mathematics through introductory calculus (MATH 1300) before entering the CU-Denver program. Studio work is accepted for credit only after the architecture faculty of the graduate programs of the College of Architecture and Planning have reviewed the portfolio submitted as a part of the application for admission.

Graduate Programs outside Colorado: Students may also choose to study for an M.Arch. in an accredited program elsewhere. Two to three years are required to complete this degree, depending on the course work completed at the undergraduate level and on the requirements of the graduate program. Students who have taken the architecture option should receive at least a year of advanced standing in most reputable graduate architectural programs. A critical factor in placement, however, is the quality of the student’s design portfolio. A student with a weak portfolio may be asked to take extra design studios, requiring more time to complete the graduate degree.

Internships: In all routes to licensure, students must spend a number of years after graduation in a paid internship, in
most states, including Colorado, a certain amount of experience under the direct supervision of a licensed architect must be documented in each of 14 phases of practice in order to become eligible for the Architectural Registration Examination.

**PLANNING**

While the practice of planning is not currently licensed in most states, in areas of high growth like New York, California, and Florida, the need for licensing to regulate practice is becoming more apparent. Professional regulation and certification is currently overseen by the American Planning Association (APA) and the American Institute of Certified Planners (AICP). Degrees in the field are accredited by the Planning Accreditation Board (PAB) of the Association of Collegiate Schools of Planning.

Although students interested in entry-level positions in planning may find the B.Envd. degree adequate, an advanced degree (master’s or Ph.D.) is highly desirable and advisable. Students primarily interested in professional practice are advised to obtain a master’s degree in city planning, in city and regional planning, or in city planning and community development. Students interested in teaching or research in planning should complete a Ph.D.

**Advanced Standing at CU-Denver.**

Graduates of the college’s planning option with a GPA of at least 3.00 will be admitted into the master’s program in urban and regional planning (M.U.R.P.) at CU-Denver with advanced standing. Planning graduates of the college with a GPA of 3.20 or better in the three required planning studios will have the initial graduate-level planning studio waived, and can anticipate completion of M.U.R.P. requirements in three semesters of full-time study instead of the usual four. Students may not take advantage of this agreement if their date of graduation with the B.Envd. is more than five years past at the time of application. Students may seek additional information and advice for appropriate selection of undergraduate courses from the planning option coordinator in the environmental design program on the Boulder campus.

**Study Abroad**

The College of Architecture and Planning and the University’s Office of International Education urge design students to participate in one of the various study abroad programs offered for University credit. Every other summer, including 1994, the college offers a traveling seminar in Europe that investigates some aspects of European design in detail.

The University of Colorado at Boulder is also coordinating an international program at the University of Copenhagen. DIS offers semester and year-long programs in architecture and design. Taught in English, the DIS program offers advanced design studio and related courses in addition to guided travel-study opportunities in other European nations, including the Soviet Union. For more information about these programs, contact the Office of International Education.

**College Lecture Series**

The college’s lecture series enables students and faculty to meet people whose work significantly contributes to the field of environmental design. All students registered in the College of Architecture and Planning may be required to attend convocations and special lectures throughout the year. In addition, the graduate programs in Denver sponsor a year-long series of lectures, and the Colorado Society of Architects presents a lecture series in Denver that is open to the public. The college also cosponsors the annual National Natural Hazards Information and Applications Conference held in June, the National Pedestrian Conference held in September, and the annual World Affairs Conference held in April.

**ACADEMIC EXCELLENCE**

**Recognition of Scholarship**

As a professionally oriented school, the College of Architecture and Planning provides an atmosphere for study and creative investigation in which the attainment of quality is held in the highest esteem. In recognition of high scholarship and professional attainment, the college grants honors at graduation in two categories: honors and special honors. At an annual awards program, scholarships, prizes, and awards are given to outstanding students and faculty.

**Honors at Graduation**

Students achieving a grade point average of 3.50 to 3.74 (honors) and 3.75 to 4.00 (special honors) will be recognized at commencement. Grades will be based on course work completed at CU-Boulder.

**Scholarships, Loans, Awards, and Prizes**

Several scholarships are awarded upon recommendation of the faculty of the college. In 1961 the Educational Fund of Colorado's chapter of the American Institute of Architects was incorporated by appropriate action of its executive committee. The purpose of this fund is to advance education in architecture by granting scholarships, prizes, and financial aid to deserving students in architecture and to architects interested in research programs directly related and of value to the architectural profession.

The original Educational Fund was founded in January 1934 by William E. Fisher, F.A.I.A.; George H. Williamson, F.A.I.A.; Fred E. Mounjoy, A.I.A.; William H. Bowman, A.I.A.; and Robert K. Fuller, F.A.I.A. Kenneth R. Fuller, son of the founder, now serves as secretary of the fund and, acting with the president and vice president of the Colorado chapter, American Institute of Architects, forms the board of directors of the fund. This board has granted scholarships annually to students and alumni of the College of Architecture and Planning.

Awards provided by the AIA/Colorado Educational Fund include the Anniversary Scholarship, the Centennial Scholarship, Arthur A. and Florence G. Fisher Traveling Scholarships, Robert K. Fuller Scholarship for Graduate Study, James M. Hunter Scholarship for Graduate Study or Travel, and the C. Gordon Sweet Scholarship for disadvantaged students.

**The Hunter Douglas Scholarship**

Through the generosity and support of Hunter Douglas, Inc., an award is given to an outstanding third- or fourth-year student in the undergraduate design program with a demonstrated interest in interior design or interior planning.

**The Charles Haerdigg Architecture Scholarship**

In honor and living tribute to one of Boulder's most distinguished architects, an award is given in alternating years to an undergraduate student intending to pursue the profession of architecture.

Architecture and planning students may apply for the 1992 and 1994 awards. The award is given to music students in the alternating years.

**The Martin Luther King, Jr. Housing Prize**

The Martin Luther King, Jr. Housing Prize is a memorial award intended to encourage the design of housing that improves the quality of living environments for low- and moderate-income groups.
The Roybal and Associates Award provides financial assistance to students of Hispanic descent so they may continue professional education.

The Dana Soper Memorial Scholarship. This $2,000 grant, started in 1973, is awarded to a second-year student in environmental design based upon proven academic performance, personality and character, contribution to the college, and professional potential.

Design certificates are also presented to the outstanding design students at each year level.

Dean's scholar awards are available to Colorado residents on a funds-available basis. A limited number of these merit scholarships are available to nonresidents.

In addition, interested students may participate in faculty-student research projects funded by the Undergraduate Research Opportunities Program (UROP) for a maximum of $750 per award.

ACADEMIC STANDARDS

Ethics and Academic Dishonesty

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegal possession and distribution of examinations or answers to specific questions, alteration, forgery, or falsification of official records, presenting someone else's work as one's own, or performing work or taking an examination for another student are examples of acts which may lead to suspension or expulsion. Any reported act of academic dishonesty may be referred to the faculty executive committee for study and disciplinary decision.

Grade Point Average Requirements and Scholastic Suspension

A student must achieve a grade of C or better in all courses applied towards graduation requirements, excluding general electives. General electives that receive a minimum grade of D may be credited toward the degree if the student has maintained a minimum cumulative grade point average of 2.00.

As a general rule, students who fail to meet the minimum cumulative grade point requirement (2.00) will be permitted to continue their studies on a probationary basis during the following semester. Scholastic records of students will be reviewed as soon as possible after the close of the probationary semester, and students will be informed in writing if they are to be suspended.

When a student is suspended, the reasons for the suspension will be recorded and placed in the student's file. The student will be asked to define the problems and draft a plan for dealing with them in consultation with the college academic advisor. It is the responsibility of the academic advisor to monitor the student's progress.

Students on suspension will not be allowed to register on any campus of the University of Colorado while on suspension, except continuing education or regular campus summer sessions.

Suspended students will be readmitted on a case-by-case basis by review of the College. When necessary, a case may be taken to the executive committee for policy review.

Students suspended a second time will be reinstated only under unusual circumstances. Students who believe that their situations warrant a departure from these normal stipulations may petition for reinstatement. The executive committee will look with favor on such petitions only if the student has shown marked improvement in academic work or if there are unusual circumstances that have contributed to the student's academic difficulties. Deadlines for petitions will be specified in the letter of suspension.

ADMISSION AND ENROLLMENT POLICIES

Requirements for Admission

Candidates for regular admission to the College of Architecture and Planning are expected to meet the general requirements for admission to the University. Please see the Undergraduate Admission section of this catalog for specific requirements.

TRANSFER STUDENTS

Qualified students transferring from other institutions will be accepted into the College of Architecture and Planning. Former students who have attended another college or university for one semester (12 hours or more) will be considered transfer students. Since the College of Architecture and Planning has a limited enrollment, all qualified students are not guaranteed admission.

Transfer students generally must have attained a 2.75 cumulative grade point average in all previous college work. All course work except the last term, if in progress, must be completed and must be listed on the official transcript sent for admission consideration. Transfer students should apply to the Office of Admissions.

Applicants must meet the general requirements for admission to the University. See the Undergraduate Admission section of this catalog for admission standards for transfer students.

Normally, students should transfer by the beginning of the second year of college-level work; all transfer students will be required to take a minimum of 30 credits in the College of Architecture and Planning. Transfer students are admitted for both the fall and spring semesters of each year.

If a student chooses to provide letters of intent and recommendation, they must accompany the application. It is the responsibility of the student to be sure transcripts and other application materials are complete. Only complete application files will be considered for admission.

A maximum of 60 semester hours taken at a two-year college may be applied toward the baccalaureate degree. In general, credits in vocational-technical courses will not be accepted for transfer by the college.

INTRAUNIVERSITY TRANSFER

University of Colorado students in good standing who are interested in pursuing a design education may apply for transfer into the college. Applications are accepted and reviewed on a continuous basis throughout the academic year. Students applying for intrauniversity transfer (IUT) admission must, at minimum, have completed or be enrolled for the introductory studio class, ENV 1000. Completion of additional introductory ENV 1000 courses and general education requirements is encouraged. Though a factor in admission, grade-point average is not in itself a determinant, and interested students are encouraged to apply. Students may anticipate a response to their application within approximately one week of the college's receipt of a complete application packet (available in ENVD 168). Students meeting criteria for automatic admission are so notified. Students not meeting automatic admission criteria may be offered conditional admission, with specified conditions to be met at the end of the application semester.

Attendance

Students are expected to attend classes regularly and to comply with the attendance regulations specified by their instructors. At the beginning of each semester, instructors inform students of policies governing grading policies and attendance in each class.
Students who miss a final examination for illness or other good reason must notify the instructor or the director of undergraduate studies no later than the end of the day on which the examination is given.

Credit Policies

ADVANCED PLACEMENT
Advanced placement and college credit may be granted on the basis of the College Board’s Advanced Placement tests. For students who have taken advanced placement course work in high school and who make scores meeting University standards in the advanced placement examination, advanced placement as well as college credit is granted. College credit granted is treated as transfer credit without a grade, but will count toward graduation and the meeting of other specific requirements for which it is appropriate.

DENVER CAMPUS CREDITS
Students in residence on the Boulder campus in the College of Architecture and Planning may take work on the Denver campus on a space-available basis with the approval of the dean of the college.

INCOMPLETE GRADES
The College of Architecture and Planning does not give incomplete grades except in cases of extreme emergency. By petition, a grade of I/F may be granted.

INDEPENDENT STUDY
Ordinarily, only architecture and planning students at the 3000- or 4000-level of study are permitted to obtain independent study credit. Independent study credit may not be used to substitute for any required design studio or laboratory course.

A complete prospectus of what work is expected, how it shall be carried out, and what the end product might be must be submitted to the supervising faculty member no later than five days after the official beginning of a semester. Approval of the prospectus must be granted by the faculty member and the dean before permission is granted for enrollment in the course. Students should make arrangements for the independent study course details during registration or well before the semester begins.

Only students who have at least a 3.00 GPA are permitted to register for independent study. Additional requirements could be established depending on the proposed topic. No independent study credit is given if financial or other compensation is being earned by the student for the proposed study work. Not more than 3 hours of independent study credit during one semester and not more than a total of 6 are given for the entire time the student is enrolled, unless exception is granted by the dean.

OTHER CREDITS
Credits for teaching assistantships, research assistantships, and internships are all guided by the same standards as those for independent study. Independent study credit limits are independent of credit earned as a teaching assistant, research assistant, or intern.

PASS/FAIL CREDITS
A student may choose to take up to 15 credits toward the degree in environmental design on a pass/fail basis, but these credits must fall in the category of general electives. No courses meeting requirements and no elective environmental design courses may be taken on a pass/fail basis. No more than 6 hours (or two courses) may be taken pass/fail during a single semester.

REPEATED COURSES
Students should confer with the college’s academic advisor regarding specific academic standards for repeating laboratory, studio, and other environmental design courses. Credits for repeated courses are not counted toward the 128 credits needed for graduation.

ROTC CREDIT
Students matriculating in the College of Architecture and Planning are eligible to participate in the ROTC programs on the Boulder campus.

Students interested in such programs should contact the professor in charge of the ROTC program of their choice (Army, Navy, Air Force), and also the academic advisor for the College of Architecture and Planning for information on residence and curriculum requirements for graduation. Credit for ROTC courses may be given upon faculty recommendation to a maximum of 8 hours. Such credit is given only if the student completes all requirements of the four-year ROTC program.

TRANSFER CREDIT
Credits transferred from other institutions are limited to the number of credit hours given for similar work in regular offerings at the University of Colorado. Exceptions to this regulation may be made by the dean upon written petition.

In general, the College of Architecture and Planning does not accept vocational/technical course work in design, graphics, or construction as meeting specific course requirements of the program; nor does it consider such course work acceptable toward the college’s elective requirements. Only in exceptional circumstances may a student petition the dean of the college to request a transfer of such credits. A student may, however, ask that vocational/technical course work be considered as a basis for waiving a specific course in a required sequence.

A grade of C- or better is required in any course for which credit is granted in transfer from another institution to the University. Grades earned in other institutions (excluding other campuses of the University of Colorado) are not computed with the student’s grade point average.

Residence Requirement
A student must complete 30 credits of required preprofessional courses in the major from the College of Architecture and Planning and be in residence as a full-time student for the last semester of the senior year.

Retention of Student Work
The College of Architecture and Planning reserves the right to retain any student project submitted in fulfillment of class requirements for whatever period of time it deems necessary. This retained work is used to provide accrediting agencies with tangible evidence of performance, to serve as additional visual aid material in presentation to other students, and to contribute to possible educational exhibits requested by the University community and the general public.

UNDERGRADUATE DEGREE REQUIREMENTS

General Education in Architecture and Planning
The following areas of knowledge are central to the undergraduate programs in architecture and planning:
• an understanding of the role of the built environment in human affairs and knowledge of people-environment relations;
• an understanding of the major theoretical perspectives of environmental design and planning, including those of the related professional fields such as architecture, landscape architecture, and urban and community planning;
• a working knowledge of information gathering, analysis, design, and decision-making...
methods utilized in the planning, design, and management of built environments;  
• an understanding of the physical properties of built environments and the natural and man-made physical factors that condition their realization;  
• an understanding of historical environmental design and planning processes and products in their related social, cultural, and geographic contexts; and  
• an understanding of professional norms, roles, and institutions related to the analysis, planning, design, and management of the built environment in the broader context of social, political, and economic processes.

In addition, students completing a degree in environmental design are expected to acquire:  
• the ability to effectively and creatively organize built environments, integrating and utilizing appropriate substantive and procedural knowledge;  
• the ability to define built environmental requirements for various human populations;  
• the ability to effectively and creatively utilize appropriate physical technologies in the planning, design, and/or management of built environments; and  
• effective verbal, graphic, and written communication skills required to function as architecture and planning professionals.

Advising
All students receive their academic counseling from the academic advisor in the Office of the Dean of the College of Architecture and Planning. For graduation, a student must see the academic advisor and complete an application for graduation the semester before the desired commencement. Advising appointments may be made in person or by calling (303) 492-7711 throughout the year. Students are encouraged to discuss career opportunities and opportunities in the design and planning professions with the faculty of the college.

Orientation
In order to receive an overview of the philosophy and educational opportunities in the college and meet other new students and the faculty of the college, incoming freshman and transfer students are required to attend an orientation approximately one week prior to the beginning of the fall semester. New freshmen are also invited to attend a two-day retreat, held in the mountains near Boulder, as a part of their orientation.

Curriculum
By the end of their first year, students in the College of Architecture and Planning must choose to emphasize either architecture or planning. Each is designed to prepare students for graduate studies in that particular design profession.

All students in the college must take certain core courses common to both the options. These include an introductory survey course, several design studios, graphics courses, and introductions to social and physical factors in design. The various design professions are increasingly collaborating on complex design and planning issues related to the built environment, and the core college courses reflect this interdisciplinary, interprofessional focus.

General Degree Requirements
Students must complete a minimum of 128 semester hours, subject to the maxima outlined in this document, and maintain a GPA of 2.00 or better. Students must complete one course from each subject area.

Writing
UWRP 1150 (Students are assigned a course level according to their assessed writing ability; courses below 1150 will not meet this requirement) 3

Social Science
ANTH 1030, 1040, 2100, 2200; BLST 2050, 2040; ECON 2010, 2020, GEOG 1982, 1992; HIST 1010, 1015, 1020, 1025, 1030, 1035, 1038, 1040, 1045, 1051, 1051, 1113, 1123, 2117, 2170, 2180, 2437, 2537, 2717, 2718; PSY I 1011, 2012, 2101; PSY 1001; PSY I 1001, 1002, 1021, 1031, 2011, 2041; WMST 2000 3

Humanities
CHST 1011; ENGL 1200, 1260, 1300, 1400, 1500, 1600, 2300, 2600, 2610; FINE 1100, 1200, 2000, 2100, 2200, 2300, 2400; HUMN 1010, 1020; HPHL 1000, 1100, 1200, 1300, 1400, 1440, 1600, 1700, 1750 3

Math
Architecture option: MATH 1300 4
Planning option: MATH 2510; OPMG 2010; PSYC 2101; SOCY 3061; ECON 3818; GEOG 3023 3

Natural Science
Architecture option: PHYS 2010 4
(includes lab) 5
Planning option: EPOB 1210 plus 1230; CHEM 1111; NASC 1230 or 1250; PHYS 2010 4

Architecture Option
The architecture option is intended for those students who wish to pursue a professional career in architecture. Students may enter the work force directly after graduation or use their studies as a foundation for graduate work. Many of the requirements of this option are designed to help students achieve advanced standing in M.Arch. programs around the country.

General Education Requirements 16-19

Studies
ENVD 1000 Environmental Design Studio (Note 1) 6
ENVD 2120 Planning Studio 1 6
ENVD 3210 Architectural Studio 2 6
ENVD 4310 Architectural Studio 3 6
ENVD 4410 Architectural Studio 4 6

Methods
ENVD 2002 Media (Note 1) 4
ENVD 3002 Design Theory and Methods 4
ENVD 3112 Programming 3

History and Theory
ENVD 1014 Introduction to Environmental Design (Note 1) 3
ARCH 3114 Architectural History 1 3
ARCH 3214 Architectural History 2 3

Social Factors
ENVD 2001 Social Factors in Design (Note 1) 3
ENVD 3091 Environment and Behavior (Note 1) 3

Physical Factors
ENVD 2003 Ecology and Design (Note 1) 3

Technology and Practice
ENVD 3115 Building Materials and Assembly 3
AREN 4035 Structures 1 3
AREN 4045 Structures 2 3
AREN 4050 Environmental Systems 1 3
AREN 4060 Environmental Systems 2 3

Electives
At least 12 credits must be taken within the College of Architecture and Planning, and at least 9 credits must be taken from other University offerings. The remaining credits may be taken from either category. Three of the environmental design courses must be chosen from separate categories (i.e., design, methods, history, social factors, physical factors, and technology).

Curriculum Note
1. Curriculum core course. Must be taken by all architecture and planning students regardless of option area.

Planning Option
The planning option is intended for those students who wish to pursue careers in community, urban, and regional planning. Although a student may enter the work force after finishing this option, it is expected that many students will continue on for a master's degree in planning, urban design, geography, law, or public administration.

ENVD 2120 Planning Studio 1 6
ENVD 3220 Planning Studio 2 6
COURSE DESCRIPTIONS

The following courses are offered in the College of Architecture and Planning on the Boulder campus. This listing does not constitute a guarantee or contract that any particular course will be offered during a given year.

For current information on times, days, and instructors of courses, students should consult the Schedule of Courses issued at the beginning of each semester.

Some courses may be open to nonmajors. Students should check for current policies. Courses numbered in the 1000s and 2000s are intended for lower-division students and those in the 3000s and 4000s for upper-division students.

Courses are organized by subject matter and are generally listed numerically by last digit (courses ending in the number "0" are listed before courses ending in "1," and so on). The number after the course number indicates the semester hours of credit that can be earned in the course.

Abbreviations used in the course descriptions are as follows:

- Prereq.—Prerequisite
- Coreq.—Corequisite
- Lab.—Laboratory
- Rec.—Recitation
- Lec.—Lecture

Architecture

ARCH 3114-3. History and Theories of Architecture 1. Survey of architecture, landscape architecture, and urban design from ca. 3000 B.C. to ca. 1400 A.D., emphasizing developments in the western world. Open to nonmajors.

ARCH 3214-3. History and Theories of Architecture 2. Survey of architecture, landscape architecture, and urban design from ca. 1400 A.D. to the present, emphasizing developments in the western world. Open to nonmajors.

ARCH 4010-3. Architectural Appreciation and Design. Introduces basic processes and principles of architectural design to provide students with a basis for understanding and evaluating architecture. Open to AREN seniors only.

Environmental Design

Studies

ENVD 1000-6. Environmental Design Studio. Required introductory studio course. Examines a range of architectural and planning problems; presents basic material about structure, construction, space planning, and site layouts. Shows how concepts of architectural meaning and human behavior help shape the built environment. Open to nonmajors.

ENVD 2110-6. Architecture Studio 1. Preprofessional studio in architectural design. Addresses a wide variety of architectural problems, from residential and commercial to urban design, and integrates the many factors that shape buildings, including construction, structures, climate, human behavior, and values, and cultural meaning. Prereq., ENVD 1000.

ENVD 2120-6. Planning Studio 1. Applies knowledge from other courses in the curriculum; introduces the various physical systems (natural and built) affected by planning interventions; and progressively addresses more complex issues in planning for neighborhoods, central districts, citywide and regional planning scales. Prereq., ENVD 1014, 2002, 2003, and general education requirements.

ENVD 3210-6. Architecture Studio 2. See ENVD 2110.

ENVD 3320-2. Planning Practicum. Supervised practicum in some aspect of urban or regional planning. Prereq., ENVD 3220.

Social Factors

ENVD 2001-3. Introduction to Social Factors in Environmental Design. Critical evaluation of built environments. Considers how social and individual behavior is reflected in and influenced by the built environment. Open to nonmajors.

ENVD 3091-3. Environment and Behavior. Examines the social and behavioral aspects of relationships between people and the built environment. Gives special attention to antecedent factors (why we have the environments we do), implications of given arrangements for special population groups, and responses to incongruent environments. Open to nonmajors.

ENVD 4311-3. International Housing Policies and Practices. Provides students with descriptive knowledge and analytical understanding of the use and development of residential settings in different political economies, globally divided into advanced capitalist nations, collectivist economies, and the third world. Prereq., ENVD 2001 and 3091.

ENVD 4361-3. Special Topics: Social Factors in Design. Variable topics in the relationship of human experience and behavior to the built environment, e.g., social research methods in environmental design.
Methods and Techniques

ENVD 2002-4. Environmental Design Media. Develops graphics skills, emphasizing drawing as a means to design. Includes investigation of drawing types and methods; diagramming of ideas and systems; and informative, exploratory, and developmental sketching. Prereq., ENVD 1000.

ENVD 2052-3. Computers in Architecture and Planning. Introduces the use of computers in design fields, including applications for word-processing, desktop publishing, graphic creation, and CAD-style design. Aims to provide basic general skills in computer use that are transferable to other computer applications.

ENVD 3002-4. Design Theory and Methods. Explores the nature of design and systematic methods for improving design. Topics include nature of design problems, structure of design process, role of design methods, generation of solutions, and design and planning of form and functions. Students use computers without having to learn to program.

ENVD 3022-2. Photography for Virtual Communications. Introduces students to the technical and practical aspects of making photographic images: the workings of the camera and lens, principles of depth of field, black and white film processing, printing, and basic darkroom procedures. Open to nonmajors.

ENVD 3052-3. Introduction to Computer Methods in Environmental Design. Surveys existing and emerging computer methods used in the environmental design professions, with an introduction to computer programming. Open to nonmajors. Prereq., MATH 1300 and PHYS 2010, or instructor consent.

ENVD 3152-3. Introduction to Computer Graphics Applications. Principles and uses of computer graphics in design. Creation and modification of complex two- and three-dimensional objects; orthographic and perspective views; use of color; input using mouse and digitizer; output using screen, plotter, matrix printer, and slides; automated aids for form generation and manipulation; and analysis of current and future trends of computer usage for design.

ENVD 3252-3. Computer Graphic Programming. Introductory computer programming course designed to teach the capabilities of a computer in providing graphic representations of environments, including buildings. Open to nonmajors.

ENVD 4012-3. Imagination and Creativity. Seminar on imagination and creativity in environmental design. Students research and prepare a class presentation and paper on a topic of interest. Open to nonmajors at all levels.

ENVD 4092-3. Improving Imaging Ability. Advanced course dealing with theories of imaging and methods of improving imaging in the design process. Open to nonmajors.

ENVD 4122-2. Advanced Technical Photography. Focuses on working with high-contrast graphic arts film to create special effect photographs. Process includes cymotyped (blueprint), Van Dyke Brown, and hand-colored color to black and white images. Intended to give students a full array of photograhic techniques to incorporate into studio course presentations and portfolio work. Students must provide their own 35mm SLR camera. Prereq., ENVD 3022 or FINF 2919 or instructor consent.

ENVD 4152-3. Computer Graphic Applications. Introduces the mechanics of entering 2-D images and 3-D objects into the computer. Once entered, graphics are interactively rotated in space, walked through, and displayed in perspective from any position. Also covers the mechanics of other computer programs allowing additional manipulation of the images and objects.

ENVD 4352-3. Special Topics: Computer Methods. Topics include animation and environmental simulation; computational methods of technical evaluation and optimization; and computational mapping and analysis.

Physical Factors

ENVD 2003-3. Ecology and Design. Introduces basic principles and techniques of ecology as they relate to the design and understanding of the built environment. Includes a study of hazards and the impact of modern technology on the natural and built environments. Open to nonmajors.

ENVD 4363-3. Special Topics: Physical Factors in Environmental Design. Includes such topics as appropriate technology, public policy and natural hazards, organization of the designing and building process, and physical elements of urban development. Prereq., upper-division standing.

History and Theory

ENVD 1014-3. Introduction to Environmental Design. Survey of factors shaping the built environment. Discusses various theories of design architects and planners have employed and offers an historical review of these two fields. Discusses potential career opportunities in the design professions. Open to nonmajors.

ENVD 4114-3. History of American Architecture and Urbanism. Survey of architecture, landscape architecture, urban design, and planning in the U.S. from ca. 1600 to the present. Open to nonmajors. Prereq., ARCH 3214 or equivalent, or instructor consent.

ENVD 4364-3. Special Topics: History and Historiography of Environmental Design. Advanced seminar on history and historiography of environmental design, e.g., American dwellings. May be repeated for credit by petition. Prereq., ARCH 3214 or equivalent, or instructor consent.

ENVD 4764-3. Special Topics: Theory and Criticism in Environmental Design. Advanced seminar on theory and criticism in environmental design, e.g., architecture and introduction to design theory and criticism. May be repeated for credit by petition. Prereq., ARCH 3214 or equivalent, or instructor consent.

ENVD 4794-3. History of Urban Design and Planning. History of European and American planning and urban design in the late 19th and 20th centuries.

ENVD 4824-3. Senior Planning Seminar. Advanced seminar focusing on theoretical concerns and practical issues inherent in environmental design planning. Views concerns and
issues in terms of settings, processes, and planning outcomes. Provides a critical synthesis of the inherently interdisciplinary nature of planning education. Open to planning seniors only, or by instructor consent.

**Technology and Practice**

**ENVD 3015-3. Historic Preservation Technology.** Introduces methods for identifying historic structures and evaluating their materials. Considers techniques for preserving and restoring and legal options for promoting preservation efforts.

**ENVD 3115-3. Introduction to Building Materials Systems.** Surveys building methods, materials, and assemblies from the designer's perspective.

**ENVD 4005-3. Design and Planning Law.** Students learn how to research the various codes and to draft and pass laws. Covers environmental, water quality, property, zoning, and building codes and laws. Open to non-majors.

**ENVD 4035-3. Solar Technology.** Introduces aspects of solar technology relevant to the environmental design professions. Includes readings and lectures on the nature of energy limitations, energy needs, and the potential role of solar energy in meeting these needs. Open to non-majors. Prereq.: PHYS 2010 or equivalent.

**Miscellaneous**

**ENVD 3909 (1-6). Independent Study.** By special arrangement with instructor. Prereq.: junior standing and 3.00 GPA.

**ENVD 4909 (1-6). Independent Study.** By special arrangement with instructor. Prereq.: junior standing and 3.00 GPA.

**ENVD 3919 (1-6). Teaching Assistant.** By special arrangement with instructor. Prereq.: junior standing and 3.00 GPA.

**ENVD 4919 (1-6). Teaching Assistant.** By special arrangement with instructor. Prereq.: junior standing and 3.00 GPA.

**ENVD 4929 (1-6). Research Assistant.** By special arrangement with instructor. Prereq.: junior standing and 3.00 GPA.

**ENVD 4939 (1-6). Internship.** By special arrangement with instructor and outside sponsor. Prereq.: junior standing and 3.00 GPA.

**FACULTY**

**PETER A. SCHNEIDER,** Acting Dean; Professor. B.Arch., University of Cape Town, South Africa; Dipl., Ruth Prowse Art Center.

**BARBARA AMBACH,** Lecturer. B.F.A., B.Arch., Rhode Island School of Design.

**ERNESTO C. ARIAS,** Associate Professor. B.Arch., University of Florida; M.Arch., M.C.P., Ph.D. (Urban Planning), University of Pennsylvania. Registered Architect: Pennsylvania, Florida, Georgia. Prereq.: junior standing and 3.00 GPA.

**C. HERBERT BOWES,** Professor Emeritus.

**C. A. BRIGGS,** Professor Emeritus.

**DEVON M. CARLSON,** Dean Emeritus.

**GERALD S. CROSS,** Professor Emeritus.

**MARK GELENTNER,** Associate Professor. B.Arch., Montana State University; Ph.D. (Architecture), Bartlett School of Architecture and Planning, University College, London.

**MARK GROSS,** Assistant Professor. B.S., Ph.D. (Architecture), Massachusetts Institute of Technology.

**SPENCER W. HAVLICK,** Professor. B.A., Beloit College; M.S., University of Colorado; Ph.D. (Ecology, Environmental Planning), University of Michigan.

**JOSEPH JUHASZ,** Associate Professor. A.B., Brown University; M.A., Ph.D. (Psych.), University of California, Berkeley.

**JAMES LEESER,** Lecturer. B.Arch., Arizona State University. Licensed Architect: Colorado, New Mexico, and California.

**RAYMOND McCALL, JR.**, Associate Professor. B.S., University of Wisconsin Milwaukee; M.S., Illinois Institute of Technology; Ph.D. (Arch. Design Methods), University of California, Berkeley.

**DAVID L. PAULSON,** Professor Emeritus.

**JEFFREY SHEPARD,** Lecturer. B.S., M.Arch., Georgia Institute of Technology. Licensed Architect: Colorado.

**RAYMOND G. STUDER, JR.**, Professor. B.Arch., University of Texas; M.Arch., Harvard University; Ph.D. (Urban/Public Policy Planning), University of Pittsburgh.

**LUIS SUMMERS,** Professor. Environmental Design and Civil, Environmental, and Architectural Engineering. B.Arch., M.A., Ph.D., Notre Dame.

**WILLEM K. T. VAN VLIET**, Associate Professor. Doctorandus, Free University of Amsterdam; Ph.D. (Urban Sociology/Planning), University of Toronto.
The College of Arts and Sciences is the oldest academic division of the University, dating from 1892. Offering one of the most extensive liberal arts and sciences programs in the country, the college recognizes that its students have a wide variety of educational goals.

The objectives of the college are based on the belief that all students, no matter how specific and professional their aims, should have sufficient knowledge of other areas to be able to see their own disciplines in the proper perspective. At the same time, all students, no matter how broad and general their educational objectives, should have sufficient grasp of at least one field to enable them to deal with its problems in depth and with sophistication.

Pursuant to these beliefs, the college requires all of its students to undertake work in general education courses designed to broaden their knowledge. Students are also required to present a considerable body of work in at least one major field of study.

Liberal education, however, is more than courses and academic proficiency. Contact with members of the faculty outside the classroom and with other students in informal discussion, independent study and research, and participation in the broader intellectual and cultural life of the academic community are factors that significantly enrich a student's experience in the College of Arts and Sciences.

ACADEMIC EXCELLENCE

Dean’s List

Students in the College of Arts and Sciences who have completed at least 12 semester hours of work in any single semester with a GPA of 3.50 or better are included on the dean’s list, which is posted each semester in the Old Main Building.

Graduation with Honors

The award of honors at graduation—cum laude, magna cum laude, or summa cum laude—is determined by the Honors Program of the college and is based on several criteria, including the quality of original scholarly work. Honors are not conferred on a graduate simply by virtue of high grades. Interested students should consult the Honors Program listing in this catalog or contact the Honors Program in Norlin Library.

Graduation with Distinction

Students who do not graduate with honors from the College of Arts and Sciences may graduate “With Distinction” if they have taken at least 30 semester hours at the University of Colorado at Boulder and if their cumulative grade point average, first at the University of Colorado and then for all college work completed, is 3.75 or higher. The average includes all grades except P.

Phi Beta Kappa

Phi Beta Kappa is the nation’s oldest and most prestigious honor society. The CU-Boulder chapter was established in 1904. Upper-division students whose undergraduate academic records fulfill certain requirements are eligible for election to membership in recognition of outstanding scholastic achievement in the liberal arts and sciences. Students are notified by mail of their nomination; students do not apply for Phi Beta Kappa membership.

ACADEMIC STANDARDS

Good Academic Standing

Good academic standing in the college requires a grade point average of 2.00 (C) in all University of Colorado work. Grades earned at another institution are not used in calculating the grade point average at the University of Colorado (this includes courses taken at Metropolitan State College on the Denver campus). However, grades earned in another school or college within the University of Colorado are used in determining a student’s scholastic standing and progress toward the degree in the College of Arts and Sciences.

Probation

Students whose cumulative grade point average falls below 2.00 are placed on probation. Those students who enroll in any term in the calendar year, excluding summer, after being placed on probation are expected to raise their grade point to a 2.00 overall at the end of that term. CU-Boulder’s summer session does not count as a probationary semester, nor are students dismissed at the end of the summer term.

If students who have been placed on probation elect to remain out of school for a full calendar year, they may return to the University in good standing, but are placed on probation again at the end of the semester in which they return if their cumulative grade point average remains below 2.00.

Scholastic Dismissal

Students who still have a cumulative average below 2.00 after their semester of probation will be dismissed and will not be able to register for University of Colorado day-time courses on any campus during any regular academic year, August to May.

Students dismissed from the college are eligible for readmission when they have achieved a cumulative 2.00 average by virtue of work done during the University of Colorado’s summer term (any of the three campuses) or through the Division of Continuing Education (Boulder evening or correspondence courses). They may also return as transfer students when they have overcome their deficiencies by enrolling at another institution (i.e., by achieving an overall 2.00 average in the University of Colorado work plus all work taken elsewhere since dismissal). These transfer grades are used only for the purpose of readmission and do not remain in the University of Colorado grade point average.

Dismissed students pursuing the latter option have two semesters after readmission to bring their University of Colorado grade point average up to 2.00 or they are dismissed again.

Students who have made up their grades and desire to be readmitted must reapply to the University through the Office of Admissions. Readmission is subject to enrollment limitations.

Appeals and Petitions

Students have the right to appeal decisions of academic dishonesty and to petition for exceptions to the academic policies stated in this catalog. Appeals should be directed to the Committee on Academic Ethics. Petitions should be submitted to the Appeals Committee on Academic Rules and Policies. Both committees are located in the Office of the Dean.
ADMISSION AND ENROLLMENT POLICIES

Attendance
Successful work in the College of Arts and Sciences is dependent upon regular attendance in all classes. Students who are unavoidably absent should make arrangements with instructors to make up the work missed. Failure to attend regularly may result in receipt of an F in a course. Students who, for illness or other legitimate reason, miss a final examination must notify the instructor or the Office of the Dean no later than the end of the day on which the examination is given. Failure to do so may result in receipt of an F in the course.

Credit Policies
ADVANCED PLACEMENT PROGRAM
See the Undergraduate Admission section of this catalog.

COLLEGE-LEVEL EXAMINATION PROGRAM (CLEP)
The College of Arts and Sciences accepts a limited number of hours of CLEP credit from subject (not general) examinations toward its bachelor's degree programs (see the Undergraduate Admission section for subjects accepted). In addition, certain CLEP examinations may be used to meet the minimum academic preparation standards (MAPS) for admission to the University. No more than 30 total semester hours of CLEP will apply. CLEP credit may not be used in the final 30 semester hours presented for a degree.
CLEP tests are administered through the Counseling and Career Services office, (303) 492-5254.

COOPERATIVE EDUCATION/INTERNSHIPS
Students in the College of Arts and Sciences may receive up to 6 semester hours of credit for a department-sponsored cooperative education program or internship. Each internship project must be approved by the dean of the college before the student enrolls in the course in order for the student to receive credit. Students are encouraged to contact their major department office or Counseling and Career Services for information regarding the possibility of enrolling in a cooperative education program in their major. Most internships are graded on a pass/fail basis only. Participation in an internship does not affect the total semester hours of pass/fail a student may apply toward a degree.

CORRESPONDENCE STUDY
A maximum of 30 semester hours of correspondence work may count toward the degree. Arts and sciences courses offered by the CU-Boulder Division of Continuing Education carry resident credit. These courses may be taken during the last 30 hours before graduation.

CREDIT/NO CREDIT
Credit/no credit changes must occur during the schedule adjustment periods.

CREDIT TAKEN AS A NONDEGREE STUDENT
A student may apply a maximum of 12 hours of course work taken at any University of Colorado campus while registered as a nondegree student toward the total required for graduation. Once a student has been admitted to a degree program, credits from the Division of Continuing Education such as SAVE, Boulder evening credit courses, and CU-Boulder correspondence classes are eligible to be applied toward the degree, subject to other limitations stated in the catalog.

CREDIT HOURS TAKEN OUTSIDE THE COLLEGE OF ARTS AND SCIENCES
Students may count a total of 30 semester hours from the other colleges and schools at CU-Boulder as well as specified ROTC and Presidents Leadership Class courses toward the fulfillment of requirements for the B.A. and B.F.A. degrees. Within these 30 total hours, up to 8 semester hours in activities courses (applied music and ensembles) may be used.

CROSS-LISTED COURSES
Students who take courses that are cross-listed in two or more departments receive credit in the department in which they have the most semester hours, irrespective of the department in which they formally take the course.

INDEPENDENT STUDY
With departmental approval, students may register for independent study during the schedule adjustment periods for each semester. Students may not register for more than 6 semester hours of independent study credit during any term. No more than 8 hours of independent study may be taken in a single department or program. A maximum of 16 hours of independent study may count toward the degree.
A student may not use independent study projects to fulfill the college's area, core, or general education requirements.

LIMITATIONS ON COURSE WORK
No student may normally take more than 45 hours in one department. Exceptions are:
a. Students who enrolled for the first time in any institution of higher education in the summer of 1988 and thereafter may exceed the 45-hour limitation in the major by 6 hours (for a total of 51 hours), provided that all of the excess hours are taken in designated departmental honors courses and/or in honors thesis credit.
b. The limitation for the bachelor of fine arts degree is 67 hours in the major.
c. The limitation for the bachelor of science degree is 50 hours in the major.

PASS/FAIL
Students in the College of Arts and Sciences may not use the pass/fail option for courses taken to fulfill the area, core, or general education requirements, courses used to satisfy the foreign language requirement, courses used to fulfill MAPS, or courses used to complete the minimum requirements for the major.
Students who entered any institution of higher education for the first time in summer 1988 and thereafter may take two elective courses pass/fail, to a maximum of 6 hours. While courses with mandatory pass/fail grading are open to all students, only juniors and seniors may elect the pass/fail option, with a limit of one course per semester. The pass/fail option may be used only for elective credit.
Students who entered any institution of higher education for the first time before summer 1988 may exercise the pass/fail option by taking up to 16 semester hours of elective credit on a pass/fail basis; for transfer students, the limit is 1 hour for every 8 attempted at the University of Colorado at Boulder. These students may take a maximum of 6 hours on a pass/fail basis each semester. Courses that are offered only on a pass/fail basis are not counted toward the maximum allowed. The pass/fail option may be used only for elective credit.

REPEITION OF COURSES
If a student takes a course for credit more than once, all grades are calculated into the grade point average. However, the course is only counted toward graduation once, unless a course description specifically states that it can be taken more than once for credit.

ROTIC CREDIT
The ROTC courses listed below have been certified as acceptable college-level course work by the faculty of the College of Arts
and Sciences or by other colleges and schools on the Boulder campus. These courses are counted as elective credit in the college, subject to the 30-semester-hour limitation on course work taken outside the college for students in the B.A. and B.F.A. programs. Courses that do not appear on this list do not count toward any degree requirements.

AIRR 3010-3020 (students may not receive credit for either course if they have credit in MGMT 3000)
AIRR 4010-4020 (students may not receive credit for either course if they have credit in JSCI 4191)
MLIR 1011-1021
MLIR 2031-2041 (students may not receive credit for either course if they have credit in MGMT 3000)
MLIR 4072-4082
NAVY 2020
NAVY 3030
NAVY 3040
NAVY 3101
NAVY 4018-4020
NAVY 4030
NAVY 4101

TRANSFER CREDIT
Work from another accredited institution of higher education that has been completed with a grade of C- (1.70) or better may be transferred to the University of Colorado. Remedial or vocational course work does not transfer.

For students who entered an institution of higher education for the first time in the summer of 1988 and thereafter, no courses taken at a junior or community college are credited toward graduation at the University of Colorado after the students have completed a total of 60 semester hours (or 90 quarter hours) of course work at all institutions.

For students who enrolled in an institution of higher education prior to summer 1988, no courses taken at a junior or community college can be credited toward graduation at the University of Colorado after the students have completed a total of 72 semester hours (or 108 quarter hours) of course work at all institutions.

Note: Course work transferred from Colorado junior or community colleges is subject to the articulation agreement specified in the appropriate transfer guide between each institution and the University of Colorado at Boulder.

All courses transferred from junior and community colleges carry lower-division credit. Courses transferred from four-year institutions carry credit at the level they were taught at the previous institution.

Withdrawal
See the Registration section of this catalog for specific withdrawal procedures and University-wide policies.

Students in the College of Arts and Sciences who withdraw after the sixth week of classes in a fall or spring semester are not allowed to enroll in classes for the following semester. Summer session is not counted as a regular semester. In addition, students who withdraw two semesters in a row have a dean's stop placed on their registration. They will not be permitted to return to CU-Boulder before the next full academic year has elapsed (not including their semester of withdrawal). Students may never withdraw after the last day of classes (i.e., the day before final examinations begin).

These policies also apply to arts and sciences students who are enrolled in continuing education courses.

RESIDENTIAL ACADEMIC PROGRAMS

Farrand Residential Academic Program
The Farrand program combines the advantages of a small liberal arts college with the benefits of a major research university for its 400 first-year and sophomore residents. Small classes offered in the residence hall, informal contact with faculty, extensive academic advising and personal counseling services, and special programs generated from student interests make Farrand an intellectual as well as a residential community. In addition, optional outreach activities help those in need beyond the University, while strengthening the Farrand community.

Each semester every Farrand student takes a core Farrand course that provides a shared academic experience. During the first year the Farrand curriculum develops basic skills of writing and critical analysis, while providing a comprehensive survey of western art and culture through HUMN 1010 and 1020, Introduction to the Humanities. Contemporary subjects, such as global ecology, film, and ethics, along with traditional disciplines, make up the second-year courses, which also fulfill arts and sciences core curriculum requirements.

Farrand courses constitute about one-third of a student's course work during the first two years. The remaining two-thirds is composed of courses selected from the regular on-campus offerings.

Farrand offers a strong academic program with some of the best teachers at the University, along with community outreach opportunities and the chance to participate in many student-sponsored activities, such as an unusually active student governing board, the Farrand Improv nights (amateur talent shows), and special film and lecture series. One-credit-hour classes provide a context for small-group discussion of contemporary issues as well.

The program is sponsored jointly by the College of Arts and Sciences and the Department of Housing and is designed for students in arts and sciences. It is jointly administered by an academic director selected from the faculty and a hall director experienced in the operation of a large residence hall.

There is a charge for the program in addition to regular tuition, fees, room, and board.

Inquiries concerning any aspect of the academic program may be directed to the Academic Director, Farrand Residential Academic Program, Campus Box 180, University of Colorado at Boulder, Boulder, CO 80310-0180, telephone (303) 492-8848.

Sewall Residential Academic Program
The Sewall Hall Residential Academic Program in American Culture and Society provides qualified academically committed freshmen and sophomores with the opportunity to participate in a unique residential community experience at the University of Colorado at Boulder. Limited to 320 students, this coeducational program combines many of the advantages of a small liberal arts college with the vast resources of the University.

Students who live in Sewall Hall are required to take one class in the hall each semester. Freshmen are required to take either AMST 2000 or AMST 2010 (Themes in American Culture). Other core and elective courses are also available to freshmen and sophomores. The classes are usually limited to 20 students, carry 3 semester hours of credit, count toward a degree, and many satisfy core curriculum requirements in the College of Arts and Sciences as well as general education requirements in the Colleges of Business and Engineering. In addition to the seminars, many of the large lecture classes at the University offer special laboratory or recitation sections for Sewall students.

The director of the Sewall program, who is a member of the University faculty, provides academic assistance to the students in planning their individual programs, choosing courses, and making contact with their
major departments. The director also offers personal counseling and helps students find the proper University resources to help them with their concerns.

Participants in Sewall are fully involved in regular campus life, take the majority of their classes with the rest of the University, and are encouraged to join in all University activities. The major emphasis is on participation—in classes, in student government, and in special programs and performances. Faculty, administrators, and staff enjoy close working relationships with the Sewall residents.

Interested freshmen and sophomores in good academic standing at CU-Boulder must apply for the residential academic program by May 1. Applications are included in the housing materials sent to all freshmen upon admission. Admission is competitive; freshmen applicants are selected on the basis of their high school record (GPA, class rank, and test scores). Students with a serious interest in American culture and society and who are motivated to make an investment in a liberal education are encouraged to apply. There is an extra charge for participation in the program in addition to regular tuition and room-and-board fees. Some scholarships are available to students enrolled in the College of Arts and Sciences.

Students who have questions about the program should address them to the Academic Director, Sewall Residential Academic Program, Campus Box 555, University of Colorado at Boulder, Boulder, CO 80309-0553, telephone (303) 492-6004.

UNDERGRADUATE DEGREE REQUIREMENTS

Academic Advising and Orientation

Students in the college are expected to assume responsibility for planning their academic program in accordance with college rules and policies and with departmental major requirements. All new students are required to attend a special orientation, advising, and registration program on campus before enrolling. Freshmen and sophomore students who have declared a major are assigned a core advisor; open option students receive advising assistance from the Advising Resource Center.

Students are urged to consult regularly with advisors in the Office of the Dean and their major department concerning academic progress and objectives. The arts and sciences college advisors hold regularly scheduled workshops for undergraduates to review college policies and degree requirements, the college list and core curriculum, the foreign language requirements, transfer credit, grade point averages, academic standing, academic probation and dismissal, intrauniversity transfer, and preparation for graduation. Workshop schedules are available outside Old Main 1B-85.

Following these workshops, students with special concerns can schedule individual appointments with advisors within approximately ten days. Freshmen and sophomores seeking advice may see peer counselors in addition to their core advisors. Students may schedule appointments in Old Main 1B-85 or by calling (303) 492-7885.

All students are responsible for knowing and following the academic rules and policies set forth in this catalog. Any questions concerning these provisions are to be directed to the Office of the College of Arts and Sciences, Old Main 1B-85. The college cannot assume responsibility for problems resulting from students failing to follow the policies stated in the catalog or from misadvice given by someone other than an appropriate staff member of the college.

Students are subject to the general degree requirements in effect at the time they first enter the College of Arts and Sciences and are subject to the major requirements in force at the time they declare a major.

There are currently two sets of degree requirements. One, the "core curriculum," is required for students who began their undergraduate study at any institution of higher education in the summer of 1988 or thereafter. The other is required of those who began their undergraduate study before the summer of 1988. No portion of either curriculum may be substituted for a portion of the other.

General Requirements for Those Who Began Their Undergraduate Study in the Summer of 1988 and Thereafter

Arts and sciences students who began their undergraduate study in the summer of 1988 and thereafter must fulfill the following requirements for graduation:

1. A total of 120 hours passed.
2. A 2.00 (C) grade point average in all University of Colorado work.
3. Forty-five semester hours of upper-division work (courses numbered in the 3000s and 4000s). At least 15 of these upper-division hours must be completed in the core curriculum.
4. Completion of the last 30 semester hours in University of Colorado courses on the Boulder campus as a degree student in the College of Arts and Sciences. Courses taken at the Colorado Springs campus or at the Denver campus (excluding Metropolitan State College courses) in the summer only count toward resident credit. Courses taken while on CU-Boulder study abroad programs, through CU-Boulder continuing education, or CU-Boulder correspondence courses are considered to be in residence.
5. For the bachelor of arts degree, students may take a maximum of 45 hours from one department. Students may exceed the 45-hour limitation by 6 hours (for a total of 51 hours), provided that all of the excess hours are taken in designated departmental courses and/or in honors thesis credit.
6. For the bachelor of fine arts degree, students may take a maximum of 67 hours in their major department.
7. Completion of a major. Students are subject to the major requirements in force when they declare a major. See Majors and Major Requirements below.
8. Completion of the general education requirements (college core curriculum) with the following limitations:
   a. Students may not use courses taken to complete a minimum academic preparation standards (MAPS) deficiency to fulfill any area of the college core curriculum, with the exception of foreign language.
   b. Although a single course may be listed in several areas, a student may use it to meet only one area requirement.
   c. Students may use courses from a single department to meet at most two content areas of study.
   d. Neither independent study nor pass/fail courses may be used to meet MAPS deficiencies or core requirements.
   e. Students must complete at least 15 semester hours of course work at the upper-division level as part of the core curriculum. A maximum of 6 of these hours in the content areas of study may be in a single department. Note that all courses transferred from junior or community colleges carry lower-division credit.

Exemptions: Selected majors are exempt from portions of the core curriculum, as core course work is considered equivalent to course work in the major. Students may choose to take the exemption or to waive the exemption by selecting from the specific courses listed in the core brochure. Students who major in a field dealing in depth with literature and arts (classics, English, fine arts, French and Italian, Germanic languages and literatures, humani-
Students planning to go on to graduate work are advised to complete the fourth semester of a foreign language in preparation for the language requirements of graduate schools.

2. Quantitative Reasoning and Mathematical Skills (QRMS). Students are required to demonstrate minimum competence in quantitative reasoning and mathematical skills by the end of their sophomore year. The requirement may be fulfilled either by passing the CU-Boulder QRMS proficiency examination or by passing one or more of the specifically designated core curriculum courses.

3. Written Communication. The college requires each student to demonstrate competency in written communication. In the second semester of the sophomore year, a student may elect to take the written communication proficiency examination. Students whose writing is judged to be adequate are exempt from the writing requirement. Students whose writing is judged to be inadequate in content, form, and/or style must pass an upper-division writing course, UWRP 3020 Topics in Writing, during their junior or senior year.

4. Critical Thinking. Students must take 3 hours of specified course work at the upper-division level that requires them to practice sustained critical thinking and to demonstrate such thinking in both written form and oral discussion. Some of these courses may take the form of a senior capstone experience seminar.

5. Natural Science (13 semester hours). Completion of this requirement enables students to understand the current state of knowledge in at least one scientific discipline, with specific reference to important past discoveries and the directions of current developments; to gain experience in scientific observations and measurement, in organizing and quantifying results, in drawing conclusions from data, and in understanding the uncertainties and limitations of the results; and to acquire sufficient general scientific vocabulary and methodology to find additional information about issues, to evaluate it critically, and to make informed decisions.

6. Contemporary Societies (6 semester hours, 3 of which must be upper-division). These courses, which treat societies of the twentieth century, study an individual society or compare several societies. All explicitly attempt to deepen students' understanding of the cultural, political, economic, or social context that shape people's lives. Their scope may be global or specific, but all courses fulfilling this requirement treat social processes, institutions, values, forces, and beliefs.

7. Ideals and Values (3 semester hours). Courses meeting this requirement explore a specific sphere of human values (moral, religious, intellectual, aesthetic, environmental, etc.). In these courses, students are encouraged to reflect upon their own and others' fundamental ideals and values and the sources from which those value orientations are derived.
General Requirements for Those Who Began Their Undergraduate Study Before Summer 1988

Arts and sciences students who began their undergraduate study before summer 1988 must fulfill the following requirements for graduation:

1. A total of 124 semester hours passed.
2. A 2.00 (C) grade point average on all University of Colorado work.
3. Forty semester hours of upper-division work (courses numbered in the 3000s and 4000s). Note that all courses transferred from junior or community colleges carry lower-division credit.
4. Completion of the last 30 semester hours in University of Colorado courses on the Boulder campus as a degree student in the College of Arts and Sciences. Courses taken at the Colorado Springs campus or at the Denver campus (excluding Metropolitan State College courses) in the summer count toward resident credit. Courses taken while on CU-Boulder study abroad programs, through CU-Boulder continuing education, or CU-Boulder correspondence courses are considered to be in residence.
5. Not more than 45 semester hours in a single department for the B.A. degree, not more than 67 hours in a single department for the B.F.A. degree, and not more than 50 semester hours in a single department for the B.S. degree.
6. Completion of a major (see Majors and Major Requirements below).
7. Completion of the college list requirements (see below).

College List Requirements

Candidates for liberal arts degrees are expected to be literate in their own language, to have at least a minimal acquaintance with a language other than their own, and to be familiar with the subject matter and the methodology of the three broad areas of learning represented by the humanities, the natural sciences, and the social sciences. These expectations generate the requirements of the college.

All students pursuing a bachelor's degree in the College of Arts and Sciences who began undergraduate study before summer 1988 are required to complete the requirements listed below.

These students must present two, two-semester course combinations in the areas of the humanities, natural sciences, and social sciences.

The faculty of the College of Arts and Sciences has authorized a set list of courses to be used in fulfilling these college area requirements, known as the "college list."

Students may obtain a college list at Old Main 1B-85.

Students may satisfy the requirements in each of the three areas in one of two ways:

1. By taking a first-year combination of courses from those designated on the college list, followed by two second-year courses for which the first combination is prerequisite. Both sets of courses must normally come from the same department; exceptions are printed in the list.
2. By taking one first-year combination in one department and a second first-year combination in a different department.

Students may not use the independent study or pass/fail option for courses taken to fulfill the College of Arts and Sciences requirements, including courses taken to complete the foreign language requirement.

Foreign Language Requirement. Completion of a third-level high school course in any modern or classical foreign language is recommended for entrance to the College of Arts and Sciences for those students seeking the B.A. or B.F.A. degree. Students failing to meet this expectation must complete it in one of the following ways:

1. By completing an appropriate third-semester course in a single foreign language at an accredited university.
2. By demonstrating third-semester proficiency or its equivalent through examination in any foreign language.

Questions about placement should be referred to the appropriate foreign language department. Once a foreign language course has been passed, a student cannot receive credit for a course at a lower level in that same language.

Students are strongly urged to start their college-level language study immediately upon enrollment in the college, either by continuing a language previously studied or by beginning a new language.

Students planning to go on to graduate work are advised to complete the fourth semester of a foreign language in preparation for the language requirements of graduate schools.

General Requirements for All Students (Regardless of When They Began Their Undergraduate Study)

 Majors

All arts and sciences students pursuing a bachelor’s degree must declare a major by the end of their sophomore year (i.e., the semester in which they are completing their 60th semester hour of work, including transfer work). See pages 4 and 5 for a listing of bachelor's programs. Admission to certain majors may be limited, and students are advised to consult with departmental advisors regarding criteria for admission.

Departments are responsible for advising their majors and also for certifying the completion of those students' major programs for graduation. The college can assume no responsibility for difficulties arising out of a student's failure to establish and maintain contact with the major department or program.

Major Requirements

1. A minimum of 30 semester hours in the major area (for the B.F.A., a minimum of 50 hours).
2. Thirty semester hours in the major area, all with grades of C- (1.70) or higher.
3. Eighteen semester hours of upper-division courses in the major, all with grades of C- (1.70) or higher.
4. A 2.00 (C) overall grade point average in all major work attempted.
5. Special requirements as stipulated by the major department.
6. No more than 8 semester hours of independent study.

Students are subject to those major requirements in effect at the time they formally declare a major.

 MINORS

A number of departments and programs in the College of Arts and Sciences now offer minor programs. Participation in a minor program is optional for students pursuing a bachelor's degree. Course work applied to a minor may also be applied toward general education (core curriculum or college list) and major requirements.

Departments and programs with approved minor programs include applied mathematics; astrophysical, planetary, and atmospheric sciences; chemistry and biochemistry; dance; economics; environmental, population, and organismic biology; French; German; geology; history; Italian; kinesiology; linguistics; mathematics; philosophy; physics; religious studies; Russian; and women studies. Interested students should contact the department or program office for further information.

Although the structure of specific minor programs may differ, all must have the following restrictions or minimum requirements:

1. A minimum of 18 credit hours must be taken in the minor area, including a minimum of 9 upper-division hours.
2. All course work applied to the minor must be completed with a grade of C- or better (no pass/fail work may be applied). The grade point average for all minor
degree course work must be equal to 2.00 (C) or higher.

3. Students pursuing an individually structured major, or a major in distributed studies, are not eligible to earn a minor.

4. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work towards a minor.

5. Students may earn no more than one minor.

**AREAS OF INTEREST AND CERTIFICATE PROGRAMS**

The college also sponsors programs—but not undergraduate majors—in the following areas of interest. Successful completion of specified course work in some of these areas entitles students to a certificate issued by the dean of the college. Students interested in these programs should contact the Office of the Dean. Course work in these general areas is open to all interested students:

- American Indian Studies
- Asian American Studies
- Astrophysical, Planetary, and Atmospheric Sciences (APAS)
- Bibliography
- British Studies (certificate)
- Chicano Studies
- Environmental Sciences (certificate)
- History and Philosophy of Science
- Honors
- Medieval Studies
- Museum
- Peace and Conflict Studies (certificate)
- Women Studies (certificate)

**OPEN OPTION**

The "open option" category accommodates students who are not ready to choose a major when they enter the University. The selection of open option allows students who are undecided about a major the freedom to sample from the extensive range of offerings in the college. With proper program planning, much of the course work taken during the freshman and sophomore years can be applied toward the area, core, or general education requirements of the college. Open option students must declare a major by the end of their sophomore year.

**DOUBLE MAJORS**

Students pursuing either the B.A. or B.F.A. degree may graduate with more than one major within the degree (e.g., economics and French) by completing all requirements for both majors. A minimum of 124 total semester hours is required for double majors who enrolled in any college before summer 1988. A minimum of 120 hours is required for all others. In both cases, all other requirements must be fulfilled.

**DOUBLE DEGREES**

Two different degrees (i.e., a B.A. and B.S., or B.A. and B.F.A. from the College of Arts and Sciences, or two degrees from different schools or colleges) may be earned from CU-Boulder if the following conditions are fulfilled:

1. The student is enrolled in both arts and sciences and the college or school granting the second degree during the last 30 hours of residence.
2. The student presents a total of at least 150 semester hours passed.
3. For the B.A. and B.F.A. degrees, the student presents a total of 94 semester hours of liberal arts course work. (For students who enrolled in any college for the first time in the summer of 1988 or later, 90 semester hours of liberal arts course work are required.)
4. The student has completed at least 30 semester hours of liberal arts course work at the University of Colorado.
5. The student has completed all general education and major requirements of the College of Arts and Sciences.
6. Both degrees must be awarded at the same time.

**SECOND BACCALAUREATE DEGREES**

A student who has been awarded a baccalaureate degree, either from this college or elsewhere, may be granted a second baccalaureate degree provided the following conditions have been fulfilled:

1. All general requirements for the degree to be awarded by the College of Arts and Sciences (including the area, core, or general education requirements) have been met.
2. The major in the B.A., B.F.A., or B.S. is different from the major in the first degree earned.
3. At least 30 semester hours of passing work in the new major or subject field, including 18 semester hours of upper-division work, are taken in this college after admission to a second degree program. Courses taken as a nondegree student do not count in these minimum requirements.

**GRADUATE STUDY**

Curricula leading to advanced degrees are offered by most of the departments in the College of Arts and Sciences (see page 307). Students should consult the Graduate School section of this catalog for admission and degree requirements of the Graduate School. Curricula for graduate programs are listed alphabetically in this section. For information about enrollment in graduate course work while still an undergraduate, see Seniors at the University of Colorado in the Graduate School portion of this catalog.

**AFRO-AMERICAN STUDIES**

See Center for Studies of Ethnicity and Race in America (CSERA), Afro-American Studies.

**AMERICAN STUDIES**

**Degree........................................B.A.**

The College of Arts and Sciences, through its various departments and its American Studies committee, offers a broad interdisciplinary program of courses relating to American thought and culture. American studies also includes a track in women studies (see the Women Studies program listing).

The following areas of knowledge are central to the undergraduate degree in American studies:

- knowledge of the main topics in the cultural history of the United States, from its origins to the present;
- knowledge of at least three disciplinary approaches to the cultural study of the United States; and
- comparative knowledge of at least one non-American culture.

In addition, students completing the degree in American studies are expected to acquire:

- research skills sufficient to determine the boundaries of an investigation by consulting appropriate works and developing a bibliogra phy of primary and secondary sources, including documents, periodical articles, and monographs;
- analytic skills sufficient to read primary sources closely, to base an exposition of general patterns in particular pieces of evidence, to analyze arguments and interpretations presented in scholarly sources, and to recognize and analyze conflicts of interpretation; and
- writing skills sufficient to write an essay that is coherent, cogent, and gramatically correct.

**Bachelor's Degree Program**

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

**Major Requirements Semester Hours**

Two semesters of introductory American studies courses (or equivalent): AMST 2000 Themes in American Culture: 1600-1900 and AMST 2010 Themes in American Culture: 1865 to present...........................................6

Completion of one of the tracks listed below consisting of five upper-division courses and representing at least two different departments..............................................15
One upper-division course drawn from the course offerings under: "Diversity*"...........3
One upper-division course drawn from the course offerings under "Regional Studies"........3
Two semester seminars in American studies (AMST 4590 and 4590, or AMST 4560, or equivalent).................................6
One upper-division course in the language, culture, or history of a non-North American civilization, a course which fits the theme of the track the student has chosen......................3

Total hours for major........................................36
(30 hours of the required 36 must be upper-division)

*If the student has chosen this track, an additional upper-division course from any other track may be substituted.

AMERICAN INDIAN STUDIES

See Center for Studies of Ethnicity and Race in America (CSERA), American Indian Studies.

ANTHROPOLOGY

Degrees .................... B.A., M.A., Ph.D.

Anthropology is the study of people, both ancient and modern, in their cultural context. The field involves a global look at human cultures from prehistoric times to the present, integrating findings from the social sciences, natural sciences, and humanities. Students of anthropology learn to appreciate the variety of cultures throughout human history and to understand the meaning of human biological and cultural development as well as diversity.

The following areas of knowledge are central to the undergraduate degree in anthropology:
- understanding of basic data, concepts, alternative theories and approaches, and modes of explanation appropriate to each of the four main subfields of the discipline (archaeology, ethnological linguistics, physical anthropology, and cultural anthropology);
- understanding of basic archaeological techniques, including site mapping, stratigraphy, dating, and inference of human behavior from archaeological data, as well as a general knowledge of human history from its beginning through the emergence of complex societies;
- understanding of variation and patterning in human social behavior and symbolic systems, including ecological, social, cultural, and psychological factors, and the kinds of data relevant to each (this includes knowledge of the distribution and diversity of contemporary and recent human societies in terms of social, political, religious, and economic organization, the effects of culture contact, and industrialization);
- a basic understanding of primate evolution, including knowledge of theories of human evolution, and familiarity with the basic data of the hominid fossil record; and
- an understanding of human language, the diversity of verbal expression, and its relationship to the invention of writing systems and religion.

In addition, students completing the degree in anthropology are expected to acquire:
- the ability to identify trends or patterns in anthropological data from different cultures or periods, to identify an appropriate context of explanation or interpretation, and to formulate a testable explanation or reasonable interpretation, including the ability to identify data that constitute credible evidence for an explanation or interpretation; and
- the ability to identify and define a significant problem or topic in anthropology and the ability to analyze and interpret data in a systematic manner.

Bachelor's Degree Program

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below. (A minimum of 30 semester hours in anthropology, 18 of which must be upper division, is required for the degree.)

Major Requirements ..... Semester Hours
ANTH 1010 Introduction to Physical Anthropology .......................... 3
ANTH 2100 Frontiers of Cultural Anthropology .................................. 3
ANTH 2200 Introduction to Archaeology ........................................... 3
One upper-division topical course in cultural anthropology ..................... 3
One upper-division ethnographic area course in cultural anthropology .......... 3
One upper-division course in archaeology ....................................... 3
One upper-division course in physical anthropology .......................... 3

(Students planning to pursue graduate work in anthropology are advised to take ANTH 4000 and 4550)

Graduate Degree Programs

Prerequisites. To be admitted as regular degree students, applicants should have a minimum undergraduate grade point average of 3.00 (4.00=4.0) or a master's degree. Graduate Record Examination scores for verbal and quantitative aptitude tests are required. Letters of recommendation and evidence of previous anthropologically oriented experience and work are carefully considered. Students with less than 18 semester hours of previous course work in anthropology are considered deficient and are asked to present a greater number of hours for a degree.

Application. Inquiries concerning applications should be directed to the graduate secretary. Completed applications are reviewed once each year and are due by February 1. Students with no previous graduate work should apply for entrance into the M.A. program which, if successfully completed, will prepare them for the Ph.D. program. Students who have or will have completed an M.A. degree in anthropology by the time of their admission may apply for direct admission into the Ph.D. program.

Course Requirements. All entering graduate students must have had the equivalent of ANTH 4000 or 5000 (Quantitative Methods in Anthropology) or take the course during their first semester in residence.

To qualify for a graduate degree, all students must complete at least three seminars, one each from any of the following four categories: cultural anthropology, physical anthropology, archaeology, or anthropological linguistics. The seminars that meet this requirement are listed in the department's graduate handbook.

Other specific course requirements are established through a qualifying interview and consultation with the department chair and an academic advisor.
M.A. students are normally expected to write a thesis (plan I); exceptions to this (plan II) require approval of the chair.

Students may have primary specialization in any of the major subfields of anthropology: archaeology, cultural, or physical anthropology. Further specialization in applied anthropology, medical anthropology, or other areas is possible as students progress through the program.

In general, no matter what the student's special interests, the department expects graduate students to retain a breadth of competence in anthropology through the master's degree with specialization intensifying with progress toward the Ph.D. degree.

Additional information about other specific areas of specialization and other requirements for the degree may be obtained by writing directly to the graduate secretary, Department of Anthropology.

APPLIED MATHEMATICS

Degrees M.S., Ph.D.

The Applied Mathematics Program in the College of Arts and Sciences offers courses and degree programs for undergraduate and graduate students. Course offerings at the undergraduate level, which are part of the distributed studies program, focus on providing students with the mathematical tools and problem-solving strategies that are useful in science and engineering. The applied mathematics major at the undergraduate level is a part of the distributed studies program. The program offers a range of courses and research opportunities in many areas, including computational mathematics, discrete mathematics, non-linear phenomena, and physical applied mathematics. Each of these areas is described below.

Computational Mathematics

The study of computational mathematics has grown rapidly over the past 15 years and has allowed mathematicians to answer questions and develop insights not possible only 20 to 30 years ago. Modern computational methods require in-depth knowledge of a variety of mathematical subjects including linear algebra, analysis, ordinary and partial differential equations, asymptotic analysis, elements of harmonic analysis, and nonlinear equations. Since computers are invaluable tools for an applied mathematician, students are expected to attain a highly professional level of computer literacy and gain a substantial knowledge of operating systems and hardware. Computational mathematics courses include the study of computational linear algebra, optimization, numerical solution of ordinary and partial differential equations, solution of nonlinear equations, and advanced seminars in wavelet and multi-resolution analysis.

Discrete Applied Mathematics

Discrete mathematics has become an extremely large and active research area. In fact, previous unsolvable problems in engineering, physics, chemistry, and the social, biological, and environmental sciences have become tractable through the use of discrete analytical methods and associated computational algorithms. Computational applications have provided the impetus for enormous growth in the use of discrete mathematics during the past three decades. Program courses in discrete mathematics are intended to provide the student with a basic knowledge of subjects such as graph theory, enumeration (including the study of difference equations and the Polya counting theorem), discrete stochastic processes, and selected topics from areas such as block designs, partition theory, Hadamard matrices, Boolean algebra, etc.

Nonlinear Phenomena

In recent years there has been an explosion of interest in the study of nonlinear waves and dynamical systems with analytical results, often motivated by the use of computers. The faculty in the Applied Mathematics Program is actively and intensively involved in this growing field; research areas include integrable systems, conservative and dissipative chaos, and numerical computation. Topics of interest include solitons, integrable systems, cellular automata, pattern formation, qualitative structure and bifurcation theory, onset of chaos and turbulence, analytic dynamics, and transport phenomena. Program courses in this field include dynamical systems, nonlinear wave motion, and many advanced seminars. Suitable background courses are analysis, computation, and methods in applied mathematics. Valuable supplemental courses include mechanics and fluid dynamics.

Physical Applied Mathematics

Physical applied mathematics is a term which generally refers to the study of mathematical problems with direct physical application. This area of research is intrinsically interdisciplinary. In addition to mathematical analysis, it requires an in-depth understanding of the underlying applications area, and usually requires knowledge and experience in numerical computation. The program's affiliated faculty have a wide variety of expertise in various areas of application (e.g., atmospheric and fluid dynamics, theoretical physics, plasma physics, genetic structure, etc.). The course requirements of the program are designed to provide students with a foundation for their study (analysis and computation). The program also requires supplemental courses in one of the sciences or engineering fields that are needed to begin doing thesis research in physical applied mathematics.

Bachelor's Degree Programs

The program currently offers two pathways leading to a bachelor's degree. For students in the College of Engineering and Applied Science, the B.S. degree is available, while in the College of Arts and Sciences the B.A. degree is possible through an interdisciplinary major program that focuses on applied mathematics.

The undergraduate curriculum in applied mathematics trains students in the applications of mathematics in engineering and science. The use of computational methods and implementation of algorithms on computers is central. Technical electives are selected from mathematics, engineering, physics, chemistry, computer science, biology, astrophysics, and geology.

In general, nontheoretical electives should be broadening and have multicultural value. Students interested in research are also encouraged to take a foreign language as early as possible. French, German, or Russian are recommended.

Interested students should contact the applied mathematics office in the College of Arts and Sciences for information on specific major and degree requirements.

Minor Program

The program also offers a minor in applied mathematics that is available to engineering as well as to arts and sciences students. A minor in applied mathematics indicates that a student has received in-depth training in mathematical techniques and computational methods well beyond the training usually received by science and engineering majors.

Graduate Studies

Prerequisites for graduate study in applied mathematics include three semesters of calculus and a course in differential equations and linear algebra. Other course requirements are Methods in Applied Mathematics 1 and 2 (APPM 4350 and 4360); Intermediate Numerical Analysis (APPM 4650 and 4660, or MATH 4650 and 4660); either Matrix Methods (APPM 3310) or
Linear Algebra (APPM 2360, MATH 3150, or MATH 5150); and Advanced Calculus 2 (MATH 4320 or MATH 4380). The overall grade point average for mathematics and applied mathematics must be B- or better.

**PH.D. DEGREE**

The Applied Mathematics Program on the Boulder campus offers course work and research leading to the Ph.D. degree in applied mathematics. This is a coordinated Ph.D. degree program jointly administered with the Department of Mathematics at the University of Colorado at Denver under the auspices of the systemwide Graduate School. Information on the program and degree requirements is available from the applied mathematics office and the Graduate School.

**ASIAN STUDIES**

**Degree .................................................. B.A.**

The Asian Studies Committee offers a broad interdisciplinary undergraduate major in Asian Studies. In addition, a number of departments offer graduate training with an emphasis on Asia.

Students planning to major in Asian Studies may participate in study abroad programs with prior approval from the Asian Studies Program and the Office of International Education.

**Bachelor's Degree Program**

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

**Major Requirements Semester Hours**

CHIN 1051 Masterpieces of Chinese Literature in Translation............................................. 3

JPNS 1051 Masterpieces of Japanese Literature in Translation............................................. 3

Two courses in Chinese and/or Japanese history.......................................................... 6

Two semesters of Chinese or Japanese language....................................................... 6-10

ASIA 4830 Senior Seminar: Critical Issues in East Asia................................................. 3

Six elective courses from the approved list below..................................................... 18

Total hours............................................. 39-43

(18 hours must be upper-division courses)

**Approved Asian Studies Courses**

Most courses are offered for 3 credit hours. Not all classes are taught every semester or every year.

- ANTH 1110 Exploring a Non-Western Culture: Japan
- ASIA 1840 Independent Study
- ASIA 2840 Independent Study
- ASIA 3840 Independent Study
- ASIA 4830 Senior Thesis in Asian Studies (required of all majors; only offered to seniors in the spring)
- ASIA 4840 Independent Study
- ECON 4433 Economic Relations Among the United States, Japan, and Canada
- FILM 3003 Japanese and Chinese Cinema
- FINE 2409 Introduction to Asian Art
- FINE 4459/5459 The Arts of Japan
- FINE 4469/5469 The Arts of China
- FINE 4669 Asian Arts in Context: Study Abroad
- FINE 5919 Graduate Seminar: Selected Topics in Art History (Asian Arts)
- HIST 1608 Introduction to Chinese History
- HIST 1708 Introduction to Japanese History
- HIST 3718 Selected Readings in Japanese History
- HIST 3628 Selected Readings in Recent Chinese History
- HIST 4618 History of Traditional China
- HIST 4619 Women in Asian History
- HIST 4628 Rise of Revolutionary China
- HIST 4658 History of Modern Chinese Intellectual Thought
- HIST 4718 Ancient and Medieval Japanese History
- HIST 4728 Modern Japanese History
- HIST 4738 Japan at War
- HIST 4748 Modern Japanese Intellectual History
- HIST 6019 Readings in Third-World History (Asian Women)
- HIST 6618 Readings in Chinese History
- HIST 6718 Readings in Modern Japanese History
- CHIN 1010 and 1020 First-Year (Beginning) Chinese
- CHIN 1900 Independent Study
- CHIN 2110 and 2120 Second-Year (Intermediate) Chinese
- CHIN 2900 Independent Study
- CHIN 3110 and 3120 Third-Year (Advanced) Chinese 1 and 2
- CHIN 3210 Introduction to Classical Chinese
- CHIN 3220 Readings in Classical Chinese
- CHIN 3900 Independent Study
- CHIN 4110 and 4120 Readings in Modern Chinese Literature 1 and 2
- CHIN 4230 Seminar in Classical Chinese
- CHIN 1051 Masterpieces of Chinese Literature in Translation
- CHIN 4811 Worlds of Ancient and Medieval Poetry
- CHIN 4821 Chinese Fiction in Translation
- CHIN 4831 Chinese Drama in Translation
- CHIN 4841 Women and the Supernatural in Chinese Literature (taught in English)
- CHIN 4900 Independent Study
- JPN 1010 and 1020 First-Year (Beginning) Japanese 1 and 2
- JPN 1051 Masterpieces of Japanese Literature in Translation
- JPN 1900 Independent Study
- JPN 2110 and 2120 Second-Year (Intermediate) Japanese 1 and 2
- JPN 2211 Language and Patterns of Thinking and Behavior in Japanese Culture (taught in English)

**ASIAN AMERICAN STUDIES**

See Center for Studies of Ethnicity and Race in America (CSERA), Asian American Studies.

**ASTROPHYSICAL, PLANETARY, AND ATMOSPHERIC SCIENCES**

**Degree .................................................. M.S., Ph.D.**

Although an undergraduate major is not offered, a minor degree is available. APAS courses may be used in undergraduate distributed studies programs. Lists of courses recommended for these majors may be obtained in the departmental office.

**Graduate Degree Programs**

The curriculum and research in the department emphasize three major areas: astrophysics, planetary and atmospheric sciences, and plasma physics.

The department offers both M.S. and Ph.D. degrees. During the first two years of graduate study, before specializing, students generally obtain a broad background in courses regarded as basic to all three areas. Many students take graduate-level courses in the Department of Physics (e.g., electromagnetism and quantum mechanics). Depending upon the student's preparation and interests, the basic courses are chosen from the following list:

- APAS 5110 Internal Processes in Gases
- APAS 5150 Introductory Plasma Physics
- APAS 5400 Introduction to Fluid Dynamics
- APAS 5540 Mathematical Methods

Descriptions of more specialized courses in the three major areas follow. Students interested in applying to this program are invited to write to the Chair, Department of Astrophysical, Planetary, and Atmospheric Sciences, Campus Box 391, University of Colorado at Boulder, Boulder, CO, 80309-0391.

**ASTROPHYSICS**

*(INCLUDING SOLAR PHYSICS)*

The department offers a broad range of courses and research in this area, leading to
the Ph.D. degree. Graduate-level courses are offered in the following subjects:
- APAS 5700 Stellar Structure and Evolution
- APAS 5710 High-Energy Astrophysics
- APAS 5720 Galaxies and Cosmology
- APAS 5730 Stellar Atmospheres and Radiative Transfer
- APAS 5740 Interstellar Astrophysics
- APAS 5750 Observational Astronomy
- APAS 6000 Seminar in Astrophysics
- APAS 6010 Topical Seminar in Astrophysics
- APAS 7420 Geophysical and Atmospheric Fluid Dynamics

Research in observational and theoretical astrophysics is conducted in the following areas:
- Stellar atmospheres, radiative transfer, and stellar wind; hot and cool stars
- Solar physics
- Interstellar and intergalactic medium
- Cosmology and large-scale structure of the universe
- Stellar interiors, pulsations, and neutron stars
- Cosmic X-ray sources, supernovae and their remnants
- Galactic evolution, quasars, and active galaxies
- Radio astronomy
- Plasma astrophysics
- Astrophysical fluid dynamics
- Laboratory and atomic astrophysics
- UV, IR, and X-ray space astronomy
- Instrument and detector development

The department operates a 24-inch Cassegrain-Coude and 16- and 18-inch Cassegrain telescopes, available for photographic, photometric, and spectrophotographic observations, as well as for instrument and detector development. CU-Boulder has also been awarded large NASA grants for theoretical astrophysics. Opportunities for graduate research are also found with the University's Laboratory for Atmospheric and Space Physics (LASP), Joint Institute for Laboratory Astrophysics (JILA), and the Center for Astrophysics and Space Astronomy (CASA) established within the APAS department. (See descriptions in the Graduate School section.) In addition, research is carried out with national laboratories and international collaborators: High Altitude Observatory (HAO) in Boulder (solar physics), National Optical Astronomical Observatories in Tucson and Chile (optical astronomy), National Radio Astronomy Observatory (NRAO) in Virginia, the Very Large Array (VLA) in New Mexico, the NASA International Ultraviolet Explorer satellite (IUE), the Hubble Telescope (HST), the Infrared Astronomical Satellite (IRAS), and the ROSAT x-ray telescope.

Planetary and Atmospheric Sciences

Research and courses related to the physics and dynamics of the Earth's atmosphere, planetary atmospheres of other planets, and planetary interiors are available in programs leading to the M.S. and Ph.D. degrees. Graduate-level courses in these areas are:
- APAS 5050 Atmospheric Physics and Dynamics
- APAS 5220 Nonlinear Dynamics
- APAS 5300 Introduction to Magnetospheres
- APAS 5400 Introduction to Fluid Dynamics
- APAS 5410 Fluid Instabilities and Waves
- APAS 5560 Radiative Processes in Planetary Atmospheres
- APAS 5960 Theories of Climate and Climate Variability
- APAS 7200 Dynamics and Photochemistry of the Upper Atmosphere
- APAS 7240 Physics of Planetary Airglows
- APAS 7420 Geophysical and Atmospheric Fluid Dynamics
- APAS 7430 Fluid Turbulence and Nonlinear Processes

Research in theoretical, observational, and laboratory atmospheric and planetary science is conducted in the following areas:
- Atmospheric dynamics, planetary circulations, wave propagation, hydrodynamic instability, experimental geophysical fluid dynamics, physical oceanography, and climate dynamics
- Atmospheric photochemistry, radiative transfer, upper atmospheric dynamics, and transport of radiatively active species (ozone), effects of solar variability, dynamical-chemical coupling, and diurnal and seasonal variations
- Planetary aeronomy, airglow and aurora, UV and IR spectroscopy, nonturbulent clouds, structure and composition of planetary atmospheres (Venus, Mars, Jupiter, Saturn, Uranus, and Neptune), planetary magnetospheres, and cometary physics
- Satellite monitoring of the Earth's atmosphere and environment, including remote sensing of mesospheric ozone, stratospheric trace species, convection, ongoing radiation, magnetospheric dynamics, and geomagnetic behavior of the Earth's core

Graduate research opportunities exist with individual faculty members, as well as jointly with academic and research units such as the Program in Atmospheric and Ocean Sciences (PAOS) and the Center for Atmospheric Theory and Analysis (CATS), a collaborative arrangement among researchers at the University, the National Center for Atmospheric Research (NCAR), and the National Oceanic and Atmospheric Administration (NOAA); the Laboratory for Atmospheric and Space Physics (LASP), involved in space investigations of the Earth and planets; and the Cooperative Institute for Research in the Environmental Sciences (CIRES), a research organization co-sponsored by the University and NOAA. Research facilities include an atmospheric sciences laboratory, operating a Pyramid 90X supercomputer linked to the University computing network and thereby to NCAR, archived and direct transmissions of satellite and meteorological data, a fully equipped laboratory for investigations in geophysical fluid dynamics, and complete access to the NCAR Cray supercomputing facility and extensive data base. Financial support is available in connection with all of the above research activities.

Geophysics

The department participates in the interdepartmental Ph.D. program in geophysics. For further information, refer to the discussion of the geophysics program under the Graduate School section of this catalog.

Plasma Physics

A complete program of courses and research is available for students specializing in theoretical or experimental plasma physics leading to M.S. or Ph.D. degrees in APAS or physics. Courses offered are:
- APAS 5000 Seminar in Plasma Physics
- APAS 5150 Introductory Plasma Physics
- APAS 5220 Nonlinear Dynamics
- APAS 7150 Magnetohydrodynamics
- APAS 7160 Intermediate Plasma Physics

Research in theoretical and experimental plasma physics is carried out in the following areas:
- Fundamental processes in plasmas
- Kinetic theory of plasmas
- Plasma turbulence
- Plasma diagnostics
- Nonlinear dynamics
- Nonlinear optics of plasmas
- Toroidal magnetic confinement
- Electron-beam-plasma interaction
- Solar plasmas, radio emission from the Sun, and solar wind

Collaborative research is pursued with the mathematics and physics departments, with major institutions in Boulder and the U.S., and also with international research organizations. These include the National Center for Atmospheric Research (NCAR), with access to the Cray computers; the Los Alamos Scientific Laboratory; and several University groups. A departmental plasma laboratory is equipped with modern diagnostic instrumentation and a variety of plasma research devices.

Graduate assistantships and postdoctoral positions are available.

Departmental Requirements

Those wishing to pursue graduate work in APAS leading to candidacy for an advanced degree should carefully read requirements for advanced degrees in the
Graduate School section of this catalog. The following are special departmental requirements.

**Master’s Degree**

**Prerequisites.** A thorough undergraduate preparation in physics and mathematics is necessary for graduate study. Courses should include thermodynamics, mechanics, electricity and magnetism, atomic physics, and mathematics at least through complex variables and differential equations.

**Qualifying Examination.** The Graduate Record Examination aptitude tests and advanced test in physics are used in place of a qualifying examination, and this examination should be taken before the time of application to the department.

**Preliminary Examination.** Students in the Department of Astrophysical, Planetary, and Atmospheric Sciences are given an oral preliminary examination prior to the beginning of the fall semester of their first year. This oral interview examines fundamental knowledge in undergraduate physics and mathematics. Students are required to overcome any academic deficiencies within a year in order to remain in the program.

**Course Requirements.** Under plan I, a student must present a thesis plus 24 semester hours of course work, at least 12 of which must be in APAS courses numbered 5000 or above. The remaining graduate-level hours are normally in physics and mathematics. Under plan II, additional hours of approved graduate courses must be presented for a total of 30 semester hours, of which at least 16 must be in APAS courses numbered 5000 or above. The master’s examination under plan I covers the thesis and related topics. The examination under plan II is more comprehensive and may be either written or oral or both. Master’s examinations are given after other degree requirements have been completed, but may be given during the last semester of residence if the student is making satisfactory progress on required courses. Students are encouraged to follow plan I except under special circumstances.

**Doctoral Degree**

In addition to the master’s degree requirements above, Ph.D. students must complete the following.

**Course Requirements.** A minimum of 30 semester hours of work (36 hours for students in astrophysics and solar physics, including 4 hours of graduate seminars) in courses numbered 5000 or above is required; however, the overall emphasis is on independent study and research.

**Language Requirement.** None.

**Examinations.** Students in the Ph.D. program are required to remove any deficiencies identified at the preliminary examination, to pass a two-part comprehensive examination composed of a written test on graduate course material and an oral exam on a research paper, and satisfactorily defend the thesis before a faculty committee.

**BIBLIOGRAPHY**

Several courses in bibliography are offered to students who wish to develop competence in the use of information tools for their study and career needs. See the course descriptions for further information.

**BIOLOGICAL SCIENCES**

The Division of Biological Sciences consists of the Department of Environmental, Population, and Organismic Biology and the Department of Molecular, Cellular, and Developmental Biology. Several programs leading to the B.A. degree with a major in biological sciences are available. Each department defines and administers its own programs separately.

**BIOLOGY—ENVIRONMENTAL, POPULATION, AND ORGANISMIC**

**Degrees.** B.A., M.A., Ph.D.

The following areas of knowledge are central to the undergraduate degree in environmental, population, and organismic biology:

- knowledge of the diversity of living organisms, cellular structures and processes, Mendelian, molecular, and population genetics, and ecological processes at the population, community, biome, and biosphere levels;
- knowledge of the sources of variation within and among populations, and the mechanisms of natural selection;
- knowledge of scientific methods and of the relationships among theory, experiment, data, data analysis, and general knowledge;
- awareness of the relevance of mathematics, chemistry, and physics to biology; and
- awareness of the development of biological thought.

In addition, students completing the degree in environmental, population, and organismic biology are expected to acquire:

- the ability to read, critically evaluate, and synthesize information from biological literature;
- the ability to make observations and generate hypotheses to account for observations;
- the ability to formulate experiments to test hypotheses and reach conclusions based on biological data; and
- the ability to articulate, in oral and written form, knowledge of biology, biological methods, and biological thought.

**Bachelor’s Degree Program**

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

**Major Requirements**

One of the following courses:

- EPOB 3240 Animal Behavior
- EPOB 3400 Microbiology
- EPOB 3630 Parasitology
- EPOB 3500 Embryology
- EPOB 3660 Developmental Biology Laboratory
- EPOB 3700 Comparative Animal Physiology
- EPOB 3720 Principles of Comparative Vertebrate Anatomy
- EPOB 4650 Invertebrate Zoology

Additional course work to total 38 hours.

**Ancillary Courses**

One year of college chemistry:

- CHEM 1111 General Chemistry I and CHEM 1071 Introduction to Organic and Biochemistry, or CHEM 1111 and CHEM 1131 General Chemistry I and 2 or CHEM 1151 and
CHEM 1171 Honors General Chemistry
1 and 2.................................9-12
One year of college physics:
PHYS 2010 and PHYS 2020 General
Physics 1 and 2 or PHYS 1110 and PHYS
1120 General Physics 1 and 2 and PHYS
1140 Experimental Physics 1................9-10
One semester of college calculus:
MATH 1300 Analytic Geometry and
Calculus 1 or MATH 1310 Calculus 1
and Combinatorics or APPM 1350
Calculus for Engineers 1....................4-5

Note: Certain courses taken in other
departments may be counted toward the
38 hours required for the EPOB major.
Such courses should have strong biological
content. No more than 12 semester hours
of courses taken in other departments may
be presented. (If MCDB 1050 and 1060
are used to fulfill the general biology
requirement, those 8 hours are counted as
part of the 12-hour limit for courses taken
outside the department.) A listing of
acceptable courses may be obtained from
the EPOB Office, Ramaley N122.

For transfer students, a minimum of 12
hours in EPOB courses on the Boulder
campus is required.

MINOR PROGRAM
The department also offers a minor pro-
gram. Details are available in the depart-
mental office.

Graduate Degree Programs
The Department of Environmental, Pop-
ulation, and Organismic Biology offers
degree programs leading to the M.A. and
Ph.D. in a wide range of areas of biological
inquiry. Offerings include evolution,
animal behavior, plant and animal physi-
ology, plant and animal systematics, ecol-
ygy, aquatic biology, population biology,
population genetics, neurobiology, micro-
biology, and behavioral genetics. Modern
laboratory facilities for graduate study are
in the Ramaley Biology building. In addi-
tion, the department has strong ties with
the Institute of Arctic and Alpine
Research (INSTAAR), the Institute of
Behavioral Genetics (IBG), and the Coop-
ervative Institute for Research in Environ-
mental Sciences (CIRES). INSTAAR
operates the Mountain Research Station,
an alpine field laboratory 25 miles from
campus. Graduate research support is
available in the form of fellowships, teach-
ing assistantships, and research assis-
tantships. The department has some small
endowments to help defray field research
expenses of graduate students.

GRADUATE ADMISSION
Admission materials may be obtained from
the departmental office. Completed applica-
tions are due in the departmental office
by January 15 for consideration for fall
semester admission. A complete applica-
tion includes a statement of intent, letters
of recommendation, original transcripts,
and GRE scores (both the general as well
as advanced biology). Applications for
spring semester admission are discouraged.
Students are required to have a bachelor's
degree in biology or an equivalent. Stu-
dents admitted without a sufficient back-
ground in chemistry, physics, or mathema-
tics are expected to make up those defi-
ciencies during their first year of graduate
study.

THE M.A. I PROGRAM
A master's degree with thesis is offered for
students interested in continuing training as
professional biologists after completing the
degree. For some students the M.A. I pro-
vides a basis for work on a Ph.D. at the Uni-
versity of Colorado or at another institution,
although the M.A. is not required for admi-
sion to the Ph.D. program. Prospective stu-
dents are urged to consult with the faculty
member who would be their advisor to see
whether application for the M.A. I or Ph.D.
program is appropriate. Applicants should
communicate with potential advisors before
January 15. Applications for the M.A. I pro-
gram are considered on a competitive basis;
the department has a policy of limiting the
number of admittances to those for whom
financial support is available. Twenty-four
hours of course work, including 6 hours of
thesis credit, are required for the degree. In
addition to a thesis based on original
research, students are required to take com-
prehensive examinations, as described below.

THE M.A. II PROGRAM
A nonthesis master's degree program is
offered for students interested in obtaining
a greater knowledge of biology but not
interested in degree work beyond the M.A.
This program is suitable for secondary
school teachers and others whose career
choices do not require a research thesis.
Applications for the M.A. II program are
considered on a noncompetitive basis; stu-
dents with records indicative of an ability
to do master's level course work are
accepted. A faculty sponsor is also required
before admission can be granted; applicants
are encouraged to communicate with
potential sponsors before January 15. In
addition to 26 hours of course work, the
student must complete 4 hours of indepen-
dent study or research leading to a paper to
be presented to the faculty sponsor. Finan-
cial support is not guaranteed for M.A. II
students.

COMPREHENSIVE EXAMINATION
Before completion of the master's degree,
students must take a written compre-
hesive examination (three half-days, MA II;
four half-days, M.A. I). One of these exam-
inations is in general biology. The others
may be chosen from biology of special taxa;
anatomy, morphology, and physiology;
genetics and evolution; taxonomy and sys-
tematics; animal behavior; and ecology.
Written exams are followed by an oral
exam (optional for the M.A. II program)
administered by the student's advisory
committee.

DOCTORAL PROGRAM
The Ph.D. is a research degree, involving
the production of a major piece of original
research (the dissertation). Most recipients
of the Ph.D. from EPO Biology go on to
teach in a university setting or to do
research in private or government laborato-
ries. Because the area of work chosen for
the Ph.D. is likely to determine the stu-
dent's career options, applicants are urged
to communicate directly with potential the-
esis advisors and to visit the department
before completing the application. Applica-
tions are considered on a competitive basis
and financial support in the form of fellow-
ships or assistantships is usually made avail-
able to Ph.D. students. Ph.D. students are
expected to form an advisory committee of
five faculty members (including one from
outside EPO Biology) soon after beginning
their studies. This committee aids the stu-
dent in designing a research program and in
making choices concerning course work. By
the end of the third semester of graduate
work, the Ph.D. student takes preliminary
examinations that are similar to the M.A. I
program comprehensive exam (see above).
If these are successfully completed, the
comprehensive examination should then be
scheduled as soon as possible. The compre-
hesive exam covers the student's area of
research and is based in large part on a pro-
posal for thesis research prepared by the
student. Upon the student's completion of
the dissertation a final examination is admin-
istered by the advisory committee.

The only specific courses required for the
Ph.D. are four 6000-level graduate semin-
ars. A total of 30 hours of course work
must be taken, although independent study
credit may be included in this total. Ph.D.
students are required to teach at least one
year, generally by serving as a departmental
teaching assistant.
BIOLOGY—MOLECULAR, CELLULAR, AND DEVELOPMENTAL

Degree ....................... B.A., M.A., Ph.D.
The following areas of knowledge are central to the undergraduate degree in molecular, cellular, and developmental biology:
• basic knowledge about the biological sciences in general, together with other supporting sciences including chemistry, mathematics, and physics;
• a detailed understanding of currently important aspects of cellular biology, molecular biology, biochemistry, genetics, and developmental biology, as well as an appreciation for the dynamic interplay among these fields in current research; and
• an understanding of the relationship of the specialty area to broader areas of science and to society in general, including ethical issues raised by current biological research and by the rapid growth of biotechnology as an important shaping force for the future.

In addition, students completing the degree in molecular, cellular, and developmental biology are expected to acquire:
• basic skills from laboratory courses that equip them to learn detailed laboratory procedures rapidly when the opportunity arises;
• a scientific vocabulary and an understanding of research methods that permits them to read articles from current journals, to extract pertinent information, and to judge the quality of the work described;
• the ability to evaluate a biological problem, to determine which aspects are understood, and to apply basic research methods and techniques to the unknown aspects; and
• the ability to communicate scientific concepts and analytical arguments clearly and concisely, both orally and in writing.

Bachelor's Degree Program

The major requirements for 1993-94 are undergoing revision. Students interested in MCD biology should consult with the departmental office in Porter Biosciences, Room 131, for further information.

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

Major Requirements Semester Hours
MCDB 1050 and 1060 Introduction to Molecular, Cellular, and Developmental Biology 1 and 2 and MCDB 1070 and 1080 Introduction to Molecular, Cellular, and Developmental Biology Laboratory 1 and 2, or EFOB 1210 and 1220 General Biology 1 and 2 and EFOB 1230 and 1240 General Biology Laboratory 1 and 2 ................................. 8
MCDB 3120 Cell Biology and 3140 Cell Biology Laboratory .................................. 5
MCDB 3400 Molecular Genetics .............................................. 4
MCDB 4630 Developmental Biology and MCDB 4660 Developmental Biology Laboratory .......................................................... 5
Upper-division electives in MCDB ........................................... 9
CHEM 1111 and 1131 General Chemistry 1 and 2 or CHEM 1151 and 1171 Honors General Chemistry 1 and 2 ............................. 10-12
CHEM 3311 and 3331 Organic Chemistry 1 and 2 and CHEM 3321 and 3341 Laboratory in Organic Chemistry 1 and 2 or CHEM 3351 and 3371 Organic Chemistry 1 and 2 for Chemistry Majors and CHEM 3361 and 3381 Laboratory in Organic Chemistry 1 and 2 for Chemistry Majors ........................................ 8-10
CHEM 4711 General Biochemistry 1 .................................... 3
PHYS 1110 and 1120 General Physics 1 and 2 and PHYS 1140 Experimental Physics or PHYS 1140 Experimental Physics or PHYS 1120 and 2020 General Physics 1 and 2, or PHYS 1110 and PHYS 2020 9-10
MATH 1300 Analytic Geometry and Calculus 1 ........................................... 5

Animal Use Policy. Biology is the science of life, and a major in it must include some hands-on experience with living organisms to be complete. Exercises involving the use of living animals or animal tissues are included, therefore, in MCD laboratory courses. Majors with objections on moral grounds may arrange to limit their participation in these exercises, although their educational experience is compromised by doing so.

Nonmajors may take MCD biology lecture courses without the accompanying laboratories. Laboratory courses in which living vertebrate animals or tissues are used are identified both in the course description section of this catalog and in the Registration Handbook and Schedule of Courses. For additional information, please contact the department.

Graduate Degree Programs

Opportunities for graduate study and original research are available in a variety of areas.

Molecular Biology. Gene regulation, virology, nucleic acid-protein interactions, bacteriophage control mechanisms, chromosome structure and function, chromosome replication, control of bacterial replication, and protein synthesis in cultured cells.

Cell Structure and Function. Cytoskeleton, biophysical cytology, flagellar and centriolar assembly, regulation of yeast mating type loci, genetic dissection of yeast spindle pole bodies, synthesis and secretion of glycoproteins and polysaccharides, and high-voltage electron microscopy.

Developmental Biology. Mechanisms and regulation of morphogenesis and cell growth, genetic control of development, molecular genetics of ras proteins and viral development in nematodes, molecular genetics of Drosophila neurobiology, developmental genetics of Drosophila and Caenorhabditis, and cellular aging.

Entrance Requirements and Prerequisites. The graduate program of the Department of Molecular, Cellular, and Developmental Biology is sufficiently flexible to accommodate students with a wide range of training. Students with bachelor's degrees in any of the biological, biochemical, or physical sciences are encouraged to apply. Background necessary for the program includes the equivalent of undergraduate courses in cell biology, developmental biology, genetics, organic chemistry, biochemistry, chemical thermodynamics, differential and integral calculus, and general physics. These requirements are intentionally stated in terms of areas of knowledge rather than as credits in specific courses. Students accepted with deficiencies may demonstrate mastery of the required areas by taking appropriate undergraduate courses, by passing advanced-standing examinations, or by successfully completing graduate-level courses that require the undergraduate courses as prerequisites.

Areas of Study. All students are expected to develop competence in five areas: biochemistry, including biochemical phenomena associated with cellular and molecular biology; genetics, including molecular mechanisms of gene function, regulation of gene activity, genetic control of development, and chromosome behavior; cell structure and function, including interaction of organelles, molecular organization, ultrastructure, biosynthesis, growth and reproduction; developmental systems and mechanisms, including types of developmental phenomena and the morphological and molecular mechanisms involved; and current research techniques of experimental biology.

DOCTORAL PROGRAM

Course of Study. The faculty of the department offers a variety of courses to help graduate students acquire knowledge in the various areas of study. Further, students are required to work in at least three different laboratories to broaden their education and to help them identify the field of greatest interest for their thesis work.
Examination Sequence. At the time of entrance an advisory committee examines each student’s background and interests and recommends courses for the first year in residence.

A preliminary evaluation is held at the end of the student’s second semester in residence to determine eligibility for continued graduate study and to identify areas of weakness.

The comprehensive examination, which is normally scheduled immediately after the fourth regular semester in residence, consists of two parts: a written research proposal and an oral examination designed to test the student’s ability to defend the proposal, the breadth and depth of knowledge in the field of concentration, and the ability to communicate information and engage in scientific discussion.

Language. The department does not have a language requirement.

Thesis. The principal elements in graduate training are defining a thesis problem, investigating this problem with a coherent piece of research that constitutes a substantial contribution to knowledge, and writing a report on this work in the form of a thesis submitted to a departmental committee for approval. After completion of the thesis, each candidate for the Ph.D. degree is required to take a final oral examination on the thesis and related topics, and to present a public seminar.

Teaching. Generally, each candidate for the Ph.D. degree does two semesters of apprentice teaching. This obligation is usually met during the student’s second or third year of graduate study.

Course Requirements. A minimum of 30 semester hours of courses numbered 5000 and above is required. Specific courses depend on the student’s background and field of specialization.

Master’s Program. In view of the strong research orientation of the fields involved, the department does not accept applications from students seeking the M.A. as a terminal degree. The master of arts degree, either with a thesis (plan I) or without (plan II), is awarded under special circumstances. Candidates must pass the preliminary examination and a comprehensive final examination. For plan I a thesis based on original research must be submitted. Final determination of whether a student follows plan I or plan II is made by the department.

BRITISH STUDIES

The Center for British Studies encourages students to develop programs that include a focus on British culture, history, and contemporary life from a variety of disciplinary perspectives. At the undergraduate level, the center offers a certificate in British studies for students who have taken 24 credit hours in British literature, history, and/or other fields. The center also assists undergraduates who want to study or do research in Britain.

For graduate students, it offers a series of interdisciplinary seminars, designed and planned by students, with a different focus each semester. These offer exposure to methods and sources outside the students’ own departments and provide preprofessional training in presenting research. The center has funds for acquiring microfilm collections for dissertation research, offers travel fellowships for graduate students, and awards writing prizes for both undergraduate and graduate papers.

CENTER FOR STUDIES OF ETHNICITY AND RACE IN AMERICA (CSERA)

The Center for Studies of Ethnicity and Race in America (CSERA) promotes interdisciplinary research and teaching in Afro-American studies, American Indian studies, Asian American studies, Chicano studies, and in cross-cultural and comparative race and ethnic studies. Afro-American studies is an established undergraduate degree program; Chicano Studies grants a certificate; American Indian and Asian American Studies are new programs being developed.

CSERA seeks to provide a cohesive framework for the study of ethnic and racial minorities and to promote research and critical examination of culture, history, and contemporary issues. The primary focus is on people of color and indigenous peoples of the United States, but the center also considers important the study of race and ethnic issues. Interaction across the Americas and global interaction are studied, as well as diasporas. Also of primary concern is recognition and incorporation of multicultural definitions and values in the university curriculum.

CSERA has a core faculty of its own, but also draws on the faculty resources of many departments in the College of Arts and Sciences, as well as the College of Architecture and Planning, the School of Education, the School of Journalism and Mass Communication, the School of Law, the College of Music, and the University Libraries.

Please contact the CSERA office for more information, (303) 492-8852.

Afro-American Studies

Degree ................................................. B.A.

The Afro-American Studies Program is multidisciplinary. Its primary purpose is to explore, analyze, and experience various aspects of African-American life, history, and culture. The program is enhanced by courses, seminars, and colloquia that focus on the African and Caribbean experience.

The following areas of knowledge are central to the undergraduate degree in Afro-American studies:

• knowledge of African origins, migrations, and contributions to the development of different civilizations;
• knowledge of the history of African Americans and their contribution to America;
• knowledge of African Americans in contemporary American society; and
• an understanding of Black identity.

In addition, students completing the degree in Afro-American studies are expected to acquire:

• the ability to conduct research on a topic or problem in the area of Afro-American studies;
• the ability to write a coherent and well-argued paper on such a topic or problem; and
• the ability to present the research in cogent, articulate oral argument.

DEGREE REQUIREMENTS

In addition to the general requirements of the College of Arts and Sciences, students must complete at least 33 semester hours in Afro-American studies. A grade of C (2.00) or better must be received in all courses taken toward the major. At least 18 hours must be upper-division courses (3000 and 4000 level). No more than 6 semester hours may be taken in independent study in Afro-American studies. No pass/fail courses may satisfy the 33-semester-hour minimum requirement. Specific courses listed below may be substituted by other appropriate courses on a case by case basis, if requested by the student in advance and in writing. Such substitutions must be approved in advance by the student’s faculty advisor in Afro-American studies and by the director of CSERA.

Required Afro-American Studies Courses

BLST 2000 Introduction to Afro-American Studies ............................................. 3
BLST 4500 Research Methods ................................................................. 3
BLST 4950 Senior Seminar ................................................................. 3
At least 9 semester hours of arts, literature, and culture courses (at least 3 hours must be in Afro-American literature). At least 9 semester hours of social sciences and history course work (at least 3 hours must be in Afro-American history).
At least 6 semester hours of electives in a special field or area. Electives should be selected with advisor approval. Students are encouraged to take one CSERA elective outside of Afro-American studies.

**American Indian Studies**

American Indian Studies comprises interdisciplinary courses spanning the humanities and social sciences. It emphasizes understanding the sociocultural, politico-economic, and legal relationships between North America’s indigenous peoples and the settler states that emerged on this continent since 1600. Courses analyze and compare the experiences of American Indians with other peoples of color in the United States. The program is designed to explore a comprehensive range of factors making up Native American life, history, and culture. It is enhanced by an assortment of seminars, colloquia, and cross-listed courses offered by other departments on campus. American Indian Studies is presently in its developmental stage.

**Asian American Studies**

Created in 1988, Asian-American Studies is committed to developing a comprehensive sequence of courses focusing on the Asian-American experience. It promotes responsible research and links the Asian-American studies curriculum and research to the needs and orientations of Asian-American communities.

These goals are approached via a system of substantive course work, guided research, fieldwork, and internships within the broader context of the Center for Studies of Ethnicity and Race in America. Asian-American studies is thus a multidisciplinary pursuit that is informed by both a domestic understanding of race relations and racial oppression, and also by viewing the latter in terms of global, international relations.

**Chicano Studies**

The Chicano Studies Program offers all students a conceptual means by which binationalism and biculturalism may be understood. It also offers a context for the analysis and appreciation of ethnoracial pluralism in the United States. The undergraduate program provides students majoring in related disciplines with an extensive knowledge and insight into the largest single language minority in the country. It also provides an academic context to study the Chicano experience in both an historic and a demographic/structural framework and includes studies in Chicano art, humanities, and social sciences. The program provides a viable methodology for research in this area.

**Study Abroad**

CSERA encourages students to participate in the study abroad programs offered through the Office of International Education. These programs give students a deeper understanding of the culture and attitudes of people of color in other parts of the world and their carryover into the United States. CU-Boulder is a member of the International Student Exchange Program that offers semester and full-year exchange programs with many institutions abroad, most notably in Africa, Asia, and Latin America. Programs of special interest include study in Mexico, Dominican Republic, Spain, Taiwan, and Japan. Further information appears in this catalog under International Education in the University Policies, Programs, and Services section.

**CENTRAL AND EAST EUROPEAN STUDIES**

**Bachelor's Degree Program**

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

**Major Requirements**  

<table>
<thead>
<tr>
<th>Semester Hours</th>
</tr>
</thead>
</table>
| Courses numbered 2000 or above dealing with problems of Central or Eastern Europe or the former Soviet Union are offered by departments in the College of Arts and Sciences; (e.g., economics, geography, history, political science, Germanic and Slavic languages, and sociology).................48

Demonstrated proficiency in German, Russian, Polish, Serbo-Croatian, or any other Central European language

Note: The specific courses that may be counted to meet these requirements are to be determined by the advising committee for the B. A. in Central and East European studies and the dean of the College of Arts and Sciences.

**CHEMISTRY AND BIOCHEMISTRY**

**Degres**  

|  
| **B.A., M.S., Ph.D.**

The following areas of knowledge are central to the undergraduate degrees in chemistry and biochemistry:

- knowledge of the basic principles of chemistry—atomic and molecular theory, reactivities and properties of chemical substances, and the states of matter;
- knowledge of the basic subfields of chemistry—organic, physical, analytical, and inorganic chemistry (and biochemistry for biochemistry majors);
- knowledge of mathematics sufficient to facilitate the understanding and derivation of fundamental relationships and to analyze and manipulate experimental data;
- knowledge of the basic principles of physics (and for biochemistry majors, knowledge of biology and genetics); and
- knowledge of safe chemical practices, including waste handling and safety equipment.

In addition, students completing the degree in chemistry or biochemistry are expected to acquire:

- the ability to read, evaluate, and interpret information on a numerical, chemical, and general scientific level;
- the ability to assemble experimental chemical apparatus, to design experiments, and to use appropriate apparatus to measure chemical composition and properties (for biochemistry students, this includes properties of proteins, nucleic acids, and other biochemical intermediates); and
• the ability to communicate results of scientific inquiries verbally and in writing.

**Bachelor's Degree Program**

A student can earn a bachelor's degree in either chemistry or biochemistry. For either option, students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

**Major Requirements**

</tbody>
</table>

All students, but especially students intending to enter graduate school in chemistry, should take advanced courses. Recommended courses are the following: CHEM 4901, 4011 or 5011, 4711, 4731, 5161 or 5711 or 5181, or a third semester of physical chemistry.

**Biochemistry**

CHEM 1111 and 1131 General Chemistry 1 and 2 or CHEM 1151 and 1171 Honors General Chemistry 1 and 2 (Honors CHEM 1151 and 1171 are recommended for students with advanced high school training in mathematics and physics) | 10-12 |
| CHEM 3351 or 3371 and CHEM 3371 or 3331 Organic Chemistry 1 and 2 | 6 |
| CHEM 3321 and 3341 Laboratory in Organic Chemistry 1 and 2 | 2 |
| CHEM 4411 or 4511 and CHEM 4431 or 4531 Physical Chemistry 1 and 2 | 6 |
| CHEM 4711 and 4731 General Biochemistry 1 and 2 | 6 |
| CHEM 4761 Biochemistry Laboratory | 4 |
| PHYS 1110 and 1120 General Physics 1 and 2 | 8 |
| PHYS 1140 Experimental Physics | 1 |
| MATH 1300, 2300, and 2400 Analytical Geometry and Calculus 1, 2, and 3 | 14 |
| MCD B1050 and 1060 Introduction to Molecular, Cellular, and Developmental Biology 1 and 2 and MCD B1070 and 1080 Introduction to Molecular, Cellular, and Developmental Biology Laboratory 1 and 2 or EOPB 1210 and 1220 General Biology 1 and 2 and EPO B1230 and 1240 General Biology Laboratory 1 and 2 | 8 |
| MCD B3400 Molecular Genetics | 4 |

All biochemistry majors, and especially students intending to enter graduate school in the biological sciences, should take additional advanced courses. Especially recommended are the following: CHEM 4901, 4181, and 4011, and courses in the biological sciences, such as MCD B3120, 4650, 4720, and 4410, and EPO B3200 and 3700.

**MINOR PROGRAM**

The Department of Chemistry and Biochemistry offers a minor in both chemistry and biochemistry. A list of the requirements for each is available in the undergraduate office.

**AMERICAN CHEMICAL SOCIETY CERTIFICATION**

The American Chemical Society maintains a certification program in which a student graduating with a specified minimum program is certified to the society upon graduation. To be certified, a student must satisfy requirements in addition to the minimum for graduation. A list of these requirements may be obtained from the undergraduate Chemistry and Biochemistry office.

**CHEMISTRY HONORS PROGRAM**

Opportunity is provided for qualified chemistry and biochemistry majors to participate in the chemistry honors program and graduate with honors (cum laude, magna cum laude, or summa cum laude) in chemistry. Students interested in the honors program should contact the departmental honors advisor during their junior year.

Transfer students who plan to take a chemistry or biochemistry major must complete at the Boulder campus a minimum of 9 credit hours of upper-division work covering at least two of the subdisciplines: organic, physical, analytical, inorganic, and biochemistry.

A more detailed listing of the bachelor's degree program, together with advising information and alternate course options, is available at the undergraduate office in the Department of Chemistry and Biochemistry.

**Graduate Degree Programs**

Students wishing to pursue graduate work in chemistry or biochemistry leading to candidacy for an advanced degree should read carefully requirements for advanced degrees in the Graduate School section. For information on the doctoral program in chemical physics offered jointly with the Department of Physics, see Chemical Physics under Interdepartmental Programs in the Graduate School section of this catalog. Following are some of the special departmental requirements. Copies of more detailed rules are distributed to graduate students.

**Prerequisites.** An undergraduate major in chemistry, biochemistry, or a related field is desirable since entering graduate students are required to take examinations and complete selected course work covering the major fields of chemistry and biochemistry. The GRE general test and advanced subject tests in either chemistry or biochemistry, or cellular and molecular biology, is required for admission and for fellowship competition. Some or all of these tests may be waived under special circumstances.

**MASTER'S DEGREE**

**Language.** The department does not require foreign language proficiency for the master's degree.

**Examinations.** Administration of preliminary examinations varies, depending on students' entering field. Candidates must pass a master's final oral examination at the time they complete their work.

**Course Requirements.** There are two methods of obtaining a master's degree from the Department of Chemistry and Biochemistry. Plan I requires 24 credit hours, including 15 credit hours of formal course work, 9 credit hours in research courses, the completion of a research investigation, and the presentation of a thesis. Plan II requires 30 credit hours including 21 credit hours of formal course work plus 9 credit hours of research, and presentation of a research report, but no thesis; plan II is available only with departmental approval.

**DOCTORAL DEGREE**

**Language.** The department does not require foreign language proficiency for the Ph.D. degree.

**Examinations.** Administration of preliminary examinations varies, depending on students' entering field. These examinations are used in an advisory capacity. Course requirements are determined by level of preparation for graduate school, as assessed by departmental graduate advisors. Ph.D. students must pass a comprehensive examination consisting of a series of written cumulative exams and an oral examination. Students entering with a master's degree start the comprehensive examinations in their second semester; others start them in their third semester. Candidates must write a research proposal during their studies, complete a research investigation and present a thesis, and pass a Ph.D. final oral examination at the time they complete their work.
CHICANO STUDIES

See Center for Studies of Ethnicity and Race in America (CSERA), Chicano Studies.

CLASSICS

Degree .................. B.A., M.A., Ph.D.

Upon consultation with the undergraduate advisor, the bachelor's degree in classics is tailored to the student's interests in the field. Major programs can be arranged with a concentration in either Latin or Greek or a combination of the two, a broadly based program in classical antiquities (mythology, literature, philosophy, religion, art, archaeology, and history), or classics and ancient history. Prospective majors should consult with the undergraduate advisor and review the departmental major list.

The following areas of knowledge are central to the undergraduate degree in classics:

• knowledge of ancient Greek or Latin sufficient to allow the reading and understanding of larger works of literature written in that language;
• comprehensive knowledge of the history of Greek and Roman literature, the development of the major genres, and of important works of literature, read in the original language and in translation;
• an outline knowledge of the history of the ancient world, important historical problems, and major ancient historians, read in the original language and in translation;
• general knowledge of ancient art, religion, and philosophy as the foundation and model for western civilization; and
• knowledge of the identification system for classical items, including grammatical and rhetorical categories and descriptions and Latin tags.

In addition, students completing the degree in classics are expected to acquire:

• the ability to read, understand, and interpret written documents and works of literature with an eye to genre, structure, historical context, and authorial intent;
• the ability to communicate in spoken and written form with adequate complexity and clarity for the relevant audience; and
• the ability to read and think critically.

Bachelor's Degree Program

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

Major Requirements  Semester Hours

Track I: Greek and/or Latin
Greek and/or Latin .................. 36

N.B. The first year of either ancient language (Greek or Latin) does not count toward the major.

Electives (general classics and honors courses dealing with the ancient world, ancient history, classical archaeology, or ancient philosophy) .................. 6

Track II: General Classics

CLA 1100 Greek Mythology and CLAS 3610 From Paganism to Christianity .................. 6

CLA 1110 Masterpieces of Greek Literature in Translation and CLAS 1120 Masterpieces of Roman Literature in Translation or two 4000-level courses in translation of literature .................. 6

Classical archaeology at 4000 level .................. 6

Maximum of 6 credit hours may be substituted for required general classics courses (with permission of undergraduate advisor)

Electives (from general classics, Greek or Latin, or from honors courses dealing with the ancient world) .................. 6

Ancient history (selected from the following history courses: HIST 3011; CLAS 4041; CLAS or HIST 1051, 1061, 4021, 4031, 4071, 4081, or 4091. CLAS 4051 and 4761 may be substituted for any of the history courses) .................. 12

CLA 2124 and one higher course, or CLAS 3123 and one higher course .......... 6

Track III: Classics and Ancient History

Ancient history (courses may be selected from the following: CLAS or HIST 1051, 1061, 4021, 4031, 4071, 4081, 4091; CLAS 4041, 4051, 4761) .................. 18

General classics courses with substantial historical content may be selected from the following: CLAS 1110, 1120, 2100, 2110, 4049, 4059. With permission of the undergraduate advisor, a candidate may offer up to a maximum of 6 credit hours in substitution for general classics courses .................. 18

CLA 2124 and one higher course (Latin) or CLAS 3123 and one higher course (Greek) .... 6

Graduate Degree Programs

MASTER'S DEGREE

Candidates may choose to emphasize Greek, Latin, classical antiquity, or the teaching of Latin.

It is expected that students opting for the teaching of Latin either have achieved accreditation at the secondary level or are planning to do so through the School of Education. The M.A. degree alone does not satisfy the state requirements for certification.

Language Requirement. The department requires a reading knowledge of one modern language for those students emphasizing the study of Greek or Latin. A student concentrating on one of the classical languages must take at least one graduate-level course in the other classical language.

Degree Requirements. Candidates for the M.A. degree in Latin or Greek are required to take written examinations in the fields of translation (Greek or Latin) and literature (Greek or Latin).

Candidates for the M.A. degree with emphasis on classical antiquity are required to complete at least two graduate-level courses in Greek and/or Latin and must take a written examination in three of the following fields: history, art and archaeology, religion and mythology, philosophy and political theory, and Greek or Latin translation.

Candidates for the M.A. plan I (24 hours of course work plus 4 hours of thesis) take an oral comprehensive examination in defense of the thesis. Candidates for the M.A. plan II (30 hours without thesis) must have departmental approval and take an oral comprehensive examination covering their course work.

Candidates for the M.A. degree with emphasis on the teaching of Latin take a written examination in both Latin translation and Latin literature and an oral comprehensive examination on teaching methods. Thirty hours of course work, including one Latin workshop and a special project, are required. Plan I is not offered for the M.A. degree with emphasis on teaching.

DOCTORAL DEGREE

Candidates may choose to concentrate in either classics or in classics with historical emphasis. For those selecting classics or classics with historical emphasis, the following requirements are:

1. A reading knowledge of two modern foreign languages, one must be German and the other must be approved by the department.

2. Successful completion of at least four graduate seminars.

3. One course each in ancient history, classical archaeology, Greek prose composition, Latin prose composition, and either paleography or epigraphy.

4. The candidate is tested in Greek and Latin languages (translation tests) and must write examinations on a major classical author and a special field. There is an oral comprehensive examination in which the student is expected to demonstrate overall factual knowledge of Greek and Latin literature (with historical emphasis, as appropriate).

5. The candidate must write a Ph.D. dissertation and complete a final oral examination in defense of the dissertation.

COMMUNICATION

Degrees .................. B.A., M.A., Ph.D.

The bachelor of arts degree in communication provides theoretical work from both humanistic and scientific perspectives and practical work to improve communicative performance in various kinds of situations.
The following areas of knowledge are central to the undergraduate degree in communication:
- general understanding of the history and development of communication as an object of scholarly study, including both the humanistic tradition and the scientific tradition;
- understanding of the basic contexts in which communication is enacted (e.g., interpersonal, small group, and organizational and public contexts);
- understanding of the various functions of communication within these contexts;
- understanding of the characteristics of both verbal and nonverbal modes of human communication;
- familiarity with the basic methods of investigating questions about problems in communication; and
- understanding of the ethical issues and responsibilities of communication practice, particularly the role of debate and discussion in a free society.

In addition, students completing the degree in communication are expected to acquire:
- the ability to express ideas in an informed, coherent, and effective manner, particularly the ability to articulate and develop a sustained argument, both orally and in writing;
- the ability to analyze, criticize, evaluate, and reflect upon messages and interactions in a variety of practical contexts, both orally and in writing; and
- the ability to adapt messages and to negotiate interactions responsibly in diverse and changing situations.

Bachelor's Degree Program

Students must fulfill the following requirements in addition to the College of Arts and Sciences general education requirements.

**Major Requirements**  

**Semester Hours**

Majors must present a minimum of 30 hours of course work in communication.

COMM 1000 Interaction Skills .................. 3
COMM 1010 Public Speaking .................. 3
COMM 2200 Principles and Practices of Argument .............. 3
COMM 4800 Current Issues in Communication and Society .......... 3

Two of the following:
- COMM 2200 Interpersonal Communication .............. 3
- COMM 2240 Organizational Communication .............. 3
- COMM 2300 Communication and Society .............. 3

One of the following:
- COMM 3500 Human Communication Theory .................. 3
- COMM 3600 Rhetorical Foundations of Communication .................. 3

Three of the following:
- COMM 4000 Special Topics .................. 3
- COMM 4510 Senior Seminar: Interpersonal Communication .................. 3
- COMM 4520 Senior Seminar: Organizational Communication .................. 3
- COMM 4530 Senior Seminar: Communication Codes .................. 3
- COMM 4540 Senior Seminar: Rhetoric .................. 3
- COMM 4550 Senior Seminar: Functions of Communication .................. 3

The Department of Communication encourages its majors to take related courses in other departments as well as other colleges and schools. Relevant work may be found in business and administration (courses may be available during the summer only), communication disorders and speech science, English, journalism and mass communication, linguistics, political science, philosophy, psychology, sociology, and theatre and dance.

Students who wish to major in communication should visit the department, where they are given an updated list of major requirements.

Graduate Degree Program

The graduate program admits a few students who have high promise of completing the doctorate. Interested students should read requirements for advanced degrees in the Graduate School section and should call or write the department for current admission requirements and curriculum information.

**COMMUNICATION DISORDERS AND SPEECH SCIENCE (CDSS)**

**Degrees**  

B.A., M.A., Ph.D.

The bachelor of arts degree with a major in communication disorders and speech science provides a broad general education, develops concepts basic to human communication and normal language processes, and provides an understanding of disorders of speech, hearing, and language. This material serves as necessary background for entrance into professional training at the graduate level.

The following areas of knowledge are central to the undergraduate degree in communication disorders and speech science:

- a general understanding of the role of the professional speech/language pathologist and audiologist, including an understanding of the history and development of the profession, an understanding of the scientific traditions of the discipline, and an understanding of the ethical issues in providing service to communicatively disordered individuals;
- an understanding of the anatomy of the speech and hearing mechanisms, as well as the processes of speech production, transmission, and reception;
- an understanding of the development of language;
- an understanding of the etiologies, manifestations, and treatments of the speech/language/learning and hearing disorders encountered in the profession; and
- familiarity with scientific methods used in evaluating and investigating speech/language/learning and hearing disorders.

In addition, students completing the degree in communication disorders and speech science are expected to acquire:

- the ability to express themselves effectively both orally and in written scientific and clinical discipline-specific reports;
- the ability to critically evaluate literature in the discipline; and
- the ability to analyze the acoustic output of the speech production process auditorily and/or instrumentally.

**Bachelor's Degree Program**

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

**Major Requirements**  

Majors must present a minimum of 36 semester hours of course work as listed in the schedule below.

**Sophomore Year**

Fall or Spring
- CDSS 2500 Voice and Diction .................. 3
- CDSS 3106 General Phonetics .................. 3

Spring
- EPOB 3420 Introduction to Human Anatomy .................. 5
- CDSS 4560 Language Development .................. 3

**Junior Year**

Spring
- CDSS 3006 Introduction to Speech and Hearing Science .................. 3
- CDSS 3120 Anatomy and Physiology of Speech and Hearing Mechanisms .................. 4

**Senior Year**

Fall
- CDSS 4502 Speech Disorders 1 .................. 4
- CDSS 4704 Audiology 1 .................. 3
- CDSS 4918 Observation and Cotherapy .................. 1

Spring
- CDSS 4512 Speech Disorders 2 .................. 4
- CDSS 4714 Audiology 2 .................. 3
- CDSS 4918 Observation and Cotherapy (Only one semester of CDSS 4918 is required and may be taken in either the fall or spring)
Graduate Degree Programs
The graduate curriculum in communication disorders and speech science leads to either a master’s or a doctoral degree. The programs in speech-language pathology and audiology are accredited by the American Speech-Language-Hearing Association (ASHA) and the Colorado State Department of Education.

Prospective students should read requirements for advanced degrees in the Graduate School section of this catalog and request additional information from this department.

MASTER’S DEGREE
The master’s program in communication disorders emphasizes clinical training and experiences. The program leads to certification by ASHA and the Colorado State Department of Education in speech-language pathology and/or audiology. Students with an undergraduate degree in speech-language pathology and audiology can expect to complete the program in two calendar years. Those without such a background are required to make up undergraduate deficiencies, which normally require at least an additional 16 to 20 semester hours of courses in communication disorders. Students must meet standards for both academic and clinical competence, as well as professional conduct. Full-time graduate study is required. Students not seeking clinical certification may place major emphasis on speech-hearing science.

DOCTORAL DEGREE
The doctoral program demands demonstrated expertise beyond the academic knowledge and clinical skills required for clinical certification. Supervisory, administrative, instructional, and research activities are provided to acquaint the student with problems and concepts at a higher level of activity and responsibility.

Wide latitude prevails in planning individual programs. It is expected that students have some professional experience before entering the program, and that they have specific academic or professional goals in mind. Ph.D. candidates must take a four-course sequence in statistics and computer science. Beyond this, student degree plans are individually prepared through the joint efforts of the student and an advisory committee.

COMPARATIVE LITERATURE

Degrees: M.A., Ph.D.

Graduate Degree Programs
The master’s and doctoral degree programs in comparative literature are offered through the Graduate School. Students wishing to pursue graduate work in comparative literature leading to candidacy for an advanced degree should read the information provided in the Graduate School section of this catalog and the guidelines for the M.A. and Ph.D. degrees in this field. These guidelines contain the most recent information on program requirements and are available from the Comparative Literature Program, Campus Box 358.

All entering students must submit GRE scores, a sample course paper, and a statement describing intellectual goals and language preparation. Normally, entering students have majored in a national literature; applicants who have majored in a related field or those who have had substantial training in literature may also apply.

MASTER’S DEGREE
Prerequisites. Upon entrance to the program, students must have pursued one foreign language to the point of being able to take courses at the 4000 level and have completed a second-year college course in a second foreign language.

Requirements. Students take the Prospective in Comparative Literature (COML 5000) and Introduction to Literary Theory (COML 5610) in their first two semesters. Half the required credit hours are in courses offered by the program in comparative literature. At least 9 hours are in courses numbered 4000 or above in the department of the student’s primary literature, and at least 3 hours are in the department of the secondary literature (6 hours if the primary literature is English).

Examinations and Thesis. There are two options for the M.A. degree. Students may elect to write a thesis, in which case they must take a minimum of 24 hours of course work and 6 hours of M.A. thesis credit. Students intending to enter the Ph.D. program must choose this option. Students who do not intend to proceed to the Ph.D. may elect to take 30 hours of course work. Upon completion of the course requirements for the M.A., all students must take a comprehensive exam.

DOCTORAL DEGREE
Prerequisites. Prospective candidates should have an M.A. degree in comparative literature, in a national literature (which may be English), or in a cognate discipline (e.g., philosophy). Students should be qualified to take graduate courses in two foreign languages and should have begun study of a third. One of these three should be either a classical or subject to the director’s approval, a modern non-European language.

Requirements. Students take the Prospective in Comparative Literature (COML 5000) and Introduction to Literary Theory (COML 5610) in their first two semesters. Students also take the Colloquium in Comparative Literature (COML 6970), normally in their second or third year. Students complete a minimum of 30 hours of graduate course work. Half the required credit hours are in courses offered by the Comparative Literature Program. At least 9 hours are in graduate courses in the department of the primary literature, and 6 hours are in the department of the secondary literature. Students must satisfy their language requirements by the beginning of their third semester of study.

Examinations and Thesis. All Ph.D. candidates take a comprehensive examination and a final examination. The final examination is an oral defense of the dissertation, and is conducted by the student’s advisory committee after all other requirements for the Ph.D. have been completed.

DISTRIBUTED STUDIES PROGRAM

Degree: B.A.

Students working toward the B.A. degree may elect a two- or three-area major in the distributed studies program. The areas that may be used in the program are limited to those in which a departmental major for the B.A. is offered. Astrophysical, planetary, and atmospheric sciences is acceptable only as a secondary area.

Students wishing to pursue a two-area major must complete 30 hours of course work in each department; 15 hours in each department must be upper-division course work. In each department, students must have a 2.00 grade point average for all work attempted in the department, and at least 30 hours of C-grade or better, including the 15 hours of upper-division course work, in each department.

In a two-area major, each department must approve the student’s program, and therefore either department may deny the student’s proposal.

Students pursuing a three-area major must designate one area as primary and
the other two as secondary. In the primary area, 30 hours of work including 15 hours of upper-division work must be completed. A grade point average of 2.00 in all course work attempted in the primary area and at least 30 hours of C- grade or better, including the 15 hours of upper-division work, are required.

In the secondary areas students must complete 15 hours in each of the departments, including 8 hours of upper-division work in each department. A grade point average of 2.00 is required in all course work attempted in each of the secondary areas, as well as 15 hours of C- grade or better, including the 8 hours of upper-division work, in each department.

No first-year course in a foreign language or English language (composition) may be used to fulfill the requirements of the distributed studies major.

Students applying for a second B.A. degree may not use courses from a completed major program, either from CU-Boulder or another college or university, in a distributed studies major.

ECONOMICS

Degrees: B.A., M.A., Ph.D.

The following areas of knowledge are central to the undergraduate degree in economics:
- knowledge of the necessary conditions for efficiency in free market production and exchange;
- knowledge of contemporary theories concerning economic growth, inflation, unemployment, and distribution of income;
- knowledge of the concepts, methodologies, and information sources used in a few of the specialized fields of economics;
- acquaintance with the descriptive statistics commonly used by economists; and
- acquaintance with the institutional characteristics of the U.S. economy, and awareness of how these differ from those in some other economies.

In addition, students completing the degree in economics are expected to acquire:
- the ability to apply the tools of microeconomic theory to reach sound conclusions for simple economic problems;
- the ability to follow arguments concerning macroeconomic theory, to distinguish between sound and fallacious reasoning, and to understand how differences in policy prescription may arise;
- the ability to use library resources to obtain and interpret commonly used statistical series and other economic factual material;
- the ability to use descriptive statistics, to perform statistical analysis such as multiple regression, and to understand similar analyses performed by others; and
- the ability to communicate economic reasoning in writing, to understand similar writing by others, and to appreciate the diversity of views that may reasonably exist about economic problems.

Bachelor's Degree Program

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

Major Requirements

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 2010 and 2020 Principles of Microeconomics and Macroeconomics</td>
<td>8</td>

</tbody>
</table>

Note: Transfer students majoring in economics must complete at least 12 semester hours of upper-division economics courses at CU-Boulder.

MINOR PROGRAM

The department also offers a minor in economics. Details are available in the departmental office.

Graduate Degree Programs

MASTER'S DEGREE

1. Admission Requirements. An applicant for admission as a regular degree student must:
   a. Hold a baccalaureate degree from a college or university of recognized standing, or have done work equivalent to that required for such a degree and equivalent to the degree given at this University. The undergraduate GPA must be at least 2.75 (2.00 = C).
   b. Have at least 16 semester credit hours in economics.
   c. Submit Graduate Record Examination scores for aptitude. For foreign applicants, a TOEFL score of 525 or above is also required for admission to the graduate program.
   d. Arrange for the submission of four letters of recommendation.

   Students who do not meet the requirements for admission as regular degree students may be recommended for provisional degree status. (See the Admission and Graduate School sections of this catalog for further information.)

2. Required Courses. (Grade of B- or better required in each course):
   a. Theory: ECON 6070 Applied Microeconomic Theory and ECON 6080 Applied Macroeconomic Theory; or ECON 7010 and 7020.
   b. Quantitative Methods: ECON 6818 Econometric Methods and Applications or ECON 7818 Seminar: Intermediate Econometrics.

   The graduate advisor may permit substitution of courses taken outside the department for the required courses, if, in the advisor's judgment, at least the same body of material was covered at an equivalent level. However, when such substitution is for ECON 6070, 6080, and/or ECON 6818, the student must take and pass the final examinations in ECON 6070, 6080, and/or ECON 6818 with grades of B- or better to effect the substitution. A course syllabus is prepared for each of these required courses.

   M.A. candidates are required to attempt the courses or examinations in theory and quantitative methods within two academic years and have passed them within two and one-half academic years from the date of enrollment in the graduate program. Passing the Ph.D. preliminary examinations in theory and quantitative methods also satisfies this M.A. requirement.

   For any student entering the Ph.D. program from the master's program, the preliminary examinations for the Ph.D. must be attempted within three academic years and passed within three and one-half years from the date the student enrolls in the graduate program. The graduate review committee is empowered to make exceptions for regular and provisional students in M.A. and Ph.D. programs.

3. Credit Hours.

   Plan I
   a. Minimum of 24 semester hours of graduate work, including a thesis of 4 semester hours.
   b. Minimum of 18 semester hours, exclusive of thesis, which must be in courses at the 6000 level or above.
   c. A B- or better average in all work presented for degree.

   Plan II
   a. Minimum of 30 semester hours of graduate work;
b. Minimum of 21 semester hours, which must be in courses at the 6000 level or above;
c. A B- or better average in all work presented for the degree;
d. No thesis requirement.
4. Comprehensive Final Examination. Each candidate for a master's degree is required to take a comprehensive final examination after the other requirements for the degree have been completed. This examination may be given near the end of the candidate's last semester of residence while the candidate is still taking courses, provided that satisfactory progress is made.
   a. Plan I candidates must take an oral examination covering the thesis and other work presented for the degree. (See rules of the Graduate School for details concerning coverage of work not done in formal courses and in seminars in economics.)
   b. Plan II candidates must take written examinations in two fields. In each of these fields offered, the candidate must have taken a minimum of 6 semester hours of course credit, of which at least 3 must be at the 7000 level or above. If the two fields are in economics, the course credits for one of them may be transferred credits from another university. One of the two fields may be in a discipline other than economics if the course work for both fields has been taken at the University of Colorado. One of the fields may be individually structured to meet a particular need, provided the candidate's plan is approved by the department's director of graduate studies. Passing the Ph.D. preliminary examinations in microeconomic and macroeconomic theory is accepted as passing an M.A. field exam in economic theory. Passing the Ph.D. preliminary examination in quantitative methods is accepted as passing an M.A. field exam in quantitative economics. Passing a Ph.D. comprehensive examination in a field is accepted as passing an M.A. exam in that field.
   One of the fields may be individually structured to meet a particular need, provided the candidate's plan is approved by the student's advisor and the campus departmental graduate advisor. An individually structured field may be based wholly or partly upon the candidate's work in an independent study course (ECON 6909).

DOCTORAL DEGREE
1. Admission Requirements. An applicant for admission as a regular degree student must:
   a. Hold a baccalaureate degree from a college or university of recognized standing, or have done work equivalent to that required for a degree from this University. For those applicants who do not have a master's degree in economics, the undergraduate grade point average must be at least 2.75 (2.00 = C).
   b. Have completed intermediate microeconomic and macroeconomic theory courses, introductory calculus, and introductory statistics.
   c. Submit Graduate Record Examination scores for aptitude. For foreign applicants, a TOEFL score of 525 or above is also required for admission to the graduate program.
   d. Arrange for the submission of four letters of recommendation.
   It is not necessary to have an M.A. degree to be admitted to the Ph.D. program; qualified applicants may be admitted directly to the Ph.D. program and may obtain the M.A. degree while working toward the Ph.D.
   Application deadlines for foreign students are December 1 for summer and fall terms and October 15 for spring term. There is no deadline for U.S. applicants; however, anyone who wishes to be considered for an assistantship should apply by February 1.
2. Course Requirements.
   a. Core courses in microeconomic theory (ECON 7010, 7030), macroeconomic theory (ECON 7020, 7040), and quantitative economic methods (ECON 7808, 7818) must be completed with a grade of B- or better. Transferred courses must be approved, except for courses from CU-Denver, which are automatically approved. At least one-half of the core requirements must be fulfilled on the Boulder campus.
   b. After entry into the Ph.D. program, all remaining core requirements must be taken on the Boulder campus.
   c. Not more than 12 hours of credit (exclusive of dissertation credit) from a single faculty member may be counted toward Ph.D. requirements.
   d. Students must apply to the curriculum committee in order to take independent study in the Ph.D. program. Not more than three hours of independent study taken from a single faculty member may be counted toward a degree. Not more than three hours of independent study may be counted toward field course requirements. Independent study to count toward a field course requirement must be approved by the curriculum committee in advance.
   No more than six hours of independent study may be counted toward the Ph.D. requirements.
   e. Before admission to candidacy, a minimum of 12 hours of course work must be completed each 12 months by all full-time students in the Ph.D. program. Students who plan to register for fewer than 12 hours must obtain permission for part-time status from the graduate advisor.
3. Preliminary Examinations.
   a. Students must pass written preliminary examinations covering microeconomic theory, macroeconomic theory, and quantitative economic methods. Microeconomic theory and macroeconomic theory preliminary examinations must be taken in one examination period.
   b. Preliminary examinations are given regularly in August and January.
   c. Normally, students are expected to attempt at least part of the preliminary examinations by the beginning of the second year.
   d. An examination attempted and failed must be taken again and passed in the next examination period.
   e. Students must pass all preliminary examinations within two and one-half years of beginning the Ph.D. program.
   f. The graduate advisor is empowered to make scheduling exceptions for part-time students in the Ph.D. program.
   a. Students must pass written examinations in each of two or three fields of specialization.
   b. These examinations must be attempted within four years of entry into the Ph.D. program.
   c. These examinations cannot be attempted before satisfying field course requirements with grades of B- or better. Field course work may be taken at any University of Colorado campus.
   d. Comprehensive examinations are given regularly in August and January. In case of failure in one or more fields, the unsatisfactory examination may be attempted once more during a regularly scheduled comprehensive examination.
   e. A minimum of 6 semester hours of course work at the 7000 level or above is required in each field of specialization.
   f. In place of one of the standard fields students may offer a combination field when the material in certain courses spans two or more areas or when courses from different areas are complementary in meeting the specialization objectives of the student. Courses may be included from outside the economics department on approval of the curriculum committee. Students offering a special field are responsible for obtaining the written agreement of at least two faculty members who are involved in evaluating their competence in the field.
Students who present two fields (other than history) of economic thought for comprehensive examinations must complete in lieu of a third field three elective courses with a grade of B- or better. Students who present history of thought (ECON 7000, 8000) as one of their fields of specialization must complete four elective courses with a grade of B- or better. Elective courses must include courses from at least two fields other than the two presented for comprehensive examinations and must include at least two formal economics courses at the 7000 level or above at any campus of the University of Colorado. (The term "formal course" as used here includes seminars but excludes independent study.)

See the Graduate School section of this catalog concerning registration and residency requirements and time limits for completing the Ph.D. degree.

ENGLISH

Degrees: B.A., M.A., Ph.D.

The following areas of knowledge are central to the undergraduate degree in English:

- knowledge of canonical and noncanonical works of English and American literature;
- awareness of the general outlines of the history of British and American literature;
- awareness of literary theories, including knowledge of recent theoretical developments;
- awareness of the social and historical contexts in which the traditions developed.

In addition, students completing the degree in English are expected to acquire:

- the ability to write in different poetic modes and styles;
- the ability to write in various fictive styles; and
- the ability to evaluate other students' written work.

Bachelor's Degree Programs

Expository writing courses (freshman composition) do not apply toward the major. English courses taken on a pass/fail basis do not fulfill major requirements. Transfer students must take a minimum of 18 hours in English at the University of Colorado and must have English courses taken at other colleges evaluated by the Department of English. Courses taken in other departments do not count in the English major.

Students must complete the general requirements of the College of Arts and Sciences and one of the two programs listed below.

LITERATURE

A minimum of 36 credit hours must be earned in the Department of English, 24 of which must be upper division.

Note: Six hours must be taken in courses dealing with pre-1790 subject matter (3 hours of which must be pre-1500 subject matter), and 6 hours must be taken in courses dealing with post-1790 subject matter. Transfer students may be required to take any courses except those in the backgrounds of British and American literature (see II below), which are not designed to fulfill the historical component of the major.

Major Requirements

<table>

Undergraduate English

AWARDS AND PRIZES

The Katherine Lamont Scholarship. The Lamont scholarship is a $300 annual award to a continuing English major in recognition of sustained excellence and exceptional scholarly performance in the major.

The Harold D. Kelling Essay Prize. The Kelling prize is a $100 cash award for the best essay on literature submitted by an undergraduate currently enrolled in the University. The essay must have been written for an English class and should be sub-
mitted to the English department before April 15.

The Jovanovich Imaginative Writing Prize. The Jovanovich prize is a $500 annual award for excellence in poetry, fiction, playwriting, or nature writing. Information is available in the creative writing office.

Graduate Degree Programs

ADMISSION REQUIREMENTS

Master’s Degree in English. Applicants interested in English literature should have satisfactory scores on the verbal and advanced literature parts of the GRE. In addition, at least 24 semester hours in English (exclusive of composition, creative writing, and speech) are normally required for admission. Sixteen of the 24 hours must be in upper-division courses.

Those applicants interested in creative writing must submit satisfactory scores on the verbal section of the GRE, plus at least 18 semester hours in literature. In addition, each student must submit a manuscript of at least 10 pages of poetry or a minimum of 25 pages of fiction, nonfiction prose (other than literary criticism), or a screen or stage play for evaluation.

Doctoral Degree in English. Students must present satisfactory scores on verbal and advanced literature parts of the GRE, and must have either an M.A. degree in English or at least 30 hours of postgraduate English course work beyond the B.A. degree. Entering graduate students with no degree beyond the B.A. are normally admitted to the M.A. program. They may later apply for admission to the Ph.D. program.

DEGREE REQUIREMENTS

Students wishing to pursue graduate work in English should note requirements for advanced degrees in the Graduate School section of this catalog and should write the department for a more complete description of the graduate programs in English.

ENVIRONMENTAL CONSERVATION

Degree ———— B.A.

The environmental conservation major is a program administered by the Department of Geography, which receives program advice from representatives of the Departments of Economics and EPO Biology. Environmental conservation, although similar to majors in environmental studies elsewhere, stresses conservation, i.e., a reasoned use of the natural environment so that utilization does not impair the environment’s capacity for self-renewal. The major combines the study of technique and philosophy, natural and social science, with course options from several areas: biology, chemistry, economics, geography, history, philosophy, physics, political science, and quantitative methods. A double major of environmental conservation and geography is not allowed.

The following areas of knowledge are central to the undergraduate degree in environmental conservation:

• an understanding of the range and dimensions of the major environmental conservation problems of the United States and the world;
• an awareness of the complexity of factors relating to human interaction with the environment, especially the fact that environmental problems have both human and biophysical components;
• knowledge of the general geographic principles of human-environment interaction, global habitability and environmental change, and human spatial organization;
• knowledge of the specific basic principles of physical geography; and
• knowledge of the basic principles of one other cognate discipline, especially biology or economics.

In addition, students completing the degree in environmental conservation are expected to acquire:

• skills in spatial and temporal data analysis, in both quantitative and qualitative modes;
• ability in one or more of the skill areas of cartography, air photography interpretation, remote sensing, and geographic information systems;
• research skills in the cognate discipline;
• skills in writing, numeracy, and computer literacy; and
• skill in selecting an environmental conservation topic for research and synthesis in the department’s capstone experience.

Bachelor’s Degree Program

The degree program in environmental conservation is undergoing revision. Students should consult with administrative staff in Guggenheim 110 for further information.

FILM STUDIES

Degrees ———— B.A., B.F.A.

The Film Studies Program educates students in the history and development of film as an art form and a neutral medium. The curriculum instills an informed analytic awareness of the ways in which film has been used and provides the resources for significant creative exploration of the medium.

The following areas of knowledge are central to the undergraduate degrees in film studies:

• knowledge of the major artistic contributions to the evolution of film, from the advent of the moving image to the present;
• awareness of the general outlines of world film from the silent period to the present, with emphasis on the historical contributions of major national cinemas; and
• awareness of methodological variations in film criticism and film theory, including knowledge of at least one recent methodological development.

In addition, students completing either the B.A. or the B.F.A. degree in film studies are expected to acquire:

• the ability to analyze and interpret films critically; and
• the ability to communicate such interpretations competently in essay form.

Also, students completing the B.F.A. degree should have the ability to make a short 16-mm sound film.

Admission to the Program

Standards for admission to the bachelor of arts program in film studies are under review. Students should contact the program office for further information.

Admission to the bachelor of fine arts degree in film studies is competitive and by application. Students wishing to apply must complete the application form supplied by the department along with a transcript of all college work. To be eligible to apply, students must have completed at least 12 semester hours of film studies courses at CU-Boulder, including at least 6 hours of critical studies courses.

In addition, students applying for admission to the bachelor of fine arts program must submit a film portfolio that includes at least one 16mm film produced in FILM 3500.

Note: A committee composed of both production and critical studies faculty will admit applicants to the B.F.A. program on the basis of the 16 mm film, the student’s GPA (both cumulative and in film studies classes), and any relevant supporting material. Admission to any class after the third meeting of the class is contingent on professor permission.

Bachelor’s Degree Programs

BACHELOR OF ARTS

No more than 6 hours of independent study may be credited toward the major. All coursework submitted for a film studies degree must have a grade of C or better. The arts and sciences 16-hour minimum of
upper-division hours must be in film studies courses.

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below. The Film Studies Program requires a minimum of 51 hours in support of the B.A. requirements, including film courses and courses taken in other departments.

Major Requirements  Semester Hours

Arts History Requirement
One of the four options listed below

Option 1: Humanities
HUHM 1010 and 1020 Introduction to Humanities 1 and 2 ..............................12

Option 2: Fine Arts History
FINE 1109 and 1209 Introduction to Western Art 1 and 2 ..................................6
Two upper-division courses in fine arts history .........................................................6

Option 3: Literature
ENGL 3502 and 3512 Survey of British Literature 1 and 2 .................................6
Any two literature courses in the following departments: classics, comparative literature, English, or a literature course offered by a foreign language department .................................................6

Option 4: Fine Arts History and British Literature
FINE 1109 and 1209 Introduction to Western Art 1 and 2 .................................6
ENGL 3502 and 3512 Survey of British Literature 1 and 2 ..................................6

Creative Arts/Performance Requirements
Completion of two creative/performance courses in the following departments: creative writing (English), fine arts (including photography), music, theatre, or dance .................................................4-6

Required Critical Studies Courses
FILM 1502 Introduction to Film Studies ............................................................3
FILM 3051 and 3061 Film History 1 and 2 (Note 1) ...........................................8
FILM 3002 Major Film Movements (Note 2) ....................................................3
FILM 3003 Major Film Directors (Note 2) .......................................................3
ENGL 3502 and 3512 Survey of British Literature 1 and 2 .................................6

Required Production Course
FILM 2000/2300 Beginning Filmmaking (Note 4) ...........................................3

Critical Studies Elective Requirements
B.A. students must complete 12 hours from the following courses. At least 6 must be upper division.
FILM 2002 Recent International Cinema .........................................................3
FILM 2003 Film Topics (Note 2) ........................................................................3
FILM 2013 Quest for Truth .............................................................................3
FILM 2400 Intermediate Small-Format Production .............................................3
FILM 3002 Major Film Movements (Note 2) ....................................................3
FILM 3003 Major Film Directors (Note 2) .......................................................3
FILM 3013 Women and Film ...........................................................................3
FILM 3900 Independent Study (Note 5) ..........................................................1-3
FILM 4003 Film and Fiction (Note 6) ...............................................................3

FILM 4604 Colloquium in Film Aesthetics (Note 7) ...........................................3

Curriculum Notes
1. Same as HUHM 3051 and 3061. It is strongly recommended that students take FILM 3051 and 3061 in chronological order.
2. Course may be taken for credit more than once, provided that the topics vary. If taken twice, this course may be used both as a required critical studies course and as an elective course.
3. Same as HUHM 4004.
4. FILM 2300 may be taken instead of FILM 2000; however, only one of the two courses may be counted toward the B.A. degree. Students will not receive credit for both courses.
FILM 2300 is offered summer session only.
5. Total number of independent study credit hours cannot exceed six.
6. Same as HUHM 4003.
7. Occasionally crosslisted with FREN 4600.

BACHELOR OF FINE ARTS

No more than 6 hours of independent study may be credited toward the major. All course work submitted for a B.F.A. degree in film must have a grade of C or better.

Students must complete the general requirements of the College of Arts and Sciences as well as the major requirements listed below. The Film Studies Program requires a minimum of 57 hours in support of the B.F.A. degree requirements.

Major Requirements  Semester Hours

Arts History Requirement
One of the four options listed below

Option 1: Humanities
HUHM 1010 and 1020 Introduction to Humanities 1 and 2 ..............................12

Option 2: Fine Arts History
FINE 1109 and 1209 Introduction to Western Art 1 and 2 .................................6
Two upper-division courses in fine arts history .........................................................6

Option 3: Literature
ENGL 3502 and 3512 Survey of British Literature 1 and 2 .................................6
Any two literature courses in the following departments: classics, comparative literature, English, or a literature course offered by a foreign language department .................................................6

Option 4: Fine Arts History and British Literature
FINE 1109 and 1209 Introduction to Western Art 1 and 2 .................................6
ENGL 3502 and 3512 Survey of British Literature 1 and 2 ..................................6

Option 3: Literature
ENGL 3502 and 3512 Survey of British Literature 1 and 2 .................................6
Any two literature courses in the following departments: classics, comparative literature, English, or a literature course offered by a foreign language department .................................................6

Option 4: Fine Arts History and British Literature
FINE 1109 and 1209 Introduction to Western Art 1 and 2 .................................6
ENGL 3502 and 3512 Survey of British Literature 1 and 2 ..................................6

Film History Requirement
FILM 3051 and 3061 Film History 1 and 2 (Note 1) ...........................................8

Required Production Course
B.F.A. students must also complete the following:
FILM 2000 or 2300 Beginning Filmmaking (Note 2) ...........................................3
FILM 2400 Intermediate Small-Format Production .............................................3
FILM 3500 Intermediate Filmmaking, 16 mm (Note 3) .....................................3
FILM 4500 Advanced Filmmaking (Notes 4, 5, 6) ...........................................3
FILM 3930 Film Studies Internship .................................................................1-6

Critical Studies Elective Requirements
B.F.A. students must complete 12 hours including 12 hours of upper-division classes, six of which must be selected from FILM 3002, 3003, 3012, and 3013.
FILM 1502 Introduction to Film Studies ............................................................3
FILM 2002 Recent International Cinema ..........................................................3
FILM 2003 Film Topics (Note 4) ........................................................................3
FILM 2013 Quest for Truth .............................................................................3
FILM 3002 Major Film Movements (Notes 4, 7) .................................................3
FILM 3003 Major Film Directors (Notes 4, 7) ....................................................3
FILM 3012 Documentary Film (Note 7) ............................................................3
FILM 3013 Women and Film (Note 7) .............................................................3
FILM 3900 Independent Study in the Production Area (Notes 8, 9) ...............1-3
FILM 3901 Independent Study in Critical Studies Area (Notes 8, 9) ...............1-3
FILM 4003 Film and Fiction (Note 10) .............................................................3
FILM 4004 Film Theory (Note 11) .................................................................3
FILM 4604 Colloquium in Film Aesthetics (Note 12) ........................................3
FILM 3501 Film Production Management or FILM 3563 Production of the Feature (Both usually offered through Continuing Education) .................................................................3

Curriculum Notes
1. Same as HUHM 3051 and 3061. It is strongly recommended that students take FILM 3051 and 3061 in chronological order.
2. Either FILM 2000 or 2300 may be taken for degree credit. Only one of the two courses may be counted toward the B.F.A. degree. FILM 2300 is offered summer session only.
3. Course may be taken for credit more than once.
4. Course may be taken for credit more than once, provided the topics vary.
5. May be repeated for completion of final thesis project.
6. Required for B.F.A. option for B.A.
7. B.F.A. majors are required to take 6 credit hours from a combination of the following classes: FILM 3002, 3003, 3012, and 3013.
8. Total number of independent study credit hours cannot exceed 6 and they cannot be used to duplicate regular course offerings.
9. Repeatable for credit within same term (maximum 6 hours total).
10. Same as HUHM 4003.
11. Same as HUHM 4004. Satisfies college requirement for capstone/critical thinking course; required for B.A. majors and strongly recommended for B.F.A. majors.
12. Sometimes crosslisted with FREN 4600.
FINE ARTS

The Department of Fine Arts offers the bachelor of arts degree in studio art and art history, and the bachelor of fine arts in creative arts. The master of arts degree is offered in art history, and a major in fine arts degree is offered in creative arts. Students are encouraged to consult with an advisor in the appropriate area in order to obtain advice and current information.

The following areas of knowledge are central to the undergraduate degrees in art history:

- knowledge of the major artistic monuments of the western world in a historical context (students may also master an overview of Asian art);
- concentration of knowledge of artistic monuments and their cultural context in either ancient, Byzantine, Indian and Southeast Asian, medieval European, Renaissance and Baroque European, pre-Columbian, or modern art;
- familiarity with varied methodologies used to study art historically; and
- general knowledge of artistic media and techniques.

In addition, students completing the degree in art history are expected to acquire:

- the ability to relate individual monuments to their historical and cultural context by identifying technique, style, and subject matter;
- the ability to interpret historical and critical information about works of art, artists, and related issues; and
- the ability to organize and communicate concepts and data pertaining to the history of art effectively in written and oral form.

The following areas of knowledge are central to the undergraduate degrees in studio art:

- general knowledge of the significance of the major monuments in art history, with an emphasis on contemporary art;
- in-depth knowledge of one discipline of studio art;
- general awareness of related critical issues in studio practice; and
- familiarity with a wide range of stylistic approaches.

In addition, students completing a degree in studio art are expected to acquire:

- the ability to analyze their own works of art in terms of form and content;
- the ability to interpret the work of others;
- the ability to execute ideas in one or more artistic media;
- demonstrated artistic prowess and technical proficiency in one chosen medium; and
- the ability to communicate in verbal and written form the particular conceptual and perceptual attitudes and stances of their own artistic production.

BACHELOR'S DEGREE PROGRAMS

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

BACHELOR OF ARTS (ART HISTORY)

(40-45 semester hours in the major)

Major Requirements

Semester Hours

Any two of the following: FINE 1002 or 1012 Basic Drawing; FINE 1202 or 1212 Basic Painting; or FINE 1504 or 1514 Basic Sculpture.........................................................4-6

Any two of the following lower-division art history courses: FINE 1109 Introduction to Western Art 1; FINE 1209 Introduction to Western Art 2; FINE 2409 Introduction to Asian Art.........................................................6

Any five to six upper-division courses................................15-18

Secondary area: any three to four courses at the upper-division level in departments outside fine arts that complement the student's major area of interest, with approval of the art history advisor (see department or art history advisors for list of approved courses).................9-12

BACHELOR OF ARTS (STUDIO ARTS)

(33-45 semester hours in the major)

FINE 1002 or 1012 Basic Drawing........2 or 3
FINE 1202 or 1212 Basic Painting............2 or 3
FINE 1504 or 1514 Basic Sculpture...........2 or 3
Any three of the following: FINE 1047 Art Lecture; FINE 1109 Introduction to Western Art 1; FINE 1209 Introduction to Western Art 2; FINE 1709 Experiencing Art; FINE 2409 Introduction to Asian Art.........................................................9

Any two upper-division art history courses........6

Upper-division studio electives (minimum)....12

Required studio courses for studio arts majors:

Painting and drawing majors must take any sequence of courses culminating in FINE 4002 (Drawing), FINE 4302 (Watermedia) or FINE 4202 (Painting).

Ceramics majors must take FINE 4085 Advanced Ceramics and FINE 4095 Undergraduate Ceramics Seminar.

Electronic media majors must take FINE 3230 Electronic Arts Survey and FINE 4719 History of Media Arts

BACHELOR OF FINE ARTS

(STUDIO ARTS)

(65-67 credits toward the major)

It is recommended that majors complete the 3-credit-hour basics (FINE 1012, 1212, and 1514) rather than the 2-credit-hour basics (FINE 1002, 1202, and 1504).

The lower- and upper-division art history requirement is the same as for the B.A. degree.

BACHELOR OF FINE ARTS

(DIVISIONAL STUDIO EMPHASIS)

Students must take any six upper-division studio courses which represent their interests in one studio area.

Students must complete four studio courses (15 credit hours) outside their major studio concentration. Students must also complete FINE 4117 B.F.A. Seminar, a 3-credit hour course.

The remaining 5 credits, required to reach the minimum of 65 for the degree, can be either lower- or upper-division fine arts electives.

Note: B.A./B.F.A. candidates must complete a minimum of 9 out of 15 credits in the major on the Boulder campus.

HONORS

Students may graduate with departmental or general honors. Those interested in pursuing this program should contact the Honors Department or the Department of Fine Arts honors representative as early as possible.

SPECIAL PROGRAMS

Art History Program in Italy. Art history faculty annually conduct this program, which offers 6 semester hours of credit during a six-week term. Course offerings vary each year and include ancient Etruscan and Roman art; late medieval and early Renaissance art; the later Quattrocento and the High Renaissance; and the later Renaissance and Manierism. Centered in Florence, the course includes numerous visits to other Italian towns and cities.

Inquiries regarding this and other programs should be directed to the Office of International Education.

Colorado Collection. The Colorado Collection contains old master, modern, and contemporary prints, drawings, paintings, sculptures, and photographs. Art history graduate students use this collection for research, and faculty use it for instructional purposes. Housed for the state of Colorado by the Department of Fine Arts, this collection includes approximately 3,000 works with an estimated value of $2 million. Part of the collection, focusing on the works by old masters and modern artists, is exhibited in the fine arts galleries on a rotating basis.

Exhibitions Program. The Department of Fine Arts operates the University of Colorado Art Galleries, which exhibit the work of visiting artists and other contemporary artists. Shows and performances have received National Endowment for the Arts funding, and some of the artists who have been presented are Eric Fischl, Alfred Jensen, Robert Kushner, Sol LeWitt, R.
Morton, Martha Rosler, Theodora Skipitare, and William Wegman. Bachelor of fine arts shows, master of fine arts thesis exhibitions, and fine arts faculty shows are also held in the galleries, which provide 5,000 square feet of space.

**Visiting Artist Program.** Artists of national and international reputation interact with graduate and advanced undergraduate students and discuss their studio work at seminar meetings. Artists present a public lecture during their visit, providing continuous input of significant developments and a comprehensive view of contemporary issues in the arts.

**Slide Collection.** An extensive collection of slides representing art from prehistoric to modern times is maintained by the Department of Fine Arts. This collection is especially strong in the areas of African, Asian, European, Islamic, Medieval, North American, Oceanic, and Pre-Columbian art.

**Thesis Collection.** A collection of work donated by M.F.A. candidates from the thesis exhibition is also owned by the department.

Special Note: Students must be aware that work left in studios and/or exhibited in the Sibell-Wolle Fine Arts building is left at their own risk. The department will not be held responsible for loss or damage.

### Graduate Degree Programs

**MASTER OF ARTS DEGREE**

**(ART HISTORY)**

**Prerequisites.** The following are required for admission to the graduate program:

1. A baccalaureate degree from an approved college with a cumulative grade point average of at least 3.00.
2. A satisfactory score on the Graduate Record Examination.
3. A broad general background in history, literature, and philosophy.
4. Two semesters (minimum) of art history surveys or equivalent.

**Examinations.** The comprehensive exams are given to measure graduate student knowledge of art history at the master's-degree level. The exams are approximately five hours in length and consist of essay questions and slides relevant to the student's chosen major and minor special areas in art history.

**Plan I (With Thesis) Course Requirements.** Students must complete a minimum of 6 hours of course work beyond the requirements for plan I in place of the thesis.

**A nonthesis project (3 hours) must also be completed. This major study project (FINE 5969) must be approved by the entire art history faculty.**

**MASTER OF FINE ARTS DEGREE**

**(CREATIVE ARTS)**

**Prerequisites.** The following are required for admission to the graduate program:

1. Bachelor's degree from an approved college or school of art with a minimum grade point average of 2.75.
2. Minimum of 34 semester hours of acceptable work in art; 12 credits in fine arts history is preferred.
3. Submission of a slide portfolio (must include 20 examples) representing creative work.
4. Electronic media students should submit a portfolio of creative work to include slides, video and/or audio tapes, film, etc., as appropriate (especially for documentation of performance and/or installations) for screening by the electronic media committee for presentation to the full graduate faculty.

**Course Requirements.**

1. Minimum of four semesters (54 hours, of which 36 must be taken in residence on the Boulder campus) of acceptable graduate work must be completed beyond the bachelor's degree, consisting of:
   a. Fourteen hours in "nonstudio" art. Six of these must be in art history (5000-level courses), or a combination of FINE 5087 (Selected Topics in Contemporary Art) plus one art history course; the remaining 8 hours must include the Graduate Visiting Artist Program (FINE 5118) for 3 hours, and a minimum of 5 additional hours to be taken in art history, criticism, and/or art seminars. Nonstudio hours completed outside the department may be taken at the 3000 level or above.
   b. Thirty-four hours in studio art, of which a minimum of 12 must be completed in the area (painting, drawing, sculpture, etc.) of concentration.
   c. FINE 6957 (M.F.A. Creative Thesis), 6 hours.
2. Course work must be completed at the 5000 level.
3. Photography students must enroll in FINE 5181 (Graduate Photography) each semester, with the exception of the thesis semester.

**INTERDISCIPLINARY ARTS (IDA) PROGRAM**

Graduate students interested in the IDA program should apply through their main area of concentration. Each IDA graduate student studies in at least one discipline outside of his or her main area of concentration. It is possible for IDA students to design their program so that it reflects two majors and one minor. The advisor assigned to each IDA student should be a faculty member from the main area of concentration. The student's course of study is planned with the advisor and/or the IDA committee. The IDA program allows students to explore at least three separate disciplines, two within the fine arts department and possibly a third outside of fine arts.

**IDA Program Requirements**

Nonstudio
Art history.........................................................6
Critical theory (taken as studio or nonstudio hours).....................3
FINE 5118 Visiting Artist Program........................................3
Hours within or outside fine arts........................................3
FINE 6957 M.F.A. Creative Thesis.....................................6
Total Hours..................................................................54

YEAR-END REVIEW
After completing 18 semester hours of work, students must apply for a year-end review. The mandatory review is conducted by a faculty year-end review committee during the semester when the student reaches 24 semester hours. Hours in excess of 24 accumulated before the end of the semester in which the review occurs are not counted towards the degree. No student who has accumulated more than 40 hours without a year-end review is allowed to continue in the program. The year-end review must take place at least one year prior to the thesis show.

On the basis of this review, the year-end review committee determines whether students may continue in the program, and identifies specific requirements for further work in both studio and nonstudio course work.

TRANSFER OF CREDIT
Procedures for transferring credit from other graduate programs are governed by the regulations of the Graduate School. Transfer credit, not to exceed 18 semester hours, must first be approved by faculty in the student's major area.

CHANGE IN AREA OF CONCENTRATION
Students who wish to change their area of concentration after admission must reapply to the department.

GRADUATION
Before registering for FINE 6957 (M.F.A. Thesis) students must meet with their thesis committee and obtain written permission to register.

1. M.F.A. thesis work must take the form of original creative work of acceptable professional standards.

2. In conjunction with the thesis exhibition there is an oral comprehensive examination and the candidate must provide a critical written statement concerning the work.

3. Upon the successful completion of the oral examination, the candidate's written statement and 10-15 slides (representing work in the exhibition) are to be filed with the Department of Fine Arts. The written statement must conform to departmental requirements. The slides become part of the slide collection housed in the Department of Fine Arts.

4. The committee may request a contribution of original work.

FRENCH AND ITALIAN

Degrees in French.........................B.A., M.A., Ph.D.
Degree in Italian.........................B.A.

Bachelor's Degree Programs

FRENCH
The following areas of knowledge are central to the undergraduate degree in French:

• an awareness of the fundamental outlines of the history of French literature, from the Middle Ages to the present;

• familiarity with selected widely recognized works;

• awareness of the historical and cultural contexts in which particular works were written and which they portray;

• awareness of basic critical methodologies applicable to different genres of literature;

• awareness of the traditional analysis and description of the grammar of modern standard French; and

• awareness of the importance of language to intellectual development and cultural vitality.

In addition, students completing the degree in French are expected to acquire:

• the ability to speak and understand modern, spoken, standard French sufficient for all purposes of daily life and for intellectual discussion in academic settings;

• the ability to read and write modern, standard French with sufficient fluency and correctness that literary or linguistic analysis of French texts can be performed without being hindered by grammatical problems;

• the ability to analyze and interpret literary texts in terms of style, plot, structure, characters, themes, and the use of literary devices;

• the ability to analyze and describe linguistic problems in terms of the traditional grammar of French (if linguistics has been emphasized, the ability to analyze and describe French using modern linguistic theories is expected); and

• the ability to communicate such interpretations and descriptions competently, if simply, in standard French (or in standard English at a more sophisticated level).

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

Note: Students undertaking a major in French should expect to have regular conferences with their undergraduate advisor to ensure that they are making adequate progress and that requirements are being met in a timely way. The department will not certify majors for graduation when a failure to satisfy requirements is the fault of the student.

A minimum of 30 upper-division hours in French must be completed (see below for specific courses). FREN 2120 or its equivalent is the prerequisite for admission to courses required for the major.

Major Requirements

Senior seminar (including a senior essay and oral presentation). See departmental brochure for details.

ITALIAN
The primary goals of the major program are to provide mastery of the language skills (listening, speaking, reading, writing) of modern standard Italian and to promote an understanding of the Italian literary and cultural tradition within western civilization. At the same time, the major provides the necessary background for advanced professional study and specialization.

Students wishing to major in Italian are required to have a thorough advising session with the Italian program director/advisor. In this session the student's program of study is outlined in detail. Students are required to see the director/advisor in the event that any of their major courses are canceled so that substitutions and revisions in their programs can be made. The department will not approve a major in Italian unless the student has been advised by the director/advisor.

For courses in other departments with an Italian emphasis (e.g., comparative literature, fine arts, history, etc.) see those sections of this catalog.

The following areas of knowledge are central to the undergraduate degree in Italian:

• an awareness of the fundamental outlines of the history of Italian literature, from the Middle Ages to the present;

• familiarity with selected widely recognized works;

• awareness of the historical and cultural contexts in which particular works were written and which they portray;
• awareness of the traditional analysis and description of the grammar of modern standard Italian; and
• awareness of the importance of language to intellectual development and cultural vitality.

In addition, students completing the degree in Italian are expected to acquire:
• the ability to speak and understand modern, spoken, standard Italian sufficient for all purposes of daily life and for intellectual discussion in academic settings;
• the ability to read and write modern, standard Italian with sufficient fluency and correctness that literary or linguistic analysis of Italian texts can be performed without being hindered by grammatical problems;
• the ability to analyze and interpret literary texts in terms of style, plot structure, characters, themes, and the use of literary devices;
• the ability to analyze and describe linguistics problems in terms of the traditional grammar of Italian; and
• the ability to communicate such interpretations and descriptions competently, if simply, in standard Italian (or in standard English at a more sophisticated level).

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below. Thirty hours beyond the first year with a 2.00 grade point average or better are required, as listed below.

**STUDY ABROAD**

French majors are strongly encouraged to spend a semester or a year at a French-speaking university. CU-Boulder’s study abroad programs at the Universities of Bordeaux, Annecy, and Rennes have been developed in conjunction with the department and designed to allow students to complete many major requirements.

While there are no University of Colorado sponsored programs for the academic year or summer in Italy, there are a number of programs sponsored by other universities.

The Ayer Romance Language Scholarship is available for majors going on study abroad programs. The Lamont Scholarship is awarded alternately to French and Italian majors (in alternate years).

For further information, see the section on International Education in this catalog, or inquire at the Office of International Education.

**MINOR PROGRAMS**

The department now offers minors in both French and Italian. Interested students should contact the department office for further information.

**Graduate Degree Programs in French**

Students wishing to pursue graduate work in French leading to candidacy for an advanced degree should read carefully Requirements for Advanced Degrees in the Graduate School section of this catalog. A graduate teaching exchange at the University of Bordeaux is available to students who have earned a master’s degree. The Lamont Scholarship is awarded to a graduate student in alternate years.

**MASTER’S DEGREE**

**Prerequisites.** The following are prerequisites to graduate study in French: the ability to read, write, speak, and understand spoken standard French; general knowledge of French literature and civilization; and ability to read one language in addition to English and French. See department guidelines for the specific requirements for the M.A. in French.

**DOCTORAL DEGREE**

**Prerequisites.** Doctoral candidates should possess excellence in reading, speaking, writing, and understanding spoken standard French; general knowledge of French literature and civilization; and knowledge of one language other than English and French (see below).

**Required Courses.** The department offers a specialization in literature or in linguistics. Each track differs from the other in its requirements. See department guidelines for Ph.D. candidates.

**Language Requirement.** A sound reading knowledge of one modern language other than English and French is required. Proficiency may be shown by taking undergraduate courses in the language through the 4000 level, or by successfully passing a reading examination in the language. The examination normally consists of a timed translation of a literary text or a text dealing with literature (e.g., literary criticism). This language may be one of the following: German, Spanish, Italian, or Russian. Other languages are considered depending on the student’s area of research. A dictionary is permitted.

**GEOGRAPHY**

*Degree: B.A., M.A., Ph.D.*

The Department of Geography offers theoretical and practical work in physical geography, including climatology, geomorphology, and biogeography; conservation of natural resources, including environmental education; human geography, including urban, social, economic, political, cultural, and population geography; and regional analysis, including analysis of the land and the environment. Courses in GEOG 3930 Internship, while in close contact with the departments of geography and environmental conservation, are available to students who have earned a B.A. degree in the field of study.

The Department of Geography offers B.A., M.A., and Ph.D. degree programs in geography, and an interdisciplinary B.A. in environmental conservation (see separate listing).

The following areas of knowledge are central to the undergraduate degree in geography:

• an awareness of the unique contributions of the discipline to understanding the spatial components of problems and the diverse factors relating to human interaction with the environment;
• understanding the spatial distributions of physical and human characteristics on the Earth’s surface, the general patterns of these forms, and the processes that have created and are changing these patterns;
• understanding the major themes of geographical analysis, including absolute and relative location; human and physical characteristics of place; human and environmental relations; movement of people, ideas, and products; and regionalization; and
• knowledge of the general geographical principles of human-environment interaction, global change, and human spatial organization.

In addition, students completing the degree in geography are expected to acquire:

• an ability in one or more of the specific geographic skill areas of cartography, air photograph interpretation, remote sensing, and geographic information systems;
• abilities in writing, quantitative methods, computer literacy, and in library and field methods of data collection; and
Graduate Degree Programs

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read carefully requirements for advanced degrees in the Graduate School section of this catalog. Graduate-level course work at the Boulder campus may be combined with graduate courses offered at the Denver and Colorado Springs campuses. Additional information should be obtained from the Department of Geography. The following are departmental requirements.

MASTER’S DEGREE

Prerequisites. For admission without deficiency, the requirements are approximately 20 semester hours of geography, including introductory courses in both human and physical geography; an undergraduate major in geography is not required. It is desirable that the student have course work in at least two areas outside geography in cognate fields in the social sciences and natural sciences. Graduate students are encouraged to have some background in college mathematics, statistics, and computer skills. Without the kind of background described above, it is likely that admission will be on a provisional basis.

General Requirements. The minimum requirements for an M.A. in geography may be fulfilled by completing 24 semester hours of graduate work, including a master’s thesis, which carries 6 credit hours (i.e., 18 hours of course work and 6 hours of thesis work).

All grades offered for a degree must average at least 3.00 (A average).

DOCTORAL DEGREE

Prerequisites. The minimum requirements for admission to the Ph.D. program are normally a master’s degree or significant published research or equivalent standing.

General Requirements. The Ph.D. degree is not conferred merely upon the satisfactory completion of a course of study. The candidate must also demonstrate proficiency in some broad subject of learning, and be able to critically evaluate work in the field, show the ability to work independently in the chosen field, and make an original contribution of significance to the advancement of knowledge.

Thirty semester hours of course work numbered 5000 or above is the minimum requirement; ordinarily the number of hours is greater than this. Thesis credit hours may not be used to fulfill the 30-hour requirement. At least 20 of these hours must be taken at the University of Colorado; up to 10 semester hours from another institution may be transferred upon approval.

A B average (3.00) or higher must be maintained in all course work.

Six semesters of residence are required beyond the bachelor’s degree, of which four must be at the University of Colorado; this may include two semesters for the master’s degree. Students with a University of Colorado master’s degree in geography, with departmental approval, may apply all credit hours from 5000 or above courses (except thesis credits) to the Ph.D. requirements.

GEOLOGICAL SCIENCES

Degree..................................B.A., M.S., Ph.D.

The options available in the undergraduate program in geology are trifold: geology, geophysics, or geoscience. Each program leads to the B.A. degree. The geoscience option offers flexibility and broad training; the geology and geophysics options offer more traditional paths of training for those students who wish to pursue a career in geology or geophysics. All options provide a strong basis for graduate study and professional employment. Students who are uncertain as to which option best suits their needs should consult a departmental advisor. The B.A. in geology is also excellent preparation for later professional work in other fields, such as law, journalism, economics, engineering, etc.

Students who do not plan a career in the geosciences, or who would like to combine a basic knowledge of geology with that of some other field, should consider using geology as one subject in a distributed studies major. Individual programs can be tailored for such students.

The undergraduate program emphasizes course work in theoretical, laboratory, and field-oriented aspects of the geological sciences. The nearby Rocky Mountains provide a natural laboratory for the study of geological materials and processes.

The following areas of knowledge are central to the undergraduate degree in geology:

- knowledge of the ways in which Earth responds to internal and external forces; the physical, chemical, and biological evolution of Earth; the nature of the materials of which Earth is made; and mineralogy and petrology of igneous, metamorphic, and sedimentary rocks;
- awareness of interactions of the solid Earth with the hydrosphere and atmo-
sphere, and how these interactions affect mankind and the environment;
• an understanding of the processes of sedimentation, the use of stratigraphy, paleobiology, marine environments, and the role of geophysics and tectonics in understanding the nature of Earth and its history;
• awareness of the roles of physics, chemistry, biology, and mathematics in understanding geological processes;
• knowledge of the history of discoveries and ideas that have contributed to our current awareness of the Earth and the planetary system;
• knowledge of appropriate techniques for measuring and recording both past and present Earth processes; and
• knowledge of the methods used in the field to map and interpret the diverse variety of rock types and structures.

In addition, students completing the degree in geology are expected to acquire:
• the ability to read and critically evaluate relevant geological literature;
• the ability to observe and measure, in the field and laboratory, physical, chemical, and biological aspects of rock succession and to develop models of Earth history;
• the ability to present geological information in both written and oral form; and
• the ability to use appropriate tools from mathematics, chemistry, physics, and biology, including computers, to solve geological problems.

Bachelor’s Degree Programs

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

All majors are required to take the following courses, and must also demonstrate a basic ability to work interactively with computers. Completion of the requirement for computer literacy is a prerequisite to all 3000- and 4000-level courses in geological sciences. Information on how to satisfy the requirements for computer literacy is available in the departmental office.

<td>GEOL 4130 Geophysics and Tectonics or GEOL 4530 Physics of the Solid Earth</td>
<td></td>
</tr>
<tr>
<td>GEOL 4241 Geomorphology</td>
<td></td>
</tr>
</tbody>
</table>

Because of the flexibility of this program, students are required to develop their program under the guidance of a faculty advisor and must submit a course plan by the end of their sophomore year or upon declaration of the major, whichever is later.

**GEOLogy and Geosciences Options**

Students in either of these options must take additional 3000- or 4000-level courses so that the total number of upper-division hours in geological sciences is at least 30 hours. Any upper-division course is acceptable, with the exception that only one of the following may be counted towards the 30-hour minimum:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOL 4040 Global Change: The Recent Geological Record</td>
<td></td>
</tr>
<tr>
<td>GEOL 5500 Mineral Resources, World Affairs, and the Environment</td>
<td></td>
</tr>
<tr>
<td>GEOL 3520 Environmental Issues in Geosciences</td>
<td></td>
</tr>
<tr>
<td>GEOL 3520 Controversies in Planetary Geology</td>
<td></td>
</tr>
<tr>
<td>GEOL 3720 Evolution of Life: The Geologic Record</td>
<td></td>
</tr>
<tr>
<td>GEOL 4950 Geologic Hazards and Natural Disasters</td>
<td></td>
</tr>
</tbody>
</table>

**Geophysics Option**

Students electing the geophysics option are required to take the following additional courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>

Additional information on required courses and other departmental requirements may be obtained from the departmental office. Students should contact the department to obtain a list of current major requirements.

Transfer students must satisfactorily complete a minimum of 12 semester hours of advanced work (3000-level or above) in the Department of Geological Sciences in Boulder if they wish to obtain a degree in geology from CU-Boulder. Before registering for the first time, or within the first week of the semester, such students must see a member of the departmental academic progress committee to have previous course work in geology, math, and allied sciences evaluated.

**Minor Program**

The department also offers a minor in geology. Details are available in the departmental office.

**Geology Honors Program**

Opportunity is provided for qualified geology majors to participate in the geology honors program and graduate with honors (cum laude, magna cum laude, or summa cum laude) in geology. Students interested in the honors program should contact the departmental honors advisor during their junior year.

**Geology Internship Program**

This program is an academically supervised opportunity for geological science majors to work with public or private organizations. Students interested in the internship pro-
gram should contact the departmental internship advisor during their junior year.

Graduate Degree Programs

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration, and degree requirements that is available from the departmental office. A brief summary follows.

All students applying for admission must take the Graduate Record Examination. Results of this examination are used both for determining admittance and for initial academic counseling.

Entering students normally have completed at least 24 semester hours of basic courses in geological science and two semesters each of chemistry, physics, and calculus. In some cases, exceptional undergraduate preparation in other fields of science, mathematics, or engineering may substitute for part of the 24 hours in geological science.

Initial counseling is provided on an individual basis by the departmental committee on academic progress. Thereafter each student acquires an advisory committee which provides guidance throughout the degree program.

MASTERS' DEGREE

Candidates for the master's degree in geological sciences must complete at least 24 semester hours of graduate course work, including a thesis (plan I), or 30 semester hours of graduate course work without a thesis (plan II). The plan II program requires at least 3 hours of GEOL 6960 (Plan II Master's Research) under the supervision of the advisory committee. At least 12 semester hours of work (plan I) and 16 semester hours of work (plan II) must be at the 5000 level. See Graduate School specifications for further information.

DOCTORAL DEGREE

Candidates for the doctoral degree must complete at least 30 semester hours in course work numbered 5000 or above, of which at least 20 must be taken at CU-Boulder. In addition to course work, candidates must take a total of at least 30 hours of GEOL 8990 doctoral dissertation hours, with not more than 10 of these in any one semester and not more than 10 before the comprehensive examination is passed.

Doctoral candidates are required to demonstrate second-year college proficiency in a foreign language of their choice.

The Department of Geological Sciences participates in the interdepartmental Ph.D. program in geophysics. For more information about this program, consult the Graduate School section of this catalog.

GERMANIC AND SLAVIC LANGUAGES AND LITERATURES

<table>
<thead>
<tr>
<th>Germanic Studies Degree</th>
<th>B.A.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Russian Degree</td>
<td>B.A.</td>
</tr>
</tbody>
</table>

Students may choose to major in either Germanic Studies or Russian.

The major in Germanic Studies is an interdisciplinary program focusing on study of the German language, its manifestations in history, and its usage in the current cultural and social context; the literary, artistic, and philosophical aspects of German culture in the past and the present; the major historical events and developments in Germany and its neighboring countries, and the current political institutions and dynamics in Germany within the broader European framework.

The aim of the curriculum in Russian language and literature is to equip students to read, write, speak, and understand Russian on a level allowing communication with natives and other users of the language. Before registering for a course, students should consult with a departmental advisor concerning appropriate placement.

Students interested in Russian should consider a double major in order to increase their career opportunities. Prospective teachers might choose Russian with a major in another foreign language, while those preparing for a career in government service should benefit from a combination of Russian and a social science major. Faculty members in other departments who have expertise in areas where important Soviet research is being done can advise students on the way Russian study relates to their specialty.

Students are required to structure their curriculum according to the departmental checklist for majors in close consultation with a departmental advisor.

Bachelor's Degree Programs

GERMANIC STUDIES

The following areas of knowledge are central to the undergraduate degree in Germanic Studies:

- Familiarity with the historical context of which particular German literary and artistic works are part;
- Familiarity with the historical development of modern Germany as a manifestation of the particular cultural history of the region.

In addition, students completing the degree in Germanic Studies are expected to acquire:

- The ability to read modern German at a level at which sophisticated literary analysis can be performed;
- The ability to write and speak German sufficiently to participate in critical discussions and write critical essays;
- The ability to speak and comprehend German sufficiently for all situations in daily life and for basic academic conversations;
- The ability to analyze and interpret literary texts in terms of style, structure, character, themes, and use of allusion; and
- The ability to communicate such interpretations competently in both German and English.

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

Major Requirements

Semester Hours

Completion of 42 hours beyond 2000-level language courses with grades of C or better (some may be taken pass/fail), distributed as follows:

German Language Courses

Completion of the following upper-level German language courses or demonstration of third-year proficiency: GRMN 4010 and 4020 are required of all majors.

GRMN 3010 Advanced Conversation and Grammar ............................................. 3
GRMN 3020 Advanced Conversation and Composition .................................. 3
GRMN 4010 and 4020 Advanced Composition, Conversation, and Syntax 1 and 2 ... 6

German Literature and Culture Courses

GRMN 1601 Introduction to Modern German Culture and Civilization ............ 3
GRMN 3110 German Literature from 1910 to Present or GRMN 3120 Modern German Literature from 1750 to 1910 .......................... 3
GRMN 4550 Senior Seminar .................................................. 3

Additional hours of German literature and culture ........................................... 6

Area Courses

HIST 4413 German History to 1848 .................................................. 3
HIST 4423 German History since 1849 .................................................. 3
PSCI 4002 Advanced Comparative Politics—Western Europe ...................... 3

Electives

Complete a minimum of two courses. At least one elective must be from outside the Depart-
ment of Germanic Languages and Literatures.
ECON 4514 Economic History of Europe ..............3
FILM 3051 Film History 1.....................................3
FINE 4259 Northern European Painting ..............3
FINE 4329 and 4339 Modern Art 1 and 2 ............6
GRMN course selected from the departmental checklist .................................................3
HIST 4312 Nineteenth-Century Europe ...............3
HIST 4412 Twentieth-Century Europe .................3
HIST 4414 European Intellectual History, 1750-1870 .......................................................3
HIST 4421 European Intellectual History, 1870-Present .....................................................3
HIST 4444 Topics in European Thought: Twentieth Century ..................................................3
HIST 4613 History of Eastern Europe to 1914 .......3
HIST 4621 History of Eastern Europe since 1914 ....3
PHIL 4030 Studies in Nineteenth-Century Philosophy .........................................................3
PHIL 4040 Studies in Twentieth-Century Philosophy .............................................................3
PHIL 4080 Introduction to Phenomenology ...........3
PHIL 4250 Marxism ...........................................3
PSY 4212 Europe in the International System ........3
SCAN 2250 Contemporary Sweden and Norway ....3
Note: GRMN 1010, 1020, 2010, 2020, and 2050 are not counted toward the 42 hours required for the bachelor's degree in German.

Study Abroad
The department strongly recommends that all majors take part in study abroad. The University's programs in Regensburg and Tübingen provide a full year of study abroad. Kassel provides the opportunity for language study during the summer for a shorter period of time. For further information on study abroad programs, see the International Education section of this catalog.

RUSIAN
The following areas are central to the undergraduate degree in Russian:
• awareness of the fundamental outlines of the history of Russian literature, from the Middle Ages to the present day, together with an awareness of major historical events;
• familiarity with the major Russian creative writers of the nineteenth and twentieth centuries;
• awareness of basic critical methodologies as they relate to the study of Russian literature; and
• awareness of the cultural determinants that helped shape the Soviet mindset.

In addition, students with a degree in Russian are expected to acquire:
• the ability to comprehend contemporary Russian, written or spoken, to a degree permitting sophisticated analysis of literary works or films;
• the ability to analyze Russian literary texts and give a reasoned response to them in literate English;
• the ability to write and converse in Russian at their own intellectual level; and
• the ability to determine the ways in which a Soviet interpretation or approach to a particular issue would differ from an American one.

Major Requirements Semester Hours
Students who enter the program at the beginning level must take the following courses.

Required beginning-level courses:
RUSS 1010 and 1020 Beginning Russian 1 and 2 .................................................................10

Required middle-level courses:
RUSS 2010 and 2020 Second-Year Russian Grammar and Composition 1 and 2 .............6
RUSS 2030 and 2040 Second-Year Russian Oral Practice 1 and 2 ...........................................6
RUSS 3010 and 3020 Third-Year Russian 1 and 2 .................................................................6
RUSS 3200 Russian Phonetics ..............................................3
Beginning or middle-level language course requirements may be met totally or in part by courses taken elsewhere, transfer credit, or other work accomplished. Students who enter the program at the second-year level must complete at least 90 credit hours in courses numbered 2000 or above; those who enter at the third-year level must complete at least 35 credit hours in such courses.

All students must take the following courses in residence here:
RUSS 4010 and 4020 Advanced Grammar Topics 1 and 2 .....................................................6
RUSS 4210 Open Topics: Russian Literature in Russian .........................................................3
RUSS 4810 Pre-revolutionary Russian Literature in Russian ..................................................3
RUSS 4811 Nineteenth-Century Russian Literature in English .............................................3

Recommended elective:
RUSS 2211 Introduction to Russian Culture ........3
RUSS 2221 Introduction to Soviet Culture ..........3
RUSS 3030 and 3040 Russian Conversation 1 and 2 ..............................................................4
RUSS 4821 Twentieth-Century Russian Literature in English ..................................................3

Language Placement
One year of high school Russian is usually considered equivalent to one semester of college Russian. Thus, a student with two years of high school Russian should enroll in RUSS 2010 or 2110. Students who think that they should be placed at a level different from the normal one should consult the department for advice. Placement level is determined in consultation with the department and should be done before registering for classes.

Students studying Russian may earn credit for courses taken abroad in the summer or during the academic year after consultation with the department. Information on such programs may be obtained through the Office of International Education.

MINOR PROGRAMS
Minors in both German and Russian are available. See the department for requirements.

COURSES TAUGHT IN ENGLISH
The department offers a number of courses in translation. These courses generally require no previous study in the language, history, or culture of the area involved, and are open to all interested students, regardless of major.

SCANDINAVIAN
Courses are offered in English on Norwegian, Swedish, and Scandinavian culture and civilization. The language courses satisfy arts and sciences language requirements for the B.A. and B.F.A degrees. In addition, there is an exchange program with Uppsala University in Sweden. At least two semesters of Swedish are required for application to the program. No degree is offered in Scandinavian.

HISTORY

Degrees .......... B.A., M.A., Ph.D.
The following areas of knowledge are central to the undergraduate degree in history:
• knowledge of the main topics in the political, social, cultural, and economic history of the United States, from its origins to the present;
• knowledge of the main topics in the political, social, cultural, and economic history of western civilization, from its origins in antiquity to the present;
• knowledge of the main topics in the political, social, cultural, and economic history of one or more geographic areas outside Europe and America;
• more concentrated knowledge of one area of the world—the United States, Europe, or world areas—acquired through upper-division study; and
• knowledge of methodological alternatives in historical studies.

In addition, students completing the degree in history are expected to acquire:
• research skills sufficient to conduct an investigation, consulting appropriate works for developing a bibliography;
• analytical skills sufficient to distinguish between primary and secondary sources, to analyze arguments and interpretations, and to recognize conflicts;
• the ability to interpret evidence found in primary sources and develop an historical argument based on and sustained by the evidence available; and
• writing skills sufficient to write an historical essay that is coherent, cogent, and grammatically correct.

Bachelor's Degree Program

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

**Major Requirements**

**Semester Hours**

Completion of 36 hours in history courses with grades of C (2.00) or better (21 hours must be upper division).

- HIST 1015 The United States to 1865
- HIST 1025 The United States since 1865 or HIST 1035 Honors: The United States to 1865 and HIST 1045 Honors: The United States since 1865 ........................................ 6
- HIST 1010 and 1020 Western Civilization I and II or HIST 1030 and 1040 Honors: Western Civilization I and II ........................................ 6
- Complete one of the following:
  - HIST 1038 Introduction to Latin American History
  - HIST 1208 Introduction to African History
  - HIST 1308 Introduction to Middle Eastern History
  - HIST 1608 Introduction to Chinese History
  - HIST 1708 Introduction to Japanese History
  - HIST 1099 Introduction to Third World History ........................................ 3
- Complete HIST 4020 Comparative World History ........................................ 3
- Complete a twelve-hour concentration at the upper-division level in either United States, European, or world areas (African Asian Latin American-Middle Eastern) history, including a 3000-level seminar in the area of the concentration (senior history majors may, with instructor consent, substitute a 6000-level course).

Note: No more than 45 semester hours in history apply to graduation requirements. Students must have a grade point average of at least 2.00 in the major in order to graduate. Students may receive credit for HIST 1020 and/or 1015-1025 by obtaining a score of 4 or better on the high school Advanced Placement history test(s).

(CLEP tests are not accepted.) Transfer students majoring in history must complete at least 12 semester hours of upper-division history courses at the University of Colorado at Boulder.

MINOR PROGRAM

The history department offers a minor in history requiring 21 credit hours. Information regarding specific requirements can be obtained from the Department of History.

Graduate Degree Programs

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should read carefully requirements for advanced degrees in the Graduate School section of this catalog. The following are special departmental requirements. Additional information should be obtained from the Department of History.

Admission Requirements. For purposes of admission to the graduate program, the verbal portion of the Graduate Record Examination is required and a score in the 80th percentile or above is generally expected. Ph.D. applicants who do not have an M.A. degree from the department must also take the advanced history portion of the GRE. For these applicants, the department expects scores in the 80th percentile or above on the verbal portion and in the 70th percentile or above in the history portion.

**MAJOR'S DEGREE**

Prerequisites. As general preparation for graduate work in history, it is desirable that a student has a broad liberal arts education as well as a major in history. Candidates for graduate degrees may be required to pursue such fundamental courses in history as the department deems necessary to provide a suitable historical background.

Residence. While it is possible to obtain the M.A. degree in two full semesters of residence, more time is generally necessary.

Degree Requirements. The required qualifying examination is met by a satisfactory score on the Graduate Record Examination. A total of 24 semester hours of course work plus 6 hours of M.A. thesis, or 30 semester hours of course work without a thesis, is required for the degree. A comprehensive examination must be passed in the field of study before the degree is granted. Applicants should request a copy of the Graduate Student Handbook from the Department of History.

**DOCTORAL DEGREE**

Prerequisites. Students who wish to work toward the Ph.D. degree in history must indicate knowledge of certain fields of history, acquaintance with the fundamental tools of historical scholarship, and the ability to do original work. The departmental preliminary evaluation for the Ph.D. program is the successful completion of the M.A. degree in history (or its equivalent) and the positive recommendation of the graduate admissions committee that the student be admitted to the program.

Residence. At least three years of graduate study, two of which must be spent in residence, are required for the Ph.D. degree.

Degree Requirements. A total of 30 classroom credit hours, at least 15 of which must be taken at this University, and a dissertation are required for the degree. A minimum of one foreign language is required; however, students must be able to use those languages essential to research and advanced study in their respective fields.

A comprehensive written and oral examination, a dissertation which is an original contribution to knowledge, and an oral examination on the dissertation must be successfully completed. Applicants should request the Graduate Student Handbook from the Department of History.

**HISTORY AND PHILOSOPHY OF SCIENCE**

The College of Arts and Sciences offers courses in the history and philosophy of science. These courses are PHIL 3410, 3430, and 3440. The three semesters cover three distinct time periods: ancients to Newton, Newton to Einstein, and the twentieth century. Of related interest are PHIL 3400 Philosophy of Science, PHIL 4450 or PHYS 4450 History and Philosophy of Physics, and HIST 4314 History of Science from the Ancients to Sir Isaac Newton.

The history and philosophy of science committee sponsors a series of lectures by visiting scholars as well as a biweekly seminar by both visiting and local scholars. Each spring there is a regional conference on the history and philosophy of science. Cassette tape recordings of the lectures and seminars are available on loan from the committee office.

No formal major is offered in the history and philosophy of science, but interested students may design their own majors in this area through the individually structured major, with the aid of a faculty advisory committee and the approval of the dean of the College of Arts and Sciences. Information may be obtained from the committee on the history and philosophy of science.

Students are also encouraged to consider a distributed studies major in either history or philosophy with courses on the history and philosophy of science, or a major in one of the scientific disciplines with courses in the history and philosophy of science as electives. In addition, physics majors pursuing plan 2 may take history and philosophy of science courses to satisfy the interdisciplinary requirement.
HONORS PROGRAM

The Honors Program is designed to provide special educational opportunities for highly motivated students. It is open to well-prepared freshmen, as well as to students who enter the program at a later stage. The Honors Program offers a guide to a carefully constructed curriculum in the liberal arts, thoughtful advising, close contact with faculty and with other honors students, and an opportunity to write an honors thesis.

Faculty members teaching honors seminars are carefully selected for their interests and enthusiasm, for teaching ability in small discussion classes, and for insistence on high standards. The emphasis is on working. These are seminars designed for the student who welcomes challenge, who knows that the mind expands only with effort, and who willingly accepts the opportunity. Honors courses strive to be integrative. They encourage students to combine and synthesize concepts and methodologies from other courses and disciplines. Many honors courses are consciously interdisciplinary, but all stimulate students to structure their total academic experience into a meaningful framework.

The Honors Program is also responsible for determining which students merit the award of the bachelor's degree with honors: cum laude, magna cum laude, and summa cum laude. These awards are made on the basis of special honors work and not simply on the basis of grades earned in courses.

The student may participate in either departmental honors or general honors, or both. Departmental honors may require a junior or senior honors seminar, an independent research project, and/or directed readings. Each department has information pertaining to its own particular program. The general honors program is designed to help students explore areas outside their major fields and to broaden the basis of their liberal education. Each year over 50 honors courses in a wide variety of areas are offered; with one or two published exceptions, each course is limited to an enrollment of approximately 15 students.

Kittredge Honors Program (KHP) is the optional residential component of the program. KHP, open to a limited number of qualified entering first year students, consists of small classes offered in the residence hall as well as opportunities to participate in extracurricular activities. There is an additional charge for the Kittredge Honors Program.

Detailed information concerning the Honors Program may be obtained in the honors office in Norlin Library. Qualified students may register for courses in the Honors Program at the honors office in Norlin Library.

Freshmen in the top percentile of the entering class are invited to join the Honors Program. Students currently enrolled are accepted on the basis of academic achievement at CU-Boulder. While honors students are expected to have a grade point average of at least 3.30, it should be emphasized that no student who shows ability and promise is excluded from consideration. This is a program of excellence and commitment in which the best teaching faculty is committed to serve the most highly motivated students for the benefit of those students and the larger society.

HUMANITIES

Degree .................................................. B.A.

The undergraduate major in humanities emphasizes:
- knowledge of western literature in an interdisciplinary context;
- understanding complex works of art in different media (visual, literary, music, film); and
- a sense of human history.

In addition, humanities majors may expect to develop the following skills:
- the ability to analyze works of art in terms of style, structure, and cultural (historical) context;
- the ability to make connections among the arts;
- the ability to recognize meaningful connections with the past in order to develop a sense of self as well as critical and ethical judgment; and
- the ability to express thought clearly in both writing and speaking.

Bachelor's Degree Program

The humanities major takes an interdisciplinary approach to the arts. The major consists of three parts: interdisciplinary work within the Department of Humanities; course work in the literature of a single language (English, French, German, etc.); and a secondary field of concentration (fine arts, music, philosophy, etc.). Since the program is tailored as much as possible to individual students' interests, majors should see their humanities advisor each semester.

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below. Early completion of the foundation courses, HUMN 1010 and 1020, is essential.

Major Requirements  Semester Hours
HUMN 1010 and 1020 Introduction to Humanities 1 and 2.................................12
Upper-division humanities courses..................................18
Language/literature courses (These must be within a single language—English or a foreign language, ancient or modern. First-year courses in a foreign language may not be counted).................................18
Courses chosen from a single one of the following areas: foreign language literature (first-year courses or course work in translation may not be counted); fine arts, music, dance, theatre, film, philosophy, other disciplines........12

INDIVIDUALLY STRUCTURED MAJOR

Degree .................................................. B.A.

An individually structured major may be designed by a student during the sophomore year in consultation with a three-member faculty advisory committee. The major must be approved by the dean of the College of Arts and Sciences; and, once approved, may be amended only with approval of the student's committee and the dean. The proposal must include a senior thesis (ARSC 4909) for a maximum of 6 semester hours of credit. This major cannot be used as part of a double major program. Guidelines and proposal applications, as well as advising, are available in the College of Arts and Sciences dean's office.

INTERNATIONAL AFFAIRS

Degree .................................................. B.A.

With the increasing importance of world affairs to the United States, employment opportunities in government and in international organizations, agencies, and businesses have expanded enormously. Today there is an urgent need for college graduates with a strong background in international affairs. To meet this need the University of Colorado offers a comprehensive and flexible interdisciplinary program in international affairs leading to the B.A. degree.

The following areas of knowledge are central to the undergraduate degree in international affairs:
- knowledge and understanding of the major political, economic, social, and cultural problems facing the international community, including international economic relations, world population, and resource utilization;
- knowledge of the international political system in the broadest global context, of
international organizations and alliances, and of foreign political systems and processes;
• awareness of the ethical issues involved in international relations;
• knowledge of patterns of conflict and cooperation among nations;
• knowledge of the chief historical factors that give rise to existing international institutions and processes; and
• knowledge of the problems and issues in American foreign policy.

In addition, students completing the degree in international affairs are expected to acquire:
• the ability to analyze an international problem from a political, economic, historical, and cultural perspective;
• the ability to read, critically evaluate, and synthesize information obtained from international affairs literature;
• the ability to analyze international phenomena critically so as to separate the essential from the irrelevant and to identify the probable; and
• the ability to communicate, orally and in writing, findings to other students of international affairs and to a broader audience.

Bachelor’s Degree Program

Students must complete the general requirements of the College of Arts and Sciences and the major requirements in the three categories listed below.

1. Core Courses. Completion of 41 hours with a grade of C (2.00) or better (none may be taken pass/fail), distributed as follows:

   Major Requirements          Semester Hours

   Lower Division (17 hours)
   ECON 2010 Principles of Microeconomics ....3
   ECON 2020 Principles of Macroeconomics ...4
   PSCI 1101 The American Political System ....3
   PSCI 2012 Introduction to Comparative Politics: Developing Political Systems ............3
   PSCI 2222 Introduction to International Relations ...........................................3

   Upper Division (24 hours)
   ANTH 4500 Crosscultural Aspects of Socioeconomic Development or ANTH 4580 Power: Anthropology of Politics or GEOG 4682: Geography of International Development ....3
   ECON 3403 International Economics and Policy .............................................3
   ECON 4433 Economic Relations Among the United States, Japan, and Canada or ECON 4714 Comparative Economic Systems or ECON 4774 Economic Development: Theory and Problems or ECON 4784 Policies of Economic Development or ECON 4999 Defense Economics ......................................3
   GEOG 4712 Political Geography ............3
   HIST 4412 Twentieth-Century Europe or three hours of contemporary history in area of concentration if other than Western Europe .............................................3
   PSCI 4142 International Relations or PSCI 4192 International Behavior or PSCI 4202 Alternative World Futures or PSCI 4282 Global Issues .............................................3
   PSCI 4162 American Foreign Policy or HIST 4126 Diplomatic History of the U.S. since 1920 .................................................................3
   PSCI 4172 International Organization or PSCI 4182 International Law .....................3

2. Area Requirement. Completion of 12 hours of upper-division courses concentrating on the whole or part of a region outside the United States. These courses should be chosen in consultation with the director of the program. None may be taken pass/fail. A minimum course grade of C (2.00) is required.

3. Language Requirement. A third-year proficiency in a foreign language appropriate to the area of concentration. This requirement may be met by completion of two third-year, university-level grammar courses in the language with a grade of C (2.00) or better, or by certification from the appropriate department of such competence.

   Recommendations:
   a. All international affairs majors should have a good command of the English language.
   b. Students should choose electives with a view to their relevance to this program.
   c. During the semester prior to graduation, each student must complete a statement of major status obtained from the office of the College of Arts and Sciences.
   d. Students in the international affairs program are encouraged to consider the possibility of participating in one of the study abroad programs directly or indirectly affiliated with the University of Colorado. Students wishing to participate in such a program should contact their advisor and the chair of the committee on international affairs to work out an appropriate program. Some variation in the general requirements are permitted in these cases.

   The specific courses that may be counted to meet the requirements in this program are determined by the committee on international affairs and the Dean of the College of Arts and Sciences.

KINESIOLOGY

Degrees........................................B.A., M.S.

The primary aim of the kinesiology program is to provide students with a scholarly understanding of the multidimensional aspects of the study of human movement and performance. This degree plan is designed for students wishing to prepare for graduate work in kinesiology or careers in such areas as fitness management, cardio and physical rehabilitation, corporate or industrial fitness, sports psychology, human factors, physical therapy, or premedicne.

The following areas of knowledge are central to the undergraduate degree in kinesiology:
• knowledge of human movement and performance related to the major sub-disciplines and their interactions, including the historical and philosophical foundations of kinesiology and its development as an academic discipline; the fundamentals of human anatomy, physiology, and biomechanics; physiological and biochemical adaptations to exercise and movement; the psychological effect of exercise and movement on both individual and group behavior, and the effect of psychological variables on human performance; and the principles governing the acquisition and development of motor skills and concepts concerning the control of movement;
• knowledge of the methods of research in the study of human movement; and
• understanding of potential applications of kinesiological information in practical settings.

In addition, students completing the degree in kinesiology are expected to acquire:
• the ability to observe human movements and performance to describe and understand the physical principles involved and the muscular actions required for stability and control of the action;
• the ability to assess human movement and performance using basic laboratory equipment, and to interpret findings;
• the ability to communicate kinesiological knowledge through the written and spoken word;
• the ability to read and interpret current scientific journal articles concerned with human movement and performance with an understanding of the methods, procedures, statistics, and design of the study; and
• the ability to synthesize this information and develop testable hypotheses based upon theory and past research.
Bachelor's Degree Program

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

**Major Requirements (continued)**

Recommended electives: CHEM 3331, 4711, 4724; MATH 1300, 2300; PSYC 4030, 4052; MCD B 3120, 3200; ASEN 3018; CSCI 1200, 1700.

**MINOR PROGRAM**

The Department of Kinesiology also has a minor program. For details, contact the main departmental office.

Graduate Degree Program

To obtain materials for application and for any additional information, address inquiries to the graduate coordinator of the Department of Kinesiology.

**DEPARTMENTAL REQUIREMENTS**

Students may follow plan I (thesis) or plan II (non-thesis) for the degree program. The minimum requirement for plan I may be fulfilled by presenting 30 semester hours of approved graduate work, including 4-6 semester hours of thesis. The minimum requirement for plan II may be fulfilled by presenting 33 semester hours of approved graduate course work. Candidates in plan I or plan II must also pass the departmental written examination, satisfy the breadth area requirement, and demonstrate evidence of participation in a research experience.

**MASTER OF SCIENCE DEGREE**

**Prerequisites.** Entering graduate students must have an undergraduate preparation equivalent to the basic core curriculum requirements in kinesiology at the University of Colorado or make up any undergraduate deficiencies. The following requirements have been established by the department as basic core requirements. All students must have had a basic laboratory experience (exercise physiology students must have had an undergraduate exercise physiology laboratory course) and an introductory statistics or research design course. In addition, students are required to have completed four of the following five courses or their equivalent: KINE 3500 Human Development and Movement Behavior; KINE 3710 Social Psychological Aspects of Physical Activity; KINE 3720 Motor Learning and Performance; KINE 4540 Analysis of Human Movement; and KINE 4650 Exercise Physiology. Satisfactory scores on the Graduate Record Examination tests are also required for admission to the department's graduate program for regular or provisional degree status. These scores should be submitted at the time of application for admission to pursue a graduate degree.

**Deficiencies.** If the undergraduate preparation does not include required basic core courses, the student may be allowed to pursue graduate study with the understanding that certain deficiencies must be completed. The nature and extent of these deficiencies are determined by the graduate coordinator and the graduate committee of the department.

Deficiencies in any area of the undergraduate major may be met by completing approved course work in the subject or by satisfactory examination. Courses taken to meet deficiencies may not be counted toward the master's degree. All entering graduate students with deficiencies must satisfy at least one deficiency per semester until all prerequisites are satisfied. The prerequisites may be taken on a pass/fail basis. Graduate courses taken before removing deficiencies may be accepted for graduate degree credit only if prior approval of the graduate coordinator has been granted.

**Program Option Requirements.** Students may elect to specialize in one of the three following program options: exercise physiology, motor behavior, or general studies. Courses in the stated program option are to be selected in consultation with the student's graduate advisor.

**Basic Requirements.** In addition to the specific program options, the following are required of all students for the master of science degree: KINE 5830 (Applications of Statistics to Kinesiology), KINE 6830 (Methods of Research in Kinesiology); a minimum cumulative grade point average of 3.00 in all graduate work undertaken; satisfactory performance on the departmental written examination; completion of the breadth area requirement; demonstration of participation in a research experience; and requirements for advanced degrees as stipulated by the Graduate School. For students enrolled in plan I, KINE 6950 (Master's Thesis) is required; for students enrolled in plan II, additional course work is required.

**Comprehensive Examination.** All candidates are required to complete an oral examination covering the thesis research project, or research experience, as well as a written departmental examination covering course work leading to the degree.

LATIN AMERICAN STUDIES

**Degree: B.A.**

The considerable value of an understanding of Latin America is generally evident today. The Latin American Studies Program offers a broad and flexible interdisciplinary approach designed to provide a comprehensive understanding of Latin America. The curriculum leads to the bachelor of arts with a major in Latin American studies.

The following areas of knowledge are central to the undergraduate degree in Latin American studies:

- knowledge of both humanistic and social science methods as they apply to contemporary understanding of Latin America;
• an informed awareness of the social, economic, and political circumstances in at least one Latin American nation, and an in-depth understanding of the historical development of that nation; and
• an informed awareness of the creative arts in Latin America, including familiarity with the work of several recognized Latin American artists.

In addition, students completing the degree in Latin American studies are expected to acquire:
• reading and speaking ability in at least one of the primary languages of Latin America (Spanish or Portuguese);
• the ability to engage in thoughtful dialogue about Latin America with educated Latin Americans;
• the ability to locate Latin American ideas, historical events, and cultural phenomena in the Latin American context from which they originate and
• the ability to communicate competently in effective English prose.

**Bachelor's Degree Program**

1. Satisfaction of the regular arts and sciences requirements for the bachelor of arts degree.

2. Demonstrated proficiency in Spanish or Portuguese (successful completion of at least one upper-division Spanish or Portuguese course).

3. A total of 30 hours from designated courses. Of these 30 hours, 12 must be lower division, and of these 6 must be in the area of social sciences (anthropology, economics, geography, history, political science, religious studies, and sociology) and 6 in the area of humanities (Chicano studies, fine arts, Latin American studies, Spanish and Portuguese, and music).

In addition, 18 hours of upper-division credit are required, and of these 9 must be in the social science area and 9 in the humanities.

4. There are two courses required of all Latin American studies majors: LAMS 1000 Introduction to Latin American Studies, and LAMS 4815 Senior Seminar in Latin American Studies. The 6 hours of credit earned in these two courses may be counted toward the 30 credit hours required for the major and may be applied in either the social science or the humanities area.

In addition, while students cannot receive credit toward the major in lower-division courses in the language presented for proficiency (Spanish or Portuguese), they may receive up to 6 hours of lower-division humanities credit for courses taken in the language not presented for proficiency (i.e., students who demonstrate proficiency in Spanish may receive 6 hours of credit for lower-division courses in Portuguese, and vice versa).

5. The committee on Latin American studies maintains a list of courses that meet the requirements for the Latin American studies major. The list is available in both the College of Arts and Sciences office and in the office of the director of the Latin American Studies Program.

6. Latin American studies majors are strongly encouraged to include a study abroad semester or summer in their academic program.

**Certificate in Latin American Studies**

A certificate is awarded to students who, while majoring in another area, demonstrate strong participation in Latin American studies. Students who satisfy the following requirements are eligible for the certificate in Latin American studies:

1. Demonstrated proficiency in Spanish or Portuguese (successful completion of at least one upper-division Spanish or Portuguese course).

2. At least 12 hours of credit in upper-division courses chosen from the Latin American studies list. Of these, at least 6 hours must be in social sciences and 6 in humanities. (This is the same as the upper-division requirement for the major).

3. Students must take LAMS 4815 Senior Seminar in Latin American Studies.

**LINGUISTICS**

<table>
<thead>
<tr>
<th>Degree</th>
<th>B.A.</th>
<th>M.A.</th>
<th>Ph.D.</th>
</tr>
</thead>
</table>

The undergraduate major stresses the study of language as a basic human faculty and as a changing social institution. It provides a general education valid in its own right or as a background for further studies in linguistics or in other areas in which language plays a role such as social sciences, communication, computer science, law, or education.

The core of the major is a set of courses, taught in the Department of Linguistics, on the nature of language. In addition, the major draws on courses offered in other areas of the University.

The following areas of knowledge are central to the undergraduate degree in linguistics:
• knowledge of the fundamental architecture of language in the domains of phonetics and phonology, morphology and syntax, and semantics and pragmatics;
• knowledge of the general variety of structures by which diverse human languages realize this architecture;
• knowledge of the main interactions between language, culture, and society, including the role of language as a cultural institution and the social functions of language diversity;
• knowledge of the processes of language change over time and their consequences for the diversity and similarity of the world's languages; and
• knowledge of the approaches to the study of language that are used by a discipline other than linguistics.

In addition, students completing the degree in linguistics are expected to acquire:
• proficiency in a second language equivalent to the third-year university level;
• the ability to infer language structures from the data analysis of unfamiliar languages; and
• the ability to give coherent general interpretations of common language phenomena in terms of language structure and language use.

**Bachelor's Degree Program**

Majors in linguistics must complete a total of 45 hours of study in general linguistics, a natural language, and appropriate language-related electives. Language study, and some of the elective hours, may be taken in other departments.

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

**Major Requirements**

<table>
<thead>
<tr>

<td>3</td>
</tr>
</tbody>
</table>

**Natural Language.** Students must complete with a grade of C (2.00) or better a minimum of 15 semester hours of study of a natural language. Ordinarily the language chosen is a language which the student does not know natively. All hours offered in satisfaction of this requirement must be in a single language and at the 2000 level or above. The natural language requirement is waived for foreign students whose native language is not English.
Electives. A minimum of 9 elective hours must be completed with a grade of C (2.00) or better:

One course chosen from ........................................3
CDSS 3006 Introduction to Speech and Hearing Sciences
PHIL 3490 Philosophy of Language
PSYC 4220 Psycholinguistics
SOCY 3121 Sociology of Language

Two courses in linguistics (in addition to the 21 hours above) ................................................................. 6

MINOR PROGRAM

The Department of Linguistics also has a minor program. For details, contact the departmental office.

STUDY ABROAD

Language study and some courses in the major may be completed in University or University-affiliated study abroad programs, and such study is recommended. Students interested in doing part of their major work in a study abroad program should discuss the matter with their advisor before going abroad. For information on study abroad programs, consult the Office of International Education.

GRADUATION WITH HONORS

The honors program in linguistics offers the opportunity for highly motivated undergraduates to undertake a deeper and more individualized study of linguistics than is provided by the regular B.A. curriculum. Linguistics majors with an overall grade point average of 3.30 or higher are eligible to participate in the program. Honors that may be earned are cum laude (with honors), magna cum laude (with high honors), and summa cum laude (with highest honors).

Students interested in pursuing departmental honors are encouraged to consult with the departmental undergraduate advisor by the beginning of their junior year to ensure that they will be able to meet the requirements for departmental honors before graduation.

Graduate Degree Programs

Students wishing to pursue graduate work in linguistics should read carefully Requirements for Advanced Degrees in the Graduate School section of this catalog and the detailed degree requirements available from the department office. A brief summary of M.A. and Ph.D. requirements is given below.

Prerequisites. Applicants should hold a recognized baccalaureate degree. They should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by use of the language in a country, community, or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level. GRE aptitude scores are required from United States residents; scores are also required from native speakers of English who wish to be considered for fellowship aid. TOEFL scores are normally required from foreign applicants.

MASTER’S DEGREE

Completion of an M.A. degree normally calls for a minimum of three semesters of study. Students with 12 or more semester hours of linguistics courses are expected to undertake a plan I degree, which includes a thesis. The course requirements in plan I are 24 semester hours of graduate courses, including 4-6 thesis hours. Students with fewer than 12 hours of linguistics, or who wish an emphasis on the teaching of English as a second language (TESOL), may be permitted by the department to undertake a plan II degree. The course requirements in plan II are 30 semester hours of graduate courses. Both degree plans also require that students pass an examination of reading knowledge of French, German, or another approved language, and a comprehensive examination.

DOCTORAL DEGREE

In order to be admitted to the Ph.D. program a student must have completed course work equivalent to LING 5030 Linguistic Phonetics, LING 5410 Phonology, LING 5420 Morphology and Syntax, LING 5430 Semantics and Pragmatics, LING 5450 Introduction to Formal Syntax, and LING 5570 Introduction to Diachronic Linguistics. Students enrolled in the M.A. program may apply to the Ph.D. program upon completion of these requirements, whether they have completed the M.A. or not. Students who enroll in the Ph.D. program before finishing the M.A. may apply for the M.A. degree upon passing the doctoral preliminary examination, provided that all requirements for the M.A. except the comprehensive examination have already been met.

Students admitted to the Ph.D. program elect to pursue either cognitive linguistics or general linguistics. It is also desirable that students select a specialization as early as possible. In either area it is possible to specialize in phonetics/phonology, morphology/syntax, semantics/pragmatics, or text and discourse analysis. In cognitive linguistics, additional specialization in language acquisition, natural language processing, speech processing, and psycholinguistics is available. Students who elect general linguistics may choose among the additional alternatives of typological comparison, historical linguistics, Amerindian linguistics, or African linguistics.

MATHEMATICS

Degrees ……...B.A., M.A., M.S., Ph.D.

The Department of Mathematics offers a degree program leading to the B.A. degree in mathematics in the College of Arts and Sciences. A B.S. degree in applied mathematics is also offered through the College of Engineering and Applied Science. For information regarding the applied mathematics program, please contact the applied mathematics office.

The following areas of knowledge are central to the undergraduate degree in mathematics:

• knowledge of basic real analysis of one variable;
• knowledge of calculus of several variables and vector analysis;
• knowledge of basic linear algebra and theory of vector spaces;
• knowledge of the structure of mathematical proofs and definitions; and
• knowledge of at least one additional specialized area of mathematics.

In addition, students completing a degree in mathematics are expected to acquire:

• the ability to use techniques of differentiation and integration of one and several variables;
• problem-solving capabilities using differentiation and integration;
• techniques for solving systems of linear equations;
• the ability to give direct proofs, proofs by contradiction, and proofs by induction;
• the ability to formulate definitions;
• the ability to read mathematics without supervision;
• the ability to write a simple computer program; and
• the ability to apply mathematics.

Bachelor’s Degree Program

Before receiving a bachelor's degree in mathematics, students must obtain a passing grade on a standardized major field achievement test administered by the Department of Mathematics. Mathematics majors must attain an overall grade point average of at least 2.00 in all mathematics courses numbered 1300 and above.
Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

**Major Requirements**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>MATH 3000 Introduction to Abstract Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 3130 Introduction to Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 3140 Introduction to Modern Algebra</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective mathematics courses numbered above 3000 (Note 1) may be selected from mathematics and natural science courses numbered above 3000 (Note 1) with the approval of the department. Elective mathematics course numbered above 4000 (Note 1) must be approved by the department.

**Residency Requirement**

For the B.A. degree in mathematics, all students must have completed at least 9 semester hours of upper-division mathematics courses, with grades of C (2.00) or better, taken in the College of Arts and Sciences on the Boulder campus. Students may transfer from other universities or from other campuses of the University of Colorado that are approved to meet the minimum 21-hour upper-division requirement must be approved by the Department of Mathematics. Courses accepted as mathematics credit but excluded from the minimum 21-hour upper-division requirement will count in the 45 maximum hours allowed in mathematics.

Undergraduate students planning to do graduate work in mathematics should take MATH 4320 and should fulfill the College of Arts and Sciences language requirement with German, French, or Russian. Students seeking the B.A. degree may choose a program emphasizing preparation for graduate work, computer science, preparation for secondary teaching, or applied mathematics.

**Minor Program**

The Department of Mathematics also offers a minor in mathematics. For further information, please contact the department.

**Graduate Degree Programs**

The Department of Mathematics offers programs leading to the degrees M.A. or Ph.D. in mathematics and M.S. in applied mathematics. The Ph.D. in mathematical physics is also offered in cooperation with the Department of Physics. (Mathematical physics is listed under Interdepartmental Programs in the Graduate School section of this catalog.) Students interested in any of these programs should read carefully the material describing the University requirements in the Graduate School section of this catalog.

The prerequisite for graduate work in mathematics is at least 30 semester hours in mathematics, including two semesters of advanced calculus, a semester of linear algebra, and a semester of either modern algebra or differential equations, with a grade of B or better. GRE scores are required to be considered for financial support.

The basic requirements for the various degrees are summarized here, and full details are available in the department office. For fulfillment of all course requirements, mathematics courses must be numbered 5000 or higher. No language is required of master's students.

To earn an M.A. degree under the thesis plan, a student must complete 27 semester hours of graduate course work, including two courses that are approved full-year courses, and 4 to 6 semester hours of thesis work. For the nonthesis plan, 30 semester hours of course work are required. Two of those courses must be approved two-year courses and no more than 6 hours of graduate mathematics seminars can be used.

For the M.S. degree, 30 semester hours of graduate course work are required. Of these, 6 to 12 semester hours must be in an approved minor program outside the mathematics department.

To earn an M.A. degree or an M.S. degree, a student must pass a master's examination based on the particular program of the student.

Before being admitted to candidacy for the Ph.D. degree in mathematics, a student must pass examinations in real analysis, modern algebra, and a third topic chosen by the student, with approval. The basic requirements for a Ph.D. degree in mathematics are as follows: demonstration of reading knowledge of two languages, one of which must be French, German, or Russian (see departmental requirement sheet for language options); at least 30 hours of graduate course work and 30 hours of thesis; a written thesis that contains substantial original contributions to mathematics, and successful completion of a final examination.

**MEDIEVAL STUDIES**

To the Middle Ages, the modern world owes the preservation and transmission of Latin and Greek; the development of a host of vernaculars; the evolution of Judaism and Christianity; and the rise of Islam; the renewed study of Roman law; the growth of a mercantile class; the creation of musical notation; the erection of ecclesiastical monuments; the foundations of constitutional government; and the institution of universities. The Committee on Medieval Studies is founded on the conviction that the European Middle Ages are a dynamic cultural continuum and ever-evolving system. The unity and diversity of the medieval period can only be understood and appreciated from an interdisciplinary perspective. Medieval Studies therefore necessarily crosses boundaries of nation, language, and discipline, and the committee's prime function is to facilitate and encourage interdisciplinary study and teaching.

The following courses are available to students whose area of specialization within a given department is the medieval period and who wish to broaden their knowledge of medieval culture. With the approval of the major department, a coherent group of these courses may be accepted as a related program of study and as part of the requirements for an advanced degree. For additional details concerning these courses, see departmental listings.

Graduate training in anthropology, botany, entomology, paleontology, and zoology is provided under the direction of museum faculty in cooperation with cognate departments and the master of basic science program. Areas of study include:

- archaeo-anthropological theory and interpretation
- southwestern archaeology and ethnology
- textile history and analysis
- early humans in North America
- plant taxonomy, evolution, and phytogeography
- vertebrate paleontology and Cenozoic stratigraphy
- lower vertebrate paleontology
- African Tertiary faunas and paleoenvironments
- paleoecology
- biology of mollusks
- systematic and ecology of mammals
- biology of aquatic invertebrates
- systematic and population biology of insects of the Rocky Mountain Region
- plant and insect interaction

Museum assistantships, research support from the Walker Van Riper and William Henry Burt museum funds, and other financial assistance are available to selected students. Students interested in working toward advanced degrees in the above areas under the direction of museum faculty should write the University of Colorado Museum, Campus Box 218, University of Colorado at Boulder, Boulder, CO 80309-0218.

Applicants accepted for graduate work by museum faculty must be admitted to the Graduate School and to the graduate program of the cognate department.

Courses offered by museum faculty through cooperating departments are listed below.

- GEOL 6950 Master's Thesis ........ 1-6

### ORIENTAL LANGUAGES AND LITERATURES

#### Chinese Degree

B.A., M.A.

Students may choose to major in either Chinese or Japanese. In either case they receive a thorough grounding in the modern language, an introduction to the classical language and literature, and a broad familiarity with the literary and cultural history of the selected area.

Before registering for specific courses, students should consult with a departmental advisor concerning appropriate placement in language classes. Also, students interested in Chinese or Japanese are encouraged to broaden their career options through a double major, combining either language with another field of interest.

Recent graduates have found positions in government service, international business, and secondary-school teaching; others have gone on to graduate study in Chinese or Japanese.

#### Bachelor's Degree Programs

**CHINESE**

The following areas of knowledge are central to the undergraduate degree in Chinese:

- an awareness of the fundamental outlines of the history of Chinese literature, from the Shih ching to the present;
- familiarity with selected canonical or widely recognized works;
- awareness of the historical and cultural
contexts in which particular works were written;
• awareness of basic critical methodologies as applicable to different genres of literature;
• awareness of the importance of language to intellectual development and vitality; and
• awareness of the challenges, deficiencies, and possible gains inherent in the process of translating from one language to another.

In addition, students completing the degree in Chinese are expected to acquire:
• the ability to read modern Chinese with sufficient fluency to analyze texts without being hindered by grammatical problems;
• the ability to read classical Chinese, with the aid of appropriate reference works, at the level at which the text may begin to be appreciated for its literary value;
• the ability to speak and comprehend Mandarin sufficiently for all situations in daily life and for a basic level of academic conversation;
• the ability to analyze and interpret literary texts in terms of style, structure, character, themes, and use of allusion; and
• the ability to communicate such interpretations competently in standard written English.

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

Major Requirements  Semester Hours
Successful completion of 30 credit hours of courses in Chinese language and literature, beyond the beginning (i.e. first-year) level. At least 18 credit hours must be in upper-division courses.

CHIN 2110-2120 Intermediate Chinese 1 and 2 ................................. 10
CHIN 3110-3120 Advanced Chinese 1 and 2 ................................. 6
CHIN 3210 Introduction to Classical Chinese ................................. 3
CHIN 3220 Readings in Classical Chinese ................................. 3
Any two of the following courses:
CHIN 4811 Worlds of Ancient and Medieval Poetry ................................. 3
CHIN 4821 Chinese Fiction in Translation ................................. 3
CHIN 4841 Women and the Supernatural in Chinese Literature ................................. 3
CHIN 4851 Twentieth-Century Literature in Translation ................................. 3

JAPANESE
The following areas of knowledge are central to the undergraduate degree in Japanese:
• an awareness of the fundamental outlines of the history of Japanese literature, from the Nara period to the present;
• familiarity with selected canonical or widely recognized works;
• awareness of the historical and cultural contexts in which particular works were written;
• awareness of basic critical methodologies as applicable to different genres of literature;
• awareness of the importance of language to intellectual development and vitality; and
• awareness of the challenges, deficiencies, and possible gains inherent in the process of translating from one language to another.

In addition, students completing the degree in Japanese are expected to acquire:
• the ability to read modern Japanese with sufficient fluency to analyze texts without being hindered by grammatical problems;
• the ability to read classical Japanese, with the aid of appropriate reference works, at the level at which the text may begin to be appreciated for its literary value;
• the ability to speak and comprehend Japanese sufficiently for all situations in daily life and for a basic level of academic conversation;
• the ability to analyze and interpret literary texts in terms of style, structure, character, themes, and use of allusion; and
• the ability to communicate such interpretations competently in standard written English.

Major Requirements  Semester Hours
Successful completion of 30 credit hours of courses in Japanese language and literature, beyond the beginning (i.e. first-year) level. At least 18 credit hours must be in upper-division courses.

JPNS 2110-2120 Intermediate Japanese 1 and 2 ................................. 10
JPNS 3110-3120 Advanced Japanese 1 and 2 ................................. 6
JPNS 3441 Language and Japanese Society ................................. 3
JPNS 4110-4120 Readings in Classical and Modern Japanese 1 and 2 ................................. 6
JPNS 4811 Classical Japanese Literature in Translation ................................. 3
JPNS 4821 Modern Japanese Literature in Translation ................................. 3

COURSES TAUGHT IN ENGLISH
The department offers several courses in translation. These courses require no previous study of the language, history, or culture of the area involved and are open to all interested students, whether majors in this department or not. They provide excellent introductions to Chinese or Japanese literary and cultural history. CHIN 1051 is a core curriculum course that focuses on the "Great Books" of China, both ancient and modern. CHIN 4811, 4821, 4841, and 4851 focus, respectively, on Chinese poetry, fiction, the worlds of women and the supernatural, and contemporary literature.

JPNS 1051 is a core curriculum course focusing on both ancient and modern "Great Books" of Japan. JPNS 4811 and 4821 focus, respectively, on classical and modern Japanese literature.

STUDY ABROAD
All students planning a major in Chinese or Japanese are encouraged to consider study abroad in order to improve their language ability. The University of Colorado is affiliated with study abroad programs based at National Taiwan University, Taipei, Taiwan; at Tunghai University, Taichung, Taiwan; and at Kansai Gaidai, Osaka, Japan. For further information, contact the Office of International Education. Note, however, that not more than 20 semester hours of transfer credit from universities in this country or abroad may count toward the major in Chinese or Japanese.

Master's Degree Requirements
Candidates for the M.A. in Chinese are required to present 24 hours of approved course work, plus a master's thesis (6 hours).
A student may, with approval of the graduate committee, present for graduation 30 hours of course work without a thesis. All other requirements apply. Contact the Department of Oriental Languages and Literatures for specific master's-level requirements.

PEACE AND CONFLICT STUDIES
The certificate program in Peace and Conflict Studies (PACS) has been developed for students who have an intellectual or moral commitment to issues of conflict and peace at any level, from international to personal, with varying emphases on action and theory. The certificate is issued by the Dean of Arts and Sciences, and is awarded in addition to a bachelor's degree in another field.
The program is not a replacement for the core curriculum or the departmental major, but a way of giving students an interdisciplinary integration. Students work with PACS advisors to set up individual programs within Peace and Conflict Studies that guide their selection of courses within the core and the major.
Within PACS, there is a range of over 100 relevant courses from 14 departments. The certificate program involves 24 hours of credit, including courses specific to and offered by the Peace and Conflict Studies Program. Additionally, students select up to nine hours from relevant courses in their major, together with a minimum of nine
hours of relevant courses outside the major; about one third of these optional courses satisfy core curriculum requirements.

Students from any major in the University, not just arts and sciences, are eligible for the program. Students majoring in departments such as history, philosophy, political science, or sociology (the sponsoring departments for the program) have more courses to draw on from within their major than those majoring in the natural sciences; students from the latter will need more hours from the list of PACS electives outside their major.

In some cases, the PACS focus is a way of applying and sharpening work within the major disciplines; in others, it is an opportunity to expand beyond major course work. In both cases, students are brought together with faculty and other students who share their interests and commitments.

Much variety is possible. Interested students should check with the PACS coordinator for further information about the program and participating faculty.

INTERNATIONAL AND NATIONAL VOlUNTARY SERVICE TRAINING (INVST)

A program in voluntary service training is available through the College of Arts and Sciences. The INVST Program offers a unique educational opportunity to all majors. This 16-credit-hour program is taken during the junior and senior years, and is designed to train students, both intellectually and experientially, in global development, human ecology, and social justice.

The INVST program is in the process of development, and courses and course offerings may change. For further information, interested students should contact the program office at 492-7719 or any of the program directors listed under the College of Arts and Sciences faculty.

PHILOSOPHY

Degrees..........................B.A., M.A., Ph.D.

The following areas of knowledge are central to the undergraduate degree in philosophy:

- knowledge of some of the principal philosophical texts in the history of western philosophy, from its beginnings in Greece to the late nineteenth century;
- knowledge of some of the main currents in twentieth-century philosophy, including some acquaintance with contemporary philosophical issues and modes of inquiry;
- more concentrated and detailed knowledge of a single major author or a single philosophical movement; and
- mastery of elementary formal logic.

In addition, students completing the degree in philosophy are expected to acquire:
- the ability to form reasoned opinions about the issues—moral, religious, political, etc.—that educated people debate;
- the ability to understand, analyze, and evaluate complex arguments and theories;
- the ability to distinguish between the main thrust of an argument or position and what is ancillary to it;
- the ability to discover and critically examine the underlying presuppositions of major systems of ideas or programs for action;
- the ability to see important connections between different systems of ideas or programs for action;
- the ability to explain difficult ideas and concepts in an informed, effective, and coherent manner;
- the ability to develop a thesis and present a coherent argument for it;
- the ability to write a clear and coherent essay; and
- the ability to engage in rational and productive discussion of issues and arguments.

Bachelor's Degree Program

For the undergraduate degree in philosophy, students must take 30 to 45 semester hours in philosophy, earning 30 hours with a grade of C- or better in philosophy and 2.00 (C) average for all work attempted in philosophy. Also, students must take 18 hours of upper-division work in philosophy with a grade of C- or better. No more than 8 hours of independent study may count toward the minimum requirements.

Students are advised to consult the current Registration Handbook and Schedule of Courses for the most accurate information on prerequisites, since these sometimes vary with instructors. Students should also obtain a copy of the complete course descriptions published each semester by the department.

Courses may be taken in any order providing prerequisites, if any, are met.

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

Major Requirements  Semester Hours

PHIL 3000 History of Ancient Philosophy  3
PHIL 3010 History of Modern Philosophy  3

Logic
PHIL 2440 Symbolic Logic  3
PHIL 4440 Mathematical Logic  3

Values
PHIL 3100 Ethical Theory  3

One of the following additional courses:
PHIL 2200 Major Social Theories  3
PHIL 3140 Environmental Ethics  3
PHIL 3160 Bioethics  3
PHIL 3190 War and Morality  3
PHIL 3200 Social and Political Philosophy  3
PHIL 3260 International Human Rights  3

Metaphysics and Epistemology
Two of the following courses:
PHIL 4340 Epistemology  3
PHIL 4360 Metaphysics  3
PHIL 4380 Philosophy of Mind  3
PHIL 4490 Philosophy of Language  3

Single Philosopher or Philosophical Movement
One of the following courses:
PHIL 4010 Single Philosopher  3
PHIL 4040 Twentieth-Century Philosophy  3
PHIL 4070 Existentialist Philosophy  3
PHIL 4080 Introduction to Phenomenology  3
PHIL 4090 Kierkegaard  3
PHIL 4250 Marxism  3

Topics
One of the following courses:
PHIL 2290 Philosophy and Women  3
PHIL 3600 Philosophy of Religion  3
PHIL 3700 Aesthetic Theory  3
PHIL 4260 Philosophy of Law  3
PHIL 4390 Philosophy of Science  3
PHIL 4730 Philosophy and Literature  3

Note: The department offers a number of topics and majors that are interdisciplinary in nature, including law and society, dimensions of self, philosophy and the arts, and values and social policy. Each of these majors requires two semesters in the history of philosophy, as well as a series of core courses that vary according to the topical emphasis. A student intending to complete a topical major in philosophy should see either the appropriate advisor in the area or the departmental undergraduate advisor as soon as possible.

MINOR PROGRAM

The department also offers a minor in philosophy. Details are available in the departmental office.

Graduate Degree Programs

Applicants for admission to the Graduate School for work toward a master's or doctoral degree with a major in philosophy are expected to have had 18 or more semester hours in undergraduate courses in the subject.

Students wishing to pursue graduate work in philosophy should note requirements for advanced degrees in the Graduate School section of this catalog and should obtain a copy of the Graduate Program in Philosophy from the department.
Bachelor's Degree Programs

Three different plans are available to students in physics (see Note 1). Because there is some flexibility within each plan, the department encourages students to pursue their own interests in setting up their curriculum. The final responsibility for fulfilling the requirements for the degree rests with the student.

Students who plan to major in physics should consult with their departmental advisor at least once per semester. Even if first-year students are only considering physics as a major, they are strongly encouraged to visit a departmental advisor and discuss the situation. Because most of the advanced physics courses have various prerequisites, failure to settle on an appropriate plan of study early in the college career can result in delay and complications later.

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below (see Note 2).

**PLAN 1**
Primarily for those planning graduate work in physics; includes 42 hours of physics courses.

**Major Requirements**

<table>
<thead>
<tr>

</tbody>
</table>

In addition, the following non-physics courses are required:

- MATH 1300 Analytic Geometry and Calculus 1
- MATH 2300 Analytic Geometry and Calculus 2
- MATH 2400 Analytic Geometry and Calculus 3
- APPM 2360 Introduction to Linear Algebra and Differential Equations
- Both MATH 3310 Introduction to Linear Algebra and MATH 4430 Ordinary Differential Equations
- CHEM 1111 and 1131 General Chemistry 1 and 2

**INTERDISCIPLINARY PROGRAM**

In addition to the above requirements, a student in plan 2 is required to complete 12 hours in a field other than physics with a demonstrable relation to physics. Courses in this chosen program may include physics electives beyond the basic 33 hours listed above. Physics elective courses may not be double counted for both the interdisciplinary program and the 33 hours of required physics courses.

Interdisciplinary courses should be selected with the concurrence of the student's advisor, usually before the junior year. Interdisciplinary courses must be approved by the arts and sciences advising committee; it is therefore imperative that students in plan 2 be in close contact with their advisors.
PLAN 3

For students intending to be secondary teachers; includes a minimum of 23 hours of physics and a minimum of 20 hours in education courses.

**Major Requirements**  
**Semester Hours**

PHYS 1110 and 1120 General Physics 1 and 2 ............................8
PHYS 1140 Experimental Physics ............................................1
PHYS 1150 Experimental Physics ............................................1
PHYS 2130 General Physics 3 ................................................3
PHYS 2150 Experimental Physics ............................................1
PHYS 2160 Experimental Physics ............................................1
PHYS 3210 Analytical Mechanics ............................................3
PHYS 3310 Principles of Electricity and Magnetism 1 ....................3
PHYS 3330 Junior Laboratory ................................................2

In addition, the following non-physics courses are required:

CHEM 1111 and 1131 General Chemistry 1 and 2 or CHEM 1151 and 1171 Honors General Chemistry 1 and 2 ..................10-12
MATH 1300 Analytic Geometry and Calculus 1 ..........................3
MATH 2300 Analytic Geometry and Calculus 2 .........................5
MATH 2400 Analytic Geometry and Calculus 3 .........................5
APPM 3350 Introduction to Linear Algebra and Differential Equations or both MATH 3130 Introduction to Linear Algebra and MATH 4430 Ordinary Differential Equations 4-6

Special requirements:

Students are required to take EDUC 3303 or pass a speech adequacy test before they can register for student teaching.

Biology and earth science (geology or physical geography): two semesters each.

History and/or philosophy of science: one semester.

The following education courses are taken in the student's senior year, which is known as the "professional year":

EDUC 4102 Foundations of American Education ..........................3
EDUC 4112 Educational Psychology and Adolescent Development 3
EDUC 4122 Principles and Methods of Secondary Education ...............2
EDUC 4912 Practicum in Teaching ........................................1
EDUC 4322 Teaching Reading in the Content Area .......................3
EDUC 4463 Teaching Exceptional Children in the Regular Classroom 2
EDUC 4382 Methods and Materials in Science ...........................3
EDUC 4712 Student Teaching .................................................14

Note: Recommended elective mathematics courses for students in this plan include MATH 3000 Introduction to Abstract Mathematics, MATH 3110 Introduction to Theory of Numbers, and MATH 3210 Euclidean and Non-Euclidean Geometries.

Curriculum Notes

1. Students may transfer among plans at any stage of their college career.

2. With the approval of an advisor, a student who starts with PHYS 2010 and then decides to become a physics major may go directly into PHYS 1120. Similarly, it is not essential for a student who has completed PHYS 2020 to take PHYS 1120 and 1140 before continuing with the major requirements.

**MINOR PROGRAM**

The department also offers a minor in physics. Details are available in the department office.

**Graduate Degree Programs**

Graduate study and opportunities for basic research are offered in the areas of nuclear physics, theoretical physics, condensed matter physics, elementary particle physics, plasma physics, atomic and molecular physics, laser physics, and fundamental measurements.

Doctoral programs in chemical physics and mathematical physics are offered jointly with the Departments of Chemistry and Mathematics respectively and in geophysics with the other departments that participate in the interdepartmental geophysics program. For information on these programs, see Interdepartmental Programs in the Graduate School section of this catalog.

In addition, a program leading to a Ph.D. in physics with a specialization in medical physics is offered jointly with the Department of Radiology at the Health Sciences Center.

**DEPARTMENTAL REQUIREMENTS**

Students wishing to pursue graduate work in physics leading to candidacy for an advanced degree should carefully read the requirements for advanced degrees in the Graduate School section of this catalog. Following are special departmental requirements.

**MASTER'S DEGREE**

**Prerequisites.** Entering graduate students must have a thorough undergraduate preparation in physics, equivalent to an undergraduate physics major at a recognized college or university. This preparation includes courses in general physics, analytical mechanics, electricity and magnetism, thermodynamics, quantum mechanics, and atomic and nuclear physics, as well as two semesters of general chemistry, and mathematics through differential equations and complex variables.

**Language.** The department has no foreign language requirement.

**Course Requirements.** There are two separate plans for obtaining the master's degree. Plan I includes a thesis (4 hours), PHYS 5210 Theoretical Mechanics, 5250 Introduction to Quantum Mechanics 1, and 7310 and 7320 Electromagnetic Theory along with electives (5 hours) and mathematics (3 hours). Plan II (without thesis) includes PHYS 5210, 5250, 7310, 7320, and 5260 Introduction to Quantum Mechanics 2 or 7550 Atomic and Molecular Spectra along with mathematics (6 hours) and electives (9 hours). All courses must be graduate courses numbered 5000 or above.

**Qualifying Examination.** The Graduate Record Examination aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this examination is normally taken before the time of entry into the Graduate School.

**Comprehensive-Final Examination.** After the other requirements for the master's degree are completed, each master's degree candidate must take a comprehensive-final examination. If the student is following plan I, in which a thesis is included, the final examination covers the thesis. The comprehensive-final examination is oral.

**DOCTORAL DEGREE**

**Prerequisites.** Same as for master's degree, above.

**Languages.** The department has no requirement in foreign languages.

**Qualifying Examination.** Same as for master's degree, above.

**Comprehensive Examination.** On the weekend following the start of spring semester and the first weekend of the summer, the written part of the comprehensive examination is given. The examination covers the material in the courses normally taken by all Ph.D. candidates in the first and second years of graduate study. The oral part is given shortly after the written part. Both the written and oral parts are considered in the passing or failing of the general comprehensive examination. Students who fail the general part of the comprehensive examination on their first attempt may take the examination once more a year later.

The final (research) part of the comprehensive examination is taken during the September following the passing of the general section. It consists of a presentation of a thesis prospectus to the student's thesis committee.

**Course Requirements.** A set of specific course requirements for the Ph.D. has been eliminated in order to increase the flexibility of the Ph.D. program. The total number of hours required for the Ph.D. in physics, however, is 36 (passed with a grade of B (3.00) or better), of which at least 27 must be 5000-level or above.
physics courses. The remainder must also be from that group or be approved by the graduate committee. Elimination of specific course requirements allows students who have a particularly strong background in one or more of the traditional core areas of physics to skip the appropriate courses in favor of additional physics electives. It is expected, however, that students with typical undergraduate preparation will take Quantum Mechanics 1 and 2 (PHYS 5250 and 5260), Electricity and Magnetism (PHYS 7310-7320), Statistical Mechanics (PHYS 7230), and Theoretical Mechanics (PHYS 5210). Most students also find it necessary to take one or more mathematical physics courses. In addition, Quantum Mechanics 3 (PHYS 7270) is considered essential material for Ph.D.-level physicists.

For a Ph.D. in physics with a specialization in medical physics, the following physics and mathematics courses (24 semester hours) are required: PHYS 5210, 5250, 5260, 7230, 7310, 7320, and 6 semester hours of 5000- or 6000-level mathematics courses. In addition, 18 semester hours of courses in medical physics at the University of Colorado Health Science Center are required as follows:

- Clinical Experience (Rad. 600-4)
- Clinical Radiology (Rad. 610-2)
- Basic Radiological Physics (Rad. 613-4)
- Physics of Radiation Therapy (Rad. 622-2)
- Physics of Medical Imaging 1 and 2 (Rad. 616-2 and 617-2)
- Radiopharmacy, Anatomy, and Physiology (Rad. 623-2)

Final Examination. The final examination is oral and covers the thesis.

**POLITICAL SCIENCE**

_Degrees_ ................. B.A., M.A., Ph.D._

The Department of Political Science offers instruction and research in the art and science of politics. Work within the department is organized around seven basic fields: American government and politics, comparative politics, public policy, law and politics, political philosophy, empirical theory and methodology, and international relations. Three major current research interests cut across these areas and concentrate teaching and research efforts on the areas of American government, comparative politics, and international relations. Four centers of research activity are housed within the department: the Center for the Study of American Politics, the Center for Comparative Politics, the Center for International Relations, and the Center for Public Policy Research.

The department participates in the distributed studies program and also offers a computer applications major combining computer science and data analysis skills with knowledge of the political system. In addition, programs leading to the M.A. and Ph.D. degree are offered.

The following areas of knowledge are central to the undergraduate degree in political science:

- knowledge of basic facts and concepts about the American political system;
- knowledge of basic facts and concepts relating to similarities and differences in Western and non-Western political systems;
- knowledge of basic facts and concepts about international relations, international organizations, and alliances;
- knowledge of the basic policy problems, domestic and international, facing contemporary political systems;
- knowledge of the history of Western political thought and of the values espoused in contemporary politics.

In addition, students completing the degree in political science are expected to acquire:

- citizenship skills, including the ability to analyze and debate alternative policy options for the problems facing the U.S. and the world community;
- analytical skills, including the ability to construct logical arguments, to collect and interpret evidence, and formulate reasoned conclusions; and
- writing skills sufficient to write research papers or essays on topics in political science. The department does not teach writing skills, but does provide opportunities to develop those skills through essay exams and term papers.

**Bachelor's Degree Program**

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

**Major Requirements**  
_Semester Hours_

Students in the regular political science major must complete 36 semester hours in the department, of which 21 hours must be in upper-division courses. All 36 hours must be completed with grades of C- or better and an overall grade point average of 2.00. None of the required hours may be taken pass/fail.

Twelve hours are required from the following lower-division fields:

**American**
- PSCI 1101 The American Political System ......................... 3

**International**
- PSCI 2223 Introduction to International Relations .................. 3

**Comparative**
- PSCI 2012 Introduction to Comparative Politics .................. 3

**Theory**
- PSCI 2004 Survey of Western Political Thought .................. 3

Complete 15 hours of the required 21 upper-division hours from the following four primary fields:

- American .................................................. 6
- Comparative ............................................. 3
- International ............................................ 3
- Theory .................................................... 3

Nine hours of political science elective credit are required. Six of these hours must be upper division.

Required courses in addition to political science courses:
- ECON 2010 Principles of Microeconomics ........................ 4
- ECON 2020 Principles of Macroeconomics ........................ 4

All undergraduate transfer students majoring in political science must accumulate a minimum of 45 grade points (grade points are equal to credit hours multiplied by letter grade as expressed numerically on a four-point scale) in upper-division political science courses at the University of Colorado at Boulder in order to qualify for the B.A. degree.

**Graduate Degree Programs**

Applications for the M.A. and Ph.D. degrees are accepted from qualified and motivated students wishing to probe deeply into the analysis of political life. Professional courses in the graduate curriculum range from problem definition in policy analysis to the study of the global political economy. The curriculum is structured to lead to the Ph.D. degree and also offers several programs culminating in the M.A. degree. In addition to the regular master's degree in political science, a special focus is placed on two professionally oriented M.A. degrees, one oriented toward entry into the public sector as a policy analyst and one that prepares students for careers in global affairs.

Students wishing to pursue graduate work toward one of these degrees should read carefully the Graduate School requirements for admission and degrees in this catalog. In addition they should write to the departmental office for additional information on graduate programs.

**DEPARTMENTAL ADMISSION REQUIREMENTS**

Applicants to the graduate program in political science should normally present evidence of at least 18 semester hours of course work in political science, 9 of which should be at the upper-division level.

Applicants for the M.A. in political science (public policy) should present at least 9 hours of undergraduate political science...
course work. In addition, the department requires applicants to present quantitative and verbal GRE scores that total at least 1100 and that show a score of at least 500 on the verbal portion. Three letters of recommendation, an undergraduate grade point average of at least 3.00, official transcripts, and a short essay detailing interests and plans are also required to complete the application packet. Foreign applicants may supplement their application by presenting TOEFL scores. Students with especially strong records (e.g., total GRE scores greater than 1250 and an undergraduate GPA greater than 3.50) may apply for direct admission to the Ph.D. program. Applications should be filed with the department by February 15, although late applications are considered until May 1, and may be considered after that at the department's discretion. Decisions regarding admission and financial aid are typically completed during March each year.

GRADUATE MINOR IN POLITICAL SCIENCE
Graduate students who choose to minor in political science should consult the course descriptions for 4000-level courses, since minors but not majors are eligible to receive credit for 4000-level courses.

MASTER OF ARTS IN POLITICAL SCIENCE
Students desiring a graduate major in political science should present 18 semester hours of undergraduate work in the subject, 9 hours of which must be in upper-division courses. Any deficiencies must be made up before students can be admitted as regular degree students and the work involved is in addition to the minimum hourly requirements for the degree. Students shall concentrate in any one of seven political science fields and take 3 semester hours of work in regularly scheduled political science seminars in each of three areas defined as follows: American, including American government and politics, public policy, law, and politics; international political science, including comparative politics and international relations; and theory, including political philosophy and empirical theory and research methods. Students are responsible for familiarizing themselves with all degree requirements, some of which are outlined in the Graduate School section of this catalog. In brief, the degree requirements include a minimum of 25 semester hours of graduate credit, including at least 21 semester hours at the 5000 level or above, with at least 12 semester hours of work in regularly scheduled political science seminars; and 4 semester hours for the M.A. thesis. Students may take up to 6 hours in political science graduate research topics, and up to 6 hours in a cognate discipline (graduate seminar, senior undergraduate course, or independent study), but not more than a total of 9 hours combined. The 9 semester hours may not be substituted for required seminars. A thesis based on original investigation and showing mature scholarship and critical judgment, as well as familiarity with tools and methods of research, is required. Students select a faculty advisor from among the regular members of the department's graduate faculty at the earliest possible date, but no later than the end of the second week of the second semester of residence. The faculty advisor must have general competence in the student's primary field of emphasis and serves as the first reader of the M.A. thesis. The second reader, who likewise has general competence in the topic of the M.A. thesis, must be associated intimately with the thesis from its inception and in no case after the student begins writing. The completed draft of the thesis must be in the hands of the second and third readers at least four weeks prior to the comprehensive-final examination. Each candidate for a master's degree is required to take a comprehensive-final examination after the other requirements for the degree have been completed. This examination may be given near the end of the last semester of residence while the candidate is still taking required courses for the degree, provided satisfactory progress is being made in those courses. The examination is oral and lasts approximately two hours. It concentrates on the student's field of emphasis as well as the M.A. thesis. The comprehensive-final examination committee has three members, including the faculty advisor (the chair) and the second reader of the thesis. At least two committee members must be chosen from among regular members of the graduate faculty of this department, in consultation with the faculty advisor; the third committee member may be a graduate faculty representative from a cognate discipline. Satisfaction of the examination requires the affirmative vote of each of the three committee members.

MASTER OF ARTS IN POLITICAL SCIENCE (INTERNATIONAL AFFAIRS)
The increased participation of the United States in world politics has opened a variety of new careers in international affairs. The master's program in international affairs of the Department of Political Science is designed to provide a well-rounded education in international affairs for students who are seeking careers of international service with the national government, with international organizations, with private business, with nongovernmental organizations, or in the fields of teaching and research. This M.A. program is also a logical step toward obtaining a Ph.D. in political science at the University of Colorado or elsewhere.

Students desiring an M.A. in political science (international affairs) shall normally take 12 hours of work in the international area, 9 of which must be in the field of international relations, and 3 hours in either American political science or theory. It is advisable for the student to include the international relations seminar in the 9 hours in the field of international relations. If a student's plan of studies so indicates, and permission is granted by the student's faculty advisor and the department chair, the student may substitute up to 6 hours of credit from another department for the 3 hours in each of the other two areas of study.

Each student in this program must pass a GSFT proficiency test in a foreign language approved by the student's advisors and/or present evidence of an advanced proficiency in social statistics or computer science. The latter proficiency may be achieved by obtaining a B or better in a sequence of courses to be identified by the student's committee. A list of the course sequences that have been approved to meet this requirement is available in the departmental office. In exceptional cases, the graduate curriculum committee may accept other evidence that the student has acquired a good working knowledge of a foreign language or the advanced proficiency in social statistics or computer science.

For the remaining requirements for this degree, see the section on the master of arts in political science.

MASTER OF ARTS IN POLITICAL SCIENCE (PUBLIC POLICY)
The goal of the M.A. program in public policy is to train professional policy analysts for nonacademic careers. The curriculum is designed to provide the analytical skills necessary to participate responsibly and effectively in the policy process. The M.A. in political science (public policy) may be taken concurrently with the interdisciplinary graduate certificate program in environmental policy.

This is an M.A. with thesis, requiring 33 credit hours. It includes 27 hours of course
work, 2 hours of independent study for an applied research internship, and 4 hours of thesis credit. Completion of these requirements normally takes two years and at least one summer.

The core curriculum consists of four required seminars in policy analysis, introduction to data analysis, and context-sensitive methods. Specific courses in economics are not required, but there is a strong expectation that all students should be familiar with the tools of economic analysis, particularly in the policy area in which they are interested. The remaining 15 hours of electives should be used to develop additional analytical skills and/or substantive specialization in the student's area of substantive interest. The certificate program in environmental policy provides one alternative for substantive specialization, drawing on courses in economics, philosophy, geography, and other subjects.

The internship is a supervised applied research project for a policy client, which should lead into the thesis project.

The thesis is a research report on a policy problem that provides concrete demonstration of the student's analytical skills, intellectual perspective, and substantive knowledge. As a general rule, the policy research report is somewhat shorter (but not less analytical) than a standard M.A. thesis.

For a description of the thesis committee, see the section on Master of Arts in Political Science.

DOCTOR OF PHILOSOPHY

For the Ph.D., the Department of Political Science requires at least 40 hours of course work (with a grade of A or B) beyond the bachelor's degree. Except for 3 semester hours that may be taken at the senior undergraduate level in a cognate field at the University, all 40 hours must be at the 5000 level or above. Not to be included in the 40 hours are dissertation and research hours, master's thesis hours, or those hours used to fulfill the language and statistics requirements.

The Ph.D. candidate must present three fields of competency. The first two, labeled the major field and second field, are to be the subject of the Ph.D. comprehensive examination. A minimum of two seminars must be presented in these fields. Additional course work is anticipated in the major and second fields. Competency in the third field may be demonstrated by completing two graduate seminars in that field with a GPA of 3.50 or higher, or through comprehensive examination. Furthermore, each student's program shall include at least one seminar in each of the following three categories: American government, public policy, and law and politics; international relations/comparative politics (comparative politics and international relations); and theory (political philosophy, empirical theory, and methodology).

Thirty-three hours must be taken in political science. Of this, 33-30 must be in regularly scheduled seminars. Not more than 6 hours of political science graduate research topics combined are allowed toward the degree. The maximum amount of work that may be transferred to this University for the Ph.D. is 15 semester hours.

First-Year Requirements. All graduate students in the Ph.D. program are required to take three core seminars. At least two of these core seminars must be in the fields of American politics, comparative politics, and international relations. During the first year in residence, at least two of the three core seminars must be completed. Also during the first year in residence, students enrolled in the Ph.D. program take PSCI 5075 (Introduction to Professional Political Science) and PSCI 5085 (Introductory Data Analysis).

Preliminary Ph.D. Research Paper. Each Ph.D. student is required to select a topic that leads to the formulation, execution, and written presentation of a piece of original research. This research paper is expected to be of potentially publishable quality.

The research paper is read by the student's three-person advisory committee, consisting of the student's major advisor, a second major field reader, and a representative of the student's second field of concentration. Following consideration of the written work, an oral examination is conducted by the advisory committee to test both the depth of the student's research as well as the breadth of the student's general training. Competence in core seminar materials is expected.

The oral examination committee is charged with the task of evaluating the potential of each Ph.D. student. Students whose work is deemed inadequate are asked to leave the program.

Students who have not previously earned a master's degree in political science are eligible for a plan II M.A. upon completion of 36 hours of graduate course work. The awarding of the plan II M.A. is at the discretion of the examining committee. This decision is independent of the decision to encourage or discontinue the student in the Ph.D. program.

Advisory Committee. The role of the advisory committee is crucial; its function is to guide students through their degree programs. Students shall select a chair for the committee no later than the end of the second semester in residence. If a student does not select a chair during the time specified, the departmental chair shall designate such a chair for the purpose of administration and advising.

The advisory committee shall consist of three regular faculty members in residence who are members of the political science graduate faculty and who each represent one of the student's fields of concentration. The second and third members of the advisory committee shall be selected by the student with the approval of the chair of the committee within two weeks after the selection of the advisory chair. The advisory committee shall meet with the student at least once during each academic year to review the student's progress and to assist in planning the student's future course of study.

Research Competency. Each Ph.D. student must fulfill the research competency requirements as determined in conjunction with the advisory committee. At a minimum, this standard may be met by successful completion of a program of methodological or language study.

Methodological competency is demonstrated by completing PSCI 5095 or 7095 with a grade of B or better, or successfully completing other course work as approved by the GCC each year. Advanced competency requires completion of at least two advanced methods courses beyond PSCI 5085 or 7085.

Language competency is evidenced by completion of a fourth-semester college-level language course of 3 or more hours with a grade of B or better, high OSFPLT scores for the language, high scores on another standardized examination recognized by University of Colorado language departments, or evidence of competence in the language. Advanced competency is demonstrated by completion of at least a fifth-semester language course or other work deemed appropriate by the advisory committee.

The competency requirement may also be met by demonstrating basic competency standards in both methodological and language skills (i.e., by completing PSCI 5095 or 7095 and fourth-semester foreign language skills).

Committees may set higher research competency standards for the student than those outlined above.

The competency standard must be communicated in writing to the Director of Graduate Studies by the end of the second year in residence. Both the principal advisor and the student must signify that they
accept the committee's determination of research competency standard. Required course work (or its surrogate) must be completed no later than the semester in which the Ph.D. comprehensive examination is taken.

Comprehensive Examinations. The comprehensive examination serves to demonstrate that students have acquired the skills and knowledge necessary to function as independent scholars in political science generally and in their chosen fields of specialization. Broad knowledge is expected as well as a critical understanding of the literature and the ability to apply that understanding to the central, enduring questions of politics and government.

The exam is divided into three parts: the written, the oral, and the dissertation prospectus defense. For the purposes of the examination, political science is divided into seven fields of concentration: American government, law and politics, public policy and administration, comparative politics, international relations, political philosophy, and empirical theory and methodology. Both the written and the oral parts of the comprehensive exam cover two fields chosen by the student and provide a rigorous, comprehensive test of the student's knowledge of the specialization field and of the relationships among these fields as well as their location in a broad context, spanning comparative, philosophical, historical, and methodological issues.

Comprehensive examinations are administered once each semester. In the fall semester, the written examinations are normally given during the last week of November, and in the spring semester they are normally given during the third week of April. Oral examinations are scheduled individually, within three weeks of the completion of the written part of the examination and typically during the normal University examination period.

The written examination is constructed by the graduate curriculum committee, through the actions of the field examination committees. The written examination in each field is comprised of two sections of questions. Questions in the first section emphasize breadth of knowledge and integration, while those in the second section focus more on the student's depth of knowledge on specific topics and issues in the field.

A passing grade on the written part of the exam indicates that the student is prepared to proceed to the oral examination, which may hinge in part on the elaboration and exploration of the material in the written examination. Students who fail the written exams are provided a single opportunity to retake them, and are given an explanation of the failure by the readers.

The oral part of the comprehensive examination is conducted by a five-member committee, normally consisting of the student's advisory committee, the chair of which also chairs the examination committee, and the two-member examining committee from the student's major field. In addition to general questions in all chosen fields, the oral examinations probe the written examination answers, providing students the opportunity to amplify, elaborate, and explain their answers. Final grades in each field are assigned by the majority vote of the oral examination committee. A final grade of distinction, pass, or fail is assigned following the orals. Distinction is reserved for excellence on both written and oral examinations. Failing a field in the oral examination may, at the discretion of the examining committee, involve retaking both the written and the oral examinations at the next administration of the exam, whether the failure was announced following the written or the oral part of the examination. If a student fails the oral exam, the chair of the advisory committee provides a written explanation to the student.

Dissertation Requirements and Final Examination. A dissertation based on original investigation and showing mature scholarship and critical judgment, as well as familiarity with tools and methods of research, is required. A candidate for the Ph.D. shall select a dissertation topic in consultation with a dissertation advisor who is rostered in the student's primary field of emphasis, a second reader who has general competence in the dissertation topic, and at least one additional faculty member rostered in the student's primary field of interest. The dissertation advisor shall submit the topic, along with the names of the second reader and other faculty consulted in its selection, to the departmental chair for approval. These steps must be completed at least eight months prior to the dissertation defense.

Once the dissertation has been accepted tentatively by the first two readers, a final oral examination is conducted by the dissertation committee. Approved by the dean of the Graduate School, the committee shall consist of no fewer than five representatives from those departments in which a student has worked, including at least one professor outside the political science department but who is a member of the University of Colorado graduate faculty.

The examination is open to the public. More than one dissenting vote from the committee disqualifies the candidate in the final examination.

PSYCHOLOGY

Degree ................................B.A., M.A., Ph.D.

Psychology is a biosocial science that studies behavior from both biological and social perspectives. The major and elective requirements are designed to achieve a broad understanding of the contents, concepts, and research methods of contemporary psychology in the context of a quality liberal arts education.

Students contemplating postgraduate education, either in professional or in graduate school, are encouraged to participate in the departmental honors program, which provides special opportunities for individualized attention.

CU-Boulder's Department of Psychology has been ranked by the National Academy of Sciences as one of the best in the country with respect to the quality of the faculty and their scholarly productivity. All of these faculty members are involved in undergraduate instruction. Moreover, the department offers undergraduates a wide range of opportunities for involvement in research.

The following areas of knowledge are central to the undergraduate degree in psychology:

- knowledge of the social and biological background of human nature;
- critical awareness of the research bases necessary for understanding and predicting behavioral outcomes;
- understanding of descriptive and inferential statistics, including measures of central tendency, variance, and correlation;
- understanding of psychology as a laboratory science and of the interplay between theory and research;
- awareness of possible practical applications of research knowledge;
- knowledge of the influences of interactions between attributes of the social situation and psychological attributes of a person in generating human behavior and subjective experience;
- understanding of the development and amelioration of abnormal thoughts, feelings, and behavior;
- familiarity with the mechanics of heredity, neural transmission, plasticity, development, and aging;
- achievement of a reasonable integrated historical overview of modern psychology, including the major subdivisions of the discipline and their interrelations;
knowledge of major ideas and scholars in the discipline's subfields and the relationship of ideas from one area to another; and awareness of the ethical issues germane to research investigation raised by the applications and practice of psychology as a profession.

In addition, students completing the degree in psychology are expected to acquire:

- the ability to evaluate critically research designs, results, and interpretations;
- the ability to design and carry out research on their own;
- the ability to know when to use basic statistical tests to formulate hypotheses, collect and analyze data, draw conclusions, and clearly communicate research findings;
- the ability to assess the characteristics of social situations and measure the psychological attributes of individuals;
- the ability to use the primary literature of biological and developmental psychology to prepare a clear written summary of a research topic; and
- the ability to place current psychological concerns into an appropriate overarching conceptual framework that encompasses the entire field.

**Bachelor's Degree Program**

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below. These requirements apply to all psychology majors who declare their major after July 1, 1990. Those majors who declared before that date have the option of completing their major under either the old rules or the new rules.

However, independent study hours are pass/fail credit only and cannot be used toward the 30 hours required for graduation.</td>
<td></td>
</tr>
</tbody>
</table>

In addition to the courses listed above and the minimum of 30 hours in psychology, the student is required to pass one of the following natural science sequences with a grade of C- or better:

- ANTH 2010-2020 Introduction to Physical Anthropology 1 and 2
- CHEM 1011-1031 Environmental Chemistry 1 and 2
- CHEM 1051-1071 Introduction to Chemistry and Introduction to Organic and Biochemistry
- CHEM 1071-1111 Introduction to Organic and Biochemistry and General Chemistry 1
- CHEM 1111-1131 General Chemistry 1 and 2
- CSCS 2204-2205 Discrete Structures and Data Structures and Algorithms
- EPOB 1210-1220 General Biology 1 and 2
- MATH 1300-2300 Analytical Geometry and Calculus 1 and 2
- MCD 1070-1080 Introduction to MCD Biology 1 and 2
- PHYS 1110-1120 General Physics 1 and 2
- PHYS 2010-2020 General Physics 1 and 2

Notes: Transfer students must complete at least one upper-division course on the Boulder campus with a C- or better in each of the areas of experimental/quantitative laboratory psychology, social/clinical psychology, and biopsychology.

In order to graduate in psychology, all students are required to complete an assessment test.

**Graduate Degree Programs**

Students are admitted for graduate studies leading to the Ph.D. in one of five fields: behavioral genetics, behavioral neuroscience (including learning and motivation), clinical, cognitive, and social. The behavioral genetics program focuses on the study of genetic contributions to individual differences in behavior. The fundamental tenant of the behavioral neuroscience program is that a complete understanding of behavior entails unraveling mechanisms and principles at any and all levels of organization (i.e., behavior, neuroanatomy, neurophysiology, neurochemistry). The major training goals of the clinical psychology program follow the Boulder model in that the preparation of scientist-practitioner is stressed. The cognitive psychology program includes course work and research in the following areas: cognition; problem solving, thinking, human learning and memory, judgment and decision making, language, artificial intelligence, reading, attention and performance, perception, and information processing. The program in social psychology trains students to conduct research, either applied or basic, in the fields of social cognition, judgment and decision making, and social behavior, including social development. Additional courses in the department offer graduate training in the knowledge, theory, and research methodology relating to cultural influences on behavior.

**Requirements for the Ph.D. Degree**

All students are admitted with the expectation that they will work toward the Ph.D. degree. Many students receive a master of arts degree in the course of working toward the Ph.D. Students who receive the Ph.D. degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field. Furthermore, they must show the ability to work independently in their chosen field and must make an original contribution of significance to the advancement of knowledge.

In the first year of graduate study, all psychology graduate students enroll in a two-semester graduate statistical sequence. There is a first-year research requirement that starts the student on an active program of research. The student must also enroll in a sequence of courses designed to give exposure to various research topics and methods. In addition, the student must demonstrate competence in a minor field of study within the department.

Before admission to candidacy for the Ph.D. degree, the student must pass a comprehensive examination in the field of concentration and related fields. This examination tests the student's mastery of a broad field of knowledge, not merely the formal course work completed.

A variety of advanced research seminars are taught on a regular basis. Students are required to be enrolled in at least one substantive course in the department each semester until the comprehensive examinations have been successfully completed.

Upon completing the comprehensive, students engage in the dissertation research, culminating in a public oral defense.
RELIGIOUS STUDIES

Degrees.....................B.A., M.A.

The curriculum in religious studies includes the study of Mesoamerican and Native American religions, Buddhism, Hinduism, Taoism, Confucianism, Judaism, Islam, Christianity, women and religion, and religion and literature. A variety of theoretical and methodological perspectives and approaches are used throughout the curriculum and are critically and extensively considered in special courses. The program offers special resources for the study of indigenous American religions including the Mesoamerican Archive, which maintains a record of the excavation of the great Aztec temple in Mexico City. Colorado is an excellent place for such work because of its geographic location and easy access to sites and contexts in the American West, Southwest, and Mesoamerica.

The following areas of knowledge are central to the undergraduate degree in religious studies:
- a general knowledge of the beliefs, practices, and institutions of Asian, Western, and Native American religious traditions;
- in-depth knowledge of one major religious tradition; and
- general knowledge of different methodological approaches to the study of religion.

In addition, students with a degree in religious studies are expected to acquire:
- the ability to identify textual, performative, and artificial data relevant to the study of religion;
- the ability to draw connections between different historical and/or cultural contexts of religion; and
- the ability to communicate data analysis and interpretation competently in written form.

Bachelor's Degree Program

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

Major Requirements

Students must complete at least 36 hours of courses on religion, including at least three of the lower-division offerings (9 hours, preferably completed before upper-division work) and at least one course (at either the upper- or lower-division level) in each of the following four areas: Western religions, Asian religions, Native American/Traditional religions, and thematic approaches to religion. At least 12 hours of upper-division work (including RIST 4930) must be taken on the Boulder campus.

MINOR PROGRAM

The department also offers a minor in religious studies. Details are available in the department office.

GRADUATION WITH HONORS

The honors program in religious studies offers the opportunity for highly motivated undergraduates to undertake a deeper and more individualized study than is provided by the regular B.A. curriculum and to earn an honors designation on their diploma. Religious studies majors with an overall grade point average of 3.30 or higher are eligible to participate in the program. Honors that may be earned are cum laude (with honors), magna cum laude (with high honors), and summa cum laude (with highest honors).

Students interested in pursuing departmental honors are encouraged to consult with the departmental undergraduate advisor by the beginning of their junior year.

Graduate Degree Program

MASTER'S DEGREE

The master of arts in religious studies requires satisfactory accomplishment of the following:

1. At least 24 hours of graduate-level course work plus a thesis of 4-6 hours must be completed. The course work must include RIST 6930 Approaches to the Study of Religion. Up to 9 hours of course work may be taken outside the department consistent with the student's special needs and interests. The student's program of study must receive departmental approval.

2. A satisfactory reading knowledge of a foreign language appropriate to the chosen field of specialization must be demonstrated.

3. An acceptable thesis must be written and, after approval of the final draft of the thesis, a comprehensive final examination must be passed.

SOCIOMETRY

Degrees.................B.A., M.A., Ph.D.

The Department of Sociology offers an undergraduate major in general sociology as well as undergraduate concentrations in four fields: criminology, population and health issues, sex and gender, and social conflict.

The following areas of knowledge are central to the undergraduate degree in sociology:
- knowledge of the basic data, concepts, theories, and modes of explanation appropriate to the understanding of human societies;
- knowledge of the structure of modern American society, its social stratification, its ethnic, racial, religious, and gender differentiation, and its main social institutions—family, polity, economy, and religion;
- knowledge of the basic social processes that maintain and alter social structure, especially the processes of integration, organization, and conflict; and
- understanding of the diversity of human societies, including the differences between major historical types such as foraging, agricultural, industrial, and post-industrial societies.

In addition, students completing the degree in sociology are expected to acquire:
- research and writing skills sufficient to locate and consult works relevant to a sociological investigation and to write a sociological paper that is coherent, cogent, and grammatically correct;
- methodological skills sufficient to understand the basic procedures of sociological research and to understand the problems of reliability and validity;
- statistical skills sufficient to understand and interpret the results of sociological research; and
- critical skills sufficient to analyze and evaluate sociological writings.

Bachelor's Degree Program

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

Major Requirements

SOCY 1001: Analyzing Society and SOCY 1011 Introduction to Sociological Inquiry........6
SOCY 4001: Research Methods in Sociology and SOCY 4011 Field Experience in Sociology........6
Electives..................................................................18

Graduate Degree Programs

Students wishing to pursue graduate work in sociology leading to candidacy for an advanced degree should carefully read the requirements for advanced degrees in the Graduate School section of this catalog.

The following are additional requirements for admission to the graduate degree programs of the department:

1. A combined grade point average of at least 3.00 (B) for all courses in sociology undertaken as an undergraduate or graduate student prior to admission.

2. Satisfactory scores (as determined by the department) on the Graduate Record Examination, including both the verbal and quantitative sections and at least one advanced test.

The deadline for applications is the first week of February for the academic year.
MASTER'S DEGREE
The requirements for an M.A. degree are 24 semester hours of course work at or above the 5000 level plus preparation and completion of 6 thesis hours. At least 18 of these hours must be taken in the sociology department at CU-Boulder. The M.A. thesis must be defended at an oral examination.

DOCTORAL DEGREE
The main requirements for the doctoral degree are:
1. A minimum of 45 semester hours at or above the 5000 level. At least 24 of these 45 hours must be taken in the sociology department at CU-Boulder.
2. The following required courses must be included in the 45 hour minimum and taken in the students' first year:
   (a) 6 hours of sociological theory (SOCY 5001 and SOCY 5011); (b) 6 hours of research methods and statistics (SOCY 5021 and SOCY 5031); and (c) one 3-hour research-oriented seminar.
3. A student must pass a preliminary examination taken in the fall of the students' second year.
4. A student must pass the comprehensive examination, having become eligible to take this examination only after having satisfied requirements 1, 2, and 3 above.
5. A student must write a Ph.D. dissertation and defend this dissertation in an oral examination.

A detailed description of the M.A. and Ph.D. programs is given in the graduate handbook available from the graduate secretary of the sociology department. All inquiries about graduate programs should be addressed to the Chair, Committee on the Graduate Program, Department of Sociology, University of Colorado at Boulder, Boulder, CO 80309-0327.

SPANISH AND PORTUGUESE

Degree: B.A., M.A., Ph.D.
The department has identified the following as educational outcomes for the two tracks within the Spanish major.
The following areas of knowledge are central to the undergraduate degree in Spanish Language and Literature:
- awareness of the fundamental outlines of the history of Spanish literature or of Spanish-American literature;
- familiarity with the major creative writers in either Spanish or Spanish-American literature;
- awareness of basic critical methodologies in the study of poetry, drama, narrative fiction, and the essay; and
- awareness of the social and historical contexts in which particular literary traditions developed.

In addition, students completing the degree in Spanish Language and Literature are expected to acquire:
- the ability to read sophisticated Spanish texts at a level at which literary analysis can be performed;
- the ability to write and speak Spanish sufficiently to participate in critical discussions and write critical essays;
- the ability to analyze and interpret literary texts in terms of themes, characters, structure, style, and overall textual strategies; and
- the ability to relate analysis and interpretations of different texts to one another and
- the ability to communicate such interpretations competently in written form in Spanish.

The following areas of knowledge are central to the undergraduate degree in International Spanish for the Professions:
- a basic command of modern business practices as applied to the Spanish-speaking world;
- a working knowledge of the theories of economics, business law, and international trade and finance;
- an awareness of the cultural environment in which business is conducted in the Spanish-speaking world;
- a working knowledge of fundamental business Spanish terminology;
- basic business knowledge according to the canons of this discipline; and
- an awareness and understanding of international relationships.

In addition, students completing the degree in International Spanish for the Professions are expected to acquire:
- the ability to read and interpret in cultural and business-related terms sophisticated Spanish texts concerning business transactions;
- the ability to write and speak Spanish sufficiently to communicate effectively on business-related issues, to be involved in critical discussions, and to write critical essays on the subject;
- the ability to analyze a particular business problem—to place it in a relevant context and to formulate an appropriate response; and
- the ability to translate adequately business-related documents.

Bachelor's Degree Programs
Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

LANGUAGE AND LITERATURE OPTION

Major Requirements Semester Hours
SPAN 3000 Advanced Spanish Language Skills, 3
SPAN 3100 Literary Analysis in Spanish, and SPAN 3120 Advanced Spanish Grammar, 11
At least 9 hours in upper-division literature, culture, and/or language courses.................9
At least 12 hours in courses at the 4000 level or above, with at least 6 hours devoted to Span-
ish Peninsular literature (4150 and 4160) or Spanish-American literature (4170 and 4180),
and 3 hours devoted to either Spanish or Spanish-American literature (from the four
masterpieces courses listed previously). ......12
In addition to the 32 hours in the Department of Spanish and Portuguese, 6 hours in courses
from outside the Spanish department in one of the following areas are required: courses listed
in the Latin American studies program (e.g., history, art, political science); courses listed
in the Chicano studies program; linguistics; upper-division courses in another foreign
language or comparative literatures; or Portuguese 2110 and 2120 or 2150 ..........6

Note: To fulfill the requirements for a Spanish major, students must complete 32 credit hours in 3000-level or above courses. Students seeking teaching certification in Spanish must take SPAN 3050, 3120, and 3200 or 3210. Students who want certification for teaching at the secondary level should note that the School of Education requires SPAN 4650 and 4660. Students who major in Spanish are expected to meet with the departmental chief undergraduate advisor before registration. Failure to do so may delay graduation. Students considering entering graduate school for an advanced degree in Spanish, either at CU-Boulder or any other institution, should see a departmental advisor as early as possible.

INTERNATIONAL SPANISH FOR THE PROFESSIONS OPTION
In cooperation with the College of Business and Administration, the department offers an interdisciplinary major in International Spanish for the Professions. It offers students numerous career possibilities, both in government and private industry, at home and abroad. Those choosing this major are not able to enter Boulder's graduate program in Spanish without fulfilling the requirements in the language and literature major. Only a limited number of students may enroll in the International Spanish for the Professions major. Courses within the major normally are completed
in the student's junior and senior years. Applications for admission may be obtained from the department and should be submitted as early as possible in the student's academic career, but no later than the second semester of the sophomore year.

**Professional Spanish Courses (15 credit hours)**
- SPAN 3030 Professional Spanish for Business 1..........................3
- SPAN 3040 Professional Spanish for Business 2..........................3
- SPAN 3200 Spanish Culture or SPAN 3210 The Cultural Heritage of Latin America..........................3
- SPAN 4060 Problems of Business Translation in Spanish 1..........................3
- SPAN 4070 Problems of Business Translation in Spanish 2..........................3

**Spanish Language Courses (15 credit hours)**
- SPAN 3000 Advanced Spanish Language Skills..........................5
- SPAN 3100 Literary Analysis in Spanish..........................3
- SPAN 3120 Advanced Spanish Grammar..........................3
- SPAN 4010 Advanced Rhetoric and Composition..........................3
- Elective (recommended: SPAN 3310 or 3340)..........................3

**Courses in the College of Business and Administration (15 credit hours)**
- Fall, Junior Year
  - ACCT 2000 Introduction to Financial Accounting..........................3
- Spring, Junior Year
  - MKTG 3000 Principles of Marketing..........................3
  - Fall, Senior Year
  - BSLW 3000 Business Law..........................3
  - FNCE 3050 Basic Finance..........................3
  - ORMG 3300 Introduction to Management and Organization..........................3

(These courses must be taken in sequence during the junior and senior years as indicated, unless taken in summer school.)

**Area Courses (12 credit hours)**
These are related courses in arts and sciences to be taken from the following distribution: 12 credit hours total from areas I and II or from areas I and III. Note: Some courses are not offered every semester.

**Area I (6 credit hours)**
- ANTH 3110 Ethnography of Mexico and Central America..........................3
- ANTH 4220 Archaeology of Mexico and Central America..........................3
- CSCI 1200 Introduction to Programming 1..........................3
- CSCI 1210 Introduction to Programming 2..........................3
- FINE 4410 Pre-Columbian Art..........................3
- FINE 4420 Latin American Art since 1492..........................3
- GEOG 2002 World Geographic Problems..........................3
- GEOG 3812 Latin America..........................3
- HIST 1038 Introduction to Latin American History..........................3
- HIST 3018 Selected Readings in Latin American History..........................3
- HIST 4118 History of Mexico to 1821..........................3
- HIST 4128 The Emergence of Modern Mexico..........................3
- HIST 2537 Chicano History..........................3
- LING 2200 Language in its Social Context..........................3
- LING 3500 Language and the Public Interest..........................3
- MATH 1050, 1060, 1070 math modules..........................3
- MATH 1080, 1090, 1100 math modules..........................3

**Area II (6 credit hours)**
- ECON 4111 Money and Banking Systems..........................3
- ECON 4211 Seminar: Public Finance..........................3
- ECON 4252 Urban Economics..........................3
- ECON 4413 International Trade..........................3
- ECON 4423 International Finance..........................3
- ECON 4794 Economic Development of Latin America..........................3
- PSCI 4001 Government Regulation of Business..........................3
- PSCI 4061 State Government and Administration..........................3
- PSCI 4032 Latin American Political Systems..........................3
- PSCI 4122 The Military in Politics..........................3
- PSCI 4181 Public Administration..........................3
- PSCI 4183 International Law..........................3
- PSCI 4261 The Judicial System..........................3

**Area III (6 credit hours)**
Complete 6 more hours from the courses listed above or other upper-division courses in Spanish. The required 6 hours may also be completed in upper-division courses in any other foreign language (Portuguese is strongly recommended). Summer session courses from the College of Business and Administration, study abroad, and other related courses are accepted for credit upon approval of the major advisor.

**Note:** Prerequisites before admission to the program include sufficient Spanish to be admitted to 3000-level courses and ECON 2010 and 2020.

**STUDY ABROAD**
The department strongly recommends that all majors include some study in a Spanish-speaking country in their major program. The University cooperates with full-year and semester programs in Costa Rica, Dominican Republic, Mexico, and Spain. Credit earned is normally counted toward satisfaction of the major requirements, but the student should see an advisor before enrolling in a foreign program to discuss transfer of credit. Credit for work done in special programs offered by foreign universities is evaluated on an individual basis. It should be noted that courses taken abroad and designated as Spanish are also subject to the 45-hour maximum rule of the College of Arts and Sciences.

Students interested in study abroad should see the International Education section of this catalog. Students who present transfer work or credit earned in CU study abroad programs to satisfy major requirements are expected to complete at least 12 upper-division credits, including at least 9 from the 4000-level masterpiece courses listed above, on the Boulder campus.

**PORTUGUESE**
Although no major in Portuguese is offered, language courses at the elementary and intermediate levels are available, as well as senior and graduate courses in Luso-Brazilian civilization and literature.

**Graduate Degree Programs**
Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should read carefully requirements for advanced degrees in the Graduate School section of this catalog.

**MASTER'S DEGREE**

**Language Requirement.** Students must demonstrate, as early as possible and before taking the comprehensive examination, a communication knowledge (as defined by the Graduate School) of a foreign language other than Spanish. They must also be able to speak, read, and write English well.

**Areas of Concentration.** The M.A. in Spanish is offered in two areas of concentration: one with an emphasis on literature, and one with an emphasis on linguistics (for further information on these options, please contact the department).

**DOCTORAL DEGREE**

**Residence Requirement.** Ph.D. students must complete a minimum of one academic year in residence on the Boulder campus (excluding summer) within the four years immediately preceding the date on which they present themselves for the Ph.D. comprehensive examination.

**Language Requirement.** The student must demonstrate as early as possible, but at least one full semester before taking the comprehensive examination, a communication knowledge (as defined by the Graduate School) of one foreign language and a reading knowledge of a second language in addition to Spanish. The languages are chosen by the student in consultation with the advisory committee.

**Areas of Concentration.** The Ph.D. in Spanish is offered in six literary periods of concentration: medieval, golden age, eighteenth- and/or nineteenth-century peninsular, twentieth-century peninsular, colonial and nineteenth-century Spanish-American, and twentieth-century Spanish-American. For further information on these options, please contact the department.
THEATRE AND DANCE

Degrees...B.A., B.F.A., M.A., M.F.A., Ph.D.

The Department of Theatre and Dance offers undergraduate and graduate degrees in both theatre and dance. These programs combine traditional studies with practical training. Ambitious seasons of theatre productions and dance concerts feature student performers and student designers, directors, and choreographers. Guest artists of national and international fame often participate in curricular and extracurricular activities. Recent guests have included Doug Varone, Meredith Monk, Wade Madsen, Ann Carlson, Erin Matthiessen, Douglas Nielsen, and Judith Ren-Lay in dance; Celeste Holm, Jean-Claude van Itallie, Billie Whitelaw, Marvin Carlson, and Robert Patrick in theatre.

Students seriously interested in theatre and dance are urged to consult with an advisor in the appropriate field to obtain both advice and the most current information concerning program opportunities and expectations.

Bachelor's Degree Programs in Theatre

The following areas of knowledge are central to the undergraduate degrees in theatre:

- knowledge of the major works of dramatic literature that are representative of the most important periods in the development of theatre and drama in the Western world;
- knowledge of the history of theatrical production—its styles, conventions, and socially related mores—from the ancient Greeks to the present time;
- knowledge of the various means through which a theatrical concept is realized; and
- awareness of the aesthetic and intellectual relationship between theatre in its various twentieth-century modes and contemporary society.

In addition, students completing the degree in theatre are expected to acquire:

- the ability to analyze and interpret plays and literature with particular attention to acting and performance of literature, designing, directing, and/or playwriting and criticism;
- the ability to use, with safety and efficiency, the tools and equipment basic to theatre production technology;
- the ability to communicate to an audience through at least one of the components of theatrical art—acting, directing, designing, playwriting, or criticism; and
- the ability to function effectively as a member of a production team in the preparation of regularly scheduled public productions.

B.A. DEGREE IN THEATRE

The B.A. degree program in theatre requires 41 semester hours in theatre, 3 in dance, and 6 in dramatic literature. It is a broadly based program of theatre practice and study for the student who may wish to pursue in-depth studies in another area as well. It also serves as the core of studies for a student who wishes to pursue further theatre training in one of the B.F.A. areas of concentration.

Students must complete the general requirements of the College of Arts and Sciences and the major requirements listed below.

Major Requirements

<table>
<thead>
<tr>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>THTR 1011 Development of Theatre 1</td>
</tr>
<tr>
<td>THTR 1021 Development of Theatre 2</td>
</tr>
<tr>
<td>THTR 2005 Introduction to Technical Production</td>
</tr>
<tr>
<td>THTR 2015 Introduction to Technical Production 1: Laboratory</td>
</tr>
<tr>
<td>THTR 2025 Introduction to Technical Production 2</td>
</tr>
<tr>
<td>THTR 2003 Acting: Beginning</td>
</tr>
<tr>
<td>THTR 2013 Performance of Literature</td>
</tr>
<tr>
<td>THTR 2085 History of Fashion 1 or THTR 2043 Vocal and Physical Preparation (Note 1)</td>
</tr>
<tr>
<td>(The courses listed above should be taken during the first two years of study.)</td>
</tr>
<tr>
<td>THTR 3035 Theatre Practice 2 (semesters)</td>
</tr>
<tr>
<td>THTR 3071 Directing</td>
</tr>
<tr>
<td>THTR 4081 Senior Seminar</td>
</tr>
<tr>
<td>Elective THTR hours, 3 of which must be in theatre history/literature</td>
</tr>
<tr>
<td>Elective(s) in dance</td>
</tr>
<tr>
<td>Electives in dramatic literature, outside the Department of Theatre and Dance, including at least one course in Shakespeare (ENGL 3562, 3572) (Note 2)</td>
</tr>
</tbody>
</table>

Curriculum Notes:

1. B.F.A. (acting and performance) students must take Vocal and Physical Preparation (THTR 2043).
2. B.F.A. (acting and performance) students must elect to take all six credits in Shakespeare (ENGL 3562 and 3572).

A student wishing to qualify for teaching certification should check in the department office for the requirements of this option.

B.F.A. DEGREE IN THEATRE

The B.F.A. degree program in theatre offers preprofessional training to a limited number of highly motivated and talented students aiming at professional careers. The B.F.A. student pursues one of three possible areas of concentration: acting, design and technical theatre, or performance studies. Total semester hours required in the B.F.A. concentrations:

Acting: B.A. requirements (41 semester hours in THTR), plus 35-38 additional hours (26 in THTR)
Design/technical: B.A. requirements (41 semester hours in THTR), plus 33 additional hours (24 in THTR)
Performance studies: B.A. requirements (41 semester hours in THTR), plus 36 additional hours (24 in THTR)

Admission is limited not only in terms of student capacity, but also to ensure the type of individual attention necessary for effective training. Interested students should identify themselves as early as possible, and formal application should be made at the beginning of the third semester. A student may apply for one, two, or all three areas of concentration, but can be admitted to only one. Counseling in advance is recommended. Admission is based on talent, academic record, motivation, and audition-interviews. Auditions are held each fall semester. The college counts only 67 semester hours of THTR credits toward the total hours required for graduation. B.F.A. students with concentrations in acting or performance studies must achieve grades of A or B in their concentration to remain in the B.F.A. program.

In addition to the general College of Arts and Sciences requirements for the B.A. degree and the B.A. major requirements in theatre, the additional requirements for the B.F.A. in theatre are as follows. (Courses taken as part of a student's B.F.A. concentration cannot also be counted towards fulfillment of the B.A. electives.)

Dance Forms or DNCE 2400 Theatre Dance Forms

Additional dance/movement courses.............0-3
PMUS 1200 Voice Class..........................1

II. Concentration in Design
and Technical Theatre
33 semester hours are required: 24 in THTR courses, 9 in other disciplines. Students in the design and technical theatre concentration should choose the electives in the B.A. requirements to fulfill prerequisites for the following courses:
THTR 3025 Developments in Theatre Architecture and Design.........................3
THTR 3055 Stage Lighting Design 1..................3
THTR 4005 Costume Design 2 or THTR 4015 Scene Design 2 or THTR 4055 Stage Lighting Design 2.........................3
THTR 4035 Scene Painting..........................3
THTR 4065 Advanced Design Projects
(6 credits max.)..................................................1-3
THTR 4075 Advanced Technical Projects
(6 credits max.)..................................................1-3
Electives in design and technical theatre sufficient to total 24 THTR hours beyond the 41 required for the B.A. degree, plus: as advised, courses in other departments in drawing, painting, drafting, sculpture, and/or environmental design.........................9

III. Concentration in Performance Studies
36 semester hours are required: 24 in theatre courses, 12 in other disciplines. Students in the performance studies concentration should take THTR 3071 (Directing) as one of their B.A. electives.
THTR 4051 Playwriting...............................3
THTR 4071 Advanced Directing......................3
Electives in theatre history/literature............15
Elective in design and technical theatre...........3
Plus courses in film studies, literature, art and/or music, as advised.........................12

Bachelor's Degree
Programs in Dance

The following areas of knowledge are central to the undergraduate degrees in dance:
• knowledge of the major works of dance literature that are representative of the most important eras in the development of dance in the western world;
• knowledge of the history of dance, from early eras to the present;
• knowledge of the various means through which a dance performance is realized; and
• knowledge of the aesthetic and intellectual relationship between dance and other disciplines in the twentieth century.

In addition, students completing the degree in dance are expected to acquire:
• the ability to analyze and evaluate dance as an art form with particular attention to at least one of the areas of dance, choreography, dance production, and criticism;
• the ability to understand and use the anatomy and physiology of the body so that choreography is creative and not damaging to the body;
• the ability to communicate to an audience through at least one of the components of modern dance—performance, choreography, or criticism; and
• the ability to function effectively as a member of a dance ensemble in the preparation of regularly scheduled productions.

B.A. DEGREE IN DANCE

The B.A. degree program in dance consists of 45 semester hours in dance plus 6 hours in theatre. This program is designed for dance students who desire a dance component as part of their liberal arts education. Courses fulfilling college requirements as well as general electives are to be chosen in consultation with and approved by a departmental advisor. All normal college requirements must be met. Students are advised that more than 120 hours may be needed for graduation.

The following courses are required for the dance major. A grade of C (2.00) or better is needed in each course required to fulfill the requirements of the B.A. degree.

Major Requirements Semester Hours
DNCE 1029 Dance as a Universal Language ..........................3
Ballet courses, any level ........................................4
DNCE 1001-4071 Dance Techniques: Modern Dance (Note 1).........................8
Dance technique elective(s)........................................2
DNCE 1005 Movement Awareness and Injury Prevention for the Performing Artist........3
DNCE 2012 and 2022 Production 1 and 2 ................................2
DNCE 2013 Dance Improvisation .........................2
DNCE 2033 Beginning Composition.........................3
DNCE 3015 Movement Analysis..........................3
DNCE 2014 Rhythmic Analysis and Accompaniment or DNCE 3024 Musical Resources for Dance .........................2
DNCE 4016 Creative Dance for Children or DNCE 4036 Methods of Teaching Dance ..........................3
DNCE 4017 History and Philosophy of Dance..........................3
DNCE 4027 Dance in the Twentieth Century..........................3
Dance electives..................................................4
THTR 2025 Introduction to Technical Production 2..........................3
THTR 4081 Senior Seminar..........................3

Curriculum Note:
1. Students are placed at the appropriate technique level in this series of courses. Modern dance courses listed as nonmajor technique courses do not normally count toward the major.

B.F.A. DEGREE IN DANCE

The B.F.A. in dance is designed to meet the needs of highly talented students interested in preparing for a professional dance career while in an academic setting. The degree requires 67 semester hours in dance and 15 hours in theatre. Admission is limited to ensure the type of individual attention necessary for effective training. Interested students should identify themselves by the end of their freshman year. Selection is based on demonstrated competency, motivation, and grade point average. All normal college requirements must be met. A GPA of 3.20 or better in the major and 3.00 or better overall is needed to fulfill the requirements for the B.F.A. degree. An advanced level of modern dance technique must be attained by the beginning of the junior year. Students should be advised that 9 or 10 semesters may be needed to complete the B.F.A. program. More than 120 hours are needed for graduation.

Major Requirements Semester Hours
DNCE 1029 Dance as a Universal Language ..........................3
DNCE 1005 Movement Awareness and Injury Prevention for the Performing Artist........3
DNCE 1101-4171 Dance Techniques:
Ballet (Note 1) .................................................8
DNCE 1001-4071 Dance Techniques:
Modern (Note 1) ..............................................16
DNCE 2012 and 2022 Production 1 and 2 .........................2
DNCE 2013 Dance Improvisation .........................2
DNCE 2014 Rhythmic Analysis and Accompaniment ..................................................2
DNCE 2033 Beginning Composition.........................3
DNCE 2240 or 2250 Intermediate Jazz ..................................2
DNCE 3015 Movement Analysis..........................3
DNCE 3024 Musical Resources for Dance .........................2
DNCE 3043 Intermediate Dance
Composition ..................................................3
DNCE 4016 Creative Dance for Children or DNCE 4036 Methods of Teaching Dance ..........................3
DNCE 4027 Dance in the Twentieth Century..........................3
DNCE 4038 Dance Repertory..........................3
DNCE 4053 Advanced Dance Composition ..........................3
DNCE 5092 Studio Concert..........................3
Dance electives..................................................4
THTR 2003 Acting: Beginning ..........................3
THTR 2025 Introduction to Technical Production 2..........................3
THTR 4029 Touring Theatre..........................6
THTR 4081 Senior Seminar..........................3

Curriculum Note:
1. Students are placed at the appropriate technique level in this series of courses.

Graduate Degree Programs

The M.F.A. degree is offered in dance. The M.A. and Ph.D. degrees are offered in theatre.

DEPARTMENTAL REQUIREMENTS

Students wishing to pursue graduate work in theatre and in dance should carefully read both requirements for advanced degrees in the Graduate School section of this catalog and the following departmental requirements. Students should note that departmental requirements are sometimes more comprehensive than those minimums established by the Graduate School.
Prerequisites. Applicants are admitted to the graduate program in theatre and in dance on the basis of their academic records and recommendations. Students admitted who are unable to offer a substantial number of semester hours of work in the area of their intended specialization or allied fields must expect that a significant number of additional courses and semester hours are required of them in order to make up deficiencies. Applicants for the M.F.A. program in dance must audition in person; foreign students may audition by video tape. Contact the dance office for specific audition dates; auditions are usually held in February.

Diagnostic Examination. Every student must take a diagnostic examination upon entrance. This examination and all other information available are employed to design the best possible course of study for the student.

Advisor and Graduate Committee. For every student who declares an intention to work toward an advanced degree, an advisor and committee are designated so that a degree plan may be designed before the end of the first semester of residence.

All candidates for a degree have the responsibility of making certain that the appropriate persons or committees have been appointed to supervise the various steps in their graduate programs. Detailed instructions are available from the department.

M.F.A. DEGREE IN DANCE

Course Requirements. A minimum of 60 semester hours are required, at least 45 of which must be taken in dance at the 5000 level or above. At least 6 semester hours must be taken outside of dance in an approved allied field at the 4000 level or above. The program can be individualized to emphasize choreography/performance or teaching. It is designed to accommodate recent B.A. or B.F.A. graduates and practicing professionals desiring a graduate degree.

The M.F.A. in dance is based on a required core of courses including modern dance, ballet, choreography, readings in dance, seminars, research strategies, methods of teaching, and a creative project or thesis.

Project or Thesis. One year before completion of the thesis or project, a written proposal for a creative project or thesis must be presented and approved. Upon its completion, a defense of the project or thesis is required in an oral examination, which also requires a demonstration of the student's knowledge of dance.

Technical Proficiency. For completion of the degree, technical proficiency must be demonstrated at the advanced level in modern dance and at the intermediate level in ballet.

Examination. A written comprehensive examination covering the student's graduate studies must be taken and passed prior to the oral examination.

M.A. DEGREE IN THEATRE

Course Requirements. All master's degree students in theatre are required to complete THTR 6009, 6059, and two of the following: THTR 6011, 6021, 6031, 6041, or 6061.

After any undergraduate deficiencies have been removed, students must earn 30 semester hours, at least 16 of which must be in THTR courses at the 5000 level or above. Four thesis credit hours are counted toward the 30-hour requirement.

PH.D. DEGREE IN THEATRE

Doctoral students in theatre are normally expected to earn 40 semester hours of course work beyond the master's degree, at least 30 of which must be at the 5000 level or above. When approved by the student's advisory committee, credits from other departments on campus may count.

Doctoral study in theatre is based on the following core of required advanced courses.

THTR 6009 Research Strategies and Techniques
THTR 6019 Professional Orientation
Plus four of the following:
THTR 6011 On-Stage Studies: Classical and Neoclassical Drama
THTR 6021 On-Stage Studies: Elizabethan and Jacobean Drama
THTR 6031 On-Stage Studies: American Theatre and Drama
THTR 6041 On-Stage Studies: Modern European Drama
THTR 6061 On-Stage Studies: Contemporary British and American Drama

Beyond the core courses, studies are determined by students and their advisory committees, consistent with Graduate School and departmental requirements. Doctoral students are required to demonstrate proficiency in a foreign language, at a fourth semester college level, by passing a standardized examination. Doctoral students should also consult the Graduate School description of dissertation hour requirements.

WOMEN STUDIES

Students may concentrate in women studies through a special track within the American studies major or may earn a women studies minor to supplement study in their major field.

Since 1974, the women studies program has offered an interdisciplinary curriculum encompassing social sciences and humanities. Courses reflect the new scholarship on women: they focus on the interface of the public and private spheres of women's lives and on feminist issues such as gender identity, theories of inequality, women's language and literature, third-world women, and violence against women. The program houses a library and sponsors colloquia, workshops, and other cultural and educational events.

The following areas of knowledge are central to the program in women's studies:
- knowledge of the main social, economic, political, and psychological issues of contemporary American women's lives;
- knowledge of the main topics in the history of feminism thought;
- knowledge of women's cultural and racial diversity;
- knowledge of the history of women in a particular area of the world (e.g., the United States, Europe, or the Third World); and
- knowledge of women's literary expression within a genre, a time period, or a theme.

In addition, students completing the program in women studies are expected to acquire:
- the ability to identify ideas and concepts about women within various fields and to connect these ideas in common themes or topics;

UNIVERSITY WRITING PROGRAM

The University Writing Program trains students from all disciplines, schools, and colleges in the techniques of writing analysis and argument. Most classes are conducted as workshops; that is, student papers are discussed at every class meeting.

The program promotes the principle that ideas do not exist apart from language, and thus content cannot be isolated from style. For ideas to flourish, they must be expressed clearly and gracefully, so that readers take pleasure while taking instruction.

Upper-division seminars are open to juniors and seniors and fulfill the written communication requirement of the College of Arts and Sciences core curriculum. Graduate courses offer professional training to students writing theses, articles, and grant proposals.

For information about specific classes and their instructors, students should consult the Registration Handbook and Schedule of Courses. University Writing Program courses do not fulfill the humanities requirement under the pre-1988 curriculum for students in the College of Arts and Sciences.
• the ability to write a focused and coherent analytical essay based upon and sustained by evidence;
• the ability to analyze arguments and interpretations for internal consistency and underlying assumptions; and
• the ability to design and implement a research project on a women studies topic.

Program Requirements
Students must complete the general requirements of the College of Arts and Sciences and the requirements listed below.

Major Requirements Semester Hours
Students must complete a minimum of 36 credit hours with grades of C- or better in women studies courses, a minimum of 18 credits of which must be upper division.

These 36 credit hours should be distributed as follows:
WMST 2000 Introduction to Women Studies .................................................. 3
WMST 2010 Contemporary Issues ................................................................. 3
WMST 3090 Critical Thinking in Feminist Theory ........................................... 3
WMST 4090 Feminist Theory ......................................................................... 3
WMST 4000 Capstone Seminar ..................................................................... 3
One course chosen from the following:
WMST 3135 Study of Chicana/Las ................................................................. 3
WMST 3505 Historical and Contemporary Issues of Black Women .......... 3
WMST 3730 Women in International Development .................................... 3
WMST 3700 Topics in Women Studies ......................................................... 3
At least two courses from the following:
WMST 2500 History of the Feminist Movement in the U.S. ......................... 3
WMST 3110 Feminist Practical Ethics .......................................................... 3
WMST 3202 Religion and Feminist Thought .................................................. 3
WMST 3300 Women and the Law ................................................................. 2
WMST 3550 Male/Female Relationships ....................................................... 3
WMST 3656 Research Seminar on Women and Peace ................................ 3
WMST 3930 Internship .................................................................................. 1-6
WMST 4000 Senior Seminar ......................................................................... 3
Electives ........................................................................................................ 12

(Courses sponsored and cross-listed by Women Studies may be used to satisfy the electives.)

COURSE DESCRIPTIONS

The following courses are offered in the College of Arts and Sciences on the Boulder campus. This listing does not constitute a guarantee or contract that any particular course will be offered during a given year.

For current information on times, days, and instructors of courses, students should consult each semester's Registration Handbook and Schedule of Courses.

Many courses may be open to nonmajors. Students should check with individual departments for current policies.

Courses numbered in the 1000s and 2000s are intended for lower-division students; those in the 3000s and 4000s are for upper-division students. Courses numbered in the 5000s are primarily for graduate students, but in some cases may be open to qualified undergraduates. Normally, courses at the 6000, 7000, and 8000 level are open to graduate students only.

Courses are organized by subject matter within each department, and are generally listed numerically by last digit (courses ending in the number "0" are listed before courses ending in "1," and so on). The number after the course number indicates the semester hours of credit that can be earned in the course.

Abbreviations used in the course descriptions are as follows:
Preq. —Prerequisite Coreq. —Corequisite Lab. —Laboratory Lect. —Lecture Rec. —Recitation Sem. —Seminar

American Studies

AMST 2000-3. Themes in American Culture: 1600-1865. Enables students to explore various themes in pre-1865 American culture. Examines these themes, which vary each year, in their social context. Approved for arts and sciences core curriculum: United States context.

AMST 2010-3. Themes in American Culture: 1865-Present. Enables students to explore various themes in post-1865 American culture. Examines these themes, which vary each year, in their social context. Approved for arts and sciences core curriculum: United States context.

AMST 3960-3. American Studies: Junior Seminar. Students examine major concepts of American studies as a method of researching and organizing historical information. Special attention given to ideas and works of individuals that have had the greatest influence on the shaping of the discipline. Preq.: AMST 2000 or 2010.

AMTH 1040-3. Principles of Anthropology 1. 1 Surveys the world's major culture areas; culture and its major components, such as subsistence, social organization, religion, and language.

ANTH 1100-3. Exploring a Non-Western Culture: The Inuit. Studies the social and economic patterns, ideas and values, and aesthetic achievements of the Inuit, a Culture. Approved for arts and sciences core curriculum: cultural and gender diversity.

ANTH 1101-3. Exploring a Non-Western Culture: Japan. Examines modern Japan in terms of cultural styles, social patterns, work practices, aesthetic traditions, ecological conditions, and historical events that shape it as both a non-western culture and a modern industrial state. Approved for arts and sciences core curriculum: cultural and gender diversity.

ANTH 1120-3. Exploring a Non-Western Culture: Hopi and Navajo, Cultures in Conflict. Studies the evolution of Hopi and Navajo cultures and cultural interchange among Hopi, Navajo, and surrounding communities through the contemporary period, using an integrated, holistic, and humanistic viewpoint. Principal goal is to instill an appreciation of non-western cultural diversity in material adaptations, social patterns, ideas and values, aesthetic achievements, thus recognizing a range of cultural solutions to common human problems. Same as ABST 1125. Approved for arts and sciences core curriculum: cultural and gender diversity.

ANTH 1130-3. Exploring a Non-Western Culture: Amazonian Tribal Peoples. Examines the Amazonian tribal cultures of South America, their histories, cultural attributes, and contemporary problems and dilemmas. Approved for arts and sciences core curriculum: cultural and gender diversity.

ANTH 1140-3. Exploring a Non-Western Culture: The Maya. Explores the culture of the Maya of Central America, emphasizing material adaptations, social organizations, ideas and values, and artistic achievements in the past and present. Approved for arts and sciences core curriculum: cultural and gender diversity.

ANTH 1150-3. Exploring a Non-Western Culture: Regional Cultures of Africa. Explores a small number of cultures in a specific subregion of Africa from an integrated holistic viewpoint, emphasizing material adaptations, social patterns, ideas and values, and aesthetic achievements. Approved for arts and sciences core curriculum: cultural and gender diversity.

1 Also available through correspondence study.
ANTH 2050-3. Honors—Human Origins 1. Understanding how the following two major bodies of evidence for human evolution are used by physical anthropologists in search of human origins: humankind's close physical and behavioral similarity to other living species, particularly living primates, and the fossil record for human evolution. Students may not receive credit for both ANTH 2050 and 2050. Prereq., ANTH 2050. Approved for arts and sciences core curriculum: natural science.

ANTH 2080-3. Anthropology of Gender. Offers a comparative analysis of gender-based status and social roles. Examines in cross-cultural context relations among women's subsistence and reproductive activities, division of labor by sex, cultural forces, and societal technology level. Emphasizes basic anthropological methods, perspectives, and knowledge base. Same as WMST 2000.

ANTH 2100-3. Frontiers of Cultural Anthropology. Covers current theories in cultural anthropology and discusses the nature of field work. Explores major schools of thought and actual field studies.

ANTH 2200-3. Introduction to Archaeology. Discusses history, basic concepts, techniques, and theoretical construction of archaeological field and laboratory investigations.

ANTH 2210-2. Laboratory Course in Archaeological Methods. Studies analytical methods in archaeological research including those employed both in the field and in the laboratory. Instruction deals with practical exercises illustrating many of the theoretical principles covered in ANTH 2200. Coreq., ANTH 2200.

ANTH 2270-3. New World Archaeology. Prehistory of North, Middle, and South America, emphasizing peopling of the New World, earliest American Indian cultures, and later regional developments.

ANTH 2800-3. Nature of Language. Surveys the languages of the world. Studies theories of the origin of language, its relationship to other forms of communication, and to systems of writing.

ANTH 2840 (1-3). Independent Study. For lower-division undergraduate students.

ANTH 3010-3. The Human Animal. Identifies genetic, anatomical, physiological, social, and behavioral characteristics humans share with other mammals and primates. Explores how these characteristics are influenced by modern culture. Prereqs., ANTH 2010 and 2020 or equivalent. Approved for arts and sciences core curriculum: natural science.

Cultures of the World (ANTH 3100 through 3180):
Each course covers peoples and cultural systems within areas indicated, including ways of life of the indigenous populations, their relations with each other and to other peoples, and effects of culture change in recent times.

ANTH 3110-3. Ethnography of Mexico and Central America.

ANTH 3130-3. North American Indians: Traditional Cultures. Comprehensive survey of native cultures of America north of Mexico, including a review of their natural environments, prehistory, languages, and major institutions for the various culture areas. Same as AIST 3135.

ANTH 3150-3. Culture and Society in South Asia.

ANTH 3160-3. Peoples of the South Pacific.

ANTH 3300-3. Elements of Religion. Universal components of religion, as inferred from religions of the world, primitive and civilized.

ANTH 3800-3. Languages and People. Investigation of roles that languages play in building new nations, in spread of world religions, in migration, and in diffusion of writing systems and other customs throughout the world.

ANTH 4000-3. Quantitative Methods in Anthropology. Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures. Same as ANTH 5000.

ANTH 4020-3. Explorations in Anthropology. Special topics in cultural, linguistic, and physical anthropology, as well as archaeology. Prereq., 15 hours of anthropology course work. Repeatable for credit for a total of 6 credit hours; check with the department for semester offerings. Same as ANTH 5020.

ANTH 4030-6. Comparative Primate Anatomy. Anatomical correlates are investigated through lecture and laboratory dissection of non-human primates. Emphasis in readings, lecture, and dissection is placed upon form, function, and ecology of living primate species. Prereq., ANTH 2010 or instructor consent. Same as ANTH 5030.

ANTH 4060-3. Nutrition and Anthropology. Nutritional requirements of humans and how they have been met by different populations, taking into account differences in soils, climate, natural resources, technology, and cultural practices. Prereqs., ANTH 2010 and 2020 or EPOB 1210 and 1220 or NASC 1230 or 1240. Same as ANTH 5060.

ANTH 4110-3. Human Paleontology. Detailed consideration of the fossil evidence for human evolution. Subjects covered are a history of discovery of important fossils and interpretations, descriptive information about the fossils, and data and theory from Pleistocene studies relating to ecology. Prereqs., ANTH 2010 and 2020 or EPOB 1210 and 1220. Same as ANTH 5110.

ANTH 4120-3. Advanced Physical Anthropology. Introduces population genetics and its application to understanding problems of process in human evolution and the formation of races in humans. Prereqs., ANTH 2100 and 2020 or EPOB 1210 and 1220. Same as ANTH 5120.

ANTH 4140-3. Human Growth and Development. Considers individual and population differences in human body size, shape, composition, and function. Emphasizes how these differences arise as a result of the growth process and in relation to genetic variation and environmental influences. Prereqs., ANTH 2010 and 2020 or EPOB 1210 and 1220 or NASC 1230 or 1240. Same as ANTH 5140.

ANTH 4170-3. Primate Paleontology. Focuses on the fossil record of nonhominoid primates. Special emphasis placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini, and
the adaptations of extinct primates. Prereq., 
ANTH 2010 or EPOB 1410 or 1210. Same as 
ANTH 5160.

ANTH 4180-3. Anthropological Perspectives: 
Contemporary Issues. Students read, discuss, 
and write critical evaluations of selected classical 
texts in anthropology. These and classroom 
lectures identify basic themes that inform major 
thematic perspectives. Students then bring 
these perspectives to bear on issues currently fac-
ing the human species. Prereq., background 
knowledge of general areas in anthropology, 
upper-division standing, and instructor consent. 
Approved for arts and sciences core curriculum: 
critical thinking.

Prehistoric and protohistoric cultures and areas of 
North America, excluding the American 
Southwest. Same as ANTH 5200.

ANTH 4210-3. Southwestern Archaeology. 
Prehistoric cultures of the American Southwest, 
their origins, characteristics, and relationships. 
Same as ANTH 5210.

ANTH 4220-3. Archaeology of Mexico and 
Central America. Prehistoric and protohistoric 
cultures and areas of Mexico and Central Amer-
ica, including the Aztecs and Mayas. Prereq., 
ANTH 2200 or equivalent. Same as ANTH 
5220.

ANTH 4230-3. Settlement Archaeology. Stud-
ies the manner in which primitive humans adapt 
their residences to physical environment and 
social needs. Considers prehistoric settlement 
data as well as inferences to be derived: popula-
tion, community organization, architecture, and 
land use. Same as ANTH 5230.

ANTH 4240-3. Archaeology of South America. 
Explores prehistoric and protohistoric cultures of 
South America, their origins, characteristics, and 
relationships, including the high civilization of 
the Andean area. Same as ANTH 5240.

ANTH 4270-3. Plains Archaeology. Examines 
prehistoric and protohistoric cultures of the 
North American plains in five subregions. Origi-

gins, characteristics, and structural elements of 
these cultures are discussed in detail. Prereq., 
ANTH 2200 or 2270. Same as 5270.

ANTH 4330-3. Environmental Archaeology. 
Surveys the method of cultural ecology as it 
can be applied to archaeological investigations. 
Same as ANTH 5330.

ANTH 4340-3. Archaeological Method and 
Theory. Reviews methods of cultural theories 
employed in investigating and explaining the 
archaeological record. Prereq., ANTH 2200. 
Same as ANTH 5340.

ANTH 4350 (2-6). Archaeological Field and 
Laboratory Research. Students participate in 
ar
d
erchological field research and conduct labora-
tory analysis of archaeological materials and data. 
Prereq., instructor consent. Same as ANTH 5350.

ANTH 4380-3. Lithic Analysis and Replication. 
Uses diversity of approaches to the analysis of 
ancient stone tools, including fracture 
mechanics, lithic technology, materials, heat 
treatment, and functional analysis. Percussion 
and pressure flaking experiments are performed. 
Prereq., ANTH 2200. Same as ANTH 5380.

ANTH 4500-3. Cross-Cultural Aspects of 
Socioeconomic Development. Examines goals of 
international agencies which support develop-
ment in underdeveloped countries. Antropol-
ogical perspective is provided for such issues as 
urban planning, health care and delivery, popula-
tion control, rural development, and land 
reform. Same as ANTH 5500.

ANTH 4510-3. Applied Cultural Anthropology. 
Analysis of problems of cultural change due to 
contacts between people of different cultures. 
Same as ANTH 5510.

Explores anthropological approaches to the study 
of symbolic systems, including patterns of belief, 
talism, art, and myth. Theoretical issues involve 
nature of symbols, impact of modes of commu-
nication, and interpretation of meaning cross-
culturally. Same as ANTH 5520. Approved for 
arts and sciences core curriculum: critical 
thinking.

ANTH 4530-3. Theoretical Foundations of 
Social and Cultural Anthropology. Studies his-
tory of the growth of anthropology from earliest 
times to mid-twentieth century, including vari-
sous schools of thought, outstanding contribu-
tors, and their works. Same as ANTH 5530.

ANTH 4560-3. North American Indian Accul-

cumulation. Comprehensive survey of cultures of 
the native cultures of America north of Mexico 
caused by occupation of the continent by Old 
World populations, including a review of pro-
cesses of contact, environmental changes, 
changes in major institutions, the nature of fed-
eral/state administration, the reservation system, 
and contemporary developments. Same as 
ANTH 5560 and AIST 4565. Approved for 
arts and sciences core curriculum: contemporary 
societies, or cultural and gender diversity.

ANTH 4570-3. Maritime Peoples. Archaeologi-
cal studies of maritime peoples are considered 
first, followed by detailed study of contemporary maritime peoples, emphasizing fishermen 
and fishing communities. Course concludes with 
consideration of contemporary issues involving 
humanity's present and future use of the seas. 
Same as ANTH 5570.

ANTH 4580-3. Power: The Anthropology of 
Politics. Covers nature and distribution of power 
in state and stateless societies, evolution of politi-
cal stratification, political economy of colonial-
ism, and selected aspects of power in modern 
society. Same as ANTH 5580.

ANTH 4590-3. Urban Anthropology. Compar-
avative study of urban life. Same as ANTH 5590.

ANTH 4600-3. Human Ecology: Cultural 
Aspects. Descriptive and analytical study of 
change in demographic and ecological variables 
within one or more specific cultures undergoing 
rapid assimilation. Compares aspects of breeding 
isolates, population structures, settlement pat-
terns, and family and community institutions. 
Same as ANTH 5600.

ANTH 4610-3. Medical Anthropology. Cul-
tural factors determine states of health and illness 
in both Western and non-Western societies. The 
transition from traditional to modern status cre-
ates new problems including population growth, 
aging, changing patterns of morbidity, morality 
and health care, and new socioeconomic conse-
quencies. Same as ANTH 5610.

ANTH 4630-3. Nomadic Peoples of East 
Africa. Examines the issues of current concern in 
the study of East African pastoral peoples. First 
half of the course is devoted to historical perspec-
tives; second half explores the transition from 
subsistence to market-oriented economies. Same 
as ANTH 5630.

ANTH 4710-3. Departmental Honors in 
Anthropology 1. Course work built around 
theme of research design as a means of integrat-
ing previous training in the field of anthropol-
ogy, as well as providing an opportunity to per-
form creative scientific investigations.

ANTH 4720-3. Departmental Honors in 
Anthropology 2. Continuation of ANTH 4710.

ANTH 4760-3. Ethnography of Southeast 
Asia and Indonesia. Same as ANTH 5760.

ANTH 4840 (1-3). Independent Study. For 
upper-division undergraduate students. May be 
repeated for credit, up to a maximum of two in 
one semester.

ANTH 4850 (1-3). Independent Study. For 
upper-division undergraduate students.

ANTH 4910 (1-3). Teaching Anthropology. 
Practicum by special arrangement only in which 
students learn to teach anthropology by serving 
as recitation leaders or tutors in introductory 
courses or as small group leaders in advanced 
courses. Prereq., instructor consent.

ANTH 5000-3. Quantitative Methods in 
Anthropology. Same as ANTH 4000.

ANTH 5020-3. Explorations in Anthropology. 
Same as ANTH 4020.

ANTH 5030-6. Comparative Primate 
Anatomy. Same as ANTH 4030.

Same as ANTH 4060.

Same as ANTH 4080.

ANTH 5110-3. Human Paleontology. Same as 
ANTH 4110.

ANTH 5120-3. Advanced Physical Anthropol-
yogy. Same as ANTH 4120.

ANTH 5130-3. Advanced Osteology. Detailed 
study of the human skeleton with special atten-
tion to health and demographic conditions in 
prehistoric cultures and the evaluation of physi-
ocl characteristics and genetic relationships of 
prehistoric populations. Prereq., ANTH 2010-
2020.

ANTH 5140-3. Human Growth and Develop-
ment. Same as ANTH 4140.

ANTH 5150-3. Human Ecology: Biological 
Aspects. Same as ANTH 4150.

ANTH 5170-3. Primate Paleontology. Same as 
ANTH 4170.

ANTH 5190-3. Conservation Archaeology. 
Philosophy and legislation involved with conser-
vation (contract) archaeology. Contract negotia-
tions and budgetary involvements of govern-
ment agencies and universities. Analysis of envi-
ronmental impact statements for archaeological 
projects.

ANTH 5210-3. Southwestern Archaeology. Same as ANTH 4210.

ANTH 5220-3. Archaeology of Mexico and Central America. Same as ANTH 4220.

ANTH 5230-3. Settlement Archaeology. Same as ANTH 4230.

ANTH 5240-3. Archaeology of South America. Same as ANTH 4240.

ANTH 5270-3. Plains Archaeology. Same as ANTH 4270.

ANTH 5330-3. Environmental Archaeology. Same as ANTH 4330.

ANTH 5340-3. Archeological Method and Theory. Same as ANTH 4340.

ANTH 5350-3 (2-6). Archeological Field and Laboratory Research. Same as ANTH 4350.

ANTH 5380-3. Lithic Analysis and Replication. Same as ANTH 4380.

ANTH 5390-3. Research Methods in Archaeology 1. Methods and theory of archaeology, emphasizing the interpretation of materials and data and the relationships of archaeology to other disciplines.

ANTH 5500-3. Cross-Cultural Aspects of Socioeconomic Development. Same as ANTH 4500.

ANTH 5510-3. Applied Cultural Anthropology. Same as ANTH 4510.

ANTH 5520-3. Symbolic Anthropology. Same as ANTH 4520.

ANTH 5530-3. History of Anthropology. Same as ANTH 4530.

ANTH 5590-3. Urban Anthropology. Same as ANTH 4590.

ANTH 5610-3. Medical Anthropology. Same as ANTH 4610.

ANTH 5620-3. Seminar: Ethnography as a Genre. Explores how the assumptions of ethnographic writing have evolved from the late nineteenth century to the present day. Compares conventional ethnographic descriptions with more innovative forms of crosscultural representation to bring out the underlying issues of ethnographic authority, allegory, voice, reflexivity, and accountability.

ANTH 5630-3. Nomadic Peoples of East Africa. Same as ANTH 4630.

ANTH 5760-3. Ethnography of Southeast India and Indonesia. Same as ANTH 4760.

ANTH 5790-3. Core Course: Biological Anthropology. Discusses how biological anthropologists use evidence and concepts from evolutionary theory, human biology, and ecology to understand the evolution, diversification, and adaptation of human populations. Required of all first-year graduate students in anthropology.

ANTH 5840 (1-3). Guided Study. Directed individual research based on a specific area of specialization. May be repeated for credit, up to a maximum of two in one semester.

ANTH 6940-3. Candidate for Degree.

ANTH 6950 (1-6). Master's Thesis.

ANTH 7140-3. Seminar: Archaeology of Selected Areas. Considers archaeology of a specified area, either geographical or topical. Areas selected in accordance with current research interests.

ANTH 7840 (1-3). Independent Research. Research aimed at developing a solution to an originally conceived research problem. May be repeated for credit, up to a maximum of two in one semester.

ANTH 8990-10. Doctoral Dissertation. All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of this catalog.

Cross Listings

ANTH 4419-3. Archaeology of Ancient Near East. Emphasizes similarity and differences between the archaeological material of nations of the Middle East and the archaeological influences which were exchanged between such nations. Same as ANTH 5419 and CLAS 4419.

ANTH 4429-3. Archaeology of Ancient Egypt. Archaeology of ancient Egypt in light of recent excavations; the link between history and archaeology of the nations of the Bible in the North and Egypt, Nubia, Ethiopia, and Yemen in the South. Same as ANTH 5429 and CLAS 4429.

ANTH 4789-3. Egyptian Hieroglyphics 1. Studies the culture of the ancient Middle East to shed light on the history of its languages. Reading and translating hieroglyphs into modern languages. Same as ANTH 5789 and CLAS 4789.

ANTH 5269-3. Biblical Archaeology. Same as ANTH 4269 and CLAS 5269.

ANTH 5419-3. Archaeology of Ancient Near East. Same as ANTH 4419 and CLAS 5419.

ANTH 5429-3. Archaeology of Ancient Egypt. Same as ANTH 4429 and CLAS 5429.

ANTH 5789-3. Egyptian Hieroglyphics 1. Same as ANTH 4789 and CLAS 5789.

Applied Mathematics

APPM 1340-6. Intensive Calculus. Covers precalculus mathematics, analytical geometry, and calculus, as well as other topics covered in APPM 1350. Not taught on a regular basis, controlled enrollment.

APPM 1350-4. Calculus 1 for Engineers. Selected topics in analytical geometry and calculus. Rates of change of functions, limits, derivatives of algebraic and transcendental functions, applications of derivatives, and integration. Prereq., two years of high school algebra, one year of geometry, one-half year of trigonometry, and satisfactory performance on the math placement examination, or Core better in math modules (MATH 1000-1040).

APPM 2350-4. Calculus 3 for Engineers. Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes. Prereq., APPM 1360, 1380, or MATH 2300.

APPM 2360-4. Introduction to Linear Algebra and Differential Equations. Introduces ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, linear transformations, and systems of linear differential equations. No credit is awarded to students already having credit in both MATH 3130 and 4430. Prereq., APPM 1360 or MATH 2300.

APPM 2380-4. Introduction to Ordinary Differential Equations. Basic concepts of ordinary differential equations. Covers methods to solve first-order equations and linear equations of higher order, especially equations with constant coefficients; series solutions; and numerical methods, implemented on a personal computer. Prereq., APPM 1360 or MATH 2300.

APPM 3170-3. Discrete Applied Mathematics. Introduces discrete structures, their representations, and applications. Emphasizes applications of graph theory to fields such as computer science, engineering, operations research, social sciences, and biology. Prereq. or coreq., APPM 3310. Same as MATH 3170.

APPM 3310-3. Matrix Methods and Applications. Introduces linear algebra and matrices,
emphasizing applications. Includes methods of solving systems of linear algebra and linear ordinary differential equations. Discusses computational algorithms to implement these methods. Some applications in operations research may be included as time permits. Students may not receive credit for both MATH 3130 and APPM 3310. Prereq., APPM 1360 or MATH 2300.

APPM 3570-3. Applied Probability Axions; counting formulas; conditional probability; independence; random variables; continuous and discrete distribution; expectation; moment generating functions; law of large numbers; central limit theorem; poison process; multivariate Gaussian distribution. Students may not receive credit for both APPM 3570 and ECEN 3810 or for both APPM 3570 and MATH 4510. Prereq., APPM 2350 or MATH 2400.

APPM 4380-3. Modeling in Applied Mathematics. Exposition of a variety of mathematical models arising in the physical and biological sciences. Models may be taken from applications in classical and celestial mechanics, fluid dynamics, traffic flow, population dynamics, economics, and elsewhere. Prereq., APPM 2360.

APPM 4560-3. Introduction to Stochastic Population Models. Studies mathematical models used in demography, epidemic theory, statistical genetics, and mathematical ecology, and their strengths and limitations. Surveys mathematical techniques used in these applications. Prereq., one year of calculus and a course in probability and/or statistics. Same as APPM 5560.

APPM 4650-3. Intermediate Numerical Analysis 1. Numerical solution of nonlinear equations; interpolation; methods in numerical integration; numerical solution of linear systems and matrix eigenvalue problems. Stresses significant computer applications and software. Prereq., APPM 2350 or MATH 2400; APPM 2360 and 3310 or MATH 3130. Same as MATH 4650.

APPM 4840 (1-3). Independent Study. Introduces undergraduate students to the research focuses of the program in applied mathematics. Prereq., APPM 1350, 1360, 2350, 2360, and either APPM 3310 or MATH 3130. Recommended prereq., a course in ordinary or partial differential equations and APPM 4650.

APPM 4955-3. Undergraduate Seminar in Applied Mathematics. Introduces undergraduates to applied mathematical topics and strategies for research. A maximum of 6 hours of seminar work is allowed toward the degree in applied mathematics. Prereq., three semesters of calculus, APPM 2360 or an upper-division applied mathematics course, and instructor consent.

APPM 5180-3. Discrete Applied Mathematics. Focuses on the use of discrete modeling to solve problems in several disciplines, using graph theory and combinatorics. Applications are selected from areas such as computer science communication networks, economics, operations research, and social, biological, and environmental sciences, as well as engineering. Prereq., APPM 4650 and 4350, or instructor consent.

APPM 5440-3. Applied Analysis 1. Discusses the elements of basic real and complex analysis, Banach spaces, LP spaces, and many relevant inequalities. Includes applications of existence and uniqueness of solutions to various types of ordinary differential equations, partial differential equations, and integral equations. Prereq., MATH 4310 and 4320 or equivalent; MATH 3130 or equivalent; or instructor consent.

APPM 5480-3. Methods of Applied Mathematics 4: Approximation Methods. Covers asymptomatic evaluation of integrals (stationary phase and steepest descents), perturbation methods (regular and singular methods, and inner and outer expansions), multiple scale methods, and applications to differential and integral equations. Prereq., APPM 5470 or instructor consent.

APPM 5520-3. Introduction to Mathematical Statistics. Same as APPM 4520 and MATH 5520.

APPM 5620-3. Mathematical Statistics. Mathematical theory of statistics. Topics include distribution theory, estimation and testing of hypotheses, multivariate analysis, and nonparametric inference. All with emphasis on theory. Prereq., APPM 5520 or MATH 5520. Same as MATH 5620.

APPM 5640-3. Time Series Analysis. Basic properties, linear extrapolation, and filtering of stationary random functions. Spectral and cross-spectral analysis; estimation of the power spectrum using computers; nonstationary time series; comparison of various computer programs. Prereq., MATH 4510 or instructor consent. Same as MATH 5640.

APPM 5650-3. Introduction to Stochastic Processes. Systematic study of Markov chains and some of the simpler Markov processes including renewal theory, limit theorems for Markov chains, branching processes, queueing theory, and birth and death processes. Applications to physical and biological sciences. Prereq., MATH 4310 and 4510, or instructor consent. Same as MATH 6550.

APPM 6900 (1-3). Independent Study.

APPM 6950 (1-6). Master's Thesis.

APPM 7100-3. Mathematical Methods in Dynamical Systems. Includes dynamical systems, mappings and differential equations, period doubling route to chaos, Hamiltonian mechanics, action-angle variables, results from KAM and bifurcation theory, phase-plane analy-
sis, Melnikov theory, strange attractors, etc. Prereq., APPM 5440, PHYS 5210 or equivalent, or instructor consent.

APPM 7400-3. Topics in Applied Mathematics. Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the core courses in applied mathematics. Prereq., instructor consent.

APPM 7500-3. Topics in Computational Fluid Dynamics. Covers numerical methods and analysis relevant to problems in fluid dynamics. Discusses difference, spectral, multi-level, and/or finite element methods as they apply to particular applications. Prereq., APPM 5610.

APPM 7900 (1-3). Reading and Research in Applied Mathematics. Introduces graduate students to the research focuses of the program in applied mathematics. Prereq., instructor consent.

APPM 8000-1. Seminar in Applied Mathematics. Introduces advanced topics and research in dynamical systems. Prereq., instructor consent.

APPM 8100-1. Seminar in Dynamical Systems. Introduces advanced topics and research in dynamical systems. Prereq., instructor consent.

APPM 8200-1. Seminar in Nonlinear Waves and Integrable Equations. Introduces advanced topics and research in nonlinear waves and integrable systems. Prereq., instructor consent.

APPM 8990-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree.

Arts and Sciences

Expository Writing

APSC 1000-4. General Expository Writing. Helps students develop their abilities to do college-level reading, writing, and thinking. Students are asked to read critically, then construct written responses that are revised and crafted into more formal essays and position papers. Offered through the University Learning Center. Prereq., program coordinator consent.

APSC 1100 (3-4). Advanced Expository Writing. Continuation of the writing skills addressed in APSC 1000. The advanced course requires students to create longer papers informed by independent library research and containing more complex, multi-layered arguments. Offered through the University Learning Center. Prereq., APSC 1000 or program coordinator consent.

Special Curricula

APSC 1700-3. The Experience of Education. Develops major historical, psychological, philosophical, and personal perspectives on education in general and university education in particular. Participants are encouraged to consider how the issues developed in the seminar bear on the choices they face in planning their own educations.

ARSC 2274-3. Peer Counseling. Overview of the field of paraprofessional counseling. Introduces students to counseling theory and techniques. Students study the philosophy of a liberal arts education as well as policies and requirements of the College of Arts and Sciences.

Theses

ARSC 4909 (2-6). Senior Thesis for Individually Structured Major.

ARSC 4949 (3-6). Senior Thesis.

Special Programs

ARSP 3000-1. Journeys Between Self and Other. Explores typical ways Western sojourner have described what they have discovered while living in another culture and how they have been affected by that encounter. Analyzes the cultural adjustment process and subsequent changes in personality and world view through film, novels, and students' personal experiences. Prereq., one semester or year on a study abroad program and instructor consent.

Graduate Courses

ARSC 5010-3. Environmental and Natural Resources Policy. Focuses on the integration of disciplinary perspectives in the formation and appraisal of public policy dealing with the use and protection of natural resources and the environment. Research emphasis: specific topics vary. Required for the environmental policy certificate. Prereq., instructor consent. Same as ARSC 7010.

ARSC 5090-3. Graduate Seminar in Feminist Theory. Begins with a reconsideration of contemporary Anglophone feminist theory, then focuses primarily on the debates of the last 25 years. Discusses how gender should be understood and how it interrelates with our understandings of class, race, embodiment, sexuality, and knowledge. Prereq., graduate standing and instructor consent.

ARSC 7010-3. Environmental and Natural Resources Policy. Same as ARSC 5010.

Asian Studies

ASIA 1840, 2840, 3840, 4840 (1-3). Independent Study.

ASIA 4830-3. Senior Thesis in Asian Studies. Studies an approved East Asian topic, following guidelines established by the program director. Undertaken either as an independent study with an Asian studies faculty member or as part of a seminar course approved by the Asian studies faculty representative in the student's disciplinary option.

Astrophysical, Planetary, and Atmospheric Sciences

APAS 1010-4. Introductory Astronomy 1. Introduces principles of modern astronomy for non-science majors, summarizing our present knowledge about the Earth, moon, planets, Sun, and origins of life. APAS 1110, but with additional recitation and lab experience. Students must attend six nighttime observing sessions. Approved for arts and sciences core curriculum: natural science.

APAS 1020-3. Introductory Astronomy 2. Introduces principles of modern astronomy for non-science majors, summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. Prereq., APAS 1010. Students must attend six nighttime observing sessions. Approved for arts and sciences core curriculum: natural science.

APAS 1030-4. Accelerated Introductory Astronomy 1. Covers principles of modern astronomy summarizing our present knowledge about the Earth, moon, planets, sun, and origin of life. Similar to APAS 1010 but taught at a higher intellectual level including a significant amount of quantitative analysis. Students must attend six night-time observing sessions. Prereq., algebra (MATH 1000-1040 or equivalent). Required in APAS minor. Approved for arts and sciences core curriculum: natural science.

APAS 1040-4. Accelerated Introductory Astronomy 2. Covers principles of modern astronomy summarizing our present knowledge about the sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. Similar to APAS 1020 but taught at a higher intellectual level including a significant amount of quantitative analysis. Prereq., algebra (MATH 1010-1040 or equivalent) and APAS 1030. Required in APAS minor. Approved for arts and sciences core curriculum: natural science.

APAS 1110-3. General Astronomy: The Solar System. Principles of modern astronomy for non-science majors, summarizing our present knowledge about the Earth, moon, planets, Sun, and the origin of life. APAS 1110 and 1120 may be taken in either order. In both courses there is considerable use of the Fiske Planetarium, but only limited use of telescopes. Students must attend six nighttime observing sessions. Approved for arts and sciences core curriculum: natural science.

APAS 1120-3. General Astronomy: Stars and Galaxies. Principles of modern astronomy for non-science majors, summarizing our present knowledge about the Sun, stars, neutron stars, black holes, interstellar gas, galaxies, quasars, and the structure and origin of the universe. APAS 1110 and 1120 can be taken in either order. Students must attend six nighttime observing sessions. Approved for arts and sciences core curriculum: natural science.
APAS 1150-3. Dynamic Earth 3—Meteorology and Oceanography. Lect. 3 hours; Lab. 1 hour. Survey of the earth's and ocean's circulation, structure, and primary dynamic phenomena of the Earth's atmosphere and oceans. Topics of weather forecasting and climate modeling. Prereq.: APAS 1140 and/or GEOG 1010. Approved for arts and sciences core curriculum: natural science.

APAS 3200-3. Atmospheric Science 2: Climatology. Topics vary from year to year and may include climatedic change, snow and ice, mountain weather and climate, and applied climatology. Prereq.: APAS 1150. Approved for arts and sciences core curriculum: natural science.

APAS 3220-3. Intermediate Astronomy: Stars and Galaxies. Topics in modern astronomy outside the solar system are pursued. Topics vary but often include stars, black holes, galaxies, quasars, and cosmology. Nonmathematical (simple algebra only) but physical concepts introduced. Prereq.: APAS 1120 or 1020. Approved for arts and sciences core curriculum: natural science.

APAS 3500 (1-3). Special Topics in Astrophysical, Planetary, and Atmospheric Sciences. Special topics include astrophysical, planetary, and atmospheric sciences. Topics include, but are not limited to, topics of current interest and research in astrophysics and planetary and atmospheric sciences. May be taken up to two times for credit.

APAS 3710-3. The Earth's Atmosphere and Oceans. Physical structure and processes occurring in the atmosphere and oceans; radiation and cloud physics; atmosphere-oceans and cloud currents; general circulation; gulf and jet streams; and formation of severe storms. Prereq.: PHYS 1110 and 1120, and either MATH 1300 and 2300 or APPM 1350 and 1360.

APAS 3730-3. Astrophysics 1—Stellar and Interstellar. APAS 3730 and 3830 provide a year-long introduction to physical processes, observations, and current research methods in stellar, interstellar, galactic, and extragalactic astrophysics, with astronomical applications of gravity, radiation processes, spectroscopy, gas dynamics, and plasma physics. Prereq.: PHYS 1110-1120 and MATH 1300-2300 or APPM 1350-1360.

APAS 3740-3. Cosmology and Relativity. APAS 3730 and 3740 provide a year-long introduction to physical processes, observations, and current research methods in stellar, interstellar, galactic, and extragalactic astrophysics, with astronomical applications of gravity, radiation processes, spectroscopy, gas dynamics, and plasma physics. Prereq.: PHYS 1110-1120, and MATH 1300-2300 or APPM 1350-1360.

APAS 3750-3. Planets, Moons, and Rings. Approach to the physics of planets which emphasizes their surfaces, satellites, and rings. Topics include formation and evolution of planetary surfaces, history of the terrestrial planets, and dynamics of planetary rings. Both APAS 3720 and APAS 3750 may be taken for credit in any order. Prereq.: PHYS 1110 and 1120, and either MATH 1300 and 2300 or APPM 1350 and 1360.

APAS 3830-3. Astrophysics 2—Galactic and Extragalactic. The course pair APAS 3730 and 3830 provides a year-long introduction to physical processes, observations, and current research methods in stellar, interstellar, galactic, and extragalactic astrophysics, with astronomical applications of gravity, radiation processes, spectroscopy, gas dynamics, and plasma physics. Prereq.: PHYS 1110-1120, calculus (MATH 1300-2300 or APPM 1350-1360), and APAS 3730. Required in APAS minor.

APAS 4010-3. Astrophysical Research Seminar. Intensive seminar on the science and methods of astrophysical research. In-class work presents the theoretical background and an overview of ongoing research at CU; students also work on individual research projects in an area of specialization. Prereq.: two semesters of calculus, two semesters of physics, and a major in either math, physics, or engineering.

APAS 4150-3. Plasma Physics. Discusses the fundamentals of plasma physics, including particle motion in electromagnetic fields, wave propagation, collisions, diffusion, and resistivity. Presents examples from space plasmas, astrophysical plasmas, laboratory fusion plasmas, and plasmas in accelerators. Prereq.: PHYS 1110 and 1120, and MATH 2400 or APPM 2650. Prereq. or coreq.: PHYS 3310. Same as PHYS 4150.

APAS 4300-3. Dynamics of Fluids. Describes the fundamentals of fluid dynamics, particularly recent developments in topology of physical interest, such as boundary layers; thermal convection in the Earth's mantle; oceans, atmosphere, and the Sun; compressible flows; magnetohydrodynamics; turbulence; chaos; super fluids; ferro fluids; and non-Newtonian fluids. Prereq.: MATH 2400 or APPM 2650. MATH 3210, PHYS 3310, and PHYS 3320. Same as PHYS 4300.

APAS 4800-3. Space Science: Practice and Policy. Explores students to current controversies in science that illustrate the scientific method and the interplay of observation, theory, and science policy. Students research and debate both sides of the issues, which include strategies and spinoffs of space exploration, funding of science, big vs. small science, and scientific heresy and fraud. Prereq.: APAS 1110-1120, APAS 1010-1020, PHYS 1120, or PHYS 2020. Approved for the arts and sciences core curriculum: critical thinking.

APAS 4810-3. Science and Pseudo-Science in Astronomy. Stimulates students to critically distinguish science and pseudo-science astronomical concepts. Discusses some current astronomical controversies, as well as pseudo-scientific topics. Prereq.: APAS 1110 and 1120, or APAS 1010 and 1020, or PHYS 1110 and 1120, or PHYS 2010 and 2020. Approved for arts and sciences core curriculum: critical thinking.
APAS 4840 (1-3). Independent Study. Prereq., instructor consent.

APAS 5000-3. Seminar in Plasma Physics. Graduate seminar on current plasma physics research. Reviews the goals and techniques of research in areas of plasma physics (controlled fusion, numerical simulations, solar and space physics). Discusses current topics and research literature in depth. May be repeated for an additional 1 credit hour for a total of 4 credit hours to meet candidacy requirement. Prereq., graduate standing or instructor consent. Same as PHYS 5000.

APAS 5110-3. Internal Processes in Gases. Thermal, mechanical, quantum, and radiative processes in gases and plasmas, with emphasis on spectroscopy, atomic and molecular physics, and statistical mechanics applicable to planetary and stellar atmospheres, interstellar matter, and other cosmic phenomena. Prereq., undergraduate physics.

APAS 5400-3. Introduction to Fluid Dynamics. Governing equations of fluid motion relevant to terrestrial, planetary, and stellar atmospheres and gas-dynamical phenomena; scale analysis; effects of rotation, buoyancy, viscosity, and compressibility. Topics include boundary layers, linear, and nonlinear gravity waves, and shocks.

APAS 5410-3. Fluid Instabilities and Waves. Linear and nonlinear analyses of small-scale waves and instabilities in stratified fluids, with effects of rotation, internal gravity and acoustic waves with terrestrial, planetary, and astrophysical applications. Thermal and double-diffusive convection, homogeneous and stratified shear flow instabilities. Examines these topics from the onset of small amplitude disturbances to their nonlinear development and equilibrate. Prereq., APAS 5400.

APAS 5540-3. Mathematical Methods. Applied mathematics course designed to provide the necessary analytical and numerical background for courses in astrophysics, plasma physics, fluid dynamics, electromagnetism, and radiation transfer. Subjects to be covered: integration techniques, linear and nonlinear differential equations, WKBJ and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrals of differential equations. Illustrative examples are drawn from areas of physics listed above.

APAS 5560-3. Radiative Processes in Planetary Atmospheres. Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy, infrared band representation, absorption and emission of atmospheric gases, radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Prereq., APAS 5110 or instructor consent.

APAS 5740-3. Interstellar Astrophysics. Structure, dynamics, and "ecology" of the interstellar medium, stressing the physical mechanisms that govern the thermal, ionization, and dynamic state of the gas and dust; observations at all wavelengths; star formation; relation to external galaxies. Prereq., APAS 5110 or instructor consent.

APAS 5750-3. Observational Astronomy. Surveys the tools of observational astronomy, emphasizing practical applications. Topics include telescopes, instruments, detectors, and techniques used from X-ray to radio wave lengths; error analysis and data reduction techniques. Gives hands-on experience with the Somers 16 Inch Obs. 1:15 and image processing facility. Prereq., senior-level undergraduate physics or instructor consent.

APAS 5920 (1-6). Reading and Research in Astrophysical, Planetary, and Atmospheric Sciences. Prereq., instructor consent.

APAS 5960-3. Theories of Climate and Climatic Variability. Critical review of current theories of climatic variability based on analysis of different physical processes affecting climate. Same as GEOG 5961.

APAS 6000-1. Seminar in Astrophysics. Studies current research and research literature on astrophysical topics. Students and faculty give presentations. Subjects vary each semester. May be repeated to a maximum of four credit hours to meet candidacy requirements. Prereq., graduate standing or instructor consent.

APAS 6010-1. Seminar in Astrophysics. Graduate seminar on research topics related to a semester's core astrophysics course. Research literature explored in depth. May be repeated with APAS 6000 to a maximum of 4 credit hours to meet candidacy requirements. Prereq., graduate standing or instructor consent.

APAS 6620-3. Earth and Planetary Physics 2. Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; tides; polar-glacial rebound, tides and the rotation of the Earth. Same as GEOI 6620 and PHYS 6620.

APAS 6640-3. Introduction to Planetary Science. Provides overview of the nature of the solar
system. Topics include geologic processes and histories of solid planets, planetary chemistry, interior and atmospheres, outer planets, planetary rings, comets, asteroids, extraterrestrial planets, and formation of the solar system. Prerequisites: graduate standing in a physical science, and basic undergraduate physics. Same as GEOL 6640.

APAS 6650 (1-3). Seminar in Geophysics. Advanced seminar studies in geophysical subjects for graduate students. Same as GEOL 6650 and PHYS 6650.

APAS 6940 (1-3). Master's Degree Candidate.

APAS 6940 (4-6). Master's Thesis.

APAS 7160-3. Intermediate Plasma Physics. Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, instabilities, Landau damping, collisionless shocks, solutions: nonequilibrium plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity: radiation ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena. Prerequisites: APAS 5150 or instructor consent. Same as PHYS 7160.

APAS 7240-3. Physics of Planetary Airflows. Theory of physical processes that lead to circulation of air. Ground- and space-based observational techniques used to measure high-great, twilightglow, and dayglow. Determination of structure and composition of planetary atmospheres from airglow measurements. Prerequisites: APAS 5110, 5250, and PHYS 6550.

APAS 7500 (1-3). Special Topics in Astrophysical, Planetary, and Atmospheric Sciences. Acquaints students with current research in astrophysical, planetary, and atmospheric sciences. Topics vary each semester. May be taken up to three times for credit.

APAS 7920 (1-6). Reading and Research in Astrophysical, Planetary, and Atmospheric Sciences. Prerequisite: instructor consent.

APAS 8990-10. Doctoral Dissertation. All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of this catalog.

Bibliography

BIBL 3900 (1-3). Independent Library Research. In-depth library research project. For upper-division students. Arranged with instructor consent.

BIBL 4900 (1-3). Independent Library Research. In-depth library research project. For upper-division students. Arranged with instructor consent.

Biological Sciences

CU-Boulder offers five two-semester introduc- tory biology course sequences. A student may receive credit for only one sequence. The Department of Environmental, Population, and Organismic (EPO) Biology offers three sequences: (1) EPOB 1210 and 1220 are lecture-only courses designed to accommodate both science and nonscience majors. The accompanying labs (EPOB 1230 and 1240) are designed for and required of majors. (2) EPOB 1610 and 1620 are lecture-only courses designed for biology majors and others with at least one year each of high school biology and chemistry. (3) EPOB 1410 and 1420 are designed specifically for educationally disadvantaged students.

The Department of Molecular, Cellular, and Developmental (MCD) Biology offers one sequence, MCDB 1050-1060, designed for science and nonscience majors who have the recommended prerequisites. The accompanying labs (MCDB 1070 and 1080) are designed for and required of majors.

There is a two-semester sequence, NASC 1230-1240, designed exclusively for nonscience majors.

Students who receive 4 or 5 on the AP biology test receive 8 hours of credit and are exempt from EPOB 1210. Students who score in the 66th percentile or higher on the CLEP test in biology will receive 6 hours of credit and are exempt from EPOB 1210 and 1220. EPOB biology and MCD biology majors should consult their departmental advisor before applying AP or CLEP credit. Students majoring in biology who transfer biology credit from other institutions must also consult their departmental advisor.

Biology—Environmental, Population, and Organismic

EPOB 1210-3. General Biology 1. Lect. Concentrated introduction to molecular, cellular, genetic, and evolutionary biology. Emphasizes fundamental principles, concepts, facts, and questions that receive more detailed considera-
EPOB 2000-1(3). Topics in Montane Ecology. Introduces special aspects of ecology and population biology unique to montane environments. Topics include winter ecology, winter finnology, and montane physiological ecology. Most courses will use the facilities of the Mountain Research Station at 9500 ft. No credit for EPOB majors. May be repeated only once for credit. This course uses animals and/or animal tissues.

EPOB 2010-3. Environmental Issues and Biology. The natural environment is currently stressed by a variety of human actions. Examines the nature of these environmental problems and their impact on living organisms, both human and nonhuman species. Prereq., one semester of introductory biology or instructor consent.

EPOB 2020-2. Field Methods in Environmental Sciences for Teachers. Field, lab and lecture course intended to improve the science training of K-12 teachers. Topics include tree-ring analysis, entomology, geology, mammalogy, pollen analysis, pollination ecology, soils, and water chemistry. Course will be team-taught at the Mountain Research Station.

EPOB 2500-4. Introduction to Horticulture. Covers the principles and techniques of plant science applied to cultivated plants. Emphasizes basic plant biology, aspects of the culture environment as variable, and the tools and technologies utilized in culture, regulation, propagation, and protection. Includes a brief survey of the industries related to cultivated plants.

EPOB 2840 (1-6). Independent Study (Sophomore).

EPOB 2870 (1-6). Independent Research (Sophomore).

EPOB 3020-3. Principles of Ecology. Lect. Principles relating to ecosystem structure and function; properties and interactions of populations; adaptations and environmental influences; organization and development of terrestrial and aquatic ecosystems. Prereq., EPOB 1210 and 1220, or MCDB 1060, or NASC 1230 and 1240. Open to nonmajors.

EPOB 3160-3. Paleoecology. Lect. History of modern bionic communities; background of climatic history as setting for contemporary studies of evolution, genetics, and ecology. The myth of stable tropical biota; ecomoral instability in North America; extinction of large mammals; why environmental planning ignores historical perspective. Field trips required. Prereq., EPOB 1210 and 1220, or MCDB 1060, or instructor consent.

EPOB 3170-3. Arctic and Alpine Ecology. Lect. Deals with the biology of arctic and alpine environments, limiting physical factors (such as geomorphology and climatic history), and human interaction with cold stressed environments, especially the arctic. Field trips are required. Prereq., EPOB 1210 and 1220, or MCDB 1060 or GEOL 1010 or 1992, or instructor consent.

EPOB 3180-3. Global Ecology. Lect. Involves study of ecological principles and problems at the biosphere level. Presents a worldwide approach to populations, biotic resources, ecological interactions, land use, deforestation, desertification, species extinctions, pollution, environmental quality, global change, and environmental ethics. Prereq., EPOB 1210 and 1220, or MCDB 1060, or NASC 1230 and 1240, or instructor consent. Open to nonmajors. Same as NASC 3180. Approved for arts and sciences core curriculum: natural science.

EPOB 3240-4. Animal Behavior. Lect. Topics include basic concepts and history, methods of study, neurobiology and behavior, the development of behavior, predator-prey relationships, communication, aggression and dominance, mating systems, and parental care. Where possible, life-history strategies, the evolution of behavior, and behavioral ecology are stressed. Prereq., EPOB 1210 and 1220, or PSYC 1001, or ANTH 2020.

EPOB 3400-4. Microbiology. Lect. and lab. Surveys distinguishing characteristics of microorganisms based on structural-functional relationships, taxonomy, growth, physical-chemical agents of control including antibiotics, metabolism, and genetics. Students receive an introduction to applied microbiology emulating biochemical, and developmental genetics. MCBS 3400 is recommended. Prereq., EPOB 1210 and 1220, or MCDB 1060.

EPOB 3420-5. Introduction to Human Anatomy. Lect. and lab. Introduces basics of human anatomy. Students may not receive credit for both EPOB 3420 and PHED 2790. Prereq., EPOB 1210 and 1220, or MCDB 1060, or instructor consent. This course uses animals and/or animal tissues.

EPOB 3430-5. Human Physiology. Lect., lab and rec. Introduces human physiology primarily for students in pharmacy and allied health programs. May be counted towards EPOB major. Students must not receive credit for both EPOB 3430 and PHED 2800. Prereq., EPOB 1210-1220, or MCDB 1060 and CHEM 1071, 1131, or 1171. This course uses animals and/or animal tissues.

EPOB 3510-4. Plant Anatomy and Development. Lect. and lab. Introduces structures of seed plants, especially angiosperms, and developmental history of these structures. Cell types are learned, and their location and function in plant tissues and organs are studied. The laboratory provides an opportunity to examine plant tissues and to prepare tissues for examination by the light microscope. Stresses role of plant structures in the living plant. Prereq., EPOB 1210 and 1220, or MCDB 1060.

EPOB 3520-4. Plant Systematics. Lect. and lab. Principles and techniques of modern systematics of organisms, illustrated with examples from the plant kingdom, usually the angiosperms. Framework of course is evolutionary and ecological, as well as taxonomic. Prereq., EPOB 3020 and 3200.

EPOB 3530-4. Essentials of Plant Physiology. Examines the mechanisms of plant functioning and how such functioning relates to the performance of the plant under different environmental conditions. Phenomena include water relations, growth and development, and metabolic processes including photosynthesis, respiration, and responses to stress. Prereq., EPOB 1210 and 1220, or MCDB 1060, and CHEM 1071, CHEM 1131, or CHEM 1171.

EPOB 3630-3. Parasitology. Lect. and lab. Surveys animal parasites, including life histories; emphasizes parasites of humans. Prereq., EPOB 1210 and 1220, or MCDB 1060, and CHEM 1071, 1131, or 1171, and instructor consent. This course uses animals and/or animal tissues.

EPOB 3650-4. Embryology. Lect. Lectures emphasize the experimental analysis of embryonic development in animals. Topics covered include gametogenesis, fertilization, cleavage, gastrulation, cytokidifferentiation, morphogenesis, and organogenesis. Students may not receive credit for both EPOB 3650 and MCDB 4650. Prereq., EPOB 1210 and 1220, or MCDB 1060, or coreq., EPOB 3640.

EPOB 3660-2. Developmental Biology Laboratory. Lab for EPOB 3650 and MCDB 4650. Studies of live and prepared embryos from a variety of organisms, including amphibia, chickens, nematodes, and fruit flies. Topics include descriptive and experimental embryology, developmental genetics, and molecular biology methods applied to developing systems. Coreq., EPOB 3650 or MCDB 4650. Same as MCDB 4660. This course uses animals and/or animal tissues.

EPOB 3700-5. Comparative Animal Physiology. Lect., lab. and rec. Introduces principles of animal physiology and responses to environmental challenges. Prereq., EPOB 1210 and 1220, or MCDB 1060 and CHEM 1071, 1131, or 1171, or instructor consent. This course uses animals and/or animal tissues.

EPOB 3720-5. Principles of Comparative Vertebrate Anatomy. Lect. and lab. Introduces
major components of the vertebrate body and how they are organized into a whole organism, emphasizing function, evolution, and diversity of these basic features. Laboratories involve dissection of representative groups and demonstrations. Prereqs.: EPOB 1210 and 1220, or MCDN 1060. This course uses animals and/or animal tissues.

EPOB 3840 (1-6). Independent Study (Junior).

EPOB 3870 (1-6). Independent Research (Junior).

EPOB 3930 (1-6). Internship. Provides an academically supervised opportunity for upper-division students to work in public or private organizations. Projects are usually related to students' career goals. Each project has both academic and work components.

EPOB 4000-3. Teaching of Modern High School Biology. Lect. and lab. The context in which modern biology should be taught to either high school or college and university students. Recommended for biological science education majors. Prereqs.: EPOB 1210 and 1220, or MCDN 1060, and junior standing. Same as EPOB 5000.

EPOB 4010-2. Teaching Biology. Offers students a one-time opportunity to assist in teaching of specific laboratory section in EPOB Biology under direct faculty supervision. Students must make arrangements with the faculty person responsible for the course in which they plan to assist. No student can receive independent study credit through this program.

EPOB 4020-3. Stream Biology. Lect. Geological, physical, chemical, and biological study of flowing water with special reference to streams and rivers as ecosystems. A laboratory course is offered (see EPOB 4150, 4160, 4170 or 5150, 5160, 5170). Prereqs.: EPOB 3020 or instructor consent. Same as EPOB 5020.

EPOB 4030-3. Limnology. Lect. Ecology of inland waters, including a detailed consideration of physical, chemical, and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats, and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including energy flow, trophic structure, eutrophication, and management of freshwater ecosystems. Prereqs.: EPOB 3020 or instructor consent. Same as EPOB 5030.

EPOB 4040-3. Conservation Biology. Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of global biodiversity and natural systems. Resulting theory is then applied to conservation policy and management techniques. Prereqs.: EPOB 3020 and 3320, or instructor consent. Same as EPOB 5040.

EPOB 4045-3. Medical Ecology and Environmental Health. Concerns the ecology, evolution, and environmental relationships of disease. Emphasizes zoonotic infections, i.e., animal diseases transmissible to humans, such as encephalitis and Lyme disease; and environmental factors in chronic diseases. Prereqs.: EPOB 1210, 1220, 1230 and 1240, or instructor consent.

EPOB 4060-2. Biological Seminar. Designed primarily for seniors seeking honors in EPOB biology. Separate sections may be available for other seniors, especially those interested in graduate study. Sample topics include history of biological concepts, impact of biology on modern thought, and biology and the crises of the modern world. Prereqs.: instructor consent.

EPOB 4070-3. Geographical Ecology. Lect. Discussion of ecological and faunistic distribution of animals on a world basis. How number and kinds of species vary from region to region and how we can account for this variation. Patterns of distribution of animals in terms of historical geological, evolutionary, and ecological processes that have caused them. Emphasizes ecological aspects. Prereqs.: EPOB 3020 or instructor consent. Same as EPOB 5070.

EPOB 4080-3. Physiological Plant Adaptation. Lect. Examines adaptive aspects of plant structure and function in natural environments. Some subjects considered are cost-income approach to resource allocation, leaf energy budgets and the adaptive significance of leaf size and shape, environmental and biological control of photosynthesis, and adaptive aspects of plant water relations. (For concurrent laboratory see EPOB 5080.) Prereqs.: EPOB 3020 and either 3560 or 3570. Preproj. Same as EPOB 5080.

EPOB 4100, 4110, 4120, 4130, 4140 (2-4). Advanced Ecology. Specific aspects of ecology, emphasizing specialties of faculty. One or more courses are offered most semesters. Topics may include dynamics of mountain ecosystems, tundra ecology, ethnology, population dynamics, landscape ecology, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. One or more courses may use animals and/or animal tissues. Prereqs.: EPOB 1210 and 1220, or MCDN 1060 and EPOB 3020. Same as EPOB 5100, 5110, 5120, 5130, 5140.

EPOB 4150 (1-2). Techniques in Ecology. Courses emphasize application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geotechnology. Same as EPOB 5150.

EPOB 4165-3. Landscape Ecology. Studies distribution patterns of communities and ecosystems, ecological processes that affect those patterns over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change. Prereqs.: EPOB 1210, 1220, and 3020, or equivalents. Same as EPOB 5165.

EPOB 4170-3. Ecosystem Ecology. Examines the concepts and approaches to studying ecosystem processes, including primary and secondary production, energy flows, and elemental cycles. Attention given to biotic and abiotic controls of biogeochemical cycles and the potential for anthropogenic changes in ecosystem processes. Prereqs.: EPOB 3020. Same as EPOB 5170.

EPOB 4180-3. Ecological Perspectives on Global Change. Discusses evolutionary and recent geological history of modern environmental problems, using natural changes in climate, biotic diversity, drought, desertification, flood, forest destruction, etc., to show students the range and frequency of such events as a perspective on modern reports. Prereqs.: EPOB 3020. Approved for arts and sciences core curriculum: critical thinking.

EPOB 4190-3. Introduction to Neurobiology. Lect. Introduces cellular structure and physiology of neurons, followed by a consideration of integrative mechanisms. Topics include action potential, synaptic transmission, development, sensory systems, motor systems, and the neural basis of behavior. Prereqs.: EPOB 3700 or MCDN 3120, or instructor consent. Same as EPOB 5190.

EPOB 4200-3. Developmental Neurobiology. Lect. Intensive survey of mechanisms involved in development of neurons and neural circuits in both vertebrates and invertebrates. Prereqs.: EPOB 3650 or 4190, or MCDN 3120, or instructor consent. Same as EPOB 5200.

EPOB 4210-3. Arguments in Evolutionary Biology. Uses original literature to study, examine, and evaluate major controversial issues of evolutionary biology. Emphasizes critical evaluation of arguments, evidence, and interpretation of author's advocacy. Students are expected to develop and demonstrate high levels of critical thinking and verbal argumentation. Discussion and debate format. Prereq.: junior standing in biology or instructor consent. Approved for arts and sciences core curriculum: critical thinking.

EPOB 4220-3. Principles of Evolution. Lect. Presents organic evolution, the central idea in modern biology, from an historical perspective and from the standpoint of contemporary research. Stresses modern consensus on grounding neutralism vs. selectionism, homology, phylogenetic patterns, coevolution, and extinctions. Prereqs.: EPOB 3020 and 3200, or equivalent.

EPOB 4240-3. Advanced Topics in Animal Behavior. Lect. Special areas of ethology such as sociobiology, animal communication, human ethology, moral and ethical issues. Prereqs.: EPOB 3240 or instructor consent. Same as EPOB 5240. Approved for arts and sciences core curriculum: critical thinking.

EPOB 4270-3. Population Genetics and Evolution. Lect. Focuses on evolutionary mechanisms influencing levels of genetic variation within populations and the differentiation of populations. Examples are from natural populations, laboratory experiments, and simulation studies. Special topics include overdominance, sexual selection, and mechanisms of speciation. Prereq.: EPOB 3200 or instructor consent. Same as EPOB 5270. Approved for arts and sciences core curriculum: critical thinking.
EPOB 4280 (2-4). Advanced Topics in Evolution. Specialized aspects of organic evolution. Courses offered include origin and dispersal of flowering plants, reproductive biology of flowering plants, evolution, and speciation. Same as EPOB 5280.

EPOB 4300 (2-4). Advanced Genetics. Courses deal with specialized topics in genetics. Prereq., EPOB 3200. Same as EPOB 5300.

EPOB 4320. (1-2). Techniques in Genetics. Courses involve specific procedures and their applications in solving genetic research problems. Same as EPOB 5320.

EPOB 4350 (2-4). Biological Field Studies. Courses stress broad areas of biology and employ field approaches. Prereq., instructor consent. Same as EPOB 5350. This course uses animals and/or animal tissues.

EPOB 4360-3. Microbial Ecology, Lect. and lab. Microbial approaches and solutions to environmental problem areas in which microorganisms play favorable or unfavorable roles: in biodeterioration control in soil, water and waste management, current pollution problems, resource recovery, energy production, ecological control of pests, and biotechnology. Prereq., EPOB 1210 and 1220, or MCDB 1060. Open to nonmajors. Same as EPOB 5360. This course uses animals and/or animal tissues.

EPOB 4380-3. Respiratory Adaptations to the Environment. Investigates the evolutionary development of respiratory gas exchange systems, including the physical properties of gases and their exchange in burrows, water, high altitudes, and space, and models of how respiratory mechanisms have evolved in these environments. Prereq., EPOB 3430 or 3700. Same as EPOB 5380. Approved for arts and sciences core curriculum: critical thinking.

EPOB 4410-4. Biometry. Lect. and lab. Demanding, problem-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques. Prereq., EPOB 1210 and 1220, or MCDB 1060 and MATH 1110, and senior status. Same as EPOB 5410.

EPOB 4430-3. Invertebrate Physiology. Lect. Mechanisms by which invertebrates achieve constancy of their internal milieu. Topics include temperature acclimation, freeze tolerance, bioenergetics, invertebrate symbioses, oxygen delivery, renal function, intracellular osmolytes, nervous and endocrine control and development and growth. Prereq., EPOB 3430 or 3700. Same as EPOB 5430.

EPOB 4440-3. Mammalian Endocrinology. Lect. Introduces mammalian endocrine system. Course provides a thorough analysis and integration of chemical communication by hormones, paracrine, and neurochemicals.

EPOB 4450-3. Biochemical Adaptation to the Environment. Lect. Adaptive adjustments in macromolecules, in their surrounding milieu, and in output of macromolecular systems. Addresses response of these components to temperature, hydrostatic pressure, water stress and oxygen availability. Examples include organisms from polar and seric environments, deep-sea rift zones, reducing sediments, ephemeral pools and streams, and others. Prereq., EPOB 3430 or 3700, CHEM 3311, and 3321. Same as EPOB 5450.

EPOB 4460, 4470 (2-4). Advanced Animal Physiology. Specialized areas of physiology including invertebrate physiology, cell physiology, vertebrate reproduction, and others. Prereq., EPOB 3430 or 3700. Same as EPOB 5460, 5470.

EPOB 4520-3. Plants of Colorado. Lect., lab, and field trips. Systematic survey of Colorado plants including algae, fungi, lichens, mosses, gymnosperms, and flowering plants. Plant collections are required. Prereqs., EPOB 1210 and 1220, or MCDB 1060. Open to nonmajors. Same as EPOB 5520.

EPOB 4550 (2-4). Advanced Botany. Special areas of botany including courses in algaeology, mycology, lichenology, palynology, evolution and ecology of domesticated plants, advanced classification of flowering plants, plant ecology, plants of Colorado, developmental plant anatomy, and Cenozoic paleobotany. Prereqs., EPOB 1210 and 1220, or MCDB 1060. Same as EPOB 5550.

EPOB 4570-3. Advanced Plant Physiology. Critical evaluation of various concepts underlying the functioning of plants, including current controversial topics. Emphasizes the responses of plants to various environmental factors. Prereqs., EPOB 3530 or EPOB 4080, and instructor consent. Same as EPOB 5570. Approved for arts and sciences core curriculum: critical thinking.

EPOB 4580 (2-4). Advanced Topics in Plant Physiology. Studies special areas of plant physiological processes such as growth, development, phorosynthesis, respiration, water relations, etc. Topics vary from year to year. Prereqs., EPOB 3530 or equivalent. Same as EPOB 5580.

EPOB 4590-3. Plants and Human Affairs. Considers plants as living entities and as essential to human survival, as well as to human well-being and the quality of life. Covers medical botany, forensic botany, plant foods, and human ecology. Prereq., EPOB 1210 and 1220; EPOB 3400, 3510, or 3520; and EPOB 3200 or 3700. Approved for arts and sciences core curriculum: critical thinking.

EPOB 4630 (2-6). Field Techniques in Environmental Science. Field and laboratory course in assessing the abiotic and biotic environment. Emphasizes field techniques in climatology, surveying soils, hydrology, geomorphology, plant and animal ecology, and environmental law. Evaluation by written module reports and maps. This course uses animals and/or animal tissues. Instructor consent required. Same as EPOB 5630.

EPOB 4640 (2-4). Plant Field Studies. Field-oriented courses offered at irregular intervals during summer sessions. Examples: field botany, plants of Colorado. Instructor consent required. Same as EPOB 5640.

EPOB 4650-5. Invertebrate Zoology, Lect. and lab. Broad-scope study of the biology of the most diverse group of organisms on earth. Areas include ecology, physiology, evolution, and morphology of aquatic and terrestrial forms. Prereqs., EPOB 1210 and 1220, or MCDB 1060. Same as EPOB 5650. This course uses animals and/or animal tissues.

EPOB 4660-4. Insect Biology, Lect. and lab. Introduces evolution, ecology, physiology, and behavior of insects. Emphasizes review of how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems related to entomology are discussed. Prereqs., EPOB 1210 and 1220, or MCDB 1060. Same as EPOB 5660. This course uses animals and/or animal tissues.

EPOB 4670, 4680 (2-4). Advanced Invertebrate Biology. Courses dealing with specific taxa and/or special aspects of invertebrate biology. Topics offered include insect taxonomy, aquatic invertebrate zoology, biology of social insects, benthic and Aufwuchs ecology. Prereqs., EPOB 1210 and 1220, or MCDB 1060. Same as EPOB 5670, 5680. This course uses animals and/or animal tissues.

EPOB 4750-3. Ornithology, Lect., lab, and field trips. Origin, evolution, ecology, physical and behavioral characteristics, and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Prereq., EPOB 3020 or instructor consent. Same as EPOB 5750. This course uses animals and/or animal tissues.

EPOB 4760-4. Mammalogy, Discussion, lab, and field studies. Origin, evolution and adaptation, geographic distribution; ecology, and taxonomy of mammals; field and laboratory study of Colorado species. Prereq., EPOB 3020 or instructor consent. Same as EPOB 5760. This course uses animals and/or animal tissues.

EPOB 4770 (2-4). Advanced Vertebrate Biology. Special aspects of vertebrate biology such as ichthyology, experimental embryology, biology of freshwater fishes, and vertebrate natural history. Same as EPOB 5770. This course uses animals and/or animal tissues.

EPOB 4840 (1-6). Independent Study (Senior).

EPOB 4870 (1-6). Independent Research (Senior).

EPOB 5000-3. Teaching of Modern High School Biology. Same as EPOB 4000.
EPOB 5030-3. Limnology. Same as EPOB 4030.
EPOB 5080-3. Physiological Plant Adaptation. Same as EPOB 4080.
EPOB 5090-1. Techniques in Plant Ecophysiology. Laboratory course taken concurrently with EPOB 5080. Lab exercises include modern techniques in plant ecophysiology such as infrared gas analysis, pressure chamber analyses, thermocouple psychrometry, and leaf isotopy. Coreq.: EPOB 5080.
EPOB 5100, 5110, 5120, 5130, 5140 (2-4). Advanced Ecology. Same as EPOB 4100, 4110, 4120, 4130, 4140.
EPOB 5150. (1-2). Techniques in Ecology. Same as EPOB 4150.
EPOB 5165-3. Landscape Ecology. Same as EPOB 4165.
EPOB 5170-3. Ecosystem Ecology. Same as EPOB 4170.
EPOB 5180-3. Biophysical Ecology. First half of course examines aspects of solar radiation, thermal radiation, sensible heat transfer through conduction and convection, wind, and latent heat transfer through evaporation. During second half, these concepts are used to discuss biological microenvironments, plant and animal energy budgets, and plant and animal adaptation to microenvironments. Prereq.: EPOB 3020 and PHYS 3020, or instructor consent.
EPOB 5190-3. Introduction to Neurobiology. Same as EPOB 4190.
EPOB 5200-3. Developmental Neurobiology. Same as EPOB 4200.
EPOB 5240-3. Advanced Topics in Animal Behavior. Same as EPOB 4240.
EPOB 5260-4. Evolutionary Ecology of Plants. Same as EPOB 4260.
EPOB 5280 (2-4). Advanced Topics in Evolution. Same as EPOB 4280.
EPOB 5300 (2-4). Advanced Genetics. Same as EPOB 4300.
EPOB 5320. (1-2). Techniques in Genetics. Same as EPOB 4320.
EPOB 5340-3. Evolutionary Morphology of Vertebrates. Same as EPOB 4340.
EPOB 5350 (2-4). Biological Field Studies. Same as EPOB 4350.
EPOB 5360-3. Microbial Biology. Same as EPOB 4360.
EPOB 5380-3. Respiratory Adaptations to the Environment. Same as EPOB 4380.
EPOB 5410-4. Biometry. Same as EPOB 4410.
EPOB 5430-3. Invertebrate Physiology. Same as EPOB 4430.
EPOB 5460, 5470 (2-4). Advanced Animal Physiology. Same as EPOB 4460, 4470.
EPOB 5550 (2-4). Advanced Botany. Same as EPOB 4550.
EPOB 5570-3. Advanced Plant Physiology. Same as EPOB 4570.
EPOB 5580 (2-4). Advanced Topics in Plant Physiology. Same as EPOB 4580.
EPOB 5630 (2-4). Field Techniques in Environmental Science. Same as EPOB 4630.
EPOB 5640 (2-4). Plant Field Studies. Same as EPOB 4640.
EPOB 5650-5. Invertebrate Zoology. Same as EPOB 4650.
EPOB 5660-4. Insect Biology. Same as EPOB 4660.
EPOB 5670, 5680 (2-4). Advanced Invertebrate Biology. Same as EPOB 4670, 4680.
EPOB 5740-3. Biology of Amphibians and Reptiles. Same as EPOB 4740 and PSYC 5740.
EPOB 5750-3. Ornithology. Same as EPOB 4750.
EPOB 5760-3. Mammalogy. Same as EPOB 4760.
EPOB 5770 (2-4). Advanced Vertebrate Biology. Same as EPOB 4770.
EPOB 5830-5. Neuroscience Research Lab. Intensive study of methods and techniques in neuroscience research for advanced graduate students. Methods are drawn from electrophysiology, neurobiology, computer neural modeling, neurochemistry, neuropharmacology, and psychophysics. Faculty and topics vary from term to term. Instructor consent required. Same as MCDB 5800, PSYC 5800, ASBN 5680.
EPOB 5840 (1-6). Independent Study (Graduate). Instructor consent required.
EPOB 6000-2. Seminar: Introduction to Biological Research. In-depth discussions on areas of biological research represented in EPOB biology. Required of all first-year graduate students in EPOB biology.
EPOB 6110 through 6120 (1-3). Seminar in EPOB Biology. Open only to graduate students. Instructor consent required.
EPOB 6200 (1-3). Seminar in Population Biology.
EPOB 6840 (1-6). Independent Research in EPOB Biology. Instructor consent required.
EPOB 6940 (1-6). Master's Degree Candidate—Plan II. Instructor consent required.
EPOB 6950 (1-6). Master's Thesis. Instructor consent required.
EPOB 8990 (1-10). Doctoral Dissertation. Instructor consent required.

Biology—Molecular, Cellular, and Developmental

MCDB 1010-3. Molecular Biology for Non-Scientists. Introduces nonmajors to modern molecular biology. Topics include gene cloning, biotechnology, oncogenes, the human immune system, AIDS virus, cancer, monoclonal antibodies, gene replacement therapy, screening for inherited diseases, and recombinant vaccines. No background in biology is required. Approved for arts and sciences core curriculum: natural science.

MCDB 1030-3. Plagues, People, and Microorganisms. Discusses biology, history, and social impact of human plagues and other major infectious diseases, with emphasis on recent developments in microbiology. Planned topics including bubonic plague, tuberculosis, leprosy, malaria, smallpox, syphilis, polio, AIDS, and the human immune response are each treated in detail. No prior experience in biology is required. Approved for arts and sciences core curriculum: natural science.

MCDB 1050-3. Introduction to Molecular, Cellular, and Developmental Biology 1. For nonmajors and majors. Preparation for upper-division MCDB courses. Function and structure of cells, molecular composition of cells, cell reproduction, cancer, cellular genetics, Mendelian genetics, cell differentiation, cell-cell interactions, origin and evolution of cells. MCDB 1070 must be taken concurrently by majors in biology or biochemistry and by prehealth science students. Approved for arts and sciences core curriculum: natural science.

MCDB 1060-3. Introduction to Molecular, Cellular, and Developmental Biology 2. Continuation of MCDB 1050. Topics include multicellular organisms (their structure, physiology, nutrition, reproduction, and development), communities of organisms, the origin and evolution of life, and topics in ethics of biomedical science. MCDB 1080 must be taken concurrently by majors in biology or biochemistry and by prehealth science students. Prereq.: MCDB 1050. Approved for arts and sciences core curriculum: natural science.

MCDB 1070-1. Introduction to Molecular, Cellular, and Developmental Biology Laboratory. One 2-hour lab per week designed to acquaint students with current research techniques used in molecular biology to analyze gene expression, protein structure, enzyme activity, carcinogenicity of specific compounds, analysis of biochemical pathways and genetics. Course must be taken concurrently with MCDB 1050. Approved for arts and sciences core curriculum: natural science.

MCDB 1080-1. Introduction to Molecular, Cellular, and Developmental Biology Laboratory. Two 2-hour lab per week designed to enrich knowledge of cellular biology and animal physiology by investigating live cells, nerve cell transmission, muscle cell contraction, antibody-antigen reactions, respiration in mice and fish, fertilization and development, and natural selection. Course must be taken concurrently with MCDB 1060. This course uses living vertebrate
animals and/or tissues. Approved for arts and sciences core curriculum: natural science.

MCDB 3120-3. Cell Biology. Introduces modern cell biology. Includes molecular basis of cellular organization and function, cellular membrane systems, intracellular organelles, mechanisms of energy transduction, the cytoskeleton, extracellular matrix, and functional organization of genetic material. Recommended for students planning careers in health sciences. Prereq., MCDB 1060 or EPOB 1220 or instructor consent.

MCDB 3140-2. Cell Biology Laboratory. One 4-hour lab per week. Provides hands-on experience with modern cell biology laboratory techniques. Topics include microscopy, vital staining and cytochemistry, immunocytochemistry, biochemical fractionation, and molecular analyses of cells. This course does not use vertebrate animals. Coreq. MCDB 3120.

MCDB 3150-3. Biology of the Cancer Cell. Kinds of cancer among humans; loss of control of cell reproduction; chemicals, viruses, and radiation as causes of cancer; environmental causes of cancer; cancer and diet; cancer epidemiology; genetic basis of cancer; and prevention of cancer. Prereq., MCDB 1050 or instructor consent. Approved for arts and sciences core curriculum: natural science.

MCDB 3200-3. Histophyiology: The Structure and Function of Vertebrate Organ Systems. Structure and function of the basic types of vertebrate tissues are discussed, as well as how arrangement of these tissues in major organs contributes to their functioning. Recommended for students planning careers in the health sciences. Prereq., MCDB 1060 or EPOB 1220 or instructor consent.

MCDB 3210-1. Histophyiology Laboratory. Students identify and analyze the structure of vertebrate tissues and organs by means of the light microscope. Correlation with electron microscope images is stressed. Optional laboratory to accompany MCDB 3200. Coreq., MCDB 3200.

MCDB 3350-3. Fertility, Sterility, and Early Mammalian Development. Describes the production of germ cells, fertilization, early development of the embryo, methods of contraception, and causes and treatments of sterility. Recommended for students planning careers in the health sciences. Prereq., MCDB 1060 or EPOB 1220 or instructor consent.

MCDB 3351-3. Success and Failure in Human Reproduction. Describes the production of germ cells, fertilization, early development of the human embryo, and hormonal controls of reproduction. Causes and treatments of sterility are discussed. Prereq., MCDB 1060 or EPOB 1220 or NASS 1240. Does not count toward MCDB major. No credit given for both MCDB 3550 and 3551. Approved for arts and sciences core curriculum: natural science.

MCDB 3400-4. Molecular Genetics. Major emphasis on understanding genetic phenomena at the DNA level. Topics range from bacterial and viral genetics through Mendelian and human genetics. Attention given to techniques used for genetic mapping in prokaryotes and eukaryotes, the relationship between chromosomes and genetic maps, RNA and protein synthesis, gene expression, recombinant DNA procedures, transposable elements, and replication, mutation, and repair of DNA. Prereq., CHEM 1151 and MCDB 1060, or instructor consent.

MCDB 4110 (1-3). Special Topics. Presentations of special topics in molecular, and/or cellular, and/or developmental biology, usually given by visiting faculty, alone or in conjunction with MCDB faculty.

MCDB 4140-3. Plant Molecular Biology and Biotechnology. Introduces some of the frontiers in experimental plant research with applications in modern biotechnology, including seed development, hormonal control of growth, photosynthesis and photomorphogenesis, stress responses (heat, water, salt), host-pathogen systems (bacteria, fungi, viruses, viroids), plant defense mechanisms, nitrogen fixation, plant cell tissue culture, and genetic engineering of plants. Prereq., MCDB 3120 and 3400, or instructor consent. Same as MCDB 5140. Approved for arts and sciences core curriculum: critical thinking.

MCDB 4320-3. Eukaryotic Genetics Laboratory. Focuses on laboratory experiments in classical and molecular genetics to elucidate principles of these areas. Students perform research projects with a microbial organism. Prereq., MCDB 3400 or instructor consent.

MCDB 4470-3. Regulation of Gene Expression in Development. Molecular biology of cell differentiation in development with special emphasis on mammalian systems. Part 1 focuses on biological systems, in situ and in cell culture, with discussions on major cell differentiation systems, cell fusion, and hybridoma technology. Part 2 examines molecular mechanisms of gene expression, with discussions on actively pursued systems and coordinate regulations. Prereq., CHEM 4711 and MCDB 3400, or instructor consent. Same as MCDB 5470.

MCDB 4500-4. Workshop in Electron Microscopy. Laboratory course that gives instruction and experience in the preparation of biological specimens and operation of the transmission electron microscope as well as specialized methods of analysis and photographic techniques. This course may use vertebrate animal tissues. Instructor consent required. Same as MCDB 5500, which requires graduate standing and instructor consent.

MCDB 4530-3. Analysis of Biological Sequences. Examines methods for identifying and evaluating similarity between sequences, predicting RNA and protein structures, analyzing and predicting regulatory sites, and building phylogenetic trees. Describes algorithms and uses computer programs. Prereq., MCDB 1050 or instructor consent. Same as MCDB 5530. Approved for arts and sciences core curriculum: critical thinking.

MCDB 4650-3. Developmental Biology. Analysis of development emphasizing cellular, molecular, and genetic mechanisms. Topics covered include descriptive embryology, control of gene expression in eukaryotic cells, mechanisms of differentiation and morphogenesis, and developmental genetics. Prereq. or coreq., MCDB 3120, 3400, or instructor consent; coreq., MCDB 4660.

MCDB 4660-2. Developmental Biology Laboratory. Lab for MCDB 4650. Studies of live and prepared embryos from a variety of organisms, including amphibians, chickens, nematodes, and fruit flies. Topics include descriptive and experimental embryology, developmental genetics, and molecular biology methods applied to developing systems. Coreq., MCDB 4650. This course uses living vertebrate animals and/or tissues. Same as EPOB 3660.

MCDB 4720-3. Membranes. Examines the functional, biosynthetic, and metabolic interrelationships between cellular membranes and organelles. Topics include membrane structure and function, transmembrane signalling, organelle biochemistry, intracellular energy flow, organelle biogenesis and turnover, and cellular evolution. Prereq., MCDB 3120, and CHEM 4711, or instructor consent. Same as MCDB 5720.

MCDB 4750-3. Animal Virology. Encompasses the structure and replication of both lytic and transforming animal viruses. Emphasizes diversity of naturally occurring genomic structures and the resulting strategies of infection as well as the impact of viral epidemics on society. Prereq., MCDB 3400 or instructor consent. Approved for arts and sciences core curriculum: critical thinking.

MCDB 4840 (1-6). Undergraduate Independent Study. Instructor consent required.
MCDB 4850-2. Advanced Topics in Early Mammalian Development. Intensive seminar course focusing on current topics in molecular and cellular biology of early mammalian development. In addition to lectures, course involves student presentations on current research and research literature in early mammalian embryogenesis. Emphasizes discussions of genomic and extragonadal factors that influence and direct development during the pre- and postimplantation period. Prereq. MCDB 9120, MCDB 3350, EPOB 3360, or instructor consent.

MCDB 4900-3. Honors Research. Provides faculty-supervised research for students who have been approved by the departmental honors committee. Normally taken during the semester before completion of the honors thesis. Prereq. MCDB 4900 and GPA of 3.10 or better.

MCDB 4900-3. Honors Thesis. Preparation and defense of an honors thesis based on faculty-supervised research project, including final phases of the research project. Prereq., MCDB 4840 or 4900, GPA of 3.20 or better, and approval by the MCDB honors committee.

Note: Core Courses 1 through 6 meet eight hours per week for 6-8 week segments during fall and spring semesters.

MCDB 5050-2. Core Course 1: Cell Membranes and Bioenergetics. Instructor consent required.

MCDB 5090-2. Core Course 4: Classical Genetics. Must be taken concurrently with MCDB 5120. Instructor consent required.

MCDB 5140-3. Plant Molecular Biology and Biotechnology. Same as MCDB 4140.

MCDB 5470-3. Regulation of Gene Expression in Development. Same as MCDB 4470.

MCDB 5530-3. Analysis of Biological Sequences. Same as MCDB 4530.

MCDB 5720-3. Membranes. Same as MCDB 4720.

MCDB 5780-2. Topics in Plant Cell Biology. Discussions and reports on research advances in biological membranes, particularly photosynthetic membranes; plant cell secretion and assembly of plant cell walls. May be repeated. Instructor consent required.

MCDB 5800-5. Neuroscience Research Lab. Intensive study of methods and techniques in neuroscience for advanced graduate students. Methods drawn from electrophysiology, neuroanatomy, computer modeling, neurochemistry, neurophysiology, and molecular biology. Offered concurrently with the research lab. Please check with departmental office. Faculty and topics vary from term to term. Same as EPOB 5830 and PSYC 5800.

MCDB 6900-3. Introduction to Laboratory Methods. Introduces methodology and techniques used in biological research. Designed as a tutorial for a few students and one faculty member. Students are expected to read original research papers, discuss findings, and plan and execute experiments in selected areas. Open only to MCDB graduate students.

MCDB 6440 (1-3). Special Topics in MCDB Biology. Various topics not normally covered in the curriculum; offered intermittently, often by visiting professors or upon student demand.

MCDB 6940-3. Master's Degree Candidate.

MCDB 6950 (1-6). Master's Thesis. Students seeking a master's degree should consult a departmental advisor. Plan I or Plan II is offered.

MCDB 7050-2. Genetics Seminar. Series of seminars that critically review both current and past research that uses formal genetics as a tool. Each member of the class presents seminars based on work in the literature. Discussion of presented work encouraged. May be repeated twice. Prereq., graduate standing.

MCDB 7790 (1-3). Graduate Seminar.

MCDB 7840 (1-6). Graduate Independent Study. Graduate level. Instructor consent required.

MCDB 7910-2. Seminar Practicum. Designed for graduate students to practice oral presentation of their own research, fielding questions and responding to critique.

MCDB 8990-10. Doctoral Dissemination. All doctoral students must register for not fewer than 50 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissemination credit, refer to the Graduate School portion of this catalog.

Center for Studies of Ethnicity and Race in America (CSERA) — Afro-American Studies

BLST 2201-3. Blacks in Film. Examines images of Afro-Americans, Africans, and Afro-Caribbeans in films. Films are analyzed and critiqued within historical, social, and aesthetic contexts and reveal the extent of the impact these images have exerted on audiences.

BLST 2210-3. Black Social and Political Thought. General introductory course designed to acquaint students with historical and contemporary thinking, writings, and speeches of Black people. Approved for arts and sciences core curricula: cultural and gender diversity, and contemporary societies.

BLST 2400-2. African-American Dance 1. Explores various Caribbean and African dance forms, both traditional and choreographed. Works. Other cultural arts including some rituals, musical accompaniment, singing and chanting, and descriptive background data of a particular dance are studied to accompany and enhance the dance as a total cultural experience. Same as DNCE 2500.

BLST 2410-2. African-American Dance 2. Continuation of BLST 2400, but may be taken separately by permission of instructor. Explores the growth of African-American dance from the roots of African dance. Techniques, movement exploration, and improvisation includes plantation dance, African-American heritage dances, blues, and jazz. Same as DNCE 2510.

BLST 2600-3. Introduction to African Literature. Surveys African literature from its beginnings to the present: the oral tradition, the pioneer writers, market literature, the Negritude movement, and selected contemporary writers like Achebe, Leye, Ngugi, and Sayiko. Examines theoretical questions concerning second-language literatures.

BLST 2722-3. Survey of African-American Literature 1. Chronological study of African-American literature, beginning with the eighteenth century. Covers the Harlem Renaissance, the Depression writers, and writers from the 1940s to the present.

BLST 3000-3. Race, Class, and Gender. Examines the uses of race, sex, and class as instruments of domination in Western society.

BLST 3020-3. Selected Topics in Afro-American Studies. Intensive examination of a particular topic, theme, issue, or problem concerning the Black presence, as chosen by the instructor. Sample offerings could include the Black family institution, the civil rights movement, and Martin Luther King, Jr. May be repeated for up to 6 credit hours on different topics.

BLST 3101-3. Black Politics. Discusses elitism and Black powerlessness; Black interest groups; base, structure, and functions of Black political organizations; goals and political styles of Black politicians; community control; trends (radicalism and separatism vs. accommodation); and future of Black politics in the United States. Same as PSST 3101. Approved for arts and sciences core curriculum: contemporary societies, or cultural and gender diversity.

BLST 3103-3. Blacks in the U.S. Educational System. Examines the history of the education of African Americans from early American history until current times. Covers primary, secondary, and higher education. Topics include education of Blacks before 1800, education of Blacks during the period of American slavery, and factors affecting today's education gains. Also covers current research being conducted in higher education.

BLST 3125-3. Black Religious Life in America. Emphasizes the four principle periods in the growth and expansion of the Black church: African traditional religion to the end of the American Civil War; development stage; traditional stage; and the contemporary period. Same as BLST 3125.

BLST 3203-3. Afro-American Psychology. Describes the philosophy, theories, and research findings associated with the psychology of African Americans. Analyzes issues of identity and personality development of African impacted by Euroamerican system. Prereq., upper-division standing and 6 hours or more of ethnic studies, or instructor consent.

BLST 3840 (1-3). Undergraduate Independent Study.

BLST 4237-3. History of South Africa since 1800. Examines the history of southern Africa, with special emphasis on the history of South Africa. Focuses on the decline of white rule and the region's strategic importance. Same as HIST 4238.

BLST 4510-3. Research Practicum in Afro-American Studies. Research apprenticeship with emphasis on skill development. Students execute in library, field, or laboratory the research design developed in BLST 4500.

BLST 4650-3. Contemporary Issues in Afro-American Studies. Variable topic that allows intensive coverage of a subject, theme, or issue in Afro-American studies. May be repeated for up to 6 credit hours on different topics.

BLST 4670-3. The Sixties: Critical Black Views. Reviews the ideas, events, persons, and organizations oriented to the quest for Black social justice in the decade of the Sixties. Approved for arts and sciences core curriculum: critical thinking.

BLST 4692-3. Contemporary African-American Literature 1. Advanced study of works of prominent African-American novelists and poets of the traditional school, e.g., Wright, Gaines, Ellison, and Morrison. Works are studied in terms of their literary, intellectual, and political values. Same as ENGL 4692.

BLST 4702-3. Contemporary African-American Literature 2. Nontraditional and experiential examination of the literature of the Black arts movement of the 1960s and 1970s. Students examine the works of such authors as Amiri Baraka (LeRoi Jones), Don L. Lee, William Melvin Kelly, and Ishmael Reed.

BLST 4710-3. The Black Female: A Feminist Analysis. Offers a Black feminist framework for the analysis of the experiences of Black women with racism and sexism in select historical and contemporary contexts. Issues addressed include self-esteem, socialization patterns, interpersonal relationships, and mental health. Prereq., junior or senior standing plus two of the following: BLST 2030, 3000; WMST 2700, 4700. Same as WMST 4710.

BLST 4800-3. The African Novel. In addition to a detailed study of works by distinguished African novelists, examines such areas as indigenous and foreign antecedents of African fiction and possibilities of the novel as a reflector of changing modes and attitudes.

BLST 4840 (1-3). Independent Study. Arranged with instructor consent.

BLST 4950-3. Senior Seminar. Independent project summarizing the work done in Afro-American studies. A public presentation of the work executed is a requirement.

**CSERA—American Indian Studies**

AILST 1023-3. History of American Indian Tribal Governments. Designed for the Tribal Resource Institute in Business, Engineering, and Science. Introduces students to the history and the continuing development of American Indian tribal governments. Examines several early pre-invasion tribal governments to study their function, sources of power, and governing structure; explores the changes that took place in the tribal governments during the early contact years; examines the Indian Reorganization Act and subsequent legislation; and reviews the status of contemporary tribal governments.

AILST 2000-3. Introduction to American Indian Studies: Precontact Native America. Explores the attainments of various American Indian civilizations in the period immediately prior to first contact with Europeans. Examines agriculture, architecture, governance, and social organization, medicine, mathematics, and population. Approved for the arts and sciences core curriculum: cultural and gender diversity.

AILST 2201-3. American Indians in Film. Examines images of American Indians in films. Films are analyzed and critiqued within historical, social, and artistic contexts, and examined in terms of the impact their images have exerted upon audiences.

AILST 2203-3. American Indian Women's Experiences. Examines the role of American Indian women in North America, in their tribal and urban communities, and non-Indian society by learning about the social spheres of their bicultural and even tricultural lifestyles and experiences. Presents cultural experience from both a traditional and contemporary perspective in the context of their shared "third world" struggle with other indigenous women throughout the Americas.

AILST 3010-3. Marxism and Native Americans. Contrasts and compares the major tenets of Marxist philosophy with those prevailing in the philosophies of traditional American Indian societies. Conclusions are reached regarding the applicability of Marxist principle within a self-determining Native American future. Prereq., SOCY 1001, PSST 1101, or instructor consent.

AILST 3400-3. Indian/Government Conflicts. Deals with historical events involving conflicts between the U.S. government and American Indians. Examples include the role of the FBI in the Pine Ridge Sioux Reservation (1972-76) or the 1864 massacre of the Cheyenne and Arapaho Indians in Colorado territory. Additional courses may relate to tribal governments. May not be repeated for credit.

AIST 4627-3. The Indian in American History: The Western Region. Same as HIST 4627. Approved for arts and sciences core curriculum: cultural and gender diversity.

CSERA—Asian-American Studies

AAST 1015-3. Introduction to Asian-American Studies. Examines the various factors that define minority groups and their positions in American society using Asian Americans as a case study. Emphasizes the perspectives and methodologies of the discipline of ethnic studies. Approved for arts and sciences core curriculum: contemporary societies, or cultural and gender diversity.

AAST 2717-3. Asian-American History. Introductory-level survey of social history of Asians in America from nineteenth century to the present. Focuses on delineating and explaining changes that Asian Americans, one of the most visible ethnic groups in our society, have undergone since their arrival in the United States. Same as HIST 2717. Approved for arts and sciences core curriculum: United States context.

AAST 3013-3. Asian/Pacific American Communities. Covers the concepts, methods, and theories commonly used in community research, as well as substantive information on selected Asian/Pacific American communities. Emphasizes the ethical/political dimensions of community studies. Approved for arts and sciences core curriculum: United States context, or contemporary societies.

AAST 3420-3. Selected Topics in Asian-American Studies. Intensive examination of a topic or issue affecting Asian Americans, such as the Japanese-American internment during World War II, or Asian-American social movements or community organizations. May be repeated for up to 6 credit hours on different topics.

AAST 3840 (1-3). Undergraduate Independent Study. Independent study course work is available. Please consult the CSERA office for further information.

AAST 4717-3. Chinese-American History. Examines Chinese-American history from 1848 to the present day within the context of socioeconomic and political developments in China and the United States. Covers the Chinese diaspora, immigration to the United States, participation in the economy, the exclusion movement, community development, women and family. Same as HIST 4717. Approved for arts and sciences core curriculum: cultural and gender diversity.

CSERA—Chicano Studies

Culture
CHST 4000-3. Hispanic and Native American Culture of the Southwest. Lecture course on Mexican-American culture. Includes guest presentations by experts in such fields as geography, anthropology, history, fine arts, comparative literature, political science, and sociology. Same as SPAN 4000.

Arts and Humanities
CHST 1031-3. Chicano Fine Arts and Humanities. Provides foundation for study of Chicano literature, music, the plastic arts, theatre, and film. Also introduces aesthetic and critical concepts and their applications in Chicano studies. Approved for arts and sciences core curriculum: cultural and gender diversity.

CHST 4351-3. The Mexican Revolution. Studied through a multiperspective approach (films, literature, photographs, historical documents, and chronicles) that allows the student to conceptualize a complex event that changed the history and future of Mexico and the United States. Prereq.: CHST 1031 or 1044.

CHST 4681-3. Special Topics. Examines a particular topic, theme, issue, or problem concerning Chicano studies. May be repeated for up to 6 credit hours on different topics.

Politics and Society

CHST 1273-3. The Contemporary Mexican American. Gives special attention to family life cycle, migration, economic change, discrimination (race and sex), and political status in Mexican-American life.

CHST 2213-3. Barrio Issues. Surveys a range of public issues relating to Mexican Americans in contemporary society. Describes and analyzes such topics as education, discrimination, health care, housing, and employment.

CHST 3013-3. Field Experience. Acquaints students with major ethnographic studies in ethnic communities and teaches such qualitative methods as participant observation and depth interviews. Students required to do a field study. Prereq.: CHST 1015 or 1273.

CHST 3023-3. Sociology of the Chicano and Mexican Americans. Surveys sociological studies of Chicanos and theories used to understand and explain their status. Covers population growth, socioeconomic status, reverse discrimination, Chicana Feminism, and U.S.-Mexico relations. Same as SOCY 3022.

CHST 3153-3. Folklore, Mysticism, and Myth of the Hispanic Southwest. Concerned with the indigenous and Christian syncretic beliefs that underlie the many folkloric expressions of mysticism in the Hispanic Southwest. Focuses on traditional myths, storytelling, and the practice of curanderismo and shamanism. Approved for arts and sciences core curriculum: cultural and gender diversity.

CHST 4133-3. Latinos and the U.S. Political System. Analyzes the social, cultural, and economic factors that affect political behavior of Mexican Americans. Pays special attention to Mexican-American cultural heritage and to relationships between Mexican Americans and Anglo Americans. Prereq.: PSCI 1101. Same as PSCI 4131. Approved for arts and sciences core curriculum: cultural and gender diversity.

CHST 4303-3. The Chicano and the United States Social Systems. Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity. Prereq.: one of the following: CHST 1015, 1273, 2537, or 2213.

Literature
CHST 1044-3. Introduction to Chicano Literature. Examines contemporary Mexican-American literature from its early period with political protest to its present expression of a variety of subjects, themes, and styles.

CHST 3814-3. Chicano Poetry. Examines indigenous pre-Columbian roots and later Mexican influences, and contemporary Chicano poetry. Recommended prereq.: CHST 1031 or 1044.

CHST 3824-3. Chicano Prose Fiction. Covers the most important Chicano writers of prose fiction of the past three decades. Considers progression of Chicano fiction from naturalism, realism, and romanticism to post-modernism. Recommended prereq.: CHST 1031 or 1044.

Interdisciplinary
CHST 1015-3. Introduction to Chicano Studies. Introduces basic vocabulary, concepts, and topics relating to the study of the Mexican-American experience. Examines how social science theory and methodology produce stereotypes. Approved for arts and sciences core curriculum: cultural and gender diversity.

CHST 3905 (1-3). Independent Study. Instructor consent required.

CHST 4015-3. Field Experience in Sociology. Emphasizes ethnographic techniques including intensive interviewing, direct observation, coding participant observation, interpreting data, theory construction, and report writing. Students conceive and execute a field research project with
data collection and analysis, then design and execute a project and prepare a research paper on the basis of the collected data. Same as SOCY 4011.

CHST 4905 (1-3). Independent Study. Instructor consent required.

History

CHST 2557-3. Chicano History. Introduces historical developments of Chicano society and thought from pre-Columbian period to present. Same as HIST 2537. Approved for arts and sciences core curriculum: United States contexts.

CHST 4607-3. History of the Chicano in the American Labor Movement. Presents historical and topical analysis of the American labor movement, particularly its ethnic, sexual, racial, and skill divisions. Analyzes historical development of the American working class, specifically its culture, ideology, ethnicity, and union involvement with focus on Chicano.

Chemistry and Biochemistry

CHEM 1001-3. Preparatory Chemistry. Lect. and rec. For students with no high school chemistry, prepares students for entrance to CHEM 1111. Students whose academic plans require CHEM 1051-1071 should not take this course. CHEM 1001 does not count toward fulfillment of the natural science requirement. No credit is allowed for CHEM 1001 if students already have credit for any other college-level chemistry course. Prereq., one year of high school algebra or concurrent enrollment in math modules MATH 1000, 1010, and 1020.

CHEM 1011-3. Environmental Chemistry I. Lect. Introduces basic principles of chemistry with applications to current environmental issues including toxic chemicals, air and water pollution, energy sources and their environmental impact, and climate change resulting from the greenhouse effect. No credit given for CHEM 1011 if students already have credit in any chemistry course numbered 1051 or higher. Approved for arts and sciences core curriculum: natural science.

CHEM 1021-4. Introductory Chemistry. Lect., rec., and lab. Same as CHEM 1001 but with the addition of a lab. Course remedies a natural science deficiency in the MAPS entrance requirement and prepares students to enter CHEM 1111. No credit given for CHEM 1021 if students already have credit for any other college-level chemistry course. Prereq., one year of high school algebra or concurrent enrollment in math modules MATH 1000, 1010, and 1020.

CHEM 1031-4. Environmental Chemistry II. Lect., rec., and lab. Applications of chemical principles to current environmental issues including acid rain, stratospheric ozone depletion, the Antarctic ozone hole, solar energy conversion and fuel cells, and the environmental consequences of nuclear war. Laboratory experience is included. No credit given for CHEM 1031 if students already have credit in any college-level chemistry course numbered 1071 or higher. Prereq., CHEM 1011. Approved for arts and sciences core curriculum: natural science.

CHEM 1051-4. Introduction to Chemistry. Lect., rec., and lab. First course in principles of chemistry. CHEM 1051-1071 meets the chemistry requirement for nursing and physical therapy. Prereq., one year of high school algebra or math modules MATH 1000, 1010, and 1020. Approved for arts and sciences core curriculum: natural science.

CHEM 1071-4. Introduction to Organic and Biochemistry. Lect., rec., and lab. Essential topics in organic and biochemistry. CHEM 1051-1071 or 1111-1171 completes the chemistry requirement for nursing, physical therapy, and kinesiology students. Prereq., CHEM 1051, 1111, or 1151. CHEM 1071 does not replace CHEM 1131 or 1171 at a prereq. for CHEM 3311 or 3351. Approved for arts and sciences core curriculum: natural science.

CHEM 1111-5. General Chemistry I. Lect., rec., and lab. Introductory college-level chemistry course for students taken high school chemistry and whose academic plans require advanced work in chemistry or who wish to satisfy the natural science requirement at a more advanced level than CHEM 1051-1071. Prereq., one year of high school chemistry or satisfactory performance in CHEM 1001; or 1021; high school algebra. Not recommended for students with grades below B- in CHEM 1001 or 1021. Not open to students in the College of Engineering and Applied Science except by special arrangement. Students may not receive credit for CHEM 1111 and CHEM 1211. Approved for arts and sciences core curriculum: natural science.

CHEM 1131-5. General Chemistry II. Lect., rec., and lab. Continuation of CHEM 1111. For students who intend to take advanced chemistry courses. Subject areas include acids and bases, solubility and complex ion equilibria, transition metal chemistry, chemical kinetics, electrochemistry, and nuclear chemistry. Prereq., CHEM 1111 or equivalent, with a grade of C or higher. Approved for arts and sciences core curriculum: natural science.

CHEM 1151-6. Honors General Chemistry I. Lect., rec., and lab. Principles of chemistry and their applications are covered in a comprehensive manner (honors level) in this low-enrollment freshman course. Lectures include topics not covered in CHEM 1111-1131. The laboratory experience is more extensive; therefore, the CHEM 1151-1171 sequence is highly recommended for well-prepared students who intend to major in chemistry, chemical engineering, physics, molecular biology, or related areas. Prereq., one year of high school chemistry, four years of high school math and/or a high score on the SAT or ACT mathematics examination, and one year of high school physics. Approved for arts and sciences core curriculum: natural science.

CHEM 1171-6. Honors General Chemistry II. Lect., rec., and lab. Continuation of CHEM 1151. Prereq., CHEM 1151 with grade of C or higher. Approved for arts and sciences core curriculum: natural science.

CHEM 1211-3. General Chemistry for Engineers. Lect. A one-semester course designed to meet the general chemistry requirement for engineering students. Topics include stoichiometry, thermodynamics, gases, liquids, and solids; equilibrium; acids and bases; bonding concepts; kinetics; reactions; and materials science. Examples and problems illustrate the application of chemistry to engineering disciplines. Prereq., enrollment in the College of Engineering and Applied Science; one year of high school chemistry or satisfactory performance in CHEM 1001 or 1021; and high school algebra. Not recommended for students with grades below B- in CHEM 1001 or 1021. Students may not receive credit for CHEM 1211 and CHEM 1111. Coreq., CHEM 1221.

CHEM 3311-3. Organic Chemistry I. Lect. For nonchemistry majors. Topics include structure and reactions of alkanes, alkenes, aldehydes, and alcohols, and aromatic compounds; nomenclature of organic compounds; stereochemistry; reaction mechanisms and dynamics. Prereq., CHEM 1131, 1171, or equivalent with a grade of C or higher; coreq., CHEM 3321 or 3361.

CHEM 3321-1. Laboratory in Organic Chemistry I. Lab. For biochemistry and nonchemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alcohols, amines, and aromatic compounds. Stereochemical modeling and the identification of organic unknowns by spectroscopic and chemical methods are also introduced. Prereq., CHEM 1311 or 1171 or equivalent with a grade of C or better; coreq., CHEM 3311 or 3351.

CHEM 3331-3. Organic Chemistry II. Lect. For nonchemistry majors. Topics include structure and reactions of aldehydes, ketones, and amides; introduction to the chemistry of heterocyclic compounds; and aromatic chemistry. Stereochemical modeling and the identification of organic unknowns by spectroscopic and chemical methods are also introduced. Prereq., CHEM 3311 or 3351 and CHEM 3321 or 3361 with grades of C or higher; prereq., or coreq., CHEM 3341 or 3381.

CHEM 3341-1. Laboratory in Organic Chemistry II. Lab. For biochemistry and nonchemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alcohols, amines, and aromatic compounds. Stereochemical modeling and the identification of organic unknowns by spectroscopic and chemical methods are also introduced. Prereq., CHEM 3321 or 3361 with grade of C or higher; coreq., CHEM 3331 or 3371.

CHEM 3351-3. Organic Chemistry I for Chemistry and Biochemistry Majors. Lect. Topics include structure and reactions of alkanes, alkenes, alcohols, ethers, aldehydes, ketones, and alkylation; nomenclature of organic compounds; stereochemistry; reaction mechanisms. Prereq., CHEM 1131 or 1171 with a grade of C or higher; coreq., CHEM 3361 or 3352.

CHEM 3360-2. Laboratory in Organic Chemistry I for Chemistry Majors. Required course for chemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, alcohols, ketones, and alkylation; nomenclature of organic compounds; stereochemistry; reaction mechanisms. Prereq., CHEM 1131 or 1171 or equivalent with a grade of C or higher; coreq., CHEM 3351 or 3311.
CHEM 3371-3. Organic Chemistry 2 for Chemistry and Biochemistry Majors. Lect. Recommended for biochemistry students. Topics include structure and reactions of carboxylic acids and derivatives, aromatic compounds, and amines; introduction to the chemistry of heterocycles, carbohydrates, and amino acids; nomenclature of organic compounds; reaction mechanisms. Prereq., CHEM 3301 or 3311 and CHEM 3361 or 3321 with grades of C- or higher; prereq. or coreq., CHEM 3381 or 3341.

CHEM 3381-2. Laboratory in Organic Chemistry 2 for Chemistry Majors. Lab. Required course for chemistry majors. Instruction in experimental techniques of modern organic chemistry, emphasizing reactions involving alcohols, ketones, carboxylic acids, aromatic compounds, and their derivatives. Multistep syntheses are also introduced. Prereq., CHEM 3361 or 3321 and 3341 with grades of C- or higher; prereq. or coreq., CHEM 3371 or 3331.

CHEM 4011-3. Modern Inorganic Chemistry. Lect. Introduces modern inorganic chemistry for undergraduates. Includes atomic structure, chemical periodicity, structure and bonding in molecules and crystals, reaction mechanisms, chemistry of selected main group and transition elements, and emphasis on catalysis, materials, bioinorganic, and organometallic systems. Prereq., CHEM 4411 or 4511.

CHEM 4181-4. Instrumental Analysis. Lect. and lab. Theory and practice of instrumental methods of chemical analysis covered, including atomic and molecular spectroscopy, gas and liquid chromatography, mass spectrometry, and electrochemistry. Lab provides an opportunity for hands-on experience with common analytical methods. Prereq., CHEM 4411 or 4511. Approved for arts and sciences core curriculum: critical thinking.

CHEM 4191-3. Chemistry and Biochemistry of the Biosphere. Lect. Specific topics include soil and water chemistry, environmental fate of chemicals, biochemical toxicology, use of pesticides in agriculture, heavy metals in the environment, acid mine drainage, plastics, and remediation. Prereq., CHEM 3331 or CHEM 3371, or instructor consent. Chemistry or organic chemistry strongly recommended.

CHEM 4411-3. Physical Chemistry with Biochemistry Applications 1. Lect. Introduces thermodynamics and kinetics, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibria, solution chemistry, transport properties, multiple site binding phenomena, and the rates of chemical and biochemical reactions. Alternative to CHEM 4511. Designed for biochemistry and biology majors. Students may not take both CHEM 4411 and 4511. Prereq., CHEM 3331 or 3351, MATH 2400 or APPM 2500, and PHYS 1110 or 2010. Prereq. or coreq., PHYS 1120 or 2020, or instructor consent. Same as CHEM 5411.

CHEM 4431-3. Physical Chemistry with Biochemistry Applications 2. Lect. Principles of physical chemistry (second semester) for students in the biological sciences. Topics include quantum mechanics, chemical bonds, principles of spectroscopy, statistical mechanics, and transport processes with application to biological systems. Mathematical background (integral and differential calculus including partial differentiation) required. Prereq., CHEM 4411 or 4511 or equivalent, MATH 2400, and one year of physics. Same as 5431.

CHEM 4511-3. Physical Chemistry 1. Lect. Chemical thermodynamics and kinetics. Includes study of laws of thermodynamics, thermodynamical, entropy, free energy, chemical potential, chemical equilibria, and the rates and mechanisms of chemical reactions. Prereq., CHEM 3311 or 3351, MATH 2400 or APPM 2500, and PHYS 1110. Prereq. or coreq., PHYS 1120 or instructor consent.

CHEM 4531-3. Physical Chemistry 2. Lect. Introduces the quantum theory of atoms, molecules and chemical bonding, and statistical thermodynamics. Includes principles of quantum mechanics and their application to atomic structure, molecular spectroscopy, symmetry properties, and the determination of molecular structure. Also includes principles of statistical mechanics and their applications to properties of gases, liquids, and solids. Prereq., CHEM 4511 or 4511.

CHEM 4541-2. Physical Chemistry Laboratory. One and one 3-hour lab per week. Instruction in experimental techniques of modern physical chemistry emphasizing experiments illustrating fundamental principles of chemical thermodynamics, quantum chemistry, statistical mechanics, and chemical kinetics. Prereq., CHEM 4411 or 4511 or equivalent course in thermodynamics. Not open to chemistry majors.

CHEM 4551-3. Advanced Physical Chemistry. Lect. Selected topics in advanced physical chemistry intended for students planning to go to graduate school in chemistry or to work in the physical chemistry area. Covers topics such as molecular spectroscopy, quantum chemical calculations, and condensed phase and surface chemistry. Prereq., CHEM 4431 or 4531.

CHEM 4561-3. Experimental Physical Chemistry. One lect. and two 3-hour labs per week. Instruction in experimental techniques of modern physical chemistry, emphasizing experiments illustrating fundamental principles of chemical thermodynamics, quantum chemistry, statistical mechanics, and chemical kinetics. For chemistry majors. Prereq., CHEM 4411 or 4511 or equivalent course in thermodynamics. Prereq. or coreq., CHEM 4431 or 4531.

CHEM 4711-3. General Biochemistry 1. Lect. Topics include structure, conformation, and properties of proteins; enzymes; mechanisms and kinetics; intermediates; Krebs cycle, carbohydrates; energetic and metabolic control; electron transport and oxidative phosphorylation. Prereq., one year of organic chemistry.

CHEM 4731-3. General Biochemistry 2. Lect. Continuation of CHEM 4711. Metabolism of lipids, amino acids, and nucleic acids; photosynthesis; biosynthesis and function of macromolecules including DNA, RNA, and proteins; biochemistry of subcellular systems; and special topics. Prereq., CHEM 4711.

CHEM 4761-4. Biochemistry Laboratory. Two 5-hour periods per week. The first hour of each period is lecture; the remainder is laboratory. Introduces modern biochemical techniques. Topics include enzymology, spectrophotometry, electrophoresis, affinity chromatography, radioisotopes, recombinant DNA, and molecular cloning. Prereq., CHEM 4711; CHEM 4731 or MCDB 3400 recommended. Approved for arts and sciences core curriculum: critical thinking.

CHEM 4901 (1-6). Independent Study in Chemistry and Biochemistry. For undergraduate study. May be repeated, but no more than a total of 8 credit hours will be applied toward graduation. Prereq., instructor consent.

CHEM 5011-3. Advanced Inorganic Chemistry 1. Lect. Inorganic chemistry based on principles of bonding, structure, reaction mechanisms, and modern synthetic methods. Chemistry and general properties of representative and transition elements and their compounds. Prereq., graduate standing or instructor consent.

CHEM 5061-3. Advanced Inorganic Chemistry 2. Lect. Studies modern coordination chemistry. Includes a description of bonding and properties of coordination compounds in terms of the ligand field and molecular orbital theories. Prereq., graduate standing or instructor consent.

CHEM 5161-3. Analytical Spectroscopy. Lect. Special topics in spectrochemical analysis, including atomic and molecular spectroscopy, laser analytical methods, electron spectroscopy, surface analytical methods, and their applications to environmental, atmospheric, and bioanalytical problems. Prereq., graduate standing or instructor consent.

CHEM 5171-3. Electroanalytical Chemistry. Lect. Establishes a background for understanding electrochemical systems through a review of the relevant thermodynamic, kinetic, and electronic principles. Compares classical and modern electrochemical methods of analysis. Several special topics are discussed in depth. Prereq., graduate standing or instructor consent.

one year of organic chemistry and one year of physical chemistry.

CHEM 5391 (2-3). Advanced Spectroscopic Techniques in Organic Chemistry. Advanced spectroscopic techniques for structure and determination in organic chemistry. Emphasizes proton and carbon-13 NMR spectroscopy. Prerequisite: one year of organic chemistry and one year of physical chemistry.

CHEM 5411-3. Physical Chemistry with Biochemistry Applications 1. Lect. Introduces thermodynamics and kinetics, emphasizing molecular and biochemical applications. Intended for biology graduate students. Not open to students in chemistry or other physical sciences. Prerequisite, graduate standing. Same as CHEM 4411.

CHEM 5431-3. Physical Chemistry with Biochemistry Applications 2. Lect. Principles of physical chemistry (second semester) for graduate students in biology. Not open to students of chemistry or the physical sciences. Prerequisite, graduate standing and CHEM 5411, or instructor consent. Same as CHEM 4431.

CHEM 5511-3. Survey of Thermodynamics and Statistical Mechanics. Lect. Surveys basic laws of phenomenological equilibrium thermodynamics and their applications to problems in chemistry. Outline of concepts of statistical mechanics with special emphasis on the properties of perfect gases, crystals, and liquid models. Prerequisite, undergraduate physical chemistry and graduate standing, or instructor consent.

CHEM 5521-3. Survey of Chemical Kinetics and Quantum Mechanics. Lect. Introduces chemical kinetics, including phenomenological discussion of rate laws, outline of theories of rate constants, and survey of experimental techniques. Introduces quantum mechanics with applications to problems in chemistry. Prerequisite, undergraduate physical chemistry and graduate standing or instructor consent.

CHEM 5541-3. Chemical Dynamics. Lect. Discussion of mechanism and rate of chemical reactions from a fundamental point of view. Discussion of nature of collision and development of concepts of cross section and rate constant. Theory of elementary bimolecular and decay processes are critically examined. Prerequisite, undergraduate physical chemistry and graduate standing, or instructor consent.

CHEM 5551-3. Mathematical Methods of Chemistry. Lect. Develops and applies a variety of mathematical techniques important in physical chemistry. Topics include complex analysis, ordinary and partial differential equations, integral transforms, and some numerical analysis. Prerequisite, undergraduate physical chemistry and graduate standing, or instructor consent.

CHEM 5561-3. Physical Chemistry of Macromolecules. Lect. Structure and conformation of macromolecules; interaction between macromolecules; binding and cooperative phenomena; transport in solution; light scattering; spectroscopic probes of structure and motion. Prerequisite, one semester of physical chemistry and graduate standing, or instructor consent.

CHEM 5581-3. Introductory Quantum Chemistry. Lect. Basic principles and techniques of quantum mechanics with applications to questions of chemical interest. Quantum dynamics of atoms, molecules, and spin; electronic structure of atoms and molecules. Prerequisite, graduate standing or instructor consent.

CHEM 5591-3. Advanced Molecular Spectroscopy. Lect. Rotational, vibrational, and electronic spectra of molecules, and their interpretation in terms of the quantum theory of molecular structure. Prerequisite, graduate standing or instructor consent.

CHEM 5711-3. General Biochemistry 1. Lect. Same lecture as CHEM 4711. Course work includes library studies and preparation of special reports. Not open to undergraduates. Prerequisite, one year of organic chemistry and graduate standing.

CHEM 5771-5. Advanced General Biochemistry 1. Lect. In-depth analysis of DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, protein structure, protein dynamics, and physical chemistry of macromolecules. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Prerequisite, CHEM 4751 or equivalent, and graduate standing, or instructor consent.

CHEM 5781-5. Advanced General Biochemistry 2. Lect. Detailed consideration of contemporary topics in biochemistry, including protein structure (primary, secondary, tertiary, and quaternary), methods of structure determination and prediction, protein folding (kinetics, thermodynamics, denaturation, and renaturation), and protein dynamics (internal motions and methods of analysis). Prerequisite, CHEM 5771 and graduate standing, or instructor consent.

CHEM 6011-3. Reactions in Solution, Equilibrium and Kinetics. Prerequisite, graduate standing or instructor consent.

CHEM 6021 (1-3). Special Topics in Inorganic Chemistry. Lect. Subjects of current interest in inorganic chemistry. Primarily used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule. Prerequisite, graduate standing or instructor consent.

CHEM 6101-1. Seminar: Analytical Chemistry. Students, faculty, and guest presentations and discussions of current research in analytical chemistry. Required of all analytical chemistry graduate students. Credit deferred until presentation of satisfactory seminar. Prerequisite, graduate standing or instructor consent.

CHEM 6111-1-3. Special Topics in Analytical Chemistry. Lect. Subjects of current interest in analytical chemistry. Used for graduate-level presentation of special topics by visiting and resident faculty. Variable class schedule. Prerequisites, graduate standing or instructor consent.
CHEM 6901 (1-6). Special Topics in Chemistry. May be repeated, no limit on total credit. Prereq., graduate standing and instructor consent.

CHEM 6941-3. Master's Candidate.

CHEM 6951 (4-6). Master's Thesis.

CHEM 7012-1. Seminar: Synthetic Chemistry of Nonmetal Compounds. Informal talks and discussion of current research in areas of synthetic and structural nonmetal inorganic chemistry. Prereq., graduate standing and instructor consent.

CHEM 7031-2. Seminar: Synthetic Chemistry of Transition Metal Compounds. Involves study of organometallic and coordination compounds with special emphasis on methods of synthesis, characterization techniques, and reactivity studies. Students present papers toward the synthesis and mechanistic understanding of homogeneous catalysis. Prereq., graduate standing and instructor consent.

CHEM 7051-1. Chemistry of Materials. Seminar in inorganic chemistry concerned with advanced materials design, synthesis, and study. Includes reviews in current research areas such as superconductivity in copper oxides and bucky balls. Prereq., graduate standing or instructor consent.

CHEM 7101-2. Seminar: Chromatography and Trace Analysis. Student and faculty discussions and reports on research advances in chromatography, trace analysis, and environmental chemistry. Prereq., graduate standing and instructor consent.

CHEM 7111-2. Electrochemistry Seminar. Student and faculty discussions and reports on research advances in electrochemistry. Prereq., graduate standing and instructor consent.

CHEM 7121-2. Analytical Spectroscopy and Kinetic Measurements Seminar. Student and faculty discussions and reports on research advances in analytical spectroscopy and reaction rate measurements. Prereq., graduate standing and instructor consent.

CHEM 7141-1. Spectroscopy at Diode Laser Interfaces. Focuses on current research results and relevant literature in the areas of Raman spectroscopy, interfacial reactions/interactions, fluorescence spectroscopy, and photoacoustic spectroscopy. Prereq., graduate standing or instructor consent.

CHEM 7151-1. Bioorganic and Environmental Chemistry. Seminar. Discusses particularly the mechanism of enzymes involved in microbial degradation of pollutants. Prereq., graduate standing or instructor consent.

CHEM 7161-1. Heterogeneous Atmospheric Chemistry. Topics in atmospheric chemistry. Emphasizes the structure and reactivity of atmospheric particulates. Presentations on current research and critical evaluations of recent literature. Prereq., graduate standing or instructor consent.

CHEM 7221-1. Seminar: Photochemistry and Free Radical Chemistry. Current research in areas of organic free radical chemistry. photochemistry, and related topics are presented and discussed. Prereq., graduate standing and instructor consent.

CHEM 7231-1. Seminar: Reactive Intermediates. Application of contemporary ideas of chemical physics to organic molecules. Special attention to structures and bonding in organic ions and radicals. Prereq., organic and physical chemistry, graduate standing, and instructor consent.

CHEM 7261-1. Seminar: Organometallic Chemistry. Specializes in aspects of synthesis of organometallic reagents and their utility in organic synthesis. Emphasizes current research results being obtained both at the University of Colorado and from other research groups. Prereq., graduate standing and instructor consent.

CHEM 7271-1. Seminar: Picosccond Dynamics of Reactions. Topics include development and application of picosecond laser spectroscopy to organic and organometallic reactions. Emphasizes relationship between current theoretical developments and experiments. Prereq., graduate standing and instructor consent.

CHEM 7291-1. Seminar: Physical Organic Chemistry. Modern experimental techniques and theoretical models in physical organic chemistry are discussed in relation to the development of new materials, such as molecular size "mimetics." Development of novel photochemical systems and their spectroscopic properties. Prereq., graduate standing and instructor consent.

CHEM 7421-2. Seminar: Negative Ion Chemistry. Chemistry of negative ions; experimental methods and designs; laser spectroscopy of ions; theoretical methods; reactive dynamics of ions in the gas phase. Prereq., graduate standing.

CHEM 7431-1. Seminar: Topics in Theoretical Chemical Physics. Seminar on a variety of topics in theoretical chemical physics. Molecular collisions and unimolecular dynamics predominantly featured. Prereq., graduate standing and instructor consent.

CHEM 7451-2. Seminar: Reaction Dynamics. Studies experimental and theoretical modern reaction dynamics, energy transfer, and photochemistry; experimental techniques, critique of recently published literature, and current work. Prereq., CHEM 4511, 4531, 541, or equivalent, and graduate standing or instructor consent.

CHEM 7481-2. Seminar: Molecular Spectroscopy and Photochemistry. Consists of discussion and presentation of current research in spectroscopy and photochemistry of organic as well as organometallic systems. Review of state of the art techniques available for the theoretical and experimental characterization of excited states. Prereq., graduate standing and instructor consent.

CHEM 7491-1. Seminar: Molecular Vibrational Dynamics. Topics pertaining to vibrational dynamics of small molecules are discussed, with particular emphasis upon IR laser spectroscopy, vapor lasers, clusters, vibrationally induced dipole moments, and predissociation. Discussion of current research and recently published literature. Prereq., graduate standing and instructor consent.

CHEM 7501-1. Seminar: Theoretical Molecular Dynamics. Variety of topics in theoretical chemical physics, emphasizing dynamics of molecules in dissipative environments or in radiation fields. Prereq., graduate standing and instructor consent.

CHEM 7521-1. Atmospheric Kinetics and Photochemistry. Discusses laboratory studies of degradation mechanisms. Applies these studies to atmospheric phenomena such as global warming and stratospheric ozone loss. Prereq., graduate standing and instructor consent.

CHEM 7531-1. Surface Chemistry and Physics. Topics in surface science with focus on time-dependent phenomena. Emphasizes metal and semiconductor surfaces important in catalysis and electronic device processing. Prereq., graduate standing or instructor consent.

CHEM 7601-2. Seminar: Nucleic Acid Chemistry. Topics in various aspects of current research; emphasizes student readings and presentations. Prereq., graduate standing and instructor consent.

CHEM 7611-1. Seminar: Structures and Dynamics of Biopolymers in Solution. Discussion of experimental and theoretical approaches for probing structures and dynamics of proteins, peptides, and nucleic acids, computations in molecular dynamics simulation, modeling, and geometry. Prereq., graduate standing and instructor consent.

CHEM 7621-1. Seminar: Regulation of Transcription. Topics in transcriptional regulation are discussed, emphasizing eukaryotic RNA polymerases and auxiliary proteins. Discussion of current research and recently published literature. Prereq., graduate standing and instructor consent.

CHEM 7631-1. Seminar: Eukaryotic Gene Expression. Discussion of current research, both published and unpublished; student and faculty
Presentations; occasional guest speakers. Prereq., graduate standing and instructor consent.

CHEM 7651-2. Seminar: Biochemistry. Topics in various aspects of current biochemical research; emphasizing student reading and presentations. Prereq., graduate standing and instructor consent.

CHEM 7691-1. Seminar: Protein Dynamics and the Mechanism of Sensory Proteins. Discusses recent results and current literature in the areas of the mechanism of sensory proteins, internal motions of proteins, and protein folding. Prereq., graduate standing and instructor consent.

CHEM 7711-1. Seminar: Analysis of Intracellular Transport. Surveys generic and biochemical approaches to the study of intracellular transport. Topics include protein translocation, vesicular transport between organelles, specific retention of organelle resident proteins, and sorting of proteins during transport. Prereq., graduate standing.

CHEM 7721-1. Structure and Study of Biological Macromolecules. Devoted to experimental and theoretical methods for studying structure and function of biological macromolecules, protein and nucleic acid structure determination by x-ray crystallography, and macromolecular modeling. Prereq., graduate standing or instructor consent.

CHEM 8991-10. Doctoral Dissertation. All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of this catalog.

Classics

General Classics

No Greek or Latin Required

CLAS 1100-3. Greek Mythology. Covers the Greek myths as documents of early human religious experience and imagination, the source of Greek culture, and part of the fabric of Western cultural tradition. Of particular interest to students of literature and the arts, psychology, anthropology, and history. Approved for arts and sciences core curriculum: literature and the arts.

CLAS 1110-3. Masterpieces of Greek Literature in Translation. Surveys Greek authors whose works have most influenced Western thought: Homer, Aeschylus, Sophocles, Euripides, Aristophanes, and Plato. Approved for arts and sciences core curriculum: literature and the arts.

CLAS 1120-3. Masterpieces of Roman Literature in Translation. Surveys ideas and culture of the Romans through a study of representative literature: comedy, tragedy, history, philosophy, oratory, the novel, lyric, epic, and didactic poetry. Approved for arts and sciences core curriculum: literature and the arts.

CLAS 1140-3. Roman Civilization. Surveys the outstanding achievements of Roman culture, as reflected in literature, philosophy and art, private and official religion, and political thought. Approved for arts and sciences core curriculum: historical context.

CLAS 2020-3. Science in the Ancient World. Covers the development of scientific modes of thought, theory, and research from mythological origins (e.g., Hesiod's poetry) through pre-Socratic philosophers. Culminates in theories and research of Plato and Aristotle, including the Roman Empire. Students read original sources in translation. Approved for arts and sciences core curriculum: natural science.

CLAS 2100-3. Women in Antiquity: Greece. Examines evidence of art, archaeology, and literature of Greek antiquity from a contemporary feminist point of view. Focuses on women's roles in art, literature, and daily life. Same as WMST 2100. Approved for arts and sciences core curriculum: cultural and gender diversity.

CLAS 2110-3. Women in Antiquity: Rome. Uses art, archaeology, and literature to study, from a contemporary feminist point of view, the status of women in works of Roman art and literature, the development of attitudes expressed toward them, and their daily life. Same as WMST 2110. Approved for arts and sciences core curriculum: cultural and gender diversity.

CLAS 2840 (1-3). Independent Study.

CLAS 3300-3. Visiting Scholar's Course. Topic to be announced.

CLAS 3330-3. Ancient Athletics. Examines the role of athletics and recreation in Classical Greece, Rome, and the Roman Empire (especially Constantinople) with special emphasis upon religious and political significance (e.g., the Olympic Games) and philosophical speculations on athletics by Plato, Aristotle, and others.

CLAS 3610-3. From Paganism to Christianity. Treats history of Greek and Roman religion from its Bronze Age origins through the rise of Christianity. Recommended prereq., CLAS 1100. Same as PHIL 3610.

CLAS 4110-3. Ancient Epic. Students read in English such major epics of antiquity as Gilgamesh, Iliad, Odyssey, Argonautica, and Aeneid. Topics discussed may include the nature of ancient epic, its relation to the novel, and its legacy. Same as CLAS 5110.

CLAS 4130-3. Greek and Roman Comedy and Satire. Studies Aristophanes, Plautus, Terence, and Roman satire in English translation. Same as CLAS 5130. Approved for arts and sciences core curriculum: literature and the arts.

CLAS 4500-3. Open Topica. Especially tailored to meet the needs of present and future teachers of classics. Covers specialized topics in classical humanities to be specified in the Registration Handbook and Schedule of Courses. Same as CLAS 5500.

CLAS 4820-3. Latin Backgrounds to English Literature: Selected Readings. Studies selected works by early Latin authors influential in English literature using a bilingual text. Emphasizes structure, word placement, diction, and meter in order to understand the debts of successors. Prereq., CLAS 5804 and 5814, or instructor consent. Same as CLAS 5820.

CLAS 4840 (1-3). Independent Study.

CLAS 5110-3. Ancient Epic. Same as CLAS 4110.

CLAS 5120-3. Greek and Roman Tragedy. Same as CLAS 4120.

CLAS 5130-3. Greek and Roman Comedy and Satire. Same as CLAS 4130.

CLAS 5500-3. Open Topica. Same as CLAS 4500.

CLAS 5800-3. Philosophy of Plato. Same as PHIL 5080.

CLAS 5810-3. Philosophy of Aristotle. Same as PHIL 5081.

CLAS 5820-3. Latin Backgrounds to English Literature: Selected Readings. Same as CLAS 4820.

CLAS 5840 (1-3). Graduate Independent Study.

CLAS 6940-3. Master's Degree Candidate.

CLAS 7840 (1-3). Graduate Independent Study.

Ancient History

CLAS 1051-3. The World of the Ancient Greeks. Presents a survey of the emergence, the major accomplishments, the failures, and the decline of the ancient Greeks, from the Bronze Age civilizations of the Minoans and Mycenaeans through the Hellenistic Age (c. 2000-30 B.C.). Same as HIST 1051. Approved for arts and sciences core curriculum: historical context.
CLA5 1061-3. The Rise and Fall of Ancient Rome. Presents a survey of the rise of ancient Rome in the 8th century B.C. to its "fall" in the 5th century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. Same as HIST 1061. Approved for arts and sciences core curriculum: historical context.

CLA5 4021-3. Athens and Greek Democracy. Studies Greek history from 800 B.C. (the rise of the city-states) to 423 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources. Same as CLAS 5021 and HIST 4021.

CLA5 4031-3. Alexander and the Hellenistic World. Focuses first on the career of Philip of Macedon and his son Alexander and second on the Hellenistic Age, especially its culture, from Alexander's death (323 B.C.) to the defeat of Cleopatra and Antony by Octavian in 31 B.C. Same as CLAS 5031 and HIST 4031. Approved for arts and sciences core curriculum: historical context.

CLA5 4041-3. Classical Greek Political Thought. Studies main representative of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. Same as CLAS 5041, HIST 4041, PHIL 4210, and PSCI 4054. Prereq.: for classics or history; CLAS/HIST 1051 or 1061, or HIST 1010; for philosophy, PHIL 3000; for political science, PSCI 2404.

CLA5 4051-3. Greek Constitutional History. Studies primarily Athenian constitutional and legal history with some consideration given to other Greek states. Same as CLAS 5051.

CLA5 4061-3. The Fall of the Roman Empire. Same as HIST 4061. Approved for arts and sciences core curriculum: historical context.

CLA5 4071-3. History of the Byzantine Empire. Approaches Byzantium as heir to the Greek-Roman tradition, paying considerable attention to the line of continuity with the ancient past but recognizing discontinuity as well. Readings present a survey of Byzantine history and civilization. Same as CLAS 5071 and HIST 4071.

CLA5 4081-3. The Roman Republic. Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman republican government. Readings are in the primary sources. Same as CLAS 5081 and HIST 4081. Approved for arts and sciences core curriculum: historical context.

CLA5 4091-3. The Roman Empire. Intense survey of Imperial Roman from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters, and personalities of the empire. Same as CLAS 5091 and HIST 4091.

CLA5 4761-3. Rome, the Law-Giver. Studies the constitutional and legal history of ancient Rome, emphasizing basic legal concepts and comparisons with American law. Same as CLAS 5761.

CLA5 5021-3. Athens and Greek Democracy. Same as CLAS 4021.

CLA5 5031-3. Alexander and the Hellenistic World. Same as CLAS 4031.

CLA5 5041-3. Classical Greek Political Thought. Same as CLAS 4041.

CLA5 5051-3. Greek Constitutional History. Same as CLAS 4051.

CLA5 5071-3. History of the Byzantine Empire. Same as CLAS 4071.

CLA5 5081-3. The Roman Republic. Same as CLAS 4081.

CLA5 5091-3. The Roman Empire. Same as CLAS 4091.

CLA5 5761-3. Rome, the Law-Giver. Same as CLAS 4761.

CLA5 6092-3. Graduate Seminar. Author or topic to be specified. Registration Handbook and Schedule of Courses, May be repeated. Prereq.: graduate standing (M.A. or Ph.D. students only).

CLA5 6102-3. Graduate Seminar. Author or topic to be specified. Registration Handbook and Schedule of Course. May be repeated.

CLA5 6952 (1-6). Master's Thesis.

CLA5 8992-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of this catalog.

Greek

CLA5 1013-4. Beginning Classical Greek 1. Concentrates on careful presentation of classical Greek grammar, with some reading in ancient Greek authors (especially prose).

CLA5 3113-3. Intermediate Classical Greek 1. Reading of selected prose texts of authors such as Plato, Xenophon, Lysias, and selections from the Greek New Testament. Prereq.: CLAS 1013 and 1023, or equivalent.

CLA5 3123-3. Intermediate Classical Greek 2. Students read a play of Euripides, emphasizing learning to read the drama with ease and comprehension. Grammar and syntax receive a good deal of attention.

CLA5 4403-3. Ancient Orators. Prereq.: CLAS 3113 and 3123, or equivalent. Same as CLAS 5403.

CLA5 4503-3. Herodotus. Students read the text of Herodotus and master the major scholarly problems, literary and historical, associated with the text. Prereq.: graduate standing or instructor consent. Same as CLAS 5503.

CLA5 4843 (1-3). Independent Study.

CLA5 5003-3. Graduate Reading. Author or topic to be specified in Registration Handbook and Schedule of Courses (e.g., Homer, Herodotus, Pindar, Aeschylus, Sophocles, Euripides, Thucydides, Greek Comedy, Plato, Aristotle, Xenophon). May be repeated.

CLA5 5403-3. Ancient Orators. Same as CLAS 4403.

CLA5 5503-3. Herodotus. Same as CLAS 4503.

CLA5 5813-3. Accelerated Classical Greek 2. Continuation of CLAS 5803. For graduate students. Successful completion of CLAS 5813 meets the Graduate School foreign language requirement. Prereq.: CLAS 5803.

CLA5 5843 (1-3). Graduate Independent Study.

CLA5 6923-3. Graduate Reading. For master's candidates. May be repeated.

CLA5 7843 (1-3). Graduate Independent Study.

CLA5 7923 (1-3). Advanced Graduate Reading: Greek Drama. Materials to be taken from graduate reading list. May be repeated.

Latin

CLA5 1034-4. Latin Review. For students with two to three years of Latin at the high school level, or one year of Latin at the University level. Cannot receive credit if CLAS 1014 and 1024 have been taken. Must have demonstrated proficiency of Latin language.

CLA5 3114-3. Cicero. Prereq.: CLAS 2114, 2124, or three years of high school Latin.

CLA5 3124-3. Catullus-Horace. Prereq.: CLAS 2114 or 2124 or three years of high school Latin.

CLA5 3214-3. Livy-Pliney. Prereq.: CLAS 2114 or 2124 or three years of high school Latin.

CLA5 3224-3. Ovid. Prereq.: CLAS 2114 or 2124 or three years of high school Latin.

CLA5 4024-3. Latin Prose Composition. Reviews grammar, syntax, and style, and introduction to writing Latin. Prereq.: completion of one 3000-level sequence. Same as CLAS 5024.

CLA5 4034-3. Advanced Latin Prose Composition.
CLAS 4244-3. Roman Elegy. Covers the poetry of Propertius, Tibullus, Ovid: structure, unity, traditional influences, originality. Prereq., completion of one 3000-level sequence. Same as CLAS 5244.

CLAS 4324-3. Lucretius. Philosophical background to Lucretius' De Rerum Natura; tradition and originality in Lucretius' thought and poetry. Prereq., completion of one 3000-level sequence. Same as CLAS 5324.

CLAS 4554-3. Tacitus. Prereq., completion of one 3000-level sequence. Same as CLAS 5554.

CLAS 4824-3. Latin Teaching Methods: Open Topics. Covers specialized topics in Latin pedagogy to be specified in Registration Handbook and Schedule of Courses. Prereq., proficiency test in the translation of Caesar, Cicero, Vergil, and Ovid. Same as CLAS 5824.

CLAS 4844 (1-3). Independent Study.

CLAS 5004-3. Graduate Reading. Author or topic specified in Registration Handbook and Schedule of Courses. May be repeated. Prereq., graduate standing (M.A. or Ph.D. students only).

CLAS 5024-3. Latin Prose Composition. Same as CLAS 4024.

CLAS 5244-3. Roman Elegy. Same as CLAS 4244.

CLAS 5324-3. Lucretius. Same as CLAS 4324.

CLAS 5404-3. Special Project: Teaching. Required of master's candidates (teaching of Latin option). Trains students to prepare classroom-ready materials which are then tested in the students' own classroom. Prereq., fulfillment of the remaining requirements for M.A. teaching of Latin) or 27 hours of graduate work in classics.

CLAS 5554-3. Tacitus. Same as CLAS 4554.

CLAS 5824-3. Latin Teaching Methods: Open Topics. Same as CLAS 4824.

CLAS 5844 (1-3). Graduate Independent Study.

CLAS 6924-3. Graduate Reading. For master's candidates. May be repeated.

CLAS 7844 (1-3). Graduate Independent Study.

CLAS 7924 (1-3). Advanced Graduate Reading. Materials to be taken from graduate reading list. May be repeated.

Honors

CLAS 1105-3. Honors—Greek Mythology.

Art and Archaeology

CLAS 4009-3. Art of the Ancient Near East. Same as CLAS 5009 and FINE 4009.

CLAS 4019-3. Art of Ancient Egypt. Same as CLAS 5019 and FINE 4019.

CLAS 4039-3. Byzantine Art. Same as CLAS 5039 and FINE 4039.

CLAS 4049-3. Pre-Classical Art and Archaeology. Greek and Cretan from the Neolithic period to the end of the Mycenaean world. Same as CLAS 5049 and FINE 4049.

CLAS 4059-3. Classical Art and Archaeology. Greek and archaeology from the end of the Mycenaean world through the Hellenistic era. Same as CLAS 5059 and FINE 4059.

CLAS 4079-3. Roman Art and Archaeology. Covers a millennium of development in Roman art and architecture, from the founding of Rome (753 B.C.) to Constantinople (A.D. 337). Geographical scope includes far-flung imperial provinces as well as the Italian homeland. Same as CLAS 5079 and FINE 4079.

CLAS 4269-3. Biblical Archaeology. Same as CLAS 5269 and ANTH 4269.

CLAS 4419-3. Archaeology of Ancient Near East. Same as CLAS 5419 and ANTH 4419.

CLAS 4429-3. Archaeology of Ancient Egypt. Same as CLAS 5429 and ANTH 4429.

CLAS 4789-3. Egyptian Hieroglyphics 1. Same as CLAS 5789 and ANTH 4789.

CLAS 4799-2. Egyptian Hieroglyphics 2. Same as CLAS 5799 and ANTH 4799.

CLAS 4849 (1-3). Independent Study.

CLAS 5009-3. Art of the Ancient Near East. Same as CLAS 4009 and FINE 5009.

CLAS 5019-3. Art of Ancient Egypt. Same as CLAS 4019 and FINE 5019.

CLAS 5039-3. Byzantine Art. Same as CLAS 4039 and FINE 5039.

CLAS 5049-3. Pre-Classical Art and Archaeology. Same as CLAS 4049 and FINE 5049.

CLAS 5059-3. Classical Art and Archaeology. Same as CLAS 4059 and FINE 5059.

CLAS 5069-3. Prehistoric Greek Art and Archaeology. In-depth study of the Lithic and Bronze Age Aegean (c. 7000-1200 B.C.). Topics selected from architecture, sculpture, pottery, and minor arts. Emphasizes interpretation of materials. Prereq., CLAS 4049 or 5049, or instructor consent. Same as FINE 5069.

CLAS 5079-3. Roman Art and Archaeology. Same as CLAS 4079 and FINE 5079.

CLAS 5089-3. Classical Greek Art. Concentrates on the architecture, sculpture, pottery, and minor arts of the period 500-300 B.C. Regional characteristics and development stressed. Same as FINE 5089.

CLAS 5099-3. Archaic Greek Art. Concentrates on architecture, sculpture, pottery, and minor arts of the period circa 700-500 B.C. Regional characteristics and development are stressed. Prereq., CLAS 4059 or FINE 4059 or instructor consent. Same as FINE 5099.

CLAS 5159-3. Hellenistic Art and Archaeology. Art and archaeology from the period following the death of Alexander the Great (late 4th Century B.C.) to the conquest of Greece by the Romans (middle 2nd Century B.C.). Prereq., CLAS 4059 or 5059, or instructor consent. Same as FINE 5159.

CLAS 5269-3. Biblical Archaeology. Same as CLAS 4269 and ANTH 5269.

CLAS 5419-3. Archaeology of Ancient Near East. Same as CLAS 4419 and ANTH 5419.

CLAS 5429-3. Archaeology of Ancient Egypt. Same as CLAS 4429 and ANTH 5429.

CLAS 5789-3. Egyptian Hieroglyphics 1. Same as CLAS 4789 and ANTH 5789.

CLAS 5799-3. Egyptian Hieroglyphics 2. Same as CLAS 4799 and ANTH 5799.

CLAS 5849 (1-3). Graduate Independent Study.

CLAS 7849 (1-3). Graduate Independent Study.

Communication

COMM 1000-3. Interaction Skills. Covers basic theories, concepts, and characteristics that underlie face-to-face interactions in interpersonal, small group, and organizational settings. Activities stress the development of both task and relational skills in these settings.

COMM 1010-3. Public Speaking. Covers theory and skills of speaking in various public settings. Treats fundamental principles from rhetorical and communication theory and applies them to oral presentations.

COMM 2000-3. Perspectives on Human Communication. Surveys communication in a variety of contexts and applications. Topics include basic concepts and general models of communication, ethics, language and non-verbal communication, personal relationships, group decision making, organizational communication, and impact of technological developments on communication.

COMM 2030-3. Interpersonal Communication. Focuses on basic processes in face-to-face interaction, including verbal and non-verbal messages, coordination in conversation, messages about self and other, and communication in personal relationships. Emphasizes theory and concepts rather than skills.

COMM 2240-3. Organizational Communication. Provides a communicatively-based definition of formal organization and deals with individual-organizational relationships by means of the concepts of identification and commitment. Motivation, authority, power, control, and ethics are treated from a rhetorical perspective.

COMM 2300-3. Communication and Society. Seeks to increase students' awareness of the ways in which gender, dialect (ethnic, regional, and social class), and cultural background influence communication behavior and its consequences. Deepens understanding of communication as a social process, making students more sophisticated observers and participants in their own and other cultures.
COMM 3200-3. Principles and Practices of Argumentation. Focuses on principles of argument, the process of critical decision making, and uses and limitations of logic and evidence. Contemporary issues (personal, social, political, or philosophical) are analyzed and debated. Required for majors. Prereq. for students declaring the major after 9/28/90: COMM 1010.

COMM 3650-3. Rhetorical Criticism. Applies key concepts from rhetorical theory to the analysis of specific speeches, written texts, and social situation within the humanistic tradition. Students read a variety of types of criticism and are encouraged to develop their own strategies for critical analysis. Prereq. for students declaring the major after 9/28/90: COMM 3600.

COMM 4000-3. Special Topics. Analyzes special interest areas of communication, research and practice. Course format is lecture, discussion, investigative analysis, and practical applications. May be taken up to two times for credit for different topics.

COMM 4510-3. Senior Seminar: Interpersonal Communication. Reviews current research and theory on topics such as strategic interaction, relationship formation and maintenance, and identity and self-presentation. May be taken up to two times for credit on different topics. Recommended prereq., COMM 2030.

COMM 4520-3. Senior Seminar: Organizational Communication. Reviews current research and theory on topics such as communication and organizational decision making, organizational culture, communication and power in organizations. May be taken up to two times for credit on different topics. Recommended prereq., COMM 2240.

COMM 4530-3. Senior Seminar: Communication Codes. Reviews current research and theory on topics such as the relationship between verbal and nonverbal codes, interaction processes, and cultural differences in communication processes. May be taken up to two times for credit on different topics. Recommended prereq., COMM 2300.

COMM 4540-3. Senior Seminar: Rhetoric. Reviews current research and theory on topics such as rhetoric and publics, rhetoric as an interpretive social science, rhetoric of social movements, and political campaigns. May be taken up to two times for credit on different topics. Recommended prereq. COMM 3600.

COMM 4550-3. Senior Seminar: Functions of Communication. Discusses functions of communication across interpersonal, organizational, and public contexts. Reviews current research and theory on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices. May be taken up to two times for credit on different topics. Recommended prereq., COMM 3500 and/or 3600.

COMM 4840 through 4900 (1-6). Undergraduate Independent Study. Six-hour limit in major. Note: the 6-hour limit in the major applies to any combination of independent study and internship credit. For students declaring the major after 9/28/90, these courses do not count toward the 30 hours required for the major. Prereq. for students declaring the major after 9/28/90: COMM 3550 or 3650.

COMM 4930 (1-6). Senior Internship. For senior majors only. Studies are pursued in communication-related work experience projects. These internships generally require 45-75 hours on the job per credit hour and evidence (journal, paper, employer evaluation) of significant learning. Prereqs., major status, senior standing, 21 hours of communication courses, and instructor consent. Note: The 6-hour limit in the major applies to any combination of independent study and internship credit. For students declaring the major after 9/28/90, these courses do not count toward the 30 hours required for the major.

COMM 6010-3, 6020-3, 6030-3, 6040-3. Communication Research and Theory. Four courses (Communication Research and Theory 1, 2, 3, and 4) that survey important theoretical and research topics in rhetoric and communication. Required for graduate students in communication. Prereq., graduate standing.

COMM 6200-3. Seminar: Selected Topics. Designed to facilitate understanding of current and past theory on a selected topic in communication and to develop new theory on that topic. May be taken up to two times for credit for different topics. Prereqs., graduate standing and instructor consent.

COMM 6300-3. Advanced Readings in Organizational Communication. Graduate-level survey of traditional and contemporary readings in organizational communication. Treats theory, research, and application from a variety of perspectives. Required for graduate students in communication.

COMM 6400-3. Advanced Readings in Interpersonal Communication. Graduate-level survey course of advanced readings in interpersonal communication. Focuses on historical and contemporary works with emphasis on theory and research. Required for graduate students in communication.

COMM 6500-3. Advanced Readings in Rhetoric. Graduate-level survey of classical and contemporary readings in rhetoric.

COMM 6940 (1-3). Master's Degree Candidate.

COMM 8990-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of this catalog.

Communication Disorders and Speech Science

Didactic: All-department

CDSS 1000-3. Communication and Learning in Children. Provides insight into developing effective communication and learning environments for children. Experience with and observation of children are required. Designed for students planning a career in human services.

CDSS 2000-3. Introduction to Communication Disorders. Surveys communication disorders, including hearing impairments, learning disabilities, and speech-language disorders, as well as an introduction to basic speech and hearing science.

CDSS 3120-4. Anatomy and Physiology of the Speech and Hearing Mechanisms. Studies structures and functions of those portions of the human body important to reception of sound and the production of speech. Prereq., EPOB 3420.

CDSS 4030-3. INREAL Specialist Training. Theories of learning/communication and research relevant to dynamic interactions of individuals. Theory application through video analysis of experiences and interactions that effect learner communication and knowledge.

CDSS 4040-3. INREAL Adjunct Trainer Training. Certified specialists gain knowledge and skills for teaching the INREAL courses, individually designed to include selected readings, supervised practice in all aspects of INREAL field work, and guidance and evaluation with INREAL staff. Prereq., CDSS 4030 and INREAL certification. Same as CDSS 5040.

CDSS 4060 (1-3). INREAL Implementation. Designed for INREAL specialists using INREAL model in preschool, elementary classrooms, or clinical settings. Addresses relationship between INREAL and instructional content areas, and issues such as materials, scheduling, learning cen-
CDSS 5000-2. Research Methods in Communication Disorders and Speech Science. Familiarizes students with basic methodologies and research designs employed in the field. Focuses on critical reading of research papers and design of experiments. At least one research project is conducted and written as part of the course requirements.

CDSS 5020-3. Computer Applications in CDSS. Familiarizes students with basic concepts of computers and how they are applied in the field. Emphasizes analysis of typical CDSS problems, their computer-based solutions, and skills to utilize programs.

CDSS 5030-3. INREAL Specialist Training. Same as CDSS 4030.

CDSS 5040-3. INREAL Trainer Training. Same as CDSS 4040.

CDSS 5050 (1-3). INREAL Implementation. Same as CDSS 4050.

CDSS 5070 (1-3). INREAL Special Topics. Same as CDSS 4070.

CDSS 6000 (1-3). Problems in Communication Disorders and Speech Science. Current issues related to theory and management of communication disorders are presented.

CDSS 6940 (1-3). Candidate for Degree.

CDSS 8990-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of this catalog.

Didactic: Speech-Language Pathology

CDSS 4520-4. Speech Disorders 1. Surveys the following disorders: stuttering, articulation, and language and learning disabilities. Prereq., CDSS 3005, 3105, 3120, and 4560, or instructor consent.

CDSS 4512-4. Speech Disorders 2. Surveys the following disorders: cleft palate, motor speech, aphasia, and voice. Prereq., CDSS 3005, 3105, and 3120, or instructor consent.

CDSS 5202-2. Development of Communication: Birth to Six. Advanced study of communication development during the first six years of life from an interactive point of view.

CDSS 5232-3. Language Disorders of Children. Views language disorders from infancy through adolescence. Comparison is made of cognitive, social, and linguistic development of the language-learning disabled, the mentally retarded, the emotionally disturbed, the autistic, the hearing impaired, and the environmentally deprived. Prereq., CDSS 5202 and instructor consent.

CDSS 5362-3. Stuttering: Therapy and Research. Primary emphasis is evaluation and treatment of children and adults who stutter. Various stuttering intervention approaches are discussed and evaluated. Discussion also devoted to counseling parents of young children who stutter. Familiarity with research is a secondary emphasis.

CDSS 5402-3. Methods of Speech-Language Learning Appraisal. Students are taught the appraisal process and techniques and learn about test construction. Discusses measures of social maturity, intelligence, hearing, speech, oral language, reading, writing, spelling, and mathematics.

Didactic: Audiology

CDSS 2304-3. American Sign Language 1. Designed to teach basic sign vocabulary and introduction to grammatical structures of American Sign Language (ASL) and the culture of deaf people, this course emphasizes receptive skills. Classes are taught using ASL, without depending on spoken English.

CDSS 2314-3. American Sign Language 2. Continuation of CDSS 2304; develops more complex receptive and expressive grammatical structures and a larger sign vocabulary. Classes continue to be taught using ASL, without depending on spoken English.

CDSS 2334-3. American Sign Language 4: Linguistics of ASL. Acquaints students with the concept of bilingualism (dигlossia) in the deaf community, with ASL historical foundations, and with current research on the phonology and morphology of ASL. Conversational usage of ASL to refine expressive skills. Prereq., CDSS 2304, 2314, 2324, or equivalent.

CDSS 4704-3. Audiology 1. Basic principles and techniques of pure tone audiometry, hearing conservation programs in the schools and industry, and pathologies of the auditory system. Required projects in screening and pure tone audiometry. Prereq. or coreq., CDSS 3006 and 3120.

CDSS 5544-3. Seminar: Assessment of Hearing 1. Lect. and lab. The first in a two-course sequence in advanced hearing measurement including both behavioral and electrophysiologic assessment procedures.

CDSS 5644-3. Communication Skills of the Hearing Impaired. Studies process and teaching of speech reading, basic features of auditory training, and development of speech and language skills for the hearing impaired.

CDSS 5684-3. Advanced Hearing Science. Studies instrumentation used by audiologists for signal generation, signal shaping, and measurement and calibration. Also examines microcomputer applications in audiology.

Didactic: Speech-Hearing Science

CDSS 3006-3. Introduction to Speech and Hearing Sciences. Studies basic processes of speech production, transmission, and perception.

CDSS 6106-2. Experimental Phonetics 1. Demonstration and lab course in the applications of instrumentation to problems in acoustic and physiological phonetics; measurement and analysis of linguistically significant acoustic parameters of speech. Lab experiments and at least one experimental research paper are part of course requirements.

CDSS 7106-2. Experimental Phonetics 2. Comprehensive survey of topics in physiological and articulatory phonetics emphasizing motor control of speech production and its theoretical and methodological issues. Lab experiences and research reports on a selected topic are part of the course requirements.

CDSS 7206-2. Speech Perception. Surveys research findings and laboratory experience on topics in speech perception including intelligibility of speech, perceptual cues of segmental and suprasegmental linguistic features, dichotic listening and hemispheric specialization, and speech synthesis.

Practica

CDSS 4918-1. Observation and Cotherapy. Supervised observation and cotherapy experience with individuals exhibiting speech, language, and hearing problems.

CDSS 4938 (1-6). Internship: Speech-Language Intervention (Child Language Center). Provides supervised experience in the management of speech-language disorders in preschool age children from Boulder County who are enrolled in the Communication Disorders Clinic’s preschool program. Prereq., PSYC 2643 or EDUC 4453, and CDSS 4560, or instructor consent.

CDSS 5878 (1-3). Practicum 1: Speech-Language Learning Appraisal. Supervised clinical experience on campus in appraisal of speech, language, and learning disorders after training at the observational level.

CDSS 5908 (1-4). Practicum 1: Speech-Language-Learning Intervention (Child Language Center). Supervised experience in management of preschool age children with identified disabilities who are enrolled in the Communication Disorders Clinic’s integrated preschool program.

CDSS 5928 (1-3). Practicum 1: Conservation of Hearing. Supervised clinical experience off campus in the organization and administration of hearing conservation programs in schools and/or industry.

CDSS 5938 (1-3). Practicum 1: Audiology Intervention. Supervised clinical on- and/or off-campus experience in management of hearing disorders of children and adults.

CDSS 6938-5. Practicum 2: Audiology Internship. Off-campus experience in a school, hospital, or clinic setting which provides in-depth appraisal and/or rehabilitation practice with hearing-impaired individuals.

CDSS 7928-2. Practicum 3: Clinical Administration.

CDSS 8918-2. Practicum 3: Classroom Instruction.

CDSS 8928-2. Practicum 3: Research Coordination.

Independent Study

CDSS 4849 (1-4). Independent Study for Undergraduates.

CDSS 5849 (1-4). Independent Study 1, M.A.

CDSS 5859 (1-4). Independent Study 2, M.A.

CDSS 7849 (1-4). Independent Study 1, Ph.D.

CDSS 7859 (1-4). Independent Study 2, Ph.D.

Comparative Literature

The following course titles represent broad areas and general topics which, together, constitute a program of inquiry in the discipline of comparative literature. In any given semester, selected courses will be listed with specific topic and instructor in the Registration Handbook and Schedule of Courses. Please contact the Comparative Literature Program for more detailed plans.

COML 5000 (1-3). Proseminar. Introduces basic issues in comparative literature and basic problems in research. Provides an overview of the field and methodological issues and an opportunity to solve bibliographical problems. Discusses basic questions of format for research and submission for publication. Prereq., graduate standing or instructor consent. May be repeated for credit to a maximum of 7 hours.

COML 5350-3. Studies in Prose Narrative. Examines both short and long narrative prose fiction from a variety of periods and from diverse national literatures. Focuses on issues of defining genre and on the origins and significance of narrative prose within its cultural context. Prereq., graduate standing or instructor consent.

COML 5360-3. Drama Seminar. Covers selected topics involving drama, using a comparative approach. Prereq., graduate standing or instructor consent.

COML 5370-3. Studies in Poetry. Traces the development of the rhetoric and poetic practice of major world poets from antiquity to the present day. Prereq., graduate standing or instructor consent.

COML 5610-3. Introduction to Literary Theory. Covers major trends in twentieth-century critical thinking. Prereq., graduate standing or instructor consent.

COML 5620-3. History of Literary Criticism 1. Prereq., graduate standing or instructor consent.

COML 5630-3. History of Literary Criticism 2. Selection of Renaissance Enlightenment, and post-Enlightenment works of literary criticism and theory. Prereq., graduate standing or instructor consent.

COML 5660-3. Themes, Motifs, and Characters. Prereq., graduate standing or instructor consent.

COML 5840 (1-3). Independent Study.

COML 6040 (1-3). Seminar: A Selected Topic. May be repeated for credit to a maximum of 7 hours.

COML 6840 through 6890 (1-3). Independent Study.

COML 6940 (1-3). Candidate for Degree.

COML 6970-3. Colloquium in Comparative Literature.

Economics

Theory and History of Economic Thought

ECON 2010-4. Principles of Microeconomics. Examines basic concepts of microeconomics, the behavior and interactions of individuals, firms, and government. Topics include determining economic problems, how consumers and businesses make decisions, how markets work and how they fail, and how government affects markets. Approved for arts and sciences core curriculum: contemporary societies.
ECON 2020-4. Principles of Macroeconomics. An overview of the economy, examining the flows of resources and output and the factors determining the levels of income and prices. Policy problems of inflation, unemployment, and economic growth are explored. Approved for arts and sciences core curriculum: contemporary societies.

ECON 3080-3. Intermediate Macroeconomic Theory. National income and employment theory. Emphasizes unemployment, inflation, monetary and fiscal policies, and determination of levels of employment and prices. Theories of consumption, investment, and money are considered. ECON 3070 and 3080 may be taken in any order; there is no recommended sequence. Prereq.: 6 credits of math modules (MATH 1050, 1060, 1070, 1080, 1090, and 1100) or equivalent, and ECON 2010 and ECON 2020.

ECON 6070-3. Applied Microeconomic Theory. Develops competence in techniques of applied microeconomic theory for those going into policy and problem-solving jobs. Topics include estimating demand, cost, and production functions, operational models of production processes from industry/agriculture; capital theory; and benefit-cost analysis. Prereq.: ECON 3070 and 4808.

ECON 6080-3. Applied Macroeconomic Theory. Develops competence in techniques of applied macroeconomic theory. Topics include theoretical and empirical work on consumption, investment, money demand and supply, and open economy macroeconomic models. Also covers different expectations models, the policy ineffectiveness proposition, and policy credibility. Prereq.: ECON 3080 and 4808.

ECON 7010-3. Microeconomic Theory I. Recent and contemporary literature on fundamentals of economic theory. Considers value theory with particular emphasis on methodology, theory of demand, theory of the firm, theory of distribution, and general equilibrium theory. Prereq.: ECON 3070, 3080, and ECON 4808 or MATH 1300.

ECON 7040-3. Macroeconomic Theory II. Continuation of ECON 7020. Prereq.: ECON 7020.

ECON 8000-3. Alternative Economic Paradigms. Explores various economic paradigms and considers how these approaches compare with the dominant neoclassical view. Emphasizes paradigms associated with Austrian and Cambridge schools. Prereq.: ECON 7000, 7010, and 7020.

ECON 8570-3. Economics of Uncertainty and Information. Analyzes uncertainty and information in economics. Begins with the basic concepts in game theory and proceeds to individual behavior under uncertainty. Examines models of moral hazard, adverse selection, and principal-agent problems. Prereq.: ECON 7010, 7030, and 7808.

Money, Banking, and Public Finance

ECON 8111-3. Seminar: Monetary Political Economy. International monetary and financial institutions with a focus on international policy coordination and political business cycles. Prereq.: ECON 4111 or 5111, and 6080 or 7020.

ECON 8121-3. Advanced Monetary Theory. Presents major ideas and issues in development of contemporary monetary and financial economics. Prereq.: ECON 6080 or 7020.

ECON 8221-3. Seminar: Public Expenditure. Continuation of ECON 8211 emphasizing government expenditures. Specific topics include welfare economics, theories of public good provision, determinants of expenditure growth, and benefit-cost analysis. Either course may be taken independently for credit. Prereq.: ECON 6070 and 7010.

Urban Regional Economics

ECON 4252-3. Urban Economics. Analyzes the level, distribution, stability, and growth of income and employment in urban regions. Examines topics of urban poverty, housing, land use, transportation, and local public services with special reference to economic efficiency and social progress. Prereq.: ECON 3070. Same as ECON 5252.

ECON 4292-3. Migration, Urbanization, and Development. Examines historical and contemporary patterns of national settlement system development. Focuses on quantitative analysis of problems associated with population growth and decline, urbanization, and economic structural change in more developed and less developed countries. Same as ECON 5229 and GEOG 4292.

ECON 5252-3. Urban Economics. Same as ECON 4252.

ECON 5292-3. Migration, Urbanization, and Development. Same as ECON 4292 and GEOG 5292.

ECON 8252-3. Seminar: Urban and Regional Economics I. Covers basic theories in spatial location of economic activity and land use and survey techniques developed to analyze, measure, and predict regional and urban structure and growth, such as economic base studies, regional social accounts, and input-output analysis. Prereq.: ECON 4252 or 5252.

ECON 8262-3. Topics in Urban and Regional Economics. Investigates various theoretical topics in urban and regional economics and focuses on policy issues. Course format involves student research and presentations. Prereq.: ECON 8252.

International Trade and Finance

ECON 3403-3. International Economics and Policy. Examines national and supranational policies that affect the international economy, with attention to trade barriers, economic nationalism and regionalism, international political economy, exchange market intervention, and international transmission of economic perturbations. Open to nonmajors only. Prereq.: ECON 2010 and 2020. Approved for arts and sciences core curriculum: contemporary societies.

ECON 3433-3. Economics for a Sustainable Future. International conflicts concerning debt, development, and the U.S./U.S.S.R. are analyzed, using ideas from game theory, social choice theory, and information-communication theory. Comparing views of socialism versus free market economics are considered as are alternative economic paradigms and reform proposals. Prereq.: ECON 2010, 2020, and instructor consent.

ECON 4423-3. International Finance. Covers balance of payments; foreign exchange market, income, trade and capital flows; asset markets; adjustment mechanisms; stabilization policies in an open economy; and problems of international monetary systems. Prereq., ECON 3080.

ECON 5423-3. International Finance. Covers balance of payments; foreign exchange market, income, trade, and capital flows; asset markets; adjustment mechanisms; stabilization policies in an open economy; and problems of international monetary systems. Prereq., ECON 6080.

ECON 8433-3. Seminar: Topics in Money and International Economics. Foundational issues in monetary theory and an integration with international economics. Topics include alternative monetary arrangements, international monetary history, theory of multiple monies, and interaction between real and monetary phenomena. Prereq., ECON 8121, 8413, or 8423.

Economic History and Economic Development

Note: The prereqs. for the following 4000-level courses are ECON 2010 and 2020; for the following 5000-level courses, the prereqs. are ECON 3070 and 3080.

ECON 8534-3. Economic History of North America. Examines North America's past from the perspective of economics. Topics include growth and welfare in the colonial period; staple products, agricultural development, and the emerging industrialism in the ante-bellum period; transformation of the North American economy to 1914; the interwar years and the Great Depression; and economic integration since 1945. Prereqs., ECON 3070 and 3080.

ECON 8764-3. History of Economic Development. Covers in historical perspective the causes of economic development, why some areas develop faster than others, and why development occurs more rapidly in some eras than others. Prereqs., ECON 3070 and 3080. Same as FIINST 7214.

Natural Resources and Environmental Economics

ECON 3535-3. Natural Resource Economics. Integrates economic analysis with life science aspects of natural resource systems to develop social policies for use of natural resources. Economist's approach to resources policy analysis is studied, then applied to energy, forestry, fisheries, mining, and water systems. For non-majors. Students may not receive credit for both ECON 3535 and 4535. Prereq., ECON 2010. Approved for arts and sciences core curriculum: contemporary societies.

ECON 3545-3. Environmental Economics. Causes of excessive environmental pollution and tools for controlling it through economic analysis; values of preservation; distribution of costs and benefits from environmental protection programs. For non-majors. Students may not receive credit for both ECON 3545 and 4545. Prereq., ECON 2010. Approved for arts and sciences core curriculum: contemporary societies.

ECON 4535-3. Natural Resource Economics. Analysis of problems associated with socially optimal use of renewable and non-renewable natural resources over time. Problems of common property resources, irreversible forms of development, and preservation of natural areas. Students may not receive credit for both ECON 3535 and 4535. Prereqs., ECON 3070 and 3080. Same as ECON 5535.
ECON 4545-3. Environmental Economics. Effects of economic growth on the environment; application of economic theory of external diseconomies, cost-benefit analysis, program budgeting, and welfare economics to problems of the physical environment. Students may not receive credit for both ECON 3545 and 4545. Prereq.: ECON 3070 and 4808.

ECON 5535-3. Natural Resource Economics. Same as ECON 4535.

ECON 8545-3. Seminar: Environmental Economics. Theory of externalities; alternative polices for environmental management; taxes, subsidies, standards, pollution rights; industry models, regional models; macroeconomics of environmental problems; transboundary problems; preservation/development. Prereq.: ECON 4808, and 6070 or 7010.

ECON 8555-3. Seminar: Water Resources Development and Management. Examines economic principles governing water planning and development. Application of benefit-cost analysis and optimization techniques of design of water systems. Relationship to national planning and growth. Prereq.: ECON 3070 and 6 credits of math modules (MATH 1050, 1060, 1070, 1080, 1090, and 1100) or equivalent.

Labor and Human Resources

ECON 4606-3. Introduction to Economic Demography. Covers economics of investments in human beings with special emphasis on decisions made within the context of the family. Also focuses on income distribution issues and related policies such as job training and welfare reform. Prereq.: ECON 3070.

ECON 5616-3. Labor Economics. Same as ECON 4616.

ECON 8666-3. Economic Demography. Investigates economic determinants and consequences of demographic behavior in developing and developed countries. Issues include fertility and female labor supply interactions, the demographic transition, the effect of population growth on income distribution, family investments in children, and intergenerational mobility. Prereq.: ECON 3070 and 3080.

ECON 8868-3. Seminar: Labor Economics II. Focuses on special topics in labor economics: dynamic theories of labor supply, employment, and unemployment; labor supply in a household framework; labor market activity and income distribution. In each area both theoretical models and empirical tests are explored. Prereq.: ECON 3070 and 3080.

Industrial Organization

ECON 8747-3. Applied Industrial Organization. Topics selected from economic regulation, public utility economics, regulatory institutions, industry studies, and experimental economics as applied to industrial organization. Prereq.: ECON 6070 or 7010.

ECON 8757-3. Industrial Organization and Control. Theory of interaction of firms within markets and industries, emphasizing importance of the number, relative size of firms, market institutions, firm strategies, and nature of consumer demand. Examines neoclassical and game theoretic models, empirical industry studies, and laboratory tests of theoretical models and policies. Prereq.: ECON 6070 or 7010.

Quantitative Economics

ECON 4808-3. Introduction to Mathematical Economics. Introduces the use of mathematics in economics. Topics include vectors and matrices, differential calculus, and optimization theory, with economic applications. Prereq.: ECON 2010, 2020, and 6 credits of math modules (MATH 1050, 1060, 1070, 1080, 1090, and 1100). Same as ECON 5808.

ECON 4818-3. Introduction to Econometrics. Designed to give undergraduate economics majors an introduction to econometric theory and practice. Develops the multiple regression model and problems encountered in its application in lecture and individual applied projects. Prereq.: ECON 3818.

ECON 4838-3. Microcomputer Applications in Economics. Innovative uses of personal computers in economic analysis and model building techniques. Students acquaint themselves with economic models through individualized, computer-generated exercises. Topics include input-output analysis, linear programming, nonlinear approximation, and simulation. Prereq.: ECON 4808 or MATH 1300, and ECON 3670. Same as ECON 5838.

ECON 5808-3. Introduction to Mathematical Economics. Same as ECON 4808.

ECON 5838-3. Microcomputer Applications in Economics. Same as ECON 4838.

ECON 6828-3. Applied Time Series Analysis (Box-Jenkins) and Forecasting. Introduces first-year graduate students to time series approach of model building and forecasting. Basic topics are Box-Jenkins autoregressive moving average, transfer function and vector autoregressive models, and the evaluation of forecasts from such models. Emphasizes applied computer assignments. Prereq.: ECON 4808 or 5808.

ECON 8838-3. Seminar: Econometrics II. Mathematical and statistical foundations of

Independent Study and Other Courses
ECON 4309-3. Economics Honors Seminar. Open only to qualified seniors. For information consult the department’s director of honors. Approved for arts and sciences core curriculum: critical thinking.

ECON 4319-3. Economic Education 1. Seminar for qualified undergraduate economics majors interested in being teaching assistants for ECON 2010. Students hold one or two 50-minute recitations per week for an introductory microeconomics class and attend a weekly seminar with the other undergraduate TAs. Prereqs., ECON 3070, 3080, and department consent.

ECON 4329-3. Economic Education 2. Seminar for qualified undergraduate economics majors interested in being teaching assistants for ECON 2020. Students hold one or two 50-minute recitations per week for an introductory macroeconomics class and attend a weekly seminar with the other undergraduate TAs. Prereqs., ECON 3070, 3080, and department consent.

ECON 4909 (1-4). Independent Study. Offered only to students with a GPA of 3.00 or better. Prereqs., ECON 2010 and 2020; instructor and department consent required.

ECON 4939-6. Internship/Seminar. Offers students the opportunity to integrate theoretical concepts of economics with practical experience in economics-related institutions. The theoretical portion arises from seminars and readings, the practical from activities in organizations related to the economics field. Prereqs., ECON 2010, 2020, 3070, 3080, junior or senior major standing, and instructor consent.

ECON 4999-3. Economics in Action: A Capstone Course. Students read current newspapers, selecting topics in which economics plays a role in understanding events. Background reading is then assigned. Encourages students to read about economic topics, to think about and research them in economics terms, and to improve their ability in writing and critical thinking. Prereqs., ECON 2010 and 2020, and junior or senior standing. Approved for arts and sciences core curriculum: critical thinking.

ECON 6339 (1-3). Teaching Economics. Explores a variety of topics applicable to the study and teaching of economics. Main emphasis is on themes, topics, and strategies most appropriate to motivate students’ interest in economics. Courses offered through the Colorado Council for Economic Education. Not an option for economics majors or economics graduate students.

ECON 6909 (1-4). Independent Study. Prereq., instructor and department consent.

ECON 6949 (1-3). Master’s Candidate.

ECON 6959 (1-4). Master’s Thesis.

ECON 8909 (1-4). Independent Study. Prereq., instructor and department consent.

ECON 8999-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of this catalog.

English

College List and/or Core Curriculum
ENGL 1200-3. Introduction to Fiction. Reading and analysis of short stories and novels.

ENGL 1260-3. Introduction to Women’s Literature. Introduces literature by women in England and America. Covers both poetry and fiction and varying historical periods. Acquaints students with the contribution of women writers to the English literary tradition and investigates the nature of this contribution. Same as WMST 1260. Approved for arts and sciences core curriculum: cultural and gender diversity.

ENGL 1300-3. Introduction to Drama. Reading and analysis of plays.

ENGL 1400-3. Introduction to Poetry. Reading and analysis of poetry.

ENGL 1500-3. Masterpieces of British Literature. Introduces students to a range of major works of British literature, including at least one play of Shakespeare, a pre-twentieth-century English novel, and works by Chaucer and/or Milton. Approved for arts and sciences core curriculum: literature and the arts.

ENGL 1600-3. Masterpieces of American Literature. Enhances student understanding of the American literary and artistic heritage through an intensive study of a few centrally significant texts, emphasizing works written before the twentieth century. Approved for arts and sciences core curriculum: literature and the arts.

ENGL 1800-3. American Ethnic Literatures. Introduces significant fiction by ethnic Americans. Explores both the literary and the cultural elements that distinguish work by these writers. Primary emphasis given to materials from Native American, African American, and Chicano traditions. Approved for arts and sciences core curriculum: cultural and gender diversity.

ENGL 2260-3. Images of Women in Literature. Surveys images of women in English literature from the Middle Ages to the present. Same as WMST 2260.

ENGL 2600-3. Introduction to World Literature 1. Close study of literary classics of Western civilization: the Odyssey or Iliad, Greek drama, and several books of the Bible. Not open to students who have credit in HUMN 1010-1020.

ENGL 2610-3. Introduction to World Literature 2. Close study of literary classics of Western civilization: major Roman and medieval texts. Not open to students who have credit in HUMN 1010-1020.

Undergraduate Creative Writing
ENGL 1191-3. Introduction to Creative Writing. Introduces techniques of fiction and poetry. Student work is scrutinized by the instructor and discussed in a workshop atmosphere by other students.

ENGL 2021-3. Introductory Poetry Workshop. Introductory course in poetry writing. Prereq., instructor consent after submitting a manuscript (five to seven poems). May be taken up to three times for credit.

ENGL 2051-3. Introductory Fiction Workshop. Introductory course in fiction writing. Prereq., instructor consent after submitting a manuscript (one short story). May be taken up to three times for credit.

ENGL 3021-3. Intermediate Poetry Workshop. Intermediate course in poetry writing. Prereq., instructor consent based on submission of manuscript (five to seven poems). May be taken up to three times for credit.

ENGL 3051-3. Intermediate Fiction Workshop. Intermediate course in fiction writing. Prereq., instructor consent based on submission of manuscript (one short story). May be taken up to three times for credit.

ENGL 4021-3. Advanced Poetry Workshop. Advanced course in poetry writing. Prereq., instructor consent based on submission of manuscript (five to seven poems). May be taken up to three times for credit.

ENGL 4051-3. Advanced Fiction Workshop. Advanced course in fiction writing. Prereq., instructor consent based on submission of manuscript (one short story). May be taken up to three times for credit.

ENGL 4081-3. Playwriting: Short Form.

Undergraduate Literature and Language
ENGL 1002-3. Critical Analysis 1: Poetry. A basic skills course designed to equip students to handle the English major, emphasizing critical writing and acquiring the basic techniques and vocabulary of literary criticism through close attention to poetic language. Prereq., lower-division standing. Limited to English majors only.

ENGL 1012-3. Critical Analysis 2: Prose. A basic skills course designed to equip students to handle the English major, emphasizing critical writing and acquiring the basic techniques and vocabulary of literary criticism through close attention to the varieties of prose language. Prereq., lower-division standing. Limited to English majors only.

ENGL 2012-3. Modern Critical Thought. Introduces students to a wide range of critical theories that English majors need to know. Organized as a survey, course covers major movements in modern literary/critical theory, from Matthew Arnold through new criticism to contemporary post-modern frameworks. Prereq., lower-division standing. Limited to English majors only.

ENGL 2712-3. Native American Literature. Surveys traditional and contemporary North American Native American literature, from traditional oral forms to contemporary literature of novels, short stories, and poetry.

ENGL 2782-3. Studies in Literature. Studies a special literary topic or major author, especially designed for freshmen and sophomores. Topics vary each semester. Students may receive credit for this course up to two times for different topics.

ENGL 3002-3. Shakespeare for Nonmajors. Introduces students to Shakespeare's major works—the histories, comedies, and tragedies—and may include some dramatic poetry as well. Approved for arts and sciences core curriculum: literature and the arts. Prereq., sophomore standing.

ENGL 3152-3. Report Writing. Instruction and practice in various forms of reports, papers, and articles. Style and editing are emphasized. Prereq., sophomore standing.

ENGL 3162-3. History and Literature of Georgia. Provides interdisciplinary study of Georgia in one of its most vibrant cultural and historical periods. Topics include politics, religion, family life, and the ways contemporary authors understood their world. Same as HIST 3163. Approved for arts and sciences core curriculum: historical context. Prereq., sophomore standing.

ENGL 3222-3. Folklore 1. Emphasizes formal study of folk traditions—including tales, songs, games, customs, beliefs, and crafts—within a theoretical framework, using examples from several cultures. Prereq., sophomore standing.

ENGL 3312-3. The Bible as Literature. Surveys literary achievements of the Judaeo-Christian tradition as represented by the Bible. Prereq., sophomore standing.

ENGL 3502-3. Survey of British Literature 1. Chronological study of greater figures and forces in English literature from Beowulf to 1660. Prereq., sophomore standing. Limited to English, humanities, and film studies majors only.

ENGL 3542-3. Chaucer: The Canterbury Tales. Short introduction to Middle English precedes study of the poetry. Prereq., sophomore standing. Limited to English and humanities majors only.

ENGL 3562-3. Shakespeare. Shakespeare's works through 1600. Prereq., sophomore standing. Limited to English, humanities, and theatre majors only.

ENGL 3762, 3772, 3782-3. Studies in Literature. Studies a special literary topic or major author, specially designed for juniors and seniors. Topics vary each semester. Students may receive credit for this course up to two times for different topics. Prereq., sophomore standing.

ENGL 3802-3. Computer Applications in Language and Literature. Surveys major successful applications of computer technology to the analysis of literary texts. Analyzes selected texts, in the context of the most appropriate theories of language and literature and the proper structuring of literary databases. Prereq., sophomore standing.

ENGL 3912-3. Computer Practicum. Provides direct experience in using the computer as a tool of literary study: to analyze, edit, and make a concordance of a limited number of literary texts. Emphasizes use of machine analyses to formulate and test critical perspectives about the texts. Several critical papers are required. Prereq., sophomore standing.

ENGL 4002-3. Literature and Psychology. Critical application of basic concepts of psychology to world literature. Prereq., senior standing.

ENGL 4012-3. Literature and Psychopathology. Studies students major psychological disorders as they are given dramatic and descriptive treatment by literary artists in poems, plays, short stories, and novels. Although emphasis is primarily descriptive, some attention is paid to contemporary views of etiology. Prereq., senior standing.

ENGL 4032-3. Critical Thinking: New Directions in English Studies. Concerned with developments in the study of literature that have significantly influenced our conception of the theoretical bases for study and expanded our understanding of appropriate subject matter. New directions courses may include topics in women's literature and feminist criticism, Marxist criticism, various schools of psychological criticism, structuralism, semiotics, deconstruction, ethnopoetics, film studies, and applications of linguistic theories to literary criticism. Approved for arts and sciences core curriculum: critical thinking. This course may not be repeated. Prereq., senior standing. Limited to English and humanities majors only.

ENGL 4042-3. The English Language. Outlines history of the language, including a brief survey of sound changes affecting modern English, of history of grammatical forms, and of the vocabulary. Elementary knowledge of English grammar is assumed. Prereq., senior standing.

ENGL 4192-3. Advanced Shakespeare. For advanced students only. Close readings of works spanning Shakespeare's career. Prereq., senior standing. Limited to English, humanities, and theatre majors only.

ENGL 4252-3. Modern Novel. Close study of masterpieces by such novelists as Proust, Joyce, Woolf, Lawrence, Mann, Kafka, and Faulkner. Prereq., senior standing.

ENGL 4272-3. Topics in Women's Literature. Focuses on areas of research interest in the study of women's literature, such as selected themes or critical issues. Students expected to contribute original research to the topic under consideration. Same as WMST 4272. Prereq., senior standing.

ENGL 4282-3. Folklore 2. Upper-level studies of folk groups, events, texts, and contexts as they reflect traditional "knowing"—folk perceptions and teachings about the structure and purpose of the universe. Prereq., ENGL 3222 and senior standing.

ENGL 4302-3. Development of British Drama 1. From beginning to the closing of the theatres in 1642. Prereq., senior standing.

ENGL 4462-3. Modern Poetry. Selection of the works of British and American poets from 1900 to the present. Prereq., senior standing.

ENGL 4502-3. Medieval Literature 1. Intensive study of the major literary works of the Middle Ages in Europe. Prereq., senior standing.

ENGL 4512-3. Medieval Literature 2. Intensive study of the major literary works of the Middle Ages in Britain. Prereq., senior standing.

ENGL 4542-3. The Age of Satire: 1660-1740. Dryden, Defoe, Swift, Pope, Addison and Steele, and their contemporaries. Prereq., senior standing. Limited to English and humanities majors only.

ENGL 4562-3. The Early Romantics. Major emphasis on Blake, Coleridge, and Wordsworth. Prereq., senior standing. Limited to English and humanities majors only.

ENGL 4572-3. The Later Romantics. Major emphasis on Keats, Shelley, and Byron. Prereq., senior standing. Limited to English and humanities majors only.

ENGL 4602-3. The Early Victorians. Main currents of Victorian thought in prose and poetry, 1830-1860. Prereq., senior standing. Limited to English and humanities majors only.

ENGL 4612-3. The Later Victorians. Continuation of ENGL 4602, covering 1860-1900. Prereq., senior standing. Limited to English and humanities majors only.

ENGL 4672-3. Anglo-Saxon Language and Literature. Introduces Anglo-Saxon (Old English) language and literature. Emphasizes rapidly acquiring a reading knowledge of the language. Prose readings are followed by highlights of the shorter poetry (Wandering, Seafarer, Battle of Malden, etc.). Same as ENGL 5674. Prereq., senior standing.

ENGL 4682-3. Beowulf. Students read and analyze Beowulf in the original language, with some attention to additional background readings. Same as ENGL 5684. Prereq., senior standing.

ENGL 4722, 4732, 4742, 4752, 4762-3. Seminar: Topics in English. Studies such topics as heroism in eighteenth century literature, eras and violence, South African women writers, politics and religion in sixteenth century literature, and American humor. Specialy designed for senior English majors. This course may not be repeated. Prereq., senior standing. Limited to English and humanities majors only.

ENGL 4772, 4782, 4792, 4802-3. Seminar: Major Authors. Intensive study of one or more major British or American authors. Specialy designed for senior English majors. This course may not be repeated. Prereq., senior standing. Limited to English and humanities majors only.

Graduate Creative Writing

ENGL 5213, 5223 (1-3). Poetry Workshop. Designed to give students practical criticism of their poetry and to develop a sense of critical standards. Admission by submission of manuscript and/or instructor consent.

ENGL 5233, 5243 (1-3). Fiction Workshop. Designed to give students practical criticism of their fiction and to develop a sense of critical standards. Admission by submission of manuscript and/or instructor consent.

ENGL 5253-3. Nonfiction Workshop. Class meetings are spent in discussion and practical criticism of student work and in discussion of relevant works of nonfiction. Admission by submission of a manuscript and instructor consent.

ENGL 5263-3. Publishing Workshop. Provides practical experience in the editorial, design, and business procedures of the publishing industry.

ENGL 5273-3. Recent Poetry. Covers poetry, mainly American, written since World War II.

ENGL 5293-3. Recent Fiction. Covers fiction, mainly American, written since World War II.

ENGL 5303-3. Poetics. Advanced poetics primarily (though not exclusively) for creative writing students. Instruction in the use of a variety of forms from different eras and traditions in fiction and poetry.

Graduate Literature and Language

ENGL 5004, 5014, 5024-3. Studies in Major Authors. Individual British, American, and significant Continental authors. (Author for any given semester is specified in the Registration Handbook and Schedule of Courses.)

ENGL 5204-3. Studies in the Novel. In-depth analyses of novels that are significant in mainstream traditions or that display major departures.

ENGL 5504-3. Medieval Literature. Selections representative of life and thought of the Middle Ages up to 1500.

ENGL 5524-3. Renaissance and Seventeenth-Century Literature.

ENGL 5544-3. Restoration and Eighteenth-Century Literature. Explores poetry, novel, and nonfiction prose of the period, with rotating emphases on genres and topics.

ENGL 5564-3. Readings in American Literature. Extensive reading in the history of American literature as the basis for a graduate major or minor in the field.

ENGL 5564-3. Twentieth-Century American Literature.

ENGL 5674-3. Anglo-Saxon Language and Literature. Same as ENGL 4672.

ENGL 5734-3. Computer Applications in the Humanities. Use of the computer as a tool in research and instruction: style and content analysis, authorship and influence studies, text collection and edition; creativity, analysis of nontraditional data, bibliographies and information banks. Programming not required.

ENGL 7004-3. Studies in Major Authors. Intensive study of works of one or more major British, American, or significant continental author. (Author for a given semester is specified in the Registration Handbook and Schedule of Courses.)

ENGL 7104-3. Special Topics. Intensive study of specialized topics in English, American, and continental literature. (Topic for a given semester is specified in the Registration Handbook and Schedule of Courses.)

ENGL 7114-3. History of English Studies. Surveys the intellectual, institutional, and pedagogic origins and development of the study of English and American literature and language in universities from the 18th through the 20th centuries.
ENGL 7474-3. Problems in Literary Criticism.
ENGL 7484-3. Problems in Literary Theory.
ENGL 7883-1. Interdisciplinary Seminar in British Studies. Exposes students to methodologies of current work in English, history, theatre, and art history. With a different focus each semester, the seminar may be taken up to three times. Same as HIST 7183.

Independent Study
ENGL 1855 (1-3). Independent Study, Lower Division. Literature/language.
ENGL 3935 (1-6). Internship. Provides academically supervised opportunity for upper-division students to work in public or private organizations on projects related to students' career goals and to relate classroom theory to practice. Prereq., junior standing and dean's and instructor consent.
ENGL 4845 (1-3). Independent Study, Upper Division. Creative writing.
ENGL 4855 (1-3). Independent Study, Upper Division. Literature/language.
ENGL 5845 (1-3). Independent Study, Graduate Level 1. Independent investigation of topics of specific interest to individual students. Students wishing to enroll in independent study must petition the director of Graduate Studies prior to the beginning of the semester.
ENGL 5855 (1-3). Tutorials in Medieval Studies.
ENGL 5865 (1-3). Tutorials in Renaissance Studies.
ENGL 5875 (1-3). Tutorials in Restoration and Eighteenth-Century Studies.
ENGL 5885 (1-3). Tutorials in Romantic Studies.
ENGL 5895 (1-3). Tutorials in Victorian Studies.
ENGL 5905 (1-3). Tutorials in Modern Studies.
ENGL 6845 (1-3). Tutorials in American Studies.
ENGL 6855 (1-3). Tutorials in Author Studies.
ENGL 6865 (1-3). Tutorials in Creative Writing.
ENGL 6945-3. Master's Degree Candidate.
ENGL 6955 (3-6). Master's Thesis.
ENGL 7845 (1-3). Independent Study, Graduate Level 2.
ENGL 7855 (1-3). Advanced Medieval Studies.
ENGL 7865 (1-3). Advanced Renaissance Studies.
ENGL 7875 (1-3). Advanced Restoration and Eighteenth-Century Studies.
ENGL 7885 (1-3). Advanced Romantic Studies.
ENGL 7895 (1-3). Advanced Victorian Studies.
ENGL 7905 (1-3). Advanced Modern Studies.

ENGL 8845 (1-3). Advanced American Studies.
ENGL 8855 (1-3). Advanced Studies in Authors.
ENGL 8895-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of this catalog.

Film Studies

Production

FILM 2000-3. Beginning Filmmaking. Instructs students in making Super 8 films. Covers use of cameras and editing equipment, basic editing and splicing techniques, and analysis of pertinent films. May emphasize making personal experimental films or on making narrative sound films, according to instructor. There is no lab fee for filmmaking courses, but students are expected to purchase materials and rent the necessary equipment. The film studies program maintains an equipment pool, with modest registration and rental fees for students needing equipment.
FILM 2300-3. Beginning/Intermediate Filmmaking. Usually taught by a distinguished visiting filmmaker. Covers basic camera, editing, and splicing techniques for Super-8 film. Skills in 16mm are also taught for more advanced students. Equipment is available at the film studies office for a modest rental fee. May be repeated for credit.
FILM 2400-3. Intermediate Small-Format Production. Instruction in shooting and editing Super-8 sound and/or small format video, as well as lab techniques. Students complete a project involving a semester of preparation, shooting, re-shooting, editing, and final prints. Prereq., FILM 2000 or instructor consent.
FILM 3010-3. Film Production Topics. Offers students both theoretical and practical experience in various specialized areas of cinematic production. Topics vary but include production in the documentary, fictional narrative, animation, computer animation, and experimental genres.
FILM 3500-3. Intermediate Filmmaking. 16mm. Film production class in 16mm (emphasizing personal experimental films) and in film studies (with a documentary and/or narrative orientation). Covers 16mm camera operation, splicing, editing, sound transfer and recording, and dealing with the lab. Each student makes a film by the end of the semester. Students should expect to spend a few hundred dollars on equipment rental, film stock, and lab costs. Course may be repeated for credit with department consent. Prereq., FILM 2300 or FILM 2400, and FILM 3500.
FILM 3900 (1-3). Independent Study (Production).

FILM 3930 (1-6). Film Studies Internship. Provides an academically supervised opportunity for advanced-level students to work in public or private organizations on film projects. Relates classroom theory to practice. Students follow a writ

1 Courses that may be repeated may be used for partial fulfillment of a college requirement only once.
may be repeated for credit within the same term (up to 9 hours total) with department consent.  

FILM 3012-3. Documentary Film. Historical survey of the genre, from the silent film era to contemporary examples. May include autobiographical diary and propaganda films.

FILM 3902 (1-3). Independent Study (Reading).

**Topics**

FILM 2003-3. Film Topics. Varying topics on important individuals, historical developments, groupings of films, film directors, national cinemas, critical and theoretical issues in film. May be repeated for credit as topics change.

FILM 2013-3. Film and the Quest for Truth. Concerns the subjectivity and relativity of truth, focusing on how and why we pursue (or fail to pursue) the truths about ourselves and about the people and events around us, and how and why such truths are often elusive, fragmentary, and impermanent. Normally taught through Farrand Hall. Approved for the arts and sciences core curriculum: ideals and values.

FILM 3003-3. Major Film Directors. Focuses on the work of a single director or a group of related directors. Course content varies from semester to semester. Consult the Registration Handbook and Schedule of Courses for specific topics. Course may be repeated for credit with department consent. Occasionally cross-listed with ENGL 3762.

FILM 3013-3. Women and Film. Examines the representation of women both in mainstream movies and in women's counter-cinema that resist traditional form, content, and spectator-text relationships of Hollywood models. Emphasizes work by key women filmmakers such as Margarethe von Trotta, Lizzie Borden, and Yvonne Rainer, as well as readings in feminist film theory. Approved for arts and sciences core curriculum: cultural and gender diversity.

FILM 3501-3. Film Production Management. Familiarizes students with principles of sound film management techniques as well as problem-solving methodologies developed specifically for the film industry. Emphasizes the technique of production staging as the central tool in production management as well as budget and contracts information. Offered through continuing education.

FILM 3563-3. Producing the Feature Film. Designed to give students a behind-the-scenes look at the way production in the entertainment industry is structured and works. Emphasizes the critical role the script plays in the production process. Students analyze story structure and components and production values of various feature scripts. Also focuses on roles, functions, and relationships of writer, producer, director, and editor; the budget process; and all phases in the production process. Screenings in conjunction with script analysis will also be featured. Offered through continuing education.

FILM 4003-3. Film and Fiction. Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories, and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting. Same as HUMN 4003.

**Intensive and Small**

FILM 4004-3. Film Theory. A philosophical attempt to define the nature of cinema. An intensive seminar, involving a great deal of reading in classic and contemporary film theory, and requiring a working knowledge of silent film history. Prereq.: FILM 3051. Same as HUMN 4004. Approved for arts and sciences core curriculum: critical thinking.

FILM 4604-3. Colloquium in Film Aesthetics. Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of an appropriate verbal and written language for description of film. Occasionally cross-listed with FREN 4600.

**Fine Arts**

**Electronic Media**

FINE 3230-3. Electronic Arts Survey. Explores the development of electronic media as art form through tape screenings, readings, lectures, and discussions. Prerequisite for further studies in video image processing and computer graphics.

FINE 3900 (1-3). Undergraduate Independent Study—Video.

FINE 4120-3. Computer Imaging, Studio course utilizing the personal computer in generating and processing images in the visual arts. Prereq., FINE 1002 or 1012 and familiarity with computer basics. Same as FINE 5120. Restricted to fine arts majors only.

FINE 4130-3. Multiples. Interdisciplinary course encouraging experimentation with media and integration of traditional areas of drawing, painting, sculpture, and photography. Areas covered include two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, and audio and video art. Same as FINE 5130.

FINE 4150-3. Performance/Installation. Primarily focuses on personal imagery as a live situation occurring either in invented constructed reality or real environment. Work may be individual or group configuration, and may also take on the visual linguistic form of a solo performer or of a multi-media presentation. Same as FINE 5150.

FINE 4220-3. Advanced Computer Imaging. Explores advanced techniques and concepts of digital image-making. Emphasizes the creative application of computer imaging in the production of visual art through individual projects. Prereq., FINE 4120. Restricted to fine arts majors only.

FINE 4230-3. Intermediate Electronic Arts Survey. Emphasizes video studio production techniques and basic computer graphics. Tape screenings, readings, lectures, and discussions cover development of the electronic medium as an art form. Prereq. for further studies in video image processing. Same as FINE 5230.

FINE 4240-3. Beginning Image Processing—Computer Animation. Studio course on video image processing, computer animation, and editing techniques. Explores the electronic language of analog and digital processing. Programs are stored on tape or disk. Same as FINE 5240.

FINE 4340-3. Intermediate Image Processing—Computer Animation. Explores the use of digital processing, computer animation field production, and sound processing, using a montage of theories and images for final programs stored either on disk or tape. Same as FINE 5340.

FINE 4440-3. Advanced Image Processing—Computer Animation. Primarily concerned with the conceptual realization of advanced student work and technical quality of that work. Emphasizes independent projects. Prereq., complete working knowledge of electronic lab equipment. Same as FINE 5440.

FINE 5130-3. Multiples. Same as FINE 4130.

FINE 5220-3. Advanced Computer Imaging. Same as FINE 4220.

FINE 5710 (1-3). Graduate Studio Critique. Consists of consultations with faculty on individual studio problems and projects. May be repeated for up to 6 credit hours with any single faculty member.

FINE 5840 (1-3). Graduate Independent Study—Video.

FINE 5841 (1-3). Graduate Independent Study—Film.

**Photography**

FINE 1161-2. Basic Photography 1. Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable camera. For non-art majors.

FINE 1171-3. Basic Photography 1. Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable camera. For fine arts majors.

FINE 2191-3. Intermediate Photography 1. Explores more sophisticated technical and conceptual skills to the creative process. May be repeated once. Prereq., FINE 1161 or 1171.

FINE 3191-3. Intermediate Photography 2. Continued exploration of the possibility of individual photographic expression. Students encouraged to discover and develop a personal position in relation to the medium. May be repeated once. Prereq., FINE 2191 or equivalent.

FINE 3841 (1-3). Undergraduate Independent Study—Photography.

FINE 4131-3. Introduction to Electronic Photography. Introduces and explores electronic still photography (b&w). Includes image sources:
conventional photographic materials, electronic still cameras, video and broadcast television systems, laser disk, and computer graphic systems (fractals, and paint and draw systems). Images are digitized, processed, stored, transmitted, and printed electronically. Same as FINE 5131.

FINE 4141-3. Advanced Electronic Photography. Explores electronic still photography as an art form, building on the information and experience gained in FINE 4131. Color image processing, artificial intelligence possibilities, and programming for photographers/artists are explained and used in image making. Prereq., FINE 4131. Same as FINE 5141.

FINE 4151-3. Large Format Photography. Introduces the student already skilled in black and white photography as an expressive art form to aesthetic and technical issues particular to large format photography. Explores the zone system of exposure and development and advanced creative printing controls in depth. Students develop a body of work using a large format camera. Same as FINE 5151.

FINE 4161-3. Advanced Photography. Explores advanced techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. May be repeated. Prereq., FINE 3191 or equivalent.

FINE 4171-3. New Directions in Photography. Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photoplautograph, various color processes, photolanguage, photoinstallation, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. May be repeated twice. Course content changes each semester. Prereq., FINE 2191 or equivalent.

FINE 4181-3. Advanced Photography. See FINE 4171. Prereq., FINE 2191 or equivalent.

FINE 5131-3. Introduction to Electronic Photography. Same as FINE 4131.

FINE 5141-3. Advanced Electronic Photography. Same as FINE 4141.

FINE 5151-3. Large Format Photography. Same as FINE 4151.

FINE 5161-3. Graduate Photography. Same as FINE 4161.

FINE 5171-3. Graduate New Directions in Photography.

FINE 5901 (1-3). Graduate Independent Study—Photography.

Painting/Drawing/Watermedia

FINE 1002-2. Basic Drawing. Introductory course including pictorial design, life drawing, still life, and landscape, using varied drawing techniques and media. May not be repeated.

FINE 1012-3. Basic Drawing. Required for B.F.A. majors; recommended for other fine arts majors instead of FINE 1002. May not be repeated.

FINE 1212-3. Basic Painting. Required for B.F.A. majors; recommended for other fine arts majors instead of FINE 1202. May not be repeated.

FINE 2002-3. Drawing. Problems in drawing. Exploration of possibilities in pictorial design, the human figure, and composition. May be repeated once. Prereq., FINE 1002 or 1012.

FINE 2212-3. Principles of Color. Basic introduction to the relative effects of color as used by the artist. Emphasizes the practice of color relations including basic characteristics, mixtures, illusions, optical mixture, color intervals and color quantity. May not be repeated.

FINE 2232-3. Life Painting. Oil painting from the model, landscape, and still life, concentrating on direct observation. Class must share expenses for models, materials, and transportation. Prereq., FINE 2202.

FINE 3222-3. Aspects of Painting. Lecture course providing insights into the art of painting. Contemporary painting, as well as that of the past, examined and discussed in depth.

FINE 3302-3. Watermedia Painting 1. Introduces transparent and opaque watercolor media, emphasizing problems of motivation, creative expression, and techniques involving varied subject matter. May not be repeated. Prereq., FINE 1202 or 1212.

FINE 3842 (1-3). Undergraduate Independent Study—Painting.

FINE 3852 (1-3). Undergraduate Independent Study—Drawing.

FINE 4302-3. Advanced Watermedia Painting. Advanced painting problems using transparent and opaque watercolor media, emphasizing individual development. May be repeated. Prereq., FINE 3302 or 3312.

FINE 5002-3. Graduate Drawing.

FINE 5202-3. Graduate Painting.

FINE 5302-3. Graduate Watermedia Painting.

FINE 5842 (1-3). Graduate Independent Study—Drawing.

FINE 5852 (1-3). Graduate Independent Study—Painting.

Printmaking

FINE 2403-3. Beginning Intaglio and Relief. Introduces intaglio and relief printing and printing media. May not be repeated.

FINE 2413-3. Beginning Lithography. Introduces the techniques, including metal plate lithography. May not be repeated.

FINE 2443-3. Beginning Papermaking. Papermaking is the study of plant fibers and cellulosic structure relating to the making of paper pulp as an art medium. Course emphasizes creative use of the paper pulp as related to two- and three-dimensional form. May not be repeated.

FINE 3403-3. Intermediate Intaglio and Relief. Continued study and experimentation in intaglio and relief processes in both black and white, color, and possible photo imagery. May be repeated once. Prereq., one other printmaking course.

FINE 3413-3. Intermediate Lithography. Continuation of stone and metal plate lithography with an emphasis on individual creative development and further development in color printing processes. May be repeated once. Prereq., one other printmaking course.

FINE 3423-3. Intermediate Screen Printing. Refinement of basic techniques emphasizing individual development. May be repeated once. Prereq., one other printmaking course.

FINE 3443-3. Intermediate Papermaking. Continuation of FINE 2443, with more emphasis on individual creative growth and improvement of one's technical ability. May be repeated once.

FINE 3843 (1-3). Undergraduate Independent Study—Printmaking.

FINE 4403-3. Advanced Intaglio and Relief. May be repeated. Prereq., FINE 3403.

FINE 4423-3. Advanced Screen Printing. Introduces advanced screen printing technology, emphasizing individual creativity and the ability to resolve problems of two-dimensional form. May be repeated. Prereq., FINE 3423.

FINE 4443-3. Advanced Papermaking. Continuation of FINE 3443, but with more emphasis on individual creative growth and improvement of technical ability. May be repeated. Prereq., FINE 3443.

FINE 5403-3. Graduate Intaglio and Relief.

FINE 5413-3. Graduate Lithography.

FINE 5423-3. Graduate Screen Printing.

FINE 5443-3. Graduate Papermaking.
FINE 5843 (1-3). Graduate Independent Study—Printmaking.

Sculture
FINE 1504-2. Basic Sculpture. Orientation course involving three-dimensional form and application. Experiential problems based on nonobjective form relationships in various sculptural materials. May not be repeated.
FINE 1514-3. Basic Sculpture. Required for B.F.A. majors; recommended for other fine arts majors instead of FINE 1504. May not be repeated.
FINE 2504-3. Materials and Techniques. Explores the character of a variety of materials available, and the manipulation of these materials in a broad sense. Includes lecture and studio projects. PreReq.: FINE 1504 or 1514.
FINE 2514-3. Welding and Metal Casting. Technical and aesthetic studies in welding and casting metal as an expensive idea. May not be repeated. PreReq.: FINE 1504 or 1514.
FINE 2524-3. Visual Thinking in Three-Dimensional Form. Explores ideas concerning the structure and nature of visual thinking and their relationship to the creative thought process. Also investigates forms in terms of the organizing principles of three-dimensional design and their application to contemporary sculpture. Includes lecture and studio projects. PreReq.: FINE 1514.
FINE 3514-3. Experiments in Sculpture 2. Further exploration of individual concepts and ideas and their relationship to contemporary issues and aesthetics. A series of assignments are worked out with the instructor based on individual interest. May not be repeated. PreReq.: FINE 3504.
FINE 3844 (1-3). Graduate Independent Study—Sculpture.
FINE 4504-3. Advanced Sculpture. Individual studies in selected media. May be repeated. PreReq.: FINE 3504 or 3514.
FINE 5504-3. Graduate Sculpture.
FINE 5514-3. Graduate Sculpture.
FINE 5844 (1-3). Graduate Independent Study—Sculpture.

Ceramics
FINE 1875-2. Introductory Ceramic Survey. Encourages broad and fundamental use of clay. Basic instruction and demonstration of throwing, handbuilding, and primitive clay forming methods. Investigates utility, function, and ceramics in the fine arts context. Slide presentations explore historical and contemporary attitudes involving ceramics.
FINE 2085-3. First-Year Handbuilding. Introductory course concentrating on techniques of hand-built clay forms as they relate to function and nonfunction. Various clay techniques, glazing, and firing procedures are explored. Emphasizes ceramics in a fine arts context. May not be repeated.
FINE 2095-3. First-Year Wheelthrowing. Introductory course concentrating on techniques of wheel-thrown forms as they relate to function and nonfunction. Exploration of various glazing and firing methods. May not be repeated. PreReq.: FINE 2085.
FINE 3085-3. Intermediate Ceramics. Deals with further exploration of techniques approached in FINE 2085 and 2095. Students are encouraged to develop personal concentration in relation to medium. May be repeated once. PreReq.: FINE 2085 and 2095.
FINE 3845 (1-3). Undergraduate Independent Study—Ceramics.
FINE 4095-3. Ceramics Seminar. Designed for students majoring in ceramics. May be repeated; not to exceed 9 hours credit. PreReq.: FINE 4085.
FINE 5075-3. Graduate Ceramics.
FINE 5085-3. Graduate Ceramics.
FINE 5845 (1-3). Graduate Independent Study—Ceramics.

Art Teacher Certification
Studio majors desiring teaching certification are required to take FINE 3646, 3656, 3676, and 3686, and must consult the art certification advisories concerning the remainder of the program.
FINE 3626-2. Teaching Art in the Elementary Classroom. For students seeking elementary school certification. Not for art majors; course does not count in the first 94 hours presented for the B.A. and B.F.A. degrees. Students may not receive credit in both FINE 3626 and FINE 3636. PreReq.: Junior standing.
FINE 3636-2. Art for the Elementary Teacher. For persons planning to teach at the elementary level. Theoretical and practical elementary art methods for the non-art major are covered. Through continuing education only.
FINE 3646-2. Art in the Elementary Schools. For art majors wishing to receive certification for teaching art in public elementary schools. Deals with theoretical and practical problems of teaching art in the elementary school and provides an opportunity for in-school observation of elementary art instruction.
FINE 4626-2. Electronic Media Applications in Art Education. Introduces students seeking certification as art teachers to a variety of computer and video applications in teaching art in grades kindergarten through 12. Includes methods of developing computer-aided instruction, interactive video programming, desktop publishing, and student skills testing. PreReqs.: FINE 3646 and 3686, or instructor consent.
FINE 4706-6. Teaching in Art. Supervised teaching in art in grades kindergarten through 12. Three hours do not count toward student hours in the major nor in the maximum departmental hours allocated on assignments with EDUC 4701 and 4712. The credit is pass/fail only. PreReq., admission to the teacher education program in art.

Seminars/Special Topics
FINE 1047-3. Art Lecture. Develops awareness of art form from a nonhistorical perspective. Topics include technical aspects of painting and sculpture, origins and development of photography, theory of art values, and art criticism.
FINE 2097 (2-3), 3097 (2-3), 4097 (2-3), 5097 (2-3). Special Topics. Introduces timely subjects in fine arts that cannot be offered on a regular basis. Information concerning topics offered in any given semester will be available prior to pre-registration from the Department of Fine Arts. May be repeated.
FINE 2127 (1-5), 3127 (1-5), 4127 (1-5), 5127 (1-5). Contemporary Issues and Images/Summer Workshop Courses. Offered in summer only. Intensive studio courses with a solid grounding in one of the less imaging art forms (still photography, video, or film). Taught by a nationally recognized artist or critic using the workshop format. Consists of individual and group discussions, critique sessions, field work, and lectures about the work, and ideas of the visiting instructor, as well as other discipline-related ideologies.
FINE 3847 (1-3), 3857 (1-3). Independent Study.
FINE 3937 (1-6). Internship. Gives upper-division students the opportunity to work in public or private organizations relating to their career goals, and allows them to explore the relationships between theory and practice in their major.
FINE 4087-3. Selected Topics in Contemporary Art. Selective study of significant areas of visual art of the last decade including major critical opinions. PreReq., twenty hours of fine arts courses. Same as FINE 5087.
FINE 4117-3. B.F.A. Seminar. For students intending to pursue graduate work and/or professional careers in art. Emphasizes development of critical thinking and evaluation of methods of instruction and how they relate to the problems of professional activity. PreReq., B.F.A. candidate.
FINE 4137-3. Fine Arts Gallery Operations. Designed to introduce and involve the student in...
the operation of a visual arts gallery. Students study theoretical constructs guiding the field and receive hands-on experience helping run the CU Art Galleries. Students assist with installations, marketing, and special events. Same as FIN5 0137.

FIN5 087-3. Selected Topics in Contemporary Art. Same as FIN5 4087.

FIN5 117-2. Graduate Art Seminar.

FIN5 137-3. Fine Arts Gallery Operations. Same as FIN5 4137.

FIN5 5847 (1-3). Graduate Independent Study—Nonstudio.

FIN5 5857, 5867 (1-3). Graduate Independent Study.

FIN5 6947 (1-3). Master’s Degree Candidate.

FIN5 6957 (1-6). Master of Fine Arts Creative Thesis.

Visiting Artist Program
FIN5 4118-3. Visiting Artist Program. Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts. May be repeated once. Prereq., portfolio review for undergraduates. Same as FIN5 5118.

FIN5 5118-3. Graduate Visiting Artist Program. Same as FIN5 4118.

Art History
Some of the following courses are offered at both the undergraduate (4000) and graduate (5000) levels. A higher level of performance and extra work is expected of the graduate student. Session may take 5000-level courses only after consultation with the instructor.

FIN5 1109-3. Introduction to Western Art 1. Introduces Western art, from the early dynamic period of Egypt (c. 3000 B.C.) to the end of the twentieth century A.D. Traces the expansion of European culture, painting, sculpture, and architecture in order to develop an awareness of how our artistic culture is derived from European civilization. Approved for arts and sciences core curriculum: literature and the arts.

FIN5 1209-3. Introduction to Western Art 2. Introduces Western art, from about 1600 A.D. to the present. Traces the expansion of European culture, painting, sculpture, and architecture in order to develop an awareness of how our artistic culture is derived from European civilization. Approved for arts and sciences core curriculum: literature and the arts.

FIN5 1709-3. Experiencing Art—Image, Artist, and Idea. Provides a broad introduction to understanding and appreciation of art from all time periods and all parts of the world. Particularly directed to nonmajors. Approved for arts and sciences core curriculum: literature and the arts.

FIN5 2009-3. Introduction to Asian Art. Designed for those having no previous experience in the study of Asian art. Traces development of sculpture, painting, architecture, and the other visual arts of South Asia, the Far East, and Southeast Asia, especially as they are connected by the religious themes of Hinduism and Buddhism. Approved for arts and sciences core curriculum: literature and the arts.

FIN5 2500-3. Contemporary Painting, Sculpture, and Intermedia Arts. Investigates the loss of beauty in art and discusses whether or not that loss is regrettable. A question of equal importance will be the function and historical meaning of modern and postmodern art. Is it all hype and strategic positioning by artists for fame and fortune? Is it serious? Are the fine arts still fine?

FIN5 3209-3. Art, Culture, and Gender Diversity, 1400-1600: Renaissance Art out of the Canon. Studies the rising status of painting, sculpture, and architecture in Europe and how European perceived non-western art during the early modern period. Introduces history of race/ethnicity, gender, and class concerns embodied in the European category "visual arts." Emphasizes new methods for interpreting history without imposing Eurocentric viewpoints. Approved for arts and sciences core curriculum: cultural and gender diversity.

FIN5 3509-3. American Art. Survey American art and material culture from the pre-Colonial era to the present day. Considers cultural and artistic interaction, ethnic expressions, patronage, European and non-western influences, and the struggle to develop a uniquely American artistic identity. Approved for arts and sciences core curriculum: United States context.

FIN5 4009-3. Art of the Ancient Near East. Surveys architecture, sculpture, and painting of the eastern Mediterranean from their beginnings to the end of the Sasanian Empire to include the arts of Anatolia, Mesopotamia, and Persia. Same as FIN5 5009, CLAS 4009, and CLAS 5009.

FIN5 4019-3. Art of Ancient Egypt. Surveys the development of Egyptian architecture, sculpture, painting, and the minor arts from their beginnings until the establishment of Christianity. Same as FIN5 5019, CLAS 4019, and CLAS 5019.

FIN5 4029-3. Art of Islam. Art and architecture of the Islamic period from the death of Muhammad through the eighteenth century from Spain to India. Same as FIN5 5029.

FIN5 4039-3. Byzantine Art. Art of the East Christian Empire from the accession of Constantine to the conquest of Constantinople with a synopsis of developments from 1453 through the eighteenth century. Same as FIN5 5039 and CLAS 4039.

FIN5 4049-3. Pre-Classical Art and Archaeology. Same as FIN5 5049 and CLAS 4049.

FIN5 4059-3. Classical Art and Archaeology. Same as FIN5 5059 and CLAS 4059.

FIN5 4079-3. Roman Art and Archaeology. Same as FIN5 5079 and CLAS 4079.

FIN5 4109-3. Early Christian and Early Medieval Art. History of European art from Constantinople to around the year 1000 with primary emphasis on Western Christian, Hilberto-Saxon, Carolingian, Ottonian, and Anglo-Saxon art, but including barbarian and Byzantine contributions. Same as FIN5 5109.

FIN5 4119-3. Romanesque Art. History of European art of the eleventh and twelfth centuries treating architecture, sculpture, fresco painting, and manuscript illumination. Same as FIN5 5119.

FIN5 4129-3. Gothic Art. History of European art from the mid-thirteenth to the sixteenth century treating architecture, sculpture, stained glass, and manuscript illumination with special emphasis on developments in France, England, and Germany. Same as FIN5 5129.

FIN5 4139-3. Italian Gothic Art. Development of Italian painting, sculpture, and architecture from about 1200 to 1450 A.D., including interactions with northern Europe and the so-called proto-Renaissance. Same as FIN5 5139.

FIN5 4209-3. Italian Renaissance Art 1: Italian art and architecture from 1400 to the death of Donato di Donaello (1465), emphasizing the development of Renaissance art in Florence and central Italy. Same as FIN5 5209.

FIN5 4219-3. Italian Renaissance Art 2. Italian art and architecture from about 1470 to 1520, including the diffusion of Renaissance ideas throughout Italy, and the development of the high Renaissance in central Italy and Rome. Same as FIN5 5219.

FIN5 4229-3. Italian Renaissance Art 3. Italian painting, c. 1550-1610, focusing on current debates over interpretation of art produced in the wake of the Counter Reformation. Examines the foundations of devotional painting in the sciences and the literary tradition, from Michelangelo’s late work until the foundation of the Carracci Academy in Bologna and Rome. Same as FIN5 5229. Prereq., FIN5 3509.

FIN5 4239-3. Art and Architecture in Italy, 1560-1750. Traces the development of Italian art from the last gasps of manicheism through the barocchetto style of Tiepolo. Same as FIN5 5239.

FIN5 4259-3. Northern European Painting. History of painting in the Netherlands, France, and Germany in the fifteenth and sixteenth centuries. Same as FIN5 5259.

FIN5 4269-3. Art in France, 1500-1750. Examines the developing French style through various foreign influences, the impact of classicism, and finally the effrontery of that uniquely French expression, the rococo, and its reflections in Germany and Austria. Same as FIN5 5269.

FIN5 4279-3. Michelangelo (1475-1564). Focuses on Michelangelo’s long career, marked by outstanding achievements in sculpture, painting, architecture, and poetry. Emphasizes his projects and achievements in light of sixteenth-century artistic theory, including relationship to his contemporaries in the arts and literature. Prereq., FIN5 2209 and one other art history course. Same as FIN5 5279.

FIN5 4309-3. Neo-classicism and Romanticism, 1760 to 1840. Surveys painting and sculpture in England and France from the last quarter of the eighteenth century through the first half of the nineteenth century. Same as FIN5 5309.

FIN5 4319-3. European Art from 1830 to 1886. Surveys the major movements in painting
in France and England from the Revolution of 1830 to the impressionism crisis of 1886. Although the emphasis is on painting, major expression in sculpture and architecture are also discussed. Same as FINE 5319.

FINE 4329-3. Modern Art 1. In-depth study of the fine de siècle, stressing post-impressionism, art nouveau, and symbolism. Course closes with fauvism in France and the expressionist movement in Germany. Same as FINE 5329. Approved for arts and sciences core curriculum: literature and the arts.

FINE 4339-3. Modern Art 2. Emphasizing the various "isms" of the twentieth century, course begins with early Picasso and cubism, including analytic and synthetic cubism. Also studied are Italian futurism, de Stijl and the Bauhaus, dada, and surrealism. Same as FINE 5339.

FINE 4349-3. Modern Architecture. Surveys world contemporary architecture from its beginnings with Richardson and Wright to the present.Same as FINE 5349.

FINE 4409-3. Art of Africa and Oceania. Covers native arts of non-western peoples of Africa and Oceania, including sculpture, architecture, and minor arts for both archaeological and ethnological cultures. Emphasizes the function of art in society as well as aesthetic analysis. Same as FINE 5409.

FINE 4419-3. Pre-Columbian Art. Surveys architecture, sculpture and painting of the high cultures of Meso-American and Andean areas before the Spanish Conquest. Same as FINE 5419.

FINE 4429-3. Latin American Art since 1492. Surveys arts of the colonies of Spain and Portugal in the Western Hemisphere from 1492 to the present. Same as FINE 5429.

FINE 4439-3. North American Indian Art. Surveys art of North American Indian cultures, including the northwest coast, southwest, southeast, northeast, and plains, covering architecture, sculpture, and minor arts for both archaeological and ethnological cultures. Same as FINE 5439.

FINE 4449-3. Art of India and Southeast Asia. Surveys the architecture, sculpture, and painting of India and those areas of Southeast Asia influenced by India from the period of Mahenjo Dano and Harappa to recent times. The Hindu-Mayan region is treated, as is Tantric art in general. Same as FINE 5449.

FINE 4459-3. The Arts of Japan. Appreciation and chronological development of the arts of Japan. Emphasizes the arts of Shintoism and Buddhism as well as the particular Japanese aesthetic from prehistoric times to the present. Same as FINE 5459.

FINE 4469-3. The Arts of China. Surveys Chinese painting, sculpture, architecture, and other arts from neolithic to modern times. Same as FINE 5469.

FINE 4509-3. American Art Before the Civil War. Examines painting, sculpture, architecture, and folk art in the new world. Considers cultural and artistic interaction between Indians, Hispanics, and Anglos in eastern and southwestern America, and the struggle to develop a uniquely American artistic identity before the Civil War. Same as FINE 5509.

FINE 4519-3. American Art: 1860-1945. Examines such American art as painting, sculpture, architecture, photography, parks, and fairs from the Gilded Age to World War II. Considers major art styles, women and minority artists, the development of art schools and museums, and cultural interaction between America and other countries. Same as FINE 5519.

FINE 4609-3. Roots of the Italian Renaissance. Begins with the arts of the so-called proto-Renaissance in the later thirteenth and early fourteenth centuries, with visits to major monuments in Tuscany and the Veneto. Continues with Tuscan art and architecture until about 1440 in Florence. Offered abroad only. Same as FINE 5609.

FINE 4619-3. Quattrocento Art in Florence and Central Italy. Commences with monuments of the so-called second renaissance style about 1440 around Florence. Deals with the later Ghiberti and Donatello, the work of Leon Battista Alberti, and the painting of Castagno, Piero della Francesca, Botticelli, Filippino Lippi, and others, ending in the late Quattrocento. Offered abroad only. Same as FINE 5619.

FINE 4629-3. Monuments of the High Renaissance. Begins with first stirring of the High Renaissance in Florentine art and architecture around 1480, continues to 1525 in Rome and central Italy, and deals with monumental art and architecture in Venice and the Veneto from about 1480 to 1580. Offered abroad only. Same as FINE 5629.

FINE 4639-3. Mannerist Painting and Sculpture. Investigation of mannerism in Italian art and architecture, beginning with "anti-classicism" in Tuscan painting around 1515, continuing with mannerist art in Rome until 1527 and in Parma and Mantua until about 1540, and ending with art of the bella maniera in Florence. Offered abroad only. Same as FINE 5639.

FINE 4649-3. The Renaissance in Rome. Works of art produced in Rome between circa 1450 and 1600 are studied by attending on-site lectures that deal with style and intellectual and social contexts, and by writing extensively about works of art. Offered abroad only. Same as FINE 5649.

FINE 4659-3. The Roman Baroque. Traces main stylistic trends, along with appropriate intellectual and social contexts, for Roman art of the seventeenth and eighteenth centuries. Classroom and on-site lectures as well as techniques appropriate to writing about the visual arts are emphasized. Offered abroad only. Same as FINE 5659.

FINE 4669-5. Asian Arts in Context: Study Abroad. Travel, readings, short analysis papers, oral reports, examinations, and seminar meetings plus lectures bring Asian arts to life as major Buddhist, Hindu, and Islamic monuments are visited and discussed in ways that are possible only in the field. Offered abroad only.

FINE 4709-3. Perspectives on Art and Criticism. Examines some traditional and current ideas that have shaped, defined, or influenced the goals, practices, and evaluation of the visual arts. Lectures, readings, and discussion. Open to fine arts majors or students with 9 or more hours in art. Same as FINE 5709.

FINE 4719-3. History of Media Arts. Surveys the development of technological media both as sources of information and as art. Photography and related media, film, video, holography, and electronic imaging systems are surveyed as art and as technologies, emphasizing major artists, movements, exhibition, and other production in the nineteenth and twentieth centuries.

FINE 4729-3. Readings: Issues in Contemporary Photography. Includes reading some of the critical and theoretical discourse surrounding the practice of photography and related art forms. Work is made in dialogue with ideas raised in those readings. Preq., FINE 2191 or 3191.

FINE 4739-3. The Intellectual Roots of Italian Renaissance Art. Overview of critical issues raised in the literature on art, focusing on renaissance interpretations of key historical themes such as imitation and decorum. Carefully examines the language used in primary sources (available in English). Approved for arts and sciences core curriculum: critical thinking.

FINE 4809-3. Women Artists From the Middle Ages to the Present. Surveys women's art in the west, emphasizing painting and sculpture. Same as FINE 5809 and WMST 4809. Approved for arts and sciences core curriculum: cultural and gender diversity.

FINE 4909 (1-3). Independent Study—Art History.

FINE 4919-3. Undergraduate Seminar: Selected Topics in Art History. Seminar course dealing with selected areas or problems within the history of art. Consult current Registration Handbook and Schedule of Courses for seminar topic.

FINE 4929 (1-3). Special Topics in Art History. Same as FINE 5929.

FINE 5009-3. Art of the Ancient Near East. Same as FINE 4009 and CLAS 5009.
FINE 5019-3: The Art of Ancient Egypt. Same as FINE 4019 and CLAS 5019.

FINE 5029-3: Art of Islam. Same as FINE 4029.

FINE 5039-3: Byzantine Art. Same as FINE 4039 and CLAS 5039.

FINE 5049-3: Pre-Classical Art and Archaeology. Same as FINE 4049 and CLAS 5049.

FINE 5059-3: Classical Art and Archaeology. Same as FINE 4059 and CLAS 5059.

FINE 5069-3: Prehistoric Greek Art and Archaeology. In-depth study of the Lithic and Bezoic Age Aegean (c. 7000-1200 B.C.). Topics selected from architecture, pottery, frescoes, and minor arts of the third millennium B.C. Same as CLAS 5069.

FINE 5079-3: Roman Art and Archaeology. Same as FINE 4079 and CLAS 5079.

FINE 5089-3: Classical Greek Art. Same as CLAS 5089.

FINE 5109-3: Early Christian and Early Medieval Art. Same as FINE 4109.

FINE 5119-3: Romanesque Art. Same as FINE 4119.

FINE 5129-3: Gothic Art. Same as FINE 4129.

FINE 5139-3: Italian Gothic Art. Same as FINE 4139.

FINE 5159-3: Hellenistic Art and Archaeology. Same as CLAS 5159.

FINE 5209-3: Italian Renaissance Art 1. Same as FINE 4209.

FINE 5219-3: Italian Renaissance Art 2. Same as FINE 4219.

FINE 5229-3: Italian Renaissance Art 3. Same as FINE 4229.

FINE 5239-3: Art and Architecture in Italy, 1500-1750. Same as FINE 4239.

FINE 5249-3: Northern European Painting. Same as FINE 4249.

FINE 5259-3: Art in France, 1500-1750. Same as FINE 4259.

FINE 5269-3: Michelangelo (1475-1564). Same as FINE 4269.

FINE 5279-3: Neoclassicism and Romanticism 1760-1840. Same at FINE 5309.

FINE 5319-3: European Art from 1830 to 1886. Same as FINE 4319.

FINE 5329-3: Modern Art 1. Same as FINE 4329.

FINE 5339-3: Modern Art 2. Same as FINE 4339.

FINE 5349-3: Modern Architecture. Same as FINE 4349.

FINE 5409-3: Art of Africa and Oceania. Same as FINE 4409.

FINE 5419-3: Pre-Columbian Art. Same as FINE 4419.

FINE 5429-3: Latin American Art since 1492. Same as FINE 4429.

FINE 5439-3: North American Indian Art. Same as FINE 4439.

FINE 5449-3: Art of India and Southeast Asia. Same as FINE 4449.

FINE 5459-3: The Arts of Japan. Same as FINE 4459.

FINE 5469-3: The Arts of China. Same as FINE 4469.

FINE 5509-3: American Art before the Civil War. Same as FINE 4509.

FINE 5539-3: Contemporary Art: 1970 to the Present. Same as FINE 4539.

FINE 5549-3: Contemporary Public Art. Same as FINE 4549.

FINE 5609-3: Roots of the Italian Renaissance. Same as FINE 4609.

FINE 5619-3: Quattrocentro Art in Florence and Central Italy. Same as FINE 4619.

FINE 5629-3: Monuments of the High Renaissance. Same as FINE 4629.

FINE 5639-3: Mannerism Painting and Sculpture. Same as FINE 4639.

FINE 5649-3: The Renaissance in Rome. Same as FINE 4649.

FINE 5659-3: The Roman Baroque. Same as FINE 4659.

FINE 5709-3: Perspectives on Art and Criticism. Same as FINE 4709.

FINE 5809-3: Women Artists From the Middle Ages to the Present. Same as FINE 4809.

FINE 5909 (1-3): Graduate Independent Study—Art History.

FINE 5929-3: Special Topics: Art History/Criticism. Subjects and instructors vary. Same as FINE 4929.

FINE 5969 (1-3): Graduate Project.

FINE 6009 (1-3): Graduate Independent Study—Art History.

FINE 6199-3: Seminar: Tools of Research. Required for M.A. (art history) candidates. Discusses fundamental problems in art history and theory. Emphasizes definining problems for research study and systematically acquire and present written evidence. Studies sources and bibliographic materials pertaining to art. Requirements in oral and written presentations in the seminar, including the preparation and use of visual aids.

FINE 6299-3: Seminar: Theories of Art History. Required for M.A. (art history) candidates. Systematic critical overview of the development of art history as a discipline since its inception in the eighteenth century. Topics of aesthetics and cultural interpretations. Weekly readings, discussions, reports, and written papers constitute the format of this seminar methodology.

FINE 6399-3: Graduate Seminar: Open Topics in Art History. Subjects and topics vary.

FINE 6494 (1-3): Master’s Candidate for Degree.

FINE 6959 (1-6): Master’s Thesis (Art History).

French and Italian

French

FREN 1010-5: Beginning French 1. For students with no previous knowledge of French. Introduces basic grammar and most commonly used vocabulary of French.

FREN 1020-5: Beginning French 2. Completion of presentation of most basic structures and vocabulary of French. Prereq., completion of one semester of college-level French or one year of high school French.

FREN 1050-5: Beginning French Review. Covers the material of FREN 1010 and 1020 in one accelerated semester. Intended for students who know some French (e.g., one or two years in high school) but do not have skills adequate for 2000-level courses. Students may not receive credit for FREN 1050 if they have completed FREN 1010 or FREN 1020.

FREN 1600-3: Introduction to French Film. History and evolution of French film from Lumière to today. Scripts and modern literary texts used as reference points for studying narrative structure in both literature and film. Handouts of technical terms and critical theory supplement readings. Taught in English.

FREN 2110-3: Second-Year French Grammar Review and Reading 1. Intensive review of important grammar structures. Introduces literary and cultural readings as well as writing compositions in French. Prereq., completion of two semesters of college-level French or equivalent. Completes college undergraduate language requirement.

FREN 2120-3: Second-Year French Grammar Review and Reading 2. Expands detailed study of grammar begun in FREN 2110. Continued reading in French literature and culture, considerable practice in writing and speaking French. Prereq., completion of two semesters of college-level French or equivalent.

FREN 3010-3: French Phonetics and Pronunciation. Training in correct pronunciation of standard French through understanding of the function of speech organs. International phonetic alphabet learned and used throughout the course; intensive practice in class and language laboratory. Required of all majors. Prereq., FREN 2120 or equivalent.

FREN 3050-3: French Composition 1. Third-year grammar course where students perfect their written French through written grammar exercises and guided composition. Should be taken before FREN 3060. Required for French majors. Prereq., completion of FREN 2120 or equivalent.

FREN 3600-3. French for Business 1. Designed primarily for students in business French who have not spent time in a French-speaking milieu; those with some experience should take FREN 4050. Concentrates on composing business letters and conducting business in French. Prereq., FREN 3060 or equivalent. Courses at the 4000 level or above are not open to freshmen or sophomores.

FREN 4030-3. Advanced Oral Practice and Interpreting. Intended for students who have spent six months or more in a French-speaking milieu. Concentrates on developing (or preserving) speaking fluency, correct pronunciation, and a good working vocabulary. Prereq., FREN 3060 or equivalent. May be repeated.

FREN 4050-3. French for Business 2. Prereq., FREN 3600 or consultation with instructor.

FREN 4100-2. Translation. Students should have passed FREN 4010 or consulted instructor. Prereq., for all of the following courses are FREN 3110 and 3120, or consultation with instructor.

FREN 4110-3, 4120-3. French Special Topics. Topics vary each semester. Students should consult the Registration Handbook and Schedule of Courses for specific topics. Each course may be repeated for different topics up to a maximum of 6 credits.

FREN 4140-3. Introduction to Old French. Introduces the structure of Old French, the medieval ancestor of modern French. Students must have a good knowledge of modern standard French, knowledge of Latin helpful, but not required. No previous knowledge of linguistics required.

FREN 4200-3. Studies in Contemporary French Culture. Through a wide variety of texts and audio-visual documents, students learn the structures of contemporary French society and study the cultural phenomena of that society.

FREN 4210-3. French Cultural History. Studies the main currents of French culture from Louis XIV to the end of the First World War showing how they have evolved in response to changes in society rather than as a series of discrete historical events.

FREN 4330-3. Molière and Seventeenth-Century French Comedy. Treats the complete theater of Molière plus the comedies of Mairct, Saint-Sorlin, Saint-Evremond, Rotrou, Scarron, and Cyrano de Bergerac.

FREN 4350-3. French Enlightenment.

FREN 4490-3. Women Novelists of the Twentieth Century in France. Major aspects of the twentieth-century novel in France through works written by women. Gives historical perspective, studies a number of novels, and emphasizes works written since 1968, a turning point. Discusses relevance of women's writings today.

FREN 4510-3. French Dramatic Theories. Studies French dramatic theories since the sixteenth century, using representative plays as illustration of theoretical works.

FREN 4600-3. Topics in French Film. Covers various topics in the French and some other Francophone cinemas (Belgian, Swiss, Quebecois) from 1895 to the present. The periods, schools, themes, and directors from Melies to Duras, and the critical approaches by which they are studied. Varies from year to year. Course may be repeated for different topics up to a maximum of 6 credits. Prereqs., junior standing and 6 hours in French literature or other literature or film studies. Same as FILM 4606.

FREN 4750-3. Methods of Teaching French and Professional Orientation. To be taken one semester prior to or concurrently with student teaching.

FREN 4840 (1-3). Independent Study: Language. Upon consultation only. Undergraduate level.

FREN 4850 (1-3). Independent Study: Literature. Upon consultation only. Undergraduate level.

FREN 4960-6. High School French Teaching. Part of the supervised student teaching in a secondary school required for state certification to teach French. These hours do not count toward student hours in the major nor in the maximum departmental hours allowed. The credit is pass/fail only. Prereq., FREN 4750; must be admitted to the secondary teaching education program and currently in EDUC 4712. Prereq. for all of the following courses is graduate standing or instructor consent.

FREN 5080-3. Introduction to Old French.

FREN 5110, 5120-3. French Special Topics. Different topics are offered and, in a number of cases, cross-listed with other departments.

FREN 5160-3. Modern Canadian Fiction. Introduces the most significant works of a representative and broad selection of both Anglophone and Francophone Canadian fiction writers of the twentieth century—modern and postmodern, traditional and experimental. Prereq., graduate standing in French or comparative literature.

FREN 5350-3. French Enlightenment.

FREN 5430-3. Topics in Nineteenth-Century French Prose.

FREN 5440-3. Literary Ludics. Taught in French and English. Focuses on literary structures proposed by author to reader as games. Considers critical texts, both practical and theoretical, with a view toward defining the relation between criticism and its objects. Prereq., B.A. in French or instructor consent.

FREN 5490-3. Women Novelists of the Twentieth Century in France.
ITAL 2130-3. Italian Short Story. Acquaints students with the short story as a literary genre through the study of its tradition and evolution in Italy from the Middle Ages to the nineteenth century. Taught in English.

ITAL 3120-3. Readings in Italian Literature 1. Studies selected masterpieces of the Middle Ages, the Age of Humanism, the Early and High Renaissance, and the Baroque periods. Students should have passed ITAL 2120 or have instructor consent. Taught in Italian.

ITAL 3130-3. Readings in Italian Literature 2. Studies selected masterpieces from the eighteenth, nineteenth, and twentieth centuries, with special emphasis on contemporary literature. Students should have passed ITAL 2120 or have instructor consent. Taught in Italian.

ITAL 3210-3. Advanced Conversation and Composition 1. Devoted to assigned translations and compositions with discussion of grammatical and stylistic problems encountered, and to conversation at an advanced level. Students should have passed ITAL 2120 or have instructor consent.

ITAL 3220-3. Advanced Conversation and Composition 2. Continuation of ITAL 3210. Consult instructor.

ITAL 4110-3. Dante: Inferno and Paradiso. The first two cantos of the Divine Comedy are studied against the background of the culture, politics, and society of the high Middle Ages. Consult instructor.

ITAL 4200-3. Italian Culture and Civilization from Origins through the Renaissance. Taught in English.

ITAL 4250-3. History of Italy: 1815 to Present. Surveys political, social, and intellectual history of Italy from 1815 to present. Taught in English.

ITAL 4280-3. Italian Cinema: From Twentieth-Century Novel to Film. Analyzes the translation of Italian twentieth-century novels to film with focus on the changes and reinterpretation of the plot, characters, themes, and vocabulary and analytical perspectives for the two art forms. Taught in English; readings in Italian for Italian majors.

ITAL 4700-3. Dante: Paradiso, La Vita Nuova, and Minor Works.

ITAL 4710-3. Italian Literature of the Nineteenth Century. Focuses on the pre-Romantics, Italian Romanticism, Verismo, and Decadenzismo literary and cultural movements, particularly in their European context. Taught in English; readings in Italian for Italian majors.

ITAL 4720-3. Italian Literature of the Twentieth Century. Studies Italian novel, theatre, poetry, and short story in the period from World War I to the present. Taught in English; readings in Italian for Italian majors.

ITAL 4840-1. Independent Study.

Geography

GEOG 3840-1. Undergraduate Independent Study. By special arrangement with faculty. Only for students presenting strong geography preparation.

GEOG 3930-3. Internship. Provides an academically supervised opportunity for advanced geography or environmental conservation majors to work in public and private organizations on projects related to the student's career goals and to relate classroom theory to practice.

GEOG 4160-3. Teaching Geography. Practicum and/or tutorial, by special arrangement only, in the teaching of geography. Includes serving as small-group leaders or tutors in introductory courses or developing and/or testing curriculum materials.

GEOG 4990-3. Senior Thesis. Thesis research under faculty supervision. Open only to qualified senior geography majors and environmental conservation majors.

GEOG 5840-1. Graduate Independent Study. Independent research for master's student only.

GEOG 5930-3. Advanced Internship. Provides an academically supervised opportunity for graduate-level geography majors to work in public and private organizations on advanced projects related to geographic theory and to their career goals.

GEOG 6160-3. Seminar: Geographic Education. Survey and critique of ideas from education, psychology, philosophy, and geography related to teaching and learning, especially for graduate students in geography who plan careers in college teaching.

GEOG 6180-3. Seminar: Geographic Problems. Applies research methods to selected problems. Instructor and topic vary. Course may be repeated under different topics with advisor's approval.

GEOG 6190-1-3. Experimental Teaching in Geography. Advanced graduate students in geography experiment with new course content or structures, instructional objectives, curriculum materials, evaluation devices, communication skills, etc.

GEOG 6940-3. Master's Degree Candidate.

GEOG 7840 (1-3). Graduate Independent Study. Independent research for doctoral students only.

GEOG 8990-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of this catalog.

Physical Geography

GEOG 1001-4. Environmental Systems 1—Climate and Vegetation. Lect. and lab. Introduces the atmospheric environment of the Earth: elements and controls of climate and their implications for hydrology, vegetation, and soils. Emphasizes distribution of physical features across the Earth's surface and interactions between humans and their environment, especially those leading to global change on the timescale from century to time scale. Approved for arts and sciences core curriculum: natural science.

GEOG 3191-3. Atmospheric Science 1: Meteorology. Topics vary from year to year and may include weather-map analysis and prediction, weather modification, severe storms, air quality, and regional weather. Same as APAS 3190. Approved for arts and sciences core curriculum: natural science.

GEOG 3201-3. Atmospheric Science 2: Climatology. Topics vary from year to year and may include climatic change, snow and ice, mountain weather and climate, and applied climatology. Same as APAS 3200. Approved for arts and sciences core curriculum: natural science.

GEOG 3251-3. Mountain Geography. Surveys mountain environments and their human use with illustrations from temperate and tropical mountain areas.

GEOG 3321-3. Geocology of Alpine and Arctic Regions. Comparisons and contrasts in natural sciences of alpine and arctic regions—biogeography, climatology, geomorphology. Examines concept geocology as applied to cold-stressed environments. Includes one or two local field trips.

GEOG 3511-4. Introduction to Hydrology. Examines hydrologic processes in the surface environment, emphasizing the environment of the western United States. Emphasizes natural processes and their management to augment water resources. Students may not receive credit for this course and GEOL 4040 or 5040. Approved for arts and sciences core curriculum: natural science.

GEOG 4211-3. Physical Climatology—Principles. Introduces physical principles of flows of heat and moisture to and from the Earth's surface, interaction and modeling of such flows, and their distribution in space and time.

GEOG 4221-3. Physical Climatology—Applied. Examines applications of principles of physical climatology in areas such as water balance, agriculture and forestry, and urban climatology.

GEOG 4291 (3-4). Mountain Geomorphology. Field course emphasizing study of landforms produced by weathering and soils, mass movement, and erosional processes under all climatic and alitudinal conditions. Offered during the summer at the Mountain Research Station. Same as GEOG 5291, GEOL 4291, and GEOL 5291.

GEOG 4321-3. Snow Hydrology. Multidisciplinary and quantitative analysis of hydrologic processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphosis, ablation, chemical properties, biologic and, electromagnetic properties, remote sensing, GL and quantitative methods. Prereq.: GEOG 1001 or GEOG 1011 and any parametric statistics. Same as GEOG 5231.

GEOG 4331 (3-4). Mountain Climatology. Survey and analysis of climatic characteristics of selected mountain environments and their study in the field; emphasis on Rocky Mountains. Offered during the summer at the Mountain Research Station. Same as GEOG 5331.

GEOG 4371-3. Forest Geography: Principles and Dynamics. Surveys principles of forest geography and ecology. Both individual tree responses to environmental factors and species interactions within communities are included. Emphasizes forest dynamics and their relation to management problems. Same as GEOG 5371.

GEOG 4501-3. Water Resources and Water Management of Western United States. Interpretation and analysis of hydroclimatic data, surface, and groundwater. Water use is critically evaluated emphasizing problems associated with geographic misdistribution, appropriations, irrigation, industry, pollution, and regional development. Same as GEOG 5501.

GEOG 5161-3. History and Nature of Physical Geography. Development of geographical ideas leading to contemporary methodological issues and reviews of selected research frontiers in physical geography. Most attention given to activity in physical geography in North America since 1945.

GEOG 5211-3. Seminar: Physical Climatology. Research seminar concerned with problems of mass and energy exchange in the Earth-atmosphere system. Topics selected from such areas as air quality, bioclimatology, hydrology, climate change, and the climates of urban, agricultural, and natural environments.

GEOG 5241-3. Topics in Physical Geography. (Precise title specified in the Registration Handbook and Schedule of Courses.) Recent research topics that vary from year to year. May be taken twice.

GEOG 5291 (3-4). Mountain Geomorphology. Field course emphasizing study of landforms produced by weathering and soils, mass movement, and erosional processes under all climatic and alitudinal conditions. Same as GEOG 4291.

GEOG 5321-3. Snow Hydrology. Same as GEOG 4321.

GEOG 5331-4. Mountain Climatology. Same as GEOG 4331.

GEOG 5371-3. Forest Geography: Principles and Dynamics. Same as GEOG 4371.

GEOG 5391-3. Seminar: Biogeography. Detailed consideration of current research themes in biogeography. Intensive reading of current research literature and preparation of research papers. May be taken twice, as the topics vary.

GEOG 5501-3. Water Resources and Water Management of Western United States. Same as GEOG 4501.

GEOG 5961-3. Theories of Climate and Climate Variability. Critical review of current theories of climatic variability based on analysis of the different physical processes affecting climate. Same as APAS 5960.

GEOG 6261-3. Readings in Climatology. Selected topics in current climatological literature discussed in seminars. Specific themes vary but may include aspects of microclimatology, paleoclimatic reconstruction, and climatic applications of satellite data.

GEOG 6241 (1-3). Seminar in Hydrology and Geomorphology. Emphasizes process-oriented research in hydrology and geomorphology. Sample topics include river mechanics, snow hydrology, and periglacial processes. See the Registration Handbook and Schedule of Courses for specific title. May be taken twice. Same as GEOL 6241.

GEOG 6301-4. Arctic and Alpine Environments. Concentrates on multidisciplinary aspects of environmental processes and Quaternary hist-
Human and Cultural Geography

GEOG 1982-3. World Regional Geography. Uses interrelated concepts of population, urbanization, trade, resources, and development as an organizing framework to geographically analyze the world's regions and place them in a global perspective.

GEOG 1992-3. Introduction to Human Geography. Systematic introduction to the broad field of human-environment relationships. Topics vary but may include growth and distribution of populations; locational analysis of economic activities; origin, development, and problems of urban communities; and spatial analysis of cultural, historical, and political phenomena.

GEOG 2002-3. World Geographic Problems. Seeks in several regions, problems include resource use decision making, locational analysis, third world poverty and community development, and political and economic urban land use conflict. Small student groups take part in role-playing simulations leading to human decisions causing geographic change.

GEOG 3402-3. Natural Hazards. Impact of extreme geophysical events on human society. Emphasizes adaptation to extreme events and ways of reducing vulnerability and damage.

GEOG 3412-3. Conservation Practice and Resource Management. Inventory, policy, and management of natural resources. Emphasizes practical approaches to the conservation and management of soil, land, water, and air resources.

GEOG 3422-3. Conservation Thought. Historical survey of human consumption of earth materials; environmental and global considerations of population growth, cultural attitude, and technological developments; diverse goals and philosophy of conservation movements in time and place.

GEOG 3612-3. Geography of American Cities. Introduces geography of American cities. Includes demographic and ideological contexts of urban development, emergence of the city system, location theory and rent models, and urban-economic problems.

GEOG 3662-3. Economic Geography. Several theories of location and economic activity are presented: general theory of land use, agricultural location theory, place location theory, central place theory, location of systems of cities, and geographical organization of industries. Aggregate geographical structure of regions studied as the geography of three major markets: labor, product, and capital, including the banking system. Economic growth of regions and policies designed to influence regional growth and welfare.

GEOG 3612-3. Latin America. National and regional overview of culture, history, resources, population, socioeconomic change, and other contemporary geographic problems.

GEOG 4292-3. Migration, Urbanization, and Development. Examines historical and current patterns of migration movement and settlement system development. Focuses on quantitative analysis of problems associated with population growth and decline, urbanization, and economic structural change in more developed and less developed countries. Same as GEOG 5292 and ECON 4292.

GEOG 4622-3. Urban Geography: Social Analysis. The social, behavioral, political, and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities. Same as GEOG 5622. Approved for arts and sciences core curriculum: critical thinking.

GEOG 5082-3. Geography of International Development. Compares and contrasts global characteristics and processes of development, emphasizing the developing countries of the world. Theories of development, specific development topics and case studies are integrated to explore the problems of development. Prereq. GEOG 3662 or instructor consent.

GEOG 4712-3. Political Geography. Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, electoral geography, resource allocation, and strategic concepts. Same as GEOG 5712.

GEOG 5732-3. Population Geography. Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution, and composition. Includes both theoretical and empirical considerations, and some field work and computer simulations. Same as GEOG 5732.

GEOG 4742-3. Environment and Peoples. Diverse environments and peoples are viewed in terms of their systemic relationships in order to understand human adaptability, human modification of environments, the environment as a medium of cultural communication, and dynamics of human geographic change through space and time.

GEOG 4882-3. Russian Commonwealth. Systematic and regional survey of features that characterize the physical, economic, and social geography of the Russian Commonwealth.

GEOG 4892-3. Geography of Western Europe. Regional survey of cultural, political, economic, social, and physical geography of Western Europe, emphasizing the distinctive character and problems of each major region and the relationship of the region to the world. Approved for arts and sciences core curriculum: critical thinking.

GEOG 5152-3. History and Nature of Human Geography. Development of geographical ideas leading to contemporary methodological issues and reviews of selected research frontiers in human geography.

GEOG 5292-3. Migration, Urbanization, and Development. Same as GEOG 4292 and ECON 5292.

GEOG 5712-3. Political Geography. Same as GEOG 4712.

GEOG 5762-3. Sustainable Development. Provides an assessment of sustainable development primarily as it relates to the Third World. Follows a sequence from development theory through facts, approaches, and goals. Investigates specific topical problems and closes with analyses of case studies. Prereq. graduate standing.

GEOG 6712-3. Seminar: Political Geography. Detailed consideration of history and methodology of the field, including an analysis of selected systematic topics such as frontiers and boundaries, international rivers, conflicting claims to territory, and electoral geography.

GEOG 6732-3. Formal Population Geography: Analysis and Forecasting. Focuses on methods for describing, interpreting, and forecasting the spatial dynamics of human populations disaggregated by age and such state categories as marital and labor force status.

GEOG 6742-3. Seminar: Cultural Geography. Exploration of various geographic topics emphasizing the concept of culture. Emergence of several points of view in the development of cultural geography.

Techniques (Skills)

GEOG 2053-3. Maps and Mapping. Introduces maps and their role in society. Includes fundamentals of reading and using both reference and special purpose maps, as well as influence of maps on attitudes toward and images of the geographic environment.

GEOG 3054-3. Cartography I. Introduces the science and art of cartography. Develops skills necessary to create maps and graphs of spatially distributed phenomena. Emphasizes use of maps as descriptive and analytical tools, but some attention given to production and computer-assisted cartography.
GEOG 3093-3. Geographic Interpretation of Aerial Photographs. Emphasizes use of aerial and space photography in geographic research. Includes properties and systematic application of imagery in the photogeological portion of the spectrum for the evaluation of urban, transportation, landform, and vegetation features.

GEOG 4023-3. Introduction to Quantitative Methods in Geography. Introduces fundamental statistical and quantitative modeling techniques widely used in geography today. Geographic examples and spatial problems are emphasized, as are statistical routines now available on most computers. Prereq., GEOG 3023 or equivalent. Same as GEOG 5023.

GEOG 4033-1. Quantitative Methods in Geography Laboratory. Introduces the use of personal computers and statistical software in geographical analysis. Same as GEOG 5033.

GEOG 4043-3. Computer-Assisted Cartography. Emphasizes application of geographic information, attention directed to mapping both physical and human phenomena. Students develop their own computer mapping programs. Same as GEOG 5043.

GEOG 4053-3. Cartography 2. Continuation of GEOG 3053. Advanced cartography with emphasis on independent research and projects. Field trips to leading map publishers and printers arranged. Prereq., GEOG 3053.

GEOG 4083-4. Mapping from Remotely Sensed Imagery. Mapping of spatial information from remotely sensed imagery, specifically high spatial resolution imagery (e.g., photography) in digital form. Emphasizes correction of 2- and 3-D geometric distortions, topographic influences, planimetric, topographic, and thematic mapping concepts. Prereq., GEOG 3083 or 4083. Same as GEOG 5083.

GEOG 4093-4. Remote Sensing of the Environment. Covers acquisition and interpretation of environmental data by remote sensing. Theory and sensors are discussed, as are manual and computerized interpretation methods. Infrared and microwave portions of the spectrum are stressed. Same as GEOG 5093, GEOI 4093, and GEOI 5093.

GEOG 4103-4. Geographic Information Systems. Construction and use of an information system and its data specifically designed for representing and manipulating geographical data. Modern geographical information systems include computer hardware/software with a collection of methods/procedures for recording, transforming, storing/retrieving, analyzing, and mapping geographic data. Prereq., GEOG 2053 or 3053. Same as GEOG 5103.

GEOG 4173-3. Research Seminar. Examines the nature of research and develops pre-graduate skills for geographic research, emphasizing problem definition, methods, sources, data interpretation, and writing. Approved for arts and sciences core curriculum: critical thinking.

GEOG 4383-3. Methods of Vegetation Analysis. Techniques of describing, sampling, classifying, and analyzing change in vegetation applied to a variety of local vegetation types. Includes field trips and laboratory work. Same as GEOG 5383.

GEOG 4983 (1-6). Field Problems. Selected geographic problems investigated through intensive, instructor-directed field work. The instructor and the problem(s) vary and are announced. May be repeated under different problems with departmental approval. Same as GEOG 5983.

GEOG 5023-3. Introduction to Quantitative Methods in Geography. Same as GEOG 4023.

GEOG 5033-1. Quantitative Methods in Geography Laboratory. Same as GEOG 4033.

GEOG 5083-4. Mapping from Remotely Sensed Imagery. Same as GEOG 4083.

GEOG 5113-3. Seminar: Geographic Information Systems. Focuses on the current research topics in geographical information systems and selected areas of application. Includes major journal articles related to each topic. A seminar paper is completed and presented by each student. Prereq., GEOG 4103 or 5103.

GEOG 5333-3. Methods of Vegetation Analysis. Same as GEOG 4383.

GEOG 5583 (1-6). Field Problems. Same as GEOG 4983.

Geological Sciences

GEOI 1010-3. Introduction to Geology 1. Introductory geology for majors and nonmajors. Studies the Earth, its materials, its characteristics, its dynamic processes, and how it relates to people. Separate lab (GEOI 1080) is optional. Approved for arts and sciences core curriculum: natural science.

GEOI 1080-1. Introduction to Geology Laboratory 1. Features field trips to classic localities. Studies rocks and topographic and geologic maps. Approved for arts and sciences core curriculum: natural science.

GEOI 1090-1. Introduction to Geology Laboratory 2. Studies research methods of historical geology, using field trips and lab exercises to construct a geologic map and interpret the geologic history of a region. Approved for arts and sciences core curriculum: natural science.

GEOI 1110-1. Global Change Laboratory. Optional laboratory for GEOI 1070, featuring field excursions and laboratory exercises on topics such as solid waste management, flooding, climate change, desertification and water treatment. Approved for arts and sciences core curriculum: natural science.

GEOI 1130-3. Dynamic Earth 1—Introduction. Discusses how the origin and evolution of Earth as a planet leads to its composition and heat budget. Considers alternate energy resources. Basic concepts of the physics of the solid earth lead to a discussion of earthquakes—their causes and prediction. Not open to geology majors. Approved for arts and sciences core curriculum: natural science.

GEOI 1140-3. Dynamic Earth 2—The Solid Earth. Studies large-scale earth processes including formation of igneous, sedimentary, and metamorphic rocks; glacial eras; continental drift and plate tectonics. Students especially interested in the solid Earth are encouraged to take GEOI 1130 before GEOI 1140. Approved for arts and sciences core curriculum: natural science.

GEOI 1410-4. The Earth 1. Three lect., two rec. per week. Introductory course for students with inadequate or no high school science. Includes geologic time, fossils and evolution, and geologic development of North America. Controlled enrollment through Fall Institute and University Learning Center. Coreq., GEOI 1430. Approved for arts and sciences core curriculum: natural science.

GEOI 1420-4. The Earth 2. Three lect., two rec. per week. Introductory course for students with inadequate or no high school science. Includes geologic time, fossils and evolution, and geologic development of North America. Controlled enrollment through Fall Institute and University Learning Center. Coreq., GEOI 1410. Approved for arts and sciences core curriculum: natural science.

GEOI 1430-1. The Earth Laboratory. Two-hour lab exercises and three-hour field trips provide experience with geological materials and the field interpretation of geological phenomena. Coreq., GEOI 1410. Approved for arts and sciences core curriculum: natural science.

GEOI 3010-3. Introduction to Mineralogy. One lect., and two labs per week. Origin, occurrence, identification, classification, and uses of minerals. Applications of mineralogy to economic geology and petrology are emphasized. Prereq., CHEM 1111 and MATH 1300.

GEOI 3020-3. Petrology. Field relations, petrography, petrology, chemistry, and origins of igneous and metamorphic rocks are studied by means of lectures, reading, and lab and field experience. Labs include instruction in the fun-
damentals of optical petrography and the study of rocks in this section. Prereq., GEOL 3010.

GEOL 3040-3. Global Change: The Recent Geological Record. Geological records in lakes, oceans, deserts, and around glaciers indicate the significant changes in the global system that have taken place over the last few hundred or thousand years. Explores the timing and nature of these changes. Prereq., GEOL 1060 and 1070, or GEOG 1001 and 1011, or any two-course sequence of natural science core courses. Approved for arts and sciences core curriculum: natural science.

GEOL 3070-3. Introduction to Oceanography. Surveys ocean features and processes including ocean water, circulation, sediments, structure, faults, floras, and history of the ocean basins. Prereq., any 1000-level sequence in geological sciences, or GEOL 1010 and one semester of biology.

GEOL 3120-4. Structural Geology 1. Geometrical techniques for describing and illustrating geological structures. Major topics include graphic methods and geometry of fractures and folds. Prereq., any 1000-level sequence in geological sciences.

GEOL 3230-3. Introduction to Geochemistry. Introduces chemical principles as applied to geologic processes. Includes an introductory discussion of mineral and rock chemistry, aqueous geochemistry, and organic geochemistry. Prereq., CHEM 1111 and MATH 1300, or equivalent.

GEOL 3400-4. Evolution of Continental Ecosystems. Enquiry into the evolution of important ecosystems of the past and present. Biological and geologic data for reconstructing ecosystem evolution will be detailed and applied to creating scenarios of past ecosystems. Emphasizes vertebrates and their structure. Prereq., beginning geology, biology, or physical anthropology.

GEOL 3410-3. Paleobiology. Surveys morphology, ecology, and evolution of ancient animal and plant life and their interactions with the Earth. Fossils used to solve geological and biological problems. Prereq., one year of introductory biology or geology, or instructor consent.

GEOL 3430-4. Sedimentology and Stratigraphy. Introduces the study of sedimentary rocks emphasizing their origin, characteristics, and interpretation; and the principles and techniques for establishing the temporal order and spatial distribution of sedimentary layers. Prereq., any 1000-level sequence in geological sciences or equivalent.

GEOL 3520-3. Environmental Issues in Geosciences. Addresses current environmental problems in which an understanding of geology is needed. Topics include energy resources, climate modification, hydrology, waste disposal, and mining resources. Specific examples used to illustrate restrictions imposed by nature and man on solutions to these problems. Prereq., any 1000-level geology course(s) or introductory chemistry or physics. Approved for arts and sciences core curriculum: natural science.

GEOL 3620-3. Controversies in Planetary Geology. Covers the evolution of controversial ideas in planetary geology; discusses competing hypotheses and the critical thinking required to decide between them. Topics include origin of the moon, volcanic versus impact origin of craters, planetary plate tectonics, and geologic history of the planets. For nonmajors. Prereq., GEOL 1010 and 1020 or GEOL 1130 and 1140. Approved for arts and sciences core curriculum: critical thinking.

GEOL 3630-3. Great Geological Controversies. Critically examines significant historical and contemporary controversies in the geological sciences (e.g., age of the Earth, ice ages, continental drift, health hazards related to rocks and minerals) by reading, classroom discussion, and argument, and written assignments. Prereq., completion of a one-year sequence in any natural science. Approved for arts and sciences core curriculum: critical thinking.

GEOL 3700-2. Geology Field Techniques in the Colorado Front Range. Field-oriented approach to tracing the geologic development of the Colorado Front Range, from the Precambrian to recent times. Field observations provide a framework for discussions of current ideas concerning the geologic evolution of the Front Range. Prereq., 1000-level course in geology or equivalent.

GEOL 3720-3. Evolution of Life: The Geologic Record. Discusses the evolution of life on Earth, beginning with the earliest origins and surveying the major steps that led to the rise of higher plants and animals. Covers modern ideas on the causes of periodic mass extinctions in both the marine and terrestrial realms. Emphasizes geologic evidence for the pathways of evolution, using examples from the ordinary to the bizarre. Approved for arts and sciences core curriculum: natural science.

GEOL 3930 (1-6). Internship. The internship offers an academically supervised opportunity for geological sciences majors to work with public or private organizations. Projects are usually associated with students' career goals; each project will have an academic emphasis. Prereq., junior standing and completion, with a B or better, of at least two courses for geology majors.

GEOL 4040-3. Geohydrology. Surface and ground water examined as a dynamic system within a geological framework. Considers implications for human management of watercourses, water supplies, and water quality. Prereq., MATH 2300 or equivalent. Same as GEOL 5040.

GEOL 4080-3. Societal Problems and Earth Sciences. Analyzes contemporary societal problems involving geoscience. One class period per week is generally devoted to lecture. During class discussions the professor acts as scientific advisor while students debate material they have researched. Prereq., one year of calculus and one year of natural science (physics, chemistry, biology) or equivalent, or instructor consent. Approved for arts and sciences core curriculum: natural science.

GEOL 4100-3. X-Ray Crystal Chemistry. Topics in physics and chemistry of minerals are covered, particularly crystal structure control on chemical substitution and order-disorder phenomena. Laboratory covers methods of mineral identification and characterization by X-ray powder and single-crystal diffraction. Prereq., GEOL 3010 and MATH 2300, or instructor consent. Same as GEOL 5100.

GEOL 4120-3. Structural Geology 2. Mechanics applied to the deformation of rocks. Stress, infinitesimal strain, behavior of elastic and brittle rocks, fault mechanics, mechanical effects of pore fluids, introduction to petrofabrics, and other topics. Prereq., GEOL 3120. Same as GEOL 5120.

GEOL 4130-4. Geophysics and Tectonics. Students are introduced to fundamental geophysics including seismicity, geomagnetism, gravity, radiometric dating, and heat flow. Reviews the theory of plate tectonics and outlines its geophysical and geological aspects. The tectonics of orogenic belts such as the North American Cordillera are studied and related to plate tectonic processes. Prereq., any 1000-level sequence in geological sciences; GEOL 3120 recommended.

GEOL 4140-3. Techniques in Glacial Geology. Acquaints students with research techniques. Includes analysis of remote sensing imagery and maps, investigation of seismic records, evaluation of sedimentological techniques and approaches, and statistical evaluation of data. Prereq., GEOL 4360 or instructor consent. Same as GEOL 5140.

GEOL 4150-3. Geological Processes on Planetary Surfaces. Covers geological processes that occur on solid planets in the solar system. Topics include impact cratering, volcanism, aeolian, glacial and fluvial processes, and surface-atmosphere interactions. Applications are made to terrestrial planets and outer-solar-system satellites. Recent spacecraft observations emphasized. Prereq., PHYS 1110 and 1120. Same as GEOL 5150.

GEOL 4200-3. Advanced Mineralogy. Covers topics in crystal chemistry of major rock-forming mineral groups, specifically reactions, transformations, deformations, and geothermometry and geobarometry based on inter- and intracrystalline element distributions in these major mineral groups. Prereq., GEOL 4100 or 5100. Same as GEOL 5200.
GEOL 4250-4. Introduction to Ore Deposits. Surveys processes of ore formations, with examples drawn from selected districts. Field trips to representative deposits. Prereq., GEOL 2010 or equivalent. Same as GEOL 5250.

GEOL 4330-3. Planetary Chemistry. Discusses the chemistry of the solar system, especially role of stable and radiogenic isotopes and trace elements in interpreting the formation and magmatic evolution of the planets. Prereq., upper-division standing. Same as GEOL 5330.

GEOL 4530-3. Fold Belts and Extensional Basins. Includes geology, tectonic setting, and structure of fold/thrust belts including relationships between thrusting and sedimentation, foreland basins, sea level change, techniques for constructing restored and balanced cross sections, and examination of type areas including North American Cordillera, Alps, and Himalaya. Prereqs., GEOL 3120 and 3430, or instructor consent. Same as GEOL 5330.

GEOL 4840-4. Paleontology of the Higher Vertebrates. Evolution of mammals and birds emphasizing evolutionary history of modern and prominent fossil orders. Prereq., GEOL 3410, one year of biology, one year of geology, or instructor consent. Same as GEOL 5480.

GEOL 4530-3. Introduction to the Physics of the Solid Earth. Surveys structure, physical properties, and modern and ancient terrestrial and planetary conditions, and processes in the Earth's interior. Emphasizes methods of interpreting geophysical data to determine the state of the interior. Prereqs., MATH 2400 and PHYS 2130.

GEOL 4610-3. Glaciology. Ice physics, snow, glaciers, floating ice, ice in the ground and in the solar system. Emphasizes glaciers and ice sheets, including reconstruction of past glaciations and impacts of ice and snow on society. Same as GEOL 5640.

GEOL 4670-3. Isotope Geology. Introduces principles of stable and radiogenic isotope systemsatics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic and sedimentary petrology, geochemistry, and petroleum genesis. Preq., CHEM 1131, MATH 1300, and GEOL 3020. Same as GEOL 5670.

GEOL 4700 (3-4). Special Geological Topics. Studies in selected geological subjects of special current interest (for undergraduates). Initial offering is petroleum geology. Prereq., to be determined by topics, but always junior standing.

GEOL 4840 through 4849 (1-3). Independent Study in Geology. Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor.

GEOL 4930-4. Introduction to Geophysical Prospecting. Lect. and lab. Outlines the principles of geophysical prospecting for oil, other minerals, and water. Discusses seismic, gravity, magnetic, and electrical methods. Preq., PHYS 1120, MATH 2300, and any 1000-level sequence in geology. Same as GEOL 5940.

GEOL 4980-3. Hydrology. Focuses on principles of hydrology, including rainfall, runoff generation, infiltration, subsurface flow, and landforms. Emphasizes space-time variability in measurement modeling over a broad range of scales. Preq., one year of calculus; GEGE 3511 recommended. Same as GEOL 5980.

GEOL 4990-3. Honors Thesis. Supervised project involving original research in any area of the geological sciences. The thesis is submitted to the Honors Program of the College of Arts and Sciences in late March and is orally defended. The candidate must have a GPA of 3.00 or better in geology and must be approved by the departmental honors committee.

GEOL 5050-3. Earthquakes. Same as GEOL 4050.

GEOL 5100-3. X-Ray Crystal Chemistry. Same as GEOL 4100.

GEOL 5120-3. Structural Geology 2. Same as GEOL 4120.

GEOL 5140-3. Techniques in Glacial Geology. Same as GEOL 4140.

GEOL 5160-3. Interpretation of Geological Phase Diagrams. Phase diagrams of mineral systems explored in terms of variables: temperature, composition, pressure, oxygen fugacity, and water fugacity. Experimental viewpoint rather than theoretical, and unifying theme is to discover how these diagrams can be related to igneous and metamorphic rocks.

GEOL 5200-3. Advanced Mineralogy. Same as GEOL 4200.

GEOL 5210-4. Advanced Igneous Petrology. Systematic analysis of petrology of igneous rocks. Emphasizes integrating knowledge obtained from theory, experiment, and field studies. Preq., GEOL 5170 or equivalent.

GEOL 5250-4. Introduction to Ore Deposits. Same as GEOL 4250.

GEOL 5260-4. Field and Laboratory Study of Mine Deposits. Field mapping and laboratory studies of ore deposits, emphasizing petrology, wall-rock alteration, and ore mineralogy. Preq., GEOL 4250 or 5250.

GEOL 5330-3. Planetary Chemistry. Same as GEOL 4330.

GEOL 5350-3. Fold Belts and Extensional Basins. Same as GEOL 4350.

GEOL 5360-3. Glacial Geology. Same as GEOL 4360.

GEOL 5370-3. Quantitative Stratigraphy. Evaluates the descriptive, statistical, and graphical approaches to stratigraphy. Emphasizes multivariate approaches to core/outcrop segmentation (cluster analysis, principal components) and correlations between sections (plotting sequences, time-series analysis). Prereqs., college algebra, introduction to statistics, stratigraphy, sedimentology, or geomorphology.

GEOL 5400-4. Quaternary Stratigraphy. Summary of geologic and pedologic methods used to recognize, date, and correlate Quaternary deposits and interpret Quaternary history. Prereq., GEOL 4241 or 5241 or equivalent.

GEOL 5420-3. Quaternary Dating Methods. In-depth survey of standard and experimental dating methods that provide absolute ages for events of the last 2 million years of Earth history. Includes theory and application of radiocarbon, uranium series, amino acid, thermoluminescence, fission track, potassium/argon, hydration, light stable isotopes, and other radioactive techniques.

GEOL 5440-4. Morphology and Genesis of Soils. Effects of climate, vegetation, parent material, topography, and time on development, classification, and chemistry of soils. Prereq., GEOL 4241 or 5241 or equivalent, CHEM 1111 or equivalent, or instructor consent.

GEOL 5470-4. Paleontology of the Lower Vertebtrates. Same as GEOL 4470.

GEOL 5490-3. Geochemistry of Hydrothermal Ore Deposits. Laboratory studies, thermodynamic data, chemical data, fluid inclusions, stable isotopes, and field occurrences are all used to explain composition, origin, and history of hydrothermal ore deposits. Prereq., GEOL 5250 or equivalent.

GEOL 5620-5. Field Problems in Vertebrate Paleontology. Field techniques in study of fossil vertebrates and their host rocks. Four weeks field work, one week faunal analysis. GEOL 3420, 4100, 4470, and 4480 recommended. Summer course taught through Continuing Education.

GEOL 5630-2. Physics of Remote Sensing. Advanced study of optical and microwave techniques used in remote sensing of the atmosphere, oceans, and land, emphasizing the latter. Studies based on recent literature and text. Intended for those who have completed introductory courses in remote sensing fundamentals and digital image analysis. Prereq., GEOL 4093 or 5093.

GEOL 5640-3. Glaciology. Same as GEOL 4640.

GEOL 5650-3. Carbonate Sedimentary Environments. Same as GEOL 4650.

GEOL 5670-3. Isotope Geology. Same as GEOL 4670.

GEOL 5680-3. Global Tectonics. Geological and geophysical aspects of plate motions along accretionary, transforming, subducting, and collisional margins. Relationships of sedimentation, volcanism, metamorphism, and deformation to mountain building are studied in conjunction with examination of type areas. Prereq., GEOL 4130 and 4530, or equivalents.

GEOL 5700 through 5790 (1-3). Geological Topics Seminar. Seminar studies in geological subjects of special current interest are offered primarily for graduate students, as departmental staff and facilities permit.

GEOL 5840 through 5851 (1-3). Graduate Independent Study.

GEOL 5940-4. Introduction to Geophysical Prospecting. Same as GEOL 4940.

GEOL 5980-3. Hydrology. Same as GEOL 4980.

GEOL 6020-3. Topics in Petroleum Geology. Covers current advanced topics of research and interest in petroleum geology. Content varies each term. Course is offered by permission. May be repeated for credit every other year. Sample topics include rock geochemistry, reservoir geology, seismic expression structural styles, and 3-D seismic interpretation. Prereq., GEOL 5500, 5530, or 6330.

GEOL 6060-3. Petroleum Geology of Turbidite Systems. Covers the exploration and production aspects of petroleum submarine fans and turbidite systems. A one-week field trip to California is included. Students are responsible for part of the trip expenses. Prereq., GEOL 6330 or instructor consent.

GEOL 6310-3. Sandstone Petrology. Interpretation of depositional and diagenetic history of sedimentary rocks as determined from thin-section studies. Prereq., GEOL 3010, 3020, and 3430 or equivalent, and optical mineralogy.

GEOL 6330-4. Applied Sequence Stratigraphy and Basin Analysis. Develops skills in the stratigraphic interpretation of seismic reflection data, recognition of sequence stratigraphy in well logs and outcrop, and their applications to basin analysis in petroleum exploration. Prereq., GEOL 3430 or instructor consent.

based on remote sensing techniques. Topics include reflection and emission spectroscopy, radar reflection, microwave and infrared radiometry, and high-energy spectroscopy, with application to the planets and their satellites. Prereq., basic undergraduate physics. Same as APAS 6340.

GEOL 6620-3. Earth and Planetary Physics 2. Offered alternate year. Space and surface geodetic techniques, as well as potential theory, are covered. Other topics are definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; tides, and the rotation of the Earth. Same as APAS 6620 and PHYS 6620.

GEOL 6640-3. Introduction to Planetary Science. Overview of the nature of the solar system. Topics include geologic processes and histories of solid planets, planetary chemistry, interiors, and atmospheres, the outer planets, planetary rings, comets and asteroids, extraterrestrial life, and formation of the solar system. Prereq., graduate standing in a physical science and basic undergraduate physics. Same as APAS 6640.

GEOL 6650 (1-3). Seminar in Geophysics. Advanced seminar studies in geophysical subjects for graduate students. Same as APAS 6650 and PHYS 6650.

GEOL 6660-3. Geophysical Instrumentation. Introduces principles on which the design of instruments for various geophysical observations is based. Emphasizes seismographic and strain/tilt systems, with some discussion of gravimetric and magnetometer instruments. Same as PHYS 6660.

GEOL 6670-3. Rock Physics. Not offered every year. Magnetic, electrical, optical, thermal, and mechanical properties of rocks. Emphasizes basic concepts of solid-state physics and shows use of these properties in helping to interpret the geologic records. Basic courses in physics, mathematics, and geology recommended.

GEOL 6940-3. Master's Degree Candidate.

GEOL 6950 (1-6). Master's Thesis.

GEOL 6960-3. Plan II Master's Research.

GEOL 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of this catalog.

Cross Listings

GEOL 4291 (3-4). Mountain Geomorphology. Field course. Includes Front Range glacial geology and glaciation. Prereq., GEOL 1010 and 1020, MATH 1100, and CHEM 1001. Same as GEOL 4291.

GEOL 6241 (1-3). Seminar in Hydrology and Geomorphology. Emphasizes process-oriented research in hydrology and geomorphology. Sample topics include river mechanics, snow hydrology, and periglacial processes.

German

GRMN 1010-4. Beginning German 1. For students with no previous training in German.

GRMN 1020-4. Beginning German 2.

GRMN 1900 (1-3). Independent Study.

GRMN 2010-4. Intermediate German 1. Review and continuation of basic skills begun in the first year: reading, writing, speaking, and oral comprehension. Satisfies arts and sciences language requirement.

GRMN 2020-4. Intermediate German 2.

GRMN 2050-2. Intermediate German: Conversation. For students who wish supplementary conversational practice on the third semester level. Students may take this course concurrently with GRMN 210. Does not satisfy the arts and sciences foreign language requirement.

GRMN 2220-4. Scientific German. Prereq., GRMN 210 or equivalent, or placement test.

GRMN 2900 (1-3). Independent Study.

GRMN 3010-3. Advanced Conversation and Grammar. Reviews special grammatical topics, reading, and conversation. Prereq., four semesters of college German or equivalent. Open to freshmen upon consultation only.

GRMN 3020-3. Advanced Conversation and Composition. Continuation of GRMN 3010, emphasizing idiomatic usage of German and composition. Prereq., GRMN 3010 or equivalent, or consultation with instructor.

GRMN 3030-3. Business German 1. Studies general commercial practices, vocabulary, and terminology applied in business transactions of various kinds with special emphasis on oral and written communications and correspondence; useful in subsequent business careers.

GRMN 3040-3. Business German 2. Extends the range of topics offered in the first course and develops the more sophisticated language skills required by employees of German organizations and foreign businesspersons who wish to transact business with German firms. Prereq., GRMN 3030.

GRMN 3090-2. German Pronunciation and Diction. Introduces phonetics.

GRMN 3110-3. German Literature from 1910 to the Present. Examines selected literary texts. Emphasizes longer unedited texts as well as critical skills. May be taken either before or after GRMN 3120. Prereq., GRMN 2020 or equivalent, or consultation with instructor.

GRMN 3120-3. Modern German Literature from 1750 to 1910. Examines selected literary texts of various periods. Emphasizes longer texts and critical skills. May be taken either before or after GRMN 3110. Prereq., GRMN 2020 or equivalent, or consultation with instructor.

GRMN 3140-3. Critical Issues in German Literature. Examines issues pervading contemporary German literature, such as concerns of youth, gender, stereotyping as it affects women and men in their relations with one another, loneliness and sexual frustration, work experiences, and other issues. Prereq., ability to read unedited German and to speak German.

GRMN 3520-3. Open Topics in the Cultural Context. Examines topics in the cultures of German-speaking central Europe. Contact the departmental office for specific course offerings. Prereq., third-year proficiency in German or instructor consent.

GRMN 3900 (1-3). Independent Study.
GRAM 4010-3. Advanced Composition, Conversation, and Stylistics 1. Designed to improve written expression in German. Detailed study of difficult grammatical points and various stylistic forms. Prereq., GRMN 3020 or instructor consent.

GRAM 4020-3. Advanced Composition, Conversation, and Stylistics 2. Continuation of GRMN 4010, emphasizing idiomatic usage of German and composition.

GRAM 4100-3. Applied Linguistics. Introduces the study of language and its applications to the teaching of German. Analysis of phonology, grammatical structure, and vocabulary of German and English for high school and college teachers of German.

GRAM 4330-3. The Age of Goethe. German literature from 1770 to 1830. Close examination of representative texts from the periods of Sturm and Drang, classicism, and romanticism. Emphasizes philosophical and social background.

GRAM 4340-3. Seminar in German Literature. Intensive study of a particular literary period, author, or genre. Secondary sources are utilized. Course content differs each time.

GRAM 4370-3. Introduction to German Literary History. 1. Examines main currents in German literature, including the Middle Ages, the Renaissance, Baroque, and early classicism.

GRAM 4380-3. Introduction to German Literary History 2. Continuation of GRMN 4370. From 1750 to the present. Covers Weimar classicism, romanticism, realism, naturalism, and currents of the twentieth century.

GRAM 4450-3. Methods of Teaching German. Required of students who desire the recommendation of the department for secondary school teaching positions. For student teaching in German, see EDUC 4712 under the School of Education.

GRAM 4460-6. High School German Teaching. Part of the supervised student teaching in a secondary school required for state certification to teach German.

GRAM 4550-3. Senior Seminar: The Roles of Intellectuals and Academics in German Culture. Examines the articulation of the German bourgeoisie during critical periods in German history. Looks at specific groups and their participation in German public culture, e.g., writers, artists, journalists, academics, and political figures. Students work closely with a faculty advisor during the semester and are expected to produce a major research paper.

GRAM 4900 (1-3). Independent Study.

GRAM 6940-0. Master's Degree Candidate.

German Courses Taught in English

GRAM 1601-3. Introduction to Modern German Culture and Civilization. Introduces the culture of contemporary German-speaking central Europe, examining historical processes, social and political patterns, and the intellectual and artistic responses to problems of the twentieth century.

GRAM 2501-3. Twentieth Century German Short Story. Short stories by Thomas Mann, Kafka, Böll, and Grass, such as "Death in Venice," "Metamorphosis," and "Cat and Mouse." Emphasizes literary themes, their traditions, and their cultural significance.

GRAM 3501-3. German-Jewish Writers. From the Enlightenment to the Present. Provides insight into the German-Jewish identity through essays, autobiographies, fiction, and journalism from the Enlightenment to the post-Holocaust period. Examines the religious and social conflicts that typify the history of Jewish existence in German-speaking lands during the modern epoch. Approved for arts and sciences core curriculum: cultural and gender diversity.

GRAM 4501-3. Seminar: Literature in Cultural Context. Provides a broader basis for the work of literature, viewing it from various cultural perspectives. Specific content of course is defined by the instructor.

GRAM 4503-3. Issues in German Thought. Provides the opportunity to examine major issues in German philosophical, social, and religious thought from the end of German idealism to existentialism and critical theory. Emphasizes the relationship between ideas and social and political action.

Polish

PLSH 1010-5. Beginning Polish 1. Elementary description and analysis of pronunciation, morphology, grammar, and usage of modern standard Polish, supported by contemporary readings in Polish. Not designed to fulfill the arts and sciences foreign language requirement.

Russian

RUSS 1010-5. Beginning Russian 1. Introduces the Russian language.

RUSS 1030-3. Beginning Russian for Scientists and Social Scientists 1. Approaches Russian through reading of texts in the student's special field of study.

RUSS 1040-3. Beginning Russian for Scientists and Social Scientists 2. Prereq., RUSS 1010 or 1030.

RUSS 1510-5. Russian Reading 1. Provides a systematic introduction to Russian for nonmajors who primarily need to acquire reading proficiency. Completion of four-quarter sequence should enable motivated students to develop skills adequate for use in scholarly or professional reading. Offered in alternate years. Does not satisfy arts and sciences language requirement.

RUSS 1520-5. Russian Reading 2. Continuation of RUSS 1510. Systematic introduction to Russian for nonmajors who primarily need to acquire reading proficiency. Offered in alternate years. Does not satisfy arts and sciences language requirement. Prereq., RUSS 1510, one year of Russian, or instructor consent.

RUSS 1900 (1-3). Independent Study.

RUSS 2010-3. Second-Year Russian Grammar and Composition 1. Reading, writing, and understanding contemporary Russian. Recommended to students who intend to continue their formal study of Russian into the third and fourth years. Prereq., RUSS 1020 with a grade of C or better.

RUSS 2030-2. Second-Year Russian Oral Practice 1. Enables students to speak and understand contemporary spoken Russian. Recommended to students who intend to continue their formal study of Russian into the third and fourth years, Prereq., RUSS 1010 or 1030.

RUSS 2110-3. Reading Russian. Reading of significant texts in Russian from the sciences, social sciences, and press. Prereq., RUSS 1020 or 1040.

RUSS 2510-3. Russian Reading 3. Continuation of RUSS 1510 and 1520. Designed for nonmajors who primarily need to acquire reading proficiency. Through grounding in grammatical, syntactical, and functional analysis of the principal sentence types used in Russian exposition, supported by readings from current Soviet sources. Offered in alternate years. Does not satisfy arts and sciences language requirement. Prereq., RUSS 1520, three semesters of Russian, or instructor consent.

RUSS 2520-3. Russian Reading 4. Continuation of RUSS 2510. Designed for nonmajors who primarily need to acquire reading proficiency. Offered in alternate years. Does not satisfy arts and sciences language requirement. Prereq., RUSS 2510, two years of Russian, or instructor consent.

RUSS 2900 (1-3). Independent Study.

RUSS 3510-3. Advanced Russian Reading 1. An intensive course for majors or nonmajors who wish to concentrate their efforts on acquiring advanced proficiency in reading. Thorough grounding in grammatical, syntactical, and functional analysis of required reading from Soviet periodical literature, supplemented by supervised independent reading in fields of interest. Prereq., five semesters of Russian or instructor consent.

RUSS 3520-3. Advanced Russian Reading 2. Continuation of RUSS 3510. Offers majors and nonmajors an opportunity to acquire advanced
proficiency in reading, grammatical, syntactical, and functional analysis supported by required readings in Soviet periodical literature and supervised reading in fields of interest. Prereq., five semesters of Russian or instructor consent. 

RUSS 3900 (1-3). Independent Study.

RUSS 4210-3. Open Topics: Russian Literature in Russian. Provides intensive investigation of selected topics in nineteenth and twentieth century Russian literature. Primary texts are read in Russian; secondary readings may be partly in Russian, partly in English. Prereq., RUSS 3020.

RUSS 4510-3. Twentieth-Century Russian Poetry. Surveys the major figures in this period, with particular emphasis on Modernist poets active between 1895 and 1930. Prereq., RUSS 3020.

RUSS 4810-3. Pre-Revolutionary Russian Literature. Surveys major works of Russian literature from the beginning of the Revolution. Readings are in Russian. Prereq., RUSS 3020.

RUSS 4900 (1-3). Independent Study.

RUSS 5310-3. Pushkin and His Time. Same as RUSS 4310.

RUSS 5440-3. Tolstoy. Same as RUSS 4440.

RUSS 5510-3. Twentieth-Century Russian Poetry. Same as RUSS 4510.

RUSS 5610-3. Twentieth-Century Russian Literature: Prose in the Soviet Union. Same as RUSS 4610.

RUSS 5900 (1-3). Independent Study.

RUSS 6900 (1-3). Independent Study.

Russian Courses Taught in English

RUSS 2211-3. Introduction to Russian Culture. What Russians are like and how they got that way: development of national consciousness from feudalism through imperialism; Russian cookery, folklore, popular literature, religious thought, art, and architecture. Lectures, films, guest speakers. Approved for arts and sciences core curriculum: historical context.

RUSS 4421-3. Gogol. Same as RUSS 5421.

RUSS 4431-3. Dostoevsky. Selected short novels and novels. Same as RUSS 5431.

RUSS 4821-3. Twentieth-Century Russian Literature. Emphasis on Soviet literature, major writers and problems, the theory and practice of Socialist Realism. Approved for arts and sciences core curriculum: literature and the arts.

RUSS 5421-3. Gogol. Same as RUSS 4421.

RUSS 5431-3. Dostoevsky. Same as RUSS 4431.

RUSS 5451-3. Chekhov. Same as RUSS 4451.

RUSS 5461-3. Solzhenitsyn. Same as RUSS 4461.

Scandinavian

NORW 1010-5. Beginning Norwegian 1.

NORW 1020-5. Beginning Norwegian 2. Prereq., NORW 1010 with a grade of C- or better.

NORW 1900 (1-3). Independent Study.

NORW 2900 (1-3). Independent Study.

Scandinavian Courses Taught in English

SCAN 2250-3. Contemporary Sweden and Norway. Comprehensive overview of Swedish and Norwegian society, emphasizing economic and political life, institutions and organizations, people and culture, and manners and customs.

SCAN 2510-3. Introduction to Norwegian and Swedish Literature in Translation. Comprehensive overview of Norwegian and Swedish literature, emphasizing the twentieth century.

Slavic

SLAV 1900 (1-3). Independent Study.

SLAV 2900 (1-3). Independent Study.

SLAV 3900 (1-3). Independent Study.

SLAV 4900 (1-3). Independent Study.

SLAV 5900 (1-3). Independent Study.

SLAV 6900 (1-3). Independent Study.

SLAV 4610-3. Ukrainian Literature, World War I to World War II. Chronological examination of the greater figures, forces, and ideas in the Ukrainian literature between the two world wars. Prereq., junior standing.

SLAV 4620-3. Ukrainian Literature since World War II. Analysis of significant works and literary figures in Ukraine. Problems and ideas of dissident literature. Prereq., junior standing.

SLAV 4710-3. Introduction to Ukrainian Civilization. Surveys Ukrainian history and culture from prehistoric to present times. Prereq., junior standing.

Swedish

SWE 1010-5. Beginning Swedish 1.

SWE 1020-5. Beginning Swedish 2. Prereq., SWE 1010 with a grade of C- or better.

SWE 1900 (1-3). Independent Study.

SWE 2120-3. Second-Year Swedish Reading and Conversation 2. Prereq., SWE 2110 with a grade of C- or better.

SWE 2900 (1-3). Independent Study.

SWE 3900 (1-3). Independent Study.

SWE 4900 (1-3). Independent Study.

History

Note: Preference for all 3000-level readings and research seminar courses except HIST 3000 is given to junior and senior history majors. HIST 5000 is limited to nonmajors. HIST 4030 is limited to history majors and minors.

Methodological and General

HIST 1020-3. Western Civilization 2. Survey course dealing with political, economic, social, and intellectual developments in European history from the sixteenth century to the present. Similarities and contrasts between European states are underscored, as is Europe's changing role in world history. Approved for arts and sciences core curriculum: historical context.

HIST 1030-3. Honors: Western Civilization 1. Thematic history of the Western world from the ancient Greeks through the Reformation of the sixteenth century. Designed specifically for freshmen with advanced standing. Emphasizes reading and discussion more than lectures. A student receiving credit for HIST 1010 may not receive credit for HIST 1030. Approved for arts and sciences core curriculum: historical context.

1 Also available through correspondence study.
HIST 1040-3. Honors: Western Civilization 2. History of social, political, and cultural development of the Western world from the sixteenth century to the present. Designed for freshmen with advanced standing. Emphasizes reading and discussion. A student receiving credit for HIST 1020 may not receive credit for HIST 1040. Approved for arts and sciences core curriculum: historical context.

HIST 2170-3. History of Christianity 1: To the Reformation. General introduction to the history of Christianity from its beginnings through the first period of the Protestant Reformation. Examines religious life and the church in relation to social and cultural setting.

HIST 2840 (1-3). Independent Study. Methodological and general history.

HIST 3000-3. Selected Readings in History. Encourages students to explore and analyze a problem, topic, or area through selected readings in primary (when feasible) and secondary sources. Exposes students to the way historians view various complex issues. Enrollment limited to nonmajors. Approved for arts and sciences core curriculum: critical thinking.

HIST 3840 (1-3). Independent Study. Methodological and general history.

HIST 4020-3. Comparative World History. Systematically compares and contrasts central aspects of the societies, politics, economy, and ideas of different civilizations. Taught by several faculty. Prereq. 12 hours of upper-division history. Enrollment limited to history majors and minors.

HIST 5010-3. Historiography: Introduction to the Professional Study of History. Covers some of the major historiographical schools and concerns that have emerged during the course of the discipline's development in Europe and the United States.

HIST 5020-3. Social Scientific Thinking in History. Subjects include the meaning of objectivity, elements of scientific thinking, limits of scientific thinking, strategies for research design, formulation of testable hypotheses, definition of variables, problems of measurement, investigation of relationships between variables, and interpretation. Assignments include student projects, using SPSS.

HIST 5840 (1-3). Independent Study. Methodological and general history.

HIST 6940-3. Master's Degree Candidate.

HIST 6950 (1-6). Master's Thesis.

HIST 7840 (1-3). Independent Study. Methodological and general history.

HIST 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of this catalog.

Europe: Ancient and Medieval

HIST 1051-3. The World of the Ancient Greeks. Examines the emergence, major accomplishments, failures and decline of the world of the ancient Greeks, from Bronze Age civilizations of the Minoans and Mycenaean through the Hellenistic Age (c. 2000–50 B.C.). Same as CLAS 1051. Approved for arts and sciences core curriculum: historical context.

HIST 1061-3. The Rise and Fall of Ancient Rome. Surveys the rise of ancient Rome in the eighth century B.C. to its "fall" in the fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. Same as CLAS 1061. Approved for arts and sciences core curriculum: historical context.

HIST 2841 (1-3). Independent Study. Europe: ancient and medieval.

HIST 3841 (1-3). Independent Study. Europe: ancient and medieval.

HIST 4012-3. Athens and Greek Democracy. Same as CLAS 4012.

HIST 4021-3. Classical Greek Political Thought. Same as CLAS 4021, PHIL 4210, and PSCI 4094.

HIST 4061-3. The Twilight of Antiquity. Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the east as Byzantium. Emphasizes Christianity, barbarians, social, economic, and cultural differences, contemporary views of Rome, and modern scholarship. Same as CLAS 4061. Approved for arts and sciences core curriculum: historical context.

HIST 4071-3. History of the Byzantine Empire. Approaches Byzantium at the heart of the Greco-Roman tradition, paying considerable attention to the lines of continuity with the ancient past but recognizing discontinuity as well. Readings present a survey of Byzantine history and civilization. Same as CLAS 4071.

HIST 4081-3. The Roman Republic. Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republic government. Readings are in the primary sources. Same as CLAS 4081. Approved for arts and sciences core curriculum: historical context.

HIST 4091-3. The Roman Empire. Studies Imperial Roman history beginning with the Roman Revolution and ending with examination of the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters, and personalities of the Empire. Same as CLAS 4091.

HIST 4511-3. Social Foundations of European Civilization. Studies social structures of Europe and their relationship to political, religious, and economic institutions, from A.D. 400 to 1500.

HIST 4711-3. History of the Mediterranean World, 1009-1571. Examines Mediterranean civilizations from the First Crusade to the Battle of Lepanto. Topics include the commercial revolution, medieval colonization, the Byzantine and Ottoman states, shipping and navigation, and the "Atlantic threat." Equal treatment of eastern and western Mediterranean.

HIST 5841 (1-3). Independent Study. Europe: ancient and medieval.

HIST 6011-3. Readings in Ancient History. Same as CLAS 6011.

HIST 6511-3. Readings in Medieval History. Same as CLAS 6511.

HIST 7841 (1-3). Independent Study. Europe: ancient and medieval.

Europe: Modern

HIST 4112-3. Venice and Florence in the Renaissance. Comparative urban study of Florence and Venice from thirteenth through sixteenth centuries. Principal subjects are the distinctive economies of the cities, political development, Renaissance humanism, patronage of the arts, and foreign policy.
HIST 4122-3. Europe During the Renaissance. Explores the history and culture of Western Europe, circa 1300-1520. Comprehensive in scope, with analysis of political, economic, social, religious, intellectual, and artistic aspects. Discusses significance of the Renaissance for origins of modern civilization.

HIST 4222-3. War and the European State, 1618-1793. Studies the development of the European states in response to international power struggles in the seventeenth and eighteenth centuries (up to the French Revolution).

HIST 4232-3. The Age of Reason, Montaigne to Voltaire. Studies major European intellectual trends from late sixteenth century through the Enlightenment.

HIST 4312-3. Nineteenth-Century Europe. Concerned with major social, political, and cultural developments in Europe from circa 1800 to the outbreak of World War I. Special emphasis is placed upon the Napoleonic experience, the rise of modern nationalism, romanticism, Darwinism and its social applications, the Industrial Revolution, imperialism, the emergence of modern ideologies, and the background of World War I.

HIST 4412-3. Twentieth-Century Europe. Examines the major political, economic, and social developments in twentieth-century Europe, from the origins of the First World War to the disintegration of communism in Eastern Europe. Particular attention paid to the political and social consequences of the two world wars, and the division, reconstruction, and transformation of Europe after 1945. Prereq.: junior or senior standing.

HIST 4422-3. World War I. The Brutalization of Europe. Examines the causes of World War I, the nature of the war itself, and its political, psychological, cultural, and social impacts. Considers the link between World War I and the rise of modern totalitarian movements and ideologies. Prereq.: JIST 3120 or 1040.

HIST 5842 (1-3). Independent Study: Europe: modern.

HIST 6002-3. Readings in Modern European History.

HIST 6112-3. Readings in Renaissance History.

HIS LE Specific Countries

HIST 1113-3. The History of England to 1660. Deals with Roman, medieval, and early modern periods. Covers the demographic, economic, and social patterns, political and religious developments, and cultural changes that contributed to the formation of the English nation. Approved for arts and sciences core curriculum: historical context.

HIST 1123-3. The History of England, 1660 to Present. Deals with the period from the seventeenth century to the present. Political, economic, social, and imperial developments that contributed to the creation of the modern industrial and democratic states are the major issues covered. Approved for arts and sciences core curriculum: historical context.

HIST 2843 (1-3). Independent Study: Europe: specific countries.

HIST 3113-3. Selected Readings in Early English History.

HIST 3133-3. Selected Readings in Britain since 1668.

HIST 3163-3. History and Literature of German England. Provides interdisciplinary study of English and one of its cultural and historical periods. Topics include politics, religion, family life, and the contemporary authors understood their world. Same as ENGL 3162. Approved for arts and sciences core curriculum: historical context.

HIST 3843 (1-3). Independent Study: Europe: specific countries.

HIST 4113-3. History and Culture of Medieval England. Explores the major historical, literary, and cultural developments in English from the Anglo-Saxon period through the fifteenth century. Prereq.: junior or senior standing. Same as ENGL 4112. Approved for arts and sciences core curriculum: historical context.

HIST 4123-3. Medieval England. Treats the major developments in English history from the Anglo-Saxon period through the fifteenth century. Emphasis on medieval English society during the thirteenth and fourteenth centuries. Prereq.: junior or senior standing.

HIST 4153-3. England in the Age of Revolution, 1689-1832. Deals with major political, social, and economic events and movements between the accession of King James II and the passage of the Reform Act of 1832.

HIST 4163-3. England in the Age of Collectivism, 1832-1945. Deals with major themes in political history, economic change, social and class developments, overseas empire, and foreign relations from the passage of the Reform Act of 1832 to the present.

HIST 4193-3. French Revolution. Analyzes the social, political, and cultural origins of the French Revolution of 1789; the major political and social transformations effected by the Revolutionary decade (1789-1799); and examines how the Napoleonic era (1799-1814) attempted to reconcile the disparate forces created by the Revolution and the radicalization of its policies. Approved for arts and sciences core curriculum: historical context.

HIST 4223-3. France since 1815. Examines the ongoing struggle between the revolutionary and counter-revolutionary traditions of France and how it shaped the political history and affected the social, cultural, and intellectual character of the nation from 1815 to the present.

HIST 4413-3. German History to 1849. Cultural, political, and social history of Germany up to 1849, including the revolutions of 1848. Emphasizes the political history of Prussia and such cultural phenomena as German romanticism.

HIST 4423-3. German History since 1849. A cultural, political, and social history of Germany since 1849. Emphasizes German unification, Romantic foreign policy, the rise of neo-romanticism, Weimar politics, and the rise of national socialism.

HIST 4433-3. Nazi Germany. Examines political, social, cultural, and psychological roots of national socialism, the nature of the national socialist regime, and those policies and actions that came directly out of its challenge to values central to Western civilization. Approved for arts and sciences core curriculum: historical context.

HIST 4613-3. History of Eastern Europe to 1914. Examines the conquering of the kingdoms of Eastern Europe by the Russian, Prussian, Habsburg, and Ottoman Empires, and the formation of national consciousness among the subject peoples of the region before World War I.

HIST 4623-3. History of Eastern Europe since 1914. Examines the struggle of nations of eastern Europe to assert their independence, from break-up of the imperial system at the end of World War I, through the Soviet bloc which emerged after World War II, to the establishment of democratic governments after the 1989 revolutions. Approved for arts and sciences core curriculum: historical context.

HIST 4713-3. History of Russia Through the Seventeenth Century. Establishment and expansion of the Russian state and the development of the political, economic, and social

---

1 Also available through correspondence study.
machinery necessary to administer it. From ancient times to the reign of Peter the Great and the proclamation of a Russian empire.

HIST 4723-3. Imperial Russia: Surveys major cultural, social, and economic changes from the reign of Peter the Great through the first Russian revolution of 1905.

HIST 4733-3. The Russian Revolution and the Soviet Regime: Covers in detail the significant social, economic, and political events of Soviet Russia from the February Revolution of 1917 to the present. Prereq., junior or senior standing. Approved for arts and sciences core curriculum: historical context.

HIST 4803-3. Special Topics in European History: Covers specialized topics in European history, to be specified in the Registration Handbook and Schedule of Courses.

HIST 5843 (1-3). Independent Study. Europe: specific countries.

HIST 6113-3. Readings in English History to 1714.

HIST 6123-3. Readings in English History since 1688.

HIST 6413-3. Readings in Modern German History.

HIST 6723-3. Readings in Modern Russian History.

HIST 6733-3. The Russian Revolutionary Movement.

HIST 7183-3. Interdisciplinary Seminar in British Studies. Introduces students to the methodologies and texts/sources of current work in English literature, history, theatre, art history, and certain of the social sciences. Students write a paper based upon the University of Colorado's distinctive research collections in British studies. Same as ENGL 7883.

HIST 7843 (1-3). Independent Study. Europe: specific countries.

Europe: Topical

HIST 2844 (1-3). Independent Study. Europe: topical.

HIST 4314-3. History of Science from the Ancients to Sir Isaac Newton: History of science from Pre-Socrates to Isaac Newton, understanding major intellectual themes in scientific thought and the historical context in which they developed. Same as HIST 3534. Approved for arts and sciences core curriculum: historical context.

HIST 4414-3. European Intellectual History, 1750-1870. Treats major developments in European thought from the Enlightenment to Nietzsche. Special attention given to the individuals whose ideas have had the greatest influence on modern intellectual history, e.g., Rousseau, Hegel, Herder, Marx, Kierkegaard, Baudelaire, Darwin, and others.

HIST 4524-3. European Intellectual History, 1870-Present. Emphasizes Nietzsche and the youth revolt against middle class society, the literary and artistic avant garde (impressionism to existentialism), the psychoanalytic movement, the European right and left, and post-WWII European thought.

HIST 4434-3. Topics in European Thought to 1900. Enables students to explore a historical theme in pre-1900 Western thought or culture. Theme (varied each semester) is explored in its social context and with reference to contemporary issues.

HIST 4444-3. Topics in European Thought: Twentieth Century. Focuses on a selected theme in the history of ideas since 1900. Topics vary each term but may include such themes as critical theory, European fascism, and contemporary developments in the philosophy of history.

HIST 4614-3. Women and Society in Industrial Europe. Examines impact of industrialization and related social change on women in modern European history. Topics include work, family, sexuality, and women in movements for social and political change. Same as WMST 4614. Approved for arts and sciences core curriculum: cultural and gender diversity.

HIST 5314-3. History of Science from the Ancients to Sir Isaac Newton. Same as HIST 4314.

HIST 5844 (1-3). Independent Study. Europe: topical.

HIST 6414-3. Readings in European Intellectual History.

HIST 7242-3. Research Methods on Medieval/Early Modern European History. Introduces students to research skills needed to work with historical manuscripts. Students learn to read late medieval/early modern handwriting, explore CU's microfilmed collections of manuscripts, and write a research paper based on the manuscript materials.

United States: Chronological Periods

HIST 1015-3. History of the United States to 1865. Surveys American history from first settlement until the end of the Civil War. Approved for arts and sciences core curriculum: United States context.

HIST 1025-3. History of the United States since 1865. Surveys social, economic, political, and cultural development of the United States from the close of the American Civil War to the present. Approved for arts and sciences core curriculum: United States context.

HIST 1035-3. Honors: The United States to 1865. Surveys American history from the first settlement until the end of the Civil War, taught for students with honors standing. Emphasizes reading and discussion of primary sources and interpretations of significant topics of this time period. Students explore critical thinking skills of analysis, evaluation, and interpretation from the historian's perspective. A student receiving credit for HIST 1015 may not receive credit for HIST 1035. Approved for arts and sciences core curriculum: United States context.

HIST 1045-3. Honors: The United States since 1865. Surveys American history from the Civil War to the present, taught for students with honors standing. Emphasizes reading and discussion of primary sources and interpretations of significant topics of this time period. Students learn critical thinking skills of analysis, evaluation, and interpretation from the historian’s perspective. A student receiving credit for HIST 1025 may not receive credit for HIST 1045. Approved for arts and sciences core curriculum: United States context.

HIST 4125-3. British Colonial America, 1690-1750. Second part of a year-long sequence in early American history. Concentrates on the economic, social, cultural, and political processes under way in the British colonies of North America during the period between the glorious revolution and the French and Indian War. HIST 4115 is desirable but not a prerequisite. Approved for arts and sciences core curriculum: United States context.

HIST 4215-3. The American Revolution, Examines the events leading to the War of Independence and the creation of the United States. Approved for arts and sciences core curriculum: United States context.

HIST 4225-3. The New Nation: America, 1789-1828. History of the United States from George Washington's inauguration to the dec-
HIST 4253-3. Jacksonian America. Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's nature and roles, western expansion, and political culture.

HIST 4313-3. Civil War and Reconstruction. Describes the forces at work in the antebellum period that led to sectional warfare, social, economic, and political changes effected by the war, the American agenda of reconstruction, and the long-range results of that difficult era. Approved for arts and sciences core curriculum: United States context.

HIST 4325-3. The Gilded Age. Examines social and economic changes that transformed American life during the years 1870-1900. Topics include labor violence, agrarian protest, political corruption, and racial and ethnic conflict as some of the consequences of these changes.

HIST 4413-3. United States History, 1800-1929. History of the United States during the early years of the 20th century, focusing on the economic, social, and political developments that shaped the course of American history.

United States: Topical Courses

HIST 2846 (1-3). Independent Study. United States Topical Courses.
HIST 4626-3. History of Women in the United States since 1890. Examines what it means to be female in twentieth-century United States, emphasizing comparison between classes and racial/ethnic groups. Women's writings serve as the basis for discussions of private and public roles, definitions of womanhood, interpersonal relationships, and struggles for autonomy and equality. Same as WMST 4626. Approved for arts and sciences core curriculum: cultural and gender diversity.

HIST 5106-3. Graduate Colloquium in United States History. Students gain an acquaintance with major works in the field and discuss current issues of interpretation and methodology.

HIST 6116-3. Readings in American Diplomatic History.

HIST 6326-3. Readings in United States Intellectual History. Examines the history of ideas and the social history of intellectuals in American society during the nineteenth and twentieth centuries. Stresses social and political dimensions and the changing cultural and institutional contexts of intellectual discourse. Prereq., graduate standing or instructor consent.

HIST 7566-3. Research Seminar in Labor History. Explores various issues in U.S. labor history through readings and research projects. Most of the readings are taken from writings on U.S. labor history. Special attention given to women, immigration, and regional patterns. Research skills emphasized. Prereq., HIST 6536 or instructor consent.

United States: Topical Courses 2

HIST 2117-3. History of Colorado, 1. Emphasizes historical variety and ethnic diversity of Colorado. Along with traditional themes in Colorado history, such as the gold rush, attention is given to Indian and Hispanic activity and culture.

HIST 2537-3. Chicano History. Examines social, economic, political, and cultural history of Americans of Mexican descent and focuses on the heritage of Mexican society and thought; the Mexican-U.S. war; Mexican-American society and thought; and the Chicano movement of the 1960s. Same as CHST 2537. Approved for arts and sciences core curriculum: United States context.

HIST 4217-3. The Early American Frontier. Examines the westward movement from the colonial period through 1850 in the region east of the Mississippi, with major stress on unique problems of society on the successive frontiers and their relationship to determination of national policies.

HIST 4227-3. The Later American Frontier. Deals primarily with the Trans-Mississippi west during the nineteenth and twentieth centuries, the westward advance of various frontiers, and their influence upon national development. Emphasizes economic factors and the associated cultural and social growth of the region.

HIST 4327-3. The American Southwest. Focusing on the region's three main peoples (Indian, Hispanic, and Anglo), course emphasizes dynamics of interethnic relations. Indian migrations, Spanish conquest and Indian response, Mexican-Indian interaction, and Anglo domination are some of the themes discussed. Approved for arts and sciences core curriculum: cultural and gender diversity.

HIST 4617-3. The Indian in American History: The Eastern Region. Explores pre-European social and cultural developments, longevity, and continuity of human history in North America. By examining ways in which Indian societies east of the Mississippi River responded to Euro-Americans, the Indians' role in eastern North American history is demonstrated. Approved for arts and sciences core curriculum: cultural and gender diversity.

HIST 4627-3. The Indian in American History: The Western Region. Explores the longevity and continuity of human history in North America by discussing pre-European social and cultural developments. By examining ways in which Indian societies west of the Mississippi River responded to Euro-Americans, the Indians' role in western North American history is demonstrated. Same as AIST 4627. Approved for arts and sciences core curriculum: cultural and gender diversity.

HIST 4717-3. Chinese-American History. Examines Chinese-American history from 1848 to the present day within context of socioeconomic and political developments in China and the United States. Topics include the Chinese diaspora, immigration to the United States, participation in the economy, the exclusion movement, community development, women, and family. Same as AAST 4717. Prereq., AAST 1015, HIST/AAST 1717, or instructor consent. Approved for arts and sciences core curriculum: cultural and gender diversity.

HIST 4727. Japanese-American History. An historical overview of the Japanese-American experience in the United States, highlighting early immigration (1860s - 1920s) vis a vis economic and political development in Meiji Japan. Also examines economic, social, political, and cultural factors in the U.S. Same as AAST 4727. Prereq., AAST 1015, HIST/AAST 1717, or instructor consent. Approved for arts and sciences core curriculum: cultural and gender diversity.

HIST 6317-3. Readings in the American West.

World Areas: Specific Regions

HIST 1038-3. Introduction to Latin American History. Broad survey of the history of that part of the Western Hemisphere now known as Latin America. Chronologically covers pre-historical period to present. Provides an understanding of the relationship of Latin America to the Western world, and is concerned with Latin American social and political development.

HIST 1208-3. Introduction to African History. Introduces students to African civilization and to its historical evolution from the dawn of humanity to the present. Topics include social patterns, economic structure, and religious and political systems. Latter part of course considers the impact of the European and African slave trade on societies, as well as colonialism.

HIST 1308-3. Introduction to Middle Eastern History. Interdisciplinary course that focuses on medieval and modern history of the Middle East (circa 600 CE to the present). Provides an introduction to the Islamic civilization of the Middle East and to the historical evolution of the region from the traditional into the modern era. Covers social patterns, economic life, and intellectual trends, as well as political development.

HIST 1408-3. Introduction to Indian History. Introduces origins of the civilization of India and to historical evolution of India from tradition to
modernity. Addresses social, economic, political, artistic, and religious patterns.

HIST 1608-3. Introduction to Chinese History. Introduces student to Chinese civilization and to its historical evolution, from neolithic period to present. Focuses on such subjects as social patterns, economic structure, and intellectual trends, as well as political developments.

HIST 2846 (1-3). Independent Study. World Areas: specific regions.

HIST 3028-1. Lab in Selected Readings in Latin American History. Gives students the opportunity to learn skills and techniques used in historical research on early Latin America. Teaches basic paleography; students use facsimile materials to acquire working ability to read Spanish documents from the sixteenth, seventeenth, and eighteenth centuries. Prereq., second-semester Spanish or equivalent.

HIST 3328-3. Selected Readings in Middle Eastern History. Examines selected issues in modern Middle Eastern history. Check with the department concerning the specific subject of the seminar. Prereq., junior or senior standing.

HIST 3848 (1-3). Independent Study. World Areas: specific regions.

HIST 4118-3. History of Mexico to 1821. Studies Mexican history beginning with roots and evolution of pre-Columbian civilizations and concluding with the events of Mexican independence in 1821. Emphasizes society and culture of the Aztecs and Mayans, the Spanish conquest of Mexico, and the colonial regime of New Spain.

HIST 4128-3. The Emergence of Modern Mexico. Studies Mexican history continues with the establishment of independence in 1821, examines the upheavals of the Mexican Revolution, and culminates with recent events in Mexico. Approved for arts and sciences core curriculum: contemporary societies.

HIST 4218-3. History of West Africa. Examines the long and rich history of West Africa from the era of ancient West African kingdoms to the modern period. Particular attention placed on understanding of traditional cultural values, the colonial experience, and modern problems.

HIST 4238-3. History of Southern Africa since 1800. Examines history of Southern Africa. Special emphasis placed on history of South Africa. Focuses on the decline of white rule and the region's strategic importance. Same as BLST 4257.

HIST 4318-3. The Medieval Middle East, A.D. 500-1600. Examines the history of the Middle East from 600 to the early modern period. Attention divided equally between political and economic history, and the arts and sciences characteristic of the civilization of Islam (theology, philosophy, mysticism, etc.).

HIST 4328-3. The Modern Middle East, 1600 to the Present. Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social, and cultural modernization in the major countries.

HIST 4358-3. The Arab-Israeli-Palestinian Problem. Examines the clash between modern Jewish and modern Arab nationalism over the area of Palestine/Israel since the late 1800s. Concludes with a simulation exercise in which the students work through a hypothetical crisis.

HIST 4628-3. Modern China. Examines China from 1750 to 1949. Focuses on such issues as the influence of imperialism, the emergence of nationalism, and the meaning of revolution.

HIST 4728-3. Modern Japanese History. Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-nineteenth century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific.

HIST 4748-3. Modern Japanese Intellectual History. Examines early modern intellectual traditions in their social and political contexts. Addresses developments in religious, ethical, social, political thought, including the influence of the importation of Western thought from the mid-nineteenth century.

HIST 5848 (1-3). Independent Study. World Areas: Specific Regions.

HIST 6318-3. Readings in Middle Eastern History.

HIST 7848 (1-3). Independent Study. World Areas: Specific Regions.

World Areas: Comprehensive and General

HIST 1009-3. Introduction to Third-World History. Focuses on the modern history of Asia and Africa (circa 1500 to the present). The first half of the course deals with the creation of the "Third World" in the early modern period and the impact of European imperialism upon it. The second half deals with political, economic, and social problems in the twentieth century Third World.

HIST 6329-3. Readings in Comparative Ethnohistory.

Humanities

HUMN 1010-6. Introduction to Humanities 1. Six meetings a week (three discussion classes, three lecture-demonstrations in art and music). Analytical and comparative study of works in literature, philosophy, music, and visual arts. From Greek to Baroque eras, emphasizing structure, content, and style in specific examples. Approved for arts and sciences core curriculum: historical context, or literature and the arts.

HUMN 1020-6. Introduction to Humanities 2. Continuation of HUMN 1010. From Baroque to contemporary styles. Credit cannot be received for both HUMN 1010-1020 and ENGL 2600-2610. Approved for arts and sciences core curriculum: historical context, or literature and the arts.

HUMN 2052-3. Tolstoy's War and Peace. Examines Tolstoy's War and Peace in depth, placing it in the historical and cultural context of early nineteenth-century Europe, and examining its connection with other broad themes and figures of Western literature.

HUMN 3000-3. Images of the Twentieth Century. Interdisciplinary study of twentieth-century themes in literature, film, and visual arts. Team taught.
HUMN 3033-3. The Comic Sense. Interdisciplinary approach to comedy, examining art, music, literature, and film from different periods. Comic theory interfaced with the study of particular works.

HUMN 3043-3. The Tragic Sense. Studies some of the great tragic works of art, music, and literature from the Greeks to the twentieth century. Tragic theory invoked as an aid to interpretation.

HUMN 3051-4. Film History 1. Follows film's historical and aesthetic growth by viewing silent and early sound films (half of the films shown are silent). Genres studied include documentaries, experimental films, and classic Russian, German, French, and American films made before 1940. Prereq.: FILM 1502 recommended. Same as FILM 3051. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 3061-4. Film History 2. Starts with the late 1930s and early 1940s films of Renoir, Welles, Cocteau, and Hitchcock and follows historical growth and evolution of film aesthetics to the present. Studies neo-realistic French new wave, and recent experimental films. Same as FILM 3061. Approved for arts and sciences core curriculum: literature and the arts.

HUMN 3145-3. African Americans in the Arts. Gives students the opportunity to explore interrelationships in the arts of African Americans, learning to recognize and appreciate the African-American contribution to our culture as a whole. Students also learn to think critically and avoid oversimplification when dealing with racism and stereotyping. Prereq.: HUMN 1020.

HUMN 4003-3. Film and Fiction. Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories, and plays and the films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting. Same as FILM 4003.

HUMN 4004-3. Film Theory. Philosophical attempt to define the nature of cinema. Intensive seminar involving a great deal of reading in classical and contemporary film theory, and requiring a working knowledge of silent film history. Limited to 20 students. Prereq.: HUMN 3051 or FILM 3051. Same as FILM 4004. Approved for arts and sciences core curriculum: critical thinking.

HUMN 4013-3. Narrative in the Arts. Explores the nature of narrative from *Genesi* to *Jealousy* in literary and visual forms.

HUMN 4023-3. The Hero and Fate in the Epic Tradition and the Modern Novel. Comparative and interdisciplinary study of the figure of the hero and the concept of fate in the epic tradition and the modern novel. Explores literary, religious, philosophical, and ethical issues in works like *Gilgamesh*, *Iliad*, *Armill*, *Beowulf*, *Madame Bovary*, and *Invisible Man*. Prereq.: HUMN 1010 or 1020, or equivalent.

HUMN 4042-3. Early Modernism: 1857-1922. Comparative, interdisciplinary period course examining some of the major artists and issues that informed the beginnings of modernism from the mid-nineteenth to the early twentieth century. Artists studied include Dostoevsky, Baudelaire, Nietzsche, Van Gogh, and Kafka. Prereqs.: HUMN 1010 and 1020.

HUMN 4092-3. Period Studies. May be repeated for credit up to a maximum of 9 credit hours. Students should check with the department for specific semester offerings. Prereq.: HUMN 1010 or 1020, or equivalent.

HUMN 4093-3. Studies in Humanities. May be repeated for credit up to a maximum of 9 credit hours. Students should check with the department for specific semester offerings. Prereqs.: HUMN 1010 and 1020, or equivalent.

HUMN 4093-3. Studies in Humanities. May be repeated for credit up to a maximum of 9 credit hours. Students should check with the department for specific semester offerings. Prereqs.: HUMN 1010 and 1020, or equivalent.

HUMN 4133-3. The Dramatic Arts. Interdisciplinary course intended to examine and compare various forms of the dramatization of narrative: written texts, audiotapes, videotapes, film, and live performance. Compares different versions of the same narrative or theme, especially if different media are used and different time periods are involved. Prereq.: HUMN 1010 or 1020.

HUMN 4135-3. Art and Psychoanalysis. Explores psychoanalytic theory as it relates to our understanding of literature, film, and other arts. After becoming familiar with some essential Freudian notions (repression, narcissism, ego/ libido, dream work, etc.), students apply these ideas to works by surrealist artists (Flaubert, James, Kafka, Hoffman, and Hitchcock). Prereq.: HUMN 1020.

HUMN 4160-3. Myth in the Arts. Studies representative myths in the art, music, and literature of ancient and modern worlds. It is recommended that students first take HUMN 1010 and 1020, or CLAS 1100.

HUMN 4165-3. Economics in Literature. Interdisciplinary study of the relationship between economics and literature. Foci on representation of economic phenomena and criticism and formulation of economic theories in literary works like *Don Quixote*, *Hard Times*, *Death of a Salesman*, and *Grapes of Wrath*. Prereqs.: HUMN 1010 or 1020, and ECON 2010 or 2020, or equivalent.

HUMN 4522-3. The Art of Courly Love: The Culture of the Medieval Provençal Troubadours. Comparative, interdisciplinary study of the poetry, music, art, customs, beliefs, and practices of the culture surrounding the medieval Provençal troubadours. Draws from sources including literary texts, music, illuminated manuscripts, and films. Prereq.: HUMN 1010 or 1020, or equivalent.

HUMN 4555-3. The Arts of Interpretation. Introduces various hermeneutical methodologies (literary/philosophical criticisms, biblical exegesis, art history, etc.) with which to examine the questions of interpretation. Methodologies are studied in close conjunction with particular works of art. Prereq.: HUMN 1010 or 1020.

HUMN 4825-3. Law and Literature. Explores law as theme and structure in literary texts from different periods, plus readings in legal materials. HUMN 4840 (1-3). Independent Study.

Kinesiology

KINE 1010-2. Introduction to Kinesiology. Introduces the scientific foundation of kinesiology (the study of human movement and performance). Includes historical development of the discipline and introduces students to its many facets, including anatomy, biomechanics, exercise physiology, motor development, motor learning, motor control, and social psychological aspects of human performance. Career opportunities in kinesiology are also discussed.

KINE 2700-3. Introduction to Statistics and Research in Kinesiology. Introduces types of statistics and research methods of accomplishing research, and skills necessary to read and interpret research in the field of kinesiology.

KINE 2840 (1-3). Elective Activity. Only by consent of departmental chair.

KINE 2910 (1-3). Practicum in Kinesiology. Practical experience in organized situations with direct supervision. Prereq.: instructor consent.

KINE 3200-3. Sport and American Society. Introduces sport as one of the most pervasive human activities in America. Relationship of sport to various social institutions and processes. Multidisciplinary approach to subject matter taken from physical education, sociology, psychology, American literature, religious studies, and anthropology.

KINE 3500-3. Human Development and Movement Behavior. Studies changes in motor behavior and skill performance across the life span; factors affecting such changes including physical growth and physiological changes, perceptual change, cognitive change, sociocultural practices and interventions. Prereqs., EPOB 3420 and 3430, and KINE 2700.

KINE 3710-3. Social Psychological Aspects of Physical Activity. Examines theoretical concepts and current research concerning psychological phenomena as they relate to motor performance, exercise, and sport. Topics include a scientific approach to studying movement behavior, arousal, anxiety, personality, group dynamics, modeling, efficacy, and exercise adherence. Prereqs., PSYC 1001 and KINE 2700.

KINE 4480-3. Perspectives on Aging. Creates awareness of aging as a developmental process and fosters an understanding of the older person in a changing social milieu. Examines physiological, psychological, and sociological aspects of aging. Prereq., EPOB 3420, 3430, or instructor consent.

KINE 4540-4. Analysis of Human Movement. Studies biomechanical and anatomical concepts serving as basis for analysis of movement. In addition, presents the applications of these principles to work, general physical activity, sports performance, and physical medicine. Prereqs., EPOB 3420, KINE 2700, and PHYS 2010.

KINE 4630-3. Modality Usage in Sports Medicine. Introduces students to those modalities that have special implication to sports injuries. Covers practical application as well as physiological responses and rationales associated with the use of a variety of modalities. Prereq., KINE 4460.

KINE 4650-3. Exercise Physiology. Examines physiological adjustments that occur in selected organ systems with acute and chronic exercise. Topos center on the physiological mechanisms pertaining to metabolic, cardiovascular, respiratory, and hormonal alterations. Prereqs., EPOB 3420 and 3430, and KINE 2700.

KINE 4660-3. Selected Topics in Exercise Physiology. Covers specific exercise physiology topics such as cellular cause of fatigue and muscle soreness, heart disease, regulation of blood flow, diabetes, aging, training adaptations, exercise at high altitudes, ergogenic aids, and excitement-contraction of muscles. Prereq., KINE 4650. Approved for arts and sciences core curriculum: critical thinking.

KINE 4670-3. Exercise Science Laboratory Techniques. Laboratory procedures and biomedical instrumentation pertinent to measuring and evaluating human performance. Prereq. or coreq., KINE 4650. Same as KINE 5670.

KINE 4760-3. Critical Thinking in Motor Behavior. Focuses on critical analysis of research in the area of motor behavior (motor control/learning and sport and exercise psychology). Students participate in group discussions, individual presentations, and written arguments. Prereq., KINE 3710 or KINE 3720. Approved for arts and sciences core curriculum: critical thinking.

KINE 4860 (1-3). Independent Study: Undergraduate.

KINE 4870 (1-3). Honors Thesis. Prereqs., KINE 2700 and acceptance into kinesiology honors program.

KINE 4930 (1-6). Internship. Opportunity for field/labouratory work in a variety of different settings. Prereqs., students must hold junior or senior status and have completed at least four of the major core classes. Consult with faculty for approval.

KINE 5010, 5020, 5030 (1-3). Seminar. Presentation of special topics in kinesiology.

KINE 5550-3. Biochemical Basis of Exercise. Examines the underlying biochemical mechanisms that are responsible for the physiological adaptations to short- and long-term dynamic exercise. Prereq., one year of chemistry. Prereq. or coreq., KINE 4650 or instructor consent.

KINE 5600-3. Physiological Basis for Physical Activity. Examines the immediate and long-range adaptations of the body to exercise, and the adjustment of selected body systems to the stress of physical activity. Prereq., KINE 4650 and EPOB 3430.

KINE 5630-3. Sports Medicine. Investigation and demonstration of applied exercise physiology, medicine, biopsychology, and other related disciplines contributing to assessment and improvement of human physical performance. Prereq., KINE 4650, EPOB 3430 (or equivalent), and college anatomy.

KINE 5660-3. Clinical and Exercise Electrocardiography. Involves lectures and laboratory practice in recognition and evaluation of normal and pathological electrical activity of the heart as demonstrated by the electrocardiogram. Intended to prepare graduate students who will monitor laboratory physiological testing and/or prescriptive exercise programs in laboratory settings. Prereqs., KINE 4650 and EPOB 3430.

KINE 5660-3. Advanced Laboratory Techniques in Exercise Science. Laboratory procedures and biomedical instrumentation pertinent to human performance and exercise biochemistry laboratories are presented through lecture and laboratory participation. Prereq. or coreq., KINE 5600.

KINE 5670-3. Exercise Science Laboratory Techniques. Same as KINE 4670.

KINE 5680-3. Exercise Management. Same as KINE 4680.

KINE 5710-3. Advanced Laboratory Techniques in Motor Behavior. Focuses on acquisition and analysis of kinematic signals associated with human movement, including kinetic and kinematic data. Also discusses psychological measurement techniques. Laboratory and individual research projects required. Prereq., KINE 3720 or instructor consent.

KINE 5730-3. Motor Control. Examines central and peripheral neural structures responsible for the control and coordination of human movement, and investigates theories of motor control from a behavioral and mechanical view. Prereq., KINE 3720 or instructor consent.

KINE 5790-3. Psychological Basis for Human Performance. Advanced course dealing in depth with specialized topics relevant to motor perfor-
LING 2000-3. Introduction to Linguistics. Introduces the study of languages as structural systems. Principles of sound patterns, word formation, meaning, and sentence structure. Gives attention to language acquisition, psycholinguistics, language families, dialects, historical change in languages, and different language types.

LING 2200-3. Language in Its Social Context. Explores the relation of language to society. Varieties of language are described, and the relationship between social class, ethnic group, gender, etc., and language is discussed. Develops view that language is a means of social interaction.

LING 2400-3. Language and Gender. Familiarizes students with the effects of gender on language use; discusses popular beliefs and scholarly theories about language and communication. Provides students with tools for exploring the role of language and gender. Approved for arts and sciences core curriculum: cultural and gender diversity.

LING 2800 (1-3). Special Topics in Linguistics. Intensive study of a selected area or problem in linguistics.

LING 3220-3. American Indian Languages in their Social and Cultural Context. A sampling of the many languages and cultures found in America before Columbus. Emphasizes those living in what eventually became the United States, but also gives attention to the languages and higher civilizations of Latin America. Approved for arts and sciences core curriculum: cultural and gender diversity.

LING 2900 (1-3). Independent Study.

LING 3500-3. Language and the Public Interest. Studies language in public and private use, concentrating on semantic devices as found in language of political propaganda, advertising, business, and government, as well as everyday use of language between people.

LING 3800 (1-4). Special Topics in Linguistics. Intensive study of a selected area or problem in linguistics.

LING 4030-3. Linguistic Phonetics. Introduces practical and theoretical aspects of phonetics. Provides training in recognition and production of speech sounds, lectures on fundamentals of articulatory, acoustic, and auditory phonetics. Visits to the sound laboratory. Same as LING 5030.

LING 4100-3. Perspectives on Language. Provides extended critical examination of a few selected issues, chosen each term for their general interest and relevance, e.g., the relation between language and thought, or human language vs. animal languages and computer languages. Prereq., LING 2000 or equivalent, and junior or senior standing. Approved for arts and sciences core curriculum: critical thinking.

LING 4220-3. Psycholinguistics. Studies processes of perceiving speech and interpreting it as meaningful and of expressing communicative intentions as utterances. Emphasizes roles of the brain and of perceptual and motor systems. Writing, gestural, and animal communicative systems are also treated. Prereqs., LING 2000 and PSYC 1001. Same as PSYC 4220.

LING 4410-3. Phonology. Studies sound systems of language. Introduces both principles of organization of sound systems and major kinds of phonological structures found worldwide. Provides extensive practice in applying phonological principles to data analysis. Prereq., LING 2000 and 4030. Same as LING 5410.

LING 4420-3. Morphology and Syntax. Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages. Prereq., LING 2000. Same as 5420.

LING 4560-3. Language Development. Emphasizes acquisition of language by young children: development in later years and into adulthood is also treated. Particular attention given to roles of environment and of neurophysiological endowment in learning to communicate with words, sentences, and narratives. Prereqs., LING 2000 and PSYC 1001. Same as CDSS 4560 and PSYC 4560.

LING 4610-3. English Structure for Teachers of English to Speakers of Other Languages. Description of morphological and syntactic categories and structures of English. Prereq., LING 2000 or graduate standing. Same as LING 5610.

LING 4810-3. Senior Seminar in Linguistics. Topics vary from year to year, depending on interest of faculty and prospective students. Offerings are at intermediate level of difficulty.

LING 4830-3. Honors Thesis. Required for students who elect departmental honors. Students write an honors thesis based on independent research under the direction of a faculty member.

LING 4900 (1-3). Independent Study.

LING 5030-3. Linguistic Phonetics. Same as LING 4030.

LING 5200-3. Teaching Linguistics. Students prepare for teaching introductory linguistics courses by review of background, readings, preparation of course materials, and supervised practice in instruction. May not be applied toward the M.A. or Ph.D. Prereq., instructor consent.

LING 5300-3. Research in Psycholinguistics. After a general introduction to issues and research methods in psycholinguistics (language production and comprehension, language and cognition, language acquisition), several major current research topics, such as models of speech production, and theories of brain specialization for language are explored. Same as PSYC 5300.

LING 5410-3. Phonology. Same as LING 4410.

LING 5430-3. Semantics and Pragmatics. Explores fundamental concepts of semantics and pragmatics, including theories of communication and meaning representation, conversational implications, speech acts, and discourse structure. Prereq., LING 5420 or instructor consent.

LING 5450-3. Introduction to Formal Syntax. Introduces the use of formal models of syntax in the study of language. Surveys the motivation, claims, and influence of the most widely used models. One model is chosen as a framework for the study of methodology. Prereq., LING 2000.

LING 5570-3. Introduction to Diachronic Linguistics. Same as LING 4570.

LING 5610-3. English Structure for Teachers of English to Speakers of Other Languages. Same as LING 4610.

LING 5900 (1-3). Independent Study.

LING 6000-3. Linguistics for Cognitive Science. Surveys linguistics for doctoral students, especially those in the cognitive science disciplines. Covers the phenomena studied by linguists (sound systems, grammar, meaning, and function, language use, and language change) and the theoretical approaches linguists take to these phenomena. Not open to graduate students in linguistics. Prereq., graduate status or instructor consent.

LING 6260-3. Knowledge Representation and Language Structures. Examines parallels between natural language structures and categories and knowledge representation formalisms current in cognitive science. Specifically addresses the evidence for a language-like model of knowledge and the distinction between universal and language-particular features.

LING 6300-3. Topics in Language Use. Discusses current issues and research in a selected area related to language use and function. Sample topics include conversational interaction, language policy, language content, and socio-linguistic variation.

LING 6510-3. Language Structures. Surveys the structure of one or more languages, emphasizing understanding of how parts of the language interact. Designed to supplement courses in which parts of languages are used to illustrate theoretical claims. Prereq., LING 5410 and 5420.

LING 6520-3. Topics in Comparative Linguistics. Students compare and contrast selected structures of languages treated from a typological, genetic, or areal contact perspective. No special prior knowledge of the subject language is required. Prereq., LING 5410, 5420, and 5570.

LING 6940-3. Master's Degree Candidate.

LING 6950 (1-6). Master's Thesis.

LING 7000-3. Methods of Typological Research. Research practicum that provides experience in discovering generalizations about language from observations over a sample of individual languages. Students practice the steps in such research from formulation of research questions to presentation of results under close faculty supervision. Prereqs., LING 5410, 5420, and 5570 or equivalent.

LING 7100-3. Field Methods 1. Introduces the process of discovering structure of a language from data obtained directly from its speakers. Emphasizes effectiveness in the field context, rapid recognition of structural features, and preliminary formulation using computational tools. Prereq., LING 5410, 5420, or equivalent.

LING 7110-3. Field Methods 2. Continuation of LING 7100. Students continue field investigation of the same language, further applying the techniques introduced in LING 7100, but are expected to undertake a deeper analysis of one aspect of the language structure. Prereq., LING 7100.

LING 7420-3. Syntactic Theory. Covers various topics in syntactic theory. Prereq., LING 5420 or equivalent.

LING 7430-3. Semantic Theory. Current developments in the theory of linguistic semantics. Topics include truth-conditionals, generative linguistic theories, semantic theories of communicative competence, and integration of these theories in development of a combined theory of semantics and pragmatics. Prereq., LING 5430 or equivalent.

LING 7900 (1-3). Independent Study.

LING 8100-3. Seminar: Field Methods. Provides students with opportunity to analyze selected structures of a language from data elicited from a native speaker. Prereq., LING 7100 and at least one of LING 7410, 7420, and 7430.

LING 8240-3. Seminar: History of Linguistics. Treats different topics chosen from the four or five historical periods covering the history of linguistics. Intended to reveal coherence of linguistic ideas in their historical setting. Prereq., instructor consent.

LING 8420-3. Seminar: Advanced Syntax. Deeper analysis of one aspect of a language of the individual student's choice according to a particular theory of grammar. Each student is expected to produce a partial grammar of one linguistic topic. Prereq., LING 7420 or instructor consent.

LING 8430-3. Seminar: Topics in Semitic Theory. Devoted to particular topic in semantic theory, such as place and nature of the lexicon in linguistic theory, a particular semantically based theory of general linguistics (e.g., Montague grammar), or some aspect of lexicology (e.g., dictionaries). Prereq., LING 7430 or instructor consent.

LING 8530-3. Seminar: Areal Linguistics. Studies linguistic features shared by numerous languages or dialects within a given region, usually Africa or North America. Particular area or areas studied, however, depends on the interests of instructor and students. Prereq., instructor consent.

LING 8540-3. Seminar: Language Variation. Selected topics on the systematic variation of language. Relative emphasis on contextual, geographical, stylistic, and social variation differs from offering to offering. Prereq., instructor consent.

LING 8560-3. Seminar: Issues in Language Acquisition. Explores current issues in language acquisition in depth, through readings and through analyses of audio- and videotapes of young children. Course topics vary; sample topics are syllable structure, development of morphological markers, and development of locative structures. Prereq., LING 7560 or instructor consent.

LING 8570-3. Seminar: Diachronic Linguistics. Advanced topics in theory of language change or in reconstruction of language history. Prereq., LING 7570 or instructor consent.

LING 8990 (1-10). Doctoral Dissertation. All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.

English as a Second Language

Students first enrolled in fall 1989 and thereafter may not apply ESLG course work toward minimum degree requirements. Students may, although they are not required to, take ESLG 1110, 1210, or 1310 as sequences.

ESLG 1110-3. Spoken English for Foreign Students. Oral drills with goal of promoting fluency and listening comprehension. Does not fulfill humanities or major requirements.

ESLG 1120-3. Advanced Spoken English for Foreign Students. Continued practice in speaking and listening comprehension, with attention to grammar and pronunciation as well as meaning and appropriateness. Does not fulfill humanities or major requirements.

ESLG 1210-3. Written Composition for Foreign Students. Distinction between spoken and written English emphasizing grammar and vocabulary of the latter. Does not fulfill humanities or major requirements.

ESLG 1210-3. Written Composition for Foreign Students. Continued work on grammar and vocabulary with greater focus on the mechanics of writing and organization of material for longer connected discourse. Does not fulfill humanities or major requirements.

ESLG 1310-3. Intermediate English Structure for Foreign Students. Instruction and practice at the non-beginning level in colloquial and written American English. Intended for foreign students requiring additional study to become competent
in English for most university needs. Does not fulfill humanities or major requirements.

ESLG 1320-3. Advanced English Structure for Foreign Students. Instruction and practice at the advanced level in colloquial and written American English. Intended for foreign students needing additional study of English to function to the best of their ability in a university. Does not fulfill humanities or major requirements.

Mathematics

After completing one semester of calculus with a grade of C(2.00) or better, no math major may receive credit in any mathematics course numbered below 1300. No student may obtain more than 9 hours of credit in mathematics courses numbered below 1300. Summer offerings vary; check the summer schedule.

MATH 1110-3. The Spirit and Uses of Mathematics 1. For liberal arts students and prospective elementary teachers. Includes a study of problem-solving techniques in mathematics, the uses and role of mathematics in our society, and the structure of our familiar number systems. Additional topics are chosen from number theory, ancient numeration systems, computer science, modern geometry and algebra, and elementary logic. Prereq.: one year of high school algebra and one year of geometry. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 1120-3. The Spirit and Uses of Mathematics 2. Continuation of MATH 1110. Prereq.: one year of high school algebra and one year of geometry. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 1300-5. Analytic Geometry and Calculus 1. Topics include limits, derivatives of algebraic and trigonometric functions, applications of the derivative, integration and applications of the definite integral. Students with credit in MATH 1080, 1090, and 1100 will receive only 2 hours credit in MATH 1300. Students with credit in MATH 1300 may not receive credit in APPM 1350 or APPM 1370. Offered each fall and spring. Prereq.: two years of high school algebra, one year of geometry, and 1/2 year of trigonometry or MATH 1000-1040.

MATH 1310-5. Calculus 1 and Combinatorics. Topics include limits, differentiation, integration, elementary combinatorics, and elementary statistics. Designed especially for students in the biological and social sciences and for mathematics majors. Offered each fall. Prereq.: three years of high school math, including trigonometry.

MATH 1320-5. Calculus 2 and Mathematics of Chance. Introduces probability, integration techniques, iterative procedures, sequences and series, introductory estimation theory, and hypothesis testing and is designed especially for students in the biological and social sciences and for mathematics majors. Offered each spring. Prereq.: Calculus 1.

MATH 2300-5. Analytic Geometry and Calculus 2. A continuation of MATH 1300. Topics include transcendental functions, methods of integration, polar coordinates, conic sections, improper integrals, and infinite series. Students with credit in MATH 2300 may not receive credit in APPM 1360 or APPM 1380. Offered each fall and spring. Prereq.: Calculus 1.

MATH 2380-3. Mathematics for the Environment. An interdisciplinary course where analysis of real phenomena such as acid rain, population growth, and road-killed rabbits in Nevada leads to consideration of certain concepts in mathematics, including differentiation, integration, and some finite mathematics. One third of the course consists of individual projects chosen by students. Offered each fall. Prereq.: proficiency in high school mathematics. Same as QRMS 2380. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

MATH 2400-4. Analytic Geometry and Calculus 3. A continuation of Calculus 2. Topics include vectors, three-dimensional analytic geometry, partial differentiation and multiple integrals, and vector analysis. Students with credit in MATH 2400 may not receive credit in APPM 2350 or APPM 2570. Offered each fall and spring. Prereq.: Calculus 2.

MATH 2510-3. Introduction to Statistics. Elementary statistical measures. Introduces statistical distributions, statistical inference, and hypothesis testing. Students may not receive credit for both MATH 2510 and MATH 4570/5570. Offered each spring. Prereq.: two years of high school algebra.

MATH 3000-3. Introduction to Abstract Mathematics. Bridges the gap between lower-division mathematics courses and the more abstract and theoretical upper-division courses. Topics vary but often include informal logic, set theory, relations and functions, axiomatic systems with examples from algebra or geometry, and number systems. Offered each fall and spring. Prereq.: Calculus 2. Approved for arts and sciences core curriculum: critical thinking.

MATH 3110-3. Introduction to Theory of Numbers. Careful study of the set of integers: divisibility, congruences, arithmetic functions, sums of squares, quadratic residues and reciprocity, and elementary results on distributions of primes. Offered each spring. Prereq.: Calculus 3.

MATH 3130-3. Introduction to Linear Algebra. Basic properties of systems of linear equations, vector spaces, linear independence, dimension, linear transformations, matrices, determinants, eigenvalues and eigenvectors. Students with credit in MATH 3130 may not receive credit in MATH 3150. Offered each fall and spring. Prereq.: Calculus 3.

MATH 3140-3. Abstract Algebra 1. Careful study of the elementary theory of groups, rings, fields, polynomials, group and ring homomorphisms, and isomorphisms. Offered each fall and spring. Prereq.: MATH 3000, 3110, 3130, or 3150.

MATH 3150-3 Honors Introduction to Linear Algebra. Subject matter is the same as MATH 3150, but treatment is more thorough, with greater emphasis on theoretical concepts, as opposed to mere computational procedure, although the latter is not neglected. Students with credit in MATH 3150 may not receive credit in MATH 3150. Offered each fall. Prereq.: Calculus 3 and instructor consent.

MATH 3270-3. Computational Functions. Topics include Turing Machines, computable functions, the halting problem and noncomputable functions, Church's Thesis, Universal machines, Goedel's incompleteness theorem, and undecidable theories. Offered alternate springs. Prereq.: Calculus 2.

MATH 3830-3. Communicating Mathematical Ideas. Practice in acquiring and applying techniques of instruction used in the mathematics module program. Students participate in a seminar on theories of personalized instruction in mathematics and assist in the tutoring, testing, and video facilities of the mathematics module program. Offered each fall and spring. Prereq.: two semesters of calculus and permission of the director of the mathematics module program.

MATH 4180-3. Combinatorics 2. More advanced techniques in enumeration theory and graph theory. Finite groups, Polya's theory of counting, digraphs, finite rings and fields are discussed, as are applications in computer science, switching theory, and coding theory. Offered upon demand. Prereq.: MATH 3170.

MATH 4270-3. Computer Geometry. Involves synthetic and analytic projective geometry, especially as applied to depicting mathematical phenomena. Topics may include tangents, envelopes, splines, quadric surfaces, conformal mappings, singular points of surfaces, level curves, vector fields, and polyhedra. Offered each fall. Prereq.: Calculus 3, MATH 3130, CSCI 1200, and instructor consent.

MATH 4310-3. Introduction to Analysis. Calculus on one variable. Topics include the real number system, continuity, differentiation, sequences and series, convergence, uniform convergence, Taylor's theorem, integration. Offered each fall and spring. Prereq.: Calculus 3 and MATH 3000. MATH 3130 highly recommended.

MATH 4320-3. Multivariable Analysis. Calculus of several variables. Topics include continuity, differentiation and integration, implicit function theorem, inverse function theorem, Fourier series, time permits. Offered each spring. Prereq.: MATH 4310, and either MATH 3130 or 3150 or APPM 2360.

MATH 4370-3. Honors Advanced Calculus and Related Subjects 1. Topics include completeness of the number system; concepts and theorems that underlie the calculus of functions of one and several variables; and other topics including trans-finite cardinal numbers, axiom systems, integration in finite terms, sets of measure zero, Hausdorff dimension, Noether for both MATH 4340 and 4370. Offered upon demand. Prereq.: MATH 3150 or instructor consent.
MATH 4380-3. Honors Advanced Calculus and Related Subjects 2. Continuation of MATH 4370. Topics include vector analysis and potential theory; Fourier series and integrals; existence and uniqueness of solutions of differential equations; and other topics including probability theory, calculus of variations, introduction to differential geometry, and boundary-value problems of classical potential theory. No credit for both MATH 4320 and 4380. Offered upon demand. Prereq., MATH 4370.

MATH 4430-3. Ordinary Differential Equations. Elementary systematic introduction to first-order scalar differential equations, nth order linear differential equations, and n-dimensional linear systems of first order differential equations. Additional topics are chosen from equations with regular singular points, Laplace transforms, phase plane techniques, basic existence and uniqueness, and numerical solutions. Offered each fall and spring. Prereq., Calculus 3 and either MATH 3130 or 3150 or APPM 2360.

MATH 4450-3. Introduction to Complex Variables. Theory of functions of one complex variable, including integrals, power series, residues, conformal mapping, and special functions. Offered each fall and spring. Prereq., Calculus 3 or APPM 2350 or 2370.

MATH 4460-3. Applied Topics in Complex Variables. Applications of complex variables with topics chosen from the following: classical functions (e.g., Legendre, Bessel) defined by differential equations, especially their asymptotic properties and their behavior under changes of variable; Laplace, Fourier and Z-transforms; conformal mapping with applications to solving boundary value problems; other topics as interest and time permit. Offered each spring. Prereq., MATH 4450.

MATH 4470-3. Introduction to Partial Differential Equations 1. Topics include initial and boundary value problems for the wave, heat, and Laplace equations; separation of variables method, eigenvalue problems, Fourier series, orthogonal systems. Offered each fall and spring. Prereq., Calculus 3. Credit may not be received for both MATH 4450 and APPM 3570 or for both MATH 4450 and ECEN 3810.

MATH 4520-3. Introduction to Mathematical Statistics. Topics include point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness; tests of simple and composite hypotheses, linear models, and multiple regression analysis. Analysis of variance distribution-free methods. Offered each spring. Prereq., MATH 4510. Same as MATH 5520, APPM 4520 and 5520.

MATH 4650-3, 4660-3. Intermediate Numerical Analysis 1 and 2. Topics include solution of algebraic and transcendental equations, linear and nonlinear systems of equations. Interpolation, integration, solution of ordinary differential equations, least squares, sources of error and error analysis, computer implementation of numerical methods, matrix eigenvalue problems and summation of infinite series. MATH 4650 is offered each term; MATH 4660 is offered each spring. Prereqs., CSCI 1200 or CSCI 1700; and APPM 2360 or MATH 3130 or APPM 3150. Prereq. for MATH 4660 is MATH 4650. Same as APPM 4650 and 4660.

MATH 4710-3. Introduction to Mathematical Logic. Topics include sentential logic and first-order logic. Completeness theorems. Offered alternate falls. Prereq., two upper-division courses in mathematics.

MATH 4730-3. Set Theory. Careful study of the theory of cardinals and ordinal numbers, definition by recursion, the statement of the continuum hypothesis, simple cardinal arithmetic, and other topics chosen by the instructor. Offered alternate falls. Prereq., Calculus 3 or MATH 3000.

MATH 4800-3. History of Mathematics. Selection of topics in the history of mathematics from earliest times to present, emphasizing Greek mathematics, development of calculus in the seventeenth century, and history of algebra, analysis, and geometry in the nineteenth and twentieth centuries. Offered each term. Prereq., two upper-division courses in mathematics. Same as MATH 5800.

MATH 4900 (1-3). Independent Study.

MATH 4955-3. Undergraduate Seminar in Mathematics. Introduces undergraduates to mathematical topics and strategies for research. May be repeated once. Offered upon demand. Prereq., three semesters of calculus, APPM 3250 or upper-division math course, and instructor consent.

Graduate Courses
Undergraduates must have departmental approval to take 5000-6000 level mathematics courses; 7000-8000 level courses are open only to graduate students.

MATH 5030-3, 5040-3. Intermediate Mathematical Physics 1 and 2. Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory, and Fourier analysis are discussed. Prereqs., MATH 4310 and 4320. Same as PHYS 5030 and 5040.

MATH 5430-3. Ordinary Differential Equations. Introduces theory and applications of ordinary differential equations, including existence and uniqueness theorems, qualitative behavior, series solutions, and numerical methods, for scalar equations and systems. Prereq., MATH 3130 and 4310.

MATH 5460-3. Applied Topics in Complex Variables. Same as MATH 4660.

MATH 5520-3. Introduction to Mathematical Statistics. Same as MATH 4520 and APPM 4520.

MATH 5800-3. History of Mathematics. Same as MATH 4800.

MATH 6120-3. Theory of Numbers 2. Selected topics in algebraic and analytic number theory. Prereq., MATH 6110. MATH 6130 and 6350 are recommended.

MATH 6210-3, 6220-3. Introduction to Topology 1 and 2. Elements of general topology, algebraic topology, differentiable manifolds. Prereqs., MATH 3130, 3140, 4310, and 4320.

MATH 6230-3, 6240-3. Introduction to Differential Geometry 1 and 2. Differential forms in Euclidean 3-space, frame fields, Frenet formulas, calculus of differential forms on surfaces, extrinsic and intrinsic geometry of surfaces, Riemannian geometry of differentiable manifolds, geodesics, curvature, the Gauss-Bonnet theorem. Prereqs., MATH 3130 and 4320.

MATH 6410-3, 6420-3. Calculus of Variations and Control Theory 1 and 2. Classical necessary and sufficient conditions emphasizing the simplest problems; the problem of Lagrange; Hamiltonian and Lagrangian and other quick and approximate procedures emphasizing applications in the behavioral, biological, and physical sciences. Prereq., instructor consent.

MATH 6470-3, 6480-3. Advanced Partial Differential Equations 1 and 2. General theory, first order equations; classification of second order equations; theory and methods of solution of elliptic, parabolic, and hyperbolic types of equations; maximum principles; Green's functions; potential theory. Prereq., MATH 4310 and 4320.

MATH 6540-3. Time Series Analysis. Basic properties, linear extrapolation, and filtering of stationary random functions. Spectral and cross-spectral analysis; estimation of the power spectrum using computers; nonstationary time series; comparison of various computer programs. Prereq., MATH 4510 or instructor consent. Same as APIM 6540.

MATH 6550-3. Introduction to Stochastic Processes. Systematic study of Markov chains and some of the simpler Markov processes including: renewal theory, limit theorems for Markov chains, branching processes, queuing theory, and birth and death processes. Applications to physical and biological sciences. Prereq., MATH 4510 and 4310, or instructor consent. Same as APIM 6550.

MATH 6620-3. Numerical Solution of Initial Value Problems. Includes multi-step and single-step methods for ODE; stability; stiff equations; difference schemes for heat and wave equations; applications. Prereq., CSC 3550 or 5600; MATH 3130, 4310, and 4430.

MATH 6630-3. Numerical Solution of Boundary Value Problems. Includes finite difference solution of two-point boundary problems and elliptic problems; methods of SOR, ADI, conjugate gradients; finite element method; nonlinear problems; applications. Prereq., MATH 5130, 4310, 4430, or 4650.

MATH 6730-3, 6740-3. Advanced Set Theory 1 and 2. Cardinal and ordinal arithmetic, generalizations of Ramsey's theorem, independence of the axiom of choice and of the generalized continuum hypothesis. Prereq., MATH 4710 and 4730, or instructor consent.

MATH 6900 (1-3). Independent Study.

MATH 6950 (1-6). Master's Thesis.

MATH 8230-3, 8240-3. Algebraic Topology 1 and 2. Homology and cohomology theories; homotopy theory; obstruction theory; and applications. Prereq., MATH 6130 and 6140, MATH 6210 and 6220, or instructor consent.

MATH 8250-3, 8260-3. Mathematical Theory of Relativity 1 and 2. Maxwell equations; Lorentz force; Minkowski space-time; Lorentz, Poincaré, and conformal groups; metric manifolds; covariant differentiation; Einstein space-time; cosmologies; unified field theories. Prereq., instructor consent.

MATH 8330-3, 8340-3. Functional Analysis 1 and 2. Introduction to such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations, spectral theorem for bounded self-adjoint operators), and Banach algebras (the Gelfand theory). Prereq., MATH 6310 and 6320.

MATH 8990 (1-3). Independent Study.

MATH 8990-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.

Topics

MATH 6174-3. Topics in Combinatorial Analysis. Topics such as finite combinatorial analysis, combinatorial questions entering in topology, infinite permutations and transformations, graph theory. Prereq., instructor consent.

MATH 6404-3, 6414-3. Topics in Applied Mathematics 1 and 2. Selected topics in mathematical problems arising from various applied fields such as mechanics, electromagnetic theory, and economics. Prereq., instructor consent.

MATH 6534-3. Topics in Mathematical Probability. Prereq., advanced calculus and MATH 4510.

MATH 8114-3, 8124-3. Topics in Number Theory 1 and 2. May include theory of algebraic numbers, L-series and zeta functions, the zeros of an algebraic variety, character sums, multiplicative and additive number theory, diophantine equations and approximations, or other topics chosen by instructor. Prereq., MATH 6120 or instructor consent.

MATH 8174-3, 8184-3. Topics in Algebra 1 and 2. Detailed study of advanced topics not covered in modern algebra or other courses, to be chosen by instructor. Prereq., modern algebra. MATH 8174 is not required for MATH 8184.

MATH 8304-3, 8314-3. Topics in Analysis 1 and 2. Advanced topics in analysis include Lie groups, Banach algebras, operator theory, ergodic theory, representation theory, etc. Prereq., MATH 8330 and 8340, or instructor consent.

MATH 8324-3, 8334-3. Topics in Real Variables 1 and 2. Abstract measure theory, function spaces, and other topics. Prereq., MATH 6310 and 6320, or instructor consent.

MATH 8364-3, 8374-3. Topics in Complex Variables 1 and 2. Advanced topics in complex analysis: Riemann surfaces, several complex variables, special functions, rational approximation, potential theory, etc. Prereq., instructor consent.

MATH 8714-3, 8724-3. Topics in Logic 1 and 2. Selected advanced topics in logic or foundations to be chosen by the instructor. Prereq., instructor consent.

Seminars

Normally, about half of the following seminars are given each year. The same seminar number may be repeated for credit.

MATH 5905-1. Mathematics Teacher Training. Designed to train students to become effective teachers. Students teach a mathematics course, meeting weekly with faculty to discuss problems particular to the teaching of mathematics. Prereq., graduate standing and experience as a teaching assistant.

MATH 8815-3. ULAM Seminar.

Mathematics Module Courses

Courses numbered 1000 through 1100 are self-paced 1-credit courses, or "modules," administered by the Mathematics Module Program. Certain combinations of modules are equivalent to conventional courses in college algebra, college trigonometry, and mathematics for business and social sciences, as indicated below.

MATH 1000-1. Fundamentals of College Algebra. Polynomials, lines, systems of linear equations, factoring, rational expressions, and inequalities. Students who elect to follow MATH 1000 with MATH 1010 and MATH 1020 receive the equivalent of a conventional 3-credit course in college algebra. Prereq.: one year of high school algebra.

MATH 1010-1. Techniques of College Algebra. Negative and fractional exponents, radicals, quadratic equations, permutations and combinations, and binomial theorem. Covers the second one-third of a conventional 3-credit course in college algebra. Prereq.: MATH 1000.

MATH 1020-1. Logarithmic and Exponential Functions. Functions and graphs, inverse functions, and properties of logarithms and exponential functions. Covers the final one-third of a conventional 3-credit course in college algebra. Prereq.: MATH 1010.

MATH 1030-1. Numerical Trigonometry. Angles, trigonometric functions, numerical calculations, law of sines, law of cosines, and graphs of trigonometric functions. Students who elect to follow MATH 1030 with MATH 1040 receive the equivalent of a conventional 2-credit course in college trigonometry. Prereq.: MATH 1020, or 1 1/2 years of high school algebra and one year of high school geometry.

MATH 1040-1. Analytical Trigonometry. Inverse trigonometric functions, trigonometric identities, and trigonometric equations. Covers the second half of a conventional 2-credit course in college trigonometry. Prereq.: MATH 1030.

MATH 1050-1. Linear Equations and Matrices. Lines and linear equations, matrix methods for solving systems of linear equations, matrix algebra, matrix inversion, and applications. Students who elect to follow MATH 1050 with MATH 1060 and MATH 1070 receive the equivalent of a 3-credit course in finite mathematics for business and social sciences. Prereq.: MATH 1000 or 1 1/2 years of high school algebra.

MATH 1060-1. Linear Programming. Linear inequalities, geometric method of linear programming, simplex method of linear programming, and duality principle. MATH 1060 covers the middle one-third of a standard one-semester course in finite mathematics for business and social sciences. However, MATH 1060 by itself forms a self-contained short course in linear programming, suitable for students whose backgrounds and/or placement scores indicate that they are adequately prepared. Prereq.: MATH 1050 or MATH 1010 or 1 1/2 years of high school algebra.

MATH 1070-1. Combinatorics and Probability Theory. Sets and counting, permutations, combinations, random experiments, sample spaces, and calculation of probabilities. MATH 1070 provides the fundamental one-third of a standard one-semester course in finite mathematics for business and social sciences. However, MATH 1070 by itself forms a self-contained core course in the theory of probability, which could serve as a foundation for students planning to take courses in statistics. Prereq.: MATH 1060 or MATH 1000 or 1 1/2 years of high school algebra.

MATH 1080-1. Functions, Limits, and Derivatives. Functions, graphs, limits and continuity, definition of derivative, derivative formulas, higher order derivatives, and applications. Students who elect to follow MATH 1080 with MATH 1090 and MATH 1100 receive the equivalent of a conventional 3-credit course in calculus for business and social sciences. Prereq.: MATH 1070 or MATH 1010 or two years of high school algebra.

MATH 1090-1. Fundamentals of Differential Calculus. Implicit differentiation, related and absolute extrema, concavity, first and second derivative tests, asymptotes, logarithmic, and exponential functions, and applications. MATH 1090 forms the middle one-third of a standard one-semester course in calculus for business and social sciences. Prereq.: MATH 1080 or one semester of high school calculus.

MATH 1100-1. Fundamentals of Integral Calculus. The indefinite integral, methods of integration, differential equations, the definite integral, area under a graph, function of several variables, and applications. MATH 1100 forms the final one-third of a standard one-semester course in calculus for business and social sciences. Prereq.: MATH 1090.

Quantitative Reasoning and Mathematical Skills

QRMS 1010-3. Quantitative Reasoning and Mathematical Skills. Designed to promote mathematical, scientific, and technological literacy among liberal arts students. Teaches basic mathematics and logic in the context of science, technology, and society. QRMS is not a traditional math class, but is designed to stimulate interest in and appreciation of mathematics and quantitative reasoning as valuable tools for comprehending the world in which we live. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

QRMS 2380-3. Mathematics for the Environment. An interdisciplinary course where analysis of real phenomena such as acid rain, population growth, and road-killed rabbits in Nevada leads to consideration of certain concepts in mathematics, including differentiation, integration, and some finite mathematics. One third of the course consists of individual projects chosen by students. Prereq.: proficiency in high school mathematics. Same as MATH 2380. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

Medieval Studies

MEDY 4020-3. Medieval Studies: Text and Contexts. Focuses on communities in the Middle Ages (i.e., clerical, court, and city), discussing major literary texts and visual monuments associated with them and their historical context. Emphasizes tensions between tradition and innovation, Latin and vernacular, East and West, Christian and non-Christian (Jewish and Islamic), sacred and secular, authority and freedom, and male and female. Prereq.: CLAS 1110 and 1120 or ENGL 2600 and 2610 or HIST 1010 and 1020 or HUMN 1010 or 1020 or instructor consent. Same as MDEV 5020.

MEDY 4030-3. Medieval Studies: Special Topics. Different topics offered by the faculty of the Medieval Studies Program in alternate semesters. Topics may include the literature of pilgrimage and crusade, women and minorities in the Middle Ages; the medieval Mediterranean, medieval theatre, medieval music, medieval epic, animal love and beast fable, the classics in the Middle Ages, and medieval education and the rise of universities. Prereq.: CLAS 1110 and 1120 or ENGL 2600 and 2610 or HIST 1010 and 1020 or HUMN 1010 or 1020 or instructor consent. Same as MDEV 5030.

MEDY 5020-3. Medieval Studies: Texts and Contexts. Same as MEDY 4020. Prereq.: graduate standing in comparative literature, theatre, classics, or instructor consent. Recommended prereq.: ability to use literary texts in their original language.

MEDY 5030-3. Medieval Studies: Special Topics. Same as MEDY 4030. Prereq.: graduate standing in comparative literature, theatre, classics, or instructor consent. Recommended prereq.: ability to use literary texts in their original language.

Museum

Independent Study

MUSM 4840 (1-3). Independent Study. Same as MUSM 5840.

MUSM 4900 (1-3). Independent Study. Same as MUSM 5900.

MUSM 5840 (1-3). Graduate Independent Study. Same as MUSM 4840.

MUSM 5900 (1-3). Graduate Independent Study. Same as MUSM 4900.

Museum Studies

MUSM 4011-4. Introduction to Museology. For majors in anthropology, biology, fine arts, geological sciences, history, or other museum-related subjects. Provides background in history and literature of museums, their objectives and methods, laboratory exercises in curatorial, exhibition, and administration. Same as MUSM 5011.
MUSM 4021-2. Selected Museum Topics. Provides framework for student projects on varied museum topics (e.g., ethics of collecting, data management, the museum's role in the community). Student projects include case study analysis, interviewing, and original presentations. Topics vary each semester. Same as MUSM 5021.

MUSM 5011-3. Introduction to Museology. Same as MUSM 4011.

MUSM 5021-2. Selected Museum Topics. Same as MUSM 4021.

**Anthropology**

MUSM 4462-3. Museum Field Methods in Anthropology. Archaeological field techniques including excavation, mapping, recording, photography, interpretation, and field laboratory. Same as MUSM 5462.

MUSM 4932-3. Museum Internship in Anthropology. Students participate in curatorial procedures of the anthropology section of the museum: conservation, cataloging, collection management, exhibit development, and administration. Prereq., MUSM 4011, 5011, or equivalent. Enrollment is limited: students should make arrangements during previous semester. Same as MUSM 5932.

**Botany**

MUSM 4933-3. Museum Internship in Botany. Students participate in curatorial procedures of the botany section of the museum: specimen preparation, labeling, identification, cataloging, conservation, and collection management. Prereq., MUSM 4011, 5011, or equivalent. Enrollment is limited: students should make arrangements during previous semester. Same as MUSM 5933.

MUSM 5933-3. Museum Internship in Botany. Same as MUSM 4933.

**Geology**

MUSM 4484-3. Museum Field Methods in Geology. Paleontological and paleocological field techniques including collecting, recording of geographic, stratigraphic, and quarry information; preservation; and interpretation, including applicable readings. Designed for individuals who have some background in geology but little or no prior field experience. Same as MUSM 5484.

MUSM 4934-3. Museum Internship in Geology. Students participate in curatorial procedures of the geology section of the museum: field collection, specimen preparation, cataloging, collection management, and a survey of current laws as they apply to specimens. Prereq., MUSM 4011, 5011, or equivalent. Enrollment is limited: students should make arrangements during previous semester. Same as MUSM 5934.

MUSM 5484-3. Museum Field Methods in Geology. Same as MUSM 4484.

MUSM 5934-3. Museum Internship in Geology. Same as MUSM 4934.

**Zoology**

MUSM 4935-3. Museum Internship in Zoology. Students participate in curatorial procedures of the zoology section of the museum: relaxing, fixing, positioning, preserving, cataloging, storing, and shipping. Also introduces students to the animal kingdom. Prereq., instructor consent. Same as MUSM 5935.

**Entomology**

MUSM 4936-3. Museum Internship in Entomology. Students participate in curatorial procedures of the entomology section of the museum: field collection, specimen preparation, labeling, identification, rearing techniques, and exhibit preparation. Prereq., MUSM 4011, 5011, or equivalent. Enrollment is limited: students should make arrangements during previous semester. Same as MUSM 5936.

**Museography**

MUSM 4937-3. Museum Internship in Techniques 2. Continuation of MUSM 4927. More advanced techniques in restoration, molding, casting, and the making of facsimile reproductions. Students have opportunity to orient their learning more toward their major field. Same as MUSM 5937.

**Osteology**

MUSM 5498-2. Mammalian Osteology. Same as MUSM 4498.

**Music**

The following courses offered in the College of Music are accepted for arts and sciences credit (see College of Music in Course Description section for full descriptions).

EMUS 1832-3. Appreciation of Music. Approved for arts and sciences core curriculum: literature and the arts.

EMUS 3642-3. History of Jazz.

EMUS 4752-3. Women Composers.

**Natural Science**

The Natural Science Program is currently undergoing review by the College of Arts and Sciences. Please contact the Dean's Office for further information about course offerings.

NASC 1870 (1-3). Independent Study. Individual project, including the opportunity to aid in staff teaching activities.

NASC 3250-6. Nature and Society. Uses selected general themes involving the human relationship to the environment to integrate the physical and biological sciences. Such themes include energy and its transformations, humans as knowers and controllers of nature, and humans as agents in the processes of the biosphere. Prereq., any two-semester sequence of college-level science. Approved for arts and sciences core curriculum: natural science.

NASC 3510-3. Tropical Marine Ecology. Covers the biology and ecology of marine ecosystems emphasizing those occurring in tropical regions such as coral reefs. Studies how these ecosystems are changing and the future impact of human stress on the marine environment. For non-biology majors. Prereq., EPOB 1220, MCDG 1060,
or NASC 1240 (equals one year of college biology). Approved for arts and sciences core curriculum: natural science.

NASC 4250-2. Coral Reef Ecology. Two-week, fall semester course beginning after Christmas. Includes one week of lectures in Boulder and one week of field studies on one of the most complex and beautiful ecosystems in the world, the Caribbean reefs at Cozumel, Mexico. Prereq.: college-level ecology course and SCUBA certification.

NASC 4870 (1-3). Independent Study.

Oriental Languages and Literatures

Chinese

CHIN 1010-5. Beginning Chinese 1. Thorough introduction to modern Chinese (Mandarin), emphasizing speaking as well as reading and writing. Students learn both traditional full-form characters and the simplified versions used in mainland China. Prereq.: CHIN 1010. Continuation of CHIN 1101. Prereq., CHIN 1010.

CHIN 2020-10. Intensive Intermediate Modern Chinese. An intensive 10-week version of CHIN 2110 and 2120, offered in summer only. Prereq., CHIN 1020 or equivalent.

CHIN 2110-5. Intermediate Chinese 1. Reading, speaking, and writing modern Chinese, including continued study of both full-form and simplified characters; introduction to dictionaries; principles of character formation and classification; and the phonetic writing system (tsu-chin fu-hao). Prereq., CHIN 1020.

CHIN 3020-6. Intensive Advanced Modern Chinese. Intensive 10-week version of CHIN 310 and 3120, offered in summer only.

CHIN 3110-3. Advanced Chinese 1. Surveys a wide variety of materials written in modern Chinese, including selections from the works of Lu Hsun, and newspaper, scholarly, and literary articles from both Taiwan and mainland China. Extensive use of video materials supplements texts. Equally emphasizes enhanced reading, writing, and oral communication skills. Prereq., CHIN 2120.

CHIN 3210-3. Introduction to Classical Chinese. Systematic introduction to the classical language based on texts from the pre-Han and Han periods. Stresses precise knowledge of grammatical principles and exactitude in translation—the basis for all further work in classical Chinese. Prereq., CHIN 2120.

CHIN 4110-3. Readings in Modern Chinese Literature 1. Surveys a wide variety of literary works by modern Chinese authors, including Lu Hsun, Kuo Mo-jo, Ting Ling, Lao She, and Hao Jan. Special attention given to analyzing narrative style and character development. Prereq., CHIN 3120.

CHIN 4300-3. Open Topics: Readings in Chinese Literature. Intensive study of selected texts on a particular topic taught by regular or visiting faculty. Topics change each term; course may be repeated for credit once. Prereq., junior standing and instructor consent.

CHIN 4900 (1-3). Independent Study.

CHIN 5010-3. Sinological Methods, Provides training in research methods for graduate work in sinology. Weekly exercises require students to use standard bibliographic sources and tools. Students use li-shu, tsu-long-shu, dictionaries, dynastic histories, geographical treatises, gazetteers, and private historiography. Prereq., CHIN 3220 or equivalent.

CHIN 5210-3. Ancient Prose. Close study of selected pre-imperial and Han prose texts important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on works such as the Lue yu, Meng tsu, Ch'iu-nan tsu, Shih chi, Han shu, and Lan heng. Texts and selections vary from year to year. May be taken for credit twice. Prereq., CHIN 3220 or equivalent.

CHIN 5220-3. Ancient Poetry. Close study of selected pre-imperial and Han poetic works important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on the Shih ching and the Chi ch'u, as well as the fu and shih of Han writers. Texts and selections vary from year to year. May be taken for credit twice. Prereq., CHIN 3220 or equivalent.

CHIN 5280-3. Topics in Ancient Literature. Close study of a specific problem or issue in classical literature, e.g., early Chinese views and formulations of language's relationship to reality, or the commentary tradition and the emergence of allegorical and metaphysical approaches to interpreting texts. Topics vary from year to year. May be taken for credit twice. Prereq., CHIN 3220 or equivalent.

CHIN 5410-3. Medieval Prose. Close study of selected Six Dynasties and Tang prose works, emphasizing major writers and texts. Covers works written in both parallel prose and the ku-yen ("old style") form. Individual writers include Wang Hsü-ch'i, Tao Ch'ien, Li Hua, Han Yü, Liu Tsung-yüan, and Liu Yu-hsi. In addition, selected works from the anecdotal records are read. Texts and selections vary from year to year. May be taken for credit twice. Prereq., CHIN 3220 or equivalent.

CHIN 5420-3. Medieval Poetry. Close study of selected works of the Six Dynasties and Tang poetry. Studies major figures, poetic and stylistic variations, and the culturally revealing relationship of poetry to the natural and suprnatural world of medieval China. Focuses on poets such as Hsieh Ling-yün, Tao Ch'ien, Shen Yueh, Wang Wei, Li Po, Tu Fu, as well as important medieval anthologies of verse. Texts and selections vary from year to year. May be taken for credit twice. Prereq., CHIN 3220 or equivalent.

CHIN 5430-3. Medieval Thought and Religion. Close study of selected works of Six Dynasties and Tang intellectual and religious inspiration, important in the development of the medieval Chinese world view and for their role in medieval Chinese literature. Focuses on fundamentals of both literary and religious value from the Taoist and Buddhist canons, such as the Huang-t'ing ch'ing, Ch'en hau, Miao-fu lien-hua ching, and Tan ching. Texts and selections vary from year to year. May be taken for credit twice. Prereq., CHIN 3220 or equivalent.

CHIN 5480-3. Topics in Medieval Literature. Close study of a specific problem or issue in medieval literature, e.g., the role of encyclopedias and anthologies in literary training, the place and forms of literary composition at the imperial court, etc. Topics vary from year to year. May be taken for credit twice. Prereq., CHIN 3220 or equivalent.

CHIN 5610-3. Early Modern Prose. Close study of Sung, Ming, and Ch'ing prose texts selected for their inherent literary merit and for their significance in the Chinese literary tradition. Typically focuses on works by major authors such as Chu-yang Hsien, Su Shih, and Yuan Hung-tao. Texts and selections vary from year to year. May be taken for credit twice. Prereq., CHIN 3220 or equivalent.

CHIN 5620-3. Early Modern Prose. Close study of Sung, Yuan, Ming, and Ch'ing poetry. Stresses major figures, stylistic variations, various "poetry schools," new directions in shih verse, and the rise and development of ta'ku. Texts and selections vary from year to year. May be taken for credit twice. Prereq., CHIN 3220 or equivalent.

CHIN 5630-3. Early Modern Fiction. Close study of selected vernacular and classical fiction of the Ming and Ch'ing. Normally focuses on long novels such as Hsi-yu ch'i, San-kao yen-i, Shi-su chuan, Chin Ping Mei, as well as short fiction by Feng Meng-lung and Ling Meng-chu. Texts and selections vary from year to year. May be taken for credit twice. Prereq., CHIN 3220 or equivalent.

CHIN 5680-3. Topics in Early Modern Literature. Close study of a specific problem or issue in early modern literature, e.g., the relationships among religion, folklore, and early fiction; the issue of genre and traditional fiction; the role of elite versus popular cultures in the composition of fiction; and the relationship of the state and censorship and the southern philosophical schools to the publication of fiction. Topics vary from year to year. May be taken for credit twice. Prereq., CHIN 3220 or equivalent.

CHIN 5810-3. Modern Literature. Close study of selected texts in various genres of Chinese literature from the May Fourth period (beginning ca. 1917) to the establishment of the People's Republic of China (1949). Focuses on major and influential works produced in this fertile period of experimentation with Western, modernist types of literature. Texts and selections vary from year to year. May be taken for credit twice. Prereq., CHIN 4120 or equivalent.
CHIN 5820-3. Contemporary Literature. Close study of selected texts in various genres of Chinese literature from 1949 (the establishment of the People's Republic of China) to the present. Focuses on major works from the very different literary worlds of Taiwan and mainland China. Texts and selections vary from year to year. May be taken for credit twice. Prereq., CHIN 4120 or equivalent.

CHIN 5880-3. Topics in Twentieth-Century Literature. Close study of a specific problem or issue in twentieth-century literature, e.g., feminist fiction in China, modernism in fiction and poetry, and the role of literary criticism in modern literature. Topics vary from year to year. May be taken for credit twice. Prereq., CHIN 4120 or equivalent.

CHIN 5900 (1-3). Independent Study.

CHIN 6900 (1-6). Independent Study.

*Chinese Courses in English*

The following courses require no knowledge of Chinese.

CHIN 1051-3. Masterpieces of Chinese Literature in Translation. Surveys Chinese thought and culture through careful reading and discussion of selected masterworks of Chinese literature in acceptable translation. Texts include significant works of poetry and fiction, and philosophical and historical writings from various eras. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

CHIN 4811-3. Worlds of Ancient and Medieval Poetry. Lectures and discussion. Studies ancient and medieval Chinese poetry, with special emphasis on the great masters of the Tang (618-907) and Song (960-1279) dynasties. Studies the unique cultural setting of the worlds inhabited and created by the poets—particulary relations with Taoism, Buddhism, natural history, and astral domans. Attention is focused on not merely what a poem says, but how it says it. Taught in English. Prereq., junior standing.

CHIN 4821-3. Chinese Fiction in Translation. Lectures and discussion. Studies representative samples of Chinese fiction, ranging from medieval short stories and anecdotes written in classical language to longer, more involved, vernacular stories and novels of the Ming (1368-1644) and Qing (1644-1911) dynasties. Special emphasis placed on tracing development of fiction in terms of narrative stance, characterisation, and plot, as well as on comparisons between different genres of Chinese imaginative writing. Taught in English. Prereq., junior standing.

CHIN 4841-3. Women and the Supernatural in Chinese Literature. Explores the relationship between the worlds of women and the supernatural in Chinese literature, from ancient to modern times. Focuses on selected significant works of classical and vernacular fiction, religious texts, and poetry (read in acceptable translations). Studies the variety of ways in which the folklore of the feminine is shaped and recast in different verbal creations and in different periods. Taught in English. Prereq., junior standing.

CHIN 4851-3. Twentieth-Century Literature in Translation. Explores the world of twentieth-century Chinese literature. Areas of interest include the characteristics of that literature; change in response to the introduction of outside interests and national demands; literature and society; tradition versus modernisation. Studies works in all literary genres. Taught in English. Prereq., junior standing.

*Japanese Courses in English*

JPNS 1120-10. Intensive Beginning Japanese. An intensive 10-week version of JPNS 1010 and 1020, offered in summer only.

JPNS 2020-10. Intensive Intermediate Japanese. An intensive 10-week version of JPNS 2110 and 2120, offered in summer only. Prereq., JPNS 1020 or equivalent.

JPNS 3020-6. Intensive Advanced Modern Japanese. Intensive 10-week version of JPNS 3110 and 3120, offered in summer only.

JPNS 4300-3. Open Topics: Readings in Japanese Literature. Intensive study of selected texts on a particular topic taught by regular or visiting faculty. Topics change each term; course may repeated for credit once. Prereq., junior standing and instructor consent.

JPNS 4900 (1-3). Independent Study.

*Peace and Conflict Studies*

CPST 2500-3. Introduction to Peace Studies. Introduces the interdisciplinary field of peace studies. Examines causes and dynamics of conflict and violence (interpersonal to global) and theological, logical, and philosophical bases for peacemaking, peace research, peace movements, nonviolence, conflict resolution, and careers in conflict resolution and peacemaking.

CPST 2860-3. Nuclear War: Its Risks and Preventions. Gives students a broad, interdisciplinary perspective on what is perhaps the most complex problem ever to confront the human species. Focuses on dramatic differences of opinion regarding the prevention of nuclear war. Helps students develop the ability to think critically and analyze arguments, and to clarify their opinions about the role of nuclear weapons in maintaining national security.

CPST 2900 (1-3). Sophomore Independent Study. Content to be determined by consultation between student and instructor.

CPST 3510-3. Ideology, Conflict, and Peace. Examines the origins, nature, and role of ideology and the role specific ideologies, values, and belief systems play in the generation of conflict, violence, and war; the resolution of conflict; and the development of peace.

CPST 3800-3. Topics in Conflict and Peace Studies. Content varies depending on instructor. May provide an overview of the field, cover scientific, philosophical, or historical approaches, or analyze a specific substantive topic.

CPST 3900 (1-3). Junior Independent Study. Content to be determined by consultation between student and instructor.

CPST 4900 (1-3). Senior Independent Study. Content to be determined by consultation between student and instructor.
INVST: International and National Voluntary Service Training

CPST 1912-1. Global Human Ecology Practicum. Students must participate in both individual and group service projects for a minimum of 6 hours per week in all practica. Emphasizes the problems of hunger, poverty, pollution, and resource shortages in both a local and global context, and stresses the observation of the characteristics of service organizations — their potentials and limitations: their perceptions of causes; solutions; and consequences. Prereq., participation in the INVST program; prereq. or coreq., CPST 1002.

CPST 3302-3. Facilitating Peaceful Community Change. Students gain knowledge and skills that enable them to become effective organizers and facilitators of community social change efforts. Focuses on understanding the processes of community building and fostering grass roots democracy with a multicultural emphasis. Students are encouraged to apply concepts to life experiences and to examine themselves as potential change agents.

CPST 3912-1. Facilitating Peaceful Community Change Practicum. Students must participate in both individual and group service projects for a minimum of 6 hours per week in all practica. Focuses on the development of organizational, administrative, and fund-raising skills in the non-government sector, while considering the ways and means of effective work for social change with different kinds of community organizations and the media. Students are encouraged to develop a personal philosophy of community service. Prereq., participation in the INVST program; prereq. or coreq., CPST 3302.

CPST 4915-1. Democracy and Nonviolent Social Movements Practicum. Students must participate in both individual and group service projects for a minimum of 6 hours per week in all practica. Students develop and implement service projects related to the study of the impact of different types of development on social systems — the global system, national societies, or local communities. Case studies from the first and third worlds are analyzed. Prereq., participation in the INVST program; prereq. or coreq., CPST 4012.

Philosophy

Specific class content varies by semester. Complete course descriptions are available each semester from the philosophy department, Hellums 169. Courses at the 1000 and 2000 levels have no prerequisites.

PHIL 1000-3. Introduction to Philosophy. Introduces fundamental questions of philosophy. Approved for arts and sciences core curriculum: ideals and values.

PHIL 1010-3. Introduction to Western Philosophy: Ancient. Develops three related themes: the emergence in antiquity of a peculiarly scientific mode of thinking: the place of religious belief within this developing scientific world view; and the force of ethical speculation within the culture and political climates of ancient Greece and Rome. PHIL 1010 and 1020 may be taken in either order. Approved for arts and sciences core curriculum: historical context.

PHIL 1020-3. Introduction to Western Philosophy: Modern. Introduces several philosophical texts and doctrines of seventeenth and eighteenth-century Europe. Gives special attention to the connection between philosophical ideas and the wider historical milieu—social, political, and literary. PHIL 1010 and 1020 may be taken in either order. Approved for arts and sciences core curriculum: historical context.

PHIL 1100-3. Ethics. Introductory study of major philosophies on the nature of the good for humanity, principles of evaluation, and moral choice. Approved for arts and sciences core curriculum: ideals and values.

PHIL 1200-3. Philosophy and Society. Introduces philosophical thought through a critical analysis of our own society, its institutions, and principles. Approved for arts and sciences core curriculum: United States context, or ideals and values.

PHIL 1300-3. Ways of Knowing. Introductory study of the nature and sources of knowledge and related topics.

PHIL 1400-3. Philosophy and the Sciences. Considers philosophical topics and concepts related to the natural sciences, such as science and pseudo-science; scientific method; the nature of explanation, theory, confirmation, and falsification; effect of science on basic concepts like mind, freedom, time, and causality; ethics of experimentation; and the relation of science to society. Approved for arts and sciences core curriculum: natural science.

PHIL 1600-3. Philosophy and Religion. Philo- logical introduction to some of the central concepts and beliefs of religious traditions, focusing particularly on the question of the existence of God and on the relation between religious beliefs and moral beliefs. Approved for arts and sciences core curriculum: ideals and values.

PHIL 1700-3. Philosophy and the Arts. Considers philosophic questions involved in the analysis and assessment of artistic experiences and of the objects with which the arts, including the literary arts, are concerned.

PHIL 1750-3. Philosophy through Literature. Introduces philosophy through literature. Selected novels, plays, and short stories that exemplify traditional problems in philosophy are read and discussed.

PHIL 1800-3. Open Topics in Philosophy. Variety of new courses at the introductory level. See current departmental announcements for specific content.

PHIL 1840 through 1900 (1-3). Independent Study. Prereq., freshman standing.

PHIL 2200-3. Major Social Theories. Introductory study of major philosophies of the past in relation to political, economic, and social issues. Approved for arts and sciences core curriculum: ideals and values.

PHIL 2230-3. Law and Morality. Examines selected problems concerning the relation between law and morality, such as capital punishment, pornography, and civil disobedience. Approved for arts and sciences core curriculum: contemporary societies.

PHIL 2390-3. Philosophy and Psychology. Interdisciplinary course on issues where philosophy and psychology meet; for example, topics such as selfhood, motivation, psychotherapy, freedom, and human behavior are examined. Selected readings in philosophy and psychology are required.

PHIL 2440-3. Symbolic Logic. First course in mathematical logic. Topics include sentential logic, the logic of quantification, and some of the basic concepts and results of metamath (interpretations, validity, and soundness).

PHIL 2800-3. Open Topics in Philosophy. A variety of new courses at the 2000 level. See current departmental announcements for specific content.

PHIL 2840 through 2900 (1-3). Independent Study. Prereq., sophomore standing. All courses at the 3000 level require 6 hours of philosophy and sophomore standing, unless otherwise indicated.

PHIL 3140-3. Environmental Ethics. Examines major traditions in moral philosophy to see what light they shed on value issues in environmental policy and the value presuppositions of the economic, ecological, and juridical approaches to the environment. Prereq., junior standing, or PHIL 1100, 1200, 2200, 3100, or 3200. Approved for arts and sciences core curriculum: ideals and values.

PHIL 3180-3. Critical Thinking: Contemporary Topics. Looks at a selected topic such as nuclear disarmament, racial and sexual discrimination, animal rights, or abortion and euthanasia by examining issues through the lens of critical philosophical analysis. Reviews the reasoning behind espoused positions and the logical connections and argument forms they contain. Approved for arts and sciences core curriculum: critical thinking.

PHIL 3190-3. War and Morality. Focuses on moral issues raised by war as a human institution. What are the justifications, limits, and alternatives? Does the advent of nuclear weapons change the nature of war? Approved for arts and sciences core curriculum: ideals and values.

PHIL 3200-3. Social and Political Philosophy. Systematic discussion and analysis of such philosophical ideas as community, freedom, political power, and violence. Approved for arts and sciences core curriculum: ideals and values.

PHIL 3360-3. Models of Medicine. Examines such problems as the nature of and evidence for current medical models; the roots of modern medicine in Greek thought; alternative models of medicine (shamanistic, Eastern, holistic); medical model and psychoanalytic therapies; concepts of mental health and physical health; relation of medical and therapeutic models to theories of human nature.

PHIL 3410-3. History of Science: Ancients to Newton. Surveys the history of science up to Newton, including the emergence of scientific modes of thinking from religious and philosophical roots in the Near East and Greece to the development of these modes in the Middle Ages and Renaissance. Culminates with Isaac Newton and the seventeenth-century scientific revolution. Approved for arts and sciences core curriculum: historical context or natural science.

PHIL 3430-3. History of Science: Newton to Einstein. The history of physical and biological science, from the epoch-making achievements of Charles Darwin in biology to the dawn of the twentieth-century revolutions in physics, chemistry, and genetics. Deals with the success of the mechanical philosophy of nature and its problems. Approved for arts and sciences core curriculum: historical context, or natural science.

PHIL 3440-3. Perspectives of Twentieth-Century Science. Historical study of some of the leading developments of twentieth-century science, selected for their scientific or social significance, including quantum theory of atomic structure and the chemical bond, Einstein's relativity theory, nuclear fission, the genetic code, continental drift, concepts of the ecosystem, and other topics.

PHIL 3600-3. Philosophy of Religion. Philosophical discussion of fundamental issues in religion, such as existence of God, religious experience, faith and reason, evil, immortality, and religious language.

PHIL 3610-3. From Paganism to Christianity. Treats the history of Greek and Roman religion from its Bronze Age origins through the rise of Christianity. Same as CLAS 3610.

PHIL 3700-3. Aesthetic Theory. Introduces major theories of aesthetics and contemporary discussions of problems in aesthetics, e.g., the nature of art, and the problem of evaluations in art.

PHIL 3800-3. Open Topics in Philosophy. Variety of new courses at the 3000 level. See current departmental announcements for specific content.

PHIL 3840 through 3900 (1-3). Independent Study. Prereq., junior standing. All courses at the 4000 level require 9 hours of philosophy and junior standing, unless otherwise indicated.

PHIL 4010-3. Single Philosopher. Intensive study of one systematic philosophy with attention to the scope, methods, and integrity accomplished by it.

PHIL 4030-3. Studies in Nineteenth-Century Philosophy. Selections from four or five major nineteenth-century figures such as Hegel, Schopenhauer, Marx, J. S. Mill, Kierkegaard, Nietzsche, and Dostoevsky.

PHIL 4040-3. Studies in Twentieth-Century Philosophy. Studies two or three major philosophies prominent during the present century.

PHIL 4080-3. Introduction to Phenomenology. Examines the contribution of phenomenology to selected topics in theory of meaning, philosophy of mind, ontology, and epistemology through a study of such philosophers as Husserl, Heidegger, Sartre, and Merleau-Ponty.

PHIL 4090-3. Kierkegaard. Primarily an analysis of selected works of Soren Kierkegaard. Specific topics considered include Kierkegaard's notions of Christianity, faith, the Paradox, truth, reason, and history. Same as PHIL 5090.

PHIL 4210-3. Ancient Political Thought. Same as CLAS 4041, HIST 4041, and PSCL 4049.

PHIL 4250-3. Marxism. Historical and systematic study of principal themes of Marxist thought, from its Hegelian origins to its contemporary varieties, emphasizing in particular the works of Marx and Engels themselves.

PHIL 4260-3. Philosophy of Law. Considers various views of the nature of law, its role in society, and its relation to other disciplines. Investigation of philosophic commitments that underlie and affect legal conceptions and procedures. Same as PHIL 5250.

PHIL 4300-3. Philosophy of Mind. Discusses problems in the philosophy of mind, including the mind-body problem, knowledge of other minds, compatibility of free will and determinism, with such concepts as action, intention, desire, enjoyment, memory, imagination, dreaming, and knowledge. Same as PHIL 5300. Background in symbolic logic strongly recommended.

PHIL 4340-3. Epistemology. Studies some of the main topics of theory of knowledge, such as evidence, justification, prediction, explanation, skepticism, and concept acquisition. Prereq., six hours of philosophy, including one of the following: PHIL 2440, 3000, or 3010. Same as PHIL 5340.

PHIL 4360-3. Metaphysics. Traditional and contemporary theories of the basic categories of reality and the human relationship to it, including universals, substance identity, change, mind and body, free will, and modality. Prereq., 6 hours of philosophy, including one of the following: PHIL 2440, 3000, or 3010. Same as PHIL 5360.

PHIL 4390-3. Philosophy and Psychological Theory. Conceptual problems in psychological theories, e.g., issues such as models, metaphysical views, value assumptions, theory in psychotheraphy. Selected readings in both philosophy and psychology. Same as PHIL 5390.

PHIL 4400-3. Philosophy of Science. Examines major concepts and problems of scientific thought: explanation, confirmation, causality, measurement, and theory construction. Same as PHIL 5400.

PHIL 4410-3. Mathematical Logic. Introduces the fundamental concepts and procedures of mathematical logic. Prereq., PHIL 2440 or equivalent. Same as PHIL 5440.

PHIL 4450-3. History and Philosophy of Physics. Investigates the role of experiment in physics. Uses case studies in the history and philosophy of physics and in scientific methodology. Prereq., one year of physics or instructor consent. Same as PHIL 5450 and PHYS 4450. Approved for arts and sciences core curriculum: critical thinking.

PHIL 4490-3. Philosophy of Language. Examines theories and problems regarding the nature of language and its relation to reality. Concepts discussed include sense, reference, conventions,
intentions, and their relation to science and social life. Relevant literature includes readings in Frege, Russell, Quine, Putnam, Kripke, and Chomsky. Same as PHIL 5490. Background in symbolic logic strongly recommended.

PHIL 4600-1. Theology Forum Seminar. Discusses a variety of theological and philosophical topics. Some reading, much discussion, occasional guest speakers. Students may enroll for repeated credit with permission of instructor to a maximum of 3 hours.

PHIL 4730-3. Philosophy and Literature. Examines various relations between philosophy and literature, ranging from the direct incorporation of philosophical doctrine into literature to literature as a distinctive way of practicing philosophy.

PHIL 4800-3. Open Topics in Philosophy. A variety of new courses at the 4000 level. See current departmental announcements for specific content.

PHIL 4840 through 4900 (1-3). Independent Study. Preq., senior standing.

PHIL 4950-3. Honors Thesis. All courses at the 5000 and 6000 level require graduate standing in philosophy unless otherwise indicated.

PHIL 5020-3. Topics in the History of Philosophy.

PHIL 5080-3. Philosophy of Plato. Same as CLAS 5800.

PHIL 5081-3. Philosophy of Aristotle. Same as CLAS 5810.

PHIL 5082-3. Philosophy of Hume.

PHIL 5083-3. Philosophy of Kant.

PHIL 5084-3. Philosophy of Spinoza.

PHIL 5086-3. Philosophy of Wittgenstein.

PHIL 5089-3. Philosophy of Hegel. Textual explication of Hegel's Logic and his Phenomenology of the Spirit, with special emphasis on the latter.

PHIL 5091-3. Philosophy of St. Thomas Aquinas. Studies the major writings of St. Thomas.

PHIL 5092-3. Philosophy of Husserl.

PHIL 5210-3. Philosophy and Social Policy. Studies philosophical approaches to social and political issues such as abortion, bioethics, environmental preservation, human rights, and reverse discrimination. Gives attention to strengths and weaknesses of philosophical treatments of these issues.

PHIL 5240-3. Seminar in Environmental Philosophy. Philosophical examination of several different approaches to environmental problems: economic, juridical, political, and ecological. Discusses specific environmental problems, focusing on their moral dimensions, e.g., wilderness preservation, animal rights, and land use and urban planning.

PHIL 5260-3. Philosophy of Law. Same as PHIL 4260.

PHIL 5290-3. Topics in Values and Social Policy. Deals with topics in the area of philosophy and public policy and is often interdisciplinary in focus. Topics vary from one semester to another. Course may be repeated when topic is different.

PHIL 5300-3. Philosophy of Mind. Same as PHIL 4300.

PHIL 5340-3. Epistemology. Same as PHIL 4340.

PHIL 5350-3. Analytic Philosophy. Surveys representative philosophers, methods, or problems in the twentieth-century analytic tradition.

PHIL 5360-3. Metaphysics. Same as PHIL 4360.

PHIL 5390-3. Philosophy and Psychological Theory. Same as PHIL 4390.

PHIL 5400-3. Philosophy of Science. Same as PHIL 4400.

PHIL 5440-3. Mathematical Logic. Same as PHIL 4440.

PHIL 5450-3. History and Philosophy of Physics. Same as PHIL 4450 and PHYS 5450.

PHIL 5490-3. Philosophy of Language. Same as PHIL 4490.

PHIL 5600-3. Philosophy of Religion. Studies topics falling under philosophy of religion, such as proofs for God's existence, religious language, mysticism, psychology of religion, modern theological movements, miracles, and study of individual theologians.

PHIL 5700-3. Aesthetics. Analyzes the principal topics of aesthetics, including such issues as formal structure of aesthetics, the nature of critical judgments, and the status of the work of art.

PHIL 5800-3. Open Topics in Philosophy. Variety of new courses at the 5000 level. See current departmental announcements for specific content.

PHIL 5810-3. Special Topics in Philosophy. Instructor meets regularly with three or more students to discuss special topics in philosophy.

PHIL 5840 through 5900 (1-3). Graduate Independent Study.

PHIL 6340-3. Seminar in Epistemology. Studies some of the main topics of epistemology, such as skepticism, foundations of knowledge, perception, introspection, belief, certainty, and analytic-synthetic distinctions.

PHIL 6360-3. Seminar in Metaphysics. Traditional and contemporary theories of the basic categories used to describe nature and the human relationship to it, including such concepts as substance, identity, space and time, causality, determination, and systematic ontology.

PHIL 6400-3. Seminar in Philosophy of Science. Topics connected with development of nature of science; structure of scientific theories; testing of hypotheses. Theory of decisions in science and ethics. Basic conceptions and models of abstraction in the history of science.

PHIL 6490-3. Seminar in Philosophy of Language. Studies some of the main topics in the philosophy of language, such as meaning and theories of meaning, translation, speech acts, rules of language, references, relevance of psycholinguistics, language and thought, and language and ontology.

PHIL 6940-3. Master's Candidate for Degree.

PHIL 6950 (1-6). Master's Thesis.

PHIL 7840 through 7900 (1-3). Doctoral Independent Study.

PHIL 8990-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.

Physics

PHYS 1000-3. Preparatory Physics. Introduces basic physics, emphasizing an analytical approach that prepares students for PHYS 1110, 1120, and 1140, or PHYS 1010 and 2020. Satisfies the MAPS requirement in natural science. Preq., one year of high school algebra or equivalent. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

+ PHYS 1110-4. General Physics 1. Three lecs., one rec. per week, plus three evening exams in the semester. First semester of three-semester sequence for science and engineering students.
Covers kinematics, dynamics, momentum of particles and rigid bodies, work and energy, gravitation, simple harmonic motion, and introduction to thermodynamics. Coreq., APPM 1350, or 1352, or MATH 1300. Approved for arts and sciences core curriculum: natural science.

PHYS 2140-1. Experimental Physics I. One lect., one 2-hour lab per week. Normally is taken concurrently with PHYS 2120, but not required. Approved for arts and sciences core curriculum: natural science.

PHYS 2150-1. Experimental Physics II. One lect., one 2-hour lab per week. To be taken concurrently with PHYS 2140 and PHYS 2150. For physics majors in plan 3. Registration by special arrangement with lecturer in PHYS 2150.

PHYS 2810, 2820 (1-3). Special Topics in Physics. Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors.

PHYS 2840, 2850, 2860 (1-3). Independent Study. Selected topics for undergraduate independent study. Subject matter to be arranged.

PHYS 3070-3. Energy in a Technical Society. Lect. Various aspects of energy: the physics involved in sources and uses of energy in our society, the state of depletion of the fossil fuels, nuclear energy, solar energy, and other alternative sources of energy and their possible effects on the environment. No background in physics is required. Approved for arts and sciences core curriculum: natural science.

PHYS 3080-3. The Physics of Contemporary Social Problems. Lect. Various contemporary areas of concern in air and water pollution, transportation, resources, and communications are discussed from the point of view of physical principles involved and impact on society. Course is to understand scientific questions involved in making decisions in these areas. No background in physics is required. Approved for arts and sciences core curriculum: natural science.

PHYS 3240-3. Methods of Theoretical Physics. Lect. Introduces mathematical techniques required for a quantitative understanding of phenomena of modern physics, including vector algebra and vector calculus, Fourier analysis, and some differential equations of physics. Coreq., PHYS 1120; coreq., MATH 2400 or APPM 2350.

PHYS 3250-1. Experimental Physics. One lect., one 2-hour lab per week. Includes many experiments of modern physics, including atomic physics, solid-state physics, electron diffraction, radioactivity, and quantum effects. Normally taken concurrently with PHYS 2150 or PHYS 2170, but not required.

PHYS 3260-1. Experimental Physics. One lect., one 2-hour lab per week. To be taken concurrently with PHYS 2150 and PHYS 2170. For physics majors in plan 3. Registration by special arrangement with lecturer in PHYS 2150.

PHYS 3290-3. Introductory Research in Optical Physics. Two lect., one 3-hour lab per week plus variable unsupervised lab each week. Students design and build their own experiments using a modular type of optical research kit. Experiments cover basic research methods in instrument design, laser physics, Fourier optics, holography, spectroscopy, and interferometry. Students learn how to plan major projects and evaluate critically the significance of results. Course concludes with a four-week major project. Coreq., PHYS 3330. Approved for arts and sciences core curriculum: critical thinking.

PHYS 4150-3. Introduction to Plasma Physics. Same as APAS 4150.

PHYS 4230-3. Thermodynamics and Statistical Mechanics. Statistical mechanics applied to macroscopic physical systems; statistical thermodynamics; classical thermodynamic systems; applications to simple systems. Examines relationship of statistical to thermodynamic points of view. Coreq., PHYS 3210 and APPM 2360.

PHYS 4300-3. Dynamics of Fluids. Same as APAS 4300.

PHYS 4410-3, 4420-3. Atomic and Nuclear Physics I and 2. Topics include quantum mechanical treatment of the one-electron atom, atomic shell structure, atomic and molecular spectroscopy, band theory of solids, X-rays, nuclear properties, radioactivity, and the properties of the fundamental particles. Coreq. for PHYS 4410 are C or better in PHYS 3220 and PHYS 3320, or instructor consent. Coreq. for PHYS 4420 is PHYS 4410. PHYS 4420 approved for arts and sciences core curriculum: critical thinking.

PHYS 4430-2. Senior Laboratory. One lect., one lab per week to be taken with PHYS 4440. Experiments introduce students to realities of experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today. Coreq., PHYS 3330; coreq., PHYS 4410.

PHYS 4450-3. History and Philosophy of Physics. Investigates the role of experiment in physics. Includes case studies in the history and philosophy of physics and in scientific methodology. Coreq., one year of physics or instructor consent. Same as PHYS 3450 and PHIL 4450. Approved for arts and sciences core curriculum: critical thinking.

PHYS 4610-2, 4620-2. Physics Honors. PHYS 4810, 4820, 4830 (1-3). Special Topics in Physics. Various topics not normally covered in the curriculum; offered intermittently depend-
ing on student demand and availability of instructors.

PHYS 4840, 4850, 4860 (1-3). Independent Study. Selected topics for undergraduate independent study. Subject matter to be arranged.

PHYS 5000-1. Seminar in Plasma Physics. Same as APAS 5000.

PHYS 5030-3, 5040-3. Intermediate Mathematical Physics 1 and 2. Reviews classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory, and Fourier analysis. Prereq. for PHYS 5030 is MATH 4310, 4320, or equivalent. Prereq. for PHYS 5040 is PHYS 5030. Same as MATH 5030 and MATH 5040.

PHYS 5220-3. Nonlinear Dynamics. Same as APAS 5220.

PHYS 5250-3, 5260-3. Introduction to Quantum Mechanics 1 and 2. Quantum phenomena, relation to classical physics, Schroedinger and Heisenberg picture, application to problems, approximation techniques; angular momentum; scattering theory; Pauli spin theory. Coreq. for PHYS 5250 is PHYS 5210. Coreq. for PHYS 5260 is PHYS 7310.

PHYS 5430-2. Modern Physics Laboratory. One lab per week. Experiments in nuclear physics, atomic physics, and condensed matter introduce student to variety of techniques useful in contemporary research. Recommended for students with limited background in lab work.

PHYS 5450-3. History and Philosophy of Physics. Same as PHYS 4450 and PHIL 5450.

PHYS 5840, 5850, 5860 (1-3). Selected Topics for Graduate Independent Study. Subject matter to be arranged.

PHYS 6620-3. Earth and Planetary Physics 2. Same as GEOL 6620 and APAS 6620.

PHYS 6650 (1-3). Seminar in Geophysics. Same as GEOl 6650 and APAS 6650.

PHYS 6680-3. Dynamics of Continuous Media. Same as MGEN 7183 and GEOl 6680.

PHYS 6690-3. Advanced Seismology. Same as GEOl 6690.

PHYS 6940 (1-3). Master's Degree Candidate.

PHYS 6950 (4-6). Master's Thesis. Approved problem in theoretical or experimental physics under the direction of staff members. Intended to introduce the student to procedures in research and to develop independent work. Work of an original nature expected.

PHYS 7030-3, 7040-3. Advanced Mathematical Physics 1 and 2. Hilbert space, theory of distributions, L2-spaces, Sobolev spaces, methods of functional analysis, spectral theory of operators, applications to quantum theory, and group theory. Prereq. for PHYS 7030 is MATH 4310, 4320, 4450, or 6350. Prereq. for PHYS 7040 is PHYS 7030. Same as MATH 7030, 7040.

PHYS 7160-3. Intermediate Plasma Physics. Continuation of PHYS 5150. Topics vary yearly but include nonlinear effects such as wave coupling, quantum coherence, particle trapping, nonlinear Landau damping, collisionless shocks, solitons; nonneutral plasmas, kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation—ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena. Prereq.: PHYS 5150 or instructor consent. Same as APAS 7160.

PHYS 7240-3. Advanced Statistical Mechanics. Introduces current research topics in statistical mechanics. Topics vary from year to year and may include phase transitions, critical phenomena, nonequilibrium phenomena, dense fluids, dynamical systems, plasma physics, or quantum statistical mechanics. Prereqs.: PHYS 7230.

PHYS 7270-3. Introduction to Quantum Mechanics 3. Radiation theory, relativistic wave equations with simple applications; introduction to field theory and second quantization.

PHYS 7280-3. Advanced Quantum Theory. Quantum theory of fields, elementary particles, symmetry laws, and topics of special interest. Prereq.: PHYS 7270 or instructor consent.

PHYS 7530-3. Topics in Chemical Physics. Broad survey of molecular structure as deduced primarily from molecular spectra. Topics selected from interaction of radiation with matter, molecular rotation, molecular vibration, molecular electronic energy levels, structural information provided by nuclear magnetic resonance, electron spin resonance and molecular-beam spectroscopy, structural information provided by electron, neutron, and X-ray diffraction, molecular optical dispersion phenomena. Prereqs.: PHYS 3220 and CHEM 5521 or equivalent.

PHYS 7550-3. Atomic and Molecular Spectra. Theory of atomic structure and spectra, including coupling of angular momenta, tensor operators, energy levels, fine and hyperfine structure, transition probabilities, Zeeman and Stark effects. Molecular spectra: electronic, vibrational, and rotational states. Rotation matrices, symmetric top.

PHYS 7710-3. Nuclear Physics. Intrinsic properties of nucleons and the nucleon-nucleon interaction, nuclear models, scattering of nucleons by nuclei in terms of an optical model, and nuclear reactions.

PHYS 7730-3, 7740-3. Theory of Elementary Particles. Systematics of elementary particles; quantum numbers, Lorentz group and spin; the S-matrix and invariant amplitudes; analytical properties of amplitudes; dispersion relations; dynamical calculation of quantum numbers and masses; elementary particle spectroscopy; higher symmetries.

PHYS 7810, 7820, 7830 (1-3). Special Topics in Physics. Various topics not normally covered in the curriculum: offered intermittently depending on student demand and availability of instructors.

PHYS 7840, 7850, 7860 (1-3). Selected Topics for Graduate Independent Study. Subject matter to be arranged.

PHYS 8990 (1-10). Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.

Political Science

American

PSCI 1101-3. The American Political System. Emphasizes institutions and branches of government, formal and informal institutions, processes, and behavior. Approved for arts and sciences core curriculum: contemporary societies, or United States context.

PSCI 2101-3. Introduction to Public Policy Analysis. Studies policy-making processes in American government, factors shaping public decision, and issues and questions relevant to political inquiry.
PSCI 2111-3. Introduction to Urban Studies. Surveys different perspectives on urbanization and urban life from an interdisciplinary perspective, emphasizing the economic, spatial, and political dimensions of urban conditions and their planning and policy implications. Required for the certificate in urban studies.

PSCI 2481-3. Introduction to the Legal Process. Basic legal concepts and processes emphasizing the American system. Special attention to political functions of law. Recommended as preparation for PSCI 4241, 4251, 4261. Prereq., PSCI 1101.

PSCI 3001-3. Government Regulation of Business. Considers theory and practice of government relationship to business and professional activity on both state and national levels. Analysis of selected regulatory programs and policies and their impact on the constitutional system. Prereq., PSCI 1101 and junior or senior standing.

PSCI 3041-3. Advanced American Government: The Congress. Provides intensive examination of the role of Congress in American government, including congressional elections, representation, the organization of Congress, and congressional policy making. Examines larger context of congressional politics, including political parties, the president, and interest groups. Prereq., PSCI 1101.

PSCI 3061-3. State Government and Administration. Present-day national, state, and interstate relations; constitutional development; legislative, executive, and judicial processes and problems; administrative organization and reorganization; state finances; major state services; future of the states. Special attention given to the government of Colorado. Approved for arts and sciences core curriculum: United States context.

PSCI 3071-3. Urban Politics. Examines structure of political, social, and economic influence in urban areas; relationship of the political system to governmental, social, and economic institutions; and the contemporary policy processes in American cities. Approved for arts and sciences core curriculum: United States context.

PSCI 3101-3. Black Politics. Elitism and Black powerlessness; Black interest groups; base, structure, and functions of Black political organizations; goals and political styles of Black politicians; community control: trends (radicalism and separatism vs. accommodation); and future of Black politics in the United States. Same as BLST 3101. Approved for arts and sciences core curriculum: cultural and gender diversity, or contemporary societies.

PSCI 3121-3. War, Peace, and Strategic Defense. Analysis of the employment, or the threat to employ force, in securing American interests in the post Cold War World. Special attention is paid to the utilities claimed for nuclear weapons, and, alternatively, to their control and disarmament. Prereq., PSCI 1101.

PSCI 3171-3. Government and Capitalism in the United States. Examines competing theoretical approaches to questions related to origins, development, and purposes of modern government in the United States; particular attention paid to impact of transformations in the underlying structure of the capitalist economy. Approved for arts and sciences core curriculum: United States context.

PSCI 3191-3. National Security Organization and Policy Making. Analyzes how the American governmental and political system is structured to define, select, and implement national security policies. Examines roles of the president, Congress, bureaucracy, interest groups, and other actors. Prereq., PSCI 1101 or instructor consent.

PSCI 3201-3. The Environment and Public Policy. Considers constitutional, political, and geographic factors in development of public policy affecting use of natural resources and management of the environment; organization, procedures, and programs for use of natural resources; administration of environmental policies. Prereq., PSCI 1101.

PSCI 4091-3. Comparative Urban Politics. Comparative analysis of the major metropolitan systems in advanced industrial, socialist, and Third World countries. Special attention given to political and economic factors shaping urbanization processes and distinctive policy issues in these different settings. Recommended preqs., PSCI 1101 and 3071.

PSCI 4111-3. Urban Policy Analysis. Examines processes whereby governments formulate, implement, and evaluate programs designed to deal with major social and economic problems. Special emphasis on evaluation of urban programs in welfare, education, law enforcement, housing, and urban economic vitality. Prereq., PSCI 1101.

PSCI 4131-3. Latinos and the U.S. Political System. Examines the political status and activities of Mexican Americans and other Latino groups (Cuban Americans and Puerto Ricans) in the U.S. Presents theoretical frameworks. Also covers historical experiences and socioeconomic status of several Latino groups; Latino political attitudes and behaviors; Latino efforts to influence the major national, state, and local institutions of the American government; and public policy concerns of Latinos. Recommended preq., PSCI 1101. Same as CHST 4133. Approved for arts and sciences core curriculum: cultural and gender diversity.

PSCI 4141-3. Bureaucratic Power in American Politics. Examines public agencies as political actors engaging in public policy making. Topics include sources of bureaucratic power; securing public support; relationships with legislatures, political executives, interest groups, and other agencies; and an analysis of the freedom and limitations resulting from these relationships. Preq., PSCI 1101.

PSCI 4151-3. Political Socialization. Examines the social and cultural forces that teach people their status in society along with appropriate values, norms, and behaviors. Prereq., PSCI 1101.

PSCI 4211-3. Public Priorities: Revenues and Program Expenditures. Discusses how governments in the American political system raise revenues, and for what purposes these revenues are spent. Roles of executives, legislatures, interest groups, bureaucracies, and public opinion. Preq., PSCI 1101 or instructor consent.

PSCI 4241-3. Constitutional Law 1. Nature and scope of the following American constitutional principles as developed by the U.S. Supreme Court: federalism, jurisdiction of the federal courts, separation of powers, the taxing power, and the commerce power. Case method. Preq., PSCI 1101 and junior or senior standing.

PSCI 4251-3. Constitutional Law 2. Continuation of PSCI 4241. Emphasizes war power, powers of the President, citizenship, the Bill of Rights, and the Civil War amendments. Case method. Not open to freshmen and sophomores. Preq., PSCI 1101 and PSCI 4241, or instructor consent.

PSCI 4271-3. Sex Discrimination: Constitutional Issues. Examines continuity and change in legal treatment of sex and gender. Using the case method, explores areas of the law including equal protection analysis, affirmative action, and pri-
vacy rights. Same as WMST 4271. Prereq., PSCI
1101. PSCI 4291-3. Sex Discrimination: Federal and
State Law. Examines continuity and change in
legal treatment of sex and gender. Using the case
method, focuses on family law, education equity,
employment law, and gender-related criminal
law. Same as WMST 4291. Prereq., PSCI 1101.
PSCI 4701-3. Symbolic Politics. Introduces
uses and abuses of symbols as instruments and
indicators of political change. Recommended
precept., PSCI 1101 and junior or senior stand-
ing. Approved for arts and sciences core curricu-
um: critical thinking.
PSCI 4711-3. Space Policy. Provides an intro-
duction to selected current problems in U.S.
space policy (such as the space station), based on
documents from the space policy arena and liter-
ature from several disciplines. Students are
expected to recommend courses of action. Pre-
req., junior or senior standing. Approved for arts
and sciences core curriculum: critical thinking.
PSCI 4721-3. Rethinking American Politics.
Examines the historical and development of the
United States of America. Looks at the particu-
lar political policies we have made and
examines the future political agenda. Recom-
manded precept., junior or senior standing and
PSCI 1101. Approved for arts and sciences core
curriculum: critical thinking.
PSCI 4731-3. Progress and Problems in Ameri-
can Democracy. Closely examines the various
understandings of democracy, the arguments for
and against democracy, and the progress of and
prospects for democratic policies in the United
States. Particular attention is paid to economic,
social, and political developments in the United
States that affect popular sovereignty, political
equality and liberty. Prereq., junior or senior
standing. Approved for arts and sciences core
curriculum: critical thinking.
PSCI 4841 (1-3). Independent Study-American
Politics. Subjects are chosen and arrangements
are made to suit the needs of each student. Indepen-
dent study is for upper-division students who have
completed 9 semester hours of political science
and who have an overall average of at least
3.00. Not more than 6 semester hours of inde-
dependent study may be credited toward the min-
imum requirements in the political science major.
Special independent study approval agreement
form must be obtained from the department.
Prereq., PSCI 1101.
PSCI 5011-3. Seminar: American Politics. Pri-
marily for students who have taken an under-
graduate course in American politics. Required
of all Ph. D. students majoring in political science
during first year of residence. Emphasizes prepara-
tion of research papers and literature in the
field. Same as PSCI 7011.
PSCI 5031-3. Seminar: Political Attitudes and
Behavior. Intensive examination of topics in
political attitudes and behavior such as political
participation, ideology, voting, and elite behavior.
Review of methodology of behavioral research
and introduction to ICPSR data archive and com-
puter-based research. Same as PSCI 7031.
PSCI 5041-3. Seminar: The Presidency. Inten-
sive examination and preparation of research
papers on historical, functional, and constitu-
tional aspects of the presidency. Broad attention
given to literature on the presidential system and
to analytical comparisons with other executive
systems. Same as PSCI 7051.
PSCI 5051-3. Seminar: The United States
Congress. Comprehensive examination of litera-
ture and selected research topics concerning the
United States Congress. Same as PSCI 7051.
Focuses on formulation, revision, and outcomes
of public policy in American urban commu-
nities. Some comparative Canadian and European
literature also used. Same as PSCI 7061.
PSCI 5071-3. Introduction to the Policy Sci-
cences. Provides an overview of the policy sci-
ces as a distinctive tradition within the policy
movement. Emphasizes how policy analyses fail,
why, and what can be done to improve them in
practice. Introduces central theory, including a
conceptual framework. Same as PSCI 7071.
Provides policy science frameworks for analyz-
ing policy problems and evaluating policy alter-
natives, and for analyzing policy processes and
designing political strategies to influence those
processes by the direction of the preferred alter-
native. Emphasizes applications to problems
selected by students through projects. Same as
PSCI 7081.
PSCI 5091-3. Politics of Social Movements and
Interest Groups. Examines theoretical and
critical research on American interest groups
and social movements. Emphasizes rela-
tive power of such interests and their ability to bring
about changes in national policy and political
institutions. Same as PSCI 7091.
PSCI 5131-3. Seminar: Natural Resources Pol-
icy and Administration. Resources in the Ameri-
can economy, consideration of constitutional,
political, and geographic factors in development
of resources policy, organization procedures, and
programs for conservation and development of
natural resources: selected topic. Same as PSCI
7131.
PSCI 5141-3. The State in American Politics.
Intensive examination of pluralist, voter-centered,
rational choice, and neo-Marxist literature on
the American state. Same as PSCI 7141.
PSCI 5901 (1-3). Topics in Political Science.
Same as PSCI 7901.
PSCI 6901 (1-3). Graduate Research Topic. Inde-
dependent research in a topic of special interest.
Arrangements made to suit needs of each
student. Not a free option; must be approved by
student's advisor and department chair. Does not
count as a seminar. Same as PSCI 8901.
Same as PSCI 5011.
PSCI 7031-3. Seminar: Political Attitudes and
Behavior. Same as PSCI 5031.
PSCI 7041-3. Seminar: The Presidency. Same as
PSCI 5041.
PSCI 7051-3. Seminar: The United States
Congress. Same as PSCI 5051.
Same as PSCI 5061.
PSCI 7071-3. Introduction to the Policy Sci-
cences. Same as PSCI 5071.
Same as PSCI 5081.
PSCI 7091-3. Politics of Social Movements and
Interest Groups. Same as PSCI 5091.
PSCI 7131-3. Seminar: Natural Resources Pol-
icy and Administration. Same as PSCI 5131.
PSCI 7141-3. The State in American Politics.
Same as PSCI 5141.
PSCI 7901 (1-3). Topics in Political Science.
Same as PSCI 5901.
PSCI 8901 (1-3). Graduate Research Project.
Same as PSCI 5901.
PSCI 8991-10. Doctoral Dissertation: All doc-
toral students must register for not fewer than 30
hours of dissertation credit as part of the require-
ments for the degree. For a detailed discussion of
dissertation credit, refer to the Graduate School
portion of the catalog.

Comparative
PSCI 2012-3. Introduction to Comparative
Politics. Comparative study of the features, pro-
cesses, and problems common to a variety of
political systems. Includes social, economic, and
ideological forces, and political institutions.
Concentrates on comparing different systems and
provides illustrative examples from countries in
both the industrialized and non-industrialized
world. Approved for arts and sciences core curricu-
um: contemporary societies.
PSCI 3032-3. Latin American Political Sys-
tems. Stresses different perspectives on Latin
American politics and understanding key politi-
cal actors and processes. Country focus varies.
Approved for arts and sciences core curriculum:
contemporary societies.
PSCI 3042-3. Political Systems of the Middle
East and North Africa. Comparative analysis of
the political process in the Middle East and
North Africa. Focuses on Islamic political theory
and its contemporary manifestation, the role of
nationalism and the quest for modernity in
development of this region, and programmed
modernization in transitional politics. Prereq.,
PSCI 2012.
PSCI 3072-3. Government and Politics in
Southeast Asia. Surveys historical and contempo-
rary forces shaping relations among states in
Southeast Asia. Special attention to big power
involvement in the region and to the factors
linking Southeast Asia to the international sys-
tem. Prereq., PSCI 2012.
PSCI 3082-3. Political Systems of Sub-Saharan
Africa. Analyzes major types of political systems
in Sub-Saharan Africa and provides intensive
case studies of selected countries complying
each type. Anti-colonial movement and adoption
of new political institutions and values. Special
political problems of multiracial and multicultur-
al societies. Approved for arts and sciences core
curriculum: contemporary societies.
PSCI 4002-3. Advanced Comparative Poli-
tics—Western Europe. Intensive comparative
analysis of the political systems and processes of
Western European democracies. Focuses on
political culture and constitutionalism; execu-

tive-legislative relationships; parties and interest groups; administrative processes; and the impact of social changes on political institutions. Recommended prerequisite, PSCI 2012. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4012-3. Global Development. Examines Third World political, economic, and sociocultural development in the context of international political and economic forces. Discusses the meaning of development, why it occurs in some countries and not in others, and policy proposals for facilitating it. Recommended prerequisite, PSCI 2012, ECON 2020, ECON 2021, and one upper-division PSCI course. Students do not receive credit for both PSCI 4012 and PSCI 4732. Same as CPST 4012. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4062-3. The Emerging Democracies of Central and Eastern Europe. Developments in the Soviet satellites and Yugoslavia, their governmental organizations, and their relation to the Soviet Union and the West. Prerequisite, PSCI 2012. Students do not receive credit for both CEES 4000 and PSCI 4062. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4092-3. Governments of South Asia. Studies the political systems of India, Pakistan, Ceylon, and Nepal. Considers impact of British rule on development of political institutions on the subcontinent as well as problems of political development at all levels. Prerequisite, PSCI 2012.

PSCI 4102-3. The Government and Politics of Israel. Studies historical and contemporary responses of Jews to conditions of diaspora and statehood. Israel's political culture, governmental structure and processes, and party politics. Problems of integration, defense, and relations with the diaspora Jewish community. Prerequisite, PSCI 2012.

PSCI 4112-3. Problems in Latin American Politics. Advanced course. Topic and country focus varies: current emphasis is on problems of consolidating democratic political systems. Prerequisite, PSCI 2012 or upper-division course in comparative politics. Recommended: PSCI 4032 or upper-division course on Latin America or on African/Asian/Third World politics.

PSCI 4122-3. The Military in Politics: Latin America and the U.S. Analysis of the causes and consequences of military intervention in politics, contrasting patterns of civil-military relations, and the problem of democratic control of the armed forces. Focused on the Latin American Military, with secondary attention to U.S. military. Prerequisites, PSCI 2012 or ROTS major.

PSCI 4272-3. The Political Economy of Industrial Societies. Considers how political power is used to achieve economic ends and to shape the operations of market economies. Focuses on economic conflicts as political contests, and explores how politics shape the course of economic development as well as the basis of social and political life. Recommended prerequisite, PSCI 2012 and ECON 2020. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4282-3. Global Issues. Studies the principal issues confronting humanity which affect stability and survivability. These issues all have economic, social, and political implications. Prerequisites, junior or senior standing. Approved for arts and sciences core curriculum: critical thinking.

PSCI 4732-3. Critical Thinking in Development. Analyzes the same subject matter as PSCI 4012, requiring students to critically evaluate explanations of the success or failure of development and policy proposals for facilitating it that are presented in assigned or optional readings or in student papers. Recommended prerequisite, PSCI 2012, ECON 2020, ECON 2021, and one upper-division PSCI course. Students do not receive credit for both PSCI 4012 and PSCI 4732. Approved for arts and sciences core curriculum: critical thinking.

PSCI 4752-3. Seminar: Central and Eastern European Studies. Seminar on the current political and economic developments and problems faced by the countries of Central and Eastern Europe, (Poland, Czechoslovakia, Hungary, Yugoslavia, Bulgaria, Romania, Albania, Estonia, and Latvia). Recommended prerequisites, junior or senior standing and PSCI 4062. Approved for arts and sciences core curriculum: critical thinking.

PSCI 4792-3. Issues on Latin American Politics. Studies several Latin American countries in some depth including history and contemporary politics. With each country students hear and evaluate different sides of political controversies, learning to critically evaluate arguments. Recommended prerequisites, PSCI 2012 and junior or senior standing. Approved for arts and sciences core curriculum: critical thinking.

PSCI 4842 (1-3). Independent Study—Comparative. Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 semester hours of political science and who have an overall GPA of at least 3.00. Not more than 6 semester hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department. Prerequisite, PSCI 2012.

PSCI 5022-3. Seminar: Latin American Politics. Stresses intensive study of the political process in Latin America with special emphasis on variables that affect Latin American political behavior and development. Same as PSCI 7032.

PSCI 5042-3. Seminar: Comparative Politics—Western Europe. Examination of existing research papers on selected topics of industrial democracies, especially those of Western Europe. Focuses on comparative analysis of changes in political institutions and processes and their impact on macroeconomic policies, e.g., growth, employment, redistribution, and welfare. Required of all Ph.D. students majoring in political science during first year of residence. Same as PSCI 7042.

PSCI 5072-3. Seminar: Comparative Politics—Sub-Saharan Africa. Writing and discussion of analytical literature reviews and research papers on various aspects of political change in Sub-Saharan Africa. Stressess comparisons among African political systems as well as with other areas of the world, and on explanation of change. Same as PSCI 7072.

PSCI 5112-3. Seminar: Comparative Political Parties and Interest Groups. Critical examination of topics relating to social forces, parties, and interest groups. Analysis of concepts, theories, and case studies with particular emphasis on Western political systems. Party systems in comparison. Role of groups and the determinants of group politics. Same as PSCI 7112.

PSCI 5122-3. Seminar: The Middle East. Advanced comparative study and critical examination of the modern Middle East. Stresses analysis of political consequences of modernization, the Arab-Israeli problem, pan-Arabism, and petroleum politics. Requires seminar papers reflecting a research design. Same as PSCI 7122.

PSCI 5132-3. Comparative Politics and Ideologies. Scholarly analysis and instruction on the contrast between contemporary totalitarianism and liberty under law. Taught by outstanding professors from leading universities in the United States and abroad. Designed primarily for social science teachers, graduate students, newspaper professionals, the clergy, and radio and television commentators. Same as PSCI 7132.

PSCI 5142-3. Political Economy in Industrial Democracies. Advanced seminar that examines the structure of political and economic relations in several advanced democracies. Specifically examines a series of historical, institutional, and cultural theories that purport to explain these differences.

PSCI 5902 (1-3). Topics in Political Science. Same as PSCI 7902.

PSCI 6902 (1-3). Graduate Research Topic. Independent research in a topic of special interest. Arrangements made to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. Same as PSCI 8902.

PSCI 7042-3. Seminar: Comparative Politics—Western Europe. Same as PSCI 5042.

PSCI 7072-3. Seminar: Comparative Politics—Sub-Saharan Africa. Same as PSCI 5072.

PSCI 7112-3. Seminar: Comparative Political Parties and Interest Groups. Same as PSCI 5112.

PSCI 7132-3. Comparative Politics and Ideologies. Same as PSCI 5132.

PSCI 7902 (1-3). Topic in Political Science. Same as PSCI 5902.

PSCI 8902 (1-3). Graduate Research Topic. Same as PSCI 6902.

PSCI 8992-10. Doctoral Dissertation. All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral requirements, consult the Graduate School portion of this catalog.

International Relations

PSCI 2223-3. Introduction to International Relations. Introductory conceptual approaches, national and international dynamics of the international environment, problems, and issues. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 3143-3. International Relations. Readings and discussions of the causes, international interaction, and the international system. Emphasizes assessment of relationships between concepts, approaches, goals, methods, and substance of relations among states and on trends that transcend sovereignty. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 3163-3. American Foreign Policy. Examines the foundation, assumptions, objectives, dynamics, and methods of foreign policy since WWI. Special attention to domestic and external problems of adapting U.S. policy to the changing world environment. Approved for arts and sciences core curriculum: United States context.

PSCI 3193-3. International Behavior. Presents alternate theoretical frameworks for the explanation of international processes. Theories of conflict behavior and social organization are applied to problems of war and peace. Pre req., PSCI 2223.

PSCI 4153-3. Seminar: Control of Foreign News Coverage—International Perspectives. Addresses press freedom as absolute and relative notions, and compares "national" developments with commitments to freedom, opportunities for conceptual/analytic and empirical research with domestic and foreign materials. Upper-division students only. Pre req., PSCI 2223.

PSCI 4173-3. International Organization. Analyzes the phenomenon known as international organization to determine whether it is an effective instrument for achieving peace and security and for the promotion of human welfare. Pre req., PSCI 2223.

PSCI 4183-3. International Law. Investigates the body of law that regulates relations between nation states and provides a framework for the solving of common problems. Its nature and effectiveness are explored as well as its adaptability to a changing environment. Pre req., PSCI 2223.

PSCI 4223-3. Soviet Foreign Policy. Foreign policy of the Soviet Union, including the international communist movement, its ideological bases, its impact on international politics, and its relations to domestic developments in the U.S.S.R. Recommended pre req., PSCI 2223. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4233-3. The Middle East in World Affairs. Discusses evolution and revolution in the Middle East and the character of nationalism in the area. Analysis of interregional and international problems affecting the Middle East with special emphasis on the Arab-Israeli imbroglio. Recommended pre req., PSCI 2223. Approved for arts and sciences core curriculum: contemporary societies.

PSCI 4263-3. Advanced Seminar: International Affairs. Interdisciplinary course designed primarily to help majors in international affairs bring together, review, and apply what they have learned in their IA courses in the various disciplines and geographic areas. Emphasizes interrela tion between fact and theory. Pre req., PSCI 2223. For seniors only; instructor consent required.

PSCI 4703-3. Alternative World Futures. Aims to help students think about the future of the world in a systematic way. Focuses on alternative projections and policies dealing with major problems. Recommended pre req., PSCI 2223 and junior or senior standing. Approved for arts and sciences core curriculum: critical thinking.

PSCI 4843 (1-3). Independent Study—International Relations. Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 semester hours of political science and who have an overall average of at least 3.00. Not more than 6 semester hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreements form must be obtained from the department. Pre req., PSCI 2223.

PSCI 5013-3. Seminar: International Relations. Review of salient literature on international relations, and subsequent presentation and critical discussion of analytical studies. Students have wide latitude in substantive and methodological approaches. Emphasizes changing trends and efforts to understand the bases for cooperation and conflict. Required of all Ph.D. students majoring in political science during their first year of residence. Same as PSCI 7013.

PSCI 5043-3. Seminar: Problems of International Organization. Studies selected problems concerning administration and operation of public international organizations, including the United Nations and its specialized agencies. Consideration is given to decision making, executive leadership, internal organization, personnel policies, coordination of activities, and financing. Same as PSCI 7043.

PSCI 5053-3. Seminar: The Causes of International Violence. Systematic treatment of the causes of war from the perspective of recent findings in international relations. Historical and contemporary examples are used in analysis of warlike behavior. Models of war are applied to other conflict phenomena such as urban violence. Same as PSCI 7053.

PSCI 5063-3. International Violence and Political Psychology. Seeks to explore the relationship between knowledge and action in international violence. Considers the contributions and perspectives of science, engineering, and ethics. Same as PSCI 7063.

PSCI 5073-3. Seminar: Global Political Economy. Introduces graduate students to economic theories, and data used to study the global system from a political-economic framework. World systems analysis, regime change theory, and dependency theory are all examined with respect to the operation of the exchange and power relationship within the contemporary world system. Same as PSCI 7073.

PSCI 5083-3. Soviet Foreign Policy. Covers the foreign policy of the Soviet Union, its relation to Marxism-Leninism and/or Russian nationalism, and the international communist movement. Special attention is given to the impact of domestic and foreign factors and science and technology on policy formation. Same as PSCI 7083.

PSCI 5103-3. The Political System and Telecommunications. Introduces roles played by political institutions in the utilization of telecommunications for the common good. Emphasizes American regulatory agencies, such as the Federal Communications Commission, and agencies of international cooperation such as the International Telecommunications Union. Same as PSCI 7103 and TLEN 5106.

PSCI 5903 (1-3). Topic in Political Science. Not a free option: must be approved by the student’s advisor and department chair. Does not count as a seminar. Same as PSCI 7903.

PSCI 6903 (1-3). Graduate Research Topic. Independent research in a topical area of special interest. Arrangements made to suit needs of each student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar. Same as PSCI 8903.

PSCI 6953-4. Master’s Thesis. Same as PSCI 7953.

PSCI 7013-3. Seminar: International Relations. Same as PSCI 5013.

PSCI 7063-3. International Violence and Political Psychology. Same as PSCI 5063.
PSCI 7083-3. Soviet Foreign Policy. Same as PSCI 5083.
PSCI 7103-3. The Political System and Telecommunications. Same as PSCI 5103.
PSCI 7903 (1-3). Topics in Political Science. Same as PSCI 5903.
PSCI 8903 (1-3). Graduate Research Topic. Same as PSCI 6903.
PSCI 8993-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.

**Political Theory**
PSCI 2004-3. Survey of Western Political Thought. Studies main political philosophies and political issues of Western culture from antiquity to twentieth century. Approved for arts and sciences core curriculum: ideals and values.
PSCI 3054-3. American Political Thought. Development of American political theories and ideas from colonial period to present. Can also be taken for American field credit. Approved for arts and sciences core curriculum: United States context, or ideals and values.
PSCI 3064-3. Revolution and Political Violence. Study, discussion, and evaluation of alternative theoretical frameworks for the analysis of revolution and political violence. Ideological material is firmly couched in case situations such as ethnic class, colonial, urban, racial and religious conflicts. Prereq., PSCI 1101 or PSCI 2012.
PSCI 4024-3. Senior Seminar—Theory. Intensive analysis and discussion of major theories and issues of both contemporary political thought and the history of political philosophy. The topic is announced by the instructor, but might include analysis of concepts (justice, human rights, democracy, etc.) or major theories. Emphasizes advanced discussion plus individual research. Prereq., PSCI 2004.
PSCI 4074-3. Quantitative Research Methods. Introduces quantitative research methods used in political science. Basic tools of analysis: data collection, processing, and evaluation, with special attention to survey techniques. Includes field and case study analysis; aggregate, cluster, and content analysis; use of computers in political research.
PSCI 4094-3. Classical Greek Political Thought. Studies the main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and the most important concepts and values of ancient political thought. Same as CLAS 4041, HIST 4041, PHIL 4210. Prereq., PSCI 2404.
PSCI 4284-3. General History of Law. Comparative survey of the development of written law and case law systems in the Western world. Special attention to historical bases of contemporary Anglo-American, French, German, and Soviet legal concepts and institutions.
PSCI 4704-3. Politics and Language. Explores the use of language in politics. Examines in depth the political nature and meaning of language, including its significance, philosophy, and practice. Prereq., junior or senior standing. Approved for arts and sciences core curriculum: critical thinking.
PSCI 4714-3. Liberalism and Its Critics. Contemporary arguments for and against liberalism. Focuses on the analysis, evaluation and understanding of the philosophical contributions to this debate. Special emphasis on the concepts of justice, freedom, equality, and individualism. Prereq., junior or senior standing. Approved for arts and sciences core curriculum: critical thinking.
PSCI 4734-3. Politics and Literature. Broadly examines political topics as they are presented in important literary works and analyzes the possibilities involved in using the literary mode to present political teachings. Prereq., junior or senior standing. Approved for arts and sciences core curriculum: critical thinking.
PSCI 4844 (1-3). Independent Study—Theory. Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 semester hours of political science and who have an overall average of at least 3.00. Not more than 6 semester hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department. Prereq., PSCI 2004.
PSCI 5024-3. Seminar: Selected Political Theories. Selected political philosophies or theories in classical or modern political thought. Same as PSCI 7024.
PSCI 5044-3. Law and Politics Core Seminar. Same as PSCI 7044.
PSCI 5054-3. Seminar: American Political Thought. Intensive research in and presentation of selected topics intended to introduce the mature student to the broad context within which political ideas arise. Deals with classical and modern thought. Same as PSCI 7054.
PSCI 5084-3. Seminar: Political Theory. Intensive research in and presentation of selected topics. Introduces the student to the broad context within which political ideas arise. Deals with classical and modern thought. Same as PSCI 7084.
PSCI 5904 (1-3). Topics in Political Science. Same as PSCI 7904.
PSCI 6904 (1-3). Graduate Research Topic. Independent research in a topic of special interest. Arrangements made to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. Same as PSCI 8904.
PSCI 7024-3. Seminar: Selected Political Theories. Same as PSCI 5024.
PSCI 7044-3. Law and Politics Core Seminar. Same as PSCI 5044.
PSCI 7104-3. The Analysis of Political Systems. Same as PSCI 5104.
PSCI 7904 (1-3). Topics in Political Science. Same as PSCI 5904.
PSCI 8904 (1-3). Graduate Research Topic. Same as PSCI 6904.
PSCI 8994-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.

**Empirical Theory and Research Methodology**
PSCI 5025-3. Seminar: Conflict Behavior—The Politics of Violence. Surveys historical, theoretical, and empirical analyses of violent conflict behavior, including causes and consequences of riots, terrorism, revolution, international war, and intervention. Enrollment recommended in both semesters of the two-semester sequence. Same as PSCI 7025.
PSCI 5075-3. Introduction to Professional Political Science. Introduces graduate students to intellectual foundations and historical development of political science; epistemologies, subfields, intellectual approaches, methodological strategies of the discipline; and ethics and norms of professional conduct. Same as PSCI 7075.
PSCI 5085-4. Introduction to Political Science Data Analysis. Provides intensive experience with quantitative techniques commonly employed in political science research. Examines fundamental design issues comparing experimental and post-hoc observational designs, builds on a review of multivariate regression, inferential statistics, and causal modeling. Students undertake substantive research projects employing cross-sectional and time series data generated via different methodologies. Requires lab instruction in the use of the computer in quantitative applications of political science research. Prereq., graduate standing in social science or history. Same as PSCI 7085.
PSCI 5095-3. Advanced Political Data Analysis. Provides advanced training in empirical and analytic methods of political analysis. Covers general multivariate linear (regression) model as employed in political science. Also covers variety of dynamic approaches to empirical analysis (stochastic models, time series, and simulation). Prereq., instructor consent. Same as PSCI 7095.
PSCI 5905 (1-3). Topics in Political Science. Same as PSCI 7905.
PSCI 6905 (1-3). Graduate Research Topic. Independent research in a topic of special interest. Arrangement to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. Same as PSCI 8905.

PSCI 7075-3. Introduction to Professional Political Science. Same as PSCI 5075.

PSCI 7085-4. Introduction to Political Science Data Analysis. Same as PSCI 5085.

PSCI 7095-3. Advanced Political Science Analysis. Same as PSCI 5095.

PSCI 7905 (1-3). Topics in Political Science. Same as PSCI 5905.

PSCI 8905 (1-3). Graduate Research Topic. Same as PSCI 6905.

PSCI 8995-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of dissertation credit, refer to the Graduate School portion of this catalog.

General

PSCI 4028-3. Special Topics. Offers subjects not covered by existing courses. Offered when the department approves a special topic. Repeatable for up to 12 hours of credit for different topics.

PSCI 4038-3. Special Topics.

PSCI 4718-3. Honors Political Science Seminar. Writing and discussion of selected topics in political science. Critical review of the major methodological and conceptual features of the discipline. Students begin their honors papers in the seminar. Prereq.: GPA of at least 3.50. Approved for arts and sciences core curriculum: critical thinking.

PSCI 4848 (1-3). Independent Study. Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 semester hours of political science and who have an overall average of at least 3.00. Not more than 6 semester hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department.

PSCI 4938 (3-6). Internship in Government. Working individually under the guidance of a public official, students are assigned to projects selected for their academic suitability and value to the official. Biweekly seminar is held by the instructor to evaluate experiences, discuss relevant readings, or present project papers. Since prior approval by both the instructor and the public official is required, prospective students should make their interest known before early registration. Prereq.: PSCI 1101.

PSCI 5098 (1-3). Topics in Political Science. Not a free option; must be approved by the student's advisor and department chair. Does not count as a seminar. Same as PSCI 7098.

PSCI 5108-3. Special Topics in Political Science. Various topics not normally offered in the curriculum. Students should check with the department for specific topics. May be taken up to three times for credit in different topics. Same as PSCI 7108.

PSCI 6908 (1-3). Graduate Research Topic. Independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by the student's advisor and department chair. Does not count as a seminar. Same as PSCI 8908.

PSCI 7098 (1-3). Topics in Political Science. Same as PSCI 5098.

PSCI 7108-3. Special Topics in Political Science. Same as PSCI 5108.

PSCI 8908 (1-3). Graduate Research Topic. Same as PSCI 6908.

PSCI 8998-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of dissertation credit, refer to the Graduate School portion of this catalog.

Psychology

PSYC 2700-3. Psychology of Contemporary American Women. Surveys psychological theory and research concerning contemporary American women. Deals with such issues as masculine bias in American culture, sex differences in cognitive functioning and personality, psychological conflict for women between career and home, and finally, specific areas pertaining to women's mental health. Prereq.: PSYC 1001 or WMST 2000. Same as WMST 2700. Approved for arts and sciences core curriculum: cultural and gender diversity.

PSYC 4220-3. Psycholinguistics. Studies processes of perceiving speech and interpreting it as meaningful and of expressing intentions to communicate as utterances. Emphasizes roles of the brain and of perceptual and motor systems. Writing, aural, and visual communication systems are also created. Prereq.: PSYC 1001 and LING 2000. Same as LING 4220.

PSYC 4560-3. Language Development. Same as CDSS 4560 and LING 4560.

PSYC 5030 (1-4). Seminar: Applications of Computers in Psychology. Discusses theory and practice of applications of computers in psychological research. Introduces basic computing skills, use of statistical packages, and a programming language. Same as PSYC 4030.
PSYC 3300-3. Research in Psycholinguistics. Same as LING 5300.

PSYC 5740-3. Biology of Amphibians and Reptiles. Same as PSYC 4740.

PSYC 5800-5. Neuroscience Research Lab. Intensive study of methods and techniques in neuroscience research for advanced graduate students. Methods are drawn from electrophysiology, neurohistology, computer neural modeling, neurochemistry, neuropharmacology, and psychophysics. Faculty and topics vary from term to term. Prereq.: graduate standing and recommendation of campus neuroscience faculty. Same as EPOB 5830 and MCDB 5800.

General
Many of the following courses have controlled enrollment by application. Please check with the departmental office in Muenzinger D243 for further information.

PSYC 1001-4. General Psychology. Three hours of lect. and one hour rec. per week. Surveys major topics in psychology: perception, development, personality, learning and memory, and biological bases of behavior. Students participate as subjects for several hours in ongoing research.

PSYC 2101-4. Statistics and Research Methods in Psychology. Three hours of lect. and one 2-hour lab per week. Introduces descriptive and inferential statistics and their roles in psychological research. Topics include correlation, regression, t-test, analysis of variance, and selected nonparametric statistics. Prereq.: PSYC 1001 or equivalent is highly recommended.

PSYC 2841 (1-3). Independent Study (Lower Division). Prereq.: freshman or sophomore standing.

PSYC 3001-3. Honors Seminar. Focuses on research design. Each student prepares an original, detailed research proposal, which can become the honors thesis. Open only to students who have been accepted into the psychology department honors program. Prereq.: consent of psychology honors director.

PSYC 4001-3. Honors Seminar. Surveys and integrates general psychology for seniors majoring in psychology. Open only to juniors and seniors who have been accepted into the psychology department honors program. Prereq.: consent of psychology honors director.

PSYC 4011 (1-6). Senior Thesis. An honors thesis consists of critical review of some aspect of psychological literature, scholarly analysis of a major psychological issue, and/or an empirical research project. See the psychology honors director for further information.

PSYC 4511-3. History of Psychology. Includes outline of development of psychological theories since the Greek philosophers, the story of experimental psychology and its problems, and schools of psychological thinking. Students read original sources in English and English translations. Prereq.: 12 hours of psychology. Enrollment restricted to juniors and seniors.

PSYC 4521-3. Critical Thinking in Psychology. Allows students to "expand their powers" as they think about psychological problems, or about how psychological knowledge and techniques can be applied to pressing political, economic, biological, quantitative and social issues. Encourages intellectual discipline and critical thinking about concepts and ideas; enables students to participate in oral and written discussion. Enrollment restricted to juniors and seniors. Approved for arts and sciences core curriculum: critical thinking.

PSYC 4541 (1-6). Special Topics in Psychology. Special interest topics from the broad and diversified field of psychology are studied and analyzed in depth. Particular section contents is determined by instructor. Same as PSYC 5541.

PSYC 4551-3. Practicum in Peer Advising. Students train and participate, under faculty supervision, in an academic peer advising program. Students must submit an application to the director of undergraduate studies.

PSYC 4841 (1-6). Independent Study (Upper Division). Pass/Fail only. Prereq.: junior or senior standing.

PSYC 4851 (1-3). Independent Study (Upper Division). Pass/Fail only. Prereq.: junior or senior standing.

PSYC 4911-3. Teaching of Psychology. Students receive concrete experience in teaching general psychology under supervision of a psychology faculty member. Alternative pedagogical strategies are discussed. Prereq.: 16 hours of psychology. Students must submit an application to the director of undergraduate studies.

PSYC 5541 (1-6). Special Topics in Psychology. Same as PSYC 4541.

PSYC 6841 (1-3). Independent Study. Graduate student standing.

PSYC 6851 (1-3). Independent Study. Graduate student standing.

PSYC 6941-3. Master's Degree Candidate.

PSYC 6951 (1-6). Master's Thesis.

PSYC 7051-2. Research Practicum. Discusses ongoing, current research projects, and students formulate and complete an empirical study of their own. For cognitive and social psychology graduate students.

PSYC 7281-2. Mathematical Theories in Psychology. Seminar on topics in mathematical theories of psychology. Specific topics vary depending on interests of students and instructors.

PSYC 7521-3. History and Theory. Brief survey of chronological development of psychology, emphasizing theories. Provides opportunity for intensive examination of a few selected topics, which differ from year to year.

PSYC 8991-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Biological

PSYC 2062-3. Nutrition and Behavior. Introduces the science of nutrition together with an examination of its relationship to biochemical and physiological foundations of behavior. Cannot be taken for credit if KINE 3420 has been taken.

PSYC 4052-4. Physiological Psychology. Intensive survey of the morphological, neurochemical, and physiological aspects of behavior. One lab/rec. sec. per week. Prereq.: consent of instructor. Prereqs.: PSYC 2012 and 2022 or MCDB 1050 and 1060 or EPOB 1210 and 1220 or a full year of chemistry or physics, or a year-long combination of the above. Same as PSYC 5052.

PSYC 4072-3. Clinical Neuroscience: A Clinical and Pathological Perspective. Provides basic science background for understanding the mechanisms of behavioral disturbances resulting from brain damage. Special emphasis on pathological neuroanatomy, neurophysiology, and neuropharmacology, which is essential for understanding problems related to health and disease. Prereqs.: PSYC 2012 and 2022 or EPOB 1210 and 1220 or MCDB 1050 and 1060. Same as PSYC 5072.

PSYC 4092-3. Hormones and Behavior. Represents application of endocrinological concepts and techniques to problems of motivation and
behavior. Prereq., junior standing and one year of biology. Same as PSYC 5092.
PSYC 4102-3. Behavioral Genetics. Inheritance of behavioral characteristics. PSYC 2101 or equivalent is recommended. Same as PSYC 5102.

PSYC 4112 (2-5). Behavioral Genetics Laboratory. Demonstrations and experiments in behavioral genetics. Emphasizes basic experimental design and animal behavior. Coreq., PSYC 4102. Coreq., PSYC 2101. This is a controlled enrollment course.

PSYC 4122-3. Quantitative Genetics. Surveys principles of genetics of quantitative characteristics. Topics include gene frequencies, effects of linkage, migration, selection, and correlation; and relationships among relatives, heritabilities, inbreeding, crossbreeding, and selective breeding. Coreq., PSYC 2101. This is a controlled enrollment course. Same as PSYC 5122.

PSYC 4132-3. Behavioral Neuropharmacology. Advanced course in neuroscience; considers chemical transmission in detail. Topics include endocrinology as well as the mechanism of action of psychoactive drugs, cellular neurochemistry, and special topics in neuroscience research. Explains how neuroscientists use drugs to study learning, attention, motivation, and abnormal behavior. Prereq., PSYC 4052 or 5052. Same as PSYC 5132.

PSYC 4212-3. Gerontology: A Multidisciplinary Perspective. Covers biological, psychological, and social issues in gerontology. Topics include brain changes with age, learning/memory changes with age, and social impact of increasingly older population distribution. Prereq., PSYC 4052 or 4205 or 4406 or 4415, or instructor consent. Same as PSYC 5212.

PSYC 4673-3. Principles of Developmental Psychology. Presents principles useful in understanding biobehavioral development, together with critical analysis of theories and research methodologies. Perspective is comparative, focusing on both human and animal research and on diverse cultures and ecologies. Prereq., PSYC 2032, 4052, EPOB 1410 and 1420, EPOB 4420, or EPOB 4420.

PSYC 5042-3. Mammalian Neurophysiology. Examiners selected topics in neurophysiological basis of higher brain function in mammals. Central theme is how neurophysiological data can provide insight into the type of information processing involved in sensation, perception, cognition, and action. Prereq., PSYC 4052, EPOB 4205, or MCB 4190.

PSYC 5052-4. Physiological Psychology. Same as PSYC 4052.

PSYC 5062-4. Functional Neurochemistry. Examines mechanisms of neural signaling in experimental literature in areas of transmitter synthesis, transport, secretion, turnover, uptake, and post-synaptic effects. Other special topics included. Prereq., PSYC 4052, MCB 4190, or EPOB 4220.

PSYC 5092-3. Hormones and Behavior. Same as PSYC 4092.

PSYC 5112-3. Concepts in Behavioral Genetics. Emphasizes recent advances in genetic mechanisms. Emphasizes recent research on behavior and development of behavioral genetics. Coreq., PSYC 4102. Topics covered may include inheritance of behavioral characteristics from perspectives of pharmacogenetics, transmission genetics, biochemical genetics, and evolutionary genetics. Course may be repeated.

PSYC 5122-3. Quantitative Genetics. Same as PSYC 4122.

PSYC 5262-3. Mammalian Neuroanatomy. Covers microscopic anatomy and function of different brain regions. Emphasizes correlation between structure and function, particularly at cellular and synaptic level. Course includes brain dissection, description of neuroanatomical and neurophysiological techniques, and introduction to the ultrastructure of neurons. Prereq., PSYC 4052, MCB 4190, or EPOB 4220.

PSYC 5272-3. Neuronal Plasticity. Describes changes that occur in the nervous systems as a result of lesions, altered environment, and during development. These changes are examined relative to their significance for the organism, and to underlying mechanisms. Helps in understanding of behavioral plasticity and recovery of function.

PSYC 7012 (0-3). Research in Behavioral Genetics. Individual research projects.

Clinical

PSYC 2303-3. Psychology of Adjustment. Surveys concepts bearing upon processes of normal psychological adjustment, with emphasis on using the concepts to understand common human problems in personal growth and relationships with others.

PSYC 2652-2. Child Psychology Practicum. Volunteer work with children in local day-care centers, nursery schools, community youth organizations, or the like. Periodic training sessions and discussion group meetings with agency and departmental staff are also required. Coreq., PSYC 2643.

PSYC 4303-3. Abnormal Psychology. Examines borderlines disorders as extreme variations of the normal personality. Focuses on major functional and organic disorders, theories of mental disorders, and methods of psychotherapy. Not open for credit to those who have credit for PSYC 4313. Prereq., PSYC 1001.

PSYC 4313-4. Psychopathology. One two-hour lab per week. Analyzes major theories of personality and behavior disorders. Not open for credit to those who have credit for PSYC 4303. Prereq., PSYC 1001 and 6 hours of psychology.

PSYC 4733-4. Principles of Psychological Testing. Studies test design, construction, and analysis through active student participation in ungraded interest inventories, and personality and achievement tests. Emphasizes application of testing results and principles to personal career goals and interests. Prereq., PSYC 2101.

PSYC 7483-2. Systems of Personality. Considers foundation issues in construction of theories of the person: appraisal of structure and content of representative theories of personality; analysis of implications for therapy of various current ideas of personality research.

PSYC 7503-2. Developmental Child Clinical Assessment. Provides clinical psychology students with a theoretical understanding and skills to conduct a comprehensive review of psychological and developmental functioning. Includes assessment from a variety of sources and contexts, including testing. Prereq., PSYC 7643 and enrollment in the clinical psychology graduate program.

PSYC 7593-2. Research Problems in Clinical Psychology. Examines research issues relevant to the field of clinical psychology and mental health for the purpose of developing familiarity with substantive and methodological problems facing the field.

PSYC 7643-2. Proseminar in Developmental Child Clinical Psychology I. The first semester of this year-long course provides an integration of child development, developmental psy-
chopathology, and clinical interventions for children. Focuses on the conceptual convergence between applied developmental psychology and child clinical psychology.

PSYC 7653-2. Proseminar in Developmental Child Clinical Psychology 2. The second semester in this year-long course builds upon concepts in PSYC 7643 to explore the theoretical and empirical bases for understanding child psychopathology and intervention. Prereq. PSYC 7643.

PSYC 7673-3. Seminar: Psychotherapy. Discusses selected topics in the field of psychotherapy, including client consideration and pertinent research. Topics vary from semester to semester.

PSYC 7683-2. Objective Testing in Clinical Psychology. Focuses on administering and interpreting objective test results commonly used in clinical psychology practice. Probable inventories used are MMPI, SCII, WISC, WAIS, plus other objective measures where relevant. Uses case study format.

PSYC 7693-2. Personality Measurement. Covers theory and practice primarily in areas of individual intelligence testing, involves intensive field work and report writing.

PSYC 7703-2, 7733-2. Seminar: Clinical Psychology. Selected topics in the area of clinical psychology.

PSYC 7713-2. Practicum in Clinical Psychology. Direct clinical experience for Ph.D. candidates in clinical psychology only.

PSYC 7743-2. Primary Prevention in Community Mental Health. Surveys factors at work in the United States that have culminated in the community mental health movement and of current factors considered in future development in the field.

PSYC 7773-2. Professional Issues and Ethics. Focuses on ideographic study of attitudes, values, and personality characteristics of individuals using data obtained from personal interviews. Covers the theory and practice of various interviewing approaches. Open to Ph.D. candidates in clinical psychology only.

PSYC 7783-2. Advanced Psychopathology. Intensively surveys major theories, research findings, and behavioral characteristics associated with deviant reaction patterns.

Developmental

PSYC 4684-3. Developmental Psychology. Overview of major theories concerning the development of knowledge in children. Emphasizes contrast between empiricist, nativist, and constructivist viewpoints, as applied to the same content areas (e.g., perception, cognition, social development). Open only to juniors and seniors. Prereq. PSYC 1601.

PSYC 5294-2. Current Research Issues in Perception Development. First half of the semester includes background lectures on perception, physiology, and philosophical questions of how humans know their world. Second half focuses on current research in development of perception and information processing capacities.

PSYC 5304-3. Proseminar: Developmental Psychology—Theory and Issues. Surveys issues in theoretical approaches to developmental psychology. Open to graduate students and senior undergraduate psychology majors with instructor consent.

PSYC 5314-3. Proseminar: Developmental Psychology—Sensory Development. Covers selected topics in sensory development. Emphasizes role of experience in development of neural mechanisms of human sensory systems. Considerable attention to understanding historical foundations of current problems. Open to graduate students or senior undergraduate majors with instructor consent.

Experimental

PSYC 4165-4. Psychology of Perception. One lab, three lectures per week. Analyzes peripheral and central mechanisms involved in the transduction and interpretation of experience. Special attention to vision and audition; major theories in these areas are discussed in terms of research they have inspired. Prereqs., PSYC 1001 and 2101.

PSYC 4175-3. Introduction to Cognitive Simulation. Surveys major simulation programs in perception, learning, memory, problem solving and discovery. Students must complete a simulation project as part of the course requirement. Prereqs., PSYC 1001 and CSCE 1210. Same as PSYC 5175.

PSYC 4205-4. Psychology of Learning. One lab per week. Discusses conditions of learning in animals and humans as found in experimental literature. Prereqs., PSYC 1001 and 2101.

PSYC 4383-3. Ethology and Comparative Psychology. Discusses behavior of representative members of each animal phylum. Emphasizes ontogeny as well as phylogeny. Prereq., PSYC 1001 or general biology. Same as PSYC 5383.

PSYC 5175-3. Introduction to Cognitive Simulation. Same as PSYC 4175.

PSYC 5383-3. Ethology and Comparative Psychology. Same as PSYC 4383.

PSYC 5505-4. Behavior of Zoo Animals. Same as PSYC 4505.

PSYC 5658-3. Proseminar: Advanced Experimental Psychology. Advanced and intensive survey of topics in experimental psychology. General areas include sensation and perception, and history and theory.

PSYC 5765 (2-3). Issues and Methods in Cognitive Psychology. Provides an introduction to research in cognitive psychology. Designed for graduate students in departments other than psychology. Includes basic experimental methodology, knowledge representation in human memory, reasoning, problem solving, knowledge acquisition, and expertise. Prereq. graduate enrollment in a department other than psychology.

PSYC 5815-3. Proseminar: Thinking and Problem Solving. Introduces graduate students to the empirical and theoretical analysis of higher mental processes, such as problem solving, deductive, inductive, and analogical reasoning; time and decision making. Prereq. instructor consent.

PSYC 7205-2. Seminar: Learning. Detailed study of one or more important topics in the psychology of learning. Content of seminar varies from semester to semester.

PSYC 7215-2. Seminar: Experimental Psychology. Advanced seminar dealing with different specialized topics, at the discretion of the instructor, in different years. Topics chosen are within the broad range of experimental psychology.

PSYC 7315-2. Advanced Research Seminar on Human Memory. Addresses topics in the experimental psychology of human memory. Content varies from semester to semester, depending on interests of faculty and students. A sample topic is the long-term retention of skills. Prereq., graduate standing in psychology or related disciplines.

Social

PSYC 2406-3. Social Psychology of Ethnic Groups. Focuses on social-psychological approaches to study of American ethnic-minority groups, utilizing both traditional and contemporary perspectives on race, ethnicity, and culture of the individual or groups being studied. Prereq. PSYC 1001.

PSYC 2456-3. Social Psychology of Social Problems. Examines social psychological aspects of a variety of issues, ranging from problems of poverty or minority status to topics such as prejudice, drug use, student protest, and patterns of sexual behavior.

PSYC 4376-4. Research Methods in Social Psychology. Designed primarily for psychology majors interested in learning about research methodology. Topics include research design, data collection and data analysis, and written research reports. Prereqs. PSYC 1001 and 2101.

PSYC 4436-3. Human Judgment and Decision Making. A systematic introduction to the psychology of judgment and decision making.

PSYC 4456-3. Psychology of Personality. Psychological study of structure, organization, and development of the person as a whole. Analysis of major theories, methods, and research, including topics such as emotion, motivation, temperament, inner experience, identity and the self, personality change, and the influence of sociocultural context. Prereq.: 12 hours of psychology. Enrollment restricted to juniors and seniors.

PSYC 4486-3. Women in Cross-Cultural Perspective. Reviews contemporary theory and research on the psychology of women. Material drawn from the fields of anthropology, social psychology, clinical psychology, and sociology. Open only to juniors and seniors who are psychology, anthropology, and sociology majors. Same as PSYC 5486.

PSYC 4496-3. Cross-Cultural Psychology. Covers social factors in development of personality. Social and cultural variations in mental illness. Psychology of cultural and social change, including revolutions and economic growth. Prereq.: 12 semester hours of courses from psychology, sociology, and anthropology. Open only to majors in those fields.

PSYC 5486-3. Women in Cross-Cultural Perspective. Same as PSYC 4486.

PSYC 5546-3. Cultural Aspects of Language. Examines how different languages structure human experience and interaction, with study of diverse dialects and language groups. Focuses on the Sapir-Whorf hypothesis, especially in relation to subgroups in the Rocky Mountain region, including Hispanics, Native Americans, and Blacks.

PSYC 5556-3. Personality in Cultural Contexts. Ideally, cultural influences in child-training would prepare the person for optimal, stress-free, adult participation in the culture. Explores factors in individual personality and in cultural contexts that make reality depart from the ideal.

PSYC 5606-3. Proseminar: Social-Personality Psychology. Provides a thorough introduction to methods and theories in social psychology concerned with topics such as social motivation, social cognition, judgment and decision making, attitude formation and change, small group processes, inter-group relations, and others. Instructor consent required.

PSYC 5616-2, 5626-2, 5636-2. Proseminar: Social-Personality Psychology. Provides systematic introduction to the area of social-personality psychology. Two courses are offered each semester on a rotating basis. Topics are as follows: 5616, cognitive social psychology; 5626, social interaction; 5636, social psychology of the individual.

PSYC 5646-3. Multicultural Psychology. Applies principles of descriptive psychology to issues of ethnic and cultural diversity, and to the study of community settings and agencies in which such diversity exists. Prereq.: instructor consent.

PSYC 7536-2. Personality and Social Psychology. Selected topics in the area of social-personality psychology. Students may register for more than one section of this course within the term and/or within their graduate career. Maximum of 8 hours.

Religious Studies

RLST 2250-3. The Ethics of Ambition. Webster's Dictionary defines ambition as "an ardent desire for rank, fame, or power." Course answers these questions: is ambition blind to the needs of others, of society? Or is it rather, as one author puts it, simply "the fuel of achievement"? Methods of contemporary "character ethics" are employed to address these and related questions. Approved for arts and sciences core curriculum: ideals and values.

RLST 2300-3. Religions of Traditional Peoples. Thematic and topical study of the religions of tribal peoples of Africa, the Americas, Australia, Oceania, Indonesia, and Asia, including their role in the development of the academic study of religion. Approved for arts and sciences core curriculum: ideals and values.

RLST 2400-3. Religion and Contemporary Society. Studies the nature of contemporary American society from various theoretical perspectives in religious studies. Gives attention to the impact of secularization and to the religious elements found in aspects of secular life (e.g., politics, literature, education, and recreation). Approved for arts and sciences core curriculum: contemporary societies.

RLST 2600-3. World Religions: Western. Introduces literature, beliefs, practices, and institutions of Judaism, Christianity, and Islam, in historical perspective. Approved for arts and sciences core curriculum: ideals and values.

RLST 2610-3. World Religion: India. Introduces the literature, beliefs, practices and institutions of Hinduism, Buddhism, Jainism, and Sikhism, in historical perspective. Approved for arts and sciences core curriculum: ideals and values.

RLST 2620-3. World Religions: China and Japan. Introduces literature, beliefs, practices, and institutions of Taoism, Confucianism, Buddhism, and Shintoism in historical perspective. Approved for arts and sciences core curriculum: ideals and values.

RLST 2700-3. American Indian Religions. Introduces religions of the peoples indigenous to the Americas. Concerns include ritual, mythology, and symbolism occurring throughout these many cultures in such areas as art, architecture, cosmology, shamanism, sustenance modes, trade, and history. Approved for arts and sciences core curriculum: ideals and values.

RLST 2800-3. Women and Religion. Examines roles of women in a variety of religious traditions including Judaism, Christianity, Hinduism, Buddhism, and goddess traditions. Same as WMST 2800. Approved for arts and sciences core curriculum: cultural and gender diversity.

RLST 2840 (1-3). Independent Study.

RLST 3300-3. Indian Buddhism. Studies selected aspects of Buddhist tradition in India, including the life of the Buddha, development of the early community, Buddhist contemplative tradition, early Buddhist philosophy and psychology, and origins and development of Indian Mahayana Buddhism.

RLST 3600-3. Islam. Introduces Islamic beliefs and practices through an examination of the Qur'an, Muhammad's life, ritual duties, law and theology, mysticism, and social institutions.

RLST 3700-3. Religion and Psychology. Examines the relation between religion and psychology in the understanding of human nature. Considers a variety of contemporary theories and models in both psychology and religious studies. Approved for arts and sciences core curriculum: critical thinking.

RLST 3820-3. Topics in Religious Studies. Intensive study of a selected area or problem in religious studies. May be repeated for a maximum of 9 credit hours as topics change.

RLST 4050-3. Topics in Christian Studies. Studies a particular topic in Christian theology and culture such as early Christianity, medieval Christianity, Christianity in the United States, women and Christianity, liberation theologies, Christianity and literature, and modern Christian thought. May be repeated for a maximum of 9 credit hours as topics change. Same as RLST 5050.

RLST 4150-3. Topics in Judaism. Intensively studies a selected topic in Biblical Judaism, Jewish theology, philosophy, or mysticism in the post-Biblical period. May be repeated for a maximum of 9 credit hours as topics change. Same as RLST 5150.

RLST 4200-3. Topics in Hinduism. Examines in depth central themes, schools of thought, and movements in Hinduism, such as myth and ritual, renunciation, Vedanta, and nineteenth-century Renaissance. May be repeated for a maximum of 9 credit hours as topics change. Same as RLST 5200.

RLST 4250-3. Topics in Buddhism. Examines in depth central themes, schools of thought, and movements in Buddhism, such as Theravada in Southeast Asia, Mahayana and Tantrayana thought, Zen, and Buddhism in America. Same as RLST 5250.

RLST 4300-3. Topics in Native American Religions. Examines a topic (to vary at different offerings) focusing on religions of peoples indigenous to the Americas. Topics such as mythology, shamanism and medicine, trickster, clown, and fool; and crisis cult movements may be considered. May be repeated for a maximum of 9 credit hours as topics change. Same as RLST 5300.

RLST 4350-3. Native American Religions: Regional Studies. Studies religion(s) of a single native North American tribe or geographic region within context of history and culture of the tribe(s). Same as RLST 5350 and AIST 4350.

RLST 4400-3. Topics in Mesoamerican Religions. Studies various topics in Mesoamerican religions such as Nahua and Maya cultures in translation, rhetorical structure and ritual, Aztec and Maya religion, and human and animal sacrifice. May be repeated for a maximum of 9 credit hours as topics change. Same as RLST 5400.

RLST 4500-3. City and Symbol in Mesoamerican Religion. Interdisciplinary analysis of Mesoamerican cosmology and ceremonial centers by means of history of religions and archaeoastronomy. Comparisons with sacred capitals from various cultures are considered in this examination of orientation, architecture, and ritual activities. Same as RLST 5500.

RLST 4550-3. Religion, War, and Peace. Studies the impact of religious traditions, symbols, and experiences on attitudes and institutions related to war and peace, in cross-cultural perspective, with special attention to contemporary war and peace issues. Prereq.: 6 hours of religious studies at any level or instructor consent.

RLST 4600-3. Crisis Cults and Millenarian Movements. Examines crisis cults from the variety of perspectives that constitute millenarian studies. Focuses on causes, charismatic leaders, millenarian visions, and impact of prophecies that fall on cult members.

RLST 4650-3. Islam in the Modern World. Globally surveys Islam, covering religion and politics: Islam and the West; the Islamic revival and its varied forms in Iran, Indonesia, Libya, and Pakistan; development and change; the status of women; and media and academic stereotyping. Same as RLST 5650.

RLST 4700-3. Confucianism. Studies Confucianism, one of the most influential traditions of East Asia. Focuses on major writings of classical Confucianism as well as Neo-Confucianism and analyzes the religious dimension of the tradition. Same as RLST 5700.

RLST 4750-3. Taoism. Covers historical development and influence of Taoist tradition in Chinese culture, focusing on classical philosophical Taoism and religious Taoism, and neo-Taoism. Same as RLST 5750.

RLST 4760-3. Sufism. Studies origins and aims of Islamic mysticism, with concentration on the thought and practice of Al-Hujwiri, Al-Ghazzali, Rumi, and others. Same as RLST 5760.

RLST 4810-3. Honors Thesis. Required for students who elect departmental honors. Students write an honors thesis based on independent research under the direction of a faculty member.

RLST 4820-3. Interdisciplinary Seminar on Religion: Topics. Variable topics in religion, drawing from a variety of disciplines and methodologies as they shed light on specific traditions and issues. May be repeated for a maximum of 9 credit hours as topics change. Same as RLST 5820.

RLST 4830-3. Senior Majors Seminar. Topics and instructors vary. Brings advanced majors together in order to focus their major experience on significant topics and issues of common interest. Required of all majors.

RLST 4840-3. Independent Study. Same as RLST 4840 (1-6).

RLST 5000-3. Religion and Naming. Investigates names and naming practices in a variety of religious traditions, emphasizing their meaning and functions in relation to deities, humans, animals, myths, rituals, places, calendars, magic hierarchies, ordering systems, and meditation.

RLST 5010-3. Biblical Christianity. Same as RLST 4010.

RLST 5050-3. Topics in Christian Studies. Same as RLST 4050.

RLST 5150-3. Topics in Judaism. Same as RLST 4150.

RLST 5200-3. Topics in Hinduism. Same as RLST 4200.

RLST 5250-3. Topics in Buddhism. Same as RLST 4250.

RLST 5300-3. Topics in Native American Religions. Same as RLST 4300.

RLST 5350-3. Native American Religions: Regional Studies. Same as RLST 4350.

RLST 5400-3. Topics in Mesoamerican Religions. Same as RLST 4400.

RLST 5500-3. City and Symbol in Mesoamerican Religion. Same as RLST 4600.

RLST 5700-3. Confucianism. Same as RLST 4750.

RLST 5750-3. Taoism. Same as RLST 4760.

RLST 5760-3. Sufism. Same as RLST 4760.

RLST 5800-3. Religious Texts and Contexts. Examine ways in which religious texts (e.g., scriptures, commentaries, papyri) relate to their contexts (e.g., cultural, ritual, territorial). Variable topics include Mesoamerican codices and urban ceremonial centers, Buddhist scriptures and iconography, Confucian canon and state orthodoxy, and others.

RLST 5810-3. Religious Dimensions of Space and Time. Examines symbols, myths, rites, and contexts in which categories of space and time have religious meaning. Variable topics include sanctuaries, calendars, eschatologies, other worlds, pilgrimages, rites of passage, archaeoastronomy, toponyms, centers and peripheries, linear vs. cyclical time, seasons, and others.

RLST 5820-3. Interdisciplinary Seminar on Religion. Same as RLST 4820.

RLST 5840-3. Independent Study.

RLST 6830-3. Approaches to the Study of Religion. Provides advanced orientation in academic study of religion, focusing on methods and theories. Historical, phenomenological, and social scientific approaches are examined, in context of history and present state of the discipline.

RLST 6840-3. Independent Study.

RLST 6940-3. Master's Degree Candidate.

Cross-Listed Courses

Sociology

SOCY 1001-3. Analyzing Society. Examines U.S. society in global context, using basic sociological ideas. Focuses on the nature of group life, social and moral order, social institutions, social disorganization, social problems, and social
SOCY 1011-3. Introduction to Sociological Ideas. Reviews important studies that have shaped the field of sociology and produced essential theory and methods of the sociologist at work. Recommended prereq., SOCY 1001.

SOCY 1021-3. Twentieth-Century Social Theory. Reviews major sociological theorists of the twentieth century such as Duncan, Garfinkel, Goffman, Meron, and Parsons.

SOCY 1031-3. Introduction to Social Psychology. Surveys social psychology with special attention given to theories such as psychoanalysis, symbolic interactionism, culture and personality, and structural-functionalism.

SOCY 1841 (1-3). Independent Study in Sociology. Lower-division variable credit. Prereq., instructor consent.

SOCY 2001-3. Mass Society. Analyzes features of modern society such as technology, bureaucracy, urban life, mass communication and social disorganization, and how individuals adapt to societal conditions.

SOCY 2011-3. Contemporary Social Issues and Human Values. Explores contemporary societies on a global scale. Focuses on such issues as capitalism, socialism, race and ethnic problems, sex discrimination, poverty and the concentration of wealth, crime and deviance, human rights and human values, peace and war. Approved for arts and sciences core curriculum: ideals and values.

SOCY 2041-3. The Social Construction of Reality. Analyzes the human environment as a human product. Studies how all things that construct the objective social facts of our social world are created, reproduced, maintained, and distributed by specific human interaction processes.

SOCY 3001-3. History of Sociological Thought 1. Analyzes major social theorists from Aristotle to Comte and Spencer.

SOCY 3011-3. History of Sociological Thought 2. Continuation of SOCY 3001. Analysis of major social theorists from mid-nineteenth century to present.

SOCY 3021-3. Urban Sociology. Analyzes the social structure and problems of modern metropolitan areas.

SOCY 3031-3. Perspectives on Alienation. Examines, explains, and compares different historical and sociological theories of alienation to define problems confronting people in modern society.

SOCY 3041-3. Self and Consciousness. Explores human development from a psycho-social perspective, focusing on the interplay between psychological patterns and social forms. Issues such as personal image, shadow, and transformation are studied within the larger context of the individual versus the collective forces leading to conformity.

SOCY 3051-3. Communities. Considers community as a basic unit of society, with analysis of the range of communities from village to metropolitan area.

SOCY 3061-3. Statistics. Introduces quantitative analysis of social phenomena. Topics include strategies for data analysis, measurement, sampling, description, correlation, and statistical and sociological significance, and inference.

SOCY 3071-3. Sociology of Adolescence. Examines adolescence historically and cross-culturally, giving special emphasis to adolescence in the U.S. Analyses the relationship between social climates and patterns of behavior, such as academic performance and dating.

SOCY 3081-3. Social Relations. Improves students' abilities to observe, analyze, and understand their own behavior and that of others; improves their ability to see the small group as a social system. Students are expected to demonstrate their abilities by participation in groups as well as in written analyses.

SOCY 3091-3. Environment and Behavior. Focuses on influences of both natural and man-made environments upon human behavior and social organization. Considers both microenvironments and their influence on individuals, as well as the impact of macroenvironments on societal organization. Same as ENV 3091.

SOCY 3101-3. Social Control. Studies formal and informal mechanisms of social control, such as the political order, the legal system, the police, the mass media, and other institutions.

SOCY 3111-3. Social Change. Studies historically and cross-culturally the causes of modernization and its effects upon the individual, the family, and economic and political institutions.

SPCY 3121-3. Sociology of Language. More than anything else, it is the fact that humans use language that makes them what they are. Course focuses on language in its social context, and what happens when people talk.

SOCY 3151-3. Self in Modern Society. Using a variety of eastern and western perspectives, explores how modern social institutions and culture shape our personal experiences, how personal experiences can affect the nature of those institutions and culture, and how strategies can be developed for achieving balance between the individual and society.

SOCY 4001-6. Research Methods in Sociology. Teaches quantitative research methods emphasizing survey research including sampling, measurement, interviewing, computer methods, and statistical analysis. Students design and execute a project and prepare research papers on the basis of the collected data. Prereqs., SOCY 1001 and 1011. Limited to SOCY majors only.

SOCY 4011-6. Field Experience in Sociology. Emphasizes ethnographic techniques including intensive interviewing, direct observation, coding, participant observation, interpretation of data, theory construction, and report writing. Students conceive and execute a field research project, with data collection, analysis, and a report. Prereqs., SOCY 1001 and 1011. Limited to SOCY majors only. Same as CHST 4015.

SOCY 4031-3. Social Psychology. Studies individuals in social context. Reviews philosophical and sociological treatments of the relation between the individual and society. More specific topics include the socialization process, theories of human development and personality formation, language acquisition, conformity, aggression, sex differences in personality and gender identity, and the relation between attitudes and overt behavior.

SOCY 4041-3. The Creative Self. Experimental approach to the creative process that fosters experimentation outside of conventional patterns of thinking and expression, and explores the use of imagination and creative thinking in problem-solving, writing, and art.

SOCY 4051-3. Computer Applications in Sociology. Examines use of computer models to enhance sociological reasoning and to help solve social problems. Students learn how to write programs that simulate social structures, processes, and complex systems such as friendship networks, social mobility, and world systems.

SOCY 4061-3. Statistics through Computers. Introduces basic statistical concepts and methods such as correlation and regression analysis. Students learn to use a computer and apply these methods to specific research problems. Same as SOCY 5061.

SOCY 4071-3. Technology and Modernization. Analyzes social structures and social relationships that change in response to technological innovation. Emphasis also given to the role of technology in the development of countries other than the United States.

SOCY 4081 (1-3). Sociology of Education. Analyzes the school as a social organization. Among topics considered are power and control in the school; classroom organization and procedures and their relation to learning and personality development in students; roles of educators; and reciprocal relations of school and community. Same as SOCY 5081.

SOCY 4091-3. Uses of Photography in Sociology. Examines how still photography can be used in sociological investigation, particularly in ethnographic field work. Each student is required to design and carry out a field project. Direct experience in investigative inquiry and sharpening of the student's observational and analytical skills are the goals.

SOCY 4101-3. Education in Multilingual Communities. Examines roles of language and social inequality in educational achievement, particularly among students with differing mother tongues, and analyzes politics and pedagogy of bilingual education. Same as SOCY 5101.
SOCY 4111-3. Ideas in Society. Investigates selected contrasting theories and idea systems in four areas: the sociology of knowledge, philosophy, ideology, and supernatural-paranormal phenomena. Central concerns include how knowledge about "reality" is generated, explained, verified, and changed in differing idea systems.

SOCY 4121-3. Sociology of Religion. Discusses the social origin of religion, its significance as a cultural factor and as a form of social control in contemporary society, and its relationship to other institutions.

SOCY 4151-3. Sociology of the Future. Systematic analysis of future societies. A variety of possible social arrangements are examined, and the social, economic, and political consequences of each are assessed. Computer simulation taught as an optional method. Same as SOCY 5151.

SOCY 4441-3. Senior Honors Seminar 1. Critical assessment of major accomplishments of sociology and contemporary challenges to the field. Seminar is the initiation of the honors thesis. Limited to sociology majors with a grade point average of 3.20 or by permission of the instructor.

SOCY 4513-3. Senior Honors Seminar 2. Preparation of an honors thesis: research strategies, theory construction, and use of theory. Research methods and data analysis are used in reference to students' honors theses. Limited to sociology majors with a grade point average of 3.20 or by permission of the instructor.

SOCY 4661-3. Critical Thinking in Sociology. Examines a sociological topic in depth, covering such issues as theory, methods, social structure, social processes, social change, and social policy, emphasizing writing, reading, and critical thinking. Prereq.: SOCY 1001 and 1011 and senior standing. Approved for arts and sciences core curriculum: critical thinking.

SOCY 4841 (1-3). Independent Study in Sociology. Upper-division variable credit. Instructor consent required.

SOCY 4911-3. Teaching Sociology. Students participate in a teaching seminar under the supervision of a faculty member. Includes pedagogical strategies for implementing concrete educational goals and encouraging higher levels of creativity and analysis in a large, lower-division class. Emphasizes mentorship and personal development. Prereq.: instructor consent.

SOCY 5011-3. Contemporary Theory. Surveys post-World War II sociological theory emphasizing such theories as functionalism, symbolic interactionism, exchange theory, conflict theory, and phenomenology.

SOCY 5021-3. Data Analysis. Principles and practice of quantitative and qualitative research, including the nature of scientific explanation, the relationship between theory and research design, measurement problems, sampling questionnaire construction, interviewing, ethnographic methods, and statistical analysis.

SOCY 5031-3. Research Design. Examines modern methods of quantitative and qualitative data analysis such as regression analysis, causal modeling, computer methods, content analysis, and written presentation of findings.

SOCY 5041-3. Assessment Research. Concerned with methods of assessing the effectiveness of action programs conducted in various institutional sectors of the community. Applies basic principles of research design, measurement, and administration in the behavioral sciences to situations likely to be encountered when social research is conducted in an action setting.

SOCY 5071-3. Sociology of Language and Knowledge. Students conduct field projects are involved using all the sequential steps from collection of original data through its analysis and evaluation. Unites perspectives from the sociology of knowledge and science with those from the sociology of language.

SOCY 5081 (1-3). Sociology of Education. Same as SOCY 4081.

SOCY 5091-3. Sociological Analysis of Organizations. Examines theory and research in the field of formal organization. Gives special attention to problems of organizational change and to the difficulties a social scientist working in a bureaucratic organization might encounter.

SOCY 5101-3. Education in Multilingual Communities. Same as SOCY 4101.

SOCY 5111-3. Research in Survey Methods. Students conduct sample surveys to gain practical experience in sampling, questionnaire construction, interviewing, scaling, coding, and computerized data analysis.

SOCY 5121-3. Ethnographic Research Methods. Students are trained in the systematic observation of people in situ, finding them where they are, staying with them in a role acceptable to them that allows intimate observations of their behavior, and reporting it in ways useful to social science but not harmful to those observed.

SOCY 5141-3. Sociolinguistics. Research seminar incorporating theories of language use in society and in social scientific inquiry together with practical experience in observing, recording, and analyzing actual language data from some arena of social action chosen by the student.

SOCY 5221-3. Ethnographic Analysis. Drawing on data gathered through participation, observation, and in-depth interviewing, students focus on developing theoretical analyses and exploring classical and post-modern ethnographic writing formats. Students present and revise their papers as well as review journal articles. Prereq.: SOCY 5121 or instructor consent.

SOCY 5321-3. Sociology of Ideas. Examines how social structures and beliefs mutually influence each other through a critical analysis of classical and modern sociological theories and methods. Prereq.: graduate standing and instructor consent.

SOCY 5531-3. Seminar in Social Psychology. Studies the individual in social context. Focuses on theoretical perspectives and substantive issues specific to sociological and social psychology, including socialization, the self, social roles, language, deviance, gender, collective behavior, group processes, attitudes and behavior, social norms, and conformity. Prereq.: graduate standing.

SOCY 5841 (1-3). Independent Study in Sociology. Graduate variable credit. Prereq.: instructor consent.

SOCY 6841 (1-6). Guided Research in Sociology. Same as SOCY 6941 (1-3). Candidate for Degree for Master's Thesis.

SOCY 6951 (1-4). Master's Thesis.

SOCY 8991-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.

Population and Health Issues

SOCY 3022-3. Sociology of Chicanos and Mexican Americans. Surveys contemporary sociological studies of Chicanos, and theories used to understand and explain their status. Issues covered include population growth, socioeconomic status, reverse discrimination, Chicana feminism, and U.S.-Mexico relations. Same as CHST 3023.

SOCY 4012-3. Population Control and Family Planning. Examines determinants of population and economic growth in developing countries to assess the adequacy of current population policies. Considers determinants of fertility, family size, childlessness, and the changing nature of reproductive freedom sociologically and from a feminist standpoint. Open to juniors and seniors only. Same as WMST 4012.

SOCY 5012-3. Population Issues, Problems and Policies. Presents relations between population and society, covers contemporary perspectives, and attends to theoretical and empirical substance. Focuses on mortality, fertility, and migration, the major demographic areas, with reviews of specific demographic phenomena and controversies. Same as SOCY 5022.

SOCY 5052-3. Research in Demographic Methods. Surveys demographic data and methods, social indicators, ecological and cohort analysis, with individual research done in a student's area of interest.

Health and Medicine

SOCY 2003-3. Sociology of Death and Dying. Examines the event of death and the process of dying: the causes of death; who dies; the experience of death in nursing homes, emergency rooms, intensive care, and hospices; ethical and political issues.

SOCY 2023-3. Folk Medicine and Psychiatry in Mexican/Chicano Communities. Focuses on folk medicine and folk psychiatry in the Mexican-Chicano communities of the Southwestern United States. Includes theories on the roles, characteristics, prevalence, and future of folk practitioners in their dealings with illnesses as well as beliefs in magic and witchcraft.

SOCY 3003-3. Sociology of Gender, Health, and Aging! Examines the relationships among illness causation and belief systems, socioeconomic status, social stress, and the social role of the sick person.

SOCY 4003-3. Sociology of Aging. Studies present and future roles of the aged in the family, the community, and the economic, political, health, and retirement systems. Approved for arts and sciences core curriculum: contemporary societies.

Criminology

SOCY 1004-3. Deviance in U.S. Society. Examines deviant groups in the U.S., emphasizing existing theory and research about such issues as deviant careers, deviant lifestyles and behavior, and processes of social control. Approved for arts and sciences core curriculum: ideals and values. Same as SOCY 5004-3.

SOCY 2004-3. Topics in Criminology. Variety of courses in criminology taught by visiting lecturers. See current departmental announcements for specific content. Students may receive credit for this course up to three times for different topics.

SOCY 2014-3. The Criminal Justice System in the United States. Explores power, socioeconomic status, race, age, and gender issues in law enactment and enforcement, judicial practice, and correctional policy and practice. Examines historical changes in these structures. SOCY 1001 recommended prerequisite.

SOCY 2004-3. Topics in Criminology. Variety of courses in criminology to be taught by visiting lecturers. See current departmental announcements for specific content. Students may receive credit for this course up to three times for different topics.

SOCY 2014-3. The Criminal Justice System in the United States. Explores power, socioeconomic status, race, age, and gender issues in law enactment and enforcement, judicial practice, and correctional policy and practice. Examines historical changes in these structures. SOCY 1001 recommended prerequisite.

SOCY 2004-3. Topics in Criminology. Variety of courses in criminology to be taught by visiting lecturers. See current departmental announcements for specific content. Students may receive credit for this course up to three times for different topics.

Criminology

SOCY 4014-3. Criminology. Scientifically studies criminal behavior with special attention given to development of criminal law and its use to define crime, the cause of law violation, and methods used to control criminal behavior.

SOCY 4024-3. The Treatment of Offenders. Studies principles of treating offenders, including attitude formation and change, group dynamics, behavior modification, skill development, work programs, and social reeducation.

SOCY 4044-3. Women and Crime. Examines gender and criminality by focusing on women as criminals, women as victims (sexual and domestic abuse), and women as workers in the criminal justice system (police, prison guards, attorneys, and judges). Prerequisites: SOCY 1004 and 4014, and 56 credit hours or more.

SOCY 4934-3. Internship in Community Corrections. Students gain professional experience with offender treatment practices and evaluation research approaches in community correctional settings. Seminar topics include theory and practice in probation and parole programming, halfway house program structure and management, and other community correction options.

SOCY 4944-3. Internship in Community Corrections 2. Designed to continue the training received in SOCY 4934. Students may receive credit for this course up to two times when necessary to complete their obligations to the internship organization. Prerequisite: SOCY 4934.

SOCY 5004-3. Topics in Criminology. Variety of courses in criminology to be taught by visiting lecturers. See current departmental announcements for specific content. Students may receive credit for this course up to three times for different topics.

SOCY 5024-3. Deviant Behavior. Examines current theory and research on deviant behavior emphasizing interrelationships between various forms of deviance and social responses to deviance.

Social Conflict

SOCY 2015-3. Sociology of Natural and Social Environments. Sociological interpretation of the increasingly traumatic interaction of ecological and social systems in the Rocky Mountain west, where the natural environment is impacted by recreation and energy development.

SOCY 2025-3. Nonviolence and the Ethics of Social Action. Examines nonviolence as a strategy of social action. Focuses on ethics of action; racial and economic movement of social justice; and nonmilitary national defense, civil disobedience, and conscientious objection to war. Approved for arts and sciences core curriculum: contemporary societies.

SOCY 3005-3. Sociological Analysis of Revolution. Comparative analysis of major revolutions emphasizing causation, revolutionary process, and long-term consequences. Attention given to social stratification, political organization, economic processes, ideological systems, and international relations.

SOCY 3015-3. Sociology of Peacemaking. Analyzes institutions of war and of the forces emerging to counter them, such as negotiation, nonviolent national defense strategies, and peace movements.
SOCY 4005-3. Sociology of War. Considers the questions war raises by applying modern sociological theory and methods to armed conflicts from the ancient Peloponnesian War to Vietnam. Same as SOCY 5005.

SOCY 4015-3. Theories of Conflict. Discusses theories about causes of conflict, its consequences, and methods of conflict resolution. Examples are drawn from the fields of small groups, community conflict, and international disputes. Explores relationship between theory of conflict resolution and practices, such as mediation. Same as SOCY 5015.

SOCY 4105-3. Sociology of Modern Soviet Society. Examines important dimensions of contemporary Soviet society: sociologically; social stratification, urbanization, population, family, the status of women, welfare, and social problems. Emphasizes the sociological analysis of social structures, processes, conflict, and change. Prereq.: junior or senior standing.

SOCY 4115-3. Democracy and Nonviolent Social Movements. Explores theories of democracy and development engendered and tested by movements for nonviolent social change in different settings. Focuses on means and ends, spirituality, leadership, decision-making, civil society, cooperative economics, ecology, and decentralized power. Same as SOCY 5005.

SOCY 5015-3. Theories of Conflict. Same as SOCY 4015.

SOCY 5035-3. Social Stratification. Same as SOCY 4035.

SOCY 5055-3. Modern Marxist Social Theory. Analyzes recent Marxist theories of class structure, political economy, alienation, culture, and the state as discussed in the work of Althusser, Gramsci, Lukacs, Mandel, Marcuse, and others.

SOCY 5085 (1-3). Topics in Social Conflict. Visiting conflict management specialists examine the theory/practice relationship from the perspective of the professional third-party neutral. Explores family disputes, environmental and resource conflict, and international and civil wars. Graduate students may receive credit for this course up to three times for different topics. Course can be repeated in any given semester.

SOCY 5205-3. Collective Action. Studies collective action in its primary forms: movement for social change; religious movements; and civil resistance to military occupation and political repression. Emphasizes movement leadership, ideology, organizational process and structure, and use of nonviolent action. Prereq.: graduate standing or instructor consent.

SOCY 5215-3. Sociology of Nonviolence. Examines the sociological phenomenon of nonviolence as a critical dynamic of social change. Emphasizes theories and methods of nonviolence throughout history; contemporary research in and application of nonviolence; and case studies of nonviolent conflict. Prereq.: graduate standing or instructor consent.

SOCY 5915-3. Conflict Management. Students learn conflict management skills in field placements with governmental, educational, industrial, and mediation organizations.

Sex and Gender

SOCY 1016-3. Sex, Gender, and Society I. Examines status and power differences between the sexes at individual and societal levels. Emphasizes historical cross-cultural context of gender roles and status, and reviews major theories of gender stratification. Same as WMST 1016. Approved for arts and sciences core curriculum: cultural and gender diversity.

SOCY 2016-3. Sex and Gender in Futuristic Literature. Examines social structural causes and social psychological consequences of sex stratification in the context of futuristic literature, including nonfiction, science fiction, and utopian and dystopian novels. Same as WMST 2016. Approved for arts and sciences core curriculum: cultural and gender diversity.

SOCY 3016-3. Marriage and the Family in U.S. Society. Examines marriage and the family historically and cross-culturally within the U.S. Emphasizes changing roles and family structures. Also examines alternatives to the nuclear family and traditional marriage to explore new definitions of family. Prereqs.: SOCY 1001 and junior standing.

SOCY 3046-3. Topics in Sex and Gender. Visiting faculty present courses based on their areas of expertise and specialization in the field of sex and gender. Students should check current sociology department notices of course offerings for specific topics. Students may receive credit for this course up to three times for different topics.

SOCY 4016-3. Sex, Gender, and Society II. Studies status and power differences between the sexes at individual, group, and societal levels. Examines empirically established psychological sex differences, and reviews biological, psychological, and sociological explanations for gender differences. Same as WMST 4016.

SOCY 4026-3. Sociology of Mental Health: Gender, Race, and Class Issues. Considers historical, social, and normative determinants of mental illness with particular attention to mental hospitals, social-therapy, and mental health services.

SOCY 4046-3. Men and Masculinity. Studies the historical development, cross-cultural definition, and social construction of masculinity. Emphasizes contemporary definitions of masculinity and the impact on these definitions.

SOCY 4086-3. Family and Society. Studies the changing relationship between the family and the economic structure, historically and sociologically. Examines households that differ from the nuclear family, taking into account the political, social, ideological, demographic, and economic determinants of family formation. Open to juniors and seniors only. Same as SOCY 5086 and WMST 4086.

SOCY 5006-3. Sociology of Sex and Gender. Provides theoretical and empirical examination of sex stratification, sex role differentiation, and sex differences in socialization, personality, institutions, and culture.

SOCY 5026-3. Feminist Research Methods. Epistemological and methodological issues generated by feminist research and students' own projects.

SOCY 5086-3. Family and Society. Same as SOCY 4086.

Spanish and Portuguese

Spanish

SPAN 1000-3. Cultural Difference through Hispanic Literature. Organized around the general topic of cultural differences. Focuses on a related issue such as gender or history articulated in the literature of Spain, Latin America, and the Hispanic United States. Taught in English; student reads selected literary texts in English from the various traditions. Does not count toward the Spanish major. Approved for arts and sciences core curriculum: literature and the arts.

SPAN 1010-5. Beginning Spanish I. Offers students a firm command of Spanish grammar. Grammar is used as a point of departure for development of oral skills. Reading and writing are stressed to a lesser degree. Attendance at the language laboratory may be mandatory.

SPAN 1020-5. Beginning Spanish II. Continuation of SPAN 1010. Attendance at the language laboratory may be mandatory. Prereq.: SPAN 1010 or placement.

SPAN 1150-8. Intensive First-Year Spanish. An intensive beginning course covering the same material as SPAN 1010 and 1020. Not open to students with credit in SPAN 1010 and 1020. Attendance at the language laboratory may be mandatory. Prereq.: placement and departmental approval.

SPAN 1180-3. Literature and Culture: Modern Spanish-American Fiction in Translation. Students read and discuss translations of works by outstanding contemporary Spanish-American writers, including Borges, Cortázar, Fuentes, García Márquez, Puig, and Allende. Emphasizes...
contrasts between the Hispanic perception of reality and perceptions of other ethnicities. Requirements include papers, extensive class discussion, and two exams.

SPAN 2150-5. Intensive Second-Year Spanish. Intensive review of grammar and other subjects covered in SPAN 2110 and 2120. Attendance at the language laboratory is mandatory. Not open to students with credit in SPAN 2110 and 2120. Prereq., SPAN 1020 or 1150 or placement and departmental approval.

SPAN 3000-5. Advanced Spanish Language Skills. Transitional and introductory course for students who want to pursue a major in Spanish. Involves compositions, reading, and oral discussions. Attendance at the language laboratory is mandatory. Prereq., SPAN 2120 and 2150 or equivalent, or placement.

SPAN 3040-3. Professional Spanish for Business 2. Includes writing, interpreting, and elementary translation. Some attention given to writing of resumes and application letters, as well as to the entire job-search process. Prereq., SPAN 3030.

SPAN 3050-3. Spanish Phonology and Phonetics. Designed to teach some of the methods and techniques, and tools of descriptive linguistics as they apply to articulatory phonetics. Students analyze important contrasts between sounds of Spanish and English by means of phonetic transcription. Prereq., SPAN 3000.

SPAN 3100-3. Literary Analysis. Students read short stories and other brief narrative texts, critical and creative essays, short plays, and poems to facilitate the acquisition of critical skills in identifying formal and formalistic issues within texts being studied. Prereq., SPAN 3000 or instructor consent. Approved for arts and sciences core curriculum: critical thinking.

SPAN 3120-3. Advanced Spanish Grammar. Analysis of texts from morphological and syntactic perspectives. Structural and semantic characteristics of major features of Spanish are studied at the sentence level. Use of these grammatical features is then studied in selected literary texts. Prereq., SPAN 3000 or equivalent.

SPAN 3210-3. The Cultural Heritage of Latin America. Examines literary, artistic, and philosophical currents in Latin America beginning with pre-Columbian indigenous cultures and continuing to the present. Prereq., SPAN 3000.

SPAN 3310-3. Twentieth-Century Spanish Literature. Surveys leading writers of Spain from 1898 until the present. Prereq., SPAN 3100.

SPAN 4000-3. Hispanic and Native American Culture of the Southwest. Does not count for major. Taught in English. Same as SPAN 5000 and CHST 4000.

SPAN 4010-3. Advanced Rhetoric and Composition. Designed to improve written expression in Spanish. Detailed study of nuances of grammar points most difficult for students. Attention to errors in student compositions and to various styles of written Spanish. Prereqs., SPAN 3100 and 3120 or equivalent.

SPAN 4070-3. Problems of Business Translation in Spanish 2. Legal and commercial documents are studied, prepared, and discussed to enable students to perform successfully in real translation situations. Prereq., SPAN 4060 or equivalent.

SPAN 4110-3. Hispanic Women Writers. Discusses the image of women in Spanish literature through the centuries using works by representatives to evaluate the works. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4150-3. Masterpieces of Spanish Literature to 1700. Treats major literary tendencies of Spanish literature from its origins to the end of the Baroque period. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4160-3. Masterpieces of Spanish Literature: 1700 to Present. Requires a reading of selected masterpieces and an examination of major movements and figures in the literature of Spain from 1700 to the present. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4170-3. Masterpieces of Spanish-American Literature to 1898. Examines major works of Spanish-American literature from the colonial period to the late nineteenth century. Emphasizes major figures and their works. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4180-3. Masterpieces of Spanish-American Literature: 1898 to Present. Examines major works of Spanish-American literature from late nineteenth century to present. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4220 (1-3). Special Topics in Spanish and/or Spanish-American Literature. Examines intensively particular topics or issues concerning Spanish and/or Spanish-American literature to be selected by the instructor. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4230-3. Literature Written in Spanish in the United States. Knowledge and study of the body of literature written in Spanish by Hispanics living in the United States give another perspective to American letters and life within the Hispanic group. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4620-3. Cervantes. Reading and analysis of selected works by Cervantes. Prereqs., SPAN 3100, 3120, and an additional course above SPAN 3000.

SPAN 4650-3. Methods of Teaching Spanish. Familiarizes students with current methodology and techniques in foreign language teaching. Peer-teaching coupled with opportunity to teach mini-lessons provides students with actual teaching experience in the foreign language classroom. Prereqs., SPAN 3100, 3120, an additional course above SPAN 3000, and admission to the teacher certification program or departmental approval. Same as SPAN 5650.

SPAN 4660-6. High School Spanish Teaching. Part of supervised secondary school teaching required for state certification to teach Spanish. These hours do not count toward student hours in the major nor in the maximum departmental hours allowed. The credit is pass/fail only. Prereq., SPAN 4650/5650.

SPAN 4840 (1-3). Independent Study. Departmental approval required.

SPAN 4920 (1-4). Languages Internship for Professions. Participants interested in public service or management-oriented careers in government or business are able to work as interns in public sector agencies or in private industry, on campus or abroad. Instructor consent required. Prereqs., SPAN 3100, 3200, an additional course above SPAN 3000, and departmental approval.

SPAN 4970-1. Bibliography and Methods of Literary Research. Designed to provide a background in fundamental literary bibliographical research tools. Considers standard library works on the subject and others that are little-known to facilitate research efforts of students insofar as location and identification of critical studies are concerned. Predominant style sheets available to Spanish researchers are also discussed in detail. Prereq., graduate standing or departmental consent.

SPAN 4980-1. Theories and Methods of Language Learning and Pedagogy for Teaching Assistants and Graduate Part-Time Instructors. Required, intensive mini-course for teaching assistants in Spanish and Portuguese. Provides teachers with the opportunity to learn about lan-
guage learning theory and pedagogy. Prereq., graduate standing or departmental consent.
SPAN 5000-3. Hispanic and Native American Culture of the Southwest. Same as SPAN 4000.
Note: All Spanish seminars may be taken for credit, provided the subject differs from one course to another.
SPAN 5120 (1-3). Seminar: Spanish Literature and/or Spanish-American Literature. Selected topics in Spanish and/or Spanish-American literature. Prereq., graduate standing or departmental consent. Same as SPAN 7120.
SPAN 5130 (1-3). Seminar: Critical Approaches to Hispanic Literature. Treats various topics and genres, as needs and resources dictate. Special attention to theoretical and critical analysis of Hispanic literature with greatest emphasis on contemporary trends. Genres might include narrative, poetry, and theatre. Prereq., graduate standing or departmental consent. Same as SPAN 7130.
SPAN 5140 (2-4). Seminar: Spanish Literature, Medieval Period. Studies medieval works, authors, and themes, with consideration of principal influences from other literatures. Reading in Old Spanish. Prereq., graduate standing and SPAN 5420 or 7420. Same as SPAN 7140.
SPAN 5200 (2-4). Seminar: Spanish Literature, Renaissance and Baroque. Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, Don Quijote and Novelas ejemplares, picaresque novel, and the Spanish comedias of the seventeenth century. Prereq., graduate standing or departmental consent. Same as SPAN 7200.
SPAN 5210 (2-4). Seminar: Spanish Literature, Eighteenth and/or Nineteenth Centuries. Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), nineteenth-century poetry, and nineteenth-century theatre. Prereq., graduate standing or departmental consent. Same as SPAN 7210.
SPAN 5220 (2-4). Seminar: Spanish Literature, Twentieth Century. Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the twentieth century, theatre of the twentieth century, pre-Civil War novel, and post-Civil War novel. Prereq., graduate standing or departmental consent. Same as SPAN 7220.
SPAN 5300 (2-4). Seminar: Spanish-American Literature, Colonial Period and/or Nineteenth Century. Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, nineteenth-century poetry, and gaucho literature. Prereq., graduate standing or departmental consent. Same as SPAN 7300.
SPAN 5320 (2-4). Seminar: Twentieth-Century Spanish-American Literature. Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry. Prereq., graduate standing or departmental consent. Same as SPAN 7320.
SPAN 5400 (2-4). Seminar: Spanish Phonology. Topics within Spanish phonology are treated, as needs and resources dictate. Special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching, and different schools of Spanish phonology. Prereq., graduate standing or departmental consent. Same as SPAN 7400.
SPAN 5410 (2-4). Seminar: Spanish Syntax. Treats topics within Spanish syntax, each requiring a semester's study, as needs and resources dictate. Special attention to different schools and contemporary theoretical developments. Representative topics might include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax, and different schools of Spanish syntax. Prereq., graduate standing or departmental consent. Same as SPAN 7410.
SPAN 5420 (2-4). Seminar: History of the Spanish Language. Treats topics within the history of the Spanish language, as needs and resources dictate. Concerned with linguistic evolution of Spanish from neo-Latin to its present status as a world language; considers important, historical, linguistic, literary, and cultural currents. Representative topics might include a diachronic study of Spanish linguistic forms, the extension of Spanish to the New World, and linguistic and literary texts in Old Spanish. Prereq., graduate standing or departmental consent. Same as SPAN 7420.
SPAN 5430 (2-4). Seminar: Hispanic Linguistics. Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics. Prereq., graduate standing or departmental consent. Same as SPAN 7430.
SPAN 5440-3. Seminar: Trends in Hispanic Linguistics. Overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semantics, history of the Spanish language, language acquisition, and applied linguistics. Prereq., graduate standing or departmental consent. Same as SPAN 7440.
SPAN 5650-3. Methods of Teaching Spanish. Same as SPAN 4650.
SPAN 6840 (1-3). Independent Study. Prereq., graduate standing and departmental approval.
SPAN 6940-Variable credit. Master's Degree Candidate. Prereq., graduate standing and departmental approval.
SPAN 7120 (1-3). Seminar: Spanish Literature and/or Spanish-American Literature. Same as SPAN 5120.
SPAN 7130 (1-3). Seminar: Critical Approaches to Hispanic Literature. Same as SPAN 5130.
SPAN 7140 (2-4). Seminar: Spanish Literature, Medieval Period. Same as SPAN 5140.
SPAN 7200 (2-4). Seminar: Spanish Literature, Renaissance and Baroque. Same as SPAN 5200.
SPAN 7210 (2-4). Seminar: Spanish Literature, Eighteenth and/or Nineteenth Centuries. Same as SPAN 5210.
SPAN 7220 (2-4). Seminar: Spanish Literature, Twentieth Century. Same as SPAN 5220.
SPAN 7300 (2-4). Seminar: Spanish-American Literature, Colonial Period and/or Nineteenth Century. Same as SPAN 5300.
SPAN 7320 (2-4). Seminar: Twentieth Century Spanish-American Literature. Same as SPAN 5320.
SPAN 7400 (2-4). Seminar: Spanish Phonology. Same as SPAN 5400.
SPAN 7410 (2-4). Seminar: Spanish Syntax. Same as SPAN 5410.
SPAN 7420 (2-4). Seminar: History of the Spanish Language. Same as SPAN 5420.
SPAN 7430 (2-4). Seminar: Hispanic Linguistics. Same as SPAN 5430.
SPAN 8840 (1-3). Independent Study. Prereq., graduate standing and departmental approval.
SPAN 8990-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section of this catalog. Prereq., graduate standing and departmental approval.

Portuguese
PORT 1010-5. Beginning Portuguese 1. Offers students a firm command of Portuguese grammar. Grammar used as point of departure for development of oral skills. Reading and writing stressed to lesser degree. Attendance at language laboratory may be mandatory.
PORT 1020-5. Beginning Portuguese 2. Continuation of PORT 1010. Prereq., PORT 1010 or placement.
PORT 1150-8. Intensive Beginning Portuguese. Intensive review of the structures normally covered in PORT 1010 and 1020. Attendance at language laboratory may be mandatory. Not open to students with credit in PORT 1010 and 1020. Prereq., placement and departmental approval.
PORT 2110-3. Second-Year Portuguese 1. Includes grammar review and a study of Portuguese and Brazilian culture, civilization, literature, and art. Prereq., PORT 1020 or 1150 or placement.

PORT 2120-3. Second-Year Portuguese 2. Includes grammar review and a study of Portuguese and Brazilian culture, civilization, literature, and art. Prereq., PORT 2110 or placement.

PORT 2150-5. Intensive Second-Year Portuguese. Intensive review of structures normally covered in PORT 2110 and 2120. Not open to students with credit in PORT 2110 and 2120. Prereq., PORT 1020 or 1150 or placement and departmental approval.

PORT 2350-3. Portuguese for Spanish Speakers. Intensive introduction to the Portuguese language for those able to speak Spanish. Prereq., five semesters of college Spanish or equivalent, or departmental approval.

PORT 4030-3. Topics: Luso-Brazilian Civilization. Designed to examine particular topics or issues concerning Portuguese and/or Brazilian culture. Prereq., PORT 2120 or 2150 or 2350 or equivalent. Same as PORT 5030.

PORT 4110-3. Survey of Brazilian Literature. Examines major works of Brazilian literature. Prereq., PORT 2120 or 2150 or 2350 or equivalent. Same as PORT 5110.

PORT 4150-3. Survey of Portuguese Literature. Examines major works of Portuguese literature. Prereq., PORT 2120 or 2150 or 2350 or equivalent. Same as PORT 5150.

PORT 4220-3. Special Topics in Luso-Brazilian and/or African Literature. Designed to examine intensively particular topics or issues concerning the literatures of Portugal, Brazil, and/or the African countries of Portuguese colonization. May be repeated as long as the topic varies. Prereq., PORT 2110 or 2150 or 2350. Same as PORT 5220.

PORT 4840 (1-3). Independent Study. Prereq., departmental approval.

PORT 5030-3. Topics: Luso-Brazilian Civilization. Same as PORT 4030.

PORT 5110-3. Survey of Brazilian Literature. Same as PORT 4110.

PORT 5220-3. Special Topics in Luso-Brazilian and/or African Literature. Same as PORT 4220.

PORT 5850 (1-3). Independent Study. Prereq., graduate standing and departmental approval.

Theatre and Dance

History/Dramaturgy/Directing

THTR 1013-3. Development of Theatre I: Forms of Classical Theatre and Drama. Examines the interaction of dramatic literature and performance in classical forms of European and Asian theatre, including Greek, Roman, Indian, Japanese, Medieval, and Renaissance Europe. Approved for arts and sciences core curriculum: literature and the arts.

THTR 2021-3. Development of Theatre 2: Masters of Modern Drama. Studies three to five plays by each of seven modern playwrights who have had a major impact on twentieth-century theatre. Plays to be studied include Ibsen, Strindberg, Chekhov, Shaw, and Beckett. Requires at least one major paper.

THTR 3031-3. Development of Theatre 3: European Theatre Practice, Nineteenth and Twentieth Centuries. Examines changes in theatrical means, methods, and purposes since 1800, with attention to innovators such as Mme Vestris, Wagner, Duke of Saxe-Meiningen, Reinhardt, Meyerhold, Appia, Brecht, Artaud, Sobo, and companies such as the Theatre Libre, Moscow Art Theatre, Berliner Ensemble, Théâtre du Soleil, and the RSC. Requires at least one major paper.

THTR 4001-3. Development of Theatre 4: American Theatre and Drama. Explores theatre in America from its beginnings to the present, with particular attention to theatres, plays, and players since 1800. Includes frontier theatres, regional repertory theatres, major dramatists, and the development of Broadway and Off-Broadway. Approved for arts and sciences core curriculum: literature and the arts.

THTR 4051-3. Playwriting. Introductory course in craft of playwriting; primary focus on technique of developing short plays.

THTR 4081-3. Senior Seminar: Tragedy and Comedy. Studies two basic dramatic genres, with attention to philosophical theories about each; examples from different periods, and divergent forms such as tragedy-comedy and melodrama, and absurdist drama. Serves as the department's critical capstone course; two senior essays are required.

THTR 5021-3. Seminar: Perspectives on Acting. The art of acting is examined through study of acting theories and practices developed during major periods of theatre history. Examines the variety of theories about acting that remain today.

THTR 5051-3. Special Topics in Theatre History. Detailed study of a particular topic in theatre history: e.g., an era, a style, a country, or an organization. Topic specified in Registration Handbook and Schedule of Courses.

THTR 5071-3. Advanced Directing. Graduate students required to prepare a full-length play or two one-acts. Prereq. THTR 3071 or instructor consent. Same as THTR 4071.

THTR 5081-3. Advanced Playwriting. Practical study and experience in writing and/or adapting the full-length play. Prereq., THTR 4051.

The following courses are open to graduate students only.

THTR 6001-3. Theatre Dramaturgy. Provides study of roles and techniques of the dramaturg in the contemporary theatres of Europe and America, with specific applications to the Colorado Shakespeare Festival.

THTR 6011-3. On-Stage Studies: Classical and Neoclassical Drama. Studies classical and neoclassical drama in performance, with particular attention to twentieth-century productions and the critical and scholarly responses to these productions.

THTR 6021-3. On-Stage Studies: Elizabethan and Jacobean Drama. Studies Elizabethan and Jacobean drama in performance, with particular attention to nineteenth- and twentieth-century productions, and the critical and scholarly responses to these productions. Examines landmark productions of selected plays by Shakespeare and his contemporaries.

THTR 6031-3. On-Stage Studies: American Theatre and Drama. Studies American drama in performance, with particular attention to critical and scholarly responses to landmark productions of American "classics."

THTR 6041-3. On-Stage Studies: Modern European Drama. Studies modern European drama in performance, with particular attention to critical and scholarly responses to landmark productions of modern "classics."

THTR 6051 (1-3). Production Research and Practicum: Directing. Allows students to undertake a production project, normally within the major theatre season, that requires detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision and prepare a documented written report and evaluation of the research, rehearsal, and performance process. Prereq., advanced course work in directing, and approval by the student's committee.

THTR 6061-3. On-Stage Studies: Contemporary British and American Drama. Studies contemporary British and American drama since 1950, with particular attention to nontraditional plays and production styles that distinguish contemporary theatre from earlier forms of modernism.

Performance

THTR 1003-3. Introduction to Acting for Nonmajors. Teaches the basic principles of acting to nontheatre majors, focusing on relaxation, concentration, improvisation, use of imagination, actions, objectives, initial monologue and scene work, and basic terms and concepts of process work for the actor. In addition to required texts, there is a required reading list of plays.

THTR 2003-3. Acting: Beginning. Emphasizes principles of acting, focusing on exercises in relaxation, talking and listening, use of images, actions and objectives, character development, and process work. In addition to required texts, there is a required reading list of plays.
THTR 203-3. Performance of Literature. Students learn to perceive literary form and content and to translate that perception into classroom performances of selected modern plays and stories. Performances, both solo and ensemble, embody literary texts diverse in terms of gender and ethnicity.

THTR 203-3. Acting: Intermediate. Continuation of the techniques introduced in the beginning acting course (THTR 203). Emphasizes monologues and scene study of contemporary plays. Explores basic techniques in developing a character. In addition to required texts, there is a required reading list. Prereqs., THTR 2003 and 2013.

THTR 2043-3. Vocal and Physical Preparation. Natural resources of the human voice and body are studied as artistic resources for the performing artist. Designed to examine both the process and products of vocal and physical craft work. Prereq., THTR 2003.

THTR 3003-3. Acting: Advanced. Acting principles and techniques learned in prerequisite courses are adapted and applied to a range of selected scenes of both contemporary and period plays. Emphasizes developing the necessary craft elements to fulfill textual demands. Prereqs., THTR 2003, 2013, and 2023.

THTR 4013. Shakespeare: In-depth study of Shakespearean texts from the perspective of their demands on the actor, including the conventions and performance styles of Elizabethan theatre. Prereq., THTR 3013 and 4003 or instructor consent.

THTR 4023-4. Studio 4: Ibsen, Shaw, and Chekhov. Studies selected plays of these three major figures in the development of theatre. Provides practice in the acting styles they require. Prereqs., THTR 3013, 4003, 4013, or instructor consent.

THTR 4033-3. Advanced Vocal and Physical Preparation. Continues the work begun in THTR 2043. Studies advanced vocal and physical techniques with the goal of integrating these skills into the working process of the performing artist. Prereqs., THTR 2043 and theatre major, or instructor consent.

THTR 4063-3. Studio 5: Contemporary British and American Theatre. Studies selected authors and plays, as well as professional issues in contemporary British and American theatre, and the demands made on the actor. Prereqs., THTR 3013, 4003, 4013, or instructor consent.

THTR 4053-4. Studio 6: Explorations in Period Style. Studies selected styles of theatre performance such as Comedy of Manners, including related vocal and physical period style elements. Prereqs., THTR 3013, 4003, 4013, 4043, or instructor consent.

THTR 6003 (1-3). Production Research and Practicum: Acting. Allows students to undertake an acting project, normally within the major theatre season, that requires detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision and prepare a documented written report and evaluation of the research, rehearsal, and performance process. For graduate students only. Prereqs. advanced studies in acting and approval by the student’s committee.

Design and Technical Theatre

THTR 2005-3. Introduction to Technical Production 1. Introduces technical production elements and procedures, including materials, organization, methods, and equipment to realize theatrical scenery, properties, lighting, and sound designs. Coreq., THTR 2015, which provides practical application of lectures and work on assigned projects.

THTR 2015-1. Introduction to Technical Production 1: Lab. One three-hour lab per week providing practical, hands-on experience in production preparation of sets, props, and lights. Coreq., THTR 2005.

THTR 2025-3. Introduction to Technical Production 2. Introduces costume construction for the stage and the basics of stage makeup.

THTR 2035-3. Design Fundamentals. Introduces principles and techniques relevant to the expression of dramatic mood and ideas through visual elements of the theatre, giving practice in concept development, style selection, and rendering techniques in scenery and costume design.

THTR 2065-3. Computers in the Performing Arts. Introduces software and program uses of computers in spreadsheet, database, CAD, and word processing through projects in theatre management, budgeting, and design. All coursework is taught on both IBM and Mac platforms. Prereqs., typing skills and basic familiarity with computers.

THTR 2085-3. History of Fashion 1. Detailed study of the history of fashion from Egyptian and Asian civilizations to the European Renaissance, including fabrics, accessories of dress, and ornaments; influence of cultural factors; study of available collections.

THTR 2095-3. History of Fashion 2. Continuation of THTR 2085. Detailed study of the history of fashion from the Renaissance to contemporary times, including fabrics, accessories of dress, and ornaments.

THTR 3005-3. Costume Design 1. Study and application of the principles of design as applied to stage costume with special emphasis on two-dimensional presentation of ideas. Prereq., THTR 2025.

THTR 3035-2. Theatre Practicum. Practical production projects within a designated area of technical theatre, design, stage management, and production running crews, normally related to the department's major season. May be repeated to a maximum of 8 credits. Prereqs., THTR 2005, 2015, and 2025.

THTR 3045-3. Stage Management. Covers stage management from the inception of a production concept through the process of mounting a production, focusing on the interrelationship of the various artistic, technical, administrative, and scheduling of time, and the psychology of handling a wide range of personalities. Prereqs., THTR 2005, 2015, and 2025.

THTR 3055-3. Stage Lighting Design 1. Provides study and practice in lighting design, emphasizing principles of electricity, optics, color theory, instrumentation, and their aesthetic application to the stage.

THTR 3065-3. Theatre Management. Introduces theory and practice of management aspects of the performing arts, with primary emphasis on theatre and dance. Includes study of marketing and promotional aspects of the arts, along with house and stage management procedures. Practical experience included. Prereqs., THTR 2005 and 2015.

THTR 4005-3. Costume Design 2. Students explore and practice the application of design techniques and theories studied in THTR 3005, as they are related to the total production scheme of various styles of drama. Prereq., THTR 3005.

THTR 4025-3. Costume Construction. Includes techniques such as patternmaking, period garments, understructure, dancewear, millinery, masks, and/or footwear. Interrelated with Costume Design and Fashion History, the work is planned in relation to the major season.

THTR 4055-3. Stage Lighting Design 2. Assumes a basic knowledge of stage lighting; concentrates on advanced technology, processes, and projects. Prereq., THTR 3055.

THTR 4065 (1-3). Advanced Design Projects. Practical course in the application of design theory in which students undertake design of major costume, lighting, or scenic elements in a major season production. Course concept and process must be explained and defended. Repeatable to a maximum of 6 credits. Prereq., instructor consent.

THTR 4075 (1-3). Advanced Technical Projects. Students assume responsibility, under faculty supervision, for planning and executing specific technical responses to a design concept in the department’s major season productions. Course may be repeated to a maximum of 6 credits. Prereq., instructor consent.

THTR 6005 (1-3). Production Research and Practicum: Designing. Allows students to undertake a design project, normally within the major theatre season, that requires detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision, and prepare a written and presentation report and evaluation of the research, design, and realization process—as well as fully rendered designs and/or plots. Projects may be in costumes, lights, or scenery. For graduate students only. Pre-req., advanced studies in design and approval of student’s committee.

Shakespearean Production

THTR 2037 (1-2). Basic Problems in Producing Shakespeare. Provides exploration, through practical experience and research, of the nature and solution of a specific problem in the production of a Shakespeare play.

THTR 3037 (2-3). Shakespeare Practicum. Students are assigned to work with production artists of the Colorado Shakespeare Festival. While there are many possible areas, production design for each season determines the number of available positions. May substitute for one semester of THTR 3035. Pre-req., THTR 2005, 2015, 2025, and instructor consent.

THTR 4073 (1-2). Advanced Problems in Producing Shakespeare. Provides exploration, through practical experience and research, of the nature and solution of a complex problem in the production of a Shakespeare play. Same as THTR 5037.

THTR 4047 (1-5). Shakespeare in Production. Detailed study of script analysis, directing concepts, staging and criticism of three plays being produced by the Colorado Shakespeare Festival. Same as THTR 5047.

THTR 5037 (1-2). Advanced Problems in Producing Shakespeare. Same as THTR 4073.

THTR 5047 (1-3). Shakespeare in Production. Same as THTR 4047.

Special Courses in Theatre

THTR 1009-3. Introduction to Theatre. Introduces the varieties of theatrical art, past and present, contributions of the various theatrical artists to the total production, and the place of theatre art in today's society. Readings, lectures, and demonstrations. Designed for nonmajors. Approved for arts and sciences core curriculum: literature and the arts.

THTR 2849 (1-3). Independent Study.

THTR 3849 (1-3). Independent Study.

THTR 4019 (3-12). Touring Theatre. Participation in Colorado Caravan Touring Theatre Program.

THTR 4029 (3-12). Touring Theatre Dance. Participation in Colorado Caravan Touring Theatre Dance Program.

THTR 4039-3. Musical Theatre Repertory. Developed around the learning of complete scenes, songs and dances that are representative of the periods and styles within musical comedy from the 1920’s to the present. Emphasizes in-class performance. Admission by audition. Same as THTR 5039.

THTR 4049 (1-4). Problems in Theatre. Opportunity for students to explore, upon consultation with the instructor, areas in theatre that the normal sequence of offerings may not allow. Same as THTR 5049.

THTR 4059-3. Open Topics in Theatre and Drama. Covers topics not otherwise listed in the curriculum. Topics for each semester are specified in the Registration Handbook and Schedule of Courses.

THTR 4069-4. British Theatre Studies. Requires attendance and evaluation of theatre, dance, and opera during the current theatre season in London and Stratford. Guest lectures, backstage theatre tours, and museum and historic site visits provide students with the basis for comparing British and American theatre techniques. Course may be taken abroad only.

THTR 4849 (1-3). Independent Study.

THTR 5049 (1-4). Problems in Theatre, Same as THTR 4049.

THTR 5849 (1-3). Independent Study.

THTR 6009-3. Research Strategies and Techniques. Examines research methodologies appropriate to the performing arts, particularly theatre and dance. Pilot studies aimed at familiarizing graduate students with the library and other resources, and the development of thesis and dissertation prospectuses. Same as THTR 6009.

THTR 6019-3. Professional Orientation. Prepares doctoral students in theatre to meet successfully the responsibilities of a college faculty member. Topics include examination and evaluation of texts, teaching methodologies, professional organizations and publications, program funding, season planning, and a comparison of professional and academic theatre rules and policies.

THTR 6849 (1-3). Independent Study.

THTR 6949 (1-4). Master's Candidate.

THTR 8999-10. Doctoral Dissertation. All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of this catalog.

Dance

Nonmajor Technique

DNCE 1000-2. Beginning Modern Dance. Introduces basic concepts and skills of modern dance. In-class technique work develops muscle strength, flexibility, coordination, rhythm, and dynamic and spatial awareness. Lecture/discussion focuses on various aspects of modern dance including history, composition, and criticism. Limited amount of written work is required.

DNCE 1020-1. Beginning Modern Dance with Experience. Further develops the concepts and skills introduced in DNCE 1000. Pre-req., DNCE 1000 or equivalent dance experience.

DNCE 1100, 1110-1. Beginning Ballet. Ballet for beginners; no previous experience required. Stretches, basic barre, simple terre à terre, and jumping steps are learned, as well as alignment and basic extended positions such as arabesque and attitude. Mastery of simple enchainments and rhythmic patterns. Repeatability for up to 2 credit hours.

DNCE 1120, 1130-1. Beginning Ballet with Experience. An extension of beginning ballet, when basic concepts of ballet have been mastered. Enchainments are of greater complexity and variety. Dance vocabulary is more extensive. Plié and more complex musical phrases are expected. Pre-req., DNCE 1100 or 1110. Repeatability for up to 2 credit hours.

DNCE 1160-1. Recreational Dance Forms. Survey course which includes dance fundamentals, country western dance, international folk dance, square dance, and ballroom dance. Novice dances as well as some current dances of the day are included.

DNCE 1200, 1210-1. Beginning Jazz Dance. Introduces various styles of movement unique to jazz dance. Students learn fundamental technical dance skills as well as specific jazz vocabulary. Designed for students with little or no dance experience. Repeatability for up to 2 credit hours.

DNCE 1250, 1230-1. Beginning Jazz with Experience. Further develops work begun in Beginning Jazz. Exercises and jazz dance phrases are more complex. Pre-req., DNCE 1200 or 1210. Repeatability for up to 2 credit hours.

DNCE 2040, 2050-1. Intermediate Modern Dance. See DNCE 1020. More in-depth study of modern dance concepts. Class technique work more advanced. Pre-req., DNCE 1020 or previous experience. Repeatability for up to 2 credit hours.

DNCE 2140, 2150-1. Low Intermediate Ballet. All basic ballet steps should have been mastered, including pique à terre en dehors et en dedans, knowledge of the principles and placement, and the ability to master simple enchainments. Pre-req., DNCE 1120 or 1130 or previous experience. Repeatability for up to 2 credit hours.

DNCE 2240, 2250-1. Intermediate Jazz. Designed for the experienced jazz dancer. Includes dance techniques that further improve alignment, strength, flexibility, and coordination within the jazz idiom. Greater emphasis on style and rhythm and challenging dance combinations. Audition required. Repeatability for up to 2 credit hours.
DNCE 2400-2. Theatre Dance Forms. Each class begins with a dance warm-up designed to increase strength, flexibility, and coordination. This is followed by dance sequences based on social dance forms of the twentieth century and discussion of their use in musical theatre choreography.

DNCE 2500-2. African-American Dance 1. Explores various Caribbean and African dance forms, both traditional and choreographed works. Studies other cultural arts including some rituals, musical accompaniment, singing and chanting, and descriptive background data of a particular dance to accompany and enhance the dance as a total cultural experience. Same as BLST 2400.

DNCE 3160, 3170-1. Intermediate Ballet. Covers the general vocabulary of classical ballet technique and enchaînements of medium complexity. Multiple pirouettes in all positions are required. Repeatable for up to 2 credit hours.

DNCE 4170, 4180-1. Advanced Ballet. Advanced professional-level classical ballet, covering the complete vocabulary. Enchaînements are of complex structure. Tour de force work required. Repeatable for up to 2 credit hours.

**Major Technique**

The following undergraduate dance courses are open to dance majors. Other students are admitted by audition.

The following graduate-level courses are open only to graduate dance majors.

DNCE 5101-2. Ballet for Graduate Students.

DNCE 5111-2. Ballet for Graduate Students.

**Production**

DNCE 2012-1. Dance Production 1. Provides practical experience in producing formal and semi-formal concerts. Introduces and provides basic familiarity with production and promotional responsibilities, theatrical equipment and systems, and backstage and front-of-house duties and procedures.

DNCE 2022-1. Dance Production 2. Establishes awareness of supporting technical theatre arts available to the choreographer; provides practical hands-on introduction to systems and equipment; and provides vocabulary with which the choreographer communicates with lighting designer and technicians.

DNCE 5052 (1-3). Studio Concert.

**Composition**

DNCE 2013-2. Dance Improvisation. Explores the aesthetic elements of movement through improvisational structure. Guided dance experiences are designed to allow for individual response and group interaction while providing opportunity for spontaneous self expression.

DNCE 2033-3. Beginning Composition. Introduces the basic elements of dance composition through compositional studies evolved from readings, discussion, and improvisation.

DNCE 3043-3. Intermediate Dance Composition. Opportunity for students to increase knowledge and understanding of dance composition elements as they relate to group forms, theme, development, and phrase manipulation. Prereq., DNCE 1011 and 2033.

DNCE 4053-3. Advanced Dance Composition. In-depth approach to composition emphasizing personal invention, solo and group forms; styles based on historical art forms: exploration of the evaluative process. Prereq., DNCE 3041 and 3043. Same as DNCE 5053.

DNCE 5053-3. Advanced Dance Composition. Same as DNCE 4053 with the addition of graduate papers and/or a project.

DNCE 6073-3. Choreography. Advanced composition choreographed and presented for public performance and criticism. May be repeated for up to 6 credit hours with different instructors.

**Music**

DNCE 2014-2. Rhythmic Analysis and Accompaniment. Emphasizes elements of rhythm in relation to dance. Experiences with rhythmic drills, rhythmic notation, and percussion accompaniment for the modern dance class comprise the body of the course.

DNCE 3024-2. Musical Resources for Dance. Surveys basic musical notation and terminology, elements and forms of music, and historical styles supported by guided listening to representative works within western musical tradition. Special emphasis on twentieth-century techniques and on the relationship of various music to dance. Coreq., DNCE 2014 or instructor consent.

DNCE 5064-3. Graduate Music Seminar. Investigates selected aspects of rhythm, accompaniment, and musical resources for dance and applications to performance, choreography, and teaching. Topics may include movement analysis and rhythmic clarity, self-accompaniment, working with pianist/composers, relationship of music to dance, and survey of twentieth-century compositional techniques. Prereq., DNCE 2014, 3024, or equivalent dance/music experience, or instructor consent.

**Movement Analysis**

DNCE 1005-3. Movement Awareness and Injury Prevention for the Performing Artist. Helps performing artists, concerned with movement in their creative endeavors, understand the prevention and care of common injuries associated with their art. Through various body therapy techniques, anatomy, and kinesiology, students learn to reduce tension, improve body usage, and enhance their performance.

DNCE 3015-3. Movement Analysis. Basic elements of Laban movement analysis are introduced as framework for perceiving and understanding movement. Major body therapies and their implication for dance training are explored.

**Education**

DNCE 4016-3. Creative Dance for Children. Methods course for prospective teachers of creative dance for children. Lectures, readings, and laboratory experiences are followed by observation and teaching in primary grades. Same as DNCE 5016.

DNCE 4036-3. Methods of Teaching Dance. Practical experience in teaching modern dance to the young adult follows theoretical grounding in specific teaching methods. Examines values and goals of dance in education and fundamental
movement principles as related to the teaching of technique and improvisation. Precepts, DNCE 2013, 2014, 2033, and 3015. Same as DNCE 5036.

DNCE 5016-3. Creative Dance for Children. Same as DNCE 4016 with addition of readings and a paper.

DNCE 5036-3. Methods of Teaching Dance. Same as DNCE 4036 with addition of readings and a paper.

DNCE 6016-2. Teaching Lab: Modern Dance. Provides opportunity to apply principles and skills introduced in DNCE 5015. Participating students share the responsibility for teaching a lab class that meets twice a week. Focuses on analysis and evaluation of teaching skills.

DNCE 6056-2. Problems in Dance Administration and Curriculum. Examines current problems in administration of dance programs at the college level in relation to curriculum development and trends in curriculum construction.

History

DNCE 4017-3. History and Philosophy of Dance. Studies dance as a social, economic, and artistic force from primitive times to the early 1900’s, emphasizing the development of dance as a theatre art in western civilization. Approved for arts and sciences core curriculum: literature and the arts.

DNCE 4027-3. Dance in the Twentieth Century. Covers the development of modern dance and ballet from 1900 to the present through lectures, discussions, critical reviews, and films. Same as DNCE 5027.

DNCE 5017-3. History and Philosophy of Dance. Same as DNCE 4017 with addition of graduate papers and/or a project.

DNCE 5027-3. Dance in the Twentieth Century. Same as DNCE 4027 with addition of graduate papers and/or a project.

Performance

DNCE 4018-2. Performance Improvisation Techniques. Interdisciplinary approach to dance, theatre, and music performance. Improvisational techniques utilized to enhance creative skills. Objective is to help the individual discover and make accessible the diversity of the human instrument and develop practical tools to broaden expressive range. Same as DNCE 5018.

DNCE 4038-3. Dance Repertory. Learning and performing dances from the repertory of current faculty members, artists-in-residence, and upon occasion from the repertory of historic modern dancers. Same as DNCE 5038. Dance majors may repeat for up to 6 credit hours with different instructors.

DNCE 4068-2. Composition/Repertory. Students explore the improvisational and choreographic style of the artist-in-residence; repertory may also be taught. Same as DNCE 5068.

DNCE 5018-2. Performance Improvisation Techniques. Same as DNCE 4018 with the addition of exams and a performance piece.

DNCE 5038-3. Dance Repertory. Same as DNCE 4038 except graduate students are required to keep a log of the learning process involved in repertory to document and analyze each work in terms of stylistic differences, musical/sound accompaniment, and trends. Dance majors may repeat for up to 6 credit hours with different instructors.

DNCE 5048-3. Touring Dance Theatre. Provides students with practical performing and teaching experience. Students design a lecture/demonstration to be performed at primary and secondary schools throughout the state. In addition, Touring Dance Theatre members teach creative movement classes at the schools. Undergraduate students: see THTR 4029.

DNCE 5068-3. Composition/Repertory. Same as DNCE 4068 with an additional performance project approved by the artist-in-residence and the academic director of the summer dance program.

Philosophy and Independent Study

DNCE 1029-3. Dance as a Universal Language. Introduces students to dance as a universal, cross-cultural art form and relevant contemporary form through an investigation of the development of dance. Explores interpretation and criticism, an historical survey, and the concepts of dance in American society as well as the creative process through an analysis of the basic elements of dance.

DNCE 2849 (1-3). Independent Study. Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.

DNCE 3849 (1-3). Independent Study. Same as DNCE 2849, junior level.

DNCE 4849 (1-3). Independent Study. Same as DNCE 2849, senior level.

DNCE 4909-2. Problems in Dance. Explores current topics and research in relation to teaching methods, performance, and criticism. The normal sequence of offerings may not allow. Same as DNCE 5909.

DNCE 4919 (1-3). Dance Practicum. Project in dance under supervision of senior faculty. Same as DNCE 5919.

DNCE 5849 (1-3). Independent Study. Same as DNCE 2849, graduate level.

DNCE 5909-2. Problems in Dance. Same as DNCE 4909.

DNCE 5919 (1-3). Dance Practicum. Same as DNCE 4919.

DNCE 6019-3. Readings in Dance. Surveys dance literature including an opportunity for graduate students to familiarize themselves with resources, current publications, theoretical materials, and professional organizations in dance.

DNCE 6049-3. Seminar: Dance. Intensive study of selected topics related to the art of dance, dance criticism, research in dance, and dance in relationship to the other arts (performing and visual), emphasizing the avant-garde. Same as DNCE 6949 (1-4). Candidate for Degree.

DNCE 6959 (1-4). Master’s Thesis.

DNCE 6969 (3-6). The Graduate Project. Provides the opportunity for synthesizing the graduate experience through the execution of a project related to the student’s major area of interest. Project must be approved by the graduate faculty advisor.

University Writing Program

UWRP 1050-3. Introductory Composition: Directed Writing. For students who require the rudiments of college composition. Students are taught how to plan a paper, prepare a rough draft, and revise it for both clarity and accuracy. All sections are conducted as workshops; that is, student papers are discussed at every class meeting.

UWRP 1150-3. Introductory Composition: Expository Writing. For students who have already mastered the basic conventions of written English, but still require instruction in expository and analytical writing. Emphasizes organization and clarity. All sections are conducted as workshops; that is, student papers are discussed at every class meeting. Students write several short essays, revising each several times.

UWRP 1250-3. Introductory Composition: Argumentative Writing. For students who require instruction in stating an argumentative thesis and defending it. All sections conducted as workshops; that is, student papers are discussed at every class meeting. Students are required to revise their papers frequently throughout the term. (Students who wish to take UWRP 1250 must register for UWRP 1150; they will be placed in UWRP 1250 if they write at an advanced level on a diagnostic examination administered during the first class session.)

UWRP 1840 (1-3). Independent Study.

UWRP 2050-3. Intermediate Composition: Prose Strategies. Addresses matters of style, tone, and audience in both expository and argumentative writing. All sections conducted as writing workshops; that is, student papers are discussed at every class meeting. Prereq.: instructor consent.

UWRP 3020-3. Topics in Writing. Each instructor assigns two or three nonfiction essays on a given topic. Students choose an essay, abstract its argument, analyze it, and agree or disagree with the author. They thus learn the principal modes of academic rhetoric: description, analysis, and argument. Approved for arts and sciences core curriculum: written communication.

UWRP 3030-3. Advanced Composition: Writing on Science and Society. Through selected readings and daily writing assignments, students examine ethical and social issues that arise in science and technology. Focusing on critical thinking, analytic and argumentative writing, and oral presentation, the course emphasizes effective communication with non-technical audiences. Classes are conducted as workshops.

UWRP 3050-3. Advanced Composition: Argument. First in a sequence of four intensive writing workshops for accomplished student writers, irrespective of major. Addresses the many arts of persuasion, which includes reason not only to reason, but also to emotion. Students are taught how to coordinate parts of a complicated proof, how to qualify a problematic thesis, and how to
discover and challenge fallacies in the arguments of others. Prereq., instructor consent.

UWRP 3150-3. Advanced Composition: Style. Second of four intensive writing workshops, this course introduces students to major prose stylists in the English language, both classic and contemporary. While exploring characteristics, uses, and limitations of different stylistic devices, students set about fashioning and refining a style of their own. Prereq., instructor consent.

UWRP 3840 (1-3). Independent Study.

UWRP 4050-3. Advanced Composition: Form. Third of four intensive writing workshops, this course addresses the issue of form—for example, in interviews, in biographies, in autobiographies, or in narratives. By writing essays patterned on different organizational principles displayed in these texts, students can explore strengths and weaknesses inherent in particular structural devices. Prereq., instructor consent.

UWRP 4150-3. Advanced Composition: The Portfolio. In this, the last of four intensive writing workshops, students prepare portfolios of essays that reflect a full range of their talents and skills. Prereq., instructor consent.

UWRP 5050-3. Graduate Composition: Writing About Writing. These topic-oriented graduate courses are for students engaged in writing theses, articles, or applications for grant support. Students are taught how to temper the jargon of academic prose, so that their writing is clear without being elementary, and concise without being elliptical. The courses do not apply to the minimum number of hours required for graduate degrees on the Boulder campus. Prereq., instructor consent.

Women Studies

WMST 2000-3. Introduction to Women Studies. Examines women’s roles from interdisciplinary and cross-cultural perspective with goal of evaluating theoretical explanations for the differential access to power among men and women. Topics include psychology, socialization, family, work and the economy, history and social change. Approved for arts and sciences core curriculum: cultural and gender diversity.

WMST 2010-3. Contemporary Issues. Examines current social, political, and economic issues related to women. Includes consideration of women of all social classes and ethnic backgrounds, primarily in the United States. Possible topics include violence against women, women in the labor force, reproductive freedom, women in poverty, sexuality, and the women’s movement. Prereq., WMST 2000 or 2050.

WMST 2050-3. Women and Society. Examines theories that explain the social construction of gender and the subordination of women in a multicultural context. Topics include black women and feminism, language constructs, reality, motherhood—U.S., Japan, and Italy, purdah in India, female “circumcision,” and women in developing countries. Approved for arts and sciences core curriculum: cultural and gender diversity.

WMST 2300-3, 2310-3. Topics in Women Studies. Examines, at an introductory level, selected topics in women studies. Content varies by semester and reflects relevant contemporary issues in women studies scholarship, e.g., women and crime, women in film, and women and technology.

WMST 2500-3. History of the Feminist Movement in the U.S. Provides a historical overview of the U.S. feminist movement. Covers the nineteenth century endeavors for women’s rights, the woman suffrage and progressive reform efforts during the early twentieth century, the resurgence of feminist thought and activism during the 1960s, and continuing feminist efforts. Approved for arts and sciences core curriculum: United States cultural and gender diversity.

WMST 3000-3. Women in Organizations. Examines a variety of topics of special interest to women in the context of organizations; power, institutional racism and sexism, organizational structure, leadership, conflict and change. Examines topics from both traditional and feminist perspectives for the purposes of comparison and in-depth analysis. Prereq., WMST 2000 or 2010 or PSYC 1001 or SOCY 1001.

WMST 3090-3. Critical Thinking in Feminist Theory. Through close reading, class discussion, and writing papers, students analyze the key concepts, ideas, arguments, and assumptions that inform major texts in feminist theory. Emphasizes developing reading and writing skills to interpret theoretical arguments. Prereq., WMST 2000 or 2010. Approved for arts and sciences core curriculum: critical thinking.

WMST 3110-3. Feminist Practical Ethics. Examines a variety of public and personal policy issues of interest to women. Reviews the philosophical structure of feminist ethics. Prereq., WMST 2000 or 2050 and junior or senior standing. Approved for arts and sciences core curriculum: cultural and gender diversity.

WMST 3200-3. Religion and Feminist Thought. Examines the origin of patriarchal culture in the theology and practices of Judaism and Christianity. Through reading and discussion, attitudes and beliefs concerning women are explored as Judaico-Christian culture impacts gender roles and gender stratification. Women’s religious experience is studied from the perspective of feminist interpretations of religious experience. Prereq., WMST 2000 or WMST/RJST 2800.

WMST 3300-2. Women and the Law. Examines the role of women in the legal system by looking at women as jurors, witnesses, law students, lawyers, law professors, and judges. Topics include the law as it is enacted in impact women in particular: divorce and sexual assault. Prereq., WMST 2000 and/or 2010.

WMST 3550-3. Male/Female Relationships. Explores the influence of 20 years of feminism on the nature of male/female relations. Topics addressed include the interrelationship between social structures and individual psychology, problems in male/female relationships and changing roles and changing arrangements. Cross-disciplinary course that draws from sociology, psychology, and communication. Prereq., one course in sociology, psychology, or women studies.

WMST 3700-3, 3710-3. Topics in Women Studies. Examines selected topics in women studies. Content varies by semester and reflects relevant contemporary issues in women studies scholarship, e.g., women working; women and health; mothers and daughters in literature; and women, war, and peace in literature. Prereq., WMST 2000 or 2010. May be repeated for up to 6 credit hours for different topics.

WMST 3730-3. Women in International Development. Examines women’s contributions to household and national economies. Includes women in the home and the work force, women in agricultural production, women’s health as a development concept, migration and urbanization, women and education, political and historical aspects of development, and the status of women, development policy, and planning. While the course examines women in general, it focuses primarily on African women. Prereq., WMST 2000 and 2010.

WMST 3930 (1-6). Women Studies Internship. Selected students are matched with supervised internships in local businesses and human service and government agencies. Internships focus on women’s issues (e.g., affirmative action, services to abused women). Students meet a minimum of twice monthly with the instructor, keep a journal, and submit a final paper.

WMST 4000-3. Senior Seminar: Special Topics. Advanced interdisciplinary course organized around specific topic, problem, or issue relating to women in culture and society (such as feminist theology, women and the law, and the social psychology of women). Course work includes discussion, reading, and written projects. Prereq., WMST 2000 and 2010. May be repeated for up to 6 credit hours for different topics.

WMST 4020-3. Senior Research Seminar. Students work in groups on research projects related to women (such as oral histories of women in management). Projects designed to introduce students to basic research techniques, to develop research skills, and to contribute to knowledge of contemporary and historical women. Prereq., WMST 2000 and 2010.

WMST 4090-3. Feminist Theory. Examines major theoretical writings on feminist theory, including both historical and contemporary works. Discusses major divisions within contemporary feminist thought. Topics include philosophical notions of equality, development of feminist thought, and social-historical analysis of feminism as a social movement. Prereq., WMST 2000 and 2010.

WMST 4800-3. Capstone Seminar. Encourages students to sum up, evaluate, and develop a project based on their experiences as women studies majors or certificate students. Students collect materials from their previous women studies courses and write a narrative that describes the process of their learning and evaluates that process. They complete a project that extends their previous work, and then present their projects to
other members of the class. Prereq., standing as women studies majors or certificate students.

WMST 4840 (1-6). Independent Study.

Cross-Listed Courses

WMST 1006-3. The Social Construction of Sexuality. Same as SOCY 1006.

WMST 1260-3. Introduction to Women's Literature. Same as ENGL 1260.

WMST 2016-3. Sex and Gender in Futurist Literature. Same as SOCY 2016.

WMST 2080-3. Anthropology of Gender. Same as ANTH 2080.

WMST 2260-3. Images of Women in Literature. Same as ENGL 2260.

WMST 2290-3. Philosophy and Women. Same as PHIL 2290.

WMST 2700-3. The Psychology of Contemporary American Women. Same as PSYC 2700.

WMST 2800-3. Women and Religion. Same as RELST 2800.

WMST 3262-3. Women Writers. Same as ENGL 3262.

WMST 3656-3. Research Seminar on Women and Peace. Students learn research methods by using the Women's International League for Peace and Freedom (WILPF) papers or related microfilm collections and then write an original research paper. Students then explore women's involvement in international peace endeavors during the course of the twentieth century, focusing upon the history of the WILPF. Prereq., WMST 2000 or 2010; HIST 1015 or 1025. Same as HIST 3656.

WMST 4012-3. Population Control and Family Planning. Same as SOCY 4012.

WMST 4016-2. Sex, Gender, and Society 2. Same as SOCY 4016.

WMST 4086-3. Family and Society. Same as SOCY 4086.

WMST 4272-3. Topics in Women's Literature. Same as ENGL 4272.

WMST 4616-3. History of Women in the United States to 1890. Same as HIST 4616.

WMST 4619-3. Women in Asian History. Same as HIST 4619.

WMST 4626-3. History of Women in the United States since 1890. Same as HIST 4626.

WMST 4700-3. Women and Mental Health. Same as PSYC 4700.

WMST 4710-3. The Black Female: A Feminist Analysis. Same as RELST 4710.

WMST 4809-3. Women Artists from the Middle Ages to the Present. Same as FINE 4809.

FACULTY

American Studies

ERIKA I. DOSS, Director; Assistant Professor of Fine Arts, B.A., Ripon College; M.A., Ph.D., University of Minnesota.

RUTH HELM, Instructor, B.A., M.A., Ph.D., University of Colorado.

Anthropology

MICHAEL BREED, Acting Chair; Professor of Environmental, Population, and Organismic Biology, B.A., Grinnell College; M.A., Ph.D., University of Kansas.

OLIVIA ARRUITA, Assistant Professor (joint with Center for Studies of Ethnicity and Race in America), B.A., M.A., Ph.D., University of Arizona.

BOULOS AYAD, Professor, B.A., M.A., Ph.D., Cairo University (Egypt); M.A., University of Einshafs (Egypt).

DOUGLAS B. BAMFORTH, Assistant Professor, B.A., University of Pennsylvania; M.A., Ph.D., University of California, Santa Barbara.

DAVID A. BRETERNITZ, Professor Emeritus.

ALICE M. BRUES, Professor Emerita.

HERBERT H. COVERT, Assistant Professor, B.A., University of Massachusetts; M.A., Arizona State University; Ph.D., Duke University.

DARNA L. DUFOUR, Associate Professor, B.S., Northeastern University; M.A., Ph.D., State University of New York at Binghamton.

FRANK W. EDY, Associate Professor, B.A., University of New Mexico; M.A., University of Arizona; Ph.D., University of Colorado.

MARGARET A. EISENHART, Associate Professor (joint with School of Education), B.A., Emory University; M.A., Ph.D., University of North Carolina.

DAVID LEE GREENE, Professor, B.A., M.A., Ph.D., University of Colorado.

ROBERT A. HACKENBERG, Professor, B.A., M.A., University of Minnesota; Ph.D., Cornell University.

WARREN M. HERN, Assistant Professor Adjunct, M.A., M.D., University of Colorado; Ph.D., University of North Carolina.

JAMES J. HESTER, Professor Emeritus.

GORDON W. HEWES, Professor Emeritus.

LANE R. HIRABAYASHI, Associate Professor (joint with Center for Studies of Ethnicity and Race in America), B.A., California State College, Sonoma; M.A., Ph.D., University of California, Berkeley.

DOROTHY V. KASCHUBE, Professor Emerita.

ALEC J. KELSO, Director of Honors Program, Professor, B.S., Northern Illinois University; M.A., Ph.D., University of Michigan.

GOTTFRIED O. LANG, Professor Emeritus.

J. TERENCE McCabe, Assistant Professor, B.A., University of Notre Dame; M.A., Ph.D., State University of New York at Binghamton.

DENNIS B. McGUIVAN, Associate Professor, B.A., Reed College; M.A., Ph.D., University of Chicago.

JAMES RUSSELL McCORD, Professor, B.B.A., M.B.A., Ph.D., University of Texas.

RICHARD Y. NISHIKAWA, Assistant Dean for Curricular Affairs, College of Arts and Sciences; Assistant Professor (Attendant Rank). A.B., University of California, Santa Cruz; Ph.D., University of Washington.

PAUL SHANKMAN, Associate Professor, B.A., University of California, Santa Barbara; Ph.D., Harvard University.

PAYSON D. SHEETS, Professor, B.A., M.A., University of Colorado; Ph.D., University of Pennsylvania.

DENNIS P. VAN GERVEN, Professor, B.A., University of Utah; M.A., Ph.D., University of Massachusetts.

DEWARD E. WALKER, JR., Professor (joint with Center for Studies of Ethnicity and Race in America), B.A., Ph.D., University of Oregon.

RICHARD WARNER, Associate Professor Adjunct, M.B., B.S., London University; M.A., University of Colorado; D.P.M., Royal College of Physicians, London.

JOE BEN WHEAT, Professor Emeritus.

Applied Mathematics

MARK J. ABLAWICZ, Program Director; Professor, B.S., University of Rochester; Ph.D., Massachusetts Institute of Technology.

JEROLD BEBERNES, Professor, B.S., M.A., Ph.D., University of Nebraska.

GREGORY BEYLIN, Professor, B.S., M.S., University of Leningrad; Ph.D., Courant Institute of Mathematical Sciences, N.Y.U.

MARY E. BREWER, Assistant Professor. Ph.D., California Institute of Technology.

JAMES H. CURRY, Associate Director; Professor, B.A., M.A., M.D., University of California, Berkeley.

ROBERT EASTON, Professor, B.S., M.S., Ph.D., University of Wisconsin.
CONGMING LI, Assistant Professor; B.S., University of Science and Technology of China; M.S., Institute of System Sciences; Ph.D., Courant Institute of Mathematical Science, N.Y.U.

MARTHA LIMBER, Research Associate; B.S., Bowdoin College; M.S., Ph.D., University of Colorado.

JOHN MAYBEE, Professor; B.S., University of Maryland; Ph.D., University of Minnesota.

JAMES D. MEISS, Associate Professor; B.S., University of Washington; M.A., Ph.D., University of California, Berkeley.

MONIKA NITSCHKE, Instructor; B.S., Colorado State University; M.S., Ph.D., University of Michigan.

HARVEY SEGUR, Professor; B.S., Michigan State University; M.S., Ph.D., University of California, Berkeley.

CONSTANCE SCHOFER, Instructor; B.S., M.S., New York University; Ph.D., University of Arizona.

JOHN WILLIAMSON, Professor; B.A., Macalester College; M.A., Ph.D., University of Minnesota.

Asian Studies

HOWARD C. GOLDBLATT, Director; Professor of Chinese; B.A., Long Beach State College; M.A., San Francisco State University; Ph.D., Indiana University.

Astrophysical, Planetary, and Atmospheric Sciences

JOHN R. CARY, Department Chair; Professor; B.A., University of California, Irvine; M.A., Ph.D., University of California, Berkeley.

R. GRANT ATHAY, Professor Adjunct; B.S., Utah State University; Ph.D., University of Utah.

THOMAS R. AYRES, Associate Research Professor; A.B., Harvard College; Ph.D., University of Colorado.

FRANCES BAGENAL, Assistant Professor; B.Sc., University of Lexington, England; Ph.D., Massachusetts Institute of Technology.

JOHN BALLY, Associate Professor; B.S., University of California, Berkeley; M.S., Ph.D., University of Massachusetts, Amherst.

CHARLES A. BARTH, Professor; B.S., Lehigh University; M.A., Ph.D., University of California, Los Angeles.

MITCHELL C. BEGLEMAN, Professor; A.B., A.M., Harvard University; Ph.D., Cambridge University.

ALBERT L. BETZ, Research Professor; Ph.D., University of California, Berkeley.

DONALD E. BILLINGS, Professor Emeritus.

WILLIAM BLUMEN, Professor; B.S., M.S., Florida State University; Ph.D., Massachusetts Institute of Technology.

PATRICIA BORNAMANN, Lecturer; Ph.D., University of Colorado.

JOHN C. BRANDT, Professor (Attendant Rank); A.B., Washington University; Ph.D., University of Chicago.

GUY BRASSEUR, Lecturer; Ph.D., Free University of Brussels.

ALEXANDER BROWN, Lecturer; B.Sc., Ph.D., University of St. Andrews (Scotland).

TIMOTHY M. BROWN, Lecturer; B.A., Wesleyan University; Ph.D., University of Colorado.

EDWARD W. BRUGEL, Associate Professor; B.S., State University of New York at Stony Brook; M.S., Ph.D., University of Washington.

WEBSTER C. CASH, Professor; S.B., Massachusetts Institute of Technology; Ph.D., University of California, Berkeley.

R. TODD CLANCY, Lecturer; B.S., University of North Carolina; M.S., Cornell University; Ph.D., California Institute of Technology.

PETER S. CONTI, Professor; B.S., Rensselaer Polytechnic Institute; Ph.D., University of California, Berkeley.

KENNETH DAVIES, Professor Adjunct; B.S., Ph.D., University of Wales.

BRIGITTA DOMIK, Lecturer; M.S., Ph.D., Technical University, Graz.

GEORGE A. DULK, Professor; B.S., United States Military Academy; M.S., Purdue University; Ph.D., University of Colorado.

LARRY W. ESPPOSITO, Associate Professor; S.B., Massachusetts Institute of Technology; Ph.D., University of California.

ROLANDO R. GARCIA, Lecturer; B.S., New York University; M.S., University of Miami.

CATHERINE D. GARMANY, Associate Research Professor; B.S., Indiana University; M.A., Ph.D., University of Virginia.

ROY H. GARSTANG, Professor; B.A., M.A., Ph.D., Sc.D., Cambridge University.

DALE F. GARY, Lecturer; Ph.D., University of Colorado.

KATHARINE B. GEBBIE, Professor Adjunct; B.A., Bryn Mawr College; B.Sc., Ph.D., University College, London.

JOHN C. GILLE, Lecturer; B.S., Yale College; B.A., M.A., Cambridge University; Ph.D., Massachusetts Institute of Technology.

PETER A. GILMAN, Professor Adjunct; B.A., Harvard College; M.S., Ph.D., Massachusetts Institute of Technology.

MARTIN GOLDMAN, Professor; A.B., Princeton University; M.S., Ph.D., Harvard University.

DAVID H. GRINSPOON, Assistant Professor; B.A., B.S., Brown University; Ph.D., University of Arizona.

ANDREW J. HAMILTON, Assistant Professor; B.A., St. Catherine's College, Oxford; M.Sc., Liverpool University and Queen Mary College, London University; Ph.D., University of Virginia.

CARL J. HANSEN, Professor; B.S., Queens College, New York; M.S., Ph.D., Yale University.

JOHN E. HART, Planetary/Atmospheric Science Division Head; Professor; B.A., Amherst College; Ph.D., Massachusetts Institute of Technology.

DAVID J. HOFMANN, Professor Adjunct; Ph.D., University of Minnesota.

THOMAS E. HOLZER, Professor Adjunct; B.A., Pomona College; Ph.D., University of California, San Diego.

WILLIAM H. HOOKE, Associate Professor Adjunct; B.A., Swarthmore College; S.M., Ph.D., University of Chicago.

CHARLES W. HORD, Professor (Attendant Rank); B.A., Ph.D., University of Colorado.

DAVID G. HUMMER, Professor Adjunct; B.S., M.S., Carnegie Institute of Technology; Ph.D., University College.

STEVEN P. JORDAN, Lecturer; B.S., University of Wisconsin; M.S., Ph.D., University of Chicago.

JEFFREY R. KEY, Lecturer; B.S., M.A., Northern Michigan University; Ph.D., University of Colorado.

JEFFREY T. KIEHL, Lecturer; B.S., Elizabethtown College; M.S., Indiana University; Ph.D., State University of New York at Albany.

ROBERT A. LANGE, Lecturer; Ph.D., University of Maryland.

GEORGE M. LAWRENCE, Lecturer; B.S., University of Utah; B.S., California Institute of Technology.

STEVEN W. LEE, Lecturer; Ph.D., Cornell University.

DONALD H. LENSCHOW, Lecturer; Ph.D., University of Wisconsin.

JEFFREY L. LINSKY, Professor Adjunct; B.S., Massachusetts Institute of Technology; M.A., Ph.D., Harvard University.

IRENE LITTLE-MARENN, Visiting Associate Professor; B.A., Vassar College; M.A., Ph.D., Indiana University.

SHAW C. LIU, Lecturer; B.S., Cheng Kung University (Taiwan); Ph.D., University of Pittsburgh.

JULIUS LONDON, Professor Emeritus.

KEITH B. MACGREGOR, Lecturer; B.A., Cornell University; Ph.D., Massachusetts Institute of Technology.

J. MCKIM MALVILLE, Professor; B.S., California Institute of Technology; Ph.D., University of Colorado.

WILLIAM E. McCLINTOCK, Lecturer; B.A., M.A., Ph.D., Johns Hopkins University.

RICHARD A. MCCRAY, Professor; B.S., Stanford University; M.A., Ph.D., University of California, Los Angeles.

JOHN A. McGINLEY, Lecturer; B.S., San Jose State University; M.S., Ph.D., University of Oklahoma.

CHERILYNN A. MORROW, Lecturer; Ph.D., University of Colorado.
PATRICK ZIMMERMANN, Lecturer. B.S., M.S., Washington State University.

ELLEN G. ZWEIBEL, Professor. A.B., University of Chicago; Ph.D., Princeton University.

Bibliography

LORI ARP, Program Director; Head, Central Reference; Assistant Professor. B.A., M.S.I.S., University of Illinois at Urbana.

Biology—Environmental, Population, and Organismic

CHARLES H. SOUTHWICK, Professor. B.A., College of Wooster; M.S., Ph.D., University of Wisconsin.

CAROL A. WESSMAN, Assistant Professor. B.S., Colorado State University; M.S., Ph.D., University of Wisconsin, Madison.
JOHN T. WINDELL, Professor. B.S., Indiana Central College; M.A., Ph.D., Indiana University.

PAUL W. WINSTON, Professor Emeritus.

Biology—Molecular, Cellular, and Developmental

MICHAEL J. YARUS, Department Chair; Professor. B.A., Johns Hopkins University; Ph.D., California Institute of Technology.

KAREN L. BEVER, Assistant Dean, College of Arts and Sciences, Assistant Professor (Attend-ant Rank). B.S., Ph.D., University of Southern California.

MARY A. BONNEVILLE, Professor. B.A., Smith College; M.A., Amherst College; Ph.D., Rockefeller Institute.

ROBERT E. BOSWELL, Assistant Professor. B.A., Marietta College; Ph.D., University of Colorado.

THOMAS R. CECH, Professor (joint appointment with Chemistry). B.A., Grinnell College; Ph.D., University of California, Berkeley.

KATHLEEN J. DANNA, Associate Professor. B.A., New Mexico Institute of Mining and Technology; Ph.D., Johns Hopkins University.

MARK W. DUBIN, Associate Vice Chancellor for Academic Affairs, Professor. B.A., Amherst College; Ph.D., Johns Hopkins University.

SUSAN K. DUTCHER, Associate Professor. B.A., Colorado College; Ph.D., University of Washington.

LAWRENCE GOLD, Professor. B.S., Yale University; Ph.D., University of Connecticut.

NANCY A. GUILD, Assistant Professor (Attend-ant Rank). B.A., Colorado College; Ph.D., Berkeley.

RICHARD G. HAM, Professor. B.S., California Institute of Technology; Ph.D., University of Texas.

MIN HAN, Assistant Professor. B.S., Peking University; Ph.D., UCLA.

JOSEPH S. HEILIG, Assistant Professor. B.A., University of California, Berkeley; Ph.D., Massachusetts Institute of Technology.

TAMIKO KANO-SUEOKA, Professor (Attend-ant Rank). B.A., Kyoto University; M.A., Radcliffe College; Ph.D., University of Illinois.

KARLA A. KIRKegaARD, Assistant Professor. B.S., University of California, Berkeley; Ph.D., Harvard University.

MICHAEL W. KLYMOWSKY, Associate Professor. B.S., Pennsylvania State University; Ph.D., California Institute of Technology.

PETER L. KUEMPEL, Professor. B.S., Massachusetts Institute of Technology; Ph.D., Princeton University.

EDWIN H. McConney, Professor. B.S., M.S., University of Florida; Ph.D., University of California, Berkeley.

J. RICHARD McINTOSH, Professor. A.B., Harvard College; Ph.D., Harvard University.

LORRAINE PILUS, Assistant Professor. A.B., Brown University; Ph.D., Massachusetts Institute of Technology.

KEITH R. PORTER, Distinguished Professor Emeritus.

ROBERT O. PoyTON, Professor. A.B., Brown University; Ph.D., University of California, Berkeley.

DAVID M. PRASCOTT, Distinguished Professor. B.A., Wesleyan University; Ph.D., University of California, Berkeley.

MEREDITH RUNNER, Professor Emeritus.

LAUREN M. SIMPAYRAC, Associate Professor (Attend-ant Rank). B.S., Ph.D., Massachusetts Institute of Technology.

L. ANDREW STABEHLIN, Professor. Dipl. Natw., Ph.D., Swiss Federal Institute of Technology.

GRETCHEL H. STEIN, Associate Professor (Attend-ant Rank). A.B., Brown University; Ph.D., Stanford University.

GARY D. STORMO, Assistant Professor. B.S., California Institute of Technology; M.A., Ph.D., University of Colorado.

NOBORO SUEOKA, Professor. B.S., M.S., Kyoto University; Ph.D., California Institute of Technology.

JONATHAN VAN BLERKOM, Professor (Attend-ant Rank). B.S., City College of New York; Ph.D., University of Colorado.

MARK WINEY, Assistant Professor. B.S., Syracuse University; Ph.D., University of Wisconsin, Madison.

WILLIAM B. WOOD, III, Professor. A.B., Harvard College; Ph.D., Stanford University.

Center for Studies of Ethnicity and Race in America (CSERA)

EVELYN HU-DeHART, Director; Professor of History. B.A., Stanford University; Ph.D., University of Texas at Austin.

OLIVIA ARRIETA, Assistant Professor of Chicano Studies and Anthropology. B.A., M.A., Ph.D., University of Arizona.

WARD CHURCHILL, Associate Professor of Communication. B.A., M.A., Sangamon State University.

VINE DELORIA, JR., Professor of History; Professor Adjunct of Law, Political Science, and Religious Studies. B.S., Iowa State University; Th.M., Lutheran School of Theology; J.D., University of Colorado School of Law.

JULYNNOD DODSON, Associate Professor of Afro-American Studies and Religious Studies. B.S., M.A., Ph.D., University of California, Berkeley.

ESTEVAN T. FLORES, Assistant Professor of Sociology; Research Coordinator. B.A., St. Mary's University; M.A., University of Notre Dame; Ph.D., University of Texas at Austin.

LANCE R. HIRABAYASHI, Associate Professor of Anthropology. B.A., California State College, Sonoma; M.A., Ph.D., University of California, Berkeley.

WILLIAM M. KING, Associate Professor of Afro-American Studies. B.A., Kent State University; M.A., University of Akron; Ph.D., Syracuse University.

MANNING MARABLE, Professor of Afro-American Studies, History, Political Science, and Sociology. A.B., Earlham College; M.A., University of Wisconsin-Madison; Ph.D., University of Maryland at College Park.

SALVADOR RODRIGUEZ del PINO, Associate Professor of Spanish. B.A., California State University, Long Beach; M.A., University of California, Irvine; Ph.D., University of California, Santa Barbara.

DEWARD WALKER, Professor of American Indian Studies and Anthropology. B.A., Ph.D., University of Oregon.

WILLIAM WEI, Associate Professor of History and Coordinator of Asian American Studies. B.A., Marquette University; M.A., Ph.D., University of Michigan.

Central and East European Studies

EDWARD J. ROZEK, Professor Emeritus.

Chemistry and Biochemistry

MARVIN H. CARUTHERS, Department Chair; Professor. B.S., Iowa State University; Ph.D., Northwestern University.

NATALIE AHN, Assistant Professor. B.S., University of Washington; Ph.D., University of California, Berkeley.

JOHN WILLIAM BIRKS, Professor. B.S., University of Arkansas; M.S., Ph.D., University of California, Berkeley.

THOMAS R. CECH, Distinguished Professor. B.A., Grinnell College; Ph.D., University of California, Berkeley.

SHELLEY D. COLEY, Assistant Professor. A.B., Radcliffe College; Ph.D., Harvard University.

STANLEY J. CRISTOL, Distinguished Professor Emeritus.

JOSEPH DE HEER, Professor Emeritus.

CHARLES H. DEPUY, Professor Emeritus.

MANCOURT DOWNING, Professor Emeritus.

MARY C. DUBOIS, Associate Professor. B.E., Creighton College; Ph.D., Ohio State University.

WILLIAM S. DYLAN, Associate Professor. S.B., Massachusetts Institute of Technology; Ph.D., University of Wisconsin.

G. BARNIE ELLISON, Professor. B.S., Trinity College; Ph.D., Yale University.

JOSEPH J. FALKE, Assistant Professor. B.A., Earlham College; Ph.D., California Institute of Technology.

R. RAY FALL, Professor. A.B., Ph.D., University of California, Los Angeles.

ELDON FERGUSON, Professor Adjunct. B.S., M.S., Ph.D., University of Oklahoma.

KENNETH A. GAGOS, Professor Emeritus.

STEVEN GEORGE, Associate Professor. B.S., Yale University; M.S., University of California, Berkeley.

MELVIN HANNA, Professor Emeritus.
JAMES T. HYNES, Professor. B.A., Catholic University of America; Ph.D., Princeton University.

EDWARD L. KING, Professor Emeritus.

TAD H. KOCH, Professor. B.S., Ohio State University; Ph.D., Iowa State University.

CARL ANTHONY KOVAL, Professor. B.S., Junius College; Ph.D., California Institute of Technology.

ROBERT KUCHTA, Assistant Professor. B.A., Cornell University; Ph.D., Brandeis University.

CLAIR E. KUNDROT, Assistant Professor. B.A., Northwestern University; M.Phil., Ph.D., Yale University.

JOHN R. LACHER, Professor Emeritus.

STEPHEN R. LEONE, Professor Adjunct. B.A., Northwestern University; Ph.D., University of California, Berkeley.

W. CARL LINEBERGER, Distinguished Professor. B.E.E., M.S.E.E., Ph.D., Georgia Institute of Technology.

JOHN SAWYER MEEK, Professor Emeritus.

PAUL MELANCON, Assistant Professor. B.Sc., McGill University; Ph.D., University of Wisconsin, Madison.

JOSEF MICHL, Professor. M.S., Charles University; Ph.D., Czechoslovak Academy of Sciences.

GARY ALAN MOLANDER, Professor. B.S., Iowa State University; Ph.D., Purdue University.

DAVID J. NESBITT, Professor Adjunct. B.A., Harvard College; Ph.D., University of Colorado.

ARLAN D. NORMAN, Professor. B.S., University of North Dakota; Ph.D., Indiana University.

ARTHUR PARDI, Associate Professor. A.B., University of California, San Diego; Ph.D., University of California, Berkeley.

ROBERT P. PARSON, Assistant Professor. Sc.B., Brown University; M.S., Ph.D., University of Michigan.

KEVIN S. PETERS, Professor. B.S., University of Oklahoma; Ph.D., Yale University.

CORTLANDT G. PIERPONT, Professor. B.S., Columbia University; Ph.D., Brown University.

AKHILESH BALIYASHKARA, Professor Adjunct. B.Sc., M.Sc., University of Mysore, India; Ph.D., University of Florida.

KATHRYN RESING, Research Assistant Professor. B.A., Washburn University; M.A., University of Kansas; Ph.D., University of Washington.

KATHY L. ROYLEN, Assistant Professor. B.S., Grand Valley State University; Ph.D., University of Colorado at Boulder.

TAREK SAMMAKIA, Assistant Professor. B.S., University of North Carolina; Ph.D., Yale University.

STEVEN SCHULTZ, Assistant Professor. B.A., Carleton College; Ph.D., California Institute of Technology.

HARRISON SHULL, Professor. A.B., Princeton University; Ph.D., University of California, Berkeley.

ROBERT E. SIEVERS, Director, Cooperative Institute for Research in Environmental Sciences, Professor. B.Chem., University of Tulsa; M.S., Ph.D., University of Illinois.

REX T. SKOJDE, Associate Professor. B.A., Harvard University; Ph.D., University of Minnesota.

STEWART J. STRICKLER, Professor. B.A., College of Wooster; Ph.D., Florida State University.

PIETER TANS, Professor Adjunct. Drs., Ph.D., Rijksuniversiteit Groningen, Netherlands.

BERT MILLS TOLBERT, Professor Emeritus.

MARGARET TOLBERT, Associate Professor. A.B., Grinnell College; M.S., University of California, Berkeley; Ph.D., California Institute of Technology.

OLIVE C. UHLENBECK, Professor. B.S., University of Michigan; Ph.D., Harvard University.

VERONICA VAIDA, Professor. B.S., Brown University; Ph.D., Yale University.

DAVID M. WALBA, Professor. B.S., University of California, Berkeley; Ph.D., California Institute of Technology.

HAROLD F. WALTON, Professor Emeritus.

IRWIN B. WILSON, Professor Emeritus.

GORDON YEE, Assistant Professor. B.S., University of California, Berkeley; Ph.D., Stanford University.

Classics

ECKART E. W. SCHÜTRUMPF, Department Chair; Professor. Ph.D., University of Marburg; Habilitation in Classics, University of Marburg.

HAROLD D. EVJEN, Professor. B.A., University of Arizona; M.A., Ph.D., University of Wisconsin; J.D., Yale University.

ERNST A. FREDRICKSMeyer, Professor. B.A., Lakeland College; M.A., Ph.D., University of Wisconsin.

JOHN C. GIBERT, Assistant Professor. B.A., Yale University; Ph.D., Harvard University.

RALPH J. HEXTON, Professor. A.B., Harvard College; M.A., Corpus Christi College, Oxford; M.Phil., Ph.D., Yale University.

JOHN N. HOUCH, Professor Emeritus.

JOY K. KING, Associate Professor Emerita.

PETER E. KNOX, Associate Professor. A.B., Harvard College; Ph.D., Harvard University.

CHRISTOPH F. KORNAD, Assistant Professor. B.A., Albert-Ludwigs-Universität; M.A., University of Oregon; Ph.D., University of North Carolina.

E. CHRISTIAN KOPP, Assistant Professor. B.A., Haverford College; Ph.D., University of North Carolina.

TADEUSZ MASLOWSKI, Assistant Professor. B.A., M.A., University of Warsaw (Poland); Ph.D., University of Cincinnati.

TERPSICHERI H. TAZELLA-EVJEN, Professor. Diploma in Archaeology and History; Ph.D., University of Athens.

Communication

GERARD A. HAUSER, Department Chair; Professor. B.A., Canisius College; M.A., Ph.D., University of Wisconsin.

BRENDA J. ALLEN, Assistant Professor. B.A., Case Western Reserve University; M.A., Ph.D., Howard University.

JOHN WAITE BOWERS, Professor Emeritus.

GEORGE E. CHENEY, Director of Graduate Studies; Associate Professor. B.A., Youngstown State University; M.A., Ph.D., Purdue University.

WARD CHURCHILL, Assistant Professor (Joint Appointment with CSERA). B.A., M.A., Sangamon State University.

ROBERT T. CRAIG, Associate Professor. B.A., University of Wisconsin; M.A., Ph.D., Michigan State University.

DONALD K. DARNEL, Professor. A.B., William Jewell College; M.A., Ph.D., Michigan State University.

THORREL B. FEST, Professor Emeritus.

KRISTINE L. FITCH, Assistant Professor. B.A., M.A., University of Texas; Ph.D., University of Washington.

BARBARA S. JONES, Professor Emerita.

STANLEY E. JONES, Professor. B.A., M.A., University of Iowa; Ph.D., Northwestern University.

MICHAEL E. PACANOWSKY, Associate Professor. B.A., Harvard College; M.A., Michigan State University; Ph.D., Stanford University.

SALLY K. PLANALP, Associate Professor. B.S., University of Missouri; M.A., University of Colorado-Denver; Ph.D., University of Wisconsin.

PEGGY A. RHINE, Senior Instructor. B.S., University of Minnesota; M.A., University of Colorado.

ANNA L. SPALDING, Instructor. B.A., Tabor College; M.Ed., M.A., Wichita State University; Ph.D., University of Denver.

ELAINE V. TOMPKINS, Instructor. B.A., Western Michigan University; M.A., Ph.D., University of Iowa.

PHILLIP K. TOMPKINS, Professor. B.A., University of Northern Colorado; M.A., University of Nebraska; Ph.D., Purdue University.

KAREN TRACY, Associate Chair; Associate Professor. B.S., Pennsylvania State University; M.A., Bowling Green State University; Ph.D., University of Wisconsin.

SUSAN A. WHALEN, Assistant Professor. B.A., University of Texas; M.A., Ph.D., Pennsylvania State University.

Communication Disorders and Speech Science

KATHRYN H. AREHART, Assistant Professor. B.S., Stanford University, M.S., Ph.D., University of Washington.

NED W. BOWLER, Professor Emeritus.
NATALIE L. HEDBERG, Professor, B.S., Syracuse University; M.A., Columbia University; Ph.D., Northwestern University.

YOSHIYUKI HORII, Professor, B.A., University of Wichita; M.A., Wichita State University; Ph.D., Purdue University.

ELIZABETH G. JANCOSZEN, Senior Instructor, B.A., Morris Harvey College; M.A., Ph.D., Ohio State University.

RICHARD F. KUGG, Professor Emeritus.

SUSAN M. MOORE, Senior Instructor Attendant, B.A., College of New Rochelle; M.A., J.D., University of Denver.

LORRAINE OLSON RAMIG, Associate Professor, B.S., University of Wisconsin-Oshkosh; M.S., University of Wisconsin; Ph.D., Purdue University.

PETER R. RANIG, Associate Professor, B.S., M.S., University of Wisconsin; Ph.D., Purdue University.

GAIL RAMSBERGER, Assistant Professor, B.S., M.A., University of Colorado; Sc.D., Boston University.

RICHARD H. SWEETMAN, Professor, B.A., University of Colorado; M.A., Ph.D., Northwestern University.

RITA S. WEISS, Co-Director, INREAL; Professor Emerita.

CHRISTINE YOSHINAGA-ITANO, Assistant Professor, B.A., University of Southern California; M.A., Ph.D., Northwestern University.

Comparative Literature

RALPH J. HECTOR, Director; Professor of Classics. A.B., Harvard College; M.A., Oxford University; M.Phil., Ph.D., Yale University.

ADELEKU ADEKO, Assistant Professor of English. B.A., M.A., University of Ile, Nigeria; Ph.D., University of Florida.

L. MICHAEL BELL, Associate Professor of English. A.B., Harvard College; Ph.D., Harvard University.

CHRISTOPHER BRAIDER, Associate Professor of French. B.A., Ph.D., Trinity College, Dublin.

VICTORIA B. CASS, Associate Professor of Chinese. B.A., Cornell University; M.A., Yale University; Ph.D., University of California, Berkeley.

GEOFRANZ CAVILE, Associate Professor of French. Licence-des-Lettres, Aix-Marseille; M.A., Ph.D., University of California, Berkeley; Maitrise d’Anglais, Agrégation d’Anglais, Université de Strasbourg II.

ADRIAN DEL CARO, Professor of German. B.A., M.A., Ph.D., University of Minnesota.

FREDERICK DENNY, Professor of Religious Studies. A.B., College of William and Mary; B.D., Andover Newton Theological School; M.A., Ph.D., University of Chicago Divinity School.

MARGARET FERGUSSON, Professor of English. A.B., Cornell University; M.Phil., Ph.D., Yale University.

RHONDA GARELICK, Assistant Professor of French. B.A., Ph.D., Yale University.

HOWARD C. GOLDBLATT, Professor of Chinese. B.A., Long Beach State College; M.A., San Francisco State University; Ph.D., Indiana University.

LUIS T. GONZALEZ-DIAZ, Professor of Spanish. B.A., University of North Carolina; M.A., Ph.D., University of Massachusetts at Amherst.

DAVID J. GROSS, Professor of History. B.A., St. Ambrose College; M.A., Ph.D., University of Wisconsin.

THOMAS A. HOLLIDAY, Associate Professor of German. M.A. equiv., University of Munich; Ph.D., Emory University.

BRUCE A. KAWIN, Professor of English. A.B., Columbia University; M.F.A., Ph.D., Cornell University.

ANN KIBBE, Associate Professor of English. A.B., Cornell University; Ph.D., University of Pennsylvania.

PAUL W. KROLL, Professor of Chinese. B.A., M.A., Ph.D., University of Michigan.

RICHARD LANDIE, Professor of Spanish. B.A., M.A., Arizona State University; Ph.D., Indiana University.

DENNIS McGILVRA, Associate Professor of Anthropology. B.A., Reed College; M.A., Ph.D., University of Chicago.

GIULIANA MINGHELLI, Assistant Professor of Comparative Literature and Italian. M.A., Ph.D., Johns Hopkins University.

NINA MOLNAR, Assistant Professor of Spanish and Portugese. B.A., Scripps College; M.A., Ph.D., University of Kansas.

WARREN F. MOTTF, Jr., Professor of French. B.A., University of Pennsylvania; Maitrise des Lettres, Université de Bourdeaux; M.A., Ph.D., University of Pennsylvania.

EDWARD P. NOLAN, Professor of English. B.A., Yale College; Ph.D., Indiana University.

CHARLES L. PROUDFIT, Professor of English. A.B., M.A., Ph.D., University of Michigan.

KATHRYN RIOS, Assistant Professor of English. B.A., Cornell University; M.A., Ph.D., Cornell University.

JULIUS E. RIVERS, Jr., Professor of English. A.B., Davidson College; M.S., Ph.D., University of Oregon.

ELIZABETH ANN ROBERTSON, Associate Professor of English. B.A., Barnard College; B.A., Cambridge University; M.A., M.Phil., Ph.D., Columbia University.

LYNN ROSS-BRANT, Associate Professor of Religious Studies. B.A., Occidental College; M.A., Ph.D., University of Chicago Divinity School.

HUGO SCHMIDT, Professor of English. B.A. equiv., University of Vienna; M.A., Ph.D., Columbia University.

ECKART E. SCHUTTRUPP, Professor of Classics. Ph.D., University of Marburg; Habilitation in Classics, University of Marburg.

CHRISTOPHER SHIELDS, Associate Professor of Philosophy. B.A., M.A., Bowling Green State University; Ph.D., Cornell University.

DAVID SIMPSON, Professor of English. B.A., Magdalene College, Cambridge; M.A., University of Michigan; Ph.D. Magdalene College, Cambridge.

STEPHEN SNYDER, Associate Professor of Japanese. B.A., Michigan State University; M.A., Columbia University; Ph.D., Yale University.

MADELINE K. SPRING, Assistant Professor of Chinese. B.A., Antioch College; Ph.D., University of Washington.

ROBERT STEINER, Professor of English. B.A., University of Iowa; M.F.A., Bowling Green State University; Ph.D., University of Massachusetts.

XIAO TANG, Assistant Professor of Chinese. B.A., Peking University; Ph.D., Duke University.

PHILLIP TOMPKINS, Professor of Communication. B.A., University of Northern Colorado; M.A., University of Nebraska; Ph.D., Purdue University.

MARK WATT, Professor of Music. B.M., Wichita State University; M.M., Kansas State University; D.M.A., Johns Hopkins University.

RAYMOND L. WILLIAMS, Professor of Spanish. B.A., Washington State University; M.A., Ph.D., University of Kansas.

Economics

JAMES R. MARKSESEN, Department Chair; Professor. B.A., Ph.D., Boston College.

JAMES R. ALM, Associate Professor. B.A., Emory College; M.A., University of Chicago; Ph.D., University of Wisconsin.

KENNETH R. BOULDING, Distinguished Professor Emeritus.

ANN M. CARLOS, Associate Professor. B.A., University College; Dublin; Ph.D., University of Western Ontario.

MARK B. CROUSHER, Assistant Professor. B.A., M.A., Cambridge University; M.S., California Institute of Technology; M.B.A. Southern Methodist University; M.S., Ph.D., Stanford University.

JAMES E. DUGAN, Professor Emeritus.

JOANNE FEELEY, Assistant Professor. B.A., Union College; M.A., Ph.D., University of Rochester.

FRED R. GLEAHE, Professor. B.S., M.S., Ph.D., Purdue University.

PHILIP E. GRAVES, Professor. B.A., Indiana University; M.A., Ph.D., Northwestern University.

MICHAEL J. GREENWOOD, Director. Center of Economic Analysis; Professor. B.A., DePaul University; M.A., Ph.D., Northwestern University.

CHARLES W. HOWE, Director. Program for Environment and Behavior (IBS); Professor. B.A., Rice University; M.A., Ph.D., Stanford University.
JEFFREY S. ZAX, Associate Professor. B.A., Ph.D., Harvard University.

REUBEN A. ZUBROW, Professor Emeritus.

**English**

DAVID SIMPSON, Department Chair; Professor. B.A., Magdalene College, Cambridge; M.A., University of Michigan; Ph.D., Magdalene College, Cambridge.

ADELEKE ADEEKO, Assistant Professor. B.A., University of Ife, Nigeria; Ph.D., University of Florida.

DONALD C. BAKER, Professor Emeritus.

BRUCE BASSOFF, Professor. B.A., Brandeis University; M.A., Columbia University; Ph.D., The City University of New York.

L. MICHAEL BELL, Associate Professor. A.B., Harvard College; Ph.D., Harvard University.

MARTIN E. BICKMAN, Associate Professor. A.B., Amherst College; M.A.T., Harvard University; M.A., Ph.D., University of Pennsylvania.

RONALD BILLINGSLEY, Associate Professor. B.A., University of Redlands; M.A., Ph.D., University of Oregon.

ARTHUR M. BOARDMAN, Associate Professor Emeritus.

DOUGLAS A. BÜRGER, Associate Professor. B.A., Colorado State College; M.A., Ph.D., Lehigh University.

LORNA DEE CERVANTES, Assistant Professor. B.A., San Jose State University.

JACK H. CROUCH, Professor Emeritus.

J. WALLACE DONALD, Professor Emeritus.

EDWARD DORN, Professor. B.A., Black Mountain College (North Carolina).

KATHERINE EGGERT, Assistant Professor. B.A., Rice University; M.A., Ph.D., University of California, Berkeley.

CHARLES L. EVANS, Professor Emeritus.

MARGARET W. FERGUSON, Professor. A.B., Cornell University; M.Phil., Ph.D., Yale University.

SIDNEY GOLDFARB, Professor. A.B., Harvard College.

NAN GOODMAN, Assistant Professor. B.A., Princeton University; M.A., University of California, Berkeley; J.D., Stanford University; Ph.D., Harvard University.

JOHN N. GRAHAM, Associate Professor. A.B., Middlebury College; M.A., Ph.D., New York University.

VIRGIL F. GRILLO, Professor. A.B., University of Southern California; M.A., Ph.D., University of California, Berkeley.

ELISSA SCHAER GURALNICK, Professor. A.B., A.M., University of Pennsylvania; M. Phil., Ph.D., Yale University.

RICHARD L. HALPERN, Associate Professor. B.A., Connecticut College; Ph.D., Yale University.

LINDA HOGAN, Associate Professor. B.A., University of Colorado.

KELLY K. HURLEY, Assistant Professor. B.A., Reed College; Ph.D., Stanford University.

SUZANNE H. JUHASZ-REINHARDT, Professor. B.A., Bennington College; M.A., Ph.D., University of California, Berkeley.

STEVEN KATZ, Professor. A.B., Cornell University; M.A., University of Oregon.

BRUCE F. KAWIN, Professor. A.B., Columbia University; M.F.A., Ph.D., Cornell University.

ANN KIBBEY, Associate Professor. B.A., Cornell University; Ph.D., University of Pennsylvania.

GERALD B. KINNEAVY, Professor. B.A., University of San Francisco; M.A., University of Notre Dame; Ph.D., Pennsylvania State University.

ARTHUR L. KISTNER, Associate Professor. B.A., Ph.D., University of Illinois.

MARY K. KLAGES, Assistant Professor. A.B., Dartmouth College; M.A., Ph.D., Stanford University.

PHILIP L. KRAUTH, Associate Professor. A.B., M.A., Ph.D., Indiana University.

MARILYN D. KRYSL, Professor. B.A., M.F.A., University of Oregon.

PAUL M. LEVITT, Professor. B.A., University of Colorado; M.A., Ph.D., University of California, Los Angeles.

THOMAS L. LYONS, Senior Instructor. A.B., Ph.D., Saint Louis University; M.A., Ph.D., Washington University.

SIEGFRIED MANDEL, Professor Emeritus.

PETER F. MICHELSON, Associate Professor. B.A., Whitman College; M.A., University of Wyoming.

LEONARD MOSKOVITZ, Professor Emeritus.

JOHN LEO MURPHY, Professor Emeritus.

MARY BETH NELSON, Associate Professor Emerita.

EDWARD P. NOLAN, Professor. B.A., Yale College; Ph.D., Indiana University.

JACK D. A. OGILVY, Professor Emeritus.

HENRY PETTIT, Professor Emeritus.

MICHAEL J. PRESTON, Associate Professor. A.B., Gonzaga University; M.A., University of Virginia; M.A., Ph.D., University of Colorado.

CHARLES L. PROUDFIT, Professor. A.B., M.A., Ph.D., University of Michigan.

RUBIN RABINOVITCH, Professor. B.A., Rutgers University; M.A., Ph.D., Columbia University.

KATHRYN RIOS, Assistant Professor. B.A., University of California, Santa Cruz; M.A., Ph.D., Cornell University.

JULIUS E. RIVERS, JR., Professor. A.B., Davidson College; M.S., Ph.D., University of Oregon.

ELIZABETH ANN ROBERTSON, Associate Professor. B.A., Barnard College; B.A., Cambridge University; M.A., M.Phil., Ph.D., Columbia University.
JEFFREY C. ROBINSON, Professor. A.B., Harvard College; M.A., University of Chicago; Ph.D., Brandeis University.

TERRY J. ROWDEN, Assistant Professor. B.A., University of Arkansas, Pine Bluff; M.A., Ph.D., Cornell University.

REGINALD D. SANER, Professor. B.A., St. Norbert College; M.A., Ph.D., University of Illinois.

LEWIS SAWIN, Professor Emeritus.

RICHARD J. SCHOECK, Professor Emeritus.

CHARLES LABARGE SQUIER, Professor. A.B., A.M.T., Harvard University; Ph.D., University of Michigan.

ROBERT STEINER, Professor. B.A., University of Iowa; M.F.A., Bowling Green State University; Ph.D., University of Massachusetts.

JOHN ALLEN STEVENSON, Associate Professor. B.A., Duke University; Ph.D., University of Virginia.

RONALD SUKENICK, Professor. B.A., Cornell University; M.A., Ph.D., Brandeis University.

CHARLOTTE SUSSMAN, Assistant Professor. B.A., Yale University; M.A., Ph.D., Cornell University.

R L WIDMANN, Associate Professor. B.A., University of Wisconsin; A.M., Ph.D., University of Michigan.

JOHN H. WRENN, Professor Emeritus.

CONSTANCE WRIGHT, Associate Professor Emerita.

SUE A. ZEMKA, Assistant Professor. B.A., Saint Louis University; Ph.D., Stanford University.

Environmental Conservation

WILLIAM E. RIEBSAME, Program Director; Associate Professor of Geography. B.A., Florida State University; M.S., University of Utah; Ph.D., Clark University.

Film Studies

VIRGIL F. GRILLO, Program Director; Professor. A.B., University of Southern California; M.A., Ph.D., University of California, Berkeley.

STAN BRACHAGE, Professor; Honorary Degree, San Francisco Art Institute.

SURANJAN GANGULY, Assistant Professor. B.A., University of Calcutta; M.A., Jadavpur University; Ph.D., Purdue University.

BRUCE F. KAWIN, Professor. A.B., Columbia University; M.A., Ph.D., Cornell University.

MARIAN KEANE, Assistant Professor. B.A., Wells College; M.A., Ph.D., New York University.

JAMES W. PALMER, Director of Farrand Residential Program; Associate Professor of Humanities. B.A., Dartmouth College; M.A., Ph.D., Claremont Graduate School.

PHILIP SOLOMON, Assistant Professor. B.A., State University of New York, Binghamton; M.A., Massachusetts College of Art.

DON YANNACITO, Lecturer. B.A., University of Colorado.

Fine Arts

JERRY W. KUNKEL, Department Chair; Professor. B.S., Ashland College; M.F.A., Southern Illinois University.

ALBERT ALHADEFF, Associate Professor. A.B., Columbia University; M.A., Ph.D., New York University.

RONALD R. BERNIER, Professor. B.A., University of Minnesota; M.A., University of Hawaii and East-West Center; Ph.D., Cornell University.

GLENN B. CHAMBERLAIN, Professor Emeritus.

H. SCOTT CHAMBERLIN, Associate Professor. B.A., San Francisco State University; M.F.A., New York State College of Ceramics at Alfred University.

ALBERT CHONG, Assistant Professor. B.F.A., School of Visual Arts; New York; M.F.A., University of California, San Diego.

CLINTON C. CLINE, Professor. B.A., California State University, Long Beach.

ROBERT E. DAVY, Professor Emeritus.

ERIKA L. DOSS, Associate Professor. B.A., Ripon College; M.A., Ph.D., University of Minnesota.

LUIS E. EADES, Professor Emeritus.

ROBERT R. ECKER, Professor. B.S., Shippensburg State College; M.F.A., Pennsylvania State University.

CLAIRE J. FARAGO, Assistant Professor. B.A., Wellesley College; M.A., Brown University; Ph.D., University of Virginia.

CHARLES S. FORSMAN, Professor. B.A., M.F.A., University of California, Davis.

SUZANNE R. FOSTER, Assistant Professor. B.S., University of Wisconsin-Milwaukee; M.F.A., University of Colorado; Ph.D., Pennsylvania State University.

FRANCIS J. GECK, Professor Emeritus.

LINDA S. HERRITT, Associate Professor. B.F.A., Ohio State University; M.F.A., University of Montana.

JOHN D. HOAG, Professor Emeritus.

KEN IWAMASA, Associate Professor. B.A., California State University, Long Beach.

JAMES A. JOHNSON, Associate Professor. B.F.A., Massachusetts College of Art; M.F.A., Washington State University.

EUGENE E. MATTHEWS, Professor. B.F.A., M.F.A., University of Iowa.

KAY MILLER, Associate Professor. B.S., University of Houston; B.F.A., M.F.A., University of Texas.

VERNON H. MINOR, Associate Professor. B.A., Kent State University; M.A., Ph.D., University of Kansas.

ARTHUR G. PENNINGTON, Professor Emeritus.

THOMAS J. POTTER, Associate Professor. B.A., Cornell College; M.A., M.F.A., University of Iowa.

CHARLES A. QUALLEY, Professor Emeritus.

CELESTE L. REHM, Associate Professor. B.A., Monmouth College; M.F.A., Pratt Institute.

BARBARA JO REVELLE, Professor. B.A., M.F.A., University of Colorado.

CHARLES J. ROITZ, Professor Emeritus.

GARRISON ROOTS, Associate Professor. B.F.A., Massachusetts College of Art; M.F.A., Washington University, St. Louis.

ANTONETTE ROSATO, Assistant Professor. B.F.A., University of Cincinnati; M.F.A., Claremont Graduate School.

JOHN FRANKLIN SAMPSON, Professor Emeritus.

ALEX J. SWEETMAN, Associate Professor. B.A., New York University; M.F.A., State University of New York at Buffalo.

JANICE TANAKA, Associate Professor. B.F.A., M.S., M.F.A., School of the Art Institute of Chicago.

FREDERICK C. TRUCKESS, Professor Emeritus.

AMY L. VANDERSALL, Professor. B.A., College of Wooster; M.A., M.Ed., Yale University.

MELANIE WALKER, Assistant Professor. B.A., Florida State University; M.A., Florida State University, Tallahassee.

JOHN B. WILSON, Professor Emeritus.

LYNN ROBERT WOLFE, Professor Emeritus.

ELIZABETH A. WOODMAN, Professor. School of American Craftsmen, Alfred University.

GEORGE E. WOODMAN, Professor. A.B., Harvard College; M.A., University of New Mexico.

French and Italian

RALPH J. HEXTOR, Acting Department Chair; Professor of Classics. A.B., Harvard College; M.A., Oxford University; M.Phil., Ph.D., Harvard University.

French

LUCIA F. BAKER, Senior Instructor Emerita.

JACQUES BARCHILON, Professor Emeritus.

CHRISTOPHER BRAIDER, Associate Professor. B.A., Ph.D., Trinity College (Ireland).

PATRICIA BRAND, Instructor. B.A., Bates College; M.A., Ph.D., University of Colorado.

GEORGIANA COLVILE, Associate Professor. Licenceés-les-Lettres, Aix-Marseille; M.A., Ph.D., University of California, Berkeley; Maitrise d'Anglais, Agregation d’anglais, Université de Strasbourg II.
CATHERINE EASBENDER, Assistant Professor; M.A., Catholic University of Louvain, Belgium; M.A., Ph.D., Princeton University.

JULIA B. FREY, Associate Professor; B.A., Antioch College; M.A., University of Texas; M.Phil., Ph.D., Yale University.

RHONDA GARELICK, Assistant Professor; B.A., M.A., Ph.D., Yale University.

FREDE JENSEN, Professor; M.A., University of Copenhagen (Denmark); Graduate diploma in Hispanic Philology, University of Salamanca (Spain); Ph.D., University of California, Los Angeles.

ANNE KETCHUM, Associate Professor Emerita.

EDGAR N. MAYER, Professor Emeritus.

MILDRED P. MORTIMER, Associate Professor; B.A., Brooklyn College; M.A., Harvard University; Ph.D., Columbia University.

WARREN F. MOTTE, JR., Professor; M.S., Université de Bordeaux; B.A., M.A., Ph.D., University of Pennsylvania.

HENRY A. STAVAN, Professor Emeritus.

ITALIAN

GRAZIANA G. LAZZARINO, Director of Italian Program; Professor, Laurrea, University of Genoa, Italy.

CAROLINE JULIA AMARI, Professor Emerita.

GIULIANA MINGHELLI, Assistant Professor; B.A., University of Pisa (Italy); M.A., Ph.D., Johns Hopkins University.

LOUIS TENENBAUM, Professor Emeritus.

GEOGRAPHY

THOMAS T. VEBLEN, Department Chair; Professor, A.B., M.A., Ph.D., University of California, Berkeley.

ROGER G. BARRY, Director, World Data Center-A for Glaciology (CIRECS); Professor; B.A., University of Liverpool (England); M.Sc., McGill University (Canada); Ph.D., University of Southampton (England).

SUSAN W. BEATTY, Associate Professor; B.S., Emory University; Ph.D., Cornell University.

T. NELSON CAIN, Professor; B.A., M.A., University of Leeds (England); Ph.D., Australian National University.

KENNETH A. ERICKSON, Professor; B.S., M.A., University of Oregon; Ph.D., University of California, Berkeley.

GARY L. GAILE, Associate Professor; B.A., M.A., C. Phil., Ph.D., University of California, Los Angeles.

NICHOLAS HELBURN, Professor Emeritus. A. DAVID HILL, Professor; B.A., M.A., University of Colorado; Ph.D., University of Chicago.

MICHAEL E. HODGSON, Assistant Professor; B.A., University of Tennessee; M.S., Ph.D., University of South Carolina.

JAMES D. HUFF, Professor; B.A., Dartmouth; M.A., Ph.D., Northwestern University.

MARK P. KUMLER, Assistant Professor; B.A., Dartmouth College, M.A., Michigan State University, Ph.D., University of California, Santa Barbara.

M. JOHN LOEFFLER, Professor Emeritus.

JOHN V. O’LOUGHLIN, Professor; B.A., National University of Ireland (University College, Dublin); M.S., Ph.D., Pennsylvania State University.

DON MITCHELL, Instructor; B.A., San Diego State University; M.S., Pennsylvania State University, Ph.D., Rutgers University.

JOHN PITLICK, Assistant Professor; B.Sc., University of Washington; M.Sc., Ph.D., Colorado State University.

HORACE F. QUICK, Professor Emeritus.

WILLIAM E. RIESBANE, Associate Professor; B.S., Florida State University; M.S., University of Utah; Ph.D., Clark University.

ANDREI ROGERS, Director, Population Program (IBS); Professor; B.Arch., University of California, Berkeley; Ph.D., University of North Carolina.

ALBERT W. SMITH, Professor Emeritus.

LYNN A. STAEBHEL, Associate Professor; B.A., University of Washington; M.S., Pennsylvania State University; Ph.D., University of Washington.

KONRAD STEFFEN, Associate Professor; M.A., Ph.D., Swiss Federal Institute of Technology (ETH), Zurich.

JAMES W. VESCOAT, JR., Assistant Professor; B.L.A., Louisiana State University; M.A., Ph.D., University of Chicago.

GILBERT F. WHITE, Gustavson Distinguished Professor Emeritus; Director Emeritus, Institute of Behavioral Sciences.

MARK W. WILLIAMS, Assistant Professor; B.A., Ph.D., University of California, Santa Barbara.

GEOLOGICAL SCIENCES

JOHN T. ANDREWS, Professor; B.A., Ph.D., Nottingham University (England); M.Sc., McGill University (Canada).

WILLIAM W. ATKINSON, JR., Associate Professor; B.S., M.S., University of New Mexico; Ph.D., Harvard University.

ROGER G. BILHAM, Professor; B.S., University of Wales; Ph.D., Cambridge University.

WALTER W. BIRKELAND, Professor; B.S., University of Washington; Ph.D., Stanford University.

WILLIAM ALFRED BRADDOCK, Professor; B.A., University of Colorado; Ph.D., Princeton University.

WILLIAM C. BRADLEY, Professor Emeritus. DAVID A. BUDD, Assistant Professor; B.S., College of Wooster; M.S., Duke University; Ph.D., University of Texas at Austin.

BRUCE F. CURTIS, Professor Emeritus.

JOHN D. EDWARDS, Director EMARC; Instructor; Ph.D., Columbia University.

DON L. EICHER, Professor; B.A., M.S., University of Colorado; Ph.D., Yale University.

G. LANG FARMER, Associate Professor; B.A., University of California, San Diego; Ph.D., University of California, Los Angeles.

ALEXANDER F. H. GOETZ, Director of CIES; Professor; B.S., M.S., Ph.D., California Institute of Technology.

VIJAY K. GUPTA, Professor; B.E., University of Roorkee, India; M.S., Colorado State University; Ph.D., University of Arizona.

JUDITH A. HARRIS, Associate Professor; B.A., University of California, Berkeley; Ph.D., Cambridge University.

WILLIAM W. HAY, Professor; B.S., Southern Methodist University; M.S., University of Illinois; Ph.D., Stanford University.

BRUCE M. JAKOSKY, Assistant Professor; B.S., UCLA; M.S., Ph.D., California Institute of Technology.

ERLE G. KAUFFMAN, Professor; B.S., M.S., Ph.D., University of Michigan.

CARL KISSLINGER, Professor; B.S., M.S., Ph.D., St. Louis University.

MARY J. KRAUS, Associate Professor; B.S., Yale University; M.S., University of Wyoming; Ph.D., University of Colorado.

EDWIN E. LARSON, Professor; B.A., M.A., University of California, Los Angeles; Ph.D., University of Colorado.

MARK F. MEIER, Director of INSTAAR; Professor; B.S., M.S., State University of Iowa; Ph.D., California Institute of Technology.

GIFFORD H. MILLER, Associate Professor; B.A., Ph.D., University of Colorado.

JAMES L. MUNOZ, Professor; A.B., Princeton University; Ph.D., John Hopkins University.

PETER ROBINSON, Curator of Geology; University Museum; Professor; B.S., M.S., Ph.D., Yale University.

JOSEPH R. SMITH, Professor; B.S., Virginia Polytechnic Institute; M.S., Ph.D., University of Chicago.

HARTMUT A. W. SPETZLER, Professor; B.S., M.S., Trinity University; M.S., Ph.D., California Institute of Technology.

CHARLES R. STEIN, Associate Professor; B.S., M.S., Ph.D., University of Chicago.

THEODORE R. WALKER, Professor Emeritus.

PAUL WEIMER, Assistant Professor; B.A., Pomona College; M.S., University of Colorado at Boulder; Ph.D., University of Texas at Austin.

JAMES W. C. WHITE, Assistant Professor; B.S., Florida State University; M.A., M.Phil., Ph.D., Columbia University.

GERMAN AND SLAVIC LANGUAGES AND LITERATURES

GERMAN

ADRIAN DEL CARO, Department Chair; Professor; B.A., University of Minnesota, Duluth; M.A., Ph.D., University of Minnesota, Minneapolis.

THOMAS A. HOLLWECK, Associate Professor, M.A. equiv., University of Munich (Germany); Ph.D., Emory University.
BRIAN A. LEWIS, Assistant Professor, B.A., University of London; Ph.D., University of Wisconsin.
CONSTANCE C. PONTASCH, Lecturer, B.A., Western State College; M.A., University of Colorado.
HUGO SCHMIDT, Professor, B.A. equiv., University of Vienna (Austria); M.A., Ph.D., Columbia University.
GUNNEL L. THORSIN-HAMM, Senior Instructor, B.A., University of Oregon; M.A., University of Colorado.
LEONARD P. WESSELL, JR., Professor, B.A., San Diego State College; M.A. (Germs), M.A. (Phil.), Ph.D., University of Washington.

Slavic

REGINA AVRASHOV, Senior Instructor, M.A., Leningrad State Herzen Pedagogical Institute; M.A., Georgetown University.
HOWARD A. DAUGHERTY, Assistant Professor, B.A., Ph.D., University of Washington.
DRAGAN KUJUNDZIC, Lecturer, M.A., University of Southern California.
C. NICHOLAS LEE, Professor, B.A., M.A., University of Maryland; Ph.D., Harvard University.
D.L. PLANK, Professor Emeritus.
EARL D. SAMPSON, Associate Professor, B.A., University of Colorado; M.A.; Ph.D., Harvard University.

History

LEE CHAMBERS-SCHILLER, Department Chair; Associate Professor, B.A., Wellesley College; M.A. Ph.D., University of Michigan.
FRED W. ANDERSON, Associate Professor, B.A., Colorado State University; M.A., Ph.D., Harvard University.
VIRGINIA D. ANDERSON, Associate Professor, B.A., University of Connecticut; M.A., University of East Anglia; A.M., Ph.D., Harvard University.
VINCENT W. BEACH, Professor Emeritus.
CARL C. CHRISTENSEN, Professor, B.A., State University of Iowa; M.A., Ph.D., Ohio State University.
VINE DELORIA, JR., Professor, B.S., Iowa State University; Th.M., Lutheran School of Theology; J.D., University of Colorado School of Law.
BARBARA A. ENGEL, Associate Professor, B.A., City College of New York; M.A., Harvard University; Ph.D., Columbia University.
STEVEN A. EPSTEIN, Associate Professor, B.A., Swarthmore College; B.A., M.A., Cambridge University; A.M., Ph.D., Harvard University.
ROBERT J. FERRY, Associate Professor, B.A., University of Colorado; M.A., Ph.D., University of Minnesota.
STEPHEN FISCHER-GALATTI, Distinguished Professor Emeritus.
DAVID L. GROSS, Professor, B.A., St. Ambrose College; M.A., Ph.D., University of Wisconsin.
MARTHA HANNA, Assistant Professor, B.A., University of Michigan; M.A., University of Toronto; Ph.D., Georgetown University.
BOYD H. HILL, JR., Professor, A.B., Duke University; M.A., Ph.D., University of North Carolina.
ROBERT HOHLENDER, Professor, A.B., Bowdoin College; M.A., Ph.D., Indiana University.
EVELYN HU-DEHART, Director of the Center for Studies of Ethnicity and Race in America; Professor, B.A., Stanford University; Ph.D., University of Texas at Austin.
A. YEVETTE HUGGINNIE, Assistant Professor, B.A., Harvard University; M.A., M.Phil., Ph.D., Yale University.
JAMES P. JANKOWSKI, Professor, B.A., University of Buffalo; M.A., Ph.D., University of Michigan.
PARRAIC J. KENNEY, Assistant Professor, A.B., Harvard College; M.A., University of Toronto; Ph.D., University of Michigan.
JOYCE CHAPMAN LENBA, Professor Emerita.
PATRICIA NELSON LIMERIC, Professor, B.A., University of California, Santa Cruz; M.A., M.Phil., Ph.D., Yale University.
GLORIA L. MAIN, Associate Professor, B.A., San Jose State University; M.A., State University of New York at Stony Brook; Ph.D., Columbia University.
JACKSON T. MAIN, Professor Adjunct, B.A., M.A., Ph.D., University of Wisconsin.
RALPH MANN, Associate Professor, B.A., Duke University; M.A., Ph.D., Stanford University.
MANNING MARABLE, Professor, A.B., Earlham College; M.A., University of Wisconsin-Madison; Ph.D., University of Maryland at College Park.
MARJORIE K. McINTOSH, Professor, A.B., Radcliffe College; M.A., Ph.D., Harvard University.
CHARLES R. MIDDLETON, Dean of the College of Arts and Sciences; Professor, B.A., Florida State University; M.A., Ph.D., Duke University.
PHILIP L. MITTERLING, Professor Emeritus.
MARIA E. MONTOYA, Assistant Professor, B.A., M.A., Ph.D., Yale University.

HONORS

GEORGE H. PHILLIPS, Associate Professor, B.A., San Diego State University; M.A., Ph.D., University of California, Los Angeles.
MARK A. PITTINGER, Assistant Professor, B.A., Denison University; M.A., Ph.D., University of Michigan.
ANN MARIE POIS, Instructor, B.A., State University of New York, Stony Brook; M.A., Ph.D., University of Colorado.
ROBERT A. POIS, Professor, B.A., Grinnell College; M.A., Ph.D., University of Wisconsin.
EDWARD G. RUESTOW, Associate Professor, B.F.A., M.F.A., University of Pennsylvania; M.A., George Washington University; Ph.D., Indiana University.
HOWARD LEE SCAMEHORN, Professor, B.A., Western Michigan College; M.A., Ph.D., University of Illinois.
ROBERT D. SCHULZINGER, Professor, B.A., Columbia University; M.Phil., Ph.D., Yale University.
LAWRENCE F. SILVERMAN, Professor Emeritus.
MARSHA T. TOCCO, Assistant Professor, B.A., California State University, Long Beach; Ph.D., Stanford University.
WILLIAM WELI, Associate Professor, B.A., Marquette University; M.A., Ph.D., University of Michigan.

HONORS

ALEC J. KELSO, Director; Professor, B.S., Northern Illinois University; M.A., Ph.D., University of Michigan.
RONALD BILLINGSLEY, Associate Director of PLC and Associate Director of Honors; Associate Professor, B.A., University of Redlands; M.A., Ph.D., University of Oregon.
E. CHRISTIAN KOPFF, Associate Program Director; Associate Professor, B.A., Haverford College; Ph.D., University of North Carolina.
ANNA LOU OWEN, Associate Professor Emerita of Social Science.
ESTER A. ZAGO, Associate Professor, Laurea, Bocconi University (Italy); Ph.D., University of Oregon.

HUMANITIES

NANCY K. HILL, Department Chair; Associate Professor, B.A., Carleton College; M.A., University of Wisconsin; Ph.D., Northwestern University.
NANCY M. FREDRICKS, Assistant Professor, B.A., University of Delaware; Ph.D., State University of New York at Buffalo.
PAUL GORDON, Assistant Professor, B.A., State University of New York at Buffalo; Ph.D., Yale University.
MATTHEW GUMPERT, Assistant Professor, B.A., Princeton University; Ph.D., Harvard University.
HARRIET M. JEFFERY, Professor Emerita.
VERNON H. MINOR, Associate Professor, B.A., Kent State University; M.A., Ph.D., University of Kansas.
James W. Palmer, Director of Pax and Residential Programs; Associate Professor, B.A., Dartmouth College, M.A., Ph.D., Claremont Graduate School.

Richard J. Schoeck, Professor Emeritus.

Paul V. Thompson, Professor Emeritus.

International Affairs

George A. Coddington, Jr., Program Director; Professor, B.A., M. A., University of Washington, Doctor of Sciences Politeques, University of Geneva (Switzerland).

Kinesiology

Stephen A. Wallace, Department Chair; Associate Professor, B.S., M.A., Kent State University; Ph.D., University of Wisconsin.

Frances R. Bascom, Professor Emeritus.

Ralph E. Bibler, Professor Emeritus.

Frederick W. Bierhaus, Professor Emeritus.

William C. Byrnes, Graduate Coordinator; Associate Professor, B.S., Manhattan College; M.A., Appalachian State University; Ph.D., University of Wisconsin.

Arthur L. Dickinson, Professor Emeritus.

Cornelia Edmondson, Professor Emeritus.

John Stuart Fowler, Associate Professor Emeritus.

William C. Lam, Professor Emeritus.

Robert S. Mazzeo, Associate Professor, B.S., North Carolina State University; M.A., Wake Forest University; Ph.D., University of California, Berkeley.

Penny McCullagh, Associate Professor, B.S., State University of New York, Brockport; M.S., University of Washington; Ph.D., University of Wisconsin.

H. Sandy Milner-Brown, Associate Professor, B.S., M.S., University of Ottawa; Ph.D., University of Alberta.

Dale Paul Mood, Associate Dean, College of Arts and Sciences; Professor, B.S., M.A., Ph.D., University of Iowa.

Frank C. Potts, Professor Emeritus.

Frank Bernard Prentup, Professor Emeritus.

Waldean Robichaux, Professor Emeritus.

David A. Roth, Assistant Professor, B.A., M.A., Ph.D., University of California, Berkeley.

Douglas R. Seals, Associate Professor, B.S., William Jewell College; M.S., Ph.D., University of Wisconsin, Madison.

David E. Sherwood, Associate Professor, A.B., M.A., San Diego State University; Ph.D., University of Southern California.

Latin American Studies

Robert J. Perry, Program Director; Associate Professor of History, B.A., University of Colorado; M.A., Ph.D., University of Minnesota.

Linguistics

Lisa Menn, Department Chair; Associate Professor, B.A., Swarthmore College; M.A., Brandeis University; M.A., Ph.D., University of Illinois.

Alan Bell, Associate Professor, B.S., Massachusetts Institute of Technology; M.S., Ph.D., Stanford University.

Susanna A. Cumming, Assistant Professor, B.A., University of California, Santa Cruz; M.A., Ph.D., University of California, Los Angeles.

Barbara A. Fox, Associate Professor, B.A., M.A., Ph.D., University of California, Los Angeles.

Zigmunt Fajznynger, Professor, M.A., Ph.D., University of Warsaw (Poland); M.A., University of Ghana (Ghana).

Geraldine Legendre, Assistant Professor, B.A., Lycee d'Etat Marguerite de Navarre (France); M.A., University of Houston; M.A., Ph.D., University of California, San Diego.

David S. Roed, Professor, A.B., Cornell University; M.A., Ph.D., University of California, Berkeley.

Kumiko Takaara, Associate Professor of Japanese and Linguistics, B.A., M.A., University of the Sacred Heart (Japan); M.A., University of Edinburgh (Scotland); Ph.D., University of London (England).

Allan R. Taylor, Professor Emeritus.

Mathematics

Arlan Bruce Ramsay, Department Chair; Professor, B.A., University of Kansas; A.M., Ph.D., Harvard University.

Lawrence W. Baggett, Professor, B.S., Davidson College; M.S., Ph.D., University of Washington.

Alberto Bressan, Associate Professor, Dottore in Matematica, University of Padova, Italy; Ph.D., University of Colorado.

William E. Briggs, Professor Emeritus.

Gordon F. Brown, Associate Professor, B.S., California Institute of Technology; Ph.D., Cornell University.

George F. Clements, Professor, B.S., University of Wisconsin; M.A., Ph.D., Syracuse University.

Robert W. Ellingham, Professor Emeritus.

Peter D. Elliott, Professor, B.S., University of Bristol; Ph.D., University of Cambridge (England).

Homer C. Ellis, Associate Professor, B.A., M.A., Ph.D., University of Texas.

Carla Farsi, Assistant Professor, Laurea, University of Florence (Italy); Ph.D., University of Maryland.

Jean Gillett Fennis, Professor Emerita.

Irwin Fischer, Professor, B.S., City College of New York; Ph.D., Harvard University.

Jeffrey S. Fox, Associate Professor, B.A., Massachusetts Institute of Technology; Ph.D., University of California, Berkeley.

Watson Fulk, Professor Emeritus.

Robert K. Goodrich, Professor, B.A., Ph.D., University of Utah.

David E. Grant, Assistant Professor, A.B., Princeton University; Ph.D., Massachusetts Institute of Technology.

Karl G. Gustafson, Professor, B.S., (Eng.), B.S., (Bus.), University of Colorado; Ph.D., University of Maryland.

Henry G. Hermes, Professor, B.S., New Jersey State College; M.S., Ph.D., University of New Mexico.

John H. Hodges, Professor, B.S., Westminter (Pennsylvania) College; M.A., Duke University.

Richard A. Holley, Professor, B.S., M.A., University of New Mexico; Ph.D., Cornell University.

William B. Jones, Professor, B.A., Jacksonville State College; M.A., Ph.D., Vanderbilt University.

Roy Ben Krieg, Assistant Professor Emeritus.

Richard Joseph Laver, Professor, B.A., University of California, Los Angeles; Ph.D., University of California, Berkeley.

Albert T. Lundell, Professor, A.B., A.M., University of Utah; Ph.D., Brown University.

Robert Eugene MacRae, Professor, A.B., S.M., Ph.D., University of Chicago.

Jerome I. Malitz, Professor, B.A., M.A., University of Connecticut; Ph.D., University of California, Berkeley.

Burnett C. Meyer, Professor Emeritus.

James Donald Monk, Professor, A.B., University of Chicago; B.S., University of New Mexico; M.A., Ph.D., University of California, Berkeley.

Jan Mycielski, Professor, M.S., Ph.D., University of Wroclaw (Poland); Doctor, Polish Academy of Sciences.

Judith A. Packer, Associate Professor, B.A., M.A., Wesleyan University; Ph.D., Harvard University.

David F. Reaick, Associate Professor Emeritus.

William N. Reinhardt, Professor, B.A., College of Wooster; Ph.D., University of California, Berkeley.

Robert D. Richtmyer, Professor Emeritus.

Richard L. Roth, Professor, B.A., Harvard College; M.A., Ph.D., University of California, Berkeley.
DUANE P. SATHER, Professor, B. of Physics, M.S., Ph.D., University of Minnesota.

WOLFGANG SCHMIDT, Distinguished Professor, Ph.D., University of Vienna.

ERIC STADE, Assistant Professor, B.A., M.A., Ph.D., Columbia University.

DANIEL W. STROOCK, Professor Adjunct, A.B., Harvard College; Ph.D., Rockefeller University.

RUTH REBEKKA STRUIK, Professor, B.A., Swarthmore College; M.A., University of Illinois; Ph.D., New York University.

WALTER F. TAYLOR, Professor, B.A., Swarthmore College; M.A., Ph.D., Harvard University.

WOLFGANG J. THRON, Professor Emeritus.

ROBERT TUBBS, Associate Professor, B.A., University of Southern Florida; M.A., Columbia University; Ph.D., Pennsylvania State University.

LYNNE WALLING, Assistant Professor, B.A., Sonoma State University; A.M., Ph.D., Dartmouth College.

MARTIN E. WALTER, Professor, B.S., University of Redlands; M.A., Ph.D., University of California, Irvine.

IRVING WEISS, Professor Emeritus.

JAY H. WOLKOWSKY, Associate Professor, B.S., Lehigh University; M.S., Michigan State University; M.A., Ph.D., New York University.

GUO LIANG YU, Assistant Professor, B.S., Zhejiang; M.S., Sichuan, China; Ph.D., State University of New York, Stony Brook.

Medieval Studies

RALPH J. HEXT, Director, Professor of Classics and Comparative Literature, A.B., Harvard College; M.A., Oxford University; M.Phil., Ph.D., Yale University.

Museum

DAVID M. ARMSTRONG, Director of the University Museum; Professor of Biological Science, B.S., Colorado State University; M.A., Harvard University; Ph.D., University of Kansas.

M. DEANE BOWERS, Associate Professor of Natural History; Curator of Entomology, B.A., Smith College; Ph.D., University of Massachusetts.

JUDITH A. HARRIS, Associate Professor of Natural History, B.A., University of California, Berkeley; Ph.D., Cambridge University.

FREDERICK W. LANGE, Associate Professor of Natural History; Curator of Anthropology, B.A., Beloit College; M.S., Ph.D., University of Wisconsin.

URELL NORTON LAMHAM, Professor of Natural History Emeritus.

THOMAS A. RANKER, Assistant Professor of Natural History; Curator of Botany, B.A., California State University; M.A., Humboldt State University; Ph.D., University of Kansas.

PETER ROBINSON, Professor of Natural History; Curator of Geology, B.S., M.S., Ph.D., Yale University.

HUGO G. RODECK, Professor of Natural History Emeritus.

JOHN R. ROHNER, Professor of Natural History Emeritus.

WILLIAM A. WEBER, Professor of Natural History Emeritus.

JOE BEN WHEAT, Professor of Natural History Emeritus.

SHI-KUEI WU, Professor of Natural History; Curator of Zoological Collections, B.S., Taiwan Normal University; M.S., University of Hawaii; Ph.D., University of Michigan.

Natural Science

MILFORD F. CUNDIFF, Program Director, Associate Professor of Biological Science, B.A., Ph.D., University of Colorado.

DAVID M. ARMSTRONG, Museum Director, Professor of Biological Science, B.S., Colorado State University; M.A., Harvard University; Ph.D., University of Kansas.

L. MARGARET KRAEMER, Professor of Physical Science Emeritus.

AARON SAVETZ, Professor of Physical Science Emeritus.

Oriental Languages and Literatures

PAUL W. KROLL, Department Chair, Professor of Chinese, B.A., Ph.D., University of Michigan.

VICTORIA B. CASS, Associate Professor of Chinese, B.A., Cornell University; M.A., Yale University; Ph.D., University of California, Berkeley.

HOWARD GOLDBLATT, Professor of Chinese, B.A., Long Beach State College; M.A., San Francisco State University; Ph.D., Indiana University.

JOYCE WONG KROLL, Instructor in Chinese, B.A., University of Michigan.

STEPHEN MILLER, Assistant Professor of Japanese, B.A., Ohio State University; M.A., Columbia University; Ph.D., University of California, Los Angeles.

YASUNO MORISHIMA, Instructor in Japanese, B.A., Keio University; Tokyo; M.A., University of Colorado, Boulder.

WILLIE T. NAGAI, Assistant Professor Emeritus.

MISAE NISHIKURA, Instructor in Japanese, B.A., George Mason University; M.M., University of Central Arkansas.

STEPHEN SNYDER, Assistant Professor of Japanese, B.A., Michigan State University; M.A., Columbia University; Ph.D., Yale University.

MADELINE K. SPRING, Associate Professor of Chinese, B.A., Antioch College; Ph.D., University of Washington.

KUMIKO TAKAHARA, Associate Professor of Japanese, B.A., M.A., University of the Sacred Heart; M.A., University of Edinburgh; Ph.D., University of London.

XIANG BING TANG, Assistant Professor of Chinese, B.A., Peking University; Ph.D., Duke University.

DONALD SIGURDSON WILLIS, Professor Emeritus.

Peace and Conflict Studies

GARY STAHL, Coordinator, PACS; Professor of Philosophy, B.A., Williams College; M.A., Brown University; Ph.D., Columbia University.

International and National Voluntary Service Training (INVST)

JAMES R. SCARRITT, Director, INVST; Professor of Political Science, A.B., Princeton University; Ph.D., Northwestern University.

JAMES V. DOWNTON, Acting Director, INVST (Fall 1993); Associate Professor of Sociology, B.A., M.A., Sacramento State College; Ph.D., University of California.

SCOTT J. MYERS-LIPTON, Assistant Director, INVST, B.A., University of San Diego; M.A., San Francisco State University.

Philosophy

JOHN ANDREW FISHER, Department Chair; Associate Professor, B.S., Physics, Ph.D., University of Minnesota.

HAZEL E. BARNES, Robert B. Hawkins Distinguished Professor of Humanities Emerita.

GEORGE BEALER, Professor, Ph.D., University of California, Berkeley.

LEONARD G. BOONIN, Professor, B.A., City College of New York; LL.B., New York University School of Law; M.A., New School for Social Research; Ph.D., Columbia University.

LUC BOVENS, Assistant Professor, L.L.S., Karlische Universiteit Leuven; M.A., Ph.D., University of Minnesota.

JOHN ROBB CARNES, Professor Emeritus.

CAROL E. CLELAND, Assistant Professor, B.A., University of California, Santa Barbara; Ph.D., Brown University.

LAWSON CROWE, Professor, A.B., Duke University; M.A., Ph.D., Columbia University.

NANCY E. DAVIS, Associate Professor, B.A., Ph.D., University of California, Berkeley.

JAMES PATerson FRANK, Professor Emeritus.

ROBERT HANNA, Assistant Professor, B.A., University of Texas; M.A., The Catholic University of America; Ph.D., Yale University.

DAVID HAWKINS, Distinguished Professor Emeritus.

ALISON M. JAGGAR, Professor, B.A., University of London; M.Litt., University of Edinburgh; Ph.D., State University of New York at Buffalo.

DALE W. JAMESON, Associate Professor, B.A., San Francisco State University; M.A., Ph.D., University of North Carolina.
PHYLIS KENEVAN, Associate Professor, B.A., M.A., University of Minnesota; Ph.D., Northwestern University.

JAMES P. KIMBLE, JR., Professor, B.A., M.A., Ph.D., University of Texas.

STEPHEN LEEDS, Associate Professor, A.B., Harvard College; Ph.D., Massachusetts Institute of Technology.

EDWARD J. MACHLE, Professor Emeritus.

ED L. MILLER, Professor, B.A., M.A., Ph.D., University of Southern California; Dr. Theol., University of Basel.

PAUL JOHN WILLIAM MILLER, Professor Emeritus.

CLAUDIA MILLS, Assistant Professor, B.A., Wellesley College; Ph.D., Princeton University.

WESLEY-MORRISTON, Associate Professor, B.A., Queen’s University of Belfast (Ireland); Ph.D., Northwestern University.

JOHN OGDEN NELSON, Professor Emeritus.

JAMES W. NICKEL, Professor, B.A., Tabor College; Ph.D., University of Kansas.

ROBERT ROGERS, Professor, B.A., M.A., Ph.D., University of California, Berkeley.

WILLIAM SACKSTEIDER, Professor Emeritus.

CHRISTOPHER J. SHIELDS, Assistant Professor, B.A., M.A., Bowling Green State University; Ph.D., Cornell University.

HOWARD E. SMOKEY, Professor, B.A., Rutgers University; M.A., Ph.D., Columbia University.

GARY STAHL, Professor, B.S., Williams College; M.A., Brown University; Ph.D., Columbia University.

MICHAEL TOOLEY, Professor, B.A., University of Toronto; Ph.D., Princeton University.

FORREST WILLIAMS, Professor, B.S., M.A., Ph.D., Northwestern University.

PAUL BEALE, Associate Professor, B.S., University of North Carolina; Ph.D., Cornell University.

PETER BENDER, Professor Adjunct, B.S., Rutgers University; M.A., Ph.D., Princeton University.

WESLEY E. BRITTIN, Professor Emeritus.

JOHN R. CARY, Professor (Joint with Department of Astrophysical, Planetary, and Atmospheric Sciences), B.A., University of California, Irvine; M.A., Ph.D., University of California, Berkeley.

DAVID H. CHRISTENSEN, Lecturer, B.Sc. and M.S., Florida State University; Ph.D., University of Colorado at Boulder.

NOEL A. CLARK, Professor, B.S., M.S., John Carroll University; Ph.D., Massachusetts Institute of Technology.

JOHN COOPER, Professor, B.A., M.A., Cambridge University; Ph.D., University of London.

ERIC A. CORNELL, Assistant Professor Adjunct, B.Sc., Stanford, Ph.D., MIT.

JOHN P. CUMALAT, Professor, B.A., M.A., Ph.D., University of California, Santa Barbara.

SENNARTH P. DE ALWIS, Assistant Professor, B.Sc., University of London; Ph.D., University of Cambridge.

THOMAS A. DEGRAND, Professor, B.S., University of Tennessee; Ph.D., Massachusetts Institute of Technology.

JOANN T. DENNETT, Lecturer, B.S., Northern University; M.S., Columbia University; Ph.D., University of Colorado.

KENNETH DOUGLAS, Lecturer, B.A., M.S., University of Chicago; Ph.D., University of Colorado.

BERTRAM W. DOWNS, JR., Professor, B.S., California Institute of Technology; M.S., University of Minnesota; Ph.D., Stanford University.

JOSEPH DRITTLIN, Professor, B.S., Manhattan College; M.S., University of Chicago; Ph.D., Washington University, St. Louis.

GORDON DUNN, Professor Adjunct, B.S., University of Washington.

KENNETH M. EVANSO, Lecturer, B.S., Montana State University; M.S., B.S., Oregon State University.

JAMES FALLER, Professor Adjunct, A.B., Indiana University; M.A., Ph.D., Princeton University.

WILLIAM T. FORD, Professor, B.A., Carleton College; Ph.D., Princeton University.

ALLAN DAVID FRANKLIN, Professor, A.B., Columbia College; Ph.D., Cornell University.

DOUGLAS L. FRANZEN, Lecturer, B.S., M.S., Ph.D., University of Minnesota.

ALAN C. GALLAGHER, Lecturer, B.S., Purdue University; Ph.D., Columbia University.

ROY HENRY GARSTANG, Professor (Joint Department of Astrophysical, Planetary, and Atmospheric Sciences), B.A., M.A., Ph.D., Sc.D., Cambridge University.

SIDNEY GELTMAN, Professor Adjunct, B.S., M.S., Ph.D., Yale University.

SARAH L. GILBERT, Lecturer, B.S., University of Hawaii; Ph.D., University of Michigan.

MATTHEW A. GLASER, Lecturer, B.S., Michigan State University; M.S., University of Nevada, Reno; Ph.D., University of Colorado at Boulder.

RONALD B. GOLDFARF, Lecturer, B.A., M.A., Rice University; M.A., Ph.D., Colorado State University.

MARTIN V. GOODMAN, Professor (Joint Department of Astrophysical, Planetary, and Atmospheric Sciences), B.A., Princeton University; M.S., Ph.D., Harvard University.

CHRIS H. GREENE, Professor, B.S., University of Nebraska; M.S., Ph.D., University of Chicago.

JOHN L. HALL, Lecturer, B.S., M.S., Ph.D., Carnegie Institute of Technology.

MARK A. HANSCHE, Lecturer, B.A., Ph.D., University of Colorado.

DANNY J. HARVEY, Lecturer, B.S., Virginia Polytechnic Institute; Ph.D., University of Colorado.

ANNA HASENFRATZ, Associate Professor, M.S., Ph.D., L. Eotvos University, Budapest.

CARL A. HELMS, Lecturer, B.A., David Lipscomb College; Ph.D., University of Colorado.

ALLEN M. HEMMANN, Professor, B.S., Loyola University; M.S., Notre Dame University; Ph.D., Texas A & M.

LEO HOLLBERG, Lecturer, B.S., Stanford University; Ph.D., University of Colorado.

CARL IIDDINGS, Professor, B.S., Harvard College; Ph.D., California Institute of Technology.

AZMI PHILLIP IMAD, Lecturer, B.S., American University of Beirut; M.Sc., University of London.

EDWARD R. KINNEY, Assistant Professor, S.B., Ph.D., Massachusetts Institute of Technology.

JACK K. KRAUSHAAR, Professor Emeritus.

PETER DALE KUNZ, Professor Emeritus.

STEPHEN R. LEONE, Professor, B.A., Northwestern University; Ph.D., University of California, Berkeley.

JUDAH LEVINE, Professor Adjunct, A.B., Yeshiva College; M.S., Ph.D., New York University.

DAVID A. LIND, Professor Emeritus.

JEFFREY LINSKY, Lecturer, B.S., Massachusetts Institute of Technology; A.M., Ph.D., Harvard University.

WILLIAM F. LOVE, Professor Emeritus.

K.T. MAHANTYAPPA, Professor, B.Sc., Central College at Bangalore; M.Sc., Delhi University; Ph.D., Harvard University.

RAINER M. MALZBENDER, Lecturer, A.B., Princeton University; Ph.D., University of Colorado at Boulder.

JOHN M. MARTINIS, Lecturer, B.A., Ph.D., University of California, Berkeley.
STEPHEN J. SMITH, Professor Adjoint, B.A., Kalamazoo College; M.A., Ph.D., Harvard University.

RUDMAN SMYTHE, Professor, B.S., M.S., Ph.D., California Institute of Technology.

RAUL A. STERN, Professor (Joint with Department of Astrophysical, Planetary, and Atmospheric Sciences), B.S., University of Wisconsin; Ph.D., University of California, Berkeley.

JOHN R. TAYLOR, Professor, B.A., Cambridge University; Ph.D., University of California, Berkeley.

JOHN M. WAHR, Professor, B.S., University of Michigan; M.S., Ph.D., University of Colorado.

CARL E. WELER, Professor, B.S., Massachusetts Institute of Technology; Ph.D., Stanford University.

WALTER WYSS, Professor, Dipl. Phys. Dr. Sc. NAT, ETH, University of Zurich (Switzerland).

CHRIS ZAFIRATOS, Vice President for Academic Affairs; Professor, B.S., Lewis and Clark College; Ph.D., University of Washington.

PETER A. ZOLLER, Professor, Ph.D., University of Innsbruck, Austria.

Political Science

CALVIN C. JILLSON, Department Chair; Associate Professor, B.S., Oregon State University; M.A., Ph.D., University of Maryland.

LESLIE E. ANDERSON, Assistant Professor, B.A., Bowdoin College; M.A., M.P.H., Ph.D., University of Michigan.

FRANCIS A. BEER, Professor, A.B., Harvard College; M.A., Ph.D., University of California, Berkeley.

RONALD D. BRUNNER, Professor, B.A., Yale University.

SIMONE E. CHAMBERS, Assistant Professor, B.A., McGill University; M.A., Ph.D., Columbia University.

STEVE CHAN, Professor, B.A., Tulane University; M.A., Ph.D., University of Minnesota.

CLAUDIO CIOffi-REULLA, Associate Professor, B.A., Instituto Patria (Mexico City); Doctoral Laureate (University of Florence); Ph.D., State University of New York.

SUSAN E. CLARKE, Associate Professor, B.A., California State College at Fullerton; M.A., University of Southern California; Ph.D., University of North Carolina.

GEORGE A. CODDING, JR., Professor, B.A., University of Washington; Docteur es Sciences Politiques, University of Geneva (Switzerland).

ANNE N. COSTAIN, Associate Professor, A.B., Brown University; M.A., Ph.D., Johns Hopkins University.

LAWRENCE C. DODD, Professor, B.A., University of Minnesota.

DENNIS R. ECKART, Associate Professor, A.B., M.A., University of California, Davis; Ph.D., University of California, Los Angeles.

J. SAMUEL FITCH, Associate Professor, B.A., Randolph-Macon College; M.A., M.P.H., Ph.D., Yale University.

HENRY F. GOODNOW, Professor Emeritus.

EDWARD D. GREENBERG, Professor, B.A., M.A., Miami University (Ohio); Ph.D., University of Wisconsin.

RODNEY E. HERS, Associate Professor, B.S., Florida State University; M.A., Ph.D., Purdue University.

JEFFREY KOPSTEIN, Assistant Professor, B.A., M.A., Ph.D., University of California, Berkeley.

ZDENEK KRYSTUFER, Professor Emeritus.

CHARLES LESTER, Assistant Professor, B.A., Columbia College; J.D., Ph.D., University of California, Berkeley.

MARK LICHBAO, Associate Professor, B.A., University of New York; M.A., Brown University; Ph.D., Northwestern University.

DAVID R. MAPEL, Associate Professor, B.A., Colorado College; M.Sc., London School of Economics; M.A., Ph.D., Johns Hopkins University.

MANNING MARABLE, Professor, A.B., Earlham College; M.A., University of Wisconsin; Ph.D., University of Maryland.

CURTIS W. MARTIN, Professor Emeritus.

CONRAD L. McBRIDE, Professor Emeritus.

JOHN P. McIVER, Associate Professor, A.B., Cornell University; M.A., Ph.D., Indiana University.

HORST MEWES, Associate Professor, B.A., Beloit College; M.A., Ph.D., University of Chicago.

T. J. PEMPPEL, Professor, B.A., M.A., Ph.D., Columbia University.

RICHARD H. PFANN, Professor Emeritus.

EDWARD J. ROZEK, Professor Emeritus.

WILLIAM SACHR, Professor, A.B., M.A., City College of New York; Ph.D., Columbia University.

JAMES R. SCARRITT, Professor, A.B., Princeton University; Ph.D., Northwestern.

W. A. E. SKURSNIK, Professor, A.B., M.A., Ph.D., University of Pennsylvania.

ROYAL DANIEL SLOAN, JR., Associate Professor, B.A., Washington State University; M.A., Ph.D., University of Chicago.

SVEK H. STEINMO, Assistant Professor, B.A., University of California, Santa Cruz; M.A., M.P.H., Ph.D., University of California, Berkeley.

WALTER J. STONE, Professor, B.A., University of San Francisco; M.A., University of Colorado; Ph.D., University of Michigan.

JACOB VAN EK, Professor Emeritus.

MICHAEL D. WARD, Professor, A.B., Indiana University; Ph.D., Northwestern University.

RICHARD B. WILSON, Professor Emeritus.

WILLIAM O. WINTER, Professor Emeritus.

KURT SCHLESINGER, Professor, B.A., M.A., Stanford University; Ph.D., University of California, Berkeley.
SETH K. SHAPAL, Professor Emeritus.
LOUISE SILVERN, Associate Professor, B.A., University of California, Berkeley; M.A., Ph.D., University of California, Los Angeles.
TIMOTHY SMOCK, Associate Professor, B.A., Reed College; Ph.D., University of California, San Francisco.
RONALD G. TAYLOR, Professor, B.S., Western Michigan University; M.A., Ph.D., Michigan State University.
DAVID R. THOMAS, Professor, B.A., Brooklyn College; Ph.D., Duke University.
THOMAS W. TOMLINSON, JR., Senior Instructor, B.A., North Carolina State University, Raleigh; M.A., Wake Forest University; Ph.D., University of North Carolina, Greensboro.
THEO. VOLSKY, JR., Executive Vice President; Professor, B.S., M.S., Kansas State University; Ph.D., University of Minnesota.
LINDA R. WATKINS, Assistant Professor, B.S., Virginia Polytechnic Institute and State University; Ph.D., Medical College of Virginia.
DONALD A. WEATHERLEY, Associate Professor, B.S., M.A., Northwestern University; Ph.D., Stanford University.
MICHAEL WERTHEIMER, Professor, B.A., Swarthmore College; M.A., Johns Hopkins University; Ph.D., Harvard University.
JAMES R. WILSON, Professor, A.B., Ph.D., University of California, Berkeley.

Religious Studies

LYNN ROSS-BRYANT, Department Chair; Associate Professor, B.A., Occidental College; M.A., Ph.D., University of Chicago.
DAVID CARRASCO, Professor, B.A., Western Maryland College; M.A., M.Th., Ph.D., University of Chicago.
IRA CHURLIS, Associate Professor, B.A., Rutgers College; M.A., Ph.D., Temple University.
VINE DELORIA, JR., Professor, B.S., Iowa State University; M.T.S., Lutheran School of Theology; J.D., University of Colorado.
FREDERICK M. DENNY, Professor, A.B., College of William and Mary; B.D., Andover Newton Theological School; M.A., Ph.D., University of Chicago.
JULYNE E. DODSON, Associate Professor, B.S., M.A., Ph.D., University of California, Berkeley.
EDMUND T. GILDAY, Instructor. B.A., University of Wisconsin; M.A., University of British Columbia; Ph.D., University of Chicago.

SAM D. GILL, Professor. B.S., M.S., Wichita State University; M.A., Ph.D., University of Chicago.

DORIS WEBSTER HAVICE, Professor Emerita.

STEWARD HOOVER, Professor. A.B., McPherson College; M.A., Ph.D., Annenber School of Communications.

ROBERT C. LESTER, Professor. B.A., University of Montana; B.D., Yale Divinity School; M.A., Ph.D., Yale University.

ED L. MILLER, Professor (Joint with Philosophy). B.A., M.A., Ph.D., University of Southern California; Dr. Theol., University of Basel.

REGINALD A. RAY, Professor Adjunct. B.A., Williams College; Ph.D., University of Chicago.

RODNEY L. TAYLOR, Associate Dean of the Graduate School; Professor. B.A., University of Southern California; M.A., University of Washington; Ph.D., Columbia University.

Sociology

GARY T. MARX, Chair; Professor. B.A., University of California, Los Angeles; M.A., Ph.D., University of California, Berkeley.

JOYCE M. NIELSEN, Associate Chair; Associate Professor. B.A., University of Colorado; M.A., Ph.D., University of Washington.

E. MERLE ADAMS, Professor Emeritus.

PATRICIA A. ADLER, Assistant Professor. A.B., Washington University; M.A., Ph.D., University of California, San Diego.

OTOMAR J. BARTOS, Professor. B.A., M.A., University of Colorado; Ph.D., Yale University.

RAY P. CUIZZERT, Professor Emeritus.

JAMES V. DOWNTOWN, Associate Professor. B.A., M.A., Sacramento State College; Ph.D., University of California.

DELBERT S. ELLIOTT, Professor. B.A., Pomona College; M.A., Ph.D., University of Washington.

ELISA FACKEL, Assistant Professor. B.A., M.A., University of California, Berkeley; Ph.D., University of Santa Clara.

ESTEVAN T. FLORES, Assistant Professor. B.A., St. Mary’s University; M.A., University of Notre Dame; Ph.D., University of Texas.

MARSHALL L. GIMENEZ, Associate Professor. B.A., Montana State University; M.A., National University of Córdoba (Argentina); Ph.D., University of California, Los Angeles.

ROBERT C. HANSON, Professor Emeritus.

HOWARD HIGMAN, Professor Emeritus.

ROBERT M. HUNTER, Associate Professor. B.A., Ph.D., University of Colorado.

J. ROLF KJOLSETH, Associate Professor. B.A., Ph.D., University of Colorado.

THOMAS F. MAYER, Associate Professor. B.A., Oberlin College; Ph.D., Stanford University.

BLAINE E. MERCER, Professor Emeritus.

ELIZABETH W. MOEN, Associate Professor. B.S., Lenoir Rhyne College; Ph.D., Johns Hopkins University.

FRED PAMPEL, Professor. B.A., M.A., University of Illinois; Ph.D., University of Illinois, Urbana-Champaign.

LEONARD J. PERNOTO, Associate Professor. B.S., M.A., Fordham University; Ph.D., University of Chicago.

ROBERT M. REGOLI, Associate Professor. B.A., M.A., Ph.D., Washington State University.

GEORGE F. RIVERA, Jr., Associate Professor. B.A., M.A., University of Houston; Ph.D., State University of New York at Buffalo.

RICHARD G. ROGERS, Associate Professor. B.A., University of New Mexico; M.A., Ph.D., University of Texas.

EDWARD ROSE, Professor Emeritus.

JULES J. WANDERER, Professor. B.A., Ph.D., University of Colorado.

PAUL E. WEHR, Associate Professor. B.A., University of Connecticut; M.A., University of North Carolina; Ph.D., University of Pennsylvania.

KIRK WILLIAMS, Professor. B.A., Texas Christian University; Ph.D., University of Arizona.

Spanish and Portuguese

LUIS T. GONZALEZ-DUVAL, Department Chair; Professor. B.A., University of North Carolina; M.A., University of Massachusetts at Amherst; Ph.D., Five-College Cooperation Program; Amherst College, Hampshire College, Mount Holyoke College, Smith College, and University of Massachusetts at Amherst.

JULIO BAENA, Assistant Professor. Licenciatura, Universidad Católica Andrés Bello; M.S., Ph.D., Georgetown University.

YVONNE GUILLON BARRETT, Associate Professor Emeritus.

EMILIO BEJEL, Professor. B.A., University of Miami; M.A., Florida State University.

LEOPOLDO BERNUCCI, Associate Professor. B.A., University of São Paulo; M.A., Ph.D., University of Michigan, Ann Arbor.

JOHN G. COPLAND, Associate Professor Emeritus.

JOSE MANUEL del PINO, Assistant Professor. Licenciatura, Universidad de Málaga; M.A., Ph.D., Princeton University.

SALVADOR RODRIGUEZ del PINO, Associate Professor. B.A., California State University, Long Beach; M.A., University of California, Irvine; Ph.D., University of California, Santa Barbara.

JOSE DE ONIS, Professor Emeritus.

PETER ELMORE, Assistant Professor. Licenciatura, Pontificia Universidad Católica del Perú; Ph.D., University of Texas at Austin.

JOHN S. GEARY, Associate Professor. B.A., M.A., Ph.D., University of California, Berkeley.

WILLIAM J. GRUPP, Professor Emeritus.

ELLEN S. HAYNES, Senior Instructor. B.A., University of Oregon; B.S., Regis College; M.A., Portland State University; Ph.D., University of Colorado at Boulder.

ASUNCION HORNO DELGADO, Assistant Professor. Licenciatura, Universidad Complutense de Madrid; M.A., University of New Hampshire; Ph.D., University of Massachusetts at Amherst.

ISOLDE JORDAN, Lecturer. B.A., Friedrich-Wilhelms Universität; Ph.D., Université de Paris; Ph.D., University of Colorado.

CHARLES L. KING, Professor Emeritus.

RICO LANDREIRA, Professor. B.A., M.A., Arizona State University; Ph.D., Indiana University.

ANTHONY GIRARD LOZANO, Professor. B.A., Ph.D., University of Texas at Austin.

NINA L. MOLINARO, Assistant Professor. B.A., Scripps College; M.A., Ph.D., University of Kansas.

ISIDORO MONTIEL, Professor Emeritus.

LILLIAN FERNANDEZ DE ROBBIN, Senior Instructor. B.S., Rider College; M.A., Ph.D., University of Colorado at Boulder.

BERNICE UJICK, Professor Emerita.

RAYMOND L. WILLIAMS, Professor. B.A., Washington State University; M.A., Ph.D., University of Kansas.

Theatre and Dance

JAMES M. SYMONS, Department Chair, Professor. B.A., Illinois College; M.A., Southern Illinois University; Ph.D., Cornell University.

MARGARET LYNNE BECKER, Professor Emerita.

ROBERT J. BOYARD, Senior Instructor. B.S., Lehigh University; M.F.A., Dallas Theatre Center/Trinity University.

MARTIN T. COBIN, Professor Emeritus.

RICHARD DEVIN, Professor. B.A., University of Northern Iowa; M.F.A., Yale University.

NADA DIACHENKO, Dance Program Director; Associate Chair; Associate Professor. B.S., University of Maryland; M.A., New York University.

WILLIAM G. ELLIOTT, Instructor. B.A., Rice University; M.Mus., M.A., University of Colorado.

OLIVER GERLAND, Assistant Professor. B.A., Swarthmore College; Ph.D., Stanford University.

TOBY R. HANKIN, Associate Professor. B.A., Barnard College; M.A., Mills College.

CHARLOTTE YORK IREY, Professor Emerita.
SEAN R. KELLEY, Assistant Professor, B.S., University of Wisconsin; M.F.A., Purdue University.

RICHARD K. KEANE, Professor Emeritus.

BRUCE McINROY, Assistant Professor.

B.F.A., M.F.A., University of Iowa.

MARGARET LEE POTTS, Associate Professor. B.A., Occidental College; M.A., Ph.D., University of Southern California.

YVONNE SHAFER, Associate Professor. B.A., University of California, Santa Barbara; M.A., Ph.D., University of Iowa.

ROBERT J. SHANNON, Lecturer.

NANCY L. SPANIER, Professor. B.A., Middlebury College; M.A., Mills College.

LETTIA S. WILLIAMS, Instructor. B.S., Tuskegee Institute; M.S., Smith College.

University Writing Program

ELISSA S. GURALICK, Program Co-Director; Professor. A.B., A.M., University of Pennsylvania; M. Phil., Ph.D., Yale University.

PAUL M. LEVITT, Program Co-Director; Professor. B.A., M.A., University of Colorado; M.A., Ph.D., University of California, Los Angeles.

HARDY I. LONG FRANK, Senior Instructor. B.A., Wellesley College; M.A., University of Connecticut; Ph.D., University of Colorado.

NANCY D. MANN, Senior Instructor. B.A., Eckerd College; M.A., Ph.D., Stanford University.

ROLF NORGARD, Senior Instructor. B.A., M.A., Wesleyan University; Ph.D., Stanford University.

JOHN PIIRTO, Instructor. B.S., M.S., University of Wisconsin, Oshkosh; M.F.A., University of California, Irvine.

J. E. RIVERS, Professor. A.B., Davidson College; M.A., Ph.D., University of Oregon.

Women Studies

MARGIA C. WESKOTT, Director of Women Studies; Professor. B.A., Ursinus College; M.A., Ph.D., University of Pennsylvania.

DEBORAH L. FICK, Senior Instructor. B.B.A., Ohio University; M.A., Sonoma State University; Ph.D., University of Colorado.

JANET L. JACOBS, Assistant Professor. B.S., M.A., Ph.D., University of Colorado.

ALISON M. JAGGER, Professor of Women Studies and Philosophy. B.A., University of London; M.Litt., University of Edinburgh; Ph.D., State University of New York at Buffalo.

ANNE MARIE POIS, Instructor. B.A., State University of New York, Stony Brook; M.A., Ph.D., University of Colorado.
The College of Business and Administration and Graduate School of Business Administration serve the need for educating competent and responsible management personnel, for continued education of those already in such positions, and for research. The college was admitted to membership in the American Assembly of Collegiate Schools of Business in 1938.

Four degrees are awarded: the bachelor of science in business administration (B.S.), the master of science in business administration (M.S.), the master of business administration (M.B.A.), and the doctor of philosophy in business administration (Ph.D.).

The College of Business and Administration and Graduate School of Business Administration (collectively referred to as the college) are committed to maintaining high standards of academic excellence. The programs and curricula of the college are reviewed, changed, and enhanced as dictated by a rapidly advancing business environment.

The college has historically maintained close ties with the business community. The Dean's Advisory Council (DAC) is an effective advocate for the college, both inside the University and to the external community. As high-level executives, members of the DAC provide advice, counsel, and an outside perspective to the dean and his administration. Council members spearhead major parts of development programs, strengthen the college's network nationwide in business and political arenas, and provide significant input in curriculum design.

Each year, high-level executives come to the college to share their working-world experiences, their expertise, and often their reflections on life outside of business. Students enjoy the informal, personalized classroom presentations and the open-discussion environment created.

Visiting executives speak at classroom lectures as well as informal luncheons or after-hours meetings. Each holds office hours while at the college. Classroom conversations cover a range of subjects including what kind of courses students are taking, career planning, domestic and international marketing, risk taking, and corporate hiring procedures.

The faculty of the college is made up of men and women with a diverse range of expertise and research activities. Many maintain strong ties with the business community and bring a current business perspective to the classroom. A number of professors are frequently published, and are recognized nationwide as top researchers.

Business faculty members strive to deliver the most effective teaching in both management theory and "real world" business applications. Their experience and competence ensure a quality learning experience for the graduate business student.

Facilities and Research Activities

The Business Building is a total educational environment that houses several resources for the specific needs of business students. The facilities include personal computers, computer terminals, the William M. White Business Library, the Douglas H. Buck Electronic Media Center, organizational laboratories, a student lounge, all faculty and administrative offices, and the Business Research Division.

The White Library covers 14,500 square feet on the third floor of the college. It contains financial reference works, directories, looseleaf services, and corporate annual reports on microfiche for all companies on the New York and the American stock exchanges. Company reports are also available on Compact Disclosure, Compustat, and Lexis-Nexis. Bibliographic information is available on ABI-Inform, InfoTrac, the CARL system, and Lexis-Nexis.

The White Library has over 66,000 volumes, which include monographs and bound serials. Subscriptions to over 600 serials and access to 350 more are available on the Business Collection.

The Douglas H. Buck Electronic Media Center measures 1,000 square feet and is devoted to on-line resources and compact disk subscriptions such as InfoTrac, Compact Disclosure, PC Compustat, Lexis-Nexis, and some census material. These resources can be accessed by the center's 23 workstations as well as by the entire campus via the campus Ethernet.

The business library LAN is connected to the campus information network and all Internet resources are accessible. The White Library is part of the University of Colorado library system, which serves the entire campus with nearly two million volumes, an equal number of microforms, and 13,000 periodicals. The library system is also a regional depository for state, U.S. government, United Nations, and international documents.

The college houses three computer classrooms and a large microcomputer lab equipped with personal computers. All resources are connected to the campus Ethernet network and our file servers. Computing resources on the Boulder campus include several microcomputer labs, a VAX workstation lab, a DEC VAX/VMS cluster, a Sempex Symmetry 881 computer, and an Alliant FX-80/Concentrix computer.

BUSINESS RESEARCH DIVISION

Established in 1915, the Business Research Division was one of the earliest organized state service-oriented bureaus in the country. The division acts as a research arm of the college. Its primary functions are to provide business executives, city managers, planners, association executives, and others with information useful in the operation of their organizations: to compile, present, and interpret information on current business and economic developments in the state and nation; to make business and economic studies that contribute to the most efficient use of Colorado's resources; to encourage and assist faculty and students in research that will contribute to general knowledge in the areas of business, economics, and the related social sciences; to train students in research methodology; and to obtain and hold copyrights and to publish research results.

The Business Research Division has four centers—the Center for Recreation and Tourism Development, the Technology and Innovation Management Research Center, the Rocky Mountain Trade Adjustment Assistance Center, and the CU Business Advancement Center. Funding for center activities comes from various sources, including the college, the University, state agencies, the federal government, state and local business firms, and from the sale of research products and services.

Four general categories make up the research efforts of the division—state services, publications, contract research, and
faculty research. Research activities consist of theoretical and applied research, outreach and community service actions, and consulting support to small- and medium-sized businesses in Colorado.

Research results are distributed through a combination of presentations and seminars and a wide variety of pamphlets, reports, proceedings, and books. Through its annual Business Economic Outlook Forum and quarterly retail sales tax reports, the division provides basic business information concerning Colorado.

RESEARCH CENTERS

The Center for Recreation and Tourism Development is dedicated to research and program development in recreation and tourism throughout Colorado and the West. Faculty and students from the University and from universities across the country participate in funded research efforts that contribute to both technical and scholarly publications.

The center continues its original efforts to assist rural communities in recreation and tourism development. Additionally, the staff is developing a hospitality training model for Colorado, and providing technical assistance and training to public and private sector clients throughout the Rocky Mountain region. Ongoing research is being conducted on the social, environmental, and economic impacts of recreation and tourism development on community life.

The High Technology Management Research Center conducts research on issues related to managing high technology organizations. The center disseminates innovative research nationally and internationally through publications and conferences. Additional roles include developing corporate sponsorship, assisting faculty in the preparation of research proposals, developing publications exchange, and developing a closer working relationship with other colleges and CU research centers.

The Rocky Mountain Trade Adjustment Assistance Center was established in 1978 along with nine other Trade Adjustment Assistance Centers. The purpose of these centers is to provide trade adjustment assistance, authorized by the Trade Act of 1974, to eligible trade-impacted firms.

Center professionals and private-sector consultants work with company management to review a firm's market and operations, and to develop and implement a strategic business plan. Consulting services are provided on a cost-shared basis. The federal government pays up to 75 percent of charges incurred.

The CU Business Advancement Center operates as an external outreach service to business and industry. The center delivers services in Colorado through three office locations: Boulder, Denver, and Colorado Springs.

The center offers specialized business consulting, federal procurement assistance, and computerized information retrieval and technology capabilities. CU-BAC also helps small research and development firms compete for federal contracts through information, printed materials, and advice.

Career Opportunities

Graduates are prepared for positions in the following fields:

- Accounting—public, private, and governmental
- Advertising
- Banking and other financial institutions
- Corporate financial management
- Information systems
- International business
- Investments
- Marketing and sales management
- Personnel management
- Production management
- Real estate
- Recreation and tourism management
- Retailing
- Transportation

Others hold positions of responsibility in fields as diverse as business journalism, public relations, city planning, chamber of commerce and trade association management, college administration, and government.

Study Abroad

Study abroad programs are available for students who are interested in international business or in cultural experiences abroad. One such program is the London Seminar in International Finance and Business, a month-long program held each summer in the financial district of London. The seminar is open to juniors and seniors in the College of Business and Administration who have completed at least one course in international finance or international trade.

Student Organizations

Organizations that promote professional interests and provide recognition of scholastic attainment are listed below.

- AAS, Association of Accounting Students
- AIIESEC, international business association
- Beta Alpha Psi, national honorary and professional accounting society
- Beta Gamma Sigma, national honorary scholastic society in business
- CUAMA; student chapter of the American Marketing Association
- CU Entrepreneurs Club
- CUFMA, CU Financial Management Association
- Delta Nu Alpha, honorary transportation society
- Delta Sigma Pi, professional business society
- Doctoral Business Student Association
- Graduate School of Business Association
- HSSA, Hispanic Business Student Association
- ISOU, Information Systems Organization
- Leadership Council
- Phi Chi Theta, professional business and economics society
- SAAM, Student Association of Management
- Sigma Iota Epsilon, professional and honorary management society
- Student Business Board
- Student Real Estate Association
- UCSPRA, University of Colorado Society for Personnel Administration (student chapter), for students interested in personnel or industrial relations
- Women in Business

Student Board

As the student governing body of the College of Business and Administration, the Student Board functions as a liaison between the students and the administration. The board helps formulate policies and represents students' interests in many different areas. Thirteen representatives are elected from the student body and serve for two semesters. Three board members, normally officers, are required to serve on the College of Business and Administration Academic Ethics Committee.

Graduation Recognition Ceremony

Every December and May, the Office of the Dean and the Student Board sponsor a recognition ceremony honoring the graduating class, in addition to the University-wide commencement. Graduates and their families are invited to attend.

ACADEMIC EXCELLENCE

Honors

Upon recommendation of the faculty, students who demonstrate superior scholarship are given special recognition at graduation. Students must achieve an overall grade point average of 3.30 and a grade point average of 3.50 in all business courses taken at the University of Colorado to be considered for cum laude.

Those who achieve an overall grade point average of 3.50 and a grade point average of 3.70 in all business courses taken at the University of Colorado will be considered for magna cum laude.

Students who achieve an overall grade point average of 3.80 and a grade point average of 3.85 in business courses and who
complete at least 60 credit hours at the University of Colorado at Boulder will be considered for summa cum laude.

Dean's List
Students in the College of Business and Administration who complete at least 12 semester hours of graded work in the fall or spring semester and earn a GPA of 3.50 or better on the Boulder campus (excluding continuing education) are included on the dean's list, which is posted outside the Office of Undergraduate Studies.

Master's-level students who have completed 9 semester hours of graded work during the fall or spring semester and earn a GPA of 3.75 or better on the Boulder campus are included on the Graduate Dean's list.

Beta Gamma Sigma
Membership in Beta Gamma Sigma is an honor that must be earned through outstanding scholastic achievement. Such membership is the highest scholastic honor that a student in a school of business or management can attain.

To be eligible for Beta Gamma Sigma membership, students must rank in the top 5 percent of their junior class, the top 10 percent of their senior class, or be among the top 20 percent of those students receiving master's degrees. Also, students completing all requirements for the doctoral degree conferred by a business school are eligible for Beta Gamma Sigma. It should be noted that Beta Gamma Sigma chapters may be chartered only in those schools of business and management accredited by the American Assembly of Collegiate Schools of Business.

Scholarships
Each year the college awards a number of divisional and general scholarships. Generally, business scholarships are for students who have completed business course work at the University. The amount and number of the awards vary each year. For additional information, students may contact the Office of Undergraduate or Graduate Studies.

ACADEMIC STANDARDS

Academic Ethics
Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery or falsification of official records, and similar acts or the attempt to engage in such acts are grounds for suspension or expulsion from the University. Any reported act of academic dishonesty may be referred to the College of Business and Administration Academic Ethics Committee at the discretion of the associate dean, a member of the instructional staff, or other appropriate University representative.

In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as the student's own. It is recommended that students consult with their instructors as to the proper preparation of reports, papers, etc., in order to avoid this and similar offenses. Official college procedures concerning academic ethics are maintained in the Office of Undergraduate Studies.

Students entering the M.B.A. program are required to adhere to the ethical behavior and honor codes established by the student body.

Standards of Performance
Students are held to basic standards of performance with respect to attendance, active participation in course work, promptness in completion of assignments, correct English usage both in writing and in speech, accuracy in calculations, and general quality of scholastic workmanship.

In general, examinations are required in all courses and for all students, including seniors.

To be in good standing, students must have an overall grade point average of C (2.00) or better for all course work taken, and a 2.00 or better for all business courses taken. This requirement applies to work taken at all University campuses. Physical education activity courses and remedial course work are not included in the overall grade point average.

Any student earning all failing grades or no academic credit for a semester is not permitted to register without the dean's approval.

Official double-degree students are required to maintain the same standards of performance as College of Business and Administration students in order to continue in their program.

When semester grades become available, students below the acceptable standard are placed on probation or suspension. Students are responsible for being aware of their academic status at all times. College rules governing probation and suspension are listed below.

Probation. Any student whose cumulative grade point average or cumulative business grade point average is less than 2.00 will be placed on probation immediately. A student may be removed from probation when the cumulative grade point average and the cumulative business grade point average have been raised to 2.00.

A student may remain on probation for up to four terms as long as the student maintains normal degree progress each semester as determined by the college and obtains no grade below a C.

Note: Students may be on probation a maximum of four terms during their entire academic career at the College of Business and Administration, regardless of whether or not the probationary terms are consecutive. Summer is considered a term. Therefore, failure to meet probationary provisions results in suspension.

Suspension. Suspended students may attend summer session at any campus of the University of Colorado and/or take correspondence courses in order to improve their grade point average in the area of deficiency, but may not attend any division of the University during the regular (fall and spring) semesters, or take continuing education Boulder evening credit classes. A student who has been under suspension for one calendar year may apply for readmission to the College of Business and Administration. Generally, a suspended student must attend CU (at any campus) and remove all grade deficiencies before being considered for readmission for the regular academic year. If readmitted, admission will be on probationary status.

Students who make up their grades and desire to be readmitted must reapply to the University through the Office of Admissions. The Office of Undergraduate Studies does not guarantee admission for any term. Readmission is subject to enrollment limitations.

Students who have been suspended once and then readmitted by the College of Business and Administration will be permanently suspended if their overall grade point average, or business grade point average, again falls below a 2.00.

Any student who is placed on suspension more than once will be permanently suspended from the College of Business and Administration and may not attend any campus of the University of Colorado as a business student.

ADMISSION AND ENROLLMENT POLICIES
The academic policies, rules, and regulations of the college given below are in effect at the time this catalog is printed. All students are responsible for knowing and following the provisions set forth in this catalog. Any questions concerning these provisions are to be directed to the college office.
The college cannot assume responsibility for problems resulting from a student's failure to follow the policies stated in the catalog or from misadvice given by those outside the Office of Undergraduate Studies. Similarly, students are responsible for all deadlines, rules, and regulations stated in the Registration Handbook and Schedule of Courses. All rules and regulations are subject to change. Any questions should be directed to the Office of Undergraduate Studies, Business room 227, (303) 492-1807.

Admission to the Business Program
Prospective freshman students are encouraged to complete strong academic programs in high school. A minimum of four academic units should be completed each year with special emphasis given to writing, mathematics, and science skills. For a detailed explanation of the high school preparation desired, see the Undergraduate Admission section of this catalog.

Transfer students are expected to demonstrate proficiency in writing and mathematics. Prospective transfer students should complete courses equivalent to those taken by University of Colorado business freshman and sophomores. See the model degree program on page 222.

Intrauniversity Transfer
A large number of students admitted to the College of Business and Administration each year are intrauniversity transfers. An undergraduate student who is enrolled on the Boulder campus and who wishes to transfer to the College of Business and Administration may submit a completed intrauniversity transfer application to the college after completing at least 12 semester hours of specific graded course work at the University of Colorado. October 1 is the deadline for spring admission and March 1 for fall admission. No intrauniversity transfers are admitted during the summer term. The college will consider each application based upon the number of spaces available, the quality of the student's academic work, and the courses completed.

Diversity
In addition to grade point average requirements, hours taken, and nonbusiness course requirements completed, the college looks at other factors that contribute to diversity in the student body. Factors that will be considered as contributing to a more diverse student body are race and ethnic background; age; business experience; economic or physical handicaps; and unique situations.

Registration for Business Courses
Students may register only for those courses for which they have the stated prerequisites. Junior standing is required for all business courses numbered 3000-4999. Priority is given to students officially in the business program.

Administrative Drop
Instructors may recommend to the Office of Undergraduate Studies that students who fail to meet expected course attendance or prerequisites be dropped from their courses.

Attendance Regulations
Classroom attendance is left to the discretion of the instructor. Students are responsible for understanding each instructor's policy on attendance.

Students enrolled in one section of a business course who attend a different section will receive a final grade of F for nonattendance. Students attending classes for which they are not enrolled will not be added after the final schedule adjustment period is over.

Concurrent Registration
Concurrent registration is for graduating seniors who need to be enrolled on two campuses of the University of Colorado at the same time in order to fulfill graduation requirements.

Students enrolled in the College of Business and Administration or the Graduate School of Business and Administration may only exercise the concurrent registration option if they are in their graduating semester; students who are two semesters from graduating and cannot obtain a course necessary to complete a prerequisite sequence may also be allowed to use this option. The course must be required for graduation and must not be offered on the Boulder campus or the course must conflict with another required course in which the student is enrolled. Students from other colleges and schools who wish to take business courses must have the approval of the Boulder campus College of Business and Administration in addition to the approval of their own college or school before submitting the concurrent registration form.

Scholastic Load
The normal scholastic load of an undergraduate in the college is 15 semester hours, with a maximum of 18 hours during the fall and spring semesters. A maximum of 6 hours may be taken during a five-week summer term but not more than 12 hours total during the 10-week summer session.

Credit Policies
To receive credit, all courses must be listed on the student's official transcript by the Office of the Registrar. Credit is then evaluated by the College of Business and Administration to determine degree acceptability.

Courses completed at any University of Colorado campus are credited toward degree requirements, if appropriate to the degree program.

Cooperative Education Credit
No credit is given for work experience, internships, or cooperative education programs. See the model degree program curriculum notes for additional information concerning elective credit.

Correspondence Credit
No business courses can be taken by correspondence. All nonbusiness correspondence courses must have prior approval and be evaluated to determine their acceptability.

Credit by Examination
Advanced Placement (College Board). For students who make scores of 3, 4, or 5, college credit will be given where appropriate. See page 38 for a comprehensive chart on AP credit.

College-Level Examination Program (CLEP). College credit for approved CLEP subject examinations may be considered, providing the scores are at the 67th percentile or above. Specific information is available in the Office of the Dean.

CLEP credit is only appropriate for prebusiness requirements and nonbusiness electives. A maximum of 6 hours of credit in any one course area is allowed. CLEP may not be used in course areas where credit has already been allowed. General examinations are not acceptable.

Before a CLEP examination can be taken, students must have prior approval in writing by the Office of Undergraduate Studies.

No Credit
Because of enrollment limitations, business classes may not be taken on a no-credit basis.

ROTC Credit
Students who are enrolled in and complete the ROTC program may apply a maximum of 12 semester hours of advanced ROTC credit toward nonbusiness elective requirements and toward the 120-semester-hour total degree requirement for the B.S. degree in business administration. Students must be enrolled as official ROTC students in order to receive degree credit for ROTC courses. No credit toward degree requirements is granted for basic (freshman and sophomore) ROTC
courses. The ROTC advisor can provide more detailed information.

SPECIAL SOURCES OF CREDIT
The college reserves the right to accept or reject all special sources of credit which do not have prior approval of the dean. A maximum of 6 hours of theory courses in kinesiology, physical education, or dance can be accepted toward graduation.

Independent Study. Up to 6 hours of independent study and other nontraditional types of credit will be accepted as degree credit. Prior approval is required if the work is to be applied as degree credit. A maximum of 3 hours of this type of credit may be taken in any one semester. Normally, such classes as ROTC, certain teacher education classes, teaching methods, orientation, practica, and workshops are not acceptable. Classes such as music, band, choir, art, and arts and sciences (ARSC) courses might be counted as part of the 6 hours, providing prior approval is given. Failure to have all such courses approved prior to enrolling may result in loss of credit. For detailed information see the model degree program, curriculum note 5 (page 222).

Variable Credit. Junior or senior business students desiring to work beyond regular business course coverage may seek permission to take variable credit courses (1-3 semester hours) under the direction of an instructor who approves the project, but the student must have prior approval of the Office of Undergraduate Studies. A maximum of 3 hours may be taken in a semester.

To receive credit for independent study and experimental studies courses, students must obtain the dean’s approval prior to registering for the courses. Further information and forms are available in the Office of Undergraduate Studies.

STUDY ABROAD CREDIT
Transfer credit from study abroad programs is applied as business or nonbusiness elective credit. Students planning to attend study abroad programs must meet with an undergraduate advisor and have their course selections approved before leaving campus.

More specific information about these opportunities is available from the College of Business and Administration Office of Undergraduate Studies or from the Office of International Education.

TRANSFER CREDIT
The college reserves the right to disallow any credit that it deems inappropriate degree credit.

Credits in business subjects transferred from other institutions will be limited to the number of credit hours given for equivalent work in the regular offerings of the University. Only work from regionally accredited institutions will transfer to the college. The college will limit transfer credit for business courses taken at a lower-division level to such courses as the college offers at that level. A maximum of 60 semester hours of credit may be accepted from a two-year school.

Actual equivalent courses may be substituted for required courses. Students must submit a carefully checked catalog description and course syllabus for course equivalency determination, since a course given at another institution may have the same name and same textbook as a required business course and still be taught with a nonbusiness emphasis or other variations that give it little value for business.

Business students desiring to take work at another institution or another campus of the University of Colorado and apply the work toward the B.S. degree in business administration must have prior approval of the College of Business and Administration. Only elective credit is acceptable in transfer from other institutions once the student has enrolled in the college.

All courses in the area of emphasis (see page 223) must be taken at the University of Colorado at Boulder unless written approval is given by the associate dean of undergraduate studies. Transfer students must take a minimum of 30 hours of business courses in residence after admission to the college. For a detailed explanation of transfer credit, see the Undergraduate Admission section.

Grading Policies
In addition to the campuswide grading system and pass/fail policy listed in the University Policies, Programs, and Services section, the college enforces the following policies.

Pass/Fail. Students in the College of Business and Administration may not use courses taken on a pass/fail basis to satisfy required business or required nonbusiness courses, or business elective courses. Only nonbusiness electives may be taken on a pass/fail basis. A maximum of 16 hours of pass/fail credit may be applied toward the B.S. degree in business administration; transfer students may take 1 hour of pass/fail for every 8 hours successfully completed at this institution. Pass/fail determination must be made within the first two weeks of the semester and is irreversible. A maximum of 6 hours pass/fail may be taken in any one semester.

Failed Courses. Failed courses may be repeated, but the F will be included in the grade point average.

Incomplete Grades. The only incomplete grade given in the college is IF. An IF grade is given only when documented circumstances clearly beyond the student’s control prevent the student from completing the course. Generally, students should make up the missing work and not retake the entire course. Students should not register for the class a second time, and the work should be made up with the instructor giving the IF. All IF grades must be made up within one year, or the IF will be changed to a grade of F.

GRADE CHANGES
Final grades as reported by instructors are to be considered permanent and final. Grade changes will be considered only in cases of documented clerical errors, and must be approved by the associate dean.

Withdrawal
Students may withdraw at any time before the start of the final examination period. Students who withdraw during the semester are not assured admission the following semester but will be considered on an individual basis, if space is available.

UNDERGRADUATE DEGREE REQUIREMENTS

Knowledge and Abilities of Business Students
The following areas of knowledge are central to the undergraduate degree in business administration:

- knowledge of the basic business core that provides students with a comprehensive understanding of the basic functional areas of the discipline;
- knowledge in one or more areas of emphasis, in which students are exposed to in-depth study that provides them with the tools necessary to solve complex business problems;
- awareness of the interrelations between academic theory and practice in order for students to be fully equipped to make effective decisions under conditions of uncertainty;
- knowledge of basic communication skills, computer use, and the international environment in which business currently operates;
- knowledge of mathematics sufficient to facilitate the application of quantitative principles; and
- awareness of the importance of academic fields in the area of arts and sciences, with special emphasis placed on the study of economics, political science, and other related fields.
In addition, students completing a degree in business administration are expected to acquire:
• the ability to solve problems involving the application of basic business principles to new and recurring situations;
• the ability to conceptualize and analyze decision-making situations to facilitate solutions in an effective and timely manner; and
• the ability to communicate the results of problem-solving situations, both verbally and in writing.

Having acquired these skills and knowledge, students are able to conceptualize and analyze the concept of business and problem solving as a system. They have the ability to present solutions to business problems in an understandable and useful form. Their education provides them with excellent working knowledge, not only in the field of business, but in related academic disciplines as well.

Advising and Records
Business students receive academic counseling from a staff of advisors in the Office of Undergraduate Studies. During the semester, advisors are available Monday through Friday from 8:30 a.m. to 12 noon and 1:00 p.m. to 4:30 p.m. During registration periods, advisors are available to answer registration questions. Individual advising and scheduling are not possible during registration periods; they should be obtained instead throughout the semester.

Students may look at their individual progress sheet any time during advising hours, and a copy will be provided upon request. Students are expected to assume responsibility for planning their program in accordance with college rules and policies.

Students are encouraged to discuss the various emphases available as well as career opportunities with the faculty of the college.

Requirements for the B.S.
(Business Administration) Degree
The bachelor of science degree requires:
Total Credits. A minimum of 120 acceptable semester hours of credit as follows:

Either business or nonbusiness electives (Note 5): 9
Minimum to graduate: 120

Curriculum Notes
1. Recommended for freshmen, but due to space limitations may have to be taken during the sophomore year. No credit is given for UWRP 1050.
2. The following courses fulfill this requirement: COMM 1010, 2000, 2030, and 2240.
3. MATH modules 1080, 1090, and 1100, MATH 1300, APPM 1350, and APPM 1360 will fulfill the calculus requirement. No credit is given for college algebra.
4. Natural sciences include general college-level chemistry (not CHEM 1101), physics, biology, astronomy, geology, and earth science, ANTH 2010-2020 (Introduction to Physical Anthropology 1 and 2) and GEOG 1010-1011 (Environmental Systems 1 and 2) are also acceptable.
5. Elective credits should be selected carefully, as not all classes are acceptable. Generally, to be acceptable, electives must be taught by regular University of Colorado faculty, must have a form of assessment such as a term paper and/or examinations, and must be regular classroom-type courses. Course coverage must be college-level, must not be repetitious of other work applied toward the degree, must be academic as opposed to vocational or technical, and must be part of the regular University offerings.

Specifically, the college will accept:
a. a maximum of 6 hours of theory courses in kinesiology, physical education, or dance.
b. a maximum of 12 hours of advanced ROTC credit, providing the student is enrolled in the program and completes the total program, and
c. a maximum of 6 hours of approved independent study, choir, band, music lessons, and art lessons.

The college will not accept physical education activity, workshops, orientations, dance classes, teaching methods, practica, certain teacher education classes, and certain classes offered by the College of Arts and Sciences. The examples are not exclusive, but are intended to provide guidelines. The College of Business and Administration reserves the right to disallow any credit that it determines is not appropriate academic credit. For further information, contact the Office of Undergraduate Studies.

6. A minimum of 3 semester hours each of microeconomics and macroeconomics and introductory psychology is required. The additional hour earned in each of these courses will apply as nonbusiness elective credit.

7. Three hours selected from the following courses:
a. History course, 1000-4000 level
b. PSYC 2303 Psychology of Adjustment; PSYC 2456 Social Psychology of Social Problems; PSYC 2643 Child and Adolescent Psychology; PSYC 2700 Psychology of Contemporary American Women; PSYC 4406 Social
Psychology: PSYC 4456 Psychology of Personality

Psychology: PHIL 1000 Introduction to Philosophy; PHIL 1200 Philosophy and Society; PHIL 2200 Major Social Theories

SENIOR AUDIT

Prospective graduates must make an appointment with the Office of Undergraduate Studies and the Office of Career Development the semester before they plan to graduate to complete a senior audit. Students planning to graduate in May must complete a senior audit by the previous December 14. August graduates must complete a senior audit by the previous March 2; December graduates must complete a senior audit by the previous March 16. Failure to do so will delay graduation.

Also, students desiring to change their area of emphasis after the senior audit has been completed must have the change approved by the graduation advisor no later than the first week of class of their final semester. Changes after that time will delay graduation.

Double-Degree Programs

Numerous career opportunities exist for persons trained in both a specialized field and management. For this reason students may be interested in a double-degree program leading to completion of degree requirements concurrently in two fields. Such double-degree programs have been arranged for engineering, environmental design, journalism, and music, and may be arranged for other professional combinations as well.

The two programs of study proceed concurrently, terminating together with the awarding of two degrees. Normally, at least five years will be needed to complete a double-degree program. No substitutions are allowed in this program. A minimum of 150 semester hours is required for all double-degree programs.

Students desiring to transfer from double-degree programs to the College of Business and Administration must submit an application to the Office of Undergraduate Studies.

For students in double-degree programs, the requirements for the degree in business administration are as follows:

1. An application for admission to the double-degree program, which must be filed with the College of Business and Administration and approved by the deans of both colleges.

2. Completion of at least 51 semester hours in business and economics, to include ECON 2020 and 2010 (8 semester hours), required courses in business (30 semester hours), and a business area of emphasis (12 semester hours).

3. Completion of at least 30 of these semester hours at the University of Colorado while concurrently enrolled in the College of Business and Administration.

4. Completion of nonbusiness requirements in mathematics, communications, and the social and behavioral sciences in a degree program approved in advance by the College of Business and Administration. For some courses and areas of emphasis, there are prerequisite requirements which must also be met.

5. At least a 2.00 grade point average must be earned in all courses undertaken in the College of Business and Administration, the area of emphasis, and the University of Colorado.

6. Any double-degree student who does not make reasonable progress toward completing the business degree requirements, as determined by the College of Business and Administration, may be dropped from the program.

7. The number of students accepted in any double-degree program may be limited and is dependent upon space availability each semester.

The double-degree program in engineering and business is shown below. For other combinations, students must consult with the business dean's office.

B POL 4500 Cases and Concepts in Business Policy, or BPOL 4520 Small Business Strategy, Policy and Entrepreneurship | 3 |

Specified courses in an area of emphasis in one of the following fields: accounting, entrepreneurship and small business management, finance, information systems, international business, marketing, operations management, organizational management, personnel-human resource management, real estate, tourism and recreation, or transportation and distribution management. All work in the area of emphasis must be taken at the University of Colorado College of Business and Administration. Areas of emphasis (minimum) | 12 |

Total hours | 42 |

AREAS OF EMPHASIS

Each candidate for the bachelor of science degree must complete the prescribed courses in an area of emphasis comprising a minimum of 12 semester hours taken at the University of Colorado. A 2.00 grade point average is required for the required area courses.

Students desiring to accomplish the effect of a dual area of emphasis by careful selection of courses and use of elective hours for the second area.

Accounting

The principal areas of accounting study are financial accounting, managerial accounting, taxation, and auditing. The emphasis is designed to prepare students for careers in public accounting, business, nonprofit, and governmental organizations.

Course work in accounting conveys a comprehensive understanding of the theory and concepts that underlie accounting practice. Emphasis is placed on logical reasoning, which enables students to solve problems in accounting and to make sound accounting policy decisions.

In addition to training in accounting, a thorough knowledge of the social, legal, and political environment is essential. Good communication skills are indispensable to the professional accountant. Thus, course work in English composition, report writing, and speech is highly recommended.

The undergraduate area of emphasis in accounting consists of 27 hours in addition to ACCT 2000.

<table>
<thead>
<tr>
<th>Required Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 2310 Managerial Cost Accounting</td>
</tr>
<tr>
<td>ACCT 3220 Intermediate Financial</td>
</tr>
</tbody>
</table>
Accounting 1 ........................................... 3
ACCT 3230 Intermediate Financial Accounting ....... 3
ACCT 3320 Managerial Cost Accounting 2 ....... 3
ACCT 3410 Income Tax Accounting ........... 3
ACCT 4620 Auditing .................................. 3

Elective Courses
(9 hours chosen from among the following courses)
ACCT 4240 Advanced Financial Accounting .......... 3
ACCT 4420 Advanced Income Tax Accounting ........ 3
ACCT 4540 Accounting Systems and Data Processing .... 3
ACCT 4800 Accounting for Government and Nonprofit Organizations .... 3
BSLW 4120 Advanced Business Law .................. 3

Students usually take as many as two courses in accounting each semester in their junior and senior years to complete area of emphasis requirements. Students planning to take the CPA examination should consider Advanced Business Law (BSLW 4120) as an elective.

Students should consider continuing their education at the graduate level. An M.S. with a major or minor in accounting is available. Also, the M.S. in accounting with a concentration in taxation is available.

Entrepreneurship and Small Business Management
This course of study provides the understanding, knowledge, and skills for creating, organizing, and managing a new venture or small business. It emphasizes managerial aspects of the wide range of activities required of the entrepreneur.

A second area of emphasis in business is highly recommended. Course requirements for the second area can be included as part of business or nonbusiness electives.

Students must take BPOL 4520 (Small Business Strategy, Policy, and Entrepreneurship) when satisfying their business policy requirement. Additional courses in management, finance, accounting, and marketing should be planned in consultation with an advisor in order to serve individual career needs.

Required Courses
ESBM 4700 Entrepreneurship and Small Business Management ........... 3
FNCE 4570 New Venture Funding .......... 3
Two of the following four courses:
FNCE 4010 Business Finance 1 ....... 3
ACCT 3320 Managerial Cost Accounting 2 .... 3
PHRM 4400 Management of Human Resources .................. 3
BSLW 4120 Advanced Business Law .......... 3
FNCE 4410 International Business Seminar in Finance (Note 1) ........... 6

Recommended Electives
MKTG 3100 Personal Selling ........... 3
MKTG 3400 Marketing Institutions and Retailing .......... 3
MKTG 4650 Physical Distribution Management ............. 3
MKTG 4700 Sales Management .......... 3
MKTG 4800 Marketing Strategies and Policies ........ 3
OPMG 4400 Production and Inventory Planning and Control .... 3
TRMG 4500 Transportation Operation and Management ........... 3

Curriculum Note
1. Three hours will apply to the area of emphasis for Business and 3 hours will apply as business elective credit.
2. Not offered every semester.

Information Systems
The information systems area of emphasis prepares students for professional careers in information systems in business and government. Students develop the technical skills and organizational insights required to analyze, design, implement, and manage information systems. The degree focuses on systems for collecting, organizing, accessing, and analyzing information for planning and control.

Prerequisite Courses
INF5 2000 Business Information Systems and the Computer .......... 3
OPMG 2010 Business Statistics ........... 3
Courses in computer programming and/or data structures ........ minimum 6

Required Courses
INF5 4110 Computer and Information Technology .......... 3
INF5 4120 System Analysis and Design 1 .......... 3
INF5 4130 System Analysis and Design 2 .......... 3
INF5 4140 Logical Data Structures and Database Management Systems .................. 3

International Business
In recent years, companies have reoriented their thinking, planning, and operations to capitalize on the opportunities offered in the world marketplace. Every phase of business operation is affected by this reorientation, and individuals who offer the appropriate skills, training, and orientation are in demand.

The program reflects the basic principle that effectiveness in international business is based on a thorough training in business administration. The international business emphasis provides the opportunity to develop and to build on these skills.

Other courses emphasizing international affairs may be elected from the following departments: anthropology, economics, geography, history, political science, psychology, and sociology.

Students should take 6 hours of the required courses before enrolling in MKTG 4400.

Required Courses
ECN3 3403 International Economics and Policy ........... 3
Plus three of the following courses:
FNCE 4400 International Financial Management ........... 3
FNCE 4410 International Business Seminar in Finance (Note 1) ........... 6
MKTG 4100 International Marketing .......... 3
MKTG 4400 International Business Seminar ........... 3
TRMG 4580 International Transportation ....... 3
Curriculum Note
1. Three hours will apply to the area of emphasis and 3 hours will apply as business elective credit.

A second area of emphasis in business is highly recommended. The course requirements for the second area can be included as part of the business and nonbusiness elective hours. Foreign language study is also recommended.

It is important for students who expect to be involved in international business to have an understanding of international relations, which may be gained in a study abroad program. Information on study abroad programs may be obtained from the Office of International Education. The College of Business and Administration will evaluate credit earned in such programs and determine degree acceptability.

Marketing
The marketing emphasis prepares students for careers in such fields as advertising, selling and sales management, marketing research, retailing, wholesaling, industrial marketing, international marketing, marketing of services, and nonprofit marketing. Key concepts and methods of analysis in marketing focus on understanding the customer, identifying customer needs, guiding the development of products or services, planning and implementing ways to market products or services, securing the customer's order, and monitoring customer response in order to guide future activities. Marketing activities cut across tangible products, services, and ideas, across consumer and industrial marketplaces, and across local, regional, national, and international boundaries.

Required Courses

MKTG 3300 Marketing Research.............................3
Marketing electives (beyond MKTG 3000).........................9

Operations Management
The operations management area of emphasis is designed to prepare students for professional careers in production/operations management and to provide some background preparation for the related fields of operations research, management science, and business statistics. The importance of operations management can be seen in the recent resurgence of this field due, in part, to increased global competition in the manufacturing and service industries. The operations management program emphasizes current practices and the knowledge and skills required for entry-level jobs as well as for managerial advancement. The program addresses such timely and important topics as international productivity and competitiveness, total quality management, just-in-time management, operations strategy, product design and process selection, operations planning, capacity, scheduling, control, inventory management, purchasing and procurement, and the mathematical models and procedures necessary to support these activities.

Students whose major areas of emphasis are transportation management, international business, engineering, or information systems will find operations management 4000-level courses to be particularly well-suited to their course of study.

One of the recommended elective courses may be substituted for a required course if there is a schedule conflict, if the course is not available, or if a student demonstrates a career need for such a course. Such a substitution requires an advisor's written permission.

Required Courses

OPMG 4400 Japanese Business and Operations Management........................................3
OPMG 4440 Quality, Productivity, and Competitiveness.................................3
OPMG 4600 Purchasing and Materials Management...........................................3
OPMG 4470 Policy Analysis and Operations Strategy........................................3

Recommended Electives

Select from the following:

FNCE 4400 International Financial Management........................................3
MKTG 4100 International Marketing.........................................................3
MKTG 4400 International Business Seminar..............................................3
OPMG 3200 Intermediate Statistics........................................................3

TRMG 4580 International Transportation....................................................3
TRMG 4650 Physical Distribution............................................................3

Organization Management
Every organizational unit has a manager who is responsible for establishing goals and for planning, organizing, staffing, leading, and controlling the activities of that unit. Management and leadership opportunities exist in all organizations, large or small, and the challenge of getting things done through people excites the professional manager. Entry-level supervisory jobs emphasize technical competence while middle management requires greater interpersonal skills. Top-level management positions require greater conceptual abilities.

The organization management curriculum provides a foundation for careers in supervision and general management. Related areas of study are entrepreneurship and small business management and personnel/human resource management.

Required Courses

PHRM 4400 Management of Human Resources..............................................3
PHRM 4410 Labor and Employee Relations..................................................3
PHRM 4420 Employment Staffing and Development........................................3
PHRM 4430 Compensation and Benefits....................................................3

Recommended Electives

FNCE 4410 International Business Seminar in Finance (Note 1)..........................6
ORMG 3350 Managing Individuals and Work Groups......................................3
ORMG 4320 Managing Complex Organizations..............................................3
OPMG 3200 Intermediate Statistics........................................................3
OPMG 4440 Work Design, Measurement, and Productivity Management ................................ 3
ACCT 3320 Managerial Cost Accounting .................................................. 2-3
ECON 4616 Labor Economics ................................................................. 3
SOCY 4015 Theories of Conflict ............................................................ 3
SOCY 4025 Conflict Management in Social Systems ................................ 3
SOCY 4031 Social Psychology ............................................................. 3
PSYC 4406 Social Psychology ............................................................ 3
PSYC 4733 Principles of Psychological Testing ....................................... 4

Curriculum Note
1. Three hours apply to the area of emphasis and 3 hours will apply as business elective credit.

Real Estate
A career in real estate requires knowledge of real estate investments, urban land economics, real estate law, appraising, finance, taxes, management, sales, and accounting. Real estate is one segment of the economy where it is still possible for persons to be their own bosses whether they are brokers, appraisers, developers, property managers, consultants, or investors.

Required Courses Semester Hours
REAL 3000 Principles of Real Estate Practice ........................................... 3
REAL 4010 Real Estate Development or REAL 4330 Real Estate Investments ................................................................. 3
REAL 4300 Residential and Income Property Appraising ...................... 3
REAL 4540 Real Estate Finance ............................................................ 3
REAL 4730 Legal Aspects of Real Estate Transactions ............................ 3

Any student planning to sit for the Colorado sales or broker's examination should consult with the college's real estate advisor. Additional preparatory courses for a real estate career are:
ACCT 4410 Income Tax Accounting ..................................................... 3
COMM 1010 Public Speaking ................................................................ 3
COMM 3200 Principles and Practices of Argumentation .................... 3
ESBM 4700 Entrepreneurship and Small Business Management .......... 3
FNCE 4350 Investment and Portfolio Management ............................ 3
FNCE 4550 Financial Markets and Institutions .................................... 3
MKTG 3100 Personal Selling ............................................................... 3
MKTG 3200 Consumer Behavior ........................................................ 3
MKTG 3300 Marketing Research ......................................................... 3
MKTG 4700 Sales Management .......................................................... 3

Tourism Management
Tourism, including both business and pleasure travel, is one of the most rapidly growing industries in Colorado, the United States, and internationally. It is projected to be the largest industry in the world by the year 2000. The tourism management emphasis is designed to prepare students to take advantage of the opportunities pro-
vided by this growth, including the management and operation of tourism attractions, the various businesses that serve travelers, and the government organizations devoted to tourism industry development.

The tourism management emphasis combines academic and practical experiences. Students are encouraged to complete a professional internship with a tourism business, typically during the summer preceding their senior year.

As with other specialty areas of emphasis in the college, tourism management students are strongly encouraged to complete a second area of emphasis in business. Areas of particular value include marketing, entrepreneurship and small business management, international business, real estate, and transportation management.

Required Courses Semester Hours
TRMG 4520 Problems in Surface Transportation Management .................. 3
TRMG 4560 Air Transportation Management ........................................ 3
TRMG 4580 International Transportation Management ..................... 3
TRMG 4560 Physical Distribution ......................................................... 3
OPMG 4600 Purchasing and Materials Management ........................... 3

Recommended Electives
TRMG 4510 Survey of Transportation Law and Freight Claims Procedures ................................................................. 3
OPMG 4440 Quality, Productivity, and Competitiveness ..................... 3

GRADUATE DEGREE PROGRAMS

The Graduate School of Business Administration offers programs leading to the master of business administration (M.B.A.), master of science in business administration (M.S.), juris doctor/master of business administration (J.D./M.B.A.), and doctor of philosophy in business administration (Ph.D.) degrees. These programs are open to qualified individuals who hold a bachelor's degree from a regionally accredited college or university, or a recognized international university, without regard to their undergraduate major.

Master of Business Administration and Master of Science

Requirements for Admission
Admission to the master's programs will be determined by the following criteria:

1. The applicant's total academic record (the bachelor's degree must be from a regionally accredited college or university, or a recognized international university).

2. The applicant's scores on the Graduate Management Admission Test (GMAT). This test is given four times each year at numerous centers around the world. For information and to make application for the test, write to the Educational Testing Service, P.O. Box 6103, Princeton, NJ 08541-6103.

3. Two or more years of significant work experience are strongly preferred for M.B.A. applicants. M.B.A. applicants directly out of an undergraduate program should have had full-time work experience or military service before or in addition to their undergraduate program.

4. The application, GMAT scores, two official transcripts, a current resume, three letters of recommendation, and a nonrefundable application fee must be submitted. Personal interviews are required for M.B.A. applicants. A typed (or word-processed) essay of one to two pages is required of each prospective student. Individuals with a minimum of two to three years of work experience are encouraged to apply.
The address for graduate applications is:
Graduate School of Business Administration
Campus Box 419
University of Colorado at Boulder
Boulder, CO 80309-0419
(303) 492-1831 (general information)

DIVERSITY
The admissions committee reviews factors other than academic and personal accomplishments. Factors that contribute to student body diversity—race and ethnic background, age, business experience, and economic status—are strongly considered when reviewing applicants.

The Graduate School of Business Administration encourages qualified individuals to apply regardless of sex, race, religion, national origin, age or physical limitations.

REQUIREMENTS FOR DEGREES
Advising. All graduate students are required to check in with the M.B.A./M.S. advisor during the first semester of study to ascertain degree requirements.

Minimum Hours Required. Master of science in business administration students take a minimum of 30 semester hours of graduate credit in addition to any unfulfilled fundamental courses.

Entering master of business administration students take a prescribed sequence of classes in the first and second semesters of study. Thirteen credit hours of core courses are taken in the first semester and 15 hours of core courses the second semester. In the second year, students must take 9 hours of core courses and choose four elective courses in their major field of study, and select one additional 3-hour elective course. A minimum of 52 credit hours is needed to graduate.

Students accepted into the M.B.A. program are required to attend an orientation held during the week before classes begin. The agenda includes introductions in case methodology, study/time management techniques, computer lab diagnostic testing, faculty mentor/small group assignments, individual meetings, class meetings (including goal setting setting for the year and class officer elections), and campus and city tours. Additional group outdoor activities and a class banquet are also planned.

Transfer Work. The M.S. program accepts a maximum of 6 semester hours of graduate work from another AACSB-accredited master's program to be applied toward the requirements for the degree.

Comprehensive Examination. A comprehensive examination is not required for students in the M.B.A. program. Each candidate for a M.S. degree, however, is required to take a comprehensive final examination and/or defend a thesis during the final semester. The exam can be taken after course work is completed, and repeated once if failed, but the student must be registered as a candidate for degree. Written comprehensive examinations are given in October, November, April, and July.

Minimum Grade Point Average. A minimum cumulative grade point average of 3.00 must be achieved in course work taken after admission to the graduate program. If the cumulative grade point average falls below 3.00, a student is placed on academic probation and given one regular semester (summer terms excluded) in which to achieve the required 3.00 cumulative average. Failure to achieve the required average within the allotted time period may result in suspension.

Any grade below C is not a passing grade for graduate students. Students must repeat a course once for which they have received a grade below C. Both the original grade and the grade for the repeated course count in the computation of the grade point average.

To withdraw from a course and receive a grade of W, a student must be earning a passing grade in that course. Students normally will not be permitted to withdraw from courses after the sixth week of the semester. Students in the M.B.A. program may not withdraw from specified, lock-step course work.

An IP grade shall be a valid grade only until the middle of the second semester (summer terms excluded) following the semester in which the grade of IP is given. By the end of that interval, the instructor concerned shall have turned in a final grade of A, B, C, D, or F. If no reports are received from the instructor within the allotted time the IP shall be converted to an F.

Time Limit. All graduate courses and the comprehensive final examination should be completed within four years for M.S. students. M.B.A. students must complete their program in two years.

Master of Business Administration
The breadth of training that master of business administration graduates receive prepares them well to become high-level managers of resources and people in a challenging and evolving business environment. The targeted entering class size of 100 students (two sections of 50 students) creates a sense of community between students and faculty. Active student participation is encouraged at all levels, and the environment is one of interaction, integration, and cooperation.

The two-year, full-time program is rigorous and comprehensive, and demands student commitment. Entering classes begin each fall semester. The core curriculum provides a set of broad-based, integrative skills, rather than narrowly focused, highly specialized skills.

Core courses provide a sound foundation in both business management and analytical disciplines, a foundation that fosters continued career growth. In addition to core courses stressing key functional areas of business, students can choose electives specific to their chosen major. Each major addresses different goals, and all provide in-depth management study.

The case study method is used broadly across core courses, and common areas of study such as ethics, technology, communications, and international issues are spread throughout much of the curriculum. Students learn about management theory and its practical applications in "real world" situations. Lectures, seminars, team teaching, team study groups, guest lectures, and videotaped critique sessions are all approaches taken by the faculty to generate new ideas and allow student input.

MAJOR FIELDS
The following major fields of study are offered:

- Finance Major (four courses required)
- MBAF 6200 Advanced Corporate Finance
MBAF 6300 Applied Financial Management
MBAF 6330 Investment Management and Analysis
MBAF 6550 Financial Markets and Institutions
MBAF 6600 Special Topics in Finance

Marketing Major (four courses required)
MBAM 6050 Marketing Research
MBAM 6150 Marketing Field Project
MBAM 6200 International Marketing Management
MBAM 6300 Strategic Marketing Management
MBAM 6600 Special Topics in Marketing Management

Organization Management Major (four courses required)
MBAO 6200 Developing Leadership Skills
MBAO 6320 Designing and Managing Organizational Systems
MBAO 6400 Management of Human Resources
MBAO 6450 Management of Organizational Change
MBAO 6600 Special Topics in Organization Management

Technology and Innovation Management Major (four courses required)
MBAT 6100 Management of Technology and Innovation
MBAT 6200 Marketing of Technology and Innovation
MBAT 6300 Management of Information Technology
MBAT 6400 Modern Manufacturing Systems
MBAT 6600 Special Topics in Technology and Innovation Management

Self-Designed Major (four courses plus special topics required)
Must be approved—courses may be elected within or outside the Graduate School of Business Administration.

Double-Degree Program (J.D./M.B.A.)
The purpose of this double-degree program is to allow students admitted to both the School of Law and the Graduate School of Business Administration to obtain both the juris doctor (J.D.) and the master of business administration (M.B.A.) degrees in not more than four years of full-time study.

The program is designed to train students for careers in which business administration and law overlap. Only those students who are convinced that the combined studies are important to their career plans and who have the background to handle the rigorous and concentrated course of study should attempt the double-degree program.

Admission. To be eligible for the double J.D./M.B.A. degree program of the School of Law and the Graduate School of Business Administration, a student must apply separately to and be admitted by each of the two schools under their respective admission procedures and standards.

Students may elect the double-degree program at the time of initial application to both schools, or students enrolled in the applicable degree program of either school may, during their first year of study under the degree program of that school, apply for admission to the other school and elect to be enrolled under the program.

Course of Study. A student enrolled in the double-degree program may commence studies under the program in either the School of Law or the Graduate School of Business Administration. However, a student must take the first year of the juris doctor curriculum as a unit exclusively in the School of Law. Likewise, a student must take the first year of the M.B.A. curriculum as a unit exclusively in the Graduate School of Business Administration. After completing the first-year requirements in both programs, a student can take additional courses necessary to meet the requirements of the degree programs of the two schools.

No student in the double-degree program shall be allowed to take fewer than 9 semester hours or more than 16 semester hours during any term (excluding summer terms) without receiving the consent of the program advisor in each school in which courses are being taken.

Termination of Double-Degree Enrollment or of Good Standing. Students in the double-degree program who do not maintain the academic or ethical standards of either school may be terminated from the program. Students in good standing in one school, but not the other, may be allowed to continue in the school in which they are in good standing. However, students who do not complete the double-degree program will be required to meet the regular degree requirements (J.D. or M.B.A.) that were in effect when they entered the program for that degree.

For additional information concerning the double-degree program, see the program advisors in the School of Law and the Graduate School of Business Administration.

Master of Science in Business Administration
The master of science in business administration program provides students the opportunity to study a major field in depth and the option to declare a minor. Three major fields of study are offered—accounting, taxation, and information systems.

Master of science students take a minimum of 30 semester hours of graduate credit.

For detailed information concerning requirements and recommended programs for each of the major fields, students should consult the following professors:

Accounting: Professor Schatka
Information Systems: Professor Branch descendant of Accounting

Taxation: Professor Jackson

With the approval of the student's faculty advisor and the M.B.A./M.S. programs director, minor fields may be chosen from business areas or from other graduate departments.

Minimum Requirements
The minimum requirements for the M.S. degree, if all undergraduate requirements have been met, are as follows:

Accounting and taxation majors must complete a minimum of 30 semester hours of graduate-level course work. No thesis is required. All students must pass a written comprehensive examination during the last semester they are enrolled. Students may be required to complete an oral final comprehensive examination subsequent to their written examination.

Many states now require 150 semester hours for the Certified Public Accountant certificate. In response to this requirement, accounting and taxation programs offer a diverse selection of courses that prepare the student for high-level professional careers.

Information systems majors must complete 30 semester hours of course work and pass a written comprehensive exam. Under special circumstances and with advisor permission, a student may elect 24 hours of course work and 6 hours of written thesis with an oral defense. If a minor is declared, a minimum of 21 semester hours credit (including thesis) must be earned in the major field, and not fewer than three courses (normally 9 semester hours) must be completed in the minor field.

Accounting Major
The expanding role and increased level of technical knowledge expected of accountants make graduate study in accounting highly desirable. Courses offered for the accounting major prepare students for high-level professional careers in accounting. Degree requirements include 30 hours of course work and a comprehensive exam (no thesis).

The accounting major is designed to enhance an undergraduate degree in accounting or supplement a business degree with substantial course work in accounting. Students from other disciplines are encouraged to apply, but must make up prerequisites by enrolling in equivalent courses at the undergraduate or graduate level.

Taxation Major
With today's complex income tax laws, accounting professionals must have a spe-
cialized knowledge of taxation principles. The Graduate School of Business Administration and the University's School of Law jointly offer course work to complete the major in taxation. Degree requirements include 30 hours of course work and a comprehensive exam (no thesis).

The taxation major is designed to enhance an undergraduate degree in accounting or other majors that include intermediate and cost accounting and introductory taxation. Students may make up prerequisites by enrolling in equivalent courses at the undergraduate or graduate level.

INFORMATION SYSTEMS MAJOR

Organizations are increasingly dependent upon information systems for their administration, operations, sales, and service. Incorporating advanced information technology into business procedures requires in-depth knowledge of both business and technology. Degree requirements are 30 hours of course work and a passing grade in a written comprehensive exam. Under special circumstances and with advisor permission, a student may elect 24 hours of course work and 6 hours of written thesis with an oral defense.

Students from all disciplines, technical and non-technical, are encouraged to apply. Students may make up prerequisites by enrolling in equivalent courses at the undergraduate or graduate level.

Doctor of Philosophy in Business Administration

The Ph.D. program in the Graduate School of Business Administration provides the highest level of study. The ultimate goal of the business Ph.D. program is to develop students who can produce state-of-the-art research publishable in top academic journals, and to prepare students to perform as outstanding teachers in their fields of study.

Field requirements for the Ph.D. degree at the University of Colorado are broadly conceived and are designed to encourage study in cognate disciplines. Candidates' degree programs are prepared in detail after a careful review of their career objectives and a thorough appraisal of their preparation.

REQUIREMENTS FOR ADMISSION

To preserve the individualized character of the Ph.D. program and its quality, the number of candidates is limited, and candidates are admitted only after careful screening. Applicants must submit a nonrefundable fee with their application.

In reviewing applications, the following criteria are most important:

1. Each applicant's undergraduate and graduate academic record.

2. The applicant's scores on the Graduate Management Admission Test. For information and to make application for the test, write to the Educational Testing Service, P.O. Box 6995, Princeton, NJ 08541-6995.

3. Recommendations from three or more persons qualified to advise the committee concerning the applicant's capacity for doctoral study and research.

4. Information obtained from the applicant concerning his or her career objectives. Students are admitted for study in a specific area for doctoral work. The Ph.D. is a research-oriented degree program. Applicants should address explicitly their research interests and plans for the future.

5. The mailing address and telephone number of the school are:

   Graduate School of Business Administration
   Campus Box 419
   University of Colorado at Boulder
   Boulder, CO 80309-0419
   (303) 492-1831 (general information)

REQUIREMENTS FOR DEGREE

The newly accepted Ph.D. student should consult with the area doctoral advisor to develop a specific degree plan. Ideally the student's doctoral faculty committee, which works with the area doctoral advisor, should be decided upon by the end of the first semester. Each student's advisory committee shall include at least two members from the student's expected dissertation area. One faculty member, normally from the dissertation field, acts as chair.

The signatures of the area doctoral advisor and the Ph.D. program director are required on all degree plans and applications for candidacy for Ph.D. students.

Qualifying Examinations. These exams may be given prior to enrollment in the program, or during the first two months. These examinations are given in the student's major area for the purpose of ensuring the candidate's qualifications and needs in the program. The results of the examination will be used to advise and qualify the candidate for further work at the doctoral level.

Areas of Study. Students must become proficient in two or more fields of study, selected from the areas below:

1. One of the following fields in business, which must be the dissertation area: accounting finance information systems marketing operations management organization management strategy

2. One or more other fields, which may be in the above business fields or an approved and cognate field outside the Graduate School of Business Administration.

Core Courses:

1. Quantitative Analysis: a minimum of three courses. Several sequences are acceptable.

    Econometrics
    ECON 7088 Seminar: Quantitative Methods in Economics
    ECON 7618 Seminar: Intermediate Econometrics

    ECON 8828 Seminar: Econometrics 1
    ECON 8838 Seminar: Econometrics 2

    Psychology
    PSYC 5741 General Statistics
    PSYC 5751 General Statistics
    MKTG 7300 Multivariate Statistical Methods

2. Education

    EDUC 7316 Intermediate Statistical Methods
    EDUC 7326 Experimental Design and Analysis 1
    EDUC 7366 Experimental Design and Analysis 2
    MKTG 7300 Multivariate Statistical Methods

3. Each faculty and the area doctoral advisor will determine the appropriate sequence, depending on the background and academic objectives of the student. To meet unique needs, different sequences may be approved by the Ph.D. program director (to meet distinctive, individualized faculty and student program objectives).

4. Research Methods: a minimum of one course taught in the Graduate School of Business Administration. The course will be a combination of the philosophy of science and a survey of different research methods employed by researchers in graduate schools of business.

5. Either two graduate-level courses in economics or two graduate-level courses in the behavioral sciences.

Background, Prerequisites, and Deficiencies

1. Each student must have a background in mathematics at or beyond calculus.

2. Based on experience, background, and the discretion of the area faculty, the area doctoral advisor, and the Ph.D. program director, course work in the following areas may be required of the Ph.D. student: accounting economics (intermediate or graduate level microeconomics or macroeconomics) finance information systems marketing organizational management

Research Internship. Doctoral students are required to participate in a research internship under the direction of a faculty
member. The research internship is decided on with the student's advisory committee. At the end of the internship, a research paper is presented to the faculty member and is made available to all faculty members in the student's major field.

Credit by Transfer. Resident graduate work of high quality earned in another institution of approved standing is not accepted for application to the doctorate until after the student has established a satisfactory record of residence in the Graduate School. However, such credit must be transferred before the student applies to candidacy for the degree. Such transfer will not reduce the minimum residence requirement at this University, but it may reduce the amount of work to be done in formal courses.

Requests for transfer credit to be applied toward an advanced degree must be made on the form specified for this purpose and submitted to the Graduate School. The maximum amount of work that may be transferred to this University for the Ph.D. degree is 10 semester hours.

Residence. The minimum residence requirement is six semesters of scholarly work beyond the attainment of an acceptable bachelor's degree. As the word is used here, residence is not limited to or defined as mere attendance in campus classes. Residence may be earned for course work completed with distinction, for participation in seminars, and for scholarly research performed on campus or elsewhere under the auspices of the University of Colorado. Full-time employment outside the University is prohibited during this residency period.

Not more than two semesters of residence credit toward a Ph.D. degree may be allowed for an acceptable master's degree.

All students in the doctoral program are expected to be full-time students on the Boulder campus (at least during residency and prior to completing comprehensive examinations). Courses at the 6000 level or above are expected to be taken on the Boulder campus. Doctoral students are expected to be available to participate in colloquia and other informal academic discussions. One year of residency must include two consecutive academic semesters on the Boulder campus (not summer), the timing to be determined by the student's advisory committee.

Course Load. During each semester in an academic year, a student must carry a minimum course load of 8 semester hours. Each semester's work must include at least three courses on the Boulder campus. (This academic year normally satisfies two full semesters of residence credit.) During this academic year the student's total nonstudy work load of any kind, on campus or off campus, must not exceed half-time.

Time Limit. All work for the doctoral degree must be completed within six years from the first the term the student is enrolled in the doctoral program. However, all doctoral students are encouraged to complete their program in four years, which is possible with full-time effort and careful planning.

Minimum Grade Point Average. It is expected that high standards of academic excellence (a minimum grade point average of 3.30) will be maintained in all work undertaken; grades less than B- are not considered passing grades in the dissertation field or supporting fields.

To drop a course without discredit, a graduate student must be earning a grade of C or better in that course.

Admission to Degree Candidacy. A student must make formal application for admission to candidacy for the Ph.D. degree on forms supplied by the Office of Graduate Studies in the first month of the semester in which the comprehensive examination is to be attempted.

Comprehensive Examination. Each Ph.D. student must sit for a written and an oral comprehensive exam. These written and oral exams are to be evaluated as one continuous exam process.

Satisfactory completion of the written exam is a necessary condition for proceeding on to the oral exam. Each area will determine the required content, length, and standards of evaluation for the exam. The preferred pattern is to schedule comprehensive exams in October and April of each academic year.

The second field, when completed outside of the Graduate School of Business Administration, may be taken by an exam or other process used in that department. The department must provide a letter certifying that the Ph.D. student has completed the outside field requirement. A second field in the Graduate School of Business Administration will normally require a written exam.

Dissertation. A dissertation (thesis) based upon original investigation and showing mature scholarship and critical judgment, as well as competence in the use of methods and tools of research, must be written on a subject approved by the candidate's dissertation committee. The dissertation committee shall consist of at least three members, normally two from the dissertation field and one from the other field(s) of study. One member, normally from the dissertation field, will act as chair of the dissertation committee. Membership of the dissertation committee may be the same as, or different from, membership of the student's advisory committee.

A student must register for a total of 30 semester hours of doctoral dissertation credit with up to 10 credits in any one semester. The specific number must be approved by the student's advisor. Not more than 10 of these credits may be obtained before the semester the student takes the comprehensive examination.

Dissertation credit does not apply toward the 30 semester hours of required course work, and will not be included in calculating the student's grade point average.

One formally approved, printed or typewritten copy of the dissertation and two original abstracts must be filed in the Graduate School office at least two weeks before the date on which the degree is to be conferred. A second formally approved, printed or typewritten copy of the dissertation must be filed in the Office of Graduate Studies, Graduate School of Business Administration.

Final Examination. After the dissertation has been accepted by the dissertation committee, a final examination on the dissertation and related topics will be conducted. This examination will be wholly oral. The oral portion will be open to anyone. The examination will be conducted by a committee of at least five members and will consist of the candidate's dissertation committee.

COURSE DESCRIPTIONS

The following courses are offered in the College of Business and Administration and the Graduate School of Business Administration on the Boulder campus. This listing does not constitute a guarantee or contract that any particular course will be offered during a given term.

For current information on times, days, and instructors of courses, students should consult the Registration Handbook and Schedule of Courses issued at the beginning of each term.

Courses specific to the new M.B.A. program are listed at the end of these descriptions.

Courses numbered in the 1000s and 2000s are intended for lower-division students and those in the 3000s and 4000s for upper-division students. Courses numbered in the 5000s are primarily for graduate students, but in some cases may be open to qualified undergraduates. Courses at the 6000, 7000, and 8000 level are open only to graduate students.
Courses are organized by subject matter and are listed numerically by last digit (courses ending in the number "0" are listed before courses ending in "1," and so on). The number after the course number indicates the semester hours of credit that can be earned in the course.

Abbreviations used in the course descriptions are as follows:
- Prereq.—Prerequisite
- Coreq.—Corequisite
- Lab.—Laboratory
- Rec.—Recitation
- Lect.—Lecture

**Accounting**

**ACCT 4250-3. Financial Accounting Issues and Cases.** In-depth analysis of contemporary accounting issues, the development of accounting thought and principles, and critical review of generally accepted accounting principles. Prereq., ACCT 3220 or 6220 or equivalent. Same as ACCT 5250.

**ACCT 4420-3. Advanced Income Tax Accounting.** Continuation of ACCT 4410, with special emphasis on the income tax problems of partnerships and corporations. Prereq., ACCT 4410. Same as ACCT 5420.

**ACCT 4540-3. Accounting Systems and Data Processing.** Design and analysis of management information systems and automated data processing methods, with special emphasis on computers and the role of accounting in the management process. Prereq., 9 semester hours of accounting courses. Same as ACCT 5540.

**ACCT 4620-3. Auditing.** Generally accepted auditing standards, professional ethics, and auditing techniques. Stress authoritative pronouncements of the AICPA. Prereq., ACCT 3230 or 6220.

**ACCT 4800-3. Accounting for Government and Nonprofit Organizations.** Planning and control of government and nonprofit organizations. Includes program budgets, responsibility accounting, and fund accounting. Prereq., ACCT 2000 or 5010 or equivalent.

**ACCT 4810-3. Honors Seminar: Business 1.** Social responsibilities of the business executive, business ethics, business-government relations, and business in literature. Open to seniors who have completed at least 30 hours of business courses with a GPA of not less than 3.30 and who have received instructor consent.

**ACCT 4900-variable credit. Independent Study.** Students must have prior consent of the dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors. Departmental form required.

**ACCT 5010-3. Financial Accounting.** Provides basic understanding of financial accounting and financial statements. Open only to graduate degree candidates.

**ACCT 5240-3. Advanced Financial Accounting.** Same as ACCT 4240.

**ACCT 5330-3. Managerial Accounting Issues and Cases.** Same as ACCT 4330.

**ACCT 5420-3. Advanced Income Tax Accounting.** Same as ACCT 4420.

**ACCT 5540-3. Accounting Systems and Data Processing.** Same as ACCT 4540.

**ACCT 6200-3. Administrative Controls.** Accounting concepts and techniques of analysis for management planning, control, and decision making. Prereq., ACCT 5010, OPMG 5020, and FNCE 5050, or equivalents. Open only to graduate degree students.

**ACCT 6220-5. Financial Accounting Concepts and Practice.** An in-depth study of the concepts underlying contemporary financial accounting practice. Topics include the history, environment, and process of standard setting, competing theories of accounting, and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3320 or equivalents may not receive credit for ACCT 6220. Prereq., ACCT 5010 or equivalent.

**ACCT 6250-3. Seminar: Accounting Theory.** Nature and origin of accounting theory and the development of postulates, principles, and practices. Methodology appropriate to development and evaluation of accounting theory, with special emphasis on accepted research standards and procedures. Prereq., ACCT 3230 or 6220 or equivalent.

**ACCT 6260-3. Seminar: Managerial Accounting.** In-depth exploration of the broad professional field of managerial accounting, especially as related to organizational decision making, planning, and control. Analyzes development and current problems of the managerial accounting function. Prereq., ACCT 2000, 3210, 3220, 3230, and 3320, or equivalents, or instructor consent.

**ACCT 6270-3. Seminar: Income Determination.** Critical analysis of problems and theory of measurement and reporting of periodic net income of business organizations. Net income models, research efforts, and role of professional accounting organizations. Gives special attention to current issues and problems. Prereq., ACCT 3230 or ACCT 6220 or equivalent, or instructor consent.

**ACCT 6350-3. Current Issues in Professional Accounting.** In-depth analysis of current issues in the accounting profession, including ethics, development and validity of standards, and regulation. Prereq., ACCT 6250 or instructor consent.

**ACCT 6420-3. Research Problems in Income Tax Accounting.** Study and application of the methodology used in tax research and in tax planning, with a goal of developing tax research and writing skills. Prereq., ACCT 4410, or instructor consent.

**ACCT 6430-3. Taxation of Partnerships and S Corporations.** Examines in depth the taxation of partnerships, S corporations, and the owners of these entities. Covers partnership formation and operation, sale or exchange of partnership interests, distribution of partnership property, partners' deaths or retirements, and tax shelters, with special emphasis on entity choice. Prereq., ACCT 4410 or equivalent, or instructor consent.

**ACCT 6440-3. Tax Policy.** Research seminar exploring policy issues of taxation. Areas reviewed include recent legislative proposals on tax simplification, and consumption taxes. Students are expected to prepare a publishable research paper on a tax policy topic mutually agreed upon with the instructor. Prereq., ACCT 4410 or equivalent, or instructor consent.

**ACCT 6450-3. Taxation of Corporations.** Examines the taxation of corporations and their shareholders. Covers corporate formation and operation, distributions to shareholders, stock redemptions, liquidations, reorganizations, and penalty provisions. Prereq., admission to the graduate tax program and ACCT 4410 or equivalent, or instructor consent.

**ACCT 6500-variable credit. Special Topics in Taxation.** Covers a diverse array of issues in taxation. Designed to highlight areas of particular current interest and to draw on strengths of leading outside authorities as guest lecturers in various topic areas. Prereq., ACCT 6420.

**ACCT 6620-3. Advanced Auditing Theory.** Contemporary issues, historical developments, and in-depth study of selected topics pertinent to
independent audits by certified public accountants. Emphasizes critical analysis of current standards and practices. Prereqs., ACCT 4620 or equivalent.

ACCT 6700-4. Income Taxation. See LAWS 6007.

ACCT 6730-3. Real Estate Planning. See LAWS 7024.

ACCT 6750-3. Taxation of Natural Resources. See LAWS 7307.

ACCT 6820-variable credit. Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in accounting. Prereq., varies.

ACCT 6900-variable credit. Independent Study. Student must have consent of instructor under whose direction the study is taken. Departmental form required.

ACCT 6940-variable credit. Master's Candidate. Departmental form required.

ACCT 6950 (4-6). Master's Thesis.

ACCT 7300-3. Doctoral Seminar: Accounting Research 1. Examination and evaluation of current theories, issues, and problems relating to accounting. Primary emphasis on accounting theory and research. Open only to doctoral students. Prereqs., ACCT 6250 and 6260 or equivalent, or instructor consent.

ACCT 7830-3. Doctoral Seminar: Dissertation Research. Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Gives special attention to development of thesis topics.

ACCT 8820-variable credit. Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in accounting. Prereq., varies.

ACCT 8900-variable credit. Independent Study. Instructor's consent and departmental form required (taught as doctoral seminar).

ACCT 8990 (1-10). Doctoral Thesis.

Business Administration

BADM 1250-1. Freshman Seminar. General survey course assisting entering freshmen to focus on the various functional areas of business as well as related programs pertaining to ethics, leadership styles, study abroad, and other related fields. Open only to entering business freshmen.

BADM 2850-3. Profiles in American Enterprise. Through systematic analysis of a cross-section of industries and companies, course familiarizes students with the structure, operations, management, and socioeconomic aspects of business and nonbusiness entities. Establishes a foundation for integrating information encountered in later business courses. A major presentation each week by a top business leader augments faculty and student presentations with inside information and insights about companies, industries, and functional specialties. Prereq., sophomore standing.

BADM 3820-3. Analysis of Business Enterprise. Exposes students to theory, leadership, small group management, and oral and written communication. Focuses on the analysis and synthesis of industry, company, and other business information. Prereqs., junior standing and BADM 2850.

BADM 3830-2. Interpretation of American Enterprise. Exposes students to the practice of leadership, small group management, and oral and written communication. Stresses the analysis and presentation of industry, company, and other business information. Students act as peer teaching associates and assume primary responsibility for recitation/discussion sections of BADM 2850. Prereqs., junior standing, BADM 2850, and BADM 3820.

Business Economics

BECN 5080-3. Economic Theory and Application for Managers. Introduces microeconomic and macroeconomic theory for M.B.A. candidates. No credit for students with credit in ECON 2010 and 2020. Open only to graduate degree candidates.

BECN 6150-3. Managerial Economics. Presents concepts, tools, and methods of economic analysis relevant to a broad cross-section of decisions within the business firm. Particular attention given to market demands and the interrelationships between price policy, costs, and production. Prereqs., INFS 5020 and microeconomics, or OPMG 5020 and BECN 5080. Open only to business graduate students.

BECN 6180-3. Business, Government, and Society. Studies the interdependence of business with societal, governmental, and economic environments. Explores the firm's social and ethical responsibilities. Considers the relationship between business and government, and the control and regulation of business. (Note: BECN 6150 should be completed before enrolling in this course.) Prereqs., BECN 5080 or equivalent, or 12 hours of 5000-level fundamentals. Open only to business graduate students.

Business Environment and Policy

BPOL 1500-3. Introduction to Business. Explores the nature of business enterprise, the role of business in society, and the problems confronting business management. Discusses career opportunities in business. Business students are advised to take this course during the freshman year. Open only to freshmen and sophomores.

BPOL 4500-3. Cases and Concepts in Business Policy. Emphasizes integration of economic, market, social-political, technological, and competition components of the external environment with the internal characteristics of the firm. Through analysis, discusses derivation of appropriate interaction between the firm and its environment to facilitate accomplishment of the firm's objectives. Prereqs., FNCE 3050, MKTG 3000, OPMG 2010 and 3000, and ORMG 3300. For graduating seniors only.

BPOL 4520-3. Small Business Strategy, Policy, and Entrepreneurship. Emphasizes planning, organizing, and operating small business firms, and examines the role of the entrepreneur in conception, organization, and development of firms. Extensive use made of small business cases. Prereqs., FNCE 3050, MKTG 3000, OPMG 2010 and 3000, and ORMG 3300. For graduating seniors only.

BPOL 6500-3. Business Policy. Emphasizes problem analysis and decision making at integrative-management level. Devoted to internal policy making. Emphasizes integrated use of research, analysis, and control in policy decisions. Open only to business graduate students. Completion of all 5000 fundamentals is a firm prerequisite. This course must be taken in the candidate's final term of the program.

BPOL 7500-3. Doctoral Seminar: Administrative Policy 1. Examination and evaluation of current theories, issues, and problems involved in the formulation, administration, and appraisal of administrative policies. Includes both study of relevant literature and examination of administrative policies in operation in business enterprises. Open to doctoral candidates only. Prereq., BPOL 6500.

BPOL 7560-3. Directed Study and Research in Current Policy Issues. For doctoral candidates with primary interest in administrative policy. Provides directed intensive study of important policy issues, both on an individual basis and in small groups. Reading and research. Prereqs., BPOL 7500 and 7530.

BPOL 8900-variable credit. Independent Study. Student must have consent of instructor under whose direction study is taken. Departmental form required.

BPOL 8990 (1-10). Doctoral Thesis.
Business Law

BSLW 3000-3. Business Law. Studies the legal significance of business transaction as part of the decision-making process in business. Covers problem resolution procedures, both in and out of court, and consequences of current trends in civil tort law and criminal law in the business community. Basic contract law, the Uniform Commercial Code sales section, and property rights are also reviewed. Prereq., junior standing. Students enrolled in BSLW large lecture sections 3000-100 or 3000-200 must request a recitation section.

BSLW 4820-variable credit. Topics in Business. Experimental course offered irregularly for purpose of presenting new subject matter in business law.

BSLW 5060-3. Legal Environment of Business. Provides understanding of the private and public law essential for graduate study in business. Open only to graduate degree candidates; may be limited to business graduate students only.

BSLW 5120-3. Advanced Business Law. Same as BSLW 4120.

BSLW 6040-3. Space Law and Policy. Current issues of space commercialization and military use of space. Topics include institutional framework of space law and policy, treaties, world political ramifications of activities in space, national legislation, and the roles of federal agencies.

Entrepreneurship and Small Business Management

ESBM 4700-3. Entrepreneurship and Small Business Management. Exposes students to the environment of entrepreneurship within firms varying in size from startups through late stages of organization life cycles. Course assignments give students the opportunity to develop greater self-awareness of their fit with entrepreneurial environments and learn the process of business planning. Case studies and practitioner guests highlight the course process. Course is a feeder course for ESBM 4830. Business Plan Preparation. Prereq., senior standing, INFS 2000, ACCT 2000, FNCE 3050, and BSLW 3000.

ESBM 4830-3. Business Plan Preparation. Completion of a sophisticated business plan is developed within task groups from concept through all elements of a professionally written business plan. Prereq., ESBM 4700 or ESBM 6700. Course restricted to those students who have demonstrated the aptitude to do this level of study and application.

ESBM 4900-variable credit. Independent Study. Student must have prior consent of the dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors. Departmental form required.

ESBM 6700-3. Entrepreneurship and Small Business Management. Examines the development of emerging ventures from the entrepreneur perspective. An advanced graduate-level version of ESBM 4700, with a significant component of doing research in entrepreneurial companies.

ESBM 6900-variable credit. Independent Study. Student must have consent of instructor under whose direction study is taken. Departmental form required.

Finance

FNCE 3210-3. Personal Finance. Discusses problems of personal financial management: use of credit, personal budgets, insurance, small investments in securities, buying a home, creating an estate, providing for old age, and making a will. Intended for nonbusiness students. No credit given toward business degree requirements.

FNCE 3330-3. Investments. Studies basic problems concerning development and implementation of a personal investment program. Includes analyzing investment risks, alternative investment media, and designing and executing an investment program. No credit given toward business degree for finance majors. Students may not receive credit for both FNCE 3330 and 4330.

FNCE 3550-3. Financial Markets. Discusses major operating characteristics and problems of money and capital markets, both national and international. Emphasizes sources and availability of money and capital for financing business and market structure for the employment of savings. No credit given toward business degree for finance majors. Students may not receive credit for both FNCE 3550 and 4550.

FNCE 4020-3. Business Finance 2. Develops analytical and decision-making skills in relation to problems that confront financial management. Topics include planning, control, and financing of current operations and long-term capital commitments; management of income; evaluation of income-producing property, and expansion. Case method of instruction. Prereq., FNCE 4010.

FNCE 4330-3. Investment and Portfolio Management. Discusses investment problems and policies and the methodology for implementing them. Includes portfolio analysis, selection of investment media, and measurement of performance. Students may not receive credit for both FNCE 3330 and 4330. Prereq., FNCE 4010.

FNCE 4400-3. International Financial Management. Considers international capital movements and balance of payments problems, as well as problems of international operations as they affect the financial functions. Reviews foreign and international institutions and the foreign exchange process. Considers financial requirements, problems, sources, and policies of firms doing business internationally. Prereq., FNCE 3050. Same as FNCE 5400.

FNCE 4410-variable credit. International Business Seminar in Finance. Special topics in international business. Interested students should contact the College of Business and Administration Office of Undergraduate Studies. Offered summer session only.

FNCE 4570-3. New Venture Funding. Focuses on financial issues confronting managers in entrepreneurial settings. Topics include raising and managing seed and growth capital from various funding sources; initial public offerings; securities law and public and private placements; understanding the deal; and buyouts. Prereq., FNCE 3050. Not offered every semester.

FNCE 4600-3. Derivative Securities. Develops the modern theory of contingent claims in a mathematical framework oriented toward applications. Students learn to use derivatives for risk management and to tailor portfolio payoffs, emphasizing pricing of these securities. In-depth analysis of the properties of futures, forwards, options, and swaps for equities, currencies, and interest-rate-sensitive securities. Knowledge of these basic contingent claims is used to price modern derivatives such as options on futures, swaptions, caps, collars, and floors. Computer implementation of lattice approximations is emphasized in problem sets and empirical exercises. Analysis of stochastic processes and partial differential equations is kept to a minimum. Students should have strong math and computer skills. Prereq., FNCE 4330.

FNCE 4740-3. Principles of Insurance. Covers fundamental principles of insurance and their application in life, disability, property, and liability insurance. Provides the basic knowledge for intelligent solution of personal and business
insurance problems as well as for further specialized study of insurance. Prereq., FNCE 3050. Same as FNCE 5740.

FNCE 4810-3. Honors Seminar. Social responsibilities of the business executive, business ethics, business-government relations, and business in literature. Open to seniors who have completed at least 30 semester hours of business courses with not less than a 3.30 grade point average, and who have received instructor consent.

FNCE 4820-variable credit. Topics in Business. Experimental course offered irregularly for purposes of presenting new subject matter in finance. FNCE 4900-variable credit. Independent Study. Student must have prior consent of the dean and instructor under whose direction study is taken. Intended only for exceptionally well qualified business seniors. Departmental form required.

FNCE 5050-3. Fundamentals of Finance. Provides basic understanding of business finance essential for graduate study of business. Prereq., ACCT 5010 or equivalent. Open only to graduate degree candidates.

FNCE 5540-3. Security Analysis. Same as FNCE 4540.

FNCE 5770-3. Risk Control in the Corporate Enterprise. Same as FNCE 4770.

FNCE 6330-3. Investment Management and Analysis. Theory of investment management and security values; portfolio management including analysis of investment risks and constraints on investment policies and objectives; analysis and use of investment information; and development and application of tools for determining values. Prereq., FNCE 6010.

FNCE 6550-3. Economics of Financial Markets. Emphasizes economic analysis of domestic and international financial markets. Considerable emphasis placed on developing an understanding of various factors that influence cost and availability of capital for financing business enterprise. Prereq., FNCE 5050 or equivalent.

FNCE 6820-variable credit. Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in finance.

FNCE 6900-variable credit. Independent Study. Student must have prior consent of the dean and instructor under whose direction study is taken. Departmental form required.

FNCE 6940-variable credit. Master's Candidate. Departmental form required.

FNCE 6950 (4-6). Master's Thesis.

FNCE 7100-3. Financial Theory and Corporate Policy. Devoted to developing an understanding of major theoretical concepts of corporate finance and financial economics. Reviews each of the seminal theories upon which modern finance is based, including empirical evidence. Prereq., FNCE 5050, 6101, and 6330.

FNCE 7200-3. Doctoral Seminar 1. Topics and course outline vary from semester to semester.

FNCE 7300-3. Doctoral Seminar 2. Topics and course outline vary from semester to semester.

FNCE 7550-3. Doctoral Seminar 3. Topics and course outline vary from semester to semester.

FNCE 7810-1. Doctoral Seminar: Dissertation Research. Designed to assist the doctoral student in integrating courses and fields of study in order to apply knowledge and skills to problems in finance. Gives special attention to development of thesis topics. Continuous enrollment required of all finance doctoral students while doing course work.

FNCE 8820-variable credit. Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in finance.

FNCE 8900-variable credit. Independent Study. Instructor consent and departmental form required.

FNCE 8990 (1-10). Doctoral Thesis.

Information Systems

INF5 200-3. Business Information Systems and the Computer. Studies business information systems, focusing on computer hardware and software as they relate to business information. Includes information and decision-making concepts, computer systems, and computer applications. Introduces students to concepts, vocabulary, and functions of business information systems and the computer. Not open to freshmen. Prereq., MATH 1070. Students must request lecture and recitation.

INF5 410-3. Information Technology. Students will use a conceptual foundation in the areas of computer architecture, operating systems, language translation, and telecommunications. Extends to database communication between students and other members of the data processing community.

INF5 4120-3. System Analysis. Introduces students to basic system analysis tools and the procedures for conducting a system analysis. Topics may include system requirements, initial analysis, general feasibility study, structured analysis, detailed analysis, logical design, and general system proposal. Students gain practical experience through projects and/or case studies.

INF5 4130-3. System Design and Implementation. Continuation of INF5 4150. Covers topics such as structured design, logical data modeling, physical system design, detailed feasibility analysis, specification of human-computer interface, design of files, programs and procedures, system testing, implementation procedures, and system life cycle management. Students implement these concepts through case studies and/or projects.

INF5 4140-3. Database Management Systems. Introduction to database management systems, on-line query, and management control systems. Concerned with database structure and design and the integration of the logical view of the data with its physical storage. Extensive use may be made of a commercial DBMS in student projects to develop an appreciation for both technical and managerial concerns.

INF5 4810-3. Honors Seminar. Social responsibilities of the business executive, business ethics, business-government relations, and business in literature. Open to seniors who have completed at least 30 semester hours of business courses with not less than a 3.30 grade point average and have received instructor consent.

INF5 4900-variable credit. Independent Study. Student must have prior consent of the dean and instructor under whose direction study is taken. Intended only for exceptionally well qualified business seniors who desire to study an advanced topic. Departmental form required.

INF5 6100-3. Information Technology. Provides students with a conceptual foundation in the areas of computer architecture, operating systems, language translation, and telecommunications. Extends to database communication between students and other members of the data processing community.

INF5 6120-3. System Analysis and Design. Introduces basic system analysis and design tools and the procedures for conducting analysis and design. Topics may include system requirements, initial analysis, general feasibility study, structured analysis, joint application design, logical design, and process modeling. Also covers structured design, logical data modeling, physical system design, detailed feasibility analysis, specification of human-computer interface, design of files, programs and procedures, system testing, implementation procedures, and system life cycle management. Students implement these concepts through case studies and/or projects.

INF5 6140-3. Database Modeling. Introduces database management systems and logical database design. Discusses hierarchical, network, and relational models, and emphasizes design. Approaches may include the ER model, the semantic data model, and the object model. Design guidelines include normalization criteria.
MKTG 5100-3. International Marketing. Same as MKTG 4100.

MKTG 5650-3. Physical Distribution Management. Same as MKTG 4650.

MKTG 5700-3. Sales Management. Same as MKTG 4700.

MKTG 6000-3. Marketing Management. An in-depth inquiry into marketing decision making. Emphasizes strategic planning and analytical procedures for marketing decisions. Integrates all areas of marketing management and relates marketing activities to other functional areas of the firm. Prereq.: MKTG 5030 or equivalent. Graduate students only.

MKTG 6050-3. Marketing Research. Examines problem/opportunity definition, survey and causal research design, and reporting of research results from the viewpoints of practicing researchers and managers. Topics include secondary data sources, measurement of beliefs and behaviors, sampling plans, and data analysis. Emphasizes managerial applications. Prereq.: MKTG 5030.

MKTG 6820-variable credit. Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigation of current topics in marketing.

MKTG 6900-variable credit. Independent Study. Student must have consent of instructor under whose direction study is taken. Departmental form required.

MKTG 6940-variable credit. Master's Candidate. Departmental form required.

MKTG 6950 (4-6). Master's Thesis.

MKTG 7100-3. Doctoral Seminar: Product and Price. Studies marketing literature dealing with product and price topics. Includes product topics such as management of new products, product elimination, product life cycles, and product portfolio. Includes pricing topics such as pricing models and price perceptions.

MKTG 7300-3. Multivariate Methods in Marketing. Multivariate methods applicable to basic research in marketing. Includes MANOVA, designs, causal models, cluster analysis, discriminant function analysis, factor analysis, and latent structure analysis. Emphasizes computer applications. Prereq.: graduate courses in regression and ANOVA.

MKTG 7400-3. Doctoral Seminar: Channels of Distribution. Studies marketing literature in channels of distribution. Includes topics of channel structure, channel power, channel conflict and leadership, physical distribution systems, and regulation.

MKTG 7500-3. Doctoral Seminar: Promotion. Studies marketing literature dealing with advertising, selling, sales promotion, and sales management. Includes topics of advertising decision models, advertising effects, salesforce performance models, and promotion management.

MKTG 7600-3. Doctoral Seminar: Services Marketing. Studies marketing literature dealing with services. Includes such topics as service management, theoretical issues in the study of services, and strategies in travel, tourism, recreation, and financial services industries.

MKTG 7830-3. Doctoral Seminar: Dissertation Research. Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in marketing. Gives special attention to development of thesis topics.

MKTG 8820-variable credit. Doctoral Seminar: Special Topics. Study of marketing literature on a topic or topics selected by instructor. Examples of topics include marketing history, international marketing management, marketing environment, marketing of high technology products, and marketing models.

MKTG 8900-variable credit. Independent Study. Student must have consent of instructor under whose direction study is taken. Departmental form required.

MKTG 8990 (1-10). Doctoral Thesis.

Operations Management

OPMG 3000-3. Production and Operations Management. Introduces design and analysis of production systems in manufacturing, service, and public organizations. Topics include productivity and competitiveness, total quality management and control, JIT, MRP, inventory management and control, capacity planning and expansion, location analysis, scheduling, operations strategy, product design and process selection, materials management, and mathematical models and procedures necessary to support these activities (such as linear programming, queuing analysis, simulation, forecasting, decision analysis, etc.).

OPMG 4300-3. Business Forecasting. Examines a collection of qualitative and quantitative business forecasting methods such as judgmental forecasting methods, exponential smoothing techniques, time series composition, ARIMA models, and an introduction to the Box-Jenkins methodology. Students construct planning and simulation models, and analyze underlying factors responsible for fluctuations in business activity. Prereq.: OPRM 2010. Same as OPRM 5300.

OPMG 4400-3. Japanese Business and Operations Management. Compares the Japanese system of production/operations management in the manufacturing and service sectors with that of the U.S. (and to a lesser extent, Europe and Asia). Course material contrasts Japanese and Western approaches to business, production, and operations, labor practices, management styles, international competitiveness, productivity, distribution systems, trade practices and strategies for penetrating foreign markets, and the techniques and methods commonly used to support manufacturing and service activities. Examines the Japanese sociocultural environment, government-business relationship, banking industry, operations strategy, and marketing strategies necessary for success, as well as the potential for transferring Japanese industrial management practices and manufacturing techniques to other countries. Prereq.: OPRM 3000. Same as OPRM 5400.

OPMG 4440-3. Quality, Productivity, and Competitiveness. Examines both managerial and operational perspectives of the concepts, tools, and techniques used in the management and measurement of quality, productivity, and competitiveness in an international environment. Topics include total quality control, total quality management, statistical process control, Deming management methods, Taguchi methods, quality control circles, relationship between quality and productivity, quality and costs, technology change and quality, operations strategy, and quality, quality and international competition. Emphasizes developing decision-making skills through the use of case analysis, field study, consultation with local organizations, and other experimental activities. Prereq.: OPRM 3000. Same as OPRM 5440.

OPMG 4470-3. Policy Analysis and Operations Strategy. Studies production and operations management strategy, policy formulation, and analysis in both domestic and international environments. Emphasizes developing decision-making skills through the use of case analysis, field study, consultations with local organiz-
sions, and other experiential activities. Prereq.
OPMG 3000 and at least one of the following:
OPMG 4400, OPMG 4440, OPMG 4600, or
instructor consent. Same as OPMG 5470.
OPMG 4600-3. Purchasing and Materials
Management. Studies the purchasing function in
manufacturing, service, and public organizations.
Topics include source selection, make-buy anal-
ysis, inventory control, warehousing, material
quality standards and specifications, transpor-
tation alternatives, bid systems, and legal aspects.
Prereq., OPMG 3000. Same as OPMG 5500.
OPMG 4810-3. Honors Seminar. Business
decision-making with quantitative analysis.
Explores several quantitative concepts, principles,
and techniques to demonstrate their application
to real-world management problems. Applica-
tions of mathematical programming, network
analysis, stochastic processes, and decision theory
will be drawn from the functional fields of mar-
keting, finance, operations management, trans-
portation and logistics, information systems, and
organizational management. Open to seniors
who have completed at least 30 semester hours of
business courses with not less than a 3.30 grade
point average. Requires instructor consent.
OPMG 4820-variable credit. Topics in Busi-
ness. Experimental course offered irregularly for
purpose of presenting new subject matter.
OPMG 4900-variable credit. Independent
Study. Students must have prior consent of the
dean and instructor under whose direction study
is taken. Intended only for exceptionally well-
qualified business seniors who desire to study
advanced topics. Departmental form required.
OPMG 5020-3. Fundamentals of Business
Statistics. Foundations for statistical reasoning
and statistical applications in business. Topics
include graduate-level treatment of descriptive
statistics, probability, probability distributions,
sampling theory and sampling distributions, sta-
tistical inferences (estimation and hypothesis test-
ing). Provides an introduction to regression anal-
ysis, analysis of variance, time series forecasting,
decision analysis, index numbers, and non-para-
metric methods. Prereq., OPMG 4300. Open to
graduate degree students. Students must have
an undergraduate level knowledge of mathematics.
OPMG 5030-3. Business Forecasting. Same
as OPMG 4300. Prereq., OPMG 5200 or
equivalent.
OPMG 5400-3. Japanese Business and Oper-
ations Management. Same as OPMG 4400. Prereq.,
OPMG 4440 or instructor consent.
OPMG 5440-3. Quality, Productivity, and
Competitiveness. Same as OPMG 4440. Prereq.,
OPMG 6400.
OPMG 5470-3. Policy Analysis and Opera-
tions Strategy. Prereq., OPMG 6400 and at least
one of the following: OPMG 5400, OPMG
5440, OPMG 5600, or instructor consent. Same
as OPMG 4470.
OPMG 5600-3. Purchasing and Materials
Management. Prereq., OPMG 6400. Same as
OPMG 6600.
OPMG 6010-3. Deterministic Models. Covers
linear programming and its application, network
analysis (including scheduling models), dynamic
programming, integer programming, goal pro-
gramming, quadratic programming, and nonlin-
erar programming. Prereq., instructor consent.
OPMG 6020-3. Stochastic Models. Examines
commonly used stochastic models and their area
of application. Emphasizes probability theory,
decision analysis under uncertainty, Bernoulli
processes, Markov chain models and Markovian
decision processes, Poisson processes and que-
uing theory, simulation, and inventory theory.
Prereq., OPMG 5020.
OPMG 6400-3. Logistics, Production, and
Inventory Management. Explores international
and domestic aspects of production and opera-
tions management. Covers traditional topics
such as quality control and management, prod-
uct design and process selection, capacity and
aggregate planning, scheduling, project planning
and control, inventory planning and manage-
ment, materials requirements planning, just-in-
time production systems, demand forecasting,
and the quantitative techniques needed for oper-
ations decision-making. International topics
include the international operations environ-
ment, exporting vs. manufacturing overseas,
starting international operations, transfer of tech-
nology, offshore production, export processing
zones, international productivity and competi-
tiveness, operations strategies, cultural differ-
ences, international locational decisions, overseas
research, and procurement and logistics. Prereq.,
OPMG 5020.
OPMG 6820-variable credit. Graduate Semi-
nar. Experimental seminar offered irregularly to
provide opportunity for investigating new fron-
tiers in operations management. Prereq., instruc-
tor consent.
OPMG 6900-variable credit. Independent
Study. Students must have consent of instructor
under whose direction study is taken. Intended
only for exceptionally well-qualified business
graduate students who desire to study advanced
topics. Departmental form required.
OPMG 6940-variable credit. Master's Candi-
date. Departmental form required.
OPMG 6950 (4-6). Master's Thesis.
OPMG 8820-variable credit. Graduate Semi-
nar. Experimental seminar offered irregularly to
provide opportunity for investigating new fron-
tiers in operations management.
OPMG 8900-variable credit. Independent
Study. Students must have consent of instructor
under whose direction study is taken. Department-
al form required.
OPMG 8990 (1-10). Doctoral Thesis.

Organization Management
OPMG 3350-3. Introduction to Management
and Organization. Introductory study of man-
agement fundamentals and organizational behav-
or. Students learn how individuals and organiza-
tions, how managers motivate and lead in work
situations, and how organizations are
designed and managed. Prereqs., PSYC 1001,
SOCY 1001, and junior standing.
OPMG 3350-3. Managing Individuals and
Work Groups. Examines leadership and supervi-
sion in small work groups in organizations.
Focuses on how and why individuals act as they
do in interpersonal relationships and in small
groups. Develops interpersonal and small group
skills. Prereq., ORMG 3300.
OPMG 4320-3. Managing Complex Organiza-
tions. From the perspective of a general manager,
explores organizational design and management
processes for effective organizational perfor-
mance. Prereq., ORMG 3300.
OPMG 4810-3. Honors Seminar. Covers social
responsibilities of the business executive, business
cycles, business-government relations, and busi-
ness in literature. Open to seniors who have
completed at least 30 semester hours of business
courses with not less than a 3.30 grade point
average and have instructor consent.
OPMG 4820-variable credit. Topics in Busi-
ness. Experimental course offered irregularly to
present new subject matter in organization
management.
OPMG 4900-variable credit. Independent
Study. Students must have prior consent of the
dean and instructor under whose direction study
is taken. Intended only for exceptionally well-
qualified business seniors. Departmental form
required.
OPMG 5040-3. Fundamentals of Management
and Organization. Provides basic understanding
of organization theory, personnel management,
labor relations, and organizational behavior
essential for graduate study in business. Open
to graduate degree candidates.
OPMG 6300-3. Organizational Behavior.
Applies behavioral science concepts and research
to management of organizations. Open to
business graduate students. Prereq., ORMG
5040 or equivalent.
OPMG 6310-3. Individual Behavior in Work
Organizations. Explores impact of human man-
agement and behavioral science theories, concepts,
and practices on productivity, satisfaction,
growth, and development. Prereq., ORMG
5040 or equivalent.
OPMG 6320-3. Organization Design. Dis-
cusses design of organization structure and its
impact on organizational processes. Analyzes
alternative organization patterns and factors
affecting organization design. Prereq., ORMG
5040 or equivalent.
OPMG 6330-3. The Development of Groups
and Organizations. Introductory study of the
dynamics involved in managing and facilitating
change in groups and organizations by applica-
tion of behavioral science knowledge. Emphas-
izes both cognitive and experiential learning and
requires a background in organization theory and
administrative behavior. Prereq., ORMG 5040
or equivalent.
OPMG 6340-3. Consultation Skills. Seminar
for doctoral and advanced master's students,
skilled in new theoretical and experiential
aspects of organizational behavior, consulting,
data gathering, and problem diagnosis in an organi-
sational setting. Prereq., ORMG 6330 or
instructor consent.
OPMG 6350-3. Dynamics of Interpersonal
Behavior. Application of skills in problem diag-
nosis, empathy, and communications in group
and interpersonal settings. Strong emphasis on
clear understanding of human behavior and interpersonal dynamics in a laboratory setting. Prereq., ORGM 6330 or instructor consent.

ORGM 6360-3. Intervention Theory and Methods. Application of skills in the third party role in analysis and consultation of such processes as communication, decision making, problem solving, functional roles of group members, and interpersonal behaviors in the organizational setting. Prereq., ORGM 6330 or instructor consent.

ORGM 6820-variable credit. Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigating new frontiers in organization management. Prereq., instructor consent. Same as ORGM 6900-variable credit. Independent Study. Students must have consent of instructor under whose direction study is taken. Departmental form required.

ORGM 6940-variable credit. Master's Candidacy. Departmental form required.

ORGM 6950 (4-5). Master's Thesis.

ORGM 7310-3. Seminar on Organizational Behavior. Doctoral-level seminar covering such issues as leadership, job attitudes, motivation, absenteeism, turnover, goal-setting, and group dynamics. Prereq., instructor consent.

ORGM 7320-3. Seminar in Organization Theory. Critically investigates major issues in organization theory and provides students with experience in comprehensively surveying literature in subject areas such as organization design, structure, technology, environment, size, and strategy. Prereq., instructor consent.

ORGM 7830-3. Doctoral Seminar: Dissertation Research. Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in organization management. Gives special attention to the development of thesis topics. Prereq., instructor consent.

ORGM 8820-variable credit. Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigating new frontiers in organization management. Prereq., instructor consent.

ORGM 8900-variable credit. Independent Study. Students must have consent of instructor under whose direction study is taken. Departmental form required.

ORGM 8990 (1-10). Doctoral Thesis.

Personnel/Human Resource Management

PHRM 4400-3. Management of Human Resources. Introduces modern personnel management policies and practices. Provides overview of primary issues in managing an organization's human resources, including job analysis and design; planning personnel needs; recruiting, hiring, developing and appraising employees; and discussion of current social and legal issues. A general course emphasizing awareness of issues applicable to managers in all functional areas. Prereq., ORGM 5360 or 5040 or equivalent. Same as PHRM 5400.

PHRM 4410-3. Labor and Employee Relations. Analyzes legal, political, social, and managerial aspects of collective bargaining and employee relations. Prereq., ORGM 3300 or 5040 or equivalent. Same as PHRM 5410.

PHRM 4810-3. Honor Seminar. Discusses social responsibilities of the business executive, business ethics, business-government relations, and business in literature. Open to seniors who have completed at least 30 semester hours of business courses with not less than a 3.30 grade point average and have received consent of instructor. Departmental form required.

PHRM 4820-variable credit. Topics in Business. Experimental course offered irregularly to present new subject matter in personnel/human resource management. Prereq., instructor consent.

PHRM 4900-variable credit. Independent Study. Students must have prior consent of the dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors. Departmental form required.

PHRM 5400-3. Management of Human Resources. Same as PHRM 4400.

PHRM 5410-3. Labor and Employee Relations. Same as PHRM 4410.

PHRM 5420-3. Employment Staffing and Development. Same as PHRM 4420.

PHRM 5430-3. Compensation and Benefits. Same as PHRM 4430.

PHRM 6400-3. Seminar: Personnel Administration. Covers issues in all areas of personnel administration. Emphasizes research findings on human resources applications through applied models, survey methods, and other applied behavioral concepts.

PHRM 6410-3. Seminar: Labor and Employee Relations. Covers issues in all areas of industrial, labor, and employee relations. Emphasizes research findings in industrial, labor, and employee relations through applied problems, NLRA and court decisions, arbitration cases, and conflict management models.

PHRM 6820-variable credit. Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigating new frontiers in personnel/human resource management. Prereq., instructor consent.

PHRM 6900-variable credit. Independent Study. Students must have consent of instructor under whose direction study is taken. Departmental form required.

PHRM 7400-3. Seminar in Personnel Human Resource Management. Intensive research-based survey of contemporary issues in personnel human resource management. Students survey literature and conduct research in personnel/human resource subject areas such as performance appraisal, pay strategy, human resource strategy, union impact on compensation, labor relations and human capital. Instructor consent required.

Real Estate

REAL 4330-3. Real Estate Investments. Emphasizes problems and methodology for making the real estate investment decision. Includes real estate user and investor requirements, decision models, tax factors, and forms of ownership. Prereqs., REAL 3000 and FNCE 3050. Same as REAL 5330.

REAL 4540-3. Real Estate Finance. Discusses functions and practices of various real estate financing institutions. Covers mortgage lending, servicing, and mortgage banking relative to all types and uses of real estate. Prereqs., REAL 3000 and FNCE 3050. Same as REAL 5540.

REAL 4730-3. Legal Aspects of Real Estate Transactions. Topics include estates in land, purchase and sales contracts, conveyances, mortgage and trust deeds, transactions, property taxes, and leases. Prereqs., BSW 3000 and REAL 3030. Same as REAL 5730.

REAL 4820-variable credit. Topics in Business. Experimental course offered irregularly to present new subject matter in real estate. Prereq., instructor consent.

REAL 4900-variable credit. Independent Study. Students must have prior consent of the dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors. Departmental form required.
REAL 5010-3. Real Estate Development. Same as REAL 4010. Restricted to MBA students.

REAL 5300-3. Residential and Income Property Appraising. Prereq., may be limited to students who have completed FNCE 5050. Same as REAL 4300. Restricted to MBA students.

REAL 5330-3. Real Estate Investments. Prereq., FNCE 5050 or equivalent. Same as REAL 4330.

REAL 5540-3. Real Estate Finance. Prereq., may be limited to students who have completed FNCE 5050 or equivalent. Same as REAL 4540. Restricted to MBA students.

REAL 5730-3. Legal Aspects of Real Estate Transactions. Prereq., may be limited to students who have completed BSWL 5000 and REAL 3000. Same as REAL 4730. Restricted to MBA students.

REAL 6820-variable credit. Graduate Seminar. Experimental seminar offered irregularly to provide opportunity for investigating new frontiers in real estate.

REAL 6900-variable credit. Independent Study. Students must have consent of instructor under whose direction study is taken. Departmental form required.

Tourism Management

TOMG 3400-3. Principles of Tourism. Introduces the basic concepts, tools, and techniques of tourism management. Also introduces the tourism industry, the effects of tourism on society, and current developments in the field. Prereq., junior standing.

TOMG 3410-3. Conventions and Meetings Management. Covers applications of management theory and practice to the group travel sector of the tourism industry. Emphasizes convention and meeting facility management. Prereq., TOMG 3400 or instructor consent.

TOMG 3440-3. Resort Management. Examines principles and procedures of resort development and management, applications of management theory to the resort industry, and environmental issues of resort development. Prereq., TOMG 3400 or instructor consent.

TOMG 4020-3. Tourism Impacts, Planning, and Policy. Examines the economic, social, and environmental impacts of tourism development and the planning and policy implications of those impacts. Special consideration given to the impact of tourism and tourism development in rural communities and environments. Prereq., TOMG 3400 or instructor consent.

TOMG 4050-3. Marketing Tourism Services. Discusses concepts, tools, and techniques of services marketing with specific application to tourism attractions and facilities. Emphasizes procedures of service demand management, quality control, and marketing strategy. Prereq., TOMG 3400, MKTG 3000, or instructor consent.

TOMG 4920-3. Internship. A ten-week placement with a tourism company or agency. Requires students to participate in a broad scope of activities with particular attention to the creation, delivery, and management of tourist services. A special project is required that applies tourism management concepts and procedures to an approved internship agency problem. Prereq., TOMG 3400, MKTG 3300, and 3 additional hours of tourism management course work.

Transportation and Distribution Management

TRMG 4430-variable credit. International Business Seminar in Transportation Management. Special topics in international business. Interested students should contact the College of Business and Administration Office of Undergraduate Studies.

TRMG 4500-3. Transportation Operation and Management. Topics include economics of transportation service and rates, history and patterns of regulation, transportation policy, introduction to air and passenger transportation, and transportation of goods. Prereq., ECON 2300 and 2400, or FNCE 5080 or equivalent, or instructor consent. Same as TRMG 5500.

TRMG 4510-3. Survey of Transportation Law and Insurance Claims Procedures. Analyzes the legal aspects of transportation systems. Issues include carrier liability, transportation contracts, damages, freight claims preparation, and prosecuting before regulatory agencies. Prereq., TRMG 4500, 5500, or instructor consent. Same as TRMG 5510.

TRMG 4520-3. Problems in Surface Transportation Management. Analyses surface modes with emphasis on the motor carrier industry. Topics include carrier operations, regulatory structure, pricing, market structure, design of services, routes and terminals, equipment, and private fleets. Case analyses and field studies used to develop decision-making skills. Prereq., TRMG 4500, 5500, or instructor consent. Same as TRMG 5520.

TRMG 4560-3. Air Transportation. Covers operating costs and methods, passenger and cargo rates, air routes, schedules, safety, regulation, and airport management. Prereq., TRMG 4500, senior standing, and instructor consent, or TRMG 5500, graduate standing, and instructor consent. Same as TRMG 5560.

TRMG 4570-3. Urban Transportation. Analyses the two aspects of urban transportationfreight and passenger. Covers issues in policy, modes, governmental actions and structure, investment and costs, and effect upon urban environment. Prereq., TRMG 4500, 5500, or instructor consent. Same as TRMG 5570.

TRMG 4580-3. International Transportation. Analyzes international transportation (primarily sea and air in the world economy). Detailed study of cargo documentation and freight rate patterns. Includes liability patterns, logistics, economics, and national policies of transportation. Prereq., TRMG 4500, 5500, or instructor consent. Same as TRMG 5580.

TRMG 4830-variable credit. Topics in Business. Experimental course offered irregularly to present new subject matter in transportation.

TRMG 4900-variable credit. Independent Study. Students must have prior consent of the dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors. Departmental form required.

TRMG 5500-3. Transportation Operation and Management. Same as TRMG 4500.

TRMG 5520-3. Problems in Surface Transportation Management. Same as TRMG 4520.

TRMG 5560-3. Air Transportation. Same as TRMG 4560.

TRMG 5570-3. Urban Transportation. Same as TRMG 4570.

TRMG 5580-3. International Transportation. Same as TRMG 4580.

TRMG 6500-3. Seminar: Issues in Transportation Policy and Management. Public policy issues affecting the transport sector, including examination of regulation and public promotion of transportation in relation to efficient allocation of natural resources, and interests of shippers, investors, and employees. Management issues include decision making in a deregulated environment, collective bargaining, facilities location, financial planning, and problems and opportunities of intermodal transportation services. Prereq., TRMG 5500.

TRMG 6820-variable credit. Graduate Seminar: Experimental seminar offered irregularly to provide opportunity for investigating new frontiers in transportation. Prereq. varies.

TRMG 6900-variable credit. Independent Study. Students must have consent of instructor under whose direction study is taken. Departmental form required.

M.B.A. Courses

The following courses are open only to M.B.A. students entering the program in 1992-93.

M.B.A. Core Courses

MBAC 6010-3. Managerial Economics. Studies the elements of the business firm's fundamental problem-how to maximize profit. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various business applications and misapplications of the relevant concepts, primarily through case studies. Differential calculus and statistics are used throughout the course.

MBAC 6020-3. Financial Accounting. Introduces the financial reporting system used by business organizations to convey information
about their economic affairs. Develops an understanding of the financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

**MBAC 6050-3. Quantitative Methods 1.** Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate-level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions, and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and non-parametric methods.

**MBAC 6060-3. Managing Behavior in Organizations.** Develops an awareness of the impact of individual and group processes on effective organizational functioning. Develops understanding of the impact of behavioral concepts and practices their application through discussion and experiential learning.

**MBAC 6070-1. Management Communication.** Develops communication competence and confidence by focusing on speaking and writing effectively in a variety of one-to-one, small group, and one-to-many business contexts. Students learn to analyze communication situations to formulate ethical, effective strategies geared to the communication demands of those situations and to create and deliver clear, concise, and credible messages well-suited to business audiences. Opportunities for assessment, application, and feedback, coupled with knowledge of communication theory and strategies.

**MBAC 6080-3. Corporate Finance.** Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic concepts necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long-term financing, short-term financial management, and financial planning topics.

**MBAC 6070-3. Management Accounting.** Develops the essential elements of management accounting and control systems, and links these to the strategic planning function of the firm.

**MBAC 6080-3. Quantitative Methods 2.** Considers the application of the scientific method to an area basic to all managers and administrators—decision-making. Explores several quantitative principles and demonstrates their application through real-world management problems. Applications are drawn from the fields of marketing, finance, operations management, transportation, information systems, and organizational management. Techniques include linear programming, integer programming, network models, simulation, and decision theory.

**MBAC 6090-3. Marketing Management.** Provides a solid foundation of marketing knowledge by focusing on principles of marketing. Introduces the role that marketing cases play in advancing understanding and skill development in the field of marketing. Case discussions illustrate concepts discussed, and case studies are used to introduce the marketing decision making process. Emphasizes the international nature of marketing, as well as the importance of analysis and the understanding of the economic, demographic, political-legal-regulatory, sociocultural, technological, and natural environments.

**MBAC 6100-3. Information Systems for Management.** Focuses on the relationship between the information systems organization and the functional organizations in the firm. Presents basic knowledge about information systems in business and industry. Emphasizes concepts of importance to business managers, and considers the role of information and communications in modern business enterprises. Introduces contemporary hardware, software, and telecommunications technologies, and stresses the importance of technology trends. Covers acquisition, use and management of business applications, personal and office systems, and information resource management through readings, lectures, and several case discussions.

**MBAC 6110-3. Public Policies toward Business.** Provides understanding of the various roles of business and government in aiding societies attain their goals. Examines various roles and functions of government, businesses, and the market. Case issues are integrated into a substantive law setting involving ethical dilemmas that managers are likely to face.

**MBAC 6120-3. Operations Management.** Explores international and domestic aspects of production and operations management. Covers traditional topics such as quality control and management, product design and process selection, capacity and aggregate planning, scheduling, project planning and control, inventory planning and management, materials requirements planning, just-in-time production systems, demand forecasting, and the quantitative techniques needed for operations decision making. International topics include the international organizations and environments, exporting vs. manufacturing overseas, starting international operations, transfer of technology, offshore production, export, international productivity, competitiveness, operations strategies, cultural differences, international location decisions, overseas research, and procurement and logistics.

**MBAC 6130-3. Business Policy.** Develops individual problem-solving approaches to real-world business problems of the general manager. Applies methods and concepts from this and previous courses to real problems, and presents the best ideas and techniques in strategic management.

**M.B.A. – Finance.**

**MBAF 6200-3. Advanced Corporate Finance.** Covers at a more advanced level capital budgeting techniques using the option pricing model, financial engineering, hedging strategies, international financial management, and pension fund management. Emphasizes theoretical concepts and their practical applications.

**MBAF 6300-3. Applied Financial Management.** Emphasizes the use of financial planning, control, and capital allocation techniques to effects on capital structure, financial statements, and capital markets in both domestic and international contexts.

**MBAF 6500-3. Financial Markets and Institutions.** Focuses on the analysis of domestic and international markets. Considerable emphasis is placed on developing and understanding various factors that influence the cost and availability of capital for financing business enterprise.

**MBAM 6500-3. Special Topics in Finance.** Emphasizes current state-of-the-art developments in the area of financial management. Topics include capital budgeting, capital structure theory, financial analysis, valuation, dividend policy, mergers, restructuring, financial distress, and corporate control.

**M.B.A. – Marketing.**

**MBAM 6050-3. Marketing Research.** Develops skills in designing, executing, and evaluating research on applied problems and opportunities in marketing. Topics include research problem formulation and analysis, research design, search for and analysis of secondary data, measurement theory, design of data collection forms, analysis of research data, and reporting of research results.

**MBAM 6150-3. Marketing Field Project.** Develops skills in marketing decision making. Teaches design and complete a project located at a client business or other organization in the metropolitan area. Team members organize and assign responsibilities, interact with middle- and top-level managers, apply quantitative and behavioral tools presented in marketing and other courses, meet deadlines, and present results of project activities.

**MBAM 6200-3. International Marketing Management.** Addresses the fundamental decisions confronting a company whose operations extend beyond the home market—choosing which international markets to enter, determining the mode of market entry, and devising the international marketing plan. Topics include global marketing planning, environmental and cultural influences on international marketing decisions, organizational and control issues in international marketing decisions, and ethics, technology, and communication issues.

**MBAM 6300-3. Strategic Marketing Management.** Develops decision-making skills with topics including concepts of marketing strategy, analysis of strategic marketing opportunities, dominant themes in strategic marketing planning, and the design, implementation, and control of strategic marketing plans. Analyzes focus on segmentation, analyses, campaign planning, competitive analysis, portfolio analysis, and computer-based simulation of strategic marketing management.
MBAM 6600-3. Special Topics in Marketing Management. Provides students with exposure to diverse subject matter in marketing management.

M.B.A. — Organization Management

MBAO 6200-3. Developing Leadership Skills. Improves human and social abilities through knowledge of personal and interpersonal behavior. Develops skills in dealing effectively with people in organizations.

MBAO 6320-3. Designing and Managing Organizational Systems. Analyzes the effectiveness of organizations under different conditions, such as growth and decline. Examines alternative ways to organize firms, including high technology and multinational corporations, and explores the strengths and weaknesses of each structure. Focuses on how firms effectively manage innovation, creativity, and technological change. Explores from both a theoretical and applied perspective, corporate philosophy and culture, ethical issues, power and influence, and behavioral and organizational decision making within organizations.

MBAO 6400-3. Management of Human Resources. Explores effective management of a firm’s resources, human as well as financial and capital. Provides a review of concepts and techniques that can help any manager recruit, develop, compensate, and retain the best employees. Covers conceptual issues and technical procedures as well as skills from the perspective of the general manager.

MBAO 6450-3. Management of Organizational Change. Explores ways to change organizations, whether a start-up company or an established institution, and to meet the demands of ever-changing environments. Teaches a better understanding of the challenge of change through analysis of the theory, research, and practice of organization development.

MBAO 6600-3. Special Topics in Organization Management. Provides students with exposure to diverse subject matter in organization management.

M.B.A. — Technology and Innovation Management

MBAT 6100-3. Management of Technology and Innovation. Examines a variety of specific problems common to management technology, with the intent of developing both an understanding of the underlying issues as well as ideas for better management practice. Explores several specific topics such as corporate research and development management, technology transfer, technology-based strategies, project management, career management of technology professionals, and rewarding and encouraging innovation.

MBAT 6200-3. Marketing of Technology and Innovation. Focuses on the uniqueness and vagaries of marketing issues in high technology industries. Covers two distinct sections—high technology products sold to the consumer market, and high technology products in the business-to-business arena. Topics focus on the consumer and business-to-business arenas.

MBAT 6300-3. Management of Information Technology. Examines information technology from the perspective of managers at several levels—from the CEO to the first-line manager. Presents principles and knowledge, and provides frameworks that managers of aspiring managers can use to cope with the challenges of rapidly advancing technology. Considers strategic and operational issues, covers fundamental technology trends, and deals with management systems and organizational issues inherent in technology introduction and use.

MBAT 6600-3. Special Topics in Technology and Innovation Management. Provides students with exposure to diverse subject matter in technology and innovation management.

FACULTY

RALPH Z. SORENSON, Dean of the College of Business and Administration; Professor of Management, A.B., Amherst College; M.B.A., Ph.D., Harvard University.

MAUREEN AMBROSE, Associate Professor of Strategy and Organization Management. B.A., University of California at Santa Barbara; A.M., Ph.D., University of Illinois at Urbana-Champaign.

WILLIAM S. APPENZELLER, Assistant Professor of Recreation Emeritus.

JOSEPH W. BACHMAN, Professor of Accounting Emeritus.

DAVID B. BALKIN, Associate Professor of Strategy and Organization Management. B.A., University of California, Los Angeles; M.A., Ph.D., University of Minnesota.

F. KENDRICK BANCS, Professor of Business and Administration Emeritus.

CHAUNCEY M. BEAGLE, Associate Professor of Accounting Emeritus.

WILFRED E. BERNTHAL, Professor of Management and Organization Emeritus.

SANJAL BHAGAT, Finnbank Business Affairs Scholar; Professor of Finance, B.Tech., Indian Institute of Technology; M.B.A., University of Rochester; Ph.D., University of Washington.

R. WAYNE BOSS, Professor of Strategy and Organization Management. B.S., M.P.A., Brigham Young University; D.P.A., University of Georgia.

JAMES C. BRANCHEAU, Assistant Professor of Information Systems. B.S., Michigan State University; Ph.D., University of Minnesota.

DOUGLAS J. BUCHANAN, Professor of Marketing. A.B., Princeton University; M.B.A., Harvard University; Ph.D., Massachusetts Institute of Technology.

THOMAS A. BUCHMAN, Associate Professor of Accounting. B.S., M.S., Ph.D., University of Illinois; C.P.A.

MINNETTE A. BUMPUS, Assistant Professor of Organizational Management. B.S., M.B.A., University of Missouri; Ph.D., University of South Carolina.

DAVID CARLSON, Assistant Professor of Information Systems. B.S., Stanford University; M.B.A., Cornell University; Ph.D., University of Arizona.

PHILIP R. CATTEORA, Professor of Marketing. B.B.A., M.B.A., Ph.D., University of Texas.

LAWRENCE D. COOLIDGE, Professor of Business Administration Emeritus.

MARK R. CORRELL, Assistant Professor. Adjunct of Business Economics. B.A., University of Colorado; M.S., Ph.D., University of Wisconsin.

JEROME C. DARNELL, Professor of Finance. B.S., Southwest Missouri State College; M.B.A., D.B.A., Indiana University.

JON S. DAVIS, Assistant Professor of Accounting. B.S., M.Acc., Ph.D., University of Arizona.

JULIO DE CASTRO, Assistant Professor of Strategy and Organization Management. Undergraduate, Universidad Catolica Madre y Maestra; Ph.D., University of South Carolina.

JOHN D. DEMAREE, Associate Professor of Management Science and Information Systems Emeritus.

CALVIN P. DUNCAN, Associate Professor of Marketing. B.S., M.B.A., University of Colorado; Ph.D., Indiana University.

JERRY R. FOSTER, Associate Professor of Transportation Management. B.A., University of Wyoming; M.P.A., University of Colorado; Ph.D., Syracuse University.

JOSEPH L. FRASCONA, Professor of Business Law Emeritus.

DAVID M. FREDDERICK, Assistant Professor of Accounting. B.S., University of Colorado; Ph.D., University of Michigan; C.P.A.

H. LEE FUSILIER, Professor of Business Law Emeritus.

EDWARD J. GAC, Assistant Professor of Taxation Business Law. A.A., Wright College; A.B., Western Illinois University; J.D., University of Illinois.

JOHN J. GARNAND, Lecturer in Strategy and Organization Management. B.A., College of Santa Fe; M.A., Northwestern University; Ph.D., University of Colorado.

WAYNE M. GAZUR, Associate Professor of Business Law. B.S., University of Wyoming; J.D., University of Colorado; I.L.M., University of Denver; C.P.A.

FRED W. GLOVER, Visiting Chair in System Science. Professor of Management Science and Information Systems. B.A., University of Missouri; Ph.D., Carnegie Institute of Technology.

CHARLES R. GOELDNER, Professor of Marketing. B.A., M.A., Ph.D., University of Iowa.

KENNETH R. GORDON, Area Coordinator, Production and Operations Management. B.A., University of Iowa; M.S., Ph.D., Northwestern University.
BONG-HEU HAN, Associate Professor of Accounting, B.A., Seoul National University; M.P.A., Ph.D., University of Texas at Austin.

PAUL HERR, Associate Professor of Marketing, A.B., Oberlin College; Ph.D., Indiana University.

JOHN M. HESS, Professor of Marketing, B.S.C., University of Iowa; M.B.A., University of Oregon; Ph.D., Stanford University.

BETTY R. JACKSON, Associate Professor of Accounting, B.B.A., Southern Methodist University; M.P.A., Ph.D., University of Texas at Austin; C.P.A.

PAUL E. JEDAMUS, Professor of Management Science and Information Systems Emeritus.

RICHARD H. JEFFERIS, Assistant Professor of Finance, A.B., Kenyon College; M.S., Ph.D., Stanford University.

HOWARD G. JENSEN, Associate Professor of Accounting Emeritus.

JAMES P. KELLY, Assistant Professor of Management Science, B.S., M.S., Bucknell University; Ph.D., University of Maryland.

HENRY L. KESTER, Professor of Finance Emeritus.

JOHN B. KLINE, Professor of Management and Organization Emeritus.

CHRISTINE S. KOBERG, Associate Professor of Strategy and Organization Management. B.S., Western State College; M.B.A., Bowling Green State University; Ph.D., University of Oregon.

BURTON A. KOLB, Professor of Finance Emeritus.

KENNETH A. KOZAR, Associate Professor of Information Systems, B.S., M.S., Ph.D., University of Minnesota.

MARK K. KRUEGER, Assistant Professor of Finance, B.A., Ph.D., University of Illinois.

MANUEL LAGUNA, Assistant Professor of Management Science, B.S., Monterey Tech. at Queretaro, Mexico; M.S., Ph.D., University of Texas at Austin.

MICHAEL W. LAWLESS, Associate Professor of Management and Organization, B.S., St. John’s University; M.B.A., Ph.D., University of California, Los Angeles.

JOSEPH LAZAR, Professor of Business Law Emeritus.

BARRY L. LEWIS, Peat Marwick Professor of Accounting, B.S., Troy State University; M.S., The Wharton School, University of Pennsylvania; Ph.D., Pennsylvania State University; C.P.A.

DONALD R. LICHTENSTEIN, Associate Professor of Marketing, B.S., University of Alabama; Ph.D., University of South Carolina.

PATRICK T. LONG, Associate Professor of Recreation, B.A., College of St. Thomas; M.Ed., University of Minnesota; Ed.D., Western Michigan University.

P. JOHN LYMBOPOULOS, Associate Dean of Academic Support Services and Student Affairs; Professor of Finance, B.S.C., Ohio University; M.B.A., Ph.D., University of Texas.

RAYMOND D. MacFEE, JR., Lecturer in Accounting, B.S., Saint Francis College; M.B.A., Pennsylvania State University; C.P.A.

CLAUDE McMILLAN, Professor of Management Science and Information Systems Emeritus.

RONALD W. MEICHER, M.B.A./M.S. Programs Director; President’s Teaching Scholar; William H. Baughn Distinguished Scholar; Professor of Finance. B.S., M.B.A., D.B.A., Washington University, St. Louis.

G. DALE MEYER, President’s Teaching Scholar; Professor of Strategy and Organization Management. B.S., Northwestern University; M.S., Northern Illinois University; Ph.D., University of Iowa.

DAVID E. MONARCHI, Associate Professor of Information Systems, B.S., Colorado School of Mines; Ph.D., University of Arizona.

JACQUELINE J. MOHR, Assistant Professor of Marketing, B.B.A., Boise State University; M.S., Colorado State University; Ph.D., University of Wisconsin.

EDWARD J. MORRISON, Professor of Strategy and Organization Management. B.S., West Virginia University; M.B.A., D.B.A., Indiana University.

KENT NAKAMOTO, Assistant Professor of Marketing, B.S., California Institute of Technology; M.A., M.S., University of Wisconsin at Madison.

JAMES E. NELSON, Associate Professor of Marketing, B.S., M.S., Ph.D., University of Minnesota.

CHARLENE NICHOLLS-NIXON, Assistant Professor of Strategy and Organization Management. B.C., M.B.A., University of Saskatchewan; Ph.D., Purdue University.

MICHAEL PALMER, Associate Professor of Finance, B.S., M.S., San Diego State College; Ph.D., University of Washington.

LISA PENALOZA, Assistant Professor of Marketing, B.B.A., M.B.A., Texas A & M; Ph.D., University of California, Irvine.

RICHARD R. PERDUE, Associate Professor of Marketing, B.S., M.S., University of Wyoming; Ph.D., Texas A & M University.

LINDA PRICE, Associate Professor of Marketing, B.A., M.B.A., University of Wyoming; Ph.D., University of Texas.

R. RAVICHANDRAH, Assistant Professor of Finance, B Tech., Banaras Hindu University; M.B.A., Virginia Polytechnic Institute and State University; Ph.D., University of Iowa.

CLYDE W. RICHEY, Professor of Real Estate, B.S.(C.E.), Purdue University; M.B.A., Indiana University; Ph.D., University of Wisconsin.

NANCY RIDGWAY, Assistant Professor of Marketing, B.S., M.B.A., Ph.D., University of Texas at Austin.

RALPH G. RINGGENBERG, Associate Professor of Finance Emeritus.

JOSEPH G. ROSSE, Associate Professor of Strategy and Organization Management. B.S., Loyola University of Los Angeles; Ph.D., University of Illinois.

DAVID F. RUSH, Professor of Finance, A.B., DePauw University; M.B.A., D.B.A., Indiana University.

RUDOLPH SCHATTKE, Professor of Accounting, B.S., M.S., Ph.D., University of Illinois; C.P.A.

FRANK SELTO, Professor of Accounting, B.S.M.E., Gonzaga University; M.S.M.E., University of Utah; M.B.A., Ph.D., University of Washington.

WAYNE SHAW, Associate Professor of Accounting, B.S.B., Oklahoma City University; M.B.A., University of North Carolina at Greensboro; Ph.D., University of Texas at Austin.

RICHARD D. SPINETTO, Associate Professor of Production and Operations Management. B.S., Bowling Green State University; M.S., University of Michigan; Ph.D., Cornell University.

WILLIAM J. STANTON, Professor of Marketing Emeritus.

ROBERT H. TAYLOR, Professor of Marketing and Management Science and Information Systems, B.S., Purdue University; M.B.A., D.B.A., Indiana University.

JOHN A. TRACY, Associate Dean of Faculty Affairs and Academic Programs; Professor of Accounting. B.S.C., Creighton University; M.B.A., Ph.D., University of Wisconsin; C.P.A.

MAURICE A. UNGER, Professor of Real Estate Emeritus.

ROBERT S. WASLEY, Professor of Accounting Emeritus.

PHILLIP D. WHITE, Associate Professor of Marketing, B.S., M.B.A., Oklahoma State University; Ph.D., University of Texas.

DARYL WINN, Associate Professor of Business Economics. B.S., Arizona State University; M.B.A., Ph.D., University of Michigan.

ILZE ZIGURS, Assistant Professor of Information Systems, B.A., University of Washington; M.B.A., University of Nebraska; Ph.D., University of Minnesota.
The School of Education provides study and research opportunities for persons involved in teaching and the study of education. Through its graduate and undergraduate certification programs, it prepares teachers and researchers for all levels of education. Its faculty and students participate in research that develops new knowledge and understanding of the educational process.

**Accreditation**

The certification programs, both undergraduate and graduate, are fully accredited by the North Central Association of Colleges and Schools, by the National Council for Accreditation of Teacher Education, and by the Colorado Department of Education.

**Student Organizations**

The Student Advisory Board in Education represents undergraduate students seeking certification. Officers elected each fall serve as liaisons between the students in certification programs and the University of Colorado Student Union. The organization also performs vital advising and student assistance functions.

The Education Graduate Student Action Committee is a similar organization for graduate students. Its officers are selected in the fall.

Honorary societies in education include Kappa Delta Pi and Phi Delta Kappa.

**ACADEMIC EXCELLENCE**

**Scholarships and Awards**

The School of Education administers a number of scholarships and awards for its students. Graduate students in education are eligible to compete for Graduate School fellowships, and both graduate and undergraduate students are eligible to apply for Universitywide financial assistance. The following are available exclusively to students in education:

- The Judy Crites Herron Scholarship Fund. Awarded each year to an outstanding minority student in secondary education.
- The Elizabeth Anne Wilson Memorial Scholarship. Awarded each year to an outstanding graduate student whose emphasis area is elementary education.
- Clifford G. Houston Graduate Scholarship Fund. Limited to graduate students in counseling and student personnel work. Application for the Houston award must be made to the chair of educational psychological studies.
- The Emery and Evelyn Fitzsimmons Stoops Scholarship. Awarded yearly to an outstanding student in education. Competition for the award is automatically open to students having a 3.50 or better grade point average.
- The Harry M. Barrett Memorial Scholarship. Granted by Kappa Delta Pi and limited to seniors preparing to teach, the scholarship varies in amount from $25 to $50 per year.

Applications for these awards should be made on forms available from the Office of the Dean, Education 124, before March 1 of each year for the following summer or academic year.

**ACADEMIC STANDARDS**

Any student registered in the pre-graduate teacher certification program who fails to maintain a 2.75 grade point average may be placed on probation or may be suspended for a period of one academic year. Readmission is then subject to conditions determined by the dean. The same conditions apply to students in other colleges and schools who have been admitted to the teacher certification program.

**CERTIFICATION REQUIREMENTS**

The School of Education awards the diploma in education to students who simultaneously complete their bachelor's degree and a certification program at the University of Colorado. The certificate in education is awarded to students who complete a certification program.

Each state, including Colorado, requires public school teachers to be certified as qualified teachers by its state Department of Education. Certification requirements vary from state to state and from teaching area to area. Students who are interested in teaching in other states should familiarize themselves with the requirements of those states so they may plan an appropriate degree program.

The University of Colorado at Boulder, through the School of Education, offers course work leading to initial certification (Colorado Type A) in:

- Elementary education
- Secondary education fields:
  - English
  - Foreign language (French, German, Italian, Japanese, Latin, Russian, Spanish)
  - Mathematics
  - Sciences
  - Social studies
- Elementary/secondary (K-12) fields:
  - Art
  - Music

Teacher certification at the University of Colorado, while administered by the School of Education, is a University-wide function. Many academic departments provide course work that supports the teacher in training. The certification program involves a combination of courses at the University and off-campus educational experiences in cooperation with the public schools.

Students simultaneously completing teacher certification and an undergraduate degree at CU-Boulder must complete 30 to 45 hours of education courses (including student teaching) in addition to their major course work. Generally, four and one half years are typical for completion of both a B.A. degree and certification requirements. No professional education course work taken more than 10 years ago may count for teacher certification requirements.

Underlying the University's program of teacher certification are the assumptions that all teachers should:

1. Be professionally competent.
2. Possess personal qualities essential to effective teaching.
3. Have a liberal education.
4. Know well the subjects they teach.
The objectives of the University relative to teacher certification are the following:
1. To provide programs of undergraduate and graduate studies designed to develop outstanding teachers, supervisors, college teachers and administrators, and researchers.
2. To conduct and direct educational research and to engage in writing and related creative endeavors.
3. To identify and attract future outstanding teachers into the teacher certification program.
4. To cooperate with other state, regional, and federal agencies to improve educational programs.

Admission
Students should be aware that enrollment limits for the program have been established; therefore, there may be times when students who meet minimum requirements will not be admitted to the certification program.

Students Entering or Currently Enrolled at the University of Colorado
Undergraduate students seeking certification in the School of Education must be enrolled in a degree program in one of the colleges or schools of the University. Freshmen interested in teaching may seek certification advising at the time they enter the University. Freshmen and sophomore students are encouraged to satisfy as many of the degree and major requirements as they can before applying for admission to the certification program during the second semester of their sophomore year. Students should pick up advising materials in Education 151 and may participate in the group advising activities in the program each semester to become familiar with the program requirements and expectations.

Transfer Students
Students who seek to transfer to the University of Colorado from another accredited institution must apply for admission through the Office of Admissions. They must enroll in a degree program in one of the colleges or schools of the University and also apply for admission to the teacher certification program in the School of Education. The last 30 hours of course work for certification must be taken while the student is officially enrolled as a student in the University. Credit in student teaching will not transfer to the University of Colorado at Boulder.

Former Students
Former students who have not completed an undergraduate degree may reenter the University according to general University policies; however, they must apply separately for entry into the teacher certification program. Students previously admitted to an education program must reapply for acceptance in the present certification program. Students are required to complete the program in effect at the time of their most recent application.

Postbaccalaureate Students Seeking Certification
Students who already hold a bachelor's degree and wish to qualify for certification in elementary or secondary teaching must apply directly to the School of Education. Students desiring institutional recommendation for certification must complete at least 30 semester hours of work at the University of Colorado and must also fulfill the same certification requirements as undergraduate students. The actual number of required hours will depend on the courses already completed.

Requirements for Application
At the time of publication, new requirements for teacher certification were being established. The official requirements and application forms may be obtained in Education 151.
Students may apply to one of the programs if the following requirements have been fulfilled:
1. A minimum of 56 semester hours have been completed or are in progress with a grade point average of 2.75 overall, in the teaching field, at CU-Boulder, and in the most recent 30 semester hours.
2. Students have designated a major or earned a bachelor's degree from an accredited institution.
3. Approximately two-thirds of the general education requirements have been completed as specified by the student's school or college.
4. Postbaccalaureate students and currently enrolled students in schools or colleges other than arts and sciences are required to have 40 combined semester hours in the humanities, the natural sciences, and the social sciences, with no less than 6 hours in each when they finish the program.
5. Students who hold degrees should apply to the teacher certification program by March 1 for fall or summer admission and October 1 for spring admission.

Formal admission to a certification program may be granted when the student has been admitted to the University by the Office of Admissions, has passed all parts of the basic skills tests and the oral competency requirement (see below), provided verification of experience with youth, has sent all transcripts and application forms to the teacher certification office, has received a recommendation from one of the program's faculty advisors, and has paid the specified materials fee. Students are notified in writing of formal admission once this process is completed.

Once an undergraduate student enrolled in a teacher certification program graduates, the student will have to reapply to the University for admission as a postbaccalaureate student to continue in the certification program.

Prerequisites to the Certification Program
Basic Skills Tests. All students must pass the California Achievement Tests (CAT) in spelling, English, and mathematics as mandated by the Colorado Department of Education. A fee is charged for taking the test and for any retakes. These tests are given four or five times each year. Times and places are announced each January by the School of Education.
1. Students must pass the tests before they are formally admitted to the teacher certification program. Students who do not receive passing scores on the tests may take the tests three additional times.
2. Students must pass the tests before they are permitted to go to any public school to complete requirements for the teacher education courses.
3. Students should sign up for the tests in person (in Education 151) at least two weeks before the testing date, or until registration limits are reached.

Oral Competency Requirement. During the sophomore or junior year, students must enroll in and complete the course Oral Communication for Teachers (EDUC 3303) with a grade of B- or better. If students do not receive a grade of B- or better in EDUC 3303 or a similar speech course, they are required to pass an oral speech test before formal admission to the program. Alternate courses are listed in the advising manual.

Application for Admission
Individuals interested in completing a certification program at the University of Colorado at Boulder should request application materials from the teacher certification
office. Education 151. Students currently enrolled in a degree program at Boulder will need to complete an application and submit official transcripts from all previous colleges.

Individuals who have completed a baccalaureate degree at an accredited institution and are not currently enrolled at the University must have completed a program of application, apply for admission to the University, and submit official transcripts from all previous colleges directly to the School of Education. Applications cannot be processed until all materials are received in the teacher certification office, and applicants may not be admitted if enrollment levels have been reached before the processing of their application.

Advising

Students are responsible for obtaining an advising manual in Education 151 and becoming familiar with its contents. Specific information for all certification areas as well as a list of advisors is included in the manual.

Off-campus students may obtain a manual by writing to the Teacher Certification Office, Campus Box 249, University of Colorado at Boulder, Boulder, CO 80309-0249. Appropriate information can be sent only when a specific teaching field is indicated.

At CU-Boulder, degree requirements vary among the schools and colleges. Students seeking a degree at the University of Colorado should consult, as soon as possible, with an advisor in the college or school from which they expect to graduate.

Students are encouraged to become familiar with the certification requirements by comparing their own transcripts to the published advising materials. Students can then talk with an advisor before applying to the program or they may wait until after their applications are processed. Students wishing to discuss their evaluations should meet with the student advisor to discuss discrepancies. Students seeking certification in French, German, Italian, Japanese, Latin, Russian, Spanish, art or music should see the designated advisor in their major department.

Group advising sessions, available once each semester for all students at all levels in the program, are the recommended mode for seeking advising. Newly admitted students are also expected to attend an education orientation at the beginning of the fall or spring semester.

**Majors in Academic Areas**

The School of Education does not offer degree programs at the undergraduate level.

Students enrolled at the University of Colorado at Boulder seeking both a bachelor’s degree and certification in elementary or secondary teaching must complete a major in an academic department in the school or college in which they are enrolled. For students in the College of Arts and Sciences, 90 of the 120 semester hours required for graduation must be liberal arts course work.

To meet both degree and certification requirements, students, especially those seeking elementary certification, will be required to take more than 120 semester hours.

The major selected is determined by the student’s interest in teaching a certain subject or instructional level. Before selecting a particular major, students may see one of the certification advisors. Students interested in teaching at the secondary level need to be aware that in many subject areas the teaching program requires additional courses or more hours than the academic major. Course requirements for all programs are explained in the advising manual available in Education 151.

Certification in some secondary fields is not offered at the University of Colorado. For example, there are no programs in theater, business education, home economics, physical education, or industrial arts. Students interested in a particular major should consult an advisor in the School of Education.

**GRADUATE STUDY**

Graduate study in education at the University of Colorado is administered through the Office of Graduate Study, School of Education, and all inquiries regarding programs should be directed to the following address:

**Office of Graduate Study**
**School of Education**
**Campus Box 249**
**University of Colorado at Boulder**
**Boulder, CO 80309-0249**

Detailed program materials and the Graduate Student Handbook are available from the School of Education Graduate Office, Education 153. The degrees available in the various areas of graduate study are listed below:

- **Instruction and Curriculum in the Content Areas**
  - Mathematics education; science education; English education; social studies education; reading; secondary experiential education; and general curriculum in elementary and secondary education
  - Master of Arts
  - Doctor of Philosophy

- **Educational-Psychological Studies**
  - Educational psychology
  - Master of Arts
  - Doctor of Philosophy

- **Research and Evaluation Methodology**
  - Methods of educational research and evaluation, including statistics, measurement, and qualitative methods
  - Doctor of Philosophy

- **Social and Multicultural Bilingual Foundations**
  - Education and cultural diversity; foundations; policy and practice; international/comparative education; philosophical foundations and social policy; English as a second language; bilingual and multicultural education; and bilingual/special education
  - Master of Arts
  - Doctor of Philosophy

**Certification at the Graduate Level**

Through the School of Education (and in conjunction with other departments), the University of Colorado at Boulder offers course work leading to certification in the following areas:

- Reading teacher
- Special education
- Special services (offered through CDSS): Audiologist
- Speech/language pathologist
- Type B certification: elementary or secondary education
- Bilingual/ESL: English, mathematics, science, and social studies.

All of the above programs have degree or experience requirements that must be fulfilled before admission. Please check with the department before applying.

Special programs (called the "master's plus" programs) leading to Type A endorsement in elementary education and secondary English, science, social studies, and mathematics are available through the master of arts programs in instruction and curriculum in the content areas.

* These graduate certification programs are approved by all the accrediting groups.

**Admission**

Prospective students seeking admission to a graduate degree program should request application forms from the Education Graduate Office, Campus Box 249. The completed forms should be returned to that office. Prospective graduate students should also read the Graduate School por-
tion of this catalog for additional admission information. Applicants should request that the Educational Testing Service send their scores on the verbal, analytical, and quantitative sections of the Graduate Record Examination (GRE) to the education graduate office. A doctoral applicant who has not taken the GRE should arrange to do so.

Admission to all programs and degrees in the School of Education is selective. Meeting minimal admission requirements does not guarantee admission.

Application papers and all supporting documents, including GRE test scores, must be in the School of Education Graduate Office by August 1 for spring semester and February 1 for summer session and fall semester.

**Advising**

Graduate students are assigned an individual advisor and are required to submit a formal program of study, approved by their advisor, before the end of the first full term of study. Graduate students may obtain program information from the School of Education Graduate Office, Education 153, or from their advisor.

**General Information**

**Maximum Load and Part-Time Study**

A maximum of 15 hours in any one semester may be applied toward degree requirements. During the summer, 9 semester hours may be taken in the full summer session, 6 hours in a five-week summer term, and 3 hours in a three-week term. During the academic year, students will be regarded as having a full load if they are registered for not less than 5 semester hours in courses numbered 5000 or above, or are registered for 7 or 10 thesis hours.

**Quality of Work**

A grade average of B or better is required for all work taken for any graduate degree. Transferred credits are not included when calculating grade averages.

A mark of C may not be credited toward the Ph.D. program. Any graduate course in which a mark of D or F is reported is failed and must be repeated and passed if it is required in a student's degree program.

Students who do not maintain at least a B average or better may be suspended by the dean of the Graduate School upon the recommendation of the director of graduate study in the School of Education. Students may also be suspended from the Graduate School for continued failure to maintain satisfactory progress toward the degree sought.

**Master of Arts in Education**

The master of arts degree is available, comprising one academic year or more of graduate work beyond the bachelor's degree.

The master's degree must be completed within four years of initial enrollment. The M.A. plan II (nonthesis) degree requires a minimum of 30 semester hours. See the Graduate School section of this catalog for discussion of plan I and plan II. Students may transfer no more than 9 semester hours of work taken at another institution or as a nondegree student at CU-Boulder.

Most program areas have outlined a recommended or required program of study, and students pursuing a degree are expected to follow that program unless they have appropriate substitutions arranged in advance with their advisors. Pamphlets outlining the programs of study in education are available from faculty or the School of Education Graduate Office.

Early in the final term of study (at least 10 weeks before graduation) each student must submit a form titled 'application for admission to candidacy for an advanced degree.' These forms are available in the education graduate office. If a minor is included, the form must first be signed by a representative of the student's minor department or program area. The form must be signed by the student's advisor and submitted to the Education Graduate Office for School of Education approval and then to the Graduate School for final approval. All students are required to write a four-hour comprehensive-final examination. (For time limits and other information, see the Graduate School section under Master's Degree.)

**Education as a Minor Field**

In M.A. programs providing for majors outside the School of Education, students may include education as a minor if both their major department and the director of graduate studies in the School of Education approve. For master's degrees, a minor in education consists of at least 9 hours of study in related courses. Not more than 2 semester hours may be transferred from another institution.

Students who propose to minor in education must have had sufficient undergraduate work in education to prepare them for graduate study in the field. Appraisal of undergraduate preparation will be made by the director of graduate studies.

**Doctoral Study in Education**

In addition to the information included here, prospective Ph.D. students should see the Graduate School section of this catalog, and obtain a current copy of the School of Education Graduate Handbook.

The School of Education offers the doctor of philosophy (Ph.D.) in education. The doctoral program requires a period of study and research of two academic years (four semesters) or more beyond a master's degree or three years beyond a bachelor's degree.

Effective for all Ph.D. students admitted for the summer of 1992 and thereafter, the school requires at least two semesters of full-time study in residence (one semester must be during the first two years of doctoral study). The School of Education expects that students will not hold a full-time job during their two semesters of residence.

In addition to course work requirements, doctoral students should be immersed in ongoing research with the faculty as early in their program as possible. Beginning in the 1992-93 academic year, all doctoral students in the school will be required to complete, at a minimum, one publishable scholarly project prior to taking comprehensive examinations; other research endeavors prior to the dissertation are desirable. Each of the program committees has established a structure for implementing this requirement. For example, some programs expect students to work individually with their advisors; others make the research project an extra course requirement attached to a professional seminar.

**Admission Requirements**

Applicants for admission to doctoral study are expected to have a strong liberal arts background. A minimum undergraduate grade point average of 2.75 is required, but applicants are judged competitively so that most admitted applicants have GPAs of 3.00 or higher. A GPA of 3.00 or above is expected on all graduate work completed. Ph.D. applicants are not required in all cases to have a master's degree, although it is generally deemed preferable. The decision rests with the program area faculty. At least two years of professional experience relevant to the applicant's proposed area of study is required for most programs.

Graduate Record Examination scores of 1,500 or above (total on verbal, quantitative, and analytical portions of the basic test) are required for admission. To adjust for the different cultural experiences of some applicants, this standard may in certain instances be reduced on the basis of
faculty judgment. An interview with a faculty admissions committee may be required.

**DEGREE REQUIREMENTS**

Doctoral students in some programs are expected to have completed a course in statistical methods, a basic course in educational research, a graduate course in psychological foundations of education, and a graduate course in social foundations of education. If doctoral students have not had such courses, advisors may require one or more of these courses in addition to the courses approved for the degree sought.

All doctoral programs must include an intermediate statistics course (EDUC 7316) and must also include at least one advanced course in research methods (EDUC 7326, 7336, 7346). EDUC 5716 may not be used in the doctoral degree plan, but is a prerequisite to EDUC 7316. Students who have completed course work equivalent to EDUC 5716 or 5726 as part of a prior degree may seek approval of the substitute courses from the research, evaluation, and methodology (REM) chair. Students may also satisfy the prerequisite by receiving a passing grade on competency tests administered by the REM chair.

With approval of a candidate's committee and depending on the type of doctoral research planned for the dissertation, a two-course doctoral level research sequence in history, philosophy, or one of the social sciences may be substituted for the 7300 series above. Graduate courses in other departments may be included in any degree program if they are approved by the student's advisor and committee.

Most program areas have outlined a program appropriate for individuals pursuing study in their area, and students are expected to follow that program unless they have arranged appropriate substitutions in advance with their advisor. Pamphlets outlining the recommended programs of study in education are available from faculty or the education graduate office.

Approximately 40 semester hours of course work beyond the master's degree is the normal requirement for the Ph.D. All Ph.D. students are also expected to meet both the conversational foreign language and multiculturalism requirement.

**The Conversational Foreign Language Component** is focused on oral proficiency in another language. This requirement can be satisfied by completing a one-semester college-level conversational language course at an accredited institution within the past three years. Courses can be introductory college-level courses, such as SPAN 1010, FREN 1010, GRMN 1010, and ITAL 1010, because instruction is conducted in the language and substantial language labs are part of the course expectations. Courses taken at another institution must be equivalent to CU-Boulder courses to count toward this requirement. Students must earn a grade of C- or better.

**The Multiculturalism Course** should be completed after taking the language component. A specially designed doctoral-level course provides for both the theoretical analysis of issues and a substantial field-based component. The course is taught by faculty from the two foundations programs, thus including both theoretical and practical perspectives from sociology, anthropology, sociolinguistics, philosophy, and bilingual and multicultural education. The field experience, focused on linguistically or culturally different students or school communities, is a project of the student's choosing (e.g., action research, quasi-experiment, participant-observation, ethnographic community study, or case study of an individual student), planned in conjunction with the course instructors.

Before taking the comprehensive examination, each student must submit an application for admission to candidacy for an advanced degree. Application forms are available in the School of Education Graduate Office.

Near the end of the term when students complete their course work and if their advisor approves, they take a 12-hour comprehensive examination. The examination is focused chiefly on the student's area of program specialization. Students who fail the comprehensive examination may repeat it once, at a time to be determined by the examining committee.

In addition to the course work, a doctoral dissertation for 30 semester hours of credit is required of each student. A student registers for EDUC 8994 (Ph.D. Doctoral Dissertation) for three or more terms, but not more than 10 semester hours in any term. Not more than 10 semester hours may be taken prior to the successful completion of the comprehensive examination. After satisfactory completion of the comprehensive examination, the student must continuously register for 3, 7, or 10 hours during fall and spring semesters until the final defense. Registration for 3 hours requires permission of the associate dean of the Graduate School at least two months in advance. The student must be registered for 7 or 10 hours during the semester the defense is completed.

During the research for and the writing of a dissertation (thesis), a grade of IP (in progress) is reported; if the dissertation is completed and accepted as satisfactory, a grade is reported for the student's record. When the student and the chair of the dissertation committee agree on a subject for the dissertation, they work with the director of graduate studies to identify a five-person committee. Then the student prepares a detailed prospectus and arranges for a meeting with the committee. When the committee approves the prospectus, the student may proceed with the research. Research involving human subjects must also have the approval of the University committee on human research.

No continuing education work is permitted for the Ph.D.

**TIME LIMITS**

Time limits for the Ph.D. in education are the same as time limits for all Ph.D. programs. Students in education should read the Graduate School section for Ph.D. time limits.

When students have passed the comprehensive examination, they are required to register each semester until the degree is attained, and pay the standard fee as announced by the Graduate School.

**PROGRESS TOWARD A DEGREE**

Doctoral study entails a long period of scholarly endeavor, which requires a time schedule. Students are responsible for meeting the deadlines involved.

**OPPORTUNITIES FOR ASSISTANSHIPS**

The School of Education has a limited number of assistantships administered by the Dean of the School of Education on the recommendations of faculty and the director of teacher certification or director of graduate study. Some assistantships involve the supervision of student teachers; others involve helping professors in their teaching or research. Taxable stipends in amounts set by the University are paid for all assistantships. Appointments are usually made in terms of one-fourth time (10 hours a week) or one-half time (20 hours a week). Inquiries should be directed to the Dean, School of Education.

**COURSE DESCRIPTIONS**

The following courses are offered in the School of Education on the Boulder campus. This listing does not constitute a guarantee or contract that any particular course will be offered during a given year.
For current information on times, days, and instructors of courses, students should consult the Schedule of Courses issued at the beginning of each semester.

Courses numbered in the 1000s and 2000s are intended for lower-division students and those in the 3000s and 4000s for upper-division students. Courses numbered in the 5000s are primarily for graduate students, but in some cases may be open to qualified undergraduates. Normally, courses at the 6000, 7000, and 8000 level are open to graduate students only.

Courses are organized by subject matter and are listed numerically by last digit (courses ending in the number “0” are listed before courses ending in “1,” and so on). The number after the course number indicates the semester hours of credit that can be earned in the course. Abbreviations used in the course descriptions are as follows:

Prereq.—Prerequisite
Coreq.—Corequisite
Lab.—Laboratory
Rec.—Recitation
Lect.—Lecture

Teacher Education

Note: The following courses do not apply to elementary or secondary certification.

EDUC 2102-2. Introduction to Education. Provides a comprehensive portrayal of major issues in American education, focusing on public opinion, trends in assessing American education, students’ rights, and the teaching profession today and in the future.

EDUC 4410-3. Theory and Practice of Experimental Education. Introduces the theoretical underpinnings in philosophy, psychology, and the natural and social sciences of the educational and alternative education movements. Observes and analyzes practical applications in schools and public and private agencies.

EDUC 4570-3. Microcomputers in Education. Introductory course to programming basic language and use of software.

EDUC 4600 (1-3). Special Topics. Designed to meet needs of students with topics of permanent interest.

EDUC 4820 (1-6). Workshop in Curricular and Instructional Development. Considers current trends in curriculum development and in organization for instruction. In-depth study of one or more specific plans for classroom procedure.

EDUC 4830 (1-3). Instructional Workshop. Considers current instructional approaches. Focuses on classroom applications with in-depth study of selected topics. Advanced-level work, but credited toward graduate degrees only as a minor.

EDUC 4840 (1-4). Independent Study.

Elementary Certification

EDUC 3091-2. Social Foundations of Education. Studies American education in its cultural setting and its nature, role, and function in society, including political, historical, philosophical, sociological, economic, religious, multicultural, and other foundation aspects. Organizes to meet the needs of elementary certification students.

EDUC 3101-2. Educational Psychology for Elementary School. Psychologically based teaching and learning with applications at the elementary school level. Concurrent lab experience in schools. Coreqs. EDUC 4501. Open only to formally admitted elementary education students.

EDUC 4181-2. Methods in Elementary Social Studies. Familiarization with the social studies curriculum as it pertains to elementary public schools. Emphasizes organization (lesson plans and units), new trends, textbooks, new programs and materials, and content in teaching the social sciences.

EDUC 4191-2. Methods in Elementary Reading. Understanding and acquisition of basic methods in the teaching of reading at elementary school level. Includes teaching basic reading programs, language experience, individualized reading, content reading, study skills, diagnosis, and remediation. Coreqs. EDUC 4161 and 4221.

EDUC 4501-1. Media/Computers/University Aide Workshop. Workshop in media and computers, including observation of and involvement with children. As terms progresses, lessons may be taught to individuals and small groups. Very limited instruction involving the entire class. Coreqs. EDUC 3101.

EDUC 4511-1. Student Teaching Seminar. Meets before and during student teaching assignment. Includes topics of concern to teachers, such as classroom organization and management, lesson planning, and evaluation. Coreqs. EDUC 4691.

EDUC 4701-8. Student Teaching—Elementary School 2. Kindergarten and grades one through six in art and music. Should be taken concurrently with student teaching in home department.

Secondary Certification

EDUC 4102-3. Foundations of American Education. Study of American education in its cultural setting and its nature, role, and function in society, including political, historical, philosophical, sociological, economic, religious, multicultural, and other foundation aspects. Includes school-based tutorial experience. Organizes to meet the needs of students in secondary education.

EDUC 4112-3. Educational Psychology and Adolescent Development. Analyzes fundamental psychological concepts underlying classroom instruction, as well as adolescent growth and development.

EDUC 4232-3. Teaching Reading in the Content Areas. Methods and materials for content area reading, including vocabulary, comprehenison, and study skills strategies.

EDUC 4322-3. Literature for Adolescents. Reading and evaluation of books for junior and senior high school pupils. Emphasizes modern literature.

EDUC 4342-3. Composition for Teachers. Strategies for evaluating and teaching written composition in the secondary schools. Emphasizes structure of prose, invention, motivation, audience, and other rhetorical considerations, as well as teaching methodologies.

EDUC 4722-8. Student Teaching—Secondary School 2. Student teacher attends a junior or senior high school in the Boulder-Denver metropolitan area.
EDUC 4732 (B-14). Student Teaching—K-12. Required experience for art and music students seeking certification at both elementary and secondary levels.

EDUC 4912-1. Practicum in Teacher Education. Designed for students taking the graduate equivalent of EDUC 4122. Requires 100 hours of observation and in-school experience. Coreq., EDUC 4122. Also must be taken with EDUC 5105 or 6318 if student is seeking initial teacher certification.

Elementary and Secondary Certification

EDUC 4464-2. Teaching Exceptional Children in the Regular Classroom. Introduction to students who are handicapped in one or more of the traditional categories. Emphasizes working with these students in the least restrictive environment. Students observe modeled classrooms where handicapped students are being mainstreamed. Gives special emphasis to various modifications in curriculum and teaching approaches. Meets Colorado exceptional child certification requirements.

Graduate Education

Note: The following courses are not program-specific and may be taken by master's and doctoral students with permission of instructor.

EDUC 6805 (1-4). Special Topics. Designed to meet needs of graduate students with topics of current interest.

EDUC 6844 (1-4). Master's Independent Study.

EDUC 6944-3. Master's Degree Candidate.

EDUC 8004-3. Doctoral Research Seminar. Gives beginning doctoral students an overview of the field of educational research, with special attention to the research programs of education faculty. Programs include work based in psychology, sociology, anthropology, sociolinguistics, philosophy, and political science.

EDUC 8804 (1-3). Special Topics. Designed to meet special needs of graduate students with topics of current interest.

EDUC 8844 (1-4). Doctoral Independent Study.

Curriculum, Foundations, and Instruction

EDUC 5005-3. Social Foundations of Education. Evaluation of social values and forces in American society that shape or influence aims, philosophies, methods, content, issues, and problems of the American educational enterprise.

EDUC 5015-3. International and Comparative Education. Comparative study of education in other countries emphasizing the role of education in developing nations. Political, social, and economic policies and ideologies are analyzed for their relevance to the development process.

EDUC 5025-3. Images of the Future. Study of the future: implications for global society, U.S. society, and education; dealing with several ways of imagining the future, value dimensions, schools and curricula of the future, and future studies and global studies as school subjects.

EDUC 5035-3. Proseminar: Parent and Community Involvement. Focuses on models and strategies for improving parent and community involvement in the schools. Discusses administrative concerns, such as parent advisory councils, and instructional concerns, such as helping children with school assignments. Prereq., EDUC 5425.

EDUC 5055-3. Philosophy of Education. Traces the development of educational theory and practice from ancient times to the present day, emphasizing contemporary philosophies and trends.

EDUC 5105-3. Effective Instruction. Investigation of research on teaching and development of systems for analyzing the teaching-learning process.

EDUC 5125-3. Supervision of Student Teachers. Designed to develop competency in the supervision of student teachers, including attention to various modern and new approaches. For cooperating teachers as well as supervisors.

EDUC 5165-3. Children's Literature. Reading and evaluation of books, children's interests, authors and illustrators, folk literature, multicultural literature, modern fantasy tales, and trends.

EDUC 5195-4. Elementary Reading Theory and Methods. Understanding and acquisition of basic methods in the teaching of reading at the elementary level. Includes basic approach, literature approach, and individualized instruction.

EDUC 5225-4. Elementary Language Arts Theory and Methods. Current thought, as determined by research findings, in the various areas of the language arts: oral and written communication, spelling, handwriting, usage, grammar, foreign languages, and bilingual education.

EDUC 5235-3. Teaching Reading in Content Areas. Format information from content area to content area; materials, equipment, readability of content materials; vocabulary, variations in comprehension, and variations in study procedures.

EDUC 5245-3. Foundations of Reading Instruction K-12. Comparative analysis of current and emerging philosophies and programs in K-12 with focus on teaching reading and thinking skills.

EDUC 5255-3. Processes Involved in Reading. Concepts needed for understanding and critically evaluating the competencies involved in learning how to read. Examining and dealing with child and adolescent development and linguistic orientation. Prereq., EDUC 5245.

EDUC 5265-3. Processes in Writing. Investigates processes writers use from early ages to maturity as they compose prose. Considers several process models; surveys current research, and makes suggestions and evaluates research designs.

EDUC 5275-3. Diagnostic and Remedial Techniques of Reading. Causes of low reading ability and techniques employed in teaching the poor reader; diagnostic, motivation, and skills.

EDUC 5285-4. Reading Clinic Procedures K-12. Supervised diagnosis of reading problems; evaluation instruments; pertinent research; and case study approach.

EDUC 5325-3. Literature for Adolescents. Reading and evaluation of books for junior and senior high school pupils. Emphasizes modern literature.

EDUC 5345-3. Composition for Teachers. Strategies for evaluating and teaching written composition in the secondary schools. Emphasizes structure of prose, invention, motivation, audience, and other rhetorical considerations, as well as teaching methodologies.

EDUC 5355-3. Advanced Methods in Secondary Social Studies Education. Designed to meet the needs of experienced teachers and those who will teach in public schools. Examines recent developments in theory and materials in the social studies and analyzes current practices for their contribution to general goals of social studies education. Appropriate for teachers in grades 7-12, but also profitable for elementary teachers with a specialization in social studies.

EDUC 5365-3. Advanced Methods in Secondary English Education. Designed to give experienced teachers an opportunity to investigate specific methods and strategies for teaching English from the middle school through senior high school levels.

EDUC 5375-3. Advanced Methods in Secondary Mathematics. In-depth investigation of specific methods and strategies suitable for teaching mathematics from the middle school through senior high school levels.

EDUC 5405-3. Skill Development in Experiential Education. Field-based course designed to upgrade outdoor skills and ability to use alternative living environments for the outdoor educator, the traditional classroom teacher, and the alternative educator. Colorado's mountains, rivers, and urban environment are utilized in the data.

EDUC 5415-3. Theory and Practice of Experiential Education. Introduction to the theoretical underpinnings in philosophy, psychology, and the natural and social sciences of the experiential and alternative education movements. Observes and analyzes practical applications in schools and public and private agencies.

EDUC 5425-3. Introduction to Bilingual/Multicultural Education. Provides a comprehensive survey of bilingual-multicultural education programs for language minority students. Includes an overview of the history and legislation related to bilingual education. Presents various models, philosophies, and theoretical underpinnings of bilingual education. Discusses strategies and important considerations for teaching the LEP-handicapped.

EDUC 5435-3. Materials and Methods in Bilingual/Multicultural Education. Provides an in-depth study of curriculum options available for the bilingual classroom. Presents, reviews, and critiques specific methods and strategies for teaching language minority students. Emphasizes methods for implementing cooperative learning strategies. Teaching units are developed and presented in Spanish or in ESL methodology, as appropriate. Prereq., EDUC 5425.

EDUC 5445-3. Curriculum for Multicultural Education. Analysis of curriculum programs and application of principles and innovation for education of ethnic-racial students at all school levels.

EDUC 5455-3. Literacy for Linguistically Different Learners. Current and emerging philosophy and methods for teaching reading to culturally diverse second-language learners. Includes review of materials, strategies for teaching reading and writing skills, and important considerations for transfer from L1 to L2 reading. Prereq., EDUC 5425 or reading course at 5000 level.

EDUC 5465-3. Needs and Education of Exceptional Children. Discusses characteristics and needs of various types of handicapped and gifted students. Special attention given to procedures used for diagnosis and the suggested educational adjustments and care required by these students. Discusses successful teaching techniques and instructional approaches, including individual instruction, least restrictive environment transition, and career education. Meets Colorado exceptional child certification requirements.

EDUC 5485-3. Teaching Exceptional Children in the Regular Classroom. Introduction to students who are handicapped in one or more of the traditional categories. Emphasizes working with these students in the least restrictive environment. Students observe model classrooms where handicapped students are being mainstreamed. Special emphasis given to various modifications that can be made in curriculum and teaching approaches. Meets Colorado exceptional child certification requirement.

EDUC 5505-3. Education of Students with Learning and Behavior Disorders. Discusses unique learning needs of students who are mentally retarded, learning disabled, and behavior disordered. Particular emphasis given to development of a systems model for diagnosis, programming, and remediation. Stress test-based individualization of instruction with emphasis on intervention in the least restrictive environment.

EDUC 5515-3. Curriculum and Methods for Moderately Handicapped 2. Emphasizes development of skills for teaching the moderately handicapped student. Includes designing of classrooms and curriculum. Reviews variety of behavior management and crisis intervention strategies, as well as the use of affective materials for socio-emotional behavior changes.

EDUC 5525-3. Research and Evaluation in Special Education. Practical experience in the review, critique, conceptualization, and writing of research studies in special education. Experience in design of evaluation systems for classroom practice.

EDUC 5535-3. Diagnostic Testing in Bilingual and Special Education. Includes both theoretical and applied aspects of diagnostic testing. Reviews administration and interpretation of current educational tests (intelligence, achievement, language proficiency, and adjustment scales). Emphasizes practices for equitable testing and assessment of special populations.

EDUC 5545-3. Curriculum and Methods for the Moderately Handicapped. Reviews the various educational curricula currently in use with moderately handicapped students. Emphasizes different teaching methods, instructional materials and learning strategies that have proven effective in working with students with cognitive learning needs.

EDUC 5555-1-4. Elementary Moderate Needs Practicum. Supervised field experience in special education with moderate needs handicapped students. Each credit hour requires 50 contact hours. Prereqs., EDUC 5465, 5505, 5545, and 5515.

EDUC 5575 (1-4). Workshop in Instruction and Curriculum in Content Areas.

EDUC 5585 (1-4). Workshop in Social, Multicultural, and Bilingual Foundations.

EDUC 5605-3. Research Issues in Bilingual Education. Practical experience in the review, critique, conceptualization, and writing of the research studies in bilingual/ESL education. Provides experience in the design of classroom evaluation systems. Prereq., EDUC 5425.

EDUC 5615-3. Second Language Acquisition. Presents a broad survey of second-language acquisition research. While theoretical concerns and research findings are stressed, practical applications to second-language development are made. Special emphasis given to second-language acquisition.

EDUC 5635-3. Education and Sociolinguistics. Gives students an introduction to the discipline of sociolinguistics, which is the study of language variation and use, and its application within education settings. Not designed as an advanced sociology or linguistics course. Areas of study include language variation, speech communities, the ethnography of communication, speech, and social identities, and sociolinguistic research related to teaching and learning.

EDUC 5705-3. Theories of Learning and Development. Examines current theory and research on child development, learning, and motivation. Emphasizes the relationship between and among development, learning, motivation, and how theory and research can inform instructional decisions in the elementary classroom. Prereq., admission to the elementary MA program.

EDUC 5715-4. Education, Society, and the Elementary Teacher. Introduces issues affecting teachers and the teaching profession. Students examine these issues from a variety of theoretical viewpoints including conservative, radical, progressive, and socially distant orientations. Students also examine and analyze the cultural, structural, and institutional features of schooling. Prereq., admission to the elementary MA program.

EDUC 5725-4. Issues in Elementary Education. Introduces the role of practical reasoning in curricular and pedagogical practice. Students examine and analyze current curriculum materials, pedagogical practices, and institutional contexts. Prereqs., EDUC 5705 and 5715.

EDUC 5735-3. School-Based Professional Seminar. Required of both cooperating and student teachers in the student teaching semester of the elementary MA program. Includes observation and analysis of classroom interaction, models for school-based professional study groups, and development of action research projects. Prereqs., EDUC 5705, 5715, and 5725.

EDUC 6325-3. Anthropology and Education. Applies anthropological perspectives to research in educational settings. Focuses on theories of culture, cultural transmission and acquisition, and cultural reproduction and reproduction for understanding schooling and its outcomes.
EDUC 6855 (1-4). Independent Study in Instruction and Curriculum in Content Areas—Master's.

EDUC 6915 (1-4). Practicum in Instruction and Curriculum in Content Areas.

EDUC 6925 (1-4). Readings in Instruction and Curriculum in Content Areas.

EDUC 7015-3. Teaching Internship in Teacher Education. One-semester teaching internship in an undergraduate or graduate foundations course.

EDUC 7105-3. Issues and Consultation in Bilingual Special Education. Covers fundamental issues of bilingual special education and describes effective consultation practices between the special education teacher and other educational personnel. Utilizes cooperative learning teams to develop program and curriculum models for identifying and instructing minority handicapped students.

EDUC 8855 (1-4). Independent Study in Instruction and Curriculum in Content Areas—Doctoral Level.

EDUC 8925 (1-6). Internship in Instruction and Curriculum in Content Areas.

Research, Evaluation, and Methodology

EDUC 5706-3. Development of Educational Measures. Covers the construction, interpretation, and evaluation of achievement tests, attitude measures, questionnaires, and sociometric measures. Item analysis, validity, reliability, and norming considerations. Interpretation and use of standardized intelligence and achievement tests.

EDUC 5716-3. Basic Statistical Methods. Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability; correlation and prediction; and basic inferential statistics, including the t-test.

EDUC 5726-3. Introduction to Disciplined Inquiry. Considers various research approaches and methodologies including experimental and quasi-experimental methods; anthropological and case study methods; evaluative research and field studies; correlational and ex post facto research; and sociological, historical, and philosophical research. Topics include information retrieval and library research, the role of the computer, research criticism, and proposal writing.

EDUC 5736 (1-4). Workshop in Research and Evaluation Methodology.

EDUC 5916 (1-4). Practicum in Research and Evaluation Methodology.

EDUC 6926 (1-4). Readings in Research and Evaluation Methodology.

EDUC 7316-3. Intermediate Statistical Methods. Sampling theory and inferential statistics; advanced applications for testing of hypotheses regarding central tendency, variability, proportion, correlation, and normality; chi-square and the analysis of frequency data; multiple regression and prediction; introduction to the analysis of variance; and related computer programs for statistical analysis. Required of all doctoral candidates. Prereq., EDUC 5716.

EDUC 7326-3. Experimental Design and Analysis I: Experimental and quasi-experimental designs in educational research; selecting an appropriate statistical test; power and statistical efficiency; randomization and control; multiple comparisons; factorial experiments and interaction with fixed-factor and mixed designs; analysis of covariance; effects of assumption violations; related computer programs for statistical analysis. Prereq., EDUC 5726 and 7316.

EDUC 7336-3. Methods of Survey Research and Assessment. Theory and techniques involved in each stage of survey research, including problem formulation, questionnaire development, interview surveys, assessing reliability and validity, sampling plans, data reduction, (e.g., factor analysis), and analysis of continuous and categorical data. Prereq., EDUC 5726 and 7316.

EDUC 7386-3. Educational Evaluation. Study of models and methods for evaluation of educational programs. Evaluation models proposed by curriculum and instructional researchers are critically examined. Application of methods of measurement and experimentation to evaluation problems is studied. Exemplary evaluation projects are studied in detail.

EDUC 7396-3. Multivariate Analysis. Introduction to the theory of advanced multivariate techniques and their application in educational research. Topics include analysis of time-series experiments, MANOVA, discriminant function analysis, and multiple regression.

EDUC 7416-3. Seminar: Research Methodology. Selected topics for advanced study in educational research, statistics, measurement, and evaluation.

EDUC 8866 (1-4). Independent Study in Research and Evaluation Methodology—Doctoral Level.

EDUC 8936 (1-6). Internship in Research and Evaluation Methodology.

Educational Psychological Studies

EDUC 6318-3. Psychological Foundations of Education. Surveys results of psychological research, emphasizing applications to educational practice. Major topics include motivation, behavior, learning, development, and individual differences.

EDUC 6358-3. Children's Thinking. Covers the experimental psychology of thinking, emphasizing differences between children and adults in modes of thought. Topics include memory, concept acquisition, strategies, problem solving, and originality. Prereq., EDUC 6318.

EDUC 6408-3. Theory and Techniques of Counseling. Discusses theories of counseling and skills needed to facilitate interpersonal relationships. Interviewing techniques and other specific helping skills. Twenty hours of microcounseling in a laboratory required in addition to classroom instruction. Prereq., EDUC 6388 and 6398.

EDUC 6418-3. Advanced Theory and Techniques of Counseling. Applies counseling techniques to group counseling. Emphasizes group dynamics and group process. Twenty hours of participation in an intensive group experience required in addition to classroom instruction. Prereq., EDUC 6388, 6398, and 6408.

EDUC 6528 (1-4). Workshop in Educational and Psychological Studies.

EDUC 6888 (1-4). Independent Study in Educational and Psychological Studies—Master's Level.

EDUC 6918 (1-4). Practicum in Educational and Psychological Studies.

EDUC 6928 (1-4). Readings in Educational and Psychological Studies.

EDUC 8328-3. Psycho-Educational Diagnostics II. Personal appraisal of the individual emphasizing educational application of projective personality data.

EDUC 8338-3. Seminar: School Psychology. Selected topics in the field of school psychology including consideration of current practice and literature.

EDUC 8348-3. Seminar: Human Development. Intensive study of selected topics in growth and development, with applications to educational situations.

EDUC 8358-3. Seminar: Human Learning. Reviews in-depth a limited number of currently active topics in cognitive psychology to reveal unresolved research problems. Each participant is responsible for presenting a research proposal and for being an informed critic of the presentations of others.

EDUC 8368-3. Seminar: Instructional Psychology. Intensive study of small sample research
design and analysis of selected topics in instructional psychology.

EDUC 8378-3. Research Seminar: Educational Psychology. Intensive review of special topics in the application of psychological science to educational practice.

EDUC 8388-3. Consultation in Schools. Covers consultation definitional issues. Defines participant roles, and explores process and outcome goals. The success of consultation depends on the use of Carthoff interpersonal skills throughout the process.

EDUC 8938 (1-6). Internship in Educational and Psychological Studies.

Social, Multicultural, and Bilingual Foundations

EDUC 6899 (1-4). Independent Study in Social, Multicultural, and Bilingual Foundations—Master's Level. Instructor consent required.

EDUC 6919 (1-4). Practicum in Social, Multicultural, and Bilingual Foundations. Instructor consent required.

EDUC 6929 (1-4). Readings in Social, Multicultural, and Bilingual Foundations. Instructor consent required.

EDUC 8939 (1-6). Internship in Social, Multicultural, and Bilingual Foundations. Instructor consent required.

FACULTY

PHILIP DiSTEFANO, Dean and Professor.
M.A., West Virginia University; B.S., Ph.D., Ohio State University.

HAROLD MILTON ANDERSON, Professor Emeritus.

RONALD DeLaine ANDERSON, Professor.
B.S., Ph.D., University of Wisconsin.

LEONARD M. BACA, Professor. S.T.B., Catholic University of America; M.A., University of New Mexico; Ed.D., University of Northern Colorado.

HILDA BORKO, Associate Professor. B.A., M.A., Ph.D., University of California at Los Angeles.

RUTH K. CLINE, Professor. B.A., St. Olaf College; M.A., Ph.D., University of Iowa.

JACK EUGENE COUSINS, Professor Emeritus.

ROBERT de KIEFFER, Associate Dean Emeritus, Continuing Education.

MARGARET A. EISENHART, Associate Professor. B.A., Emory University; M.A., Ph.D., University of North Carolina.

ROBERTA FLEXER, Associate Professor. B.S., Tufts University; M.Ed., Harvard University; Ph.D., University of Colorado.

CALVIN GRIEDER, Professor Emeritus.

STEVEN R. GUBERMAN, Assistant Professor. B.A., University of Chicago; M.A., Ph.D., University of California at Los Angeles.

JOHN D. HAAS, Professor. B.A., Hope College; M.A., Ph.D., University of Michigan.

RICHARD HARPEL, Director of Federal Programs, President's Office; Associate Professor. B.A., Wheaton College (Illinois); M.P.S., Ph.D., University of Colorado.

MYRLE EMERY HEMENWAY, Associate Professor Emeritus.

ELFRIEDA H. HIEBERT, Professor. B.A., Fresno Pacific College; M.Ed., University of Illinois; Ph.D., University of Wisconsin.

STEPHEN E. HODGE, Associate Professor. A.B., Sacramento State College; M.Ed., Ph.D., University of Missouri.

KENNETH D. HOPKINS, Professor. A.B., Pasadena College; M.S., Ph.D., University of Southern California.

ERNEST R. HOUSTON, Professor. A.B., Washington University; M.S., Southern Illinois University; Ed.D., University of Illinois.

CLIFFORD G. HOUSTON, Professor Emeritus.

KENNETH R. HOWE, Associate Professor. B.A., M.A., Ph.D., Michigan State University.

KENNETH LAWRENCE HUSBANDS, Professor Emeritus.

MICHAEL KALK, Professor Emeritus.

VERNE CHARLES KEENAN, Associate Professor. B.S.E.E., University of Washington; M.A., San Jose State College; Ph.D., University of California, Berkeley.

RICHARD JOHN KRAFT, Professor. B.A., Wheaton College (Illinois); M.S.Ed., Northern Illinois University; Ph.D., Michigan State University.

PHILIP LANGER, Professor. A.B., University of Michigan; M.A., New York University; Ph.D., University of Connecticut.

MARGARET D. LeCOMPTHE, Associate Professor. B.A., Northwestern University; M.A., Ph.D., University of Chicago.

ROBERT L. LINN, Professor. A.B., University of California, Los Angeles; M.A., Ph.D., University of Illinois.

DANIEL P. LISTON, Associate Professor. B.A., Earlham College; Ph.D., University of Wisconsin, Madison.

ROY P. LUDTKE, Professor Emeritus.

PAMELA A. McCOLLUM, Assistant Professor. B.A., M.A., Ph.D., University of Illinois.

WILLIAM McGINLEY, Assistant Professor. A.B., Western Kentucky University; M.Ed., Idaho State University; Ph.D., University of Illinois.

ROBERT C. McKean, Professor Emeritus.

MICHAEL S. MELOTH, Assistant Professor. B.S., Boise State University; M.A., San Francisco State University; Ph.D., Michigan State University.

HUBERT H. MILLS, Professor Emeritus.

OFEILIA MIRAMONTES, Assistant Professor. M.A., United States International University; B.A., Ph.D., San Diego State University.

LINDA A. MOLNER, Senior Instructor. B.A., Ph.D., University of Colorado at Boulder; M.Ed., Colorado State University.

MILES C. OLSON, Professor. B.S., M.Ed., South Dakota State University; Ed.D., University of Nebraska.

KARL OPENSHAW, Professor Emeritus.

ROBERT D. PRICE, Professor. B.S., State University of New York; M.A., University of Wyoming; Ph.D., University of Texas.

LOREN STANLEY RATLIFE, Associate Professor. B.S., M.S., Ed.D., University of Denver.

MARIA de la LUZ REYES, Assistant Professor. B.A., Webster University (St. Louis); M.Ed., Texas Woman's University; Ph.D., University of California, Santa Barbara.

ALBERT EDWARD ROARK, Professor. B.A., M.A., Arizona State University; Ph.D., University of Arizona.

STEPHEN ROMINE, Professor Emeritus.

JAMES S. ROSE, Professor Emeritus.

DARYL L. SANDER, Professor Emeritus.

LORETTA A. SHEPARD, Director of Graduate Studies and Professor. B.A., Pomona College; M.A., Ph.D., University of Colorado.

NANCY BUTLER SONGER, Assistant Professor. B.A., University of California at Davis; M.S., Tufts University; Ph.D., University of California at Berkeley.

MARC SWADENER, Associate Dean and Associate Professor. B.S. (Ed.), M.S. (Ed.), M.A.T., Ed.D., Indiana University.

RICHARD L. TURNER, Professor. B.S., M.A., Northwestern University; Ph.D., Indiana University.

JAMES R. WAILES, Professor Emeritus.

SHELBY ANNE WOLF, Assistant Professor. B.A., University of Richmond; B.A., M.S., University of Utah; Ph.D., Stanford University.
College of Engineering and Applied Science

Richard Seebass, Dean

The College of Engineering and Applied Science offers ten undergraduate degrees: aerospace engineering sciences, architectural engineering, chemical engineering, civil engineering, electrical engineering, electrical and computer engineering, mechanical engineering, computer science, applied mathematics, and engineering physics. The first seven are accredited by the Accreditation Board for Engineering and Technology; the other three are applied science degrees and there is no appropriate accrediting board for them. The degrees in applied mathematics and engineering physics are offered in cooperation with the Applied Mathematics Program and the Department of Physics of the College of Arts and Sciences.

Facilities
Students have an opportunity to study engineering with over 150 faculty of national and international reputation. They have access to the superb facilities of the College of Engineering and Applied Science. Each engineering department has laboratories suitable for undergraduate and graduate instruction and experimental research through the doctoral or postdoctoral level. Specific information on these facilities may be obtained from the departments concerned.

Computing
Classes in all departments of the college place strong emphasis on the use of computers. All entering freshmen receive instruction and undertake academic projects involving computers. While many students choose to obtain personal computers, several hundred computers are available in open laboratories on campus for student use. Many of these laboratories are located in the Engineering Center.

Further information on computing can be found in this catalog under Campus Facilities and Resources, engineering department summaries, and the description of research facilities found in the Graduate School section.

Degree Programs
Within most departments several degree paths are offered. Most departments offer elective programs of study emphasizing bioengineering and/or pre-medicine. Several have environmental engineering options. Some programs of study are oriented toward graduate work; others toward engineering practice.

Engineers work in a wide variety of disciplines, and the 10 degree programs of the college reflect this diversity. The following descriptions summarize these areas.

Aerospace engineering sciences prepares engineers for an industry that encompasses the design and construction of commercial and military aircraft and space vehicles. Recent advances in this technology have permitted the aerospace industry to enter the fields of urban mass transit, underwater exploration, bioengineering, nuclear engineering, laser technology, and other emerging high technology fields. The aerospace engineer often works at the forefront of engineering with scientists in the fields of mathematics, physics, chemistry, and biology.

Applied mathematicians have the expertise and mathematical sophistication necessary to make contributions in a wide variety of fields, including scientific computation, actuarial science, financial modeling, and most areas of science and engineering that have a mathematical basis.

A professional applied mathematician may work with engineers, scientists, programmers, and other specialists. The curriculum at CU-Boulder is designed to have the breadth for such an interdisciplinary career.

Course offerings at the undergraduate level focus on providing students with mathematical tools, problem-solving strategies, and expertise useful in science and engineering. To fulfill requirements, a concentrated area of engineering courses (or approved natural science courses) must be completed. The college has formulated seven recommended options within the discipline.

Architectural engineering prepares students for careers in the building industry and for research at the graduate level on building-related topics. This course of study fulfills the academic requirements for registration as a professional engineer.

The architectural engineering curriculum is recommended for those wishing to specialize within the building industry in engineering design, construction and contracting, or sales engineering. The architectural engineering student may select any one of several areas of specialization offered: construction, environmental, structural, or building energy engineering and illumination.

Chemical engineers convert natural resources into industrial and consumer products in facilities that include refineries and chemical plants. Among their products are many that are not identified with chemical engineering—oils, metals, glass, plastics, rubber, paints, soaps and detergents, foods, beverages, electronics, synthetic and natural fibers, nuclear and exotic fuels, and medicines.

This department has a strong bioengineering/premedical engineering program and is interested in research directed toward the ecologically sound development of chemical processes. It is involved in active research and educational programs in the exciting field of biotechnology, which involves the use of individual cells and their components for producing pharmaceuticals and other important products. The department is also actively involved in environmental pollution control and in safe and efficient energy production.

Civil and environmental engineering offers a challenging career to students interested in the design and construction of buildings, bridges, dams, aqueducts, and other structures; in transportation systems including highways, canals, pipelines, airports, rapid transit lines, railroads, and harbor facilities; in the transmission of water and the control of rivers; in the development of water resources for urban use, industry, and land reclamation; in the control of water quality through water purification and proper waste treatment; in the construction and contracting industry; and in the problems concerned with the physical environment and the growth of cities.

Computer science offers study in the fields of programming languages, artificial intelligence, software engineering, operating systems, parallel processing, numerical analysis, database systems, and the theory of computation. Graduates typically take positions as systems programmers for computer manufacturers or software firms, advanced applications programmers in scientific research firms, or technically ori-
ent systems designers in a commercial or government environment.

Electrical engineering leads to professional opportunities that include teaching and research in a university; research and development of new electrical or electronic devices, instruments, or products; the design of equipment or systems; production and quality control of electrical products for private industry or government; and sales or management for a private firm or branch of government. Design specialties within electrical engineering include computer interfaces and computer software; electromagnetic fields and electives basic to radio, television, and related systems; communication theory and signal processing; electrical machinery; solid-state, integrated-circuit, and electron devices; energy and power; control systems; and robotics.

Electrical and computer engineering offers a program designed to provide entry-level competence in computer engineering. The program includes design and construction of efficient software systems as well as an introduction to hardware design. One current area of major interest is the study of parallel processing. This degree program is open only to juniors and seniors; admission must be approved by the department.

Engineering physics offers a program in which general knowledge of the diverse fields of physics provides the ability to deal with industrial problems that cannot be solved by a standardized procedure in a specialized field. Students are then prepared for careers in physics where there are many and varied opportunities in development work and industrial research. It is also basic for graduate work in physics, for specialized training in research, and is especially appropriate to space technology and research.

Mechanical engineering is not specifically identified with a particular technology. Mechanical engineers deal with internal combustion engines, jet engines, and rockets; automobiles, airplanes, and space vehicles; and power plants, marine structures, and space platforms. They invent devices for research, industrial, and medical applications, and contribute to the manufacture of machinery, appliances, and computers. Because of its interdisciplinary nature, mechanical engineering occupies a central position in modern science and technology, and mechanical engineers are sought by a wide variety of industrial and governmental organizations, from mining to aerospace. In these organizations they conduct basic and applied research, develop new devices and processes, and carry out design and manufacturing operations.

Telecommunications is an interdisciplinary graduate program that integrates courses in electrical engineering, computer science, political science, information systems, management, and economics. Through such an approach, and a world-class telecommunications laboratory, students are equipped to design, plan, analyze, and manage telecommunications systems, networks, and the many advanced and innovative uses of interactive communications today. Students enter the program with a wide variety of technical or liberal arts undergraduate degrees and expand their knowledge through individually tailored combinations of courses from the various disciplines. This ensures balanced, specialized capabilities necessary for a comprehensive understanding of the technological and sociocultural aspects of telecommunications. For detailed information, see the Interdisciplinary Programs listing in the Graduate School section of this catalog.

Professional Registration

The need for professional registration depends on the field of engineering and the nature of practice in that field. Engineers in private professional practice generally need to be registered. Currently, registration is required in all states for the legal right to practice professional engineering. Although there are variations in state laws, graduation from an accredited curriculum in engineering, subscription to a code of ethics, and four years of qualifying experience are minimum requirements for registration. Two days of examinations covering the engineering sciences and the applicant's practical experience are also required in most states and territories.

Study Abroad

In today's international environment, engineers frequently work and travel in foreign nations or with foreign engineers. Therefore, it is desirable that engineering students familiarize themselves with foreign cultures by selecting appropriate courses or by studying abroad. Cooperative programs in engineering education are maintained by the University of Colorado and the Ecole National des Ponts et Chaussées in Paris; the Ecole Polytechnique Feminine in Paris; the Instituto Tecnológico y de Estudios Superiores de Monterrey in Mexico; the University of Stuttgart in Germany; the Universities of Lancaster and East Anglia in England; and the University of Oviedo in Spain. With the proper preparation, students may complete one or two semesters of engineering education abroad (see International Education in this catalog).

Student Organizations

The following honorary engineering societies have active student chapters in the College of Engineering and Applied Science:

Chi Epsilon, civil and architectural society
Eta Kappa Nu, electrical engineering society
Omega Chi Epsilon, chemical engineering society
Pi Tau Sigma, mechanical engineering society
Sigma Gamma Tau, aerospace society
Tau Beta Pi, engineering society

Student chapters of the following professional societies meet frequently to present papers, speakers, films, and other programs of technical interest:

American Indian Science Engineering Society
American Institute of Aeronautics and Astronautics
American Institute of Chemical Engineers
American Society of Civil Engineers
American Society of Heating, Refrigerating and Air Conditioning Engineers
American Society of Mechanical Engineers
American Solar Energy Society
Associated Energy Engineers
Associated General Contractors
Association for Computing Machinery
Biomedical Engineering Society
Illuminating Engineering Society
Institute of Electrical and Electronics Engineers
National Society of Architectural Engineers
National Society for Black Engineers
Sigma Xi, Scientific Research Society
Society of Automotive Engineers
Society of Hispanic Professional Engineers and Scientists
Society of Manufacturing Engineers
Society of Mexican-American Engineers and Scientists
Society of Physics Students
Society of Women Engineers
Structural Engineers Council

A representative student organization, the University of Colorado Engineering Council (UCEC), comprises all students in the College of Engineering and Applied Science. UCEC supervises matters of interest to all undergraduate students through the control board, its legislative body.

Minority Engineering Program

The College of Engineering and Applied Science is committed to increasing minority enrollment and retention through grad-
The Women in Engineering Program provides support and counseling to current and future women engineering students. The program conducts recruiting and retention activities to increase the number of women engineers and improve the quality of their educational experience.

Herbst Program of Humanities

The Herbst Program of Humanities is an enrichment program in the humanities for a select group of junior and senior students. The program has been established through an endowment of alumnus Clancy Herbst, Jr. Participating students take a series of seminars that broaden their education and challenge them with intensive experiences in writing, research, debate, and artistic expression.

ACADEMIC EXCELLENCE

Dean's List

A student in the College of Engineering and Applied Science who completes at least 12 credit hours of course work for a letter grade during the fall or spring semester on the Boulder campus (excluding continuing education), and who earns a semester term grade point average of at least 3.50, will be included on the college dean's list for that semester. The Dean's Office will send a letter from the dean to all students who qualify for dean's list designation on the basis of their academic achievement. All students on the dean's list are encouraged to apply for a merit scholarship from the college.

Honors at Graduation

For students admitted to the college before fall semester 1987:

In recognition of high scholarship and professional attainments, "Honors," "Special Honors," or "With Distinction" may be awarded by the college. These honors are recorded on the diploma and the official transcript of the graduate and are indicated in the commencement program. For additional information on this honors system, contact the college dean's office.

For students admitted to the college fall semester 1987 and thereafter:

In recognition of high scholastic achievement, the designation "With High Distinction" or "With Distinction" will be awarded at graduation and will be recorded on the diploma and official transcript of the graduate and indicated in the commencement program. To qualify for the "With High Distinction" designation, the student's cumulative University of Colorado GPA must be at least a 3.90. For the "With Distinction" designation, the student's cumulative GPA must be at least a 3.75 but less than a 3.90. In addition, for these designations, at least 50 semester hours must have been earned at the Boulder campus. Grades earned during the semester immediately prior to graduation will not be considered.

Qualified students are encouraged to participate in the honors program of the College of Arts and Sciences. The awards of honors within this program are cum laude, magna cum laude, and summa cum laude and are recorded on the student's diploma and in the commencement program. Criteria for these designations are determined by the Honors Council. Interested students should consult with the director of the Honors Program for detailed information.

Scholarships

Undergraduate scholarships are provided primarily by private donations by alumni, corporations, and friends of the college through gifts to the University of Colorado Foundation, Inc. In some cases, endowments have been established; other scholarships are based on annual gifts. Many companies provide matching funds for gifts from their employees who are alumni. More than 400 scholarships have been made available to qualified students.

Awards are based on demonstrated academic ability, performance, financial need, or a combination of these factors (see the Financial Aid section of this catalog). For additional information about college-based scholarships, contact the dean's office at (303) 492-5071. Students may also contact the University's Office of Financial Aid at (303) 492-5091.

Anyone interested in providing an undergraduate scholarship or contributing to the scholarship fund may contact the Engineering Development Office at (303) 492-7335, or write to Campus Box 422.

ACADEMIC STANDARDS

Ethics

As members of the academic community, students have a responsibility to conduct themselves with the highest standards of honesty and integrity. These qualities are also vital to the profession of engineering. Academic penalties including suspension or expulsion will be imposed for the following acts, or intent to engage in such acts: plagiarism; illegal possession and distribution of examinations or answers to specific questions; the presentation of another student's work as one's own; performing work or taking an examination for another student; or the alteration, forging, or falsification of official records. This listing is not complete and includes only some types of academic dishonesty recently brought before the Undergraduate Academic Affairs Committee. Additional information on honesty, ethics, and student discipline is found in the college's Student Guide to Success. (See also Academic Integrity and Student Conduct in the University Policies, Programs, and Services section.)

Policy on Academic Progress

To remain in good standing in the College of Engineering and Applied Science, a student must maintain satisfactory academic performance, as measured by grades reported to and calculated by the Office of the Registrar, and satisfactory academic progress toward completion of a bachelor of science degree in the college. Failure to meet these requirements will result in the student being placed first on academic probation and then on academic suspension.

ACADEMIC PROBATION

Academic probation is the first step taken by the college to express concern that a student is not maintaining satisfactory academic performance. It represents an official warning that the student's academic performance must improve or the student will be subject to suspension from the college. Once placed on academic probation, a student remains in that status for a minimum of two consecutive semesters of enrollment as an undergraduate student in the college. If a student's cumulative University of Colorado grade point average (GPA) drops below 2.00, or the student's semester GPA is less than 2.00 for two consecutive semesters at the University of Colorado, the student is placed on academic probation. Once placed on probation, the student must immediately correct any academic deficiencies or be subsequently suspended from the College of Engineering and Applied Science.
A student placed on academic probation by cumulative grade point average must raise their cumulative University of Colorado GPA to at least 2.00 during the next semester of enrollment and keep it above 2.00 for at least the two following consecutive semesters. Additionally, the student is subject to probation by consecutive semester GPA rule. This rule states that a student placed on academic probation by the consecutive University of Colorado semester grade point average rule must maintain a semester GPA of at least 2.00 for the two following consecutive semesters.

If probation is due to both cumulative and semester GPAs, the student is required to maintain both cumulative and semester GPAs above 2.00 for the two following consecutive semesters.

While on academic probation, a student must enroll for and complete at least 12 credit hours per semester of courses which meet engineering degree requirements. Course work taken above minimum degree requirements in humanities, social science, and ROTC subjects do not count toward this minimum course load requirement.

ACADEMIC SUSPENSION
Academic suspension is the involuntary withdrawal of a student from the college. It reflects the college’s position that the student is unable to meet minimum academic requirements for a bachelor of science degree.

If, after a period of academic probation, a student does not maintain satisfactory academic performance, that student is placed on academic suspension from the College of Engineering and Applied Science. The conditions of academic suspension are as follows:

The period of the suspension is indefinite, but must be for at least one academic year.
This academic suspension applies to the College of Engineering and Applied Science on all campuses of the University of Colorado.

Suspended students may not enroll in courses, except those offered during summer session and those offered by correspondence through the Division of Continuing Education.

If a student, while on academic probation or suspension, transfers to another college or school of the University of Colorado, the College of Engineering and Applied Science considers that student to have changed the choice of academic major to one offered by that college or school. Therefore, the suspended student is not permitted to enroll in any courses taught by this college that may apply toward engineering degree requirements. If the suspended student attempts to transfer back into the college via an intransiversity transfer (IUT), the college policy governing IUT admissions will apply, and the student must petition the Committee on Academic Progress and Discipline for removal of a scholastic stop.

The suspended student may elect to attend another accredited institution and petition the committee for removal of the scholastic stop that was imposed upon suspension. However, the student seeking readmission to the college must have a cumulative CU grade point average of at least 2.00. Grades earned at other institutions do not transfer to the University of Colorado.

Readmission of suspended students must be approved by the college and the CU-Boulder Office of Admissions; such readmission is not assured. Students must present convincing evidence of their ability to successfully complete an engineering degree program.

Petition Policy
A student desiring a waiver of college or departmental policies must request and secure approval for this waiver through a petition procedure. Petition forms and information on the petition procedure are available in the dean’s office or in the academic department office. Also refer to the current Student Guide to Success for additional information on petitions.

ADMISSION AND ENROLLMENT POLICIES

FRESHMAN APPLICANTS
Prospective engineering students must have mathematical aptitude and keen interest in science and its methods. Curiosity about the natural principles governing the behavior of forces and materials and the ability to visualize structures and concepts are prerequisites. Written and oral communication skills are also essential.

The college seeks applicants who demonstrate a high probability of completing their designated degree program. Admission is based on the evaluation of many criteria; among the most important are the general level of academic performance prior to admission, performance on standardized tests, and other evidence of motivation, potential, academic ability, and accomplishment. These factors are indicated by academic records, test scores, letters of recommendation, and personal accomplishments.

Engineering students are expected to begin their study of mathematics with calculus. The college also requires that students have prior credit in chemistry and physics. Specific admission requirements are detailed in the Undergraduate Admission section of this catalog.

TRANSFER STUDENTS
Students desiring to transfer from other accredited collegiate institutions will be considered for admission on an individual basis if they meet the requirements outlined in the Undergraduate Admission section of this catalog and the freshman requirements for entering the College of Engineering and Applied Science.

INTERCAMPUS TRANSFER STUDENTS
The transfer of a student from one campus of the University to another is considered on an individual basis if the following conditions are fulfilled:

1. Enrollment levels permit.
2. The applicant has completed approximately 30 semester credit hours on a separate University of Colorado campus.
3. The applicant’s academic record must meet transfer admission requirements of the college.
4. The applicant must have at least 45 semester credit hours remaining to complete a degree from this college.

It is recommended that a student anticipating an intercampus transfer meet with the transfer credit evaluator in the appropriate engineering academic department to coordinate the transfer of credit and remaining degree requirements.

INTRAUNIVERSITY TRANSFER STUDENTS
Intrauniversity transfers (IUTs) on the Boulder campus of the University to the College of Engineering and Applied Science are considered on an individual basis if the following conditions are fulfilled:

1. The applicant is expected to apply during the semester he or she is enrolled in the second semester of calculus and the appropriate laboratory science course.
2. The applicant’s academic record fulfills the IUT admissions requirements of the College of Engineering and Applied Science.
3. The applicant applies prior to the college IUT deadline of April 1 (fall) or November 1 (spring).

Specific application details are available in the Office of the Dean (AD 1-1).
FORMER STUDENTS
A former student must meet the requirements outlined in the Undergraduate Admissions section of this catalog and must reapply to the University. Courses taken at other collegiate institutions will not necessarily be a determining factor in the student’s readmission to the University of Colorado, but transcripts on all such work must be submitted. A student who has withdrawn may have a dean’s administrative stop and must obtain permission of the dean to re-enroll in the College of Engineering and Applied Science.

Interruption of studies may require completion of current degree work in addition to repetition of course work for new degree requirements.

Attendance
Successful work in the College of Engineering and Applied Science is dependent upon regular attendance in all classes. Students who are unavoidably absent should make arrangements with instructors to make up the work missed. If students stop attending a course in which they are enrolled, they will receive a failing grade (F). If a student has received a final grade of F for nonattendance because of a failure to properly drop a course, the student can request the college to insert a letter of explanation in the college file for future reference.

If a student misses a final examination because of illness or other valid personal emergency, the student must notify the instructor and the Office of the Dean no later than the end of the day on which the final examination is given. Failure to properly notify these officials may result in an F in the course.

Changing Majors
The form necessary for transferring from one engineering major to another is available in the dean’s office (AD 1-1).

Class Standing
To be classified as a sophomore in the college, a student must have completed 30 semester credit hours; to be classified as a junior, 60 hours; and to be classified as a senior, 90 hours. A student with more than 120 hours is classified as a fifth-year senior. All transfer students will be classified on this basis according to their hours of credit accepted at the University of Colorado. This class standing does not necessarily reflect the academic standing of a student in a degree program.

Credit Policies

ADVANCED PLACEMENT
Advanced placement and college credit may be granted on the basis of the College Entrance Examination Board’s Advanced Placement tests. For students who have taken an advanced placement course in high school and who make the required score in the CEEB’s Advanced Placement examination, advanced placement and college credit will be granted. All advanced placement credit must be validated by satisfactory achievement in subsequent courses, in accordance with the transfer credit policies of the college.

COLLEGE-LEVEL EXAMINATION PROGRAM (CLEP) CREDIT
Prospective students may earn college credit through the College-Level Examination Program (CLEP) examinations, provided that they score at the 67th percentile or above. A list of subjects in which CLEP examinations will be accepted may be obtained in the Office of the Dean of the College of Engineering and Applied Science. All CLEP credit must be validated by satisfactory achievement in subsequent courses, in accordance with the transfer credit policies of the college.

CREDIT FOR ROTC
Some departments may allow their students 3 to 6 semester credit hours for ROTC courses toward technical or elective requirements if the ROTC courses are deemed to have suitable educational content.

INCOMPLETES
By University policy, use of the IF grade is at the option of the academic dean’s office. The grade of IF (incomplete, failing) may be given by an engineering faculty member when circumstances beyond a student’s control warrant. This grade may be given only after the instructor has determined sufficient reason for doing so. If an incomplete grade is given, the instructor is required to document clearly both the conditions precedent to the removal of the incomplete and the time limit for the fulfillment of these conditions. The specified time shall not exceed a one-year period. A copy of this documentation will be filed with the Office of the Dean, the instructor’s department office, and the student involved.

Course work to complete a grade of IF must be taken on the same campus on which the grade of IF was awarded. Credit for a course similar to the course in which the grade of IF was awarded may not be used to substitute for the incomplete course or be used to remove the grade of IF.

The grade of IF (incomplete, withdrawn) may not be awarded to undergraduate students in courses taught by the college.

NO CREDIT RESTRICTIONS
In the College of Engineering and Applied Science, courses required for fulfillment of graduation requirements cannot be taken for no credit (NC). Once a course has been taken for no credit, the course cannot be repeated for credit. An engineering student must petition for approval before enrolling for any course NC.

PASS/FAIL OPTION
The primary purpose for offering courses on a pass/fail grading option is to encourage students to broaden their educational experience by electing challenging courses without serious risk to their academic record. Individual departments may have rules that should be checked before registering for the pass/fail option. The college pass/fail policy is:

1. The maximum number of credit hours a student may elect with the pass/fail option shall be designated by the student’s major department. No more than 16 semester hours of pass/fail credit can be applied toward degree requirements.

2. It is recommended that a student obtain advance approval from the major department prior to selecting the pass/fail option. Course work taken pass/fail without appropriate approval may be reverted to the letter grade earned.

3. All students who wish to register for the pass/fail option must do so during the registration or schedule adjustment periods. After the schedule adjustment period, it will not be possible for students to change their pass/fail registration unless approved by the dean.

4. A transfer student may count toward graduation 1 hour of pass/fail credit for each 9 hours of credit completed in this college.

5. Students on academic probation may not elect the pass/fail grade option.

TRANSFER CREDIT
After a prospective transfer student has applied and submitted transcripts to the University of Colorado, the Office of Admissions issues a transfer credit evaluation form listing those courses acceptable for transfer by University of Colorado at Boulder standards. A copy of this evaluation is received by the dean’s office after the student has confirmed, and is made a part of the student’s college record. The appropriate faculty transfer credit evaluator then uses this form to indicate which of
those courses are tentatively acceptable in meeting engineering degree requirements. The student must realize that the acceptance of these courses is tentative and is contingent upon the satisfactory completion of a minimum of 30 semester hours at the University of Colorado Boulder campus before final acceptance of this credit toward engineering degree requirements. All transfer credit must be validated by satisfactory achievement in subsequent courses. It is the responsibility of the transfer student, after having completed the 30 semester credit hours at the University of Colorado Boulder campus, to request final validation of the credits by the department and to have this validation noted in the student's college file.

If at any time a student wishes to have a course not previously accepted reconsidered for transfer, the student should consult with the departmental transfer credit evaluator and petition the dean through the department for approval of the course.

Nontransferable Credits. Students desiring to transfer credits from engineering technology programs should note that such credits are accepted only upon submission of evidence that the work involved was fully equivalent to that offered in this college.

Some technology courses are given with titles and textbooks identical to those in similar engineering courses. These courses may still not be equivalent to engineering courses because the areas of academic emphasis are divergent.

In order to assist engineering technology students with transfer problems, the following guidelines have been established:

1. Courses on basic subjects such as mathematics, physics, foreign languages, literature, or history may be acceptable for transfer credit if they were taught as part of an accredited program for all students and were not specifically designated for technology students.

2. Students who have taken courses with technology designations that may be valid equivalents for engineering courses have these options:

a. They may petition for permission to waive the course requirement. The course requirement can be waived if students demonstrate that, by previous course work, individual study, or work experience they have acquired the background and training normally provided by the course. No credit is given for a waived course, but students may benefit from the waiver by being able to include more advanced work in their curriculum. Other students may profit by repeating the course at this college and thus establishing a fully sound basis for what follows.

b. The appropriate University of Colorado academic department may recommend to the dean's office that credit be transferred to count toward the requirements for a related course in its curriculum. Credit cannot be given for vocational/technical or remedial courses under rules of the University. (See the Undergraduate Admission section of this catalog under Transfer of College-Level Credit.)

c. The student may seek credit for the course by examination. See Advanced Placement and College-Level Examination Program (CLEP) credit.

WORK EXPERIENCE

It is the policy of the College of Engineering and Applied Science that any credits accrued in the official records of a student that were awarded for work or co-op experience will not apply toward degree requirements.

Other University Campuses

A student who needs to work at a part-time or full-time job while obtaining a college education, or who lives in the metropolitan areas of Denver or Colorado Springs, may find it necessary to attend the University of Colorado at Colorado Springs or the University of Colorado at Denver.

The campus designation on the student's diploma and transcript correspond to the campus designation of the faculty recommending the student for a degree.

UNIVERSITY OF COLORADO

AT COLORADO SPRINGS

Bachelor's degree programs are offered in electrical engineering, computer science, and applied mathematics. The master of science degree is awarded in computer science, applied mathematics, and electrical engineering. The master of science option in systems engineering is offered, as is the master of engineering with the space operations option. Students may also complete work for master of engineering and Ph.D. degrees through the systemwide Graduate School.

UNIVERSITY OF COLORADO AT DENVER

Bachelor's and master's degree programs are offered by the Departments of Civil Engineering, Electrical Engineering and Computer Science, and Mechanical Engineering on the campus of the University of Colorado at Denver. The bachelor of science degree is offered in computer science, civil engineering, electrical engineering, mechanical engineering, and applied mathematics. A master of science degree is offered in civil engineering, electrical engineering, and mechanical engineering. The master of science in computer science, the master of engineering, and the Ph.D. degree are offered in civil engineering and electrical engineering through the systemwide Graduate School.

Registration

All students must register for at least 12 credit hours per semester in course work applicable toward degree requirements. Variations from this policy must be approved by the appropriate faculty advisor and the dean's office on a college petition. Part-time enrollment will be approved for one semester only. Students who are employed should consult with their faculty advisor before each registration period to review courses and course load to be attempted.

SEQUENCE OF COURSES

Students should follow the curriculum recommended by their major department.

A student who receives a grade of D+ or lower in a course that is a prerequisite to another may not enroll in the succeeding course without the approval of the student's major academic department, the instructor of the succeeding course, and the dean's office.

All courses are not necessarily offered each semester. According to college policy, undergraduate courses having an enrollment of fewer than 20 students may be cancelled. Students can minimize scheduling problems by closely following the curricular sequence recommended by their major department. If a course is unavailable, a student may petition to enroll for equivalent study.

GRADING SYSTEM, PASS/FAIL, AND DROP/ADD PROCEDURES

See the University Policies, Programs, and Services section of this catalog for the University of Colorado uniform grading system and for additional pass/fail option information and drop/add procedures. Also see the current Schedule of Courses and current Student Guide to Success.

Only under circumstances clearly beyond the student's control will petitions for dropping courses be approved after the drop deadline.

Repetition of Courses

Students may not register for credit in courses in which they already have received a grade of C or better. When students take a course for credit more than once, all grades are used in determining their Univer-
ity of Colorado grade point average. An F grade in the repetition of a required course necessitates a subsequent satisfactory completion of the course. Students may not register for credit in any course that they have previously completed for no credit.

**Summer Courses**

A limited selection of summer session courses is offered for continuing students and for those who must remove academic deficiencies. For information about courses, students should contact the Office of the Registrar or the academic department that teaches the course.

**Withdrawal**

Students may withdraw only during the first six weeks of the semester. After this time, withdrawals are permitted by this college only upon presentation of documented evidence to verify that the withdrawal is necessary because of conditions clearly beyond the student's control.

If a student withdraws, permission from the college may be required for re-enrollment. Students who interrupt their course of study may be required to complete all current degree requirements and to repeat courses previously completed. A student wishing to return after a withdrawal must reapply for admission and is therefore subject to enrollment limits and academic performance evaluation.

**UNDERGRADUATE DEGREE REQUIREMENTS**

Fundamentals taught in the freshman year are of prime importance in the more advanced classes, and every effort is made to place all freshman students in appropriate courses.

It is strongly recommended that students avoid the likelihood of later scheduling problems by carefully following the curriculum in their major or in the recommended open option program.

Each freshman is exposed to a broad university background, completing coursework outside the College of Engineering and Applied Science in science, mathematics, social science, and the humanities.

**Advising**

All students are advised by faculty members from their respective major academic department or open option program. The college also provides professional advising staff.

Advising information is available at the administrative offices of the College of Engineering, EC AD 1-1, telephone (303) 492-5071, or directly through the major departments.

- **Aerospace Engineering Sciences**, EC OT 6-16, 492-6417
- **Applied Mathematics Program**, EC OT 2-06, 492-4668
- **Chemical Engineering**, EC ChE 1-43, 492-7471
- **Civil, Environmental, and Architectural Engineering**, EC OT 4-21, 492-7151
- **Computer Science**, EC OT 7-05, 492-6362
- **Electrical Engineering**, EC EE 0-02, 492-7327
- **Engineering Physics**, Gamow E-032, 492-6952
- **Mechanical Engineering**, EC ME 1-19, 492-7151
- **Open Option**, EC AD 1-1, 492-5071

These sources of help are readily available to assist students with academic, vocational, or personal concerns. Students are assigned specific departmental advisors for academic planning and should consult with the departmental chair or designated representative for assignment. Additional advising information is contained in the College of Engineering and Applied Science Student Guide to Success for the current year. A copy of this publication may be obtained in the dean's office.

**Degree Requirements**

1. The B.S. degree requires that not less than 128 semester hours in an acceptable curriculum be completed to the satisfaction of the major department.

The last 45 hours must be earned after admission and matriculation as an undergraduate engineering degree student at the University of Colorado at Boulder campus. Some students will need to present more than the minimum number of credit hours because of departmental requirements or because they may have enrolled in courses that do not carry credit toward a degree—for example, math modules, some ROTC courses, physical education, and performance courses.

A student is awarded a degree by a vote of the faculty of the College of Engineering and Applied Science after the student's major academic department determines that all degree requirements have been successfully completed.

The diploma indicates the University of Colorado campus from which the department recommending the student for the degree is located. Consideration will generally be given to designating the campus where the majority of the course work was completed. However, the final decision on the campus designation is made by the designated faculty representative from the student's major academic department.

2. The cumulative grade point average of an engineering student will include all academic courses attempted at the University of Colorado. A cumulative grade point average (GPA) of 2.00 is required in these courses used to fulfill degree requirements. In addition, a separately computed GPA of 2.00 must be attained in those courses taken from the student's major department (for students in the applied mathematics program, the major department is the mathematics department and includes both applied mathematics and mathematics courses; for students in the engineering physics program, the major department is the physics department).

The grade of P is excluded from GPA calculations; the grade of F is included.

3. Each degree program requires a minimum of 18 credit hours of approved course work in the humanities and social sciences. Humanities and social science electives must not be limited to a selection of unrelated introductory courses. At least 6 credit hours must be at an advanced level (3000 or above) and must include the course UWRP 3030 or GEEN 3100 and GEEN 3200. All electives should be selected with the approval of a faculty advisor.

Qualified students may take appropriate honors courses for humanities and social sciences credit.

The dean's office will prepare a list of acceptable humanities or social science courses for student reference. This list will be available through the office (AD 1-01), departmental offices, faculty, and staff advisors.

Courses such as accounting, finance, management, public speaking, and technical writing are considered technical electives.

4. Students who graduated from high school in the spring of 1988 and thereafter must complete any minimum academic preparation standards (MAPS) deficiencies. Students should consult with a faculty advisor or the dean's office (AD 1-1) to determine any MAPS deficiencies and how to satisfy these deficiencies.

5. Students should also see Requirements for Graduation and the general rules and policies of the University listed in this catalog.

Consideration can be given to substitution of equivalent courses for required courses. Students desiring such substitution must obtain verification in writing from their faculty advisors that courses are equivalent.
Graduation
It is the student's responsibility to be certain that all degree requirements are fulfilled, to notify the major department upon completion of 100 semester hours applicable to B.S. degree requirements, to fill out the "Application for Diploma" form at the beginning of the next-to-last semester before graduation, and to keep the departmental advisor and the dean's office informed of any change in graduation plans.

All incompletes must be completed and all correspondence course grades must be officially received no later than three weeks prior to the graduation ceremony. It is the student's responsibility to contact the instructor concerning the removal of incomplete grades.

Commencement exercises are held in December, May, and August.

Double Degrees
A student in the College of Engineering and Applied Science may be able to obtain bachelor's degrees in two engineering disciplines or one degree in engineering and one in another field, such as business, music, or one of the arts and sciences disciplines. Interested students should come to the dean's office (AD 1-1) for additional information and application materials for these double-degree programs.

DOUBLE DEGREES FROM ENGINEERING AND ANOTHER COLLEGE
Arrangements to obtain bachelor's degrees in engineering and in the academic program of another college may be made through consultation with and written approval of the appropriate deans and completion of a minimum of 30 additional semester hours beyond the largest minimum required by either college or school.

DOUBLE DEGREES WITHIN THE COLLEGE OF ENGINEERING AND APPLIED SCIENCE
Two bachelor of science degrees in engineering may be earned by obtaining the written approval of both departments concerned and completing a minimum of 30 additional semester hours beyond the largest minimum required by either department. Transfer students desiring two bachelor's degrees must present a minimum of 75 semester credit hours taken as a student in this college, and must satisfy all other stipulations regarding total hours required and approval of all course work by both departments concerned. Of the 30 additional hours for the second degree, a minimum of 24 shall be in courses offered by the secondary academic department or in courses approved in advance by the department as substitutes.

Students desiring to pursue a double-degree program must formally designate themselves double-degree candidates by filing a petition signed by the chairs of both departments concerned and the dean before enrolling for the last 30 hours of work to be completed for the double degree.

The decision to earn a double degree should be carefully weighed, since qualified students may be able to obtain a master's degree for a similar number of credits (see Graduate Study in Engineering).

Premedical Option
Several engineering departments have an option by which a student may meet all requirements for entry into medical school while earning a degree in engineering. Engineering departments with this option will approve inclusion of appropriate biological and bioengineering courses in the student's program of technical electives. The courses listed below are usually prescribed by medical schools and must be completed with superior grades.

<table>
<thead>
<tr>
<th>Course</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Expository or creative writing</td>
<td>3</td>
</tr>
<tr>
<td>General chemistry</td>
<td>8-10</td>
</tr>
<tr>
<td>Organic chemistry</td>
<td>8-10</td>
</tr>
<tr>
<td>General biology or zoology</td>
<td>6</td>
</tr>
<tr>
<td>Literature</td>
<td>8</td>
</tr>
<tr>
<td>English composition</td>
<td>3</td>
</tr>
<tr>
<td>Physics</td>
<td>9</td>
</tr>
<tr>
<td>Calculus (recommended)</td>
<td>4</td>
</tr>
</tbody>
</table>

Students can meet these requirements by carefully substituting electives in their engineering curriculum. In some cases where additional hours may be required, interested students should consult with the department chair and the preprofessional advisor on the Boulder campus.

The admissions committee of the School of Medicine at the University of Colorado Health Sciences Center welcomes inquiries and visits from prospective students, particularly at the time of their first interest in medicine as their chosen profession.

Graduate Work in Business
Undergraduates in engineering who intend to pursue graduate study in business may be able to complete some of the business background requirements as electives in their undergraduate programs. Seniors in engineering who have such intentions and appear likely to qualify for admission to graduate study in business may be permitted to register for graduate fundamentals courses designed to provide qualified students with needed background preparation in business. (See Graduate School information for the College of Business and Administration for additional details.)

Concurrent B.S. and M.S. Degree Program in Engineering
Students who plan to continue in the Graduate School after completing the requirements for the B.S. degree will usually find it advantageous to apply for admission to the concurrent degree program. This program allows students who qualify for graduate study and expect to continue for an advanced degree to plan a graduate program from the beginning of their senior year rather than from their first year of graduate study.

Application is made to the Graduate School through the appropriate major department. Admission to the Graduate School may be granted on completion of 110 semester hours. (See Seniors at the University of Colorado in the Graduate School section of this catalog.) Requirements are the same as those for two degrees taken separately: 128 credit hours for the B.S. degree and 24-30 hours including thesis (plan I) or 30 credit hours (plan II) for the M.S. or for the M.E. degree. Humanities and social science requirements must be completed within the first 128 credit hours. A grade point average of 3.00 or better for all work attempted through the first six semesters (at least 96 credit hours) and written recommendations from at least two departmental faculty members are required.

All students will choose or be assigned a faculty advisor to help them develop a program best suited to their interests. Those in each program will be encouraged to pursue independent study on research problems or in areas of specialization where no formal courses are offered. A controlled substitution policy will be followed for courses normally required in the last year of the undergraduate curriculum. The program selected must be planned so that students qualify for the B.S. degree and maintain a grade point average of at least 3.00. If the grade point average falls below 3.00, all hours completed with a passing grade while in the program will count toward fulfillment of the B.S. degree. There will be no credit given toward a graduate degree for courses applied to the B.S. degree requirements; however, students who elect to exit at the B.S. level are still eligible to apply for admission to the Graduate School under the rules set forth in the Graduate School section of this catalog. Normally, however, these students will apply for admission to the Graduate School when all but 6 of the
credit hours required for the B.S. degree have been completed and will be awarded the B.S. and M.S. degrees simultaneously upon meeting the requirements set forth for the concurrent degree program.

GRADUATE STUDY IN ENGINEERING

The College of Engineering and Applied Science offers degree programs for the master of engineering (M.E.), master of science (M.S.), and doctor of philosophy (Ph.D.) degrees. There are degree programs in each of the following departments or fields:

- aerospace engineering sciences
- chemical engineering
- civil, environmental, and architectural engineering
- computer science
- electrical and computer engineering
- engineering management
- mechanical engineering
- telecommunications

The master of science in applied mathematics is offered through the Program in Applied Mathematics in the College of Arts and Sciences. Please see page 56 for more information.

The master of science in telecommunications is offered cooperatively by various departments. A description of the telecommunications program is found on pages 326 and 327.

Graduate programs within each engineering department offer a variety of options, providing a number of alternative careers.

The aerospace program has a strong emphasis on experimental and computational fluid dynamics, astrodynamics, orbit determination, remote sensing, control systems engineering and design, space structures, space-station design, and neuro-biosystems engineering.

Key activities in chemical engineering include membrane and thin-film science, biochemical engineering and biotechnology, surface science, process control, enhanced oil recovery, materials engineering, environmental engineering, and cryogenics.

Fields emphasized in civil engineering include geotechnical engineering, structural mechanics and engineering, building systems engineering, construction management and engineering, and environmental and water-resource engineering.

Strengths in computer science include algorithm design, artificial intelligence, database design, numerical optimization, parallel processing, programming languages, software engineering, systems, and theoretical computer science.

Areas of focus in electrical and computer engineering include optoelectronics and optical computing, computer design and simulation, VLSI design, electromagnetic theory, solid-state devices and materials, microwave and optical guided wave structures, antennas and propagation, and robotic control systems.

Engineering management combines technical courses with unique management courses, including productivity and quality, statistical process control, and manufacturing. These courses are designed for the engineer interested in acquiring effective management skills.

Mechanical engineering areas of concentration include combustion science, convective heat transfer, materials science/ engineering, design and manufacturing, nondestructive structural evaluation, wave propagation and scattering, and fluid mechanics.

Graduate Study for Practicing Engineers

The master of engineering degree permits graduate students flexibility in defining specialized interdisciplinary fields that meet their professional needs and make them more productive for their employers. This degree has standards fully equivalent to those of the master of science degree (See Master of Engineering in the Graduate School section of this catalog), but there is no residency requirement.

The Center for Advanced Training in Engineering and Computer Science (CATECS) provides graduate education and professional development for practicing engineers, computer scientists, and managers of technology. CATECS courses are delivered from the Boulder campus via live instructional television with two-way audio or videotape to business, government, and industry along the Front Range, across the country, and overseas.

Course sequences can lead to a master's degree with a concentration in computer science, engineering management, and most engineering disciplines. Students receiving the televised courses may participate in the classroom discussion and question the instructor over open phone lines connected into the classroom. Classroom sessions are also recorded on video cassettes which are mailed to those outside the signal range.

CATECS can also assist working professionals in setting up study programs to meet individual goals under sponsorship of their employers. By providing liaison among the student, the employer, and the participating departments, CATECS makes it possible to set up acceptable programs of graduate study leading to a master of engineering degree. Students in industry may enroll in a CATECS course prior to acceptance in the Graduate School, but should be accepted to the Graduate School prior to completing their third course through CATECS.

The center also offers technical and managerial short courses in cooperation with the departments and interdisciplinary research centers.

For more information, prospective students should contact the office responsible for professional development at their workplace or the Director of CATECS, Campus Box 435, University of Colorado at Boulder, Boulder, CO, 80309-0435, or call (303) 492-6331.

Graduate Degree for Science Majors

Science graduates who have good academic records and strong backgrounds in mathematics and science may be eligible for admission as graduate students in engineering or may be able to qualify with some extra work. Information may be obtained from the appropriate academic department office.

Master of Engineering, Master of Science, and Doctor of Philosophy

Students wishing to pursue graduate work in engineering leading to candidacy for advanced degrees should read carefully requirements for advanced degrees in the Graduate School section of this catalog. Some departments also have available explanatory material on their advanced degree programs.

Prerequisites. To enroll for an advanced degree in any department of the College of Engineering and Applied Science and the interdisciplinary telecommunications program, candidates either must have previously earned a bachelor's degree in a curriculum that includes the necessary prerequisites for that branch of engineering or qualify for the concurrent B.S. and M.S. program. If the candidate's preliminary education was taken at some other institution, the degree of qualification for advanced work shall be determined by the department concerned and by the dean of the Graduate School.

Graduates of engineering technology programs should note that the equivalent of a B.S. degree in an appropriate engineering field is required for entry into the Graduate School. Because the goals and orientation of engineering programs differ from those of technology programs, tech-
nology graduates should expect to make up deficiencies before being admitted to graduate study in engineering. Students may not be admitted to the Graduate School while making up deficiencies, but can enroll as nondegree students.

For admission as a regular degree student, an undergraduate grade point average of at least 3.00 is normally required.

Language Requirement. Ph.D. candidates should note that some engineering departments have foreign language requirements.

Course Work. Graduate work in each department of the College of Engineering and Applied Science falls into two classes:

1. Courses that are offered for candidates who have chosen to major in the particular department or as a base for the M.E. combined degree.

2. Courses that are offered as minors for candidates who have chosen their major in some other department.

Graduate students majoring in any department receive credit in the Graduate School for courses listed as required undergraduate work in the same department. They may, however, receive graduate credit for advanced undergraduate courses in an engineering department other than that in which they received their bachelor's degree, with the approval of the department granting the degree and the dean of the Graduate School.

Availability of Courses. All courses are not necessarily offered every year. They are available only if there is sufficient demand.

Qualifying Examinations. Graduate students who plan to become candidates for the M.S. or Ph.D. degree may be required to take a qualifying examination in the appropriate field of specialization during the first semester in which they are registered as candidates for a graduate degree. Individual departments should be consulted concerning the timing or requirement of this examination. The purpose of this examination is to enable the advisor and student to plan a suitable program of study.

AEROSPACE ENGINEERING SCIENCES

The following areas of knowledge are central to the undergraduate degree in aerospace engineering sciences:

- knowledge of the basic subfields of aerospace engineering (fluid mechanics, astrodynamics, design, dynamics, and control of aerospace structures; guidance, navigation, and control of aerospace vehicles; propulsion and fluid management systems; life support systems; and systems engineering);
- knowledge of mathematics sufficient to facilitate the understanding and application of physical principles to the solution of aerospace engineering problems;
- knowledge of the major principles and theories of the natural sciences, including physics, chemistry, the biological sciences, and the earth sciences; and
- knowledge of the interrelations between theory and observation, the nature of systematic and random error, and the methods used to analyze experimental uncertainty and to compare experiment with theory.

In addition, students completing the degree in aerospace engineering sciences acquire:

- the ability to apply the knowledge and design skills of aerospace engineering to solve the problems of society and help attain society's goals;
- the ability to address socially related technical problems which confront the aerospace profession;
- the ability to attain design standards of reliability, environmental quality, and protection of both occupational and public health and safety in the execution of projects;
- the ability to maintain professional competency through lifelong learning in aerospace engineering, humanities, and social science fields;
- the skill to design aerospace vehicles to meet technical and societal goals;
- the skill to design space experiments to meet scientific and commercial goals;
- the skill to design transportation, environmental, and energy systems to serve society's needs;
- the skills to manage an aerospace engineering design project or to cooperate with an aerospace engineering project management team effort;
- the ability to conduct experimental investigations in wind tunnels, structural and materials laboratories, life support systems laboratories, etc., necessary to validate aerospace system analyses and designs;
- the skill to conduct all experimental work in a safe manner;
- the ability to use digital computation techniques to solve specific aerospace engineering problems;
- skill in the use of at least one modern high-level programming language; and
- the ability to communicate effectively both orally and in writing, including presenting and writing technical aerospace project proposals and results.

Bachelor's Degree Requirements

The major part of the first two years is devoted to the study of mathematics, physics, mechanics, chemistry, computer science, and the humanities and social sciences. The last two years are devoted to engineering courses in fluid dynamics, flight dynamics, systems and control, materials and structures, energy conversion and propulsion, space science, and aircraft and spacecraft design. Advanced technical elective courses are available for further specialization in those subfields of aerospace engineering. From a list of capstone design courses, B.S. students must complete three. Students are also encouraged to pursue special research topics for credit during their junior and senior years under the direction of a faculty member of their choice.

For students having sufficient ability and interest, planning for graduate study should begin by the start of the junior year. Such a plan should consider the foreign language requirements of appropriate graduate schools and an advanced mathematics program. Students who wish to combine the business and aerospace engineering sciences curricula are advised to consider obtaining the B.S. degree in aerospace and a master's degree in business rather than a combined B.S. degree.

BIOENGINEERING/ PREMEDICAL OPTION

The Department of Aerospace Engineering Sciences offers a bioengineering/premedical option that has been specifically designed for students who wish either to attend medical school or to enter graduate work in bioengineering after receiving the B.S. degree. Students choosing the bioengineering/premedical option are allowed to substitute appropriate bioengineering courses for some of their normal course work during the senior year. Students electing this option should consult their advisor regularly to assure the adequacy of their curricula.

CURRICULUM FOR B.S., AEROSPACE ENGINEERING SCIENCES

The B.S. curriculum in aerospace engineering sciences is revised annually to keep up with new advances in technology, to make use of new educational methodologies, and to satisfy updated program accreditation criteria. The curriculum requirements described below are those in effect at the time this catalog was printed.

Semester Hours

Freshman Year

<table>
<thead>
<tr>
<th>Fall Semester</th>
<th>Full Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASEN 1011 Introduction to Science of Flight</td>
<td>3</td>
</tr>
<tr>
<td>APPM 1340 Intensive Calculus (Note 1) or APPM 1350 Calculus 1 for Engineers</td>
<td>4-6</td>
</tr>
<tr>
<td>CHEM 1211 Engineering General Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>CHEN 1221 General Chemistry Lab for Engineers</td>
<td>2</td>
</tr>
</tbody>
</table>
1. A minimum of 18 semester credit hours in the humanities and social sciences is required.
2. The 18 hours of humanities and social science elective credit should not be composed of a selection of unrelated introductory courses. At least 6 semester credit hours must be successfully completed at an advanced level, which is the upper division (3000-4000) or graduate (5000 and above) level.
3. ROTC course sequences (AIRR and NAV 4010-4020 and MILR 4072-4082) are acceptable for 3 semester credit hours of humanities and social science elective credit. They are considered equivalent to PSCI 4191 and COMM 4240, respectively.
4. Students are permitted to take appropriate honors courses for humanities and social science credit.
5. Courses in business are not acceptable as humanities and social science electives.
6. Foreign language courses (excluding first-year courses) are acceptable for meeting humanities and social science requirements.
7. Participation in the Presidents Leadership Class is accepted for up to 6 credit hours.
8. The Herbst Program in Humanities for engineering students, a two-year program, is available to juniors. It provides up to 12 hours of honors humanities credit (3 hours per semester) and includes a waiver of the junior writing program requirement (UWRP 3030). See the dean's office for application deadlines and materials.

Technical Electives
For details on these requirements, a separate booklet titled Choosing a Technical Elective is available in the department office.

1. Any ASEN course at the 3000 level or above that is not a required course can be used as a technical elective.
2. A technical elective is generally a course in engineering or science (such as mathematics, applied mathematics, physics, chemistry, MCD biology, APAS, or computer science) at the 3000 level or higher. Elective ASEN courses most likely to help an aerospace engineer's career development are ASEN, math, and physics courses. It is suggested that students secure advance approval for technical elective courses from their advisors.
3. Independent study or undergraduate research is acceptable for technical elective credit. Upper-division ROTC course work is acceptable for 3 semester hours of technical elective credit. Any ROTC course numbered 3000 and above may be used for this credit. This does not affect the use of ROTC hours as humanities and social science elective credit discussed earlier.
4. Any course from the list of approved design courses is acceptable as a technical elective.

Engineering Design Requirement
In addition to ASEN 4018 and 4028 (Senior Design Lab 1 and 2) and the design work included in other aerospace required courses, a minimum of 9 credit hours of engineering design must be taken from the following list of capstone design courses:

- ASEN 4098 System Engineering and Design
- ASEN 4138 Aircraft Design
- ASEN 4148 Spacecraft Design
- ASEN 4158 Space Habitation
- ASEN 4158 Remote Sensing Systems Design
- ASEN 4218 Large Space Structures Design
- ASEN 4238 Computer-Aided Control Systems Design
- ASEN 4338 Structures Computer Laboratory
- ASEN 4418 Design of Aerospace Structural Components
- ASEN 5168 Experimental Space Science
- CVEN 3515 Structural Design I
- CVEN 4545 Steel Design
- MGEN 4025 Component Design
- MGEN 4045 Mechanical Engineering Design Project

Note: Independent study may be used for design elective credit. An independent study agreement form must be picked up in the department office and completed by the student and instructor. Also, see the department office for a current list of available design elective courses.

Graduate Degree Programs
The Department of Aerospace Engineering Sciences offers graduate programs in the following areas: fluid dynamics (theoretical fluid dynamics, computational fluid dynamics, aerodynamics and design, atmospheric dynamics and modeling, low-gravity fluid mechanics and heat transfer, experimental fluid dynamics and flow visualization, and transonic flow); astrodynamics and remote sensing (orbit determination, space debris, space mission analysis, satellite geodesy, earth satellite oceanography, ocean modeling, and application of the global positioning system); control, systems engineering, structures, and aerospace design (classical control theory and optimization, software engineering and control of large space structures, attitude control and fine-pointing, design and control of space vehicles and experiments); and life support systems, neuro-modelling, and biomaterials in space.

Aerospace-related research centers recently established in the college include the Colorado Center for Astrodynamics Research, the Center for Space Structures and Controls, Biorad Space Technologies (a NASA Center for the Commercial Development of Space), the Center for Space Construction (a NASA Engineering Research Center), and the Center for Space Environmental Health. Other research centers within the University that are involved in space-related research activities are the Center for the Study of Earth from Space, the Center for Astrophysics and Space Astronomy, the Center for Space and Geosciences Policy, the Laboratory for Atmospheric and Space Physics, the Joint...
Institute for Laboratory Physics, and the Cooperative Institute for Research in Environmental Sciences.

**REQUIREMENTS FOR ADVANCED DEGREES**

Graduate students applying for admission to aerospace engineering sciences are required to submit the results of the analytical, quantitative, and verbal sections of the Graduate Record Examination and are encouraged to present the results of one specialized section in any area of engineering, mathematics, physics, chemistry, or biology.

The department offers graduate programs leading to the master of engineering and the M.S. and Ph.D. degrees in aerospace engineering sciences. Degree plans are formulated on the basis of the student's interest and needs. Portions of the program are designed to promote the student's engineering and professional development.

Advanced degrees are available with specialization in the four broad areas of astrodynamics and remote sensing; fluid dynamics; space structures, systems, and controls; and bioengineering. Courses below the 5000-level in aerospace engineering cannot count toward graduate degree requirements; relevant courses below the 5000 level outside the department may be accepted for master's degree credit if they fit with the student's degree plan. Such courses must have academic content consistent with graduate study in aerospace engineering sciences.

Advising. Students are assigned an academic advisor to review their course selection and progress toward the degree. Students are expected to meet with the advisor at least once each semester, prior to registration. Once students have selected a research area for the thesis, academic advising is done by their thesis advisor.

**MASTER OF SCIENCE DEGREE**

All master's degree students are required to take 6 hours of advanced math, 3 hours of applied computation, and 6 hours of basic specialty courses. All students are expected to follow the nonthesis (plan I) program unless sponsored by a faculty member who has agreed to supervise the M.S. thesis.

Plan I (Thesis Plan). Twenty-four hours of graduate work are required, including 4-6 thesis hours. Course requirements are 6 hours of advanced math, 3 hours of applied computation, and 6 hours of basic specialty courses.

Plan II (Nonthesis Plan). Thirty hours of graduate work are required, and may include up to 6 hours of independent study. Students must follow the guidelines provided for their area of specialization. M.S. students are also permitted to select a general program and follow a broad-based curriculum leading to the degree. In this case students may choose the 6 hours of advanced math and 3 hours of applied computation from the recommendations of any of the areas of specialization. In addition to the 6 hours of basic specialty courses required of all M.S. students, non-thesis M.S. students are expected to take 6 additional hours of basic specialty courses.

The M.S. comprehensive examination shall consist of a formal paper submitted to the student's advisory committee. Each student will select a problem that has been treated by researchers or engineers in more than one area of aerospace engineering. The student will present the problem, describe at least two approaches that have been made to the problem, and discuss the results obtained by each approach.

Master of engineering students are not required to take the master of science comprehensive examination. See the department for a description of the master of engineering degree.

**PH.D. DEGREE**

Course Requirements. A minimum of 30 semester credit hours of courses numbered 5000 or above and 30 credit hours of thesis credit are required for the degree. A maximum of 21 credit hours may be transferred from another accredited institution and applied toward a Ph.D. degree if approved by the graduate committee of the department and the Graduate School. All courses taken for the master's degree at the 5000 level or above at the University of Colorado may be applied toward the doctoral degree at the University. The formal course work must include a minimum of 21 hours of courses or their equivalent in aerospace engineering sciences.

Preliminary Examination. Students must pass a preliminary examination, administered by the graduate committee, which consists of a written, open book examination in mathematics, numerical computation, and two aerospace engineering core fields. The oral examination shall be in the student's area of concentration.

Comprehensive Examination. The degree program culminates in an oral examination before the student's committee of five or more graduate faculty members appointed by the department and approved by the Graduate School. This should be preceded by individual examinations or interviews, either written or oral or both, by every committee member. The oral examination before the committee is based primarily on a detailed, written proposal for the thesis research provided by the student to committee members in advance.

Ph.D. Thesis. Students must write a thesis based on original research conducted under the supervision of a graduate faculty member. The thesis must fulfill all Graduate School requirements. After the thesis is completed, an oral final examination on the thesis and related topics will be conducted. The examination will be conducted by a committee of at least five graduate faculty members. Further details are available from the department graduate secretary.

**APPLIED MATHEMATICS**

The Program in Applied Mathematics in the College of Arts and Sciences offers courses and degree programs for undergraduate and graduate students. These courses range from calculus to seminars in computation, discrete mathematics, nonlinear phenomena, and physical applied mathematics. Students pursuing a major in applied mathematics within the College of Engineering and Applied Science complete their degree within this program.

Course offerings at the undergraduate level focus on providing students with the mathematical tools, problem solving strategies, and expertise that are useful in science and engineering.

**Bachelor's Degree Requirements**

The B.S. degree in applied mathematics requires the completion of a minimum of 128 credit hours of acceptable course work with cumulative and major grade point averages of C or better. Students must complete the following minimum requirements:

1. Three semesters of calculus (APPM 1340 or 1350, 1360, and 2350).
2. Computing experience (CSCI 1200 or CSCI 1700 or GEEN 1300).
3. Completion of the following required chemistry and physics courses: CHEM 1211 and CHEM 1221, or CHEM 1151; PHYS 1110; PHYS 1120; and PHYS 1140.
4. Completion of the following required applied mathematics courses: APPM 2360 Linear Algebra and Differential Equations or APPM 2380 Differential Equations; APPM 3310 or MATH 3130 Linear Algebra; APPM 4350 and 4360 Methods in Applied Mathematics I and 2; APPM 4650 Intermediate Numerical Analysis I; and MATH 4310 Advanced Calculus I.
5. A two-semester course sequence of applied mathematics or mathematics courses numbered 4000 or above in addi-
tion to APPM 4350 (for example, APPM 4650 and APPM 4660, or MATH 4310 and 4320).

6. A minimum of 24 credits in applied mathematics or mathematics courses numbered 3000 or above (including the required courses).

7. A minimum of 24 credits in engineering courses (or approved chemistry/physics courses) with at least 15 credits in courses numbered 2000 or above and at least 6 credit hours in courses numbered 3000 or above. GEEN 3100, 3200, 4100, and 4200 may not be used to fulfill this requirement, although they may be used as social and humanistic electives. Several possible options are listed below.

8. The general bachelor degree requirements of the College of Engineering and Applied Science (including a 3000-level writing course offered through the University Writing Program and 18 credit hours of social and humanistic electives).

**RECOMMENDED OPTIONS FOR APPLIED MATH MAJORS**

**Aerospace Engineering Sciences Option**
Recommended courses (total of 21 credits):

*In sophomore year:*
- PHYS 2130 General Physics 3
- ASEN 2010 Mechanics 1

*In junior year:*
- ASEN 3011 Fluid Dynamics 1
- ASEN 3012 Structures 1
- ASEN 3014 Systems Analysis 1
- At least one of the following three courses:
  - ASEN 3021 Fluid Dynamics 2
  - ASEN 3022 Structures 2
  - ASEN 3024 Systems Analysis 2

*In senior year:*
- ASEN 4317 Computational Fluid Mechanics
  - Also recommended:
    - PHYS 2150 Experimental Modern Physics

**Chemical Engineering Option**
CHEM 1211 and CHEM 1221
Recommended courses (total of 22 credits):

*In sophomore year:*
- CHEM 2120 Material and Energy Balance 3
- CHEM 3200 Fluids 3

*In junior year:*
- CHEM 3210 Heat Transfer 3
- CHEM 3220 Mass Transfer 4
- CHEM 3320 Thermodynamics 3
- CHEM 4511 Physical Chemistry 3

*In senior year:*
- CHEM 4330 Reaction Kinetics
  - Also recommended:
    - APPM 3570 Applied Probability and Statistics

**Computer Science Option**
Recommended courses (total of 20 credits)
- CSCI 1210 Introduction to Programming 2
  - CSCI 2224 Discrete Structures
  - CSCI 2270 Data Structures
  - CSCI 3155 Programming Languages
  - ECEN 2100 Logic Circuits
  - ECEN 2220 Microcomputer Architecture and Programming
  - Note: An additional 3000-level course is required.

**Electrical and Computer Engineering Option**
Recommended courses (total of 21 credits)
- ECEN 2100 Logic Circuits
- ECEN 2220 Microcomputer Architecture and Programming
- ECEN 2150 Circuits/Electronics 1
- ECEN 2550 Circuits/Electronics Lab 1
- ECEN 2160 Circuits/Electronics 2
- ECEN 2560 Circuits/Electronics Lab 2
- ECEN 3230 Circuits/Electronics 3
- ECEN 3530 Circuits/Electronics Lab 3

**Engineering Physics Option**
Recommended courses after first-year physics
- PHYS 2130 General Physics 3
- PHYS 2150 Experimental Modern Physics 3

*In sophomore year:*
- PHYS 3210 Analytical Mechanics
- PHYS 3220 Quantum Mechanics
- PHYS 3310 Principles of Electricity and Magnetism 1
- PHYS 3320 Principles of Electricity and Magnetism 2

*Plus either of the following:*
- PHYS 3330 Junior Laboratory
- PHYS 4230 Thermodynamics and Statistical Mechanics

*Also recommended:*
- APPM 3570 Probability and Statistics
- MATH 3140 Introduction to Modern Algebra

**Mechanical Engineering Option**
Recommended courses (total of 22 credits):

*In sophomore year:*
- PHYS 2130 General Physics 3
- MGEN 2023 Mechanics of Particles
- MGEN 2043 Mechanics of Rigid Bodies
- MGEN 2022 Thermodynamics

*In junior/senior year:*
- MGEN 3021 Fluids
- MGEN 3022 Heat Transfer
- MGEN 3023 Mechanics of Deformable Bodies

*Also recommended:*
- APPM 3570 Applied Probability and Statistics
- PHYS 2150 Experimental Modern Physics

**Civil, Environmental, and Architectural Engineering Option**
Recommended basic courses (total of 15 credits)
- CVEN 2121 Analytical Mechanics 1
- AREN 2020 Energy Fundamentals
- CVEN 3121 Mechanics of Materials
- CVEN 3313 Theoretical Fluid Mechanics

**CVEN 3217 Civil Engineering Systems**

Students also take two courses from any one of the following groups:

a) CVEN 3414 Introduction to Environmental Engineering
b) CVEN 3433 Applied Hydraulics
c) CVEN 3505 Structures
d) CVEN 3508 Soil Mechanics
e) ARCH 3219 Solar Utilization
f) ARCH 3010 Building Energy Analysis and Design

**Architectural Engineering**

The overall goal of the Department of Civil, Environmental, and Architectural Engineering is to prepare students for careers as professional engineers. The curricula have been designed to qualify students for entry-level positions in professional practice in the areas of civil, environmental, or architectural engineering. These broad area designations may be separated into the sub-disciplines of building systems and energy management; construction engineering and management; environmental engineering; geotechnical engineering; mechanical systems and illumination; structural engineering and structural mechanics; and water resources engineering and management. Alternatively, undergraduates are prepared to begin graduate study in any of the sub-disciplines listed above, improving their qualifications and permitting them to enter professional practice at a higher level or to progress to higher levels more rapidly after entry at the beginning level.

The following areas of knowledge are central to the undergraduate degree in architectural engineering:

- experience with or exposure to architectural appreciation and design; basic science elective; building electrical systems; capstone experience in illumination, mechanical systems, solar energy, or structural design; construction; engineering materials, energy, or illumination laboratory; engineering science elective; heating, ventilating, and air conditioning; history and philosophy of architecture; illumination engineering; manual and computer-aided engineering drawing; mechanics; personal computers and engineering workstation usage; seminar in professional practice and ethics; solar utilization; structural analysis and design; surveying; and technical electives in the area of emphasis.

Architectural engineering has many elements in common with civil and mechanical engineering, but is specifically directed toward the building industry. It focuses on
building systems, which include structural systems; design of the building envelope; design of heating, ventilating, and air conditioning (HVAC) systems; illumination and electrical systems design; and construction methods applied to buildings. The program is administered by the Department of Civil, Environmental, and Architectural Engineering. Students also take courses in architectural history and architectural design from the College of Environmental Design.

The following areas of knowledge are central to the undergraduate degree in architectural engineering:
- basic principles of mathematics, physics, and chemistry;
- computer-aided engineering;
- manual and computer-aided drafting; surveying;
- building construction practices and materials;
- engineering mechanics;
- structural analysis and design;
- building electrical and mechanical systems;
- HVAC analysis and design;
- solar energy utilization;
- illumination;
- architectural appreciation and design; and
- professional practice and ethics.

Bachelor’s Degree Requirements

There is a broad core of requirements for all students. Students are also expected to choose, in consultation with faculty advisors, elective courses to add depth in one or more specialty areas. Such specialty areas include structural analysis and design, construction engineering, building energy analysis, mechanical systems, and illumination. A list of recommended electives is available to help students select a coherent academic program that enhances one of these areas.

Curriculum for B.S. (Arch. E.)

Semester Hours

Freshman Year

Fall Semester
AREN 1316 Introduction to Architectural Engineering..........................1
APPM 1350 Calculus 1 for Engineers or APPM 1340 Intensive Calculus (Note 1) ......4-6
GEEN 1300 Introduction to Engineering Computing...............................3
CHEM 1211 General Chemistry for Engineers..............................3
CHEN 1221 Engineering Chemistry Lab........................................2
Humanities or social science elective........................................3

Spring Semester
APPM 1360 Calculus 2 for Engineers..........................4
GEEN 1017 Engineering Drawing................................................2
PHYS 1110 General Physics 1.................................................4

Freshman Year

Fall Semester
CVEN 2121 Analytical Mechanics 1........................................3
AREN 1027 Descriptive Geometry........................................2
AREN 3050 Environmental Systems for Buildings............................3
APPM 2350 Calculus 3 for Engineers........................................4
PHYS 1120 General Physics 2................................................4
PHYS 1140 Experimental Physics............................................1

Spring Semester
AREN 2020 Energy Fundamentals.........................................3
CVEN 3161 Mechanics of Materials 1....................................1
APPM 2360 Introduction to Linear Algebra and Differential Equations.......4
AREN 3060 Environmental Systems for Buildings 2............................3
AREN 3406 Introduction to Building Construction...........................3

Junior Year

Fall Semester
CVEN 3505 Structural Analysis...........................................3
AREN 3010 Mechanical Systems for Buildings..............................3
AREN 3540 Illumination 1...................................................3
CVEN 3246 Introduction to Building Construction........................3
Basic science elective..........................................................3
UWRF 3030 Writing for Science and Society..............................3

Spring Semester
CVEN 3515 Structural Design 1............................................3
ECEN 3030 Electronics and Electric Circuits..............................3
AREN 4110 Heating, Ventilating, and Air Conditioning 1 (Note 2)...........3
AREN 4550 Illumination 2 (Note 2).........................................3
Humanities or social science elective......................................3

Senior Year

Fall Semester
ARCH 3114 History and Theories of Architecture..........................3
ARCH 4010 Architectural Appreciation and Design...........................6
AREN 3030 Energy Laboratory (Note 3).....................................3
Technical elective (Note 3)..................................................3

Spring Semester
CVEN 4039 Senior Seminar................................................1
AREN 4570 Building Electrical Systems Design 1...............................3
Technical electives..............................................................3
Humanities or social science elective...................................3
ARCH 3214 History and Theories of Architecture 2..........................3
Minimum hours for degree....................................................128

Curriculum Notes
1. Four of the six credit hours from APPM 1340 will count toward degree requirements.
2. AREN 4010 Solar Design for Buildings may be substituted for either AREN 4110 or AREN 4550.
3. Either AREN 3030 or AREN 3040 will fulfill the laboratory requirement.

Courses Available for Specialization

Upon consultation with their advisors, students are expected to select courses applicable to their areas of interest and specialization. The areas of specialization are construction engineering and management, building systems engineering, illumination, and structural engineering. In addition to the courses listed below, other courses not listed may be proposed by a student and approved by the advisor if they are found to be applicable.

AREN 4010 Solar Design
AREN 4515 Design of Masonry Structures
AREN 4416 Estimating and Costs
AREN 4466 Construction Planning and Scheduling
AREN 4560 Luminous Radiative Transfer
CVEN 3313 Theoretical Fluid Mechanics
CVEN 3323 Applied Fluid Mechanics
CVEN 3708 Geotechnical Engineering 1
CVEN 3718 Geotechnical Engineering 2
CVEN 4525 Matrix Structural Analysis
CVEN 4545 Steel Design
CVEN 4555 Reinforced Concrete Design
CVEN 4565 Design of Timber Structures
CVEN 4087 Engineering Contracts
CVEN 4161 Mechanics of Materials
CVEN 5010 HVAC System Controls 1
CVEN 5020 Building Energy Measurements
CVEN 5050 Advanced Solar Design
CVEN 5060 Advanced Passive Solar Design
CVEN 5070 Thermal Analysis of Buildings
CVEN 5110 HVAC Design 1
CVEN 5111 Introduction to Structural Dynamics
CVEN 5121 Advanced Mechanics of Materials
CVEN 4511 or 5511 Introduction to Finite Element Analysis
AGCT 2000 Introduction to Financial Accounting
AGCT 2310 Managerial Cost Accounting 1
ECEN 5767 Power Distribution Systems
MCEN 3022 Heat Transfer

* For well-qualified undergraduates.

Double Degree with Business

Students interested in pursuing a B.S. degree in business in addition to the B.S. degree in architectural engineering should be prepared to spend at least three additional semesters. A faculty advisor should be consulted in the student’s freshman year so that social sciences and humanities courses required of business students can be taken.

Academically qualified students may want to consider working toward the master of business administration degree upon completion of the baccalaureate in engineering as an alternative to a B.S. in business.
Graduate Study
Graduate credit is offered in the following courses:
CVEN 5010 HVAC System Controls
CVEN 5020 Building Energy Measurements and Audits
CVEN 5050 Advanced Solar Design
CVEN 5060 Advanced Passive Solar Design
CVEN 5070 Thermal Analysis of Buildings
CVEN 5080 Computer Simulation of Building Energy Systems
CVEN 5110 HVAC Design
CVEN 5111 Introduction to Structural Dynamics
CVEN 5121 Advanced Mechanics of Materials
CVEN 5236 Construction Planning and Scheduling
CVEN 5246 Engineering Contracts
CVEN 5256 Construction Management
CVEN 5266 Industrialized Building Techniques and Systems
CVEN 5286 Construction Engineering 1
CVEN 5296 Construction Engineering 2
CVEN 5511 Introduction to Finite Element Analysis
CVEN 5525 Matrix Structural Analysis
CVEN 5575 Advanced Topics in Steel Design
CVEN 5585 Advanced Topics in Reinforced Concrete Design
CVEN 5830 Special Topics in Energy
CVEN 6525 Finite Element Analysis of Structures
CVEN 6595 Earthquake Engineering
CVEN 7111 Dynamics of Structures
CVEN 7131 Theory of Elasticity
CVEN 7141 Plates and Shells
CVEN 7161 Buckling in Structures
CVEN 7511 Computational Mechanics of Solids and Structures
CVEN 7545 Structural Optimization
CVEN 7555 Structural Reliability
CVEN 7565 Inelastic Theory of Structures

CHEMICAL ENGINEERING
The following areas of knowledge are central to the undergraduate degree in chemical engineering:
• mathematics beyond trigonometry, emphasizing mathematical concepts and principles;
• general chemistry, organic chemistry, physical chemistry, and general physics;
• the engineering sciences that have their origins in mathematics and the basic sciences and that provide a bridge to engineering practice;
• the extension of mathematics and basic sciences toward creative applications;
• the iterative decision-making process in which basic sciences, mathematics, and engineering sciences are applied to convert resources optimally to meet a stated objective;
• elements ancillary to the engineering design process;
• humanity and culture; and
• individual relationships in and to society.
In addition, students completing the degree in chemical engineering acquire the ability and skills to:
• delineate and solve in a practical way the problems of society involving molecular change that are susceptible to engineering treatment;
• address socially-related technical problems that confront the profession;
• implement the engineer's responsibility to protect both occupational and public health and safety;
• maintain professional competency through lifelong learning;
• conduct experimental investigations that combine elements of theory and practice;
• carry out experimentation in a safe manner;
• use digital computation techniques to solve specific engineering problems;
• use at least one modern high-level programming language; and
• communicate both orally and in writing.

Bachelor's Degree Requirements
Chemical engineers are responsible for producing products based on chemical and biochemical processing. They carry out basic research; design, build, operate, and manage chemical processes and plants; and supply petroleum products, plastics, detergents, agricultural chemicals, pharmaceuticals, biological compounds, photographic materials, electronic memory devices, and various food and other products. Today's processes must be energy efficient, nonpolluting, and profitable. Thus, students must master inorganic, organic, and physical chemistry; mathematics, statistics, and computers; physics; and, often, biology and biochemical. Students must learn to use these fundamentals as they are applied in the process industries. Paralleling the technical courses are studies in literature, social sciences, and humanities.
There is a natural affinity between chemical engineering and medicine, and the department emphasizes its premedical and biotechnology program.
At the B.S., M.S., and Ph.D. levels, there are opportunities to specialize via electives, independent study, and research. If a student has an interest that is not included in the following copy, special arrangements can usually be made.
Students may carry out a part of their studies in another country (see the Office of International Education in this catalog), and are encouraged to consider this opportunity seriously, given the international nature of most large engineering corpora-
tions and international cooperation in scientific and engineering research. Many of the faculty have significant international experience.

OPTIONS IN THE CHEMICAL ENGINEERING CURRICULUM
Curricular options have been established in fields of major importance and particular interest. To follow one of these requires careful planning and course selection by student and advisor.

Biotechnology-Premedical Option.
Since all biological and medical systems involve complex chemical and physical processes, chemical engineering is a natural professional basis for either medical school or biotechnology research. The department has a strong undergraduate program tailored toward meeting the needs of students who are preparing for medical school or for careers in biomedical engineering, biochemical engineering, or biotechnology. Modern biotechnology has been defined as "applied genetic engineering" and is of considerable importance due to recent advances in molecular biology and genetic engineering. The successful industrial application of these advances will, in large part, depend on new chemical engineering initiatives in the development of high-rate bioreactors, efficient separation and purification techniques for bioproducts, and computer-interfaced instrumentation for optimal bioprocess control.
The courses comprising the central core of the biotechnology program are: CHEN 3700 Bioenergetics: Structure and Function; CHEN 4710 Molecular Basis of Biological Behavior; CHEN 4800 Recent Advances in Biotechnology; and CHEN 4820 Biochemical Separations (optional in place of CHEN 4710). In addition, biotechnology students are required to complete two semesters of general biology and one semester of biochemistry.
The department also offers graduate biotechnology research programs at both the M.S. and Ph.D. levels. These programs are oriented toward specialization in various aspects of biochemical engineering, biotechnology, and sensory physiology.

Environmental Engineering Option.
Chemical engineers can make major contributions in the fields of pollution control, resource utilization, and environmental improvement. The environmental engineering option is designed to emphasize biological and environmental sciences, the effects of chemicals on the environment, and chemical engineering applications in environmental problems.
Computer Option. Applications of computers in chemical engineering are widespread, and the chemical engineer who has solid preparation in computer science and engineering is in demand. Areas include software systems, simulation, and on-line real-time computing. Students in this option complete the core of the computer engineering degree program in the Department of Electrical and Computer Engineering.

Materials Science Option. The need to develop new materials for a rapidly broadening spectrum of applications is one of the major technological challenges confronting applied science. Chemical engineers have the required background in chemistry and transport theory to contribute significantly in this area. This option focuses on materials processing by complementing the chemical engineering curriculum with elective courses stressing the interrelationship between materials fabrication, structure, properties, and performance.

CURRICULUM FOR B.S. (C.H.E.)

Semester Hours

Freshman Year
Fall Semester
APPM 1350 Calculus 1 for Engineers or APPM 1540 Intensive Calculus (Note 1) 4-6
CHEN 1211 General Chemistry for Engineers ................................................. 3
CHEN 1221 General Chemistry Laboratory for Engineers ................................ 2

PHYS 1110 General Physics 1 ................................................................. 4

Sophomore Year
Fall Semester
APPM 2350 Calculus 3 for Engineers ......................................................... 4
CHEM 3331 Organic Chemistry 2 ................................................................. 3
CHEM 3341 Laboratory in Organic Chemistry ............................................. 1
CHEM 2120 Chemical Engineering Material and Energy Balances (Note 2) ........ 3
PHYS 1120 General Physics 2 ................................................................. 4
PHYS 1140 Experimental Physics ............................................................... 1

Spring Semester
APPM 2360 Introduction to Linear Algebra and Differential Equations .............. 4
Chemistry elective (Note 4) ........................................................................ 3/4

CHEN 3200 Chemical Engineering Principles 1 (Note 2) ................................... 3
CHEN 2010 Probability and Statistics for Chemical Engineers (Note 2) ............ 3
Humanities or social science elective (Note 3) .............................................. 3

Junior Year
Fall Semester
CHEN 4511 Physical Chemistry 1 ................................................................. 3
CHEN 3210 Chemical Engineering Principles 2 (Note 2) .................................. 3
ECEN 3030 Electronics and Electric Circuits ................................................ 3
ECEN 3430 Electronics/Circuits Laboratory for Nonmajors ................................ 1
UWWP 3030 Writing on Science and Society ................................................ 3
Technical elective (Note 5) ........................................................................ 3

Spring Semester
CHEN 4541 Physical Chemistry Lab .............................................................. 2
Chemistry elective (Note 4) ............................................................. 3/4
CHEN 3220 Chemical Engineering Principles 3 (Note 2) .................................. 4
CHEN 3320 Chemical Engineering Thermodynamics (Note 2) ....................... 3
Elective ........................................................................................................ 4/5

Senior Year
Fall Semester
CHEN 4030 Chemical Engineering Laboratory (Note 7) ................................... 4
CHEN 4330 Chemical Engineering Reaction Kinetics (Note 2) ....................... 3
CHEN 4440 Chemical Engineering Materials (Notes 2 and 6) ...................... 3
CHEN 4580 Numerical Methods for Process Simulation (Note 2) .................. 3
Humanities or social science elective (Note 3) .............................................. 3

Spring Semester
CHEN 4520 Chemical Process Synthesis (Note 2) ........................................ 4
CHEN 4570 Instrumentation and Process Control (Note 2) ............................ 3
Humanities or social science elective (Note 3) .............................................. 3
Technical electives (Note 5) ........................................................................ 3/4
Elective ........................................................................................................ 3

Minimum total hours for degree .................................................. 128

Curriculum Notes
1. Four of the six credit hours from APPM 1340 will count toward degree requirements.
2. Course offered only in semester indicated.
3. Courses selected must meet humanities and social science requirements. Students should consult with their advisor.
4. Students should consult with their advisor about chemistry electives.
5. Technical elective must meet engineering science requirements. See advisor.
6. Recommended technical elective.
7. May be taken in spring semester.

Graduate Degree Programs
Major areas of current research interest in the chemical engineering department are bioengineering and biotechnology, colloid science, environmental engineering, heterogeneous catalysis and kinetics, cryogenics, fluid dynamics, low gravity science, mass transfer, materials engineering, statistical mechanics, membrane and polymer science, phase equilibria, process control and optimization, surface science and interfacial phenomena, transport in porous media, and thermodynamics.

MASTER OF SCIENCE DEGREE REQUIREMENTS

Admission. General criteria for regular admission to the master’s program include a bachelor’s degree with a 3.00 or better overall grade point average from a college or university of recognized standing, equivalent to the degree given at this University (or college work equivalent to that required for such a degree, at least 96 semester hours of which must be acceptable toward a degree at this University); promise of ability to pursue advanced study and research, as judged by previous scholastic record or otherwise; and adequate preparation to begin graduate study in the chosen field.

A candidate for the master’s degree in chemical engineering must fulfill the following departmental requirements:

1. Twenty-seven semester hours of graduate work, including a satisfactory thesis. Maximum credit of 6 semester hours will be allowed for the completion of the master’s thesis. Twelve hours at the 5000 level or above (excluding 6 hours of thesis) must be completed. It is recommended that 6 to 9 semester hours be taken in a minor technical field approved by the Department of Chemical Engineering.
2. A final examination as required by the Graduate School on the thesis and/or course work.

It is expected that a qualified student can complete the master’s degree in less than two calendar years. A graduate student with a bachelor’s degree in a field related to chemical engineering can obtain the master’s degree in chemical engineering but may be required to make up deficiencies in background. Programs will be arranged on an individual basis.

The following courses must be taken for the M.S. and Ph.D. degrees:

CHEN 5210 Transport Phenomena
CHEN 5220 Mass Transport
CHEN 5390 Chemical Reactor Engineering

A degree plan must be prepared at the beginning of the academic program in consultation with an advisory committee. The student is urged to maintain close contact with this advisory committee during the entire course of study.
The M.S. thesis committee must consist of three members, including two graduate faculty members from the Department of Chemical Engineering.

MASTER OF ENGINEERING DEGREE REQUIREMENTS

Admission. (The standards of admission to the M.S. program also apply to M.E. degree applicants.) A 3.00 overall undergraduate grade point average is required for regular admission.

M.E. Degree Advisor. All M.E. candidates should see the chemical engineering master of science degree advisor for counseling.

Requirements for Graduation. Nine hours of chemical engineering at the 5000 level or above are required for those M.E. degree students enrolled in the Department of Chemical Engineering. Students orally defend their written reports as specified in the M.E. degree description, and a comprehensive examination is administered by the student's advisory committee on the report and course work. Television course credit will be given as approved by the committee.

DOCTOR OF PHILOSOPHY

Admission Requirements

1. The applicant must have achieved academic competence equivalent to a master of science degree from an accredited college or university, with a grade point average substantially above the minimum normally required for the degree.

2. The applicant must show the ability to perform independent research.

3. The applicant must indicate a field of specialization and obtain an advisor in the chemical engineering graduate faculty.

4. The applicant must pass the Ph.D. preliminary examination administered by the Department of Chemical Engineering.

Admission to the doctoral program is based on consideration of the above criteria and decided by majority vote of the chemical engineering faculty.

A candidate for the doctor of philosophy degree must meet the requirements as described under requirements for advanced degrees in the Graduate School section. A minimum of 30 semester hours of courses numbered 5000 or above is required for the degree. Twelve hours should be taken outside the Department of Chemical Engineering.

All Ph.D. students in chemical engineering must satisfy a communication skills requirement. This includes performing an advanced teaching assistantship and demonstrating satisfactory communication skills on the Ph.D. comprehensive examination. Students whose primary language is English may choose to demonstrate foreign language proficiency instead of being judged on their communications skills on the comprehensive exam.

The Ph.D. dissertation committee must consist of five members, including at least three from the Department of Chemical Engineering and at least one from outside the department. A graduate faculty member of the department must serve as chair of the committee.

Research Facilities

Chemical engineering research facilities are extensive and modern. Nearly all research equipment is interfaced to microcomputer systems for automated data collection, monitoring, and control. A full description of chemical engineering research facilities can be found in the Graduate School section of this catalog.

CIVIL AND ENVIRONMENTAL ENGINEERING

The overall goal of the Department of Civil, Environmental, and Architectural Engineering is to prepare students for careers as professional engineers. The curricula have been designed to qualify students for entry-level positions in professional practice in the areas of civil and environmental engineering. These broad area designations may be separated into the subdisciplines of building systems and energy management; construction engineering and management; environmental engineering; geotechnical engineering; mechanical systems; structural engineering and structural mechanics; and water resource engineering and management.

Alternatively, undergraduates are prepared to begin graduate study in any of the subdisciplines listed above, improving their qualifications and permitting them to enter professional practice at a higher level or to progress to higher levels more rapidly after entry at the beginning level.

Students in civil and environmental engineering gain experience with or exposure to a capstone experience in environmental engineering or structural design; civil engineering systems; construction; engineering geology; engineering materials; geotechnical, or water quality laboratory; environmental engineering; fluid mechanics; geotechnical engineering; manual and computer-aided engineering drawing; mechanics; personal computers and engineering workstation usage; a seminar in professional practice and ethics; structural analysis and design; surveying; transportation systems; and technical electives in their area of emphasis.

Bachelor's Degree Requirements

This curriculum requires students to obtain a background in the humanities, a broad knowledge of the basic engineering sciences of chemistry, mathematics (including differential equations), physics, mechanics (including fluid mechanics and soil mechanics), electrical engineering, and thermodynamics. Social-humanistic hours may be devoted to the social sciences, the humanities, or to approved communication courses, with not more than 12 hours from any one of the three areas.

Advanced technical courses are selected in the senior year. Random selection is not allowed, the objective being to permit a graduate to enter the engineering profession with a firm groundwork in fundamental engineering science and adequate knowledge in specialized fields. Students should consult with their advisor.

CURRICULUM FOR B.S. (C.E.)

The civil engineering program has been separated into two tracks, general civil engineering and environmental/water resources. The first four semesters are common to both tracks.

Semester Hours

Freshman Year

Fall Semester
APPM 1350 Calculus 1 for Engineers or APPM 1340 Intensive Calculus (Note 1) ............... 4-6

CURRICULUM FOR B.S. (C.E.)

GENERAL CIVIL ENGINEERING

Junior Year
Fall Semester
- CVEN 3323 Applied Fluid Mechanics 3
- CVEN 3414 Introduction to Environmental Engineering 3
- CVEN 3505 Structural Analysis 3
- CVEN 3708 Geotechnical Engineering 3
- CVEN 3246 Introduction to Construction 3

Spring Semester
- AREN 3406 Building Construction 3
- CVEN 3461 Mechanics of Materials II 3
- CVEN 3515 Structural Design I 3
- CVEN 3536 Geotechnical Engineering 3
- UWRP 3030 Writing on Science and Society 3

Senior Year
Fall Semester
- CVEN 3111 Analytical Mechanics 2 3
- CVEN 3327 Civil Engineering Systems 3
- CVEN 3602 Transportation Engineering 3
- Technical elective (Note 2) 4
- ECN 3030 Electronics and Electric Circuits 3

Spring Semester
- CVEN 4059 Senior Seminar 1
- CVEN 4XXX Capstone course (Note 3) or technical elective 3
- Technical elective (Note 2) 3
- Humans or social science elective (3000-level or above) 3
- Minimum hours for degree 128

CURRICULUM FOR B.S. (C.E.)

ENVIRONMENTAL/WATER RESOURCES

Junior Year
Fall Semester
- CVEN 3246 Introduction to Construction 3
- CVEN 3323 Applied Fluid Mechanics 3
- CVEN 3414 Introduction to Environmental Engineering 3
- CVEN 3505 Structural Analysis 3
- CVEN 3708 Geotechnical Engineering 3
- CHEM 3911 Organic Chemistry 3

Spring Semester
- CVEN 3424 Water and Wastewater Treatment 3
- UWRP 3030 Writing on Science and Society 3
- CHEN 3220 Chemical Engineering Principles 3
- Technical Electives 6

Senior Year
Fall Semester
- CVEN 3327 Civil Engineering Systems 3
- CVEN 4333 Applied Hydrology 3
- CVEN 3454 Engineering Laboratory in Water Quality 3
- Technical elective (Note 2) 3
- CHEM 4511 Physical Chemistry 3

Spring Semester
- CVEN 4059 Senior Seminar 1
- CVEN 4423 Water Resources Engineering Design 3
- CVEN 4434 Environmental Engineering Design 3
- CVEN 4474 Hazardous and Industrial Waste Management 3
- Technical elective (Note 2) 2
- Humans or social science elective (3000-level or above) 3
- Minimum hours for degree 128

Curriculum Notes
1. Four of the six credit hours from APPM 1340 will count toward degree requirements.
2. Not more than 6 hours of technical electives may be taken outside the department, and then only for defense reasons.
3. The capstone course requirement may be satisfied by CVEN 4424, 4545, or 4555 and may be taken in fall or spring, since each of these courses will normally be offered only once per academic year.

MASTER OF SCIENCE DEGREE

Requirements for this master's degree can be fulfilled in two ways. Under Plan I the candidate presents 24 semester hours of course work including thesis, and under Plan II, 30 credits of course work are required.

MASTER OF ENGINEERING DEGREE

Requirements for this professionally oriented degree are available from the Office of the Dean of the College of Engineering and Applied Science.

DOCTOR OF PHILOSOPHY DEGREE

This degree requires a minimum of 30 semester hours of graduate-level work (5000 level or above), the last 20 of which must be taken at this University. The doctoral dissertation likewise requires 30 semester hours. The applicant for this degree will normally have completed a master's degree in civil engineering or a closely related field and must demonstrate the capability for both rigorous academic accomplishments and independent research.

Research Interests and Facilities

The department has a wide variety of research facilities including a 15g-ton centrifuge for geotechnical and structural model studies and a large 440g-ton geotechnical centrifuge for use in model testing. Also available is an instructional computing facility, the Bechtel Laboratory, equipped with 25 Sun workstations. In addition, extensive structural engineering, engineering mechanics, and geotechnical capabilities exist such as a one-million-pound universal testing machine and several cubic labs for multi-axial testing of materials. A 40 ft by 80 ft structural strong floor with associated equipment permits the testing of a wide variety of structural configurations under controlled conditions, both static and quasi-static. The hydraulic and water resources research laboratories include excellent facilities in water quality and environmental engineering. A unique workstation laboratory for advanced decision support systems is available. Programs in construction management and building energy are well supported. A state-of-the-art HVAC laboratory is capable of testing full-scale, commercial building HVAC systems and their controls using a 'one-of-a-kind' data acquisition and experimental control system.

Current research covers such topics as water and wastewater treatment, surface and subsurface contaminant transport, decision support systems, hydraulic research, land treatment, rapid infiltration,
and activated sludge processes, Cost prediction in construction, construction management, energy conservation in buildings, solar applications, and lighting systems are included. Also, offshore structures, centrifugal modeling, excavations, and rock and soil mechanics are being studied. In structures, research focuses include stability and fracture, fine element techniques, reinforced concrete, earthquake behavior, reinforced masonry structures, and prestressed concrete.

COMPUTER SCIENCE

The Department of Computer Science, in cooperation with other departments in the University, offers a wide range of opportunities for students interested in computing. The department offers a B.S. degree in computer science. This program is designed to prepare students for careers as computer specialists and for graduate study in computer science. A minor in computer science is being introduced. Computer options are also offered by several departments, including electrical and computer engineering, business, and mathematics; students interested in these programs should contact the appropriate department.

The Department of Computer Science also offers M.S. and Ph.D. degrees.

The following areas of knowledge are central to the undergraduate degree in computer science:

• An understanding of computing at all levels of abstraction, including circuits, computer architecture, operating systems, programming languages, algorithms, and large application systems;

• An understanding of the interdependence of hardware and software, illustrated by instances including cost-performance trade-off in storage technology, leading to multilevel storage systems;

• An appreciation of the challenge of large-scale software production and of engineering principles used to meet that challenge;

• An understanding of the technology-independent aspects of computation; and

• An awareness of the major advances in the history of computer science and technology and of current areas of research.

In addition, students completing the degree in computer science acquire:

• The ability to communicate effectively and competently with users as well as fellow computer professionals about computing issues;

• The ability to adapt algorithms and data structures drawn from a large standard repertoire to new problems;

• Fluency in several programming languages and acquaintance with several more;

• Experience in being a sophisticated user of one programming environment or operating system, and acquaintance with several more; and

• The ability to assess new developments in computer science and add to the skills and knowledge described here.

Bachelor's Degree Requirements

A two-semester sequence in the senior year involves students in all aspects of a major software development project, from requirements analysis to finished product. Students can round out their computer science background by selecting from a wide variety of electives in such areas as artificial intelligence, graphics, database systems, parallel processing, and computer networks.

It is also vital for the socially responsible computer professional to have a broad background in the liberal arts. Consequently, students are encouraged to pursue interests in non-technical as well as technical areas outside of computer science. Twenty-four hours of courses in the humanities and social sciences are required. The program also includes a broad sampling of mathematics and basic science courses.

A minimum of 128 hours is required for graduation. The requirements of the College of Engineering and Applied Science must be satisfied for graduation.

The following curriculum is only a sample. It can be adjusted to the needs and interests of individual students (e.g., transfer students and open option students). The curriculum can also be augmented by two semesters of co-op work in industry. Contact the Department of Computer Science for more detailed and up-to-date information on the degree program.

CURRICULUM FOR B.S. (COMP. SCL)

Semester Hours

Freshman Year

Fall Semester
CSCI 1300 Introduction to Computing for Majors ..................4
APPM 1350 Calculus 1 for Engineers or APPM 1340 Intensive Calculus (Nore 1) ..........................4-6
Science ..................................................5

Free elective ...........................................6
Total credit hours ........................................128

Curriculum Notes

1. Four of the six credit hours from APPM 1340 will count toward degree requirements.

Graduate Degree Programs

GENERAL ADMISSION REQUIREMENTS

Graduate students should consider a major in computer science if they are primarily interested in the general aspects of computational processes, both theoretical and practical, e.g., theory of algorithms, methods by which algorithms are implemented on a computer, and information structures. A student who is primarily interested in the results of a computer process and its relation to a particular area of application should major in another field and consider a minor in computer science.

Applicants will be considered for graduate study in computer science if they hold at least a bachelor's degree or its equivalent from an institution comparable to the University of Colorado. They should have con-
siderable programming experience, sufficient mathematical maturity to understand pure mathematics courses, and a number of academic computer science courses.

Applicants should satisfy the following requirements for mathematics courses: at least three semesters of university-level mathematics courses such as calculus, differential equations, linear algebra, probability, statistics, discrete mathematics, and abstract algebra. These courses need not be in a mathematics department; however, they should require mathematical maturity expected of a junior or senior mathematics undergraduate.

In computer science, applicants should have the equivalent of the following University of Colorado courses: CSCI 1200, 1210, 2204, 2250, 3245, one course in assembly language programming or machine architecture, and one other upper-division computer science course. Courses in areas such as artificial intelligence, databases, numerical computation, operating systems, software engineering, theory, and others can be substituted for courses on the above list. However, courses on the list are prerequisites to many of the graduate-level offerings and admitted students lacking their equivalent will usually be required to make them up, without graduate credit. Students who lack this computer science background but who have exceptionally strong credentials in another field should contact the department for individual consideration.

Applicants should have a grade point average of at least 3.00 (on a scale of 4.00). Applicants having the listed qualifications will, if accepted, be classified as regular degree students. Applicants with an average below 3.00 and above 2.75 and/or lacking certain of the prerequisites listed above will be considered on an individual basis. Students accepted in this category will be classified as provisional degree students.

These requirements apply to both the M.S. and Ph.D. programs. Applicants should be aware that admission to both programs is very competitive, and meeting the requirements does not ensure admission. Admission to the Ph.D. program is especially competitive, and successful applicants will in general have records considerably stronger in breadth and quality than these minimum standards suggest.

Ph.D. applicants are encouraged to submit scores for the aptitude portion of the Graduate Record Examination. These scores are required if the applicant wishes to be considered for financial support, has a marginal grade point average, or has previous work at an institution lacking a strong national reputation. Graduate record examination scores are optional for M.S. applicants but are required if the undergraduate GPA is less than 3.00. These scores are encouraged if previous study was at an institution lacking a strong national reputation.

Financial aid is available to Ph.D. students in the form of teaching and research assistantships and fellowships. Unfortunately, aid is only rarely available for M.S. students.

Applications for the M.S. program should be received by February 28 for fall admission and by October 15 for spring admission. Ph.D. applications should be received by January 2 for fall admission.

**Master’s Degree**

**Admission Requirements for this program are given above under General Admission Requirements. Plan I (thesis) or plan II (no thesis) may be followed. In either plan, students must complete 30 credit hours of course or thesis work. The requirements for plan I are as stated under the general requirements of the Graduate School in this catalog. Students in plan I receive 6 credit hours for thesis work and are examined orally on their thesis. Under either plan a student may take 6 hours in a minor field. Students are expected to work out an acceptable program of course work with their advisor. Specific courses depend on the student’s background and field of specialization, but four of the courses must satisfy a distribution requirement.**

**Doctor of Philosophy Degree**

**Admission Requirements for this program are given above under General Admission Requirements. Students in this program must pass preliminary examinations in three subareas of computer science to be eligible for admission to Ph.D. candidacy. The foreign language requirement is the equivalent of four college semesters; a detailed statement is available in the computer science department. A minimum of 30 semester hours in courses numbered 5000 or above is required for the degree, but the number of hours in formal courses will ordinarily be greater than that total. Specific courses depend on the student’s background and field of specialization.**

Following the formal course work, a student must pass a comprehensive examination aimed primarily at determining whether the student is adequately prepared to begin doctoral thesis work.

Finally, students who have completed a minimum of 30 semester hours are expected to prepare a doctoral thesis based on original research in the field of computer science. After the thesis has been completed, an oral final examination on the thesis and related topics will be conducted. The examination will be conducted by a committee of at least five graduate faculty members.

Further details on either the M.S. or Ph.D. degree programs are available in the departmental office.

**Department Computing Facility**

The Department of Computer Science has a number of different types of computers on the computer science research network as detailed in the table below. These computers are interconnected by a 10 Mbit/sec Ethernet-based local area network with 1.5 Mbit/sec links to the Westnet regional network and the NSFNet national backbone. High-speed modem dialup access to this network is available. In addition, departmental instruction is based on a network of workstations and servers detailed below. These machines, together with associated peripherals, laser printers, and terminals provide ready access for graduate students and faculty.

ELECTRICAL AND COMPUTER ENGINEERING

Since the electrical engineering curriculum is almost continually under revision, the information herein may be superseded by the time this catalog is printed and distributed. Up-to-date policies are contained in the department's "HELP! Guide," available through the Electrical and Computer Engineering office.

Bachelor's Degree Requirements

The department offers students a wide range of elective choices, including the following specialties:
- Computer architecture, including real-time and parallel systems, software engineering, including portable compiler construction, microprocessor-based instrument design, and VLSI computer-aided design
- Electromagnetic fields associated with microwaves, antennas, and radio propagation
- Signal processing, communications, and computer communications systems of devices, from rotating machines to lasers
- Power equipment and systems
- Solid-state devices, solid-state materials, integrated circuit fabrication techniques
- Modulation of systems related to electrical engineering
- Biomedical engineering
- Optoelectronics, optical computing, optical systems design, and holography

In just four years it is impossible to study all the areas in detail. Qualified students may specialize further by pursuing a graduate program or by taking continuing education courses after completing the B.S. degree requirements. A graduating senior with high scholarship can finish a master's degree in electrical engineering with about one additional full year of work at any of the nation's major universities.

Principles of computing, physics, chemistry, mathematics, logic, electric circuits, and electronics augmented with laboratory experience form the core of the first two years of study. The third year includes additional work in electronic circuits, solid-state devices, electromagnetic and transmission theory, electrical machines and transformers, thermodynamics, and mechanics. During this year, students desiring to specialize in computer engineering may elect the electrical and computer engineering degree program. This program requires additional courses in software and hardware and has a special emphasis on computer languages and the mathematics courses necessary for this field. In the summer between the junior and senior years, many students will have an opportunity to put their knowledge to work with jobs in industry or on research projects being conducted at the University. In the senior year, students may elect courses from a wide variety of subject areas to fit their particular interests. Practical experience in well-equipped laboratories augments the theoretical approach throughout the program.

Students are encouraged to develop interests outside their electrical engineering specialties by enrolling in nontechnical courses in other colleges of the University. They are urged to participate in college and University activities as well as meetings of their technical societies.

A minimum of 128 hours must be completed for graduation with either the degree B.S. in EE or B.S. in ECE.

Qualified transfer students can usually join the program without appreciable loss of time or credit. For example, students who have completed the required mathematics and physics courses of the freshman and sophomore years and who have a total of about 68 credit hours acceptable to the department can usually complete the program in about four semesters.

The following areas of knowledge are central to the degree in electrical engineering and electrical and computer engineering:
- Knowledge of the basic subfields of electrical and computer engineering, including logic circuits, fundamentals of computer programming, electric circuits, and electronics, microcomputer architecture and assembly language programming, and electronic and magnetic field phenomena;
- Knowledge in several of the following intermediate subfields of electrical and computer engineering—thermodynamics, semiconductor devices, energy conversion, electromagnetics and transmission, linear systems, switching and finite automata, and mechanics; and
- Knowledge in any of the following advanced subfields of electrical and computer engineering—bioengineering, communications, computer systems, electromagnetics, materials, optics, power, control systems, electronics, and VLSI CAD methods.

In addition, students completing the degree in electrical and computer engineering acquire:
- Skills in laboratory techniques in the application areas of logic circuits, microprocessors, and circuits and electronics;
- Skills in laboratory techniques in the application areas of power systems, digital and analog systems, and communications;
- Skills in the use of at least one modern high-level programming language and familiarity with others; and
- The capability to assess new developments in the various fields of electrical and computer engineering.

STANDARD CURRICULUM FOR B.S. IN ELECTRICAL ENGINEERING (EE)

The regular EE curriculum provides a broad background enhanced by a wide range of elective subjects in the senior year. Part of the requirement may be fulfilled through courses in other branches of engineering approved by the student's advisor. Although many students avail themselves of this broadly based program, those who have specific interests in computer technology, business, or a career in medicine may wish to elect one of the programs listed below.

STANDARD CURRICULUM FOR B.S. IN ELECTRICAL AND COMPUTER ENGINEERING (ECE)

This program, leading to the degree B.S. in ECE, is elected during the junior year and covers both hardware and software aspects of computer system design. It is directed toward students whose major interests are in the computer itself and in a broad range of applications.

The details of the program are listed below. Additional information may be obtained from the departmental office. This curriculum is considerably more specific than the general EE program and includes courses in scientific application of computers, logic structure of computers, and assembly language programming. Operating systems experience on departmental computers is an important adjunct to this program.

For other computer-related programs, see the computer science listings.

BIOMEDICAL ENGINEERING OPTION AND PREMEDICAL STUDIES IN ECE

The biomedical engineering option focuses on the application of ECE concepts to the improvement and protection of health. Course work in the ECE curriculum is coupled with specialized courses linking electrical engineering to such biomedical applications as neural signals and systems, bioe-
focus of electromagnetic fields, and therapeutic and diagnostic uses of bioelectric phenomena. Undergraduates may also undertake independent study in these areas.

Students interested in biomedical engineering may receive elective credit for two semesters of biology if they also complete two bioengineering courses from the ECE offerings. One of these ECE courses can also be used to satisfy course distribution requirements. The basic biomedical engineering option is thus composed of two semesters of biology and two ECE bioengineering courses taken in lieu of electives.

ECE students who wish to complete course requirements for medical (or dental, veterinary, etc.) school should add two semesters of organic chemistry to the ECE biomedical engineering option. Premedical ECE students may petition to have these courses substituted for other electives.

Interested students are urged to contact the departmental biomedical engineering advisor for additional information.

**DOUBLE-DEGREE PROGRAM WITH BUSINESS**

A five-year double-degree program in electrical engineering and business leading to the degrees B.S. (EE) or B.S. (ECE) and B.S. (Bus.) is available for those interested in these areas. Students electing this program should enroll for ECON 2109 and 2020 as two of their humanities or social science electives and obtain advice from the College of Business and Administration about the necessary business courses early in their programs.

**DOUBLE-DEGREE PROGRAM WITH MUSIC**

A five-year double-degree program in electrical engineering and music leading to the degrees B.S. (EE) or B.S. (ECE) and B.A. in music is available for those interested in these areas. Students interested in this program should obtain advice from the College of Music regarding the necessary music courses early in their programs.

Minimum total hours for degree: 128

Election of this program will be made during the first semester of the junior year.

**Curriculum Notes**

1. Four of the six credit hours from APFM 1340 will count toward degree requirements.
2. Student-level theory course. If this seems to be the case, students should request a waiver of the course in question from their advisor before or during the first week of the semester in which they are registered for the course.
3. Humanities or social science elective courses are in general people-related (social sciences, humanities and languages) as opposed to technical electives which are thing-related (natural sciences and business).
4. Of the required humanities or social science courses, at least six must be at the upper-division level (3000 or 4000 level). A maximum of six hours will be accepted for skill courses such as composition, communication skills, or ROTO, with only one course in each area.
5. The freshman elective is chosen from CSCI 1210 (Introduction to Programming), ECEN 1400 (Methods and Problems in ECE), or EPOB 1210 and 1250 (General Biology with Laboratory).
6. Students who have been admitted to the mathematics honors program will substitute APFM 2370 and MATH 3150 for APFM 2350 and APFM 2360, respectively.
7. The engineering science course should be selected from ECEN 3020 (Statistical Thermodynamics), PHYS 3210 (Analytical Mechanics), ASEEN 2023 (Thermodynamics), or MCEEN 2022 (Engineering Thermodynamics).

8. The senior year technical electives provide breadth in the program and usually include courses in electrical engineering at the 3000, 4000, or 5000-level. Courses in mathematics, physics, and other engineering areas at the same level may be included with the permission of the student’s advisor. A minimum grade point average of 2.85 is required for enrollment in any 5000-level course, and courses above this level are open to qualified graduate students only. The approval of the student’s undergraduate advisor is required for all technical electives.

9. ECEN electives for the ECE program include a minimum of three of the following four courses: ECEN 3140 (Electromagnetic Waves and Transmission), ECEN 3170 (Energy Conversion 1), ECEN 3310 (Linear Systems), ECEN 3320 (Semiconductor Devices).

10. One of the following four courses must be taken to satisfy the software elective requirement: ECEN 4533 (Introduction to Compiler Construction), ECEN 4583 (Software Systems Development), ECEN 5513 (Real-Time Hardware-Software System Design), or ECEN 5573 (Operating Systems).

CAREER OPPORTUNITIES

A degree in electrical engineering or electrical and computer engineering provides the opportunity to enter the profession of engineering and to engage in a variety of practice areas such as teaching and research in a university; research in development of new electrical or electronic devices, instruments, or products; design of equipment or systems; and production and quality control of electrical products for private industry or government and sales or management for a private firm or branch of government. Specialties within electrical and computer engineering include the design of computer interfaces and computer software, electromagnetic fields and optics, which are basic to radio, television, and related systems; communication theory and signal processing; electrical machinery; solid-state, integrated-circuit, and electron devices; energy and power; electronics; control systems; and others.

Graduate Degree Programs

Electrical and computer engineering graduate programs leading to M.E., M.S., and Ph.D. degrees include the areas of biomedical engineering, materials and quantum electronics, information systems, energy conversion and systems, control theory, optics and optoelectronics, fields and propagation, VLSI design automation, digital signal processing, computers, and remote sensing. Close cooperation with the National Institute of Standards and Technology and industrial organizations in the Boulder area enhances the graduate effort and both teaching and research capabilities are strengthened by the addition of adjunct faculty members from these institutions.

REQUIREMENTS FOR ADVANCED DEGREES

A minimum undergraduate grade point average of 3.00 is required for application to the master's program. Minimum requirements for admission to the Ph.D. program include a 3.40 undergraduate GPA, good GRE scores, and demonstration of research ability. Exceptional students with a B.S. degree can be directly admitted into the Ph.D. program. Information and application forms may be obtained by writing to the Director of Graduate Admissions, Department of Electrical and Computer Engineering, Campus Box 425, University of Colorado at Boulder, CO 80309-0425. Qualified students in their senior year at the University of Colorado and within 18 hours of graduation may be admitted into the graduate program and apply graduate-level credits above the 128-semester-hour B.S. requirement toward an advanced degree. Students formally accepted into the graduate program will be assigned to program advisors.

Master's students may choose either an M.S. thesis option under plan I or a non-thesis option of 30 hours under plan II. The M.E. program is discussed in the College of Engineering general section on graduate study.

All students accepted into the Ph.D. program must take the Ph.D. preliminary examination the first time it is offered (usually in January). They are required to pass the examination in the areas of mathematics and their specialty from an approved list.

Research and Instructional Equipment

The department’s special equipment and facilities include a class 1000 clean room facility for epitaxial growth and fabrication of microwave and optical devices, high-vacuum and vacuum deposition equipment for thin-film research; an integrated circuits laboratory; ion implantation equipment; crystal growing facilities; a modern systems laboratory; undergraduate laboratories in circuits, electronics, and energy conversion; a holography and optics laboratory; an advanced optical metrology lab; numerous special purpose computers, mini- and microprocessors and a computer laboratory; a roof-mounted antenna range; a special microscope for laser manipulation of microorganisms, in vivo; and a bioshielded microwave laboratory.

The Department of Electrical and Computer Engineering has a large variety of computing equipment to support its research and instructional activities. This equipment includes several dozen SUN 3 and 4 computers, and 25 HP 9000/300 and 9000/400 series machines. These machines are connected to the campuswide Ethernet network. There are numerous Apple Macintoshes and IBM-compatible PCs.

ENGINEERING PHYSICS

Bachelor's Degree Requirements

The engineering physics curriculum gives students a thorough foundation in the physical principles underlying most of engineering. The large number of engineering electives that may be incorporated in the curriculum make it possible for students to prepare for professional work or graduate school in a wide variety of fields. Because the program is particularly flexible, students should be aware that proper preparation for their professional field will require careful selection of engineering electives. Students are urged to prepare, in consultation with a departmental advisor, a coherent plan of courses to meet their professional objectives.

During the freshman and sophomore years, students must attain a thorough training in mathematics and a grounding in fundamental methods and principles of physical sciences. During the junior and senior years the work in physics is extended to provide a comprehensive knowledge of various branches of physics such as nuclear physics, atomic physics, electronics, thermodynamics, mechanics, electricity, and magnetism. Individual initiative and resourcefulness are stressed.

For purposes of federal civil service requirements, this is an engineering degree from an accredited college of engineering. Students who plan to become registered professional engineers should check the requirements for registration in their state before choosing their engineering electives.

In order to earn a bachelor's degree in engineering physics, students must complete the curriculum below. In addition, they must meet the general undergraduate
degree requirements of the College of Engineering and Applied Science. Specifically included in the general requirements is the achievement of a GPA of at least 2.00 in the student's physics courses.

**CURRICULUM FOR B.S. (E. PHYS.)**

**Freshman Year**

**Fall Semester**
- APPM 1350 Calculus 1 for Engineers or APPM 1340 Intensive Calculus (Note 1) ...........4-6
- CSCI 1200 Introduction to Programming (Note 2) .............................................3
- Humanities or social science electives (Note 3) ..................................................6
- PHYS 1110 General Physics 1 ..........................................................4

**Spring Semester**
- APPM 1360 Calculus 2 for Engineers .................4
- Humanities or social science elective (Note 3) ....3
- PHYS 1120 General Physics 2 .................................................4
- PHYS 1140 Experimental Physics .........................1
- CSCI 1700 Scientific Programming (Note 2) ..........3

**Sophomore Year**

**Fall Semester**
- APPM 2350 Calculus 3 for Engineers .................4
- Elective (Note 4) ........................................3
- Physics elective (Note 5) ........................................3
- CHEM 1211 and CHEM 1221 General Chemistry for Engineers and Lab (Note 6) ..................5

**Spring Semester**
- APPM 2360 Introduction to Linear Algebra and Differential Equations (Note 7) ..........4
- Humanities or social science elective (Note 3) ....3
- PHYS 2150 Experimental Physics .........................1
- PHYS 2170 Modern Physics .................................3
- Elective (Note 4) ........................................4

**Junior Year**

**Fall Semester**
- Upper-division mathematics elective (Note 7) ........3
- PHYS 3210 Analytical Mechanics .........................3
- PHYS 3310 Principles of Electricity and Magnetism 1 ........3
- PHYS 3330 Junior Laboratory ................................2
- CHEM 4511 Physical Chemistry 1 .........................3
- Elective (Note 4) ........................................3

**Spring Semester**
- PHYS 3220 Quantum Mechanics .........................3
- PHYS 3320 Principles of Electricity and Magnetism 2 ..........3
- Physics elective (Note 5) ........................................3
- CHEM 4541 Physical Chemistry Lab ........................2
- Elective (Note 4) ........................................3

**Senior Year**

**Fall Semester**
- PHYS 4410 Atomic and Nuclear Physics 1 ........3
- Physics elective (Note 5) ........................................3
- Electives (Note 4) ........................................8
- Humanities or social science elective (Note 3) ........3

**Spring Semester**
- Engineering electives (Note 4) ...................10-12
- Physics Electives (Note 5) .....................3-5
- Humanities or social science elective (Note 3) ........3
- Minimum total hours for the degree ............128
- Approved ROTC courses may be substituted for a maximum of 6 hours of electives.

**Curriculum Notes**

1. Four of the six credit hours from APPM 1340 will count toward degree requirements.
2. MCEN 1025 Computer-Aided Drawing and Fabrication or GEEN 1017 Engineering Drawing or another computer science course may be substituted for either one of CSCI 1200 or 1700.
3. A total of 18 semester hours of humanities or social science courses is required. At least 6 of these semester hours must be at or above the 3000 level and must include 3 hours of an upper-division expository writing course. The remaining courses are to be chosen from the College of Engineering's list of approved humanities and social science courses.
4. Unscheduled and engineering electives, including at least one upper-division laboratory, but excluding math, physics, computer science, and drafting, must total 19 hours. This total assumes that 6 hours are taken to fulfill the computer science/drafting requirement.
5. Physics electives (9 hours minimum of which 3 hours must be lab or experiment) from the following list: PHYS 2140 (generally taken sophomore year), 3340 (lab), 4430 (lab), 4150, 4340, 4420, 4510, 4610 or 4627, 4840 or 4860, 5030, 5040, 5770, and 4810 or 4830.
6. CHEM 1111-1131 may replace CHEM 1211-1221-4511-4541.
7. The sequence MATH 3130 Introduction to Linear Algebra and MATH 3430 Ordinary Differential Equations may be substituted for APPM 2360 and the upper-division MATH elective, provided that they will be completed in time to meet the prerequisite requirement for PHYS 3210.

### MECHANICAL ENGINEERING

**Bachelor's Degree Requirements**

The undergraduate curriculum in mechanical engineering incorporates mathematics, physical science, engineering science, design and manufacturing, systems engineering, and the humanities. Courses in these areas are interwoven throughout the curriculum to provide a balanced education in the fundamentals of the profession and comprise three-fourths of the minimum curriculum of 128 semester hours; they are complemented by five technical electives, six electives in the humanities, and a free elective.

To meet the needs of students with varied professional objectives, the department offers two technical-elective plans for the degree bachelor of science in mechanical engineering. Plan A augments the required-course curriculum with electives designed to provide a broad, general undergraduate education in mechanical engineering. Plan B is designed for the student with more specific career plans, facilitating in-depth study in a specific technical area. In consultation with a faculty advisor, the student assembles course offerings within the department and across the University into a concentration within the discipline of mechanical engineering. Typical concentrations are:

- design and manufacturing
- fluid mechanics
- industrial engineering
- materials science
- pre-medicine
- solid mechanics
- systems engineering
- thermal science

**CURRICULUM FOR B.S. (M.E.)**

The following constitutes a representative course schedule for freshmen entering the program in the fall of 1991.

**Freshman Year**

**Fall Semester**
- Free elective ........................................3
- CHEM 1211 General Chemistry for Engineers .......3
- CHEM 1221 General Chemistry Laboratory for Engineers ........................................2
- APPM 1350 Calculus 1 for Engineers or APPM 1340 Intensive Calculus (Note 1) ........4-6
- MCEN 1020 Analytical and Computational Tools ....3

**Spring Semester**
- Humanities or social science electives ........6
- PHYS 1110 General Physics 1 .........................4
- APPM 1360 Calculus 2 for Engineers .................4
- MCEN 1025 Computer-Aided Drawing and Fabrication ........................................3

**Sophomore Year**

**Fall Semester**
- Humanities or social science elective ..........3
- PHYS 1120 General Physics 2 .........................4
- PHYS 1140 Experimental Physics .......................1
- APPM 2350 Calculus 3 for Engineers .................4
- MCEN 2023 Mechanics of Particles .................3

**Spring Semester**
- Humanities or social science elective ..........3
- PHYS 2130 General Physics 3 .........................3
- PHYS 2150 Experimental Physics .......................1
- APPM 2360 Introduction to Linear Algebra and Differential Equations ......................4
- MCEN 2022 Engineering Thermodynamics 1 .........3
- MCEN 2043 Mechanics of Rigid Bodies ............3
Junior Year
Fall Semester
UWRP 3030 Writing on Science and Society .................................................. 3
ECEN 3030 Electronics and Electric Circuits .................................................. 3
MCEN 3024 Introduction to Materials Science .................................................. 3
MCEN 3020 Mathematical Methods ................................................................. 3
MCEN 3021 Fluid Mechanics ........................................................................... 3

Spring Semester
Humanities or social science elective ............................................................... 3
MCEN 3027 Measurements Laboratory ......................................................... 3
MCEN 3022 Heat Transfer ................................................................................. 3
MCEN 3023 Mechanics of Deformable Bodies ............................................... 3
MCEN 3030 Computational Methods ............................................................. 3
MCEN 3026 Control Systems ........................................................................... 3

Senior Year
Fall Semester
MCEN 4025 Component Design ....................................................................... 3
MCEN 4026 Manufacturing Processes and Systems ........................................ 4
MCEN 4027 Mechanical Engineering Laboratory ........................................... 3
Technical electives ............................................................................................. 6

Spring Semester
MCEN 4045 Mechanical Design Project ......................................................... 3
MCEN 4065 Design Estimating ......................................................................... 3
Technical electives ............................................................................................. 9
Minimum total hours for degree ...................................................................... 128

Curriculum Note
1. Four of the six credit hours from APPM 1340 will count toward degree requirements.

Graduate Degree Programs
The department offers master of science (M.S.) and doctor of philosophy (Ph.D.) degree programs to students whose career plans include advanced practice, research and development, and/or teaching at the college or university level.

Research activities focus on the three major disciplinary areas of the department: fluid mechanics/thermal sciences, solid mechanics/material sciences, and design and manufacturing. There are four interdisciplinary research centers hosted by the department involving faculty from mechanical engineering and other departments, post-doctoral researchers, and graduate students.

The Center for Combustion Research carries out studies of combustion-related problems. Current research involves projects in the areas of solid and liquid rocket combustion, flame structure, air pollution chemistry, hazardous waste treatment, and flame-synthesized materials processing.

The Center for Acoustics, Mechanics, and Materials focuses its studies on problems relating to the mechanical and dynamic behavior of materials and material processing. Current research includes a variety of studies relating to non-destructive evaluation of composite materials, development of air-coupled ultrasonic acoustic microscopy methods, seismic wave propagation, fluid-structure interactions, and ceramic, polymeric, and biological materials.

The Center for Advanced Packaging for Microwave, Optical, and Digital Electronics is a new research center funded by a consortium of contributing companies to support path-finding research and educational programs on the packaging of integrated microwave, optical, and digital electronic systems. The focus of effort is in electrical and mechanical modeling, thermal management, fabrication and assembly, functional design and analysis, test and measurement, and reliability and cost prediction.

The Center for Electronics Manufacturing conducts basic and applied research to develop cost-effective solutions for the manufacture of electronics. The current areas of research are novel process control techniques, including use of fuzzy logic and neural networks to provide run-to-run and real-time process control; advanced assembly processes, including development of fine pitch surface mount technologies; design for manufacture; and selected wafer fabrication processes.

Students pursuing the degree of master of science in mechanical engineering may follow either plan I, which requires the writing of a thesis, or plan II, which involves only course work. A student following plan I must complete a minimum of 21 semester hours of course work and 6 semester hours of thesis work; at least 15 semester hours of the course work must be in mechanical engineering subjects. A student following plan II must complete a minimum of 30 semester hours of course work, of which at least 18 semester hours must be in mechanical engineering subjects. Up to 9 semester hours of graduate course work may be transferred from another accredited institution as long as those hours were not used to satisfy another degree requirement. All students must pass an oral comprehensive examination covering the course work and, if applicable, the thesis. Students consult with an academic advisor to decide what course of study best meets their academic objectives.

A student pursuing the Ph.D. in mechanical engineering must complete a minimum of 30 semester hours of course work in courses numbered 5000 and above, as well as 30 semester hours of thesis work; at least 21 semester hours of the course work must be in mechanical engineering subjects. Up to 21 semester hours of graduate course work may be transferred from another accredited institution; there is no credit limit for appropriate courses taken at the University of Colorado, such as those taken for the master of science degree.

Every student desiring to pursue the Ph.D. degree must first pass a written, open-book, preliminary examination, which is normally taken during the second year of graduate study. The preliminary examination is taken in three subject areas selected by the student from the following:

- Computational mechanics design
- Engineering analysis
- Fluid mechanics
- Manufacturing materials science
- Solid mechanics
- Thermal science

Each subject-area examination is three hours long and is designed to measure the student's mastery of the fundamentals of that subject area. A student who does not pass a subject-area examination may take it a second time. The Ph.D. preliminary examination may be taken in lieu of the comprehensive examination required for the master of science degree.

After passing the preliminary examination, students continue their course work and prepare a written thesis prospectus. When ready, they take an oral comprehensive examination covering the graduate course work and the thesis prospectus. After passing the comprehensive examination, students are admitted into the Ph.D. program and conduct the original research required to satisfy the thesis requirement. This research culminates in the writing of the thesis, which students defend in a final examination.

Ph.D. students are assigned an academic advisor to review their progress toward the degree. Students are expected to meet with the advisor at least once each semester prior to registration. Once students have selected a research topic for the thesis, academic advising is done by their thesis advisor.

Additional information on graduate study may be found in the Graduate School section of this catalog.

TELECOMMUNICATIONS
This interdisciplinary graduate program offers a master of engineering or master of science degree to students from a wide variety of undergraduate backgrounds. Both degree programs ensure that students obtain an understanding of the latest aspects of
technology as well as social, political, and business applications in the expanding field of telecommunications. This understanding is gained through course work, research, and laboratory studies.

For information about this program and its offerings, please see the Interdisciplinary Programs listing under the Graduate School section of this catalog.

COURSE DESCRIPTIONS

The following courses are offered in the College of Engineering and Applied Science on the Boulder campus. This listing does not constitute a guarantee or contract that any particular course will be offered during a given year.

For current information on times, days, and instructors of courses, students should consult the Schedule of Courses issued at the beginning of each semester.

Courses numbered in the 1000s and 2000s are intended for lower-division students and those in the 3000s and 4000s for upper-division students. Courses numbered in the 5000s are primarily for graduate students, but in some cases may be open to qualified undergraduates. Normally, courses at the 6000, 7000, and 8000 level are open to graduate students only.

Courses are organized by subject matter within each department, and are listed numerically by last digit (courses ending in the number "0" are listed before courses ending in "1," and so on). The number after the course number indicates the semester hours of credit that can be earned in the course.

Abbreviations used in the course descriptions are as follows:

Prereq.—Prerequisite
Coreq.—Corequisite
Lab.—Laboratory
Rec.—Recitation
Lect.—Lecture

Aerospace Engineering Sciences

Space Sciences and Mechanics

ASEN 3010-3. Aerospace Dynamics. Applications of the principles of Newtonian and Lagrangian dynamics to basic aerospace vehicle motions. Prereq.s, ASEN 2020 and APMN 2360.

ASEN 3060-3. Introduction to Space Experimentation. Provides systems perspective of space exploration for students in all disciplines. Surveys scientific and technical research that can be accomplished from space and the engineering principles and tools needed to make that research possible. Prereq., one semester of calculus (MATH 1080, 1090, and 1100; MATH 1300; or APMN 1350) and one year of physics (PHYS 2010-2020 or PHYS 1110-1120). Same as APAS 3060.

ASEN 4010-3. Introduction to Space Dynamics. Topics include central force fields and satellite orbits, orbital transfer problems, and rigid body dynamics of space vehicles. Prereq., ASEN 3010.

ASEN 5010-3. Spacecraft Attitude Dynamics. Studies the rotational motion of spacecrafts, including attitude parameters and spacecraft torques. Euler equations are applied to the attitude motions of simple spacecrafts and their stability. Prereq., ASEN 3010 or equivalent.

ASEN 5050-3. Space Flight Dynamics. Includes celestial mechanics, space navigation, orbit determination, trajectory design and mission analysis trajectory requirements, orbital transfer and rendezvous. Prereq., ASEN 4010 or instructor consent.

ASEN 5060-3. Satellite Geodesy. Earth-based and space-based tracking of artificial satellites provides a unique and valuable approach to the study of the Earth's gravitational field and rotational characteristics. Develops and applies the basic techniques for studying the physical earth in this evolving field. Prereq., ASEN 3010.

ASEN 5070-3. 5080-3. Introduction to Statistical Orbit Determination 1 and 2. Develops the theory of batch and sequential (Kalman) filtering, including a review of necessary concepts of probability and statistics. Course work includes a term project that allows students to apply classroom theory to an actual satellite orbit determination problem.

ASEN 5100-3. Atmospheric Entry. Covers atmospheric effects on satellites, atmospheric entry from orbit using several classical theories, the entry corridor, orbit insertion due to atmospheric drag, and flight path control during and after entry. Prereq., ASEN 4010 or ASEN 5050, or instructor consent.

ASEN 6210-1. Remote Sensing Seminar. Faculty, students, and invited speakers cover subjects pertinent to remote sensing of the Earth. Covers oceanography, meteorology, vegetation monitoring, and geology. Emphasizes techniques for extracting geophysical information from satellite data. Prereq., graduate standing.

ASEN 6220-3. Topics in Remote Sensing. Covers infrared and microwave techniques for remote sensing, emphasizing oceanographic applications, fundamentals of electromagnetic radiation, remote sensing instrumentation (radars and radiometers), and conversion of sensor data to geophysical parameters, including sea surface topography, temperature, and atmospheric moisture. Prereq., graduate standing and instructor consent.

ASEN 6060-3. Advanced Space Flight Dynamics. Topics include perturbations of orbital motion; classical orbit determination from angles-only observation; modern orbit determination using range and range-rate data; orbit transfer using impulses or continuous thrust; and others. Prereq., ASEN 5050 or instructor consent.

ASEN 6950-variable credit. Master's Thesis. ASEN 8990 (16 to 24 maximum). Doctoral Thesis

Fluid Mechanics

ASEN 3021-3. Fluid Dynamics 2. Includes dynamics of compressible flow: expansion and shock waves; design of airfoils and wings at subsonic, transonic, and supersonic speeds; dynamics of viscous fluids; laminar and turbulent boundary layers. Prereq., ASEN 3011.

ASEN 5021-3. Viscous Flow. Low Reynolds number flows, incompressible and compressible laminar boundary layer theory; similarity theory; separation, transition, and turbulent boundary layers. Prereq., ASEN 5051 or equivalent, or instructor consent.

ASEN 5051-3. Compressible Fluids. Dynamics of nonviscous, compressible, subsonic, and supersonic fluid flow; theory of characteristics, shock waves; slender body and wing theory. Prereq., ASEN 4013.

ASEN 5041-3. Introduction to Turbulence. Physical properties of turbulence, shear flows, heat transfer, homogeneous turbulence, diffusion and turbulence in compressible and electrically conducting fluids. Prereq.s, ASEN 5051 or equivalent and instructor consent.

ASEN 5081-3. Plasma Dynamics and Plasma Physics. Plasma kinetic theory, including charged particle and neutral collisions, ionization, electronic excitation and recombination; motion of charged particles, macroscopic equations; transport coefficients, gas discharge, instabilities, shock waves; low conductivity flow, sheaths and oscillations, electromagnetic waves and radiation, manmade applications and natural phenomena. Prereq., graduate standing or instructor consent.

Materials and Structures

ASEN 2022-3. Materials Science and Engineering. Applications of the principles of physics, chemistry, and thermodynamics to the understanding of relationships between atomic structures, engineering processes, and engineering properties of materials and to selection and design of engineering materials. Prereq., CHEM 1111.

ASEN 5122-3. Control of Aerospace Structures. 1. Introduces the basic problems in dynamic modeling and active control of large spacecraft and satellites. Includes system descriptions, model reduction, controller design, and closed-loop stability analysis. Prereq., ASEN 3014, graduate standing, or instructor consent.

ASEN 5212-3. Composite Structures and Materials. Develops the macromechanical and micromechanical theory of the elastic behavior and failure of composite laminates. Applies basic theory to a broad range of practical problems including the buckling and vibration of composite plates, columns, and shells. Prereq., senior standing in aerospace or mechanical engineering, or instructor consent.

Thermodynamics and Propulsion

ASEN 2023-3. Thermodynamics. Introduces energy and its transformation from a macroscopic approach. Topics include first and second laws of thermodynamics, entropy, cycles, pyrochometrics, heat transfer, and applications. Prereq., APPM 2350 and PHYS 1110; coreq., APPM 2360.

ASEN 4023-3. Nuclear Energy Systems. Foundations of nuclear energy systems; review of reactor theory; design and operation of nuclear electric power plants; systems for nuclear auxiliary power; analysis of nuclear energy systems for various applications. Prereq., senior standing.

ASEN 5013-3. Advanced Propulsion. Chemical combustion calculations for multicomponent gases and application to air-breathing and rocket propulsion systems; performance criteria and scaling laws; introduction to chemical reaction rates; combustion; instability and nozzle heat transfer; ion propulsion and MHD generators. Prereq., ASEN 4013 or instructor consent.

ASEN 5053-3. Rocket Propulsion. Presents in depth the theory, analysis, and design of rocket propulsion systems. Emphasizes liquid and solid propellant systems with an introduction to advanced propulsion concepts. Reviews nozzle and fluid flow relationships. Prereq., senior standing in aerospace or mechanical engineering or instructor consent.

ASEN 5403-3. Space Power Thermohydraulics. Same as ASEN 4403.

Systems and Control

ASEN 3024-3. Systems Analysis 2. Mathematical theory of control with application to the design of mechanical, electrical, and hydraulic systems; modeling; feedback design; specifications; stability tests; root locus methods; and frequency response. Prereq., ASEN 3014.

Geophysical and Environmental

ASEN 4255-3. Environmental Aerodynamics. Reviews the properties and causes of hazards posed by the environment, ranging from atmospheric wind shear to tornadic flows. Involves a multi-disciplinary approach; combining analytical, numerical, and scale modeling studies with extensive field measurements, wind energy, and biophysical aerodynamics. Prereq., senior standing in aerospace engineering. Same as ASEN 5255.

ASEN 5215-3. Oceanography. Same as ASEN 4215.

ASEN 5255-3. Environmental Aerodynamics. Same as ASEN 4255.

Bioengineering

ASEN 4216-3. Neural Signals. Analyzes information processing in the brain and peripheral nervous system in terms of fundamental signalling processes that occur at the neuronal level. Examines biophysical bases for these processes, neural impulse generation, synaptic communication, and sensory reception of molecular and membrane mechanisms. Prereq., instructor consent. Same as ASEN 5216, ECE 4811, ECE 5811.

ASEN 4426-3. Neural Systems. Surveys behavioral, neurophysiological, and biochemical controls manifested by the central nervous system. Provides biological background material for application of formal control theory. Prereq., ASEN 3116 or instructor consent. Same as ASEN 5426, ECE 4821, and ECE 5821.
ASEN 4436-3.Brains, Minds, and Computers. Introduc- 
tory, integrative survey of brain science, 
cognitive science, artificial intelligence, and 
their interrelations. Considers central concepts and 
principles from each of these areas and the similar-
ities and differences of brains, minds, computers, 
and robots. Prereq., ECEN 2160, 3030, or 
instructor consent. Same as ASEN 4536, ECEN 
4831, and ECEN 5831.

System. Points towards a Newtonian foundation 
for the electrical activities of the nerv-
sous system. Studies engineering principles of its 
operations with computer simulation, including 
neurons, neural networks, and neural systems. 
Students do engineering modeling and computer 
simulation. Prereq., CSCI 1700 and instructor 
consent. Same as ASEN 5446.

ASEN 5116-3. Lunar Closed Life Support Sys-
tems. Develops the design of a closed ecological 
support system for a lunar base. Evaluates 
biological and physicochemical systems in order 
to develop a cost-efficient system design. 
Emphasizes technical trades and integration 
challenges. Prereq., ASEN 3116 and ASEN 
4158 or ASEN 5158.

ASEN 5216-3. Neural Signals. Same as ASEN 
4216, ECEN 4811, and ECEN 5811.

ASEN 5426-3. Neural Systems. Same as ASEN 
4426, ECEN 4821, and ECEN 5821.

Same as ASEN 4436, ECEN 4831, and ECEN 
5831.

ASEN 5446-3. Engineering Mechanics of the Nervous 
System. Same as ASEN 4446.

ASEN 5466-3. Membrane Transport: Biological 
and Artificial. Dynamics of membranes in regul-
atng the chemical environment of biological sys-
tems, energy use associated with biological mem-
branes, transport characteristics of organic and 
inorganic substances, theoretical and physical 
membrane models, and integration of membrane 
transport with other biological functions. Prereq., 
ASEN 3116 or instructor consent.

Focuses on active research areas in medical and 
spac e endeavors. Topics range from systematic to 
molecular concerns. In-depth analysis of ongo-
ing research is expected. Emphasizes 
bio physical mechanisms, comprehensive 
empirical models, and unresolved research problems. Prereq., 
ASEN 3116; ASEN 4216 or 5216 or ECEN 
4811 or 5811; and ASEN 4426 or 5426 or 
ECEN 4831 or 5831.

Computational and Analytic Methods 
ASEN 4307-3. Engineering Data Analysis 
Methods. Gives students broad exposure to avariety of 
traditional and modern statistical methods for filtering and analyzing data. intro-
duces these methods and provides practical expe-
rience with their use. Students carry out problem 
assignments. Prereq., APPM 2360. Same as 
ASEN 5307.

ASEN 4317-3. Computational Fluid Mechani-
 cs. Numerical solution of fluid mechanics 
problems involving ordinary and partial differential 
equations of various types. Prereq., CSCI 1700 
and ASEN 3021.

ASEN 4417-3. Numerical Computation. Pro-
vides computational skills for advanced courses 
in scientific computation. Includes an introduc-
tion to UNIX and shell programming, interpreta-
tion, spectral methods, least squares, linear sys-
tems, and ordinary and partial differential equa-
tions. Prereq., APPM 2360 and instructor 
consent. Same as ASEN 5417.

ASEN 5007-3. Introduction to Linear Finite 
Elements. Introduces finite element methods 
used for solving linear problems in structural and 
continuum mechanics. Covers modeling, mathe-
matical formulation, and computer implementation. 
Prereq., matrix algebra.

ASEN 5017-3. Advanced Numerical Analysis 
for Computational Mechanics. Offers within 
reasonable limits a complete description and 
analysis of the state-of-the-art numerical sparse 
methods used in computational mechanics. Cov-
ers implementation of these methods on cur-
rently available supercomputers. Prereq., MATH 
3130 or instructor consent.

Studies turbulent closure methods and computa-
tional procedures used to solve practical turbu-
 lent flows. Emphasizes multi-equation models 
used with time-averaged equations to calculate 
free-turbulent shear-flows and turbulent bound-
ary layers. Spectral methods are employed in 
direct and large-eddy simulation of turbulence. 
Prereq., ASEN 5051 or equivalent.

ASEN 5107-3. Nonlinear Finite Element 
Methods. A continuation of ASEN 5007. Cov-
ers the formulation and numerical solution of 
nonlinear structural problems by finite ele-
ment methods. Emphasizes the treatment of geo-
metric nonlinearities and structural stability. 
Prereq., ASEN 5007.

ASEN 5307-3. Engineering Data Analysis 
Methods. Same as ASEN 4307.

ASEN 5317-3. Computational Fluid Mechani-
 cs. Similar to ASEN 4317 but involves term 
project. Numerical solution of fluid mechanics 
problems involving ordinary and partial differential 
equations of various types. Prereq., ASEN 
3021 and CSCI 1700, or instructor consent.

ASEN 5327-3. Advanced Computational Fluid 
Mechanics. Continuation of ASEN 4317 and 
5317. Introduces advanced computational meth-
ods for solving fluid mechanics problems on the 
computer, emphasizing nonlinear flow pheno-
mena. Prereq., ASEN 4317 or ASEN 5317 or 
instructor consent.

ASEN 5347-3. Mathematical Methods in 
Dynamics. Two-part graduate-level course on 
dynamics. Covers both flexible and rigid multi-
body analytical dynamics and finite element 
dynamical for dynamics. Emphasizes formulations 
that naturally lead to easy computer implementa-
tion and stability, linearization, and modern 
rotational kinematics. Prereq., graduate standing 
and instructor consent.

ASEN 5367-3. Advanced Finite Element 
Methods. Continuation of ASEN 5007. Covers more 
advanced applications to linear static problems 
in structural mechanics, including three-dimen-
sional finite elements, advanced variational prin-
ciples, beams, plates, and shells. Prereq., ASEN 
5007 or equivalent, MCEN 5120 and 5130, or 
equivalent.

ASEN 5417-3. Numerical Computation. Same 
as ASEN 4417.

ASEN 5517-3. Computational Methods in 
Dynamics. Continuation of ASEN 5547. Covers 
numerical algorithms, computer implementation 
aspects, and treatment of constraints and nonlin-
ear rotational computational techniques. Empha-
sizes the combined numerical and physics char-
acterization for the solution of dynamical sys-
tems. Prereq., ASEN 5547.

Design 
ASEN 3028-3. Flight Mechanics. Airfoil design, 
performance of propeller-driven and jet-driven 
aircraft, static stability and control, design trade-
offs of stability and control, and maneuvering 
flight. Prereq., ASEN 5011; coreq., ASEN 5021.

One lab and one rec. per week. Fundamental 
measurements in experimental study of aeronau-
tics and astronautics. Prereq., senior standing.

One lab and one rec. per week. Fundamental 
measurements in experimental study of aeronau-
tics and astronautics, including technical report 
writing. Prereq., ASEN 4018.

ASEN 4098-3. System Engineering and 
Design. Discusses the design, analysis, and technical 
management aspects of system engineering, and 
focuses on applying the design techniques taught 
in student design projects. Designed to prepare 
students for the leadership of multidisciplinary 
engineering projects. Prereq., senior or graduate 
standing in aerospace engineering, or instructor 
consent. Same as ASEN 5098.

ASEN 4138-3. Aircraft Design. One rec. and 
two labs per week. Principles of aircraft layout to 
meet a given specification, taking account of 
both aerodynamic and structural considerations. 
Design of major elements of an aircraft. Prereq., 
ASEN 3028.

ASEN 4148-3. Spacecraft Design. Systems 
approach to the design of an unmanned space-
craft, including guest lectures from specialists 
in each of the disciplines that make up a spacecraft 
design team. Topics include mission design, pay-
load, launch systems, tracking and data systems, 
communications, structures, guidance, and con-
trol. Prereq., instructor consent. Same as ASEN 
5148.

ASEN 4158 (3-6). Space Habitation. Advanced 
design course conducted by the department in 
conjunction with the NASA-University 
Advanced Space Mission Design program. 
Centered on design of a geosynchronous space 
station. The NASA-Ames Research Center sponsors 
the University of Colorado. Prereq., instructor 
consent. Same as ASEN 5158.

Involves the use of both instrument systems and 
software systems for data collection and analysis. 
Systems are studied and students carry out pro-
jects to assess, evaluate, and utilize design con-
cepts and facilities. Prereq., CSCI 1700, ASEN 
3014, and ASEN 3024. Same as ASEN 5178.

ASEN 4218-3. Large Space Structures Design. 
Develops the necessary structural analysis skills for 
conducting conceptual and preliminary designs of 
large space structures with a practical
emphasis on structures considered by NASA over the past 20 years. Analysis skills are applied to a broad range of space missions requiring large space structures, emphasizing low cost and practical design. Prereq., senior standing in ASEN or MGEN, or instructor consent. Same as ASEN 5218.

ASEN 4418-3. Design of Aerospace Structural Components. Covers the basic fundamentals for designing built-up aerospace structural components such as wing boxes and cylinders. Presents analytical tools and assumptions as well as the methodology for conducting trade studies to arrive at an acceptable design. Prereq., senior standing.

ASEN 5098-3. System Engineering and Design. Same as ASEN 4098.

ASEN 5158 (3-0). Space Habituation. Same as ASEN 4158.

ASEN 5168-3. Experimental Space Science. Design of instruments for remote sensing in a space environment, including optical and mechanical design, modern detector technology, and test and calibration. Examination of past and future NASA missions—spacecraft, subsystems, and experiment payloads.

ASEN 5218-3. Design of Large Space Structures. Same as ASEN 4218.

Specialized Topics

ASEN 2519-3. Special Topics. Specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the lower-division level. Course content is indicated in the Schedule of Courses. Prereq. varies.

ASEN 3519-3. Special Topics. Specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the Schedule of Courses. Prereq. varies.

ASEN 4519-3. Special Topics. Specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the Schedule of Courses. Prereq. varies.

ASEN 4689 (1-6). Independent Study. ASEN 4689 (1-6). Undergraduate Research. Assignment of a research problem on an individual basis.

ASEN 4699 (1-3). Independent Study—Center for Space Construction. Examines the various design concepts of a base on the moon and designs the construction process and techniques for the base. Same as ASEN 5689.

ASEN 5519-3. Selected Topics. Treatment of specialized aspects of aerospace engineering sciences by staff or visiting lecturers. Course content indicated in the Schedule of Courses. Prereq. varies.

ASEN 5849 (1-6). Independent Study. Study of special projects.

ASEN 6519-3. Special Topics. Treatment of specialized aspects of aerospace engineering sciences by staff or visiting lecturers. Course content indicated in the Schedule of Courses. Prereq. varies.

ASEN 6849 (1-6). Independent Study. Study of special projects agreed upon by student and instructor.

ASEN 5869 (1-3). Independent Study—Center for Space Construction. Same as ASEN 4689.

Applied Mathematics

APPM 1340-6. Intensive Calculus. Covers precalculus mathematics, analytical geometry, and calculus, as well as other topics covered in Calculus 1 for Engineers. May not be taught on a regular basis; has controlled enrollment.

APPM 1350-4. Calculus 1 for Engineers. Selected topics in analytical geometry and calculus. Rates of change of functions, limits, derivatives of algebraic and transcendental functions, applications of derivatives, and integration. Prereq., 3 years of high school algebra, one year of geometry, one-half year of trigonometry, and satisfactory performance on the math placement examination, or C or better in math modules (MATH 1000-1040).

APPM 2350-4. Calculus 3 for Engineers. Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes. Prereqs., APPM 1360, 1380, or MATH 2300.

APPM 2360-4. Introduction to Linear Algebra and Differential Equations. Introduces ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, linear transformations, and systems of linear differential equations. No credit is awarded to students already having credit in both MATH 3130 and 4430 or APPM 2380.

APPM 3170-3. Discrete Applied Mathematics. Introduces discrete structures, their representations, and applications. Emphasizes applications of graph theory to fields such as computer science, engineering, operations research, social sciences, and biology. Prereq. or coreq., APPM 3310. Same as MATH 3170.

APPM 3310-3. Matrix Methods and Applications. Introduces linear algebra and matrix emphasizing applications. Includes methods of solving systems of linear algebra and linear ordinary differential equations. Discusses computational algorithms to implement these methods. Some applications in operations research may be included as time permits. Students may not receive credit for both MATH 3130 and APPM 3310. Prereq., APPM 2350 or MATH 2400, and APPM 2360 or 2380.

APPM 3570-3. Applied Probability and Statistics. Introduces concepts in probability, including combinatorics and some common probability distributions (binomial, Poisson, normal, etc.). Introduces statistical inference, organization of statistical data, sampling, testing hypotheses, linear regression, and analysis of variance. Students may not receive credit for both APPM 3570 and MATH 2510 or MATH 4570. Prereq., APPM 2350 or MATH 2400.

APPM 4380-3. Modeling in Applied Mathematics. Exploits a variety of mathematical models arising in the physical and biological sciences. Models may be taken from applications in classical and celestial mechanics, fluid dynamics, traffic flow, population dynamics, economics, and elsewhere. Prereqs., APPM 4350 and PHYS 1120.

APPM 4650-3. Introduction to Stochastic Population Models. Study of mathematical models used in demography, epidemic theory, statistical
genetics, and mathematical ecology, and their strengths and limitations. Surveys mathematical techniques used in these applications. Prereq., one year of calculus and a course in probability and/or statistics.

APPM 4570-3. Statistical Methods. Covers discrete and continuous probability laws, random variables; expectation; laws of large numbers and central limit theorem; estimation, testing hypotheses, analysis of variance, regression analysis, and nonparametric methods. Emphasizes applications with an introduction to packaged computer programs. Credit cannot be received in both MATH 2510 and 4570/5570. Prereq., Calculus 2.

APPM 4650-3. Intermediate Numerical Analysis 1. Numerical solution of nonlinear equations; interpolation; methods in numerical integration; numerical solution of linear systems and matrix eigenvalue problems. Stresses significant computer applications and software. Prereq.: APPM 2350 or MATH 2400; APPM 3100 or MATH 3130; and a background in computing. Same as MATH 4650.

APPM 4840 (1-3). Independent Study. Introduces undergraduate students to the research focuses of the program in applied mathematics. Prereqs., APPM 1350, 1360, 2350, 2360, and either APPM 3310 or MATH 3130. Recommended prereq., a course in ordinary or partial differential equations and APPM 4650.

APPM 4955-3. Undergraduate Seminar in Applied Mathematics. Introduces undergraduates to applied mathematical topics and strategies for research. A maximum of 6 hours of seminar work is allowed toward the degree in applied mathematics. Prereqs., three semesters of calculus, APPM 2360 or an upper-division applied mathematics course, and instructor consent.

Architectural Engineering

Building Systems Engineering

AREN 3030-3. Building Energy Laboratory. Two lect., one 3-hour lab per week. Laboratory course on mechanical systems in buildings, with focus on building applications of thermodynamics, fluid dynamics, and heat transfer. Applications include solar collectors, pumps, fans, heat exchangers, and air conditioning and refrigeration systems. Prereq., AREN 3010.

AREN 3040-3. Illumination Laboratory. Introduces the measurement of photometric and psychophysical quantities used in lighting. Experience is acquired in using light measurement instruments to evaluate lighting equipment and luminous environments.

AREN 3050-3. Environmental Systems for Buildings 1. Introduces the operation and design of building systems for climate control, water and drainage, fire safety, electrical supply, illumination, transportation (elevators and escalators), and noise control.

AREN 3060-3. Environmental Systems for Buildings 2. Introduces the operation and design of building systems for climate control, water and drainage, fire safety, electrical supply, illumination, transportation (elevators and escalators), and noise control.

AREN 3540-3. Illumination 1. Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual work and the proper interaction with architecture.

AREN 3630-3. Introduction to Acoustics and Noise. Topics include the engineering and physiological foundations of acoustics, individual and social response to sound, environmental noise problems, and engineering and legal control of noise. Prereqs., PHYS 1120 and junior standing, or instructor consent. Same as ASEN 3016.

AREN 4010-3. Solar Design for Buildings. Design-oriented course devoted to solar heating of buildings. Subject coverage includes solar radiation, thermal conversion, solar system analysis, economic analysis of solar systems, and solar design optimization. This is one of several "capsule" courses available to architectural engineering students. Prereq., AREN 2010.

AREN 4110-3. HVAC Design 1. Design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimating, code compliance, duct design, fan systems, applied psychrometrics, cooling and heating coils, filters, hydronic systems, piping, and pumps. This is one of several "capsule" courses available to architectural engineering students. Prereq., AREN 3010. Same as CVEN 5110.

AREN 4550-3. Illumination 2. Application of the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings. This is one of several "capsule" courses available to architectural engineering students.

AREN 4560-3. Luminous Radiative Transfer. Fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis.

AREN 4570-3. Building Electrical Systems Design 1. Introduces the generation and control of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in buildings. Applies the national electric code.

AREN 4590-3. Computer Applications in Lighting. Study of the numerical methods required for advance calculations in architectural lighting design and analysis. Practice in their implementation in computer programs and use in the lighting design process.

Structures

AREN 4035-3. Structures 1. Analysis of basic structural systems. Principles of mechanics and mechanical properties of materials; analysis and design of trusses, arches, and cable structures. For non-engineering students; does not apply toward an engineering degree. Prereq., senior standing or instructor consent.

AREN 4045-3. Structures 2. Analysis of basic structural systems. Principles of mechanics as applied to the design of flexural members, columns, continuous beams, and rigid frames. For non-engineering students; does not apply toward an engineering degree. Prereq., AREN 4035.

AREN 4315-2. Design of Masonry Structures. Covers modern masonry construction; properties and behavior of the reinforced masonry component materials, clay and concrete masonry units, mortar, grout, and steel reinforcement; vertical and lateral load types and intensities; design of reinforced masonry walls, beams, and columns by working stress and strength design methods.

Construction

AREN 1316-1. Introduction to Architectural Engineering. Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration.

direct and indirect cost fundamentals and collecting systems, methods engineering and value engineering. Includes a study of types of estimates, quantity take-offs techniques and pricing applications, and preparation of a detailed estimate for a building project including all cost analyses, a complete quantity survey, development of unit prices, and final assembly of the bid proposal. Prereq., senior standing or instructor consent.

AREN 4466-3. Construction Planning and Scheduling. Comprehensive study of construction management including the contractor's role in preconstruction activities: the construction contract; bonds and insurance; purchasing and subcontracts; contractor's central office and job organization; plant, tools, and equipment; methods engineering; value engineering; labor relations and hiring; and the particular application of CPM/PERT techniques to the planning, scheduling, and control of a construction project. Prereq., AREN 4416 or equivalent and senior standing, or instructor consent.

Miscellaneous
AREN 1027-2. Descriptive Geometry. Orthographic projection: point, line, and plane problems; angle problems, intersections; computer graphics using Autocad on PCs. Prereq., GEEN 1017 or equivalent.

Special Topics
AREN 4849 through 4999 (1-6). Independent Study. Students may also consult the Department of Civil, Environmental, and Architectural Engineering for courses applicable to the architectural engineering program.

Chemical Engineering
CHEN 1000-3. Creative Technology. Lect. Introduces undergraduate arts and sciences students to the most recent concepts in technology and how these concepts impact all aspects of life, such as health, the health of the planet, and social structures. Approved for arts and sciences core curriculum: natural science. Engineering students should consult an advisor before registering for this course.

CHEN 1300-1. Introduction to Chemical Engineering. Introduces facets of chemical engineering including history of the profession, chemical engineering curriculum, industries in which chemical engineers practice, and industrial chemistry. Students participate in design experiences, visit industry, meet faculty and practicing professionals, and develop a goals statement.

CHEN 2010-3. Probability and Statistics for Chemical Engineers. Use of probability models and statistical methods for analyzing data is common in chemical engineering. Course provides a comprehensive introduction to those models and methods by applying them to typical problems. Prereq., GEEN 1300 or equivalent.

CHEN 2800-3. Biophysics of High-Altitude Physiology. Examines the many physiological problems encountered by humans living or traveling in high altitudes, such as problems caused by the body's inability to cope with low oxygen concentration, including respiration, blood circulation, oxygen uptake, and other physiological effects.

CHEN 2840 through 2850 (1-3). Independent Study. Available to sophomores with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.

CHEN 3200-3. Chemical Engineering Principles 1. Lect. Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to chemical engineering systems. Prereq., APMM 2350 and CHEN 2120.

CHEN 3220-4. Chemical Engineering Principles 3. Three lect. and two rec. or calculation sections per week. Study of mechanisms of mass transfer, including molecular diffusion, eddy diffusion, and convective mass transfer. Application of mass transfer theory to the design of chemical equipment. Prereq., CHEN 3200 and 3210.

CHEN 3320-3. Chemical Engineering Thermodynamics. Lect. Thermodynamic principles applied to nonideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes. Prereq., CHEM 4511.

CHEN 3700-3. Bioenergetics: Structure and Function. Rec. Introduces molecular biophysics dealing principally with questions related to energy conversion as related to the structure and function of biological macromolecules and organisms. Concludes by considering a variety of biological systems that interface between the physical and engineering sciences. Prereq., one year of college chemistry and one year of college biology (MCDB or EOB).

CHEN 3840 through 3850 (1-3). Independent Study. Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.

CHEN 4030-4. Chemical Engineering Laboratory. One lect., rec., and two 4-hour labs per week. Experimental work and reports in unit operations. Planning and analysis of chemical engineering experiments. Heavy emphasis on preparation of technical reports. Prereq., CHEN 2010, 3210 and 3220.

CHEN 4390-3. Chemical Reactor Engineering. Same as CHEN 5390. Prereq., CHEN 4330 and instructor consent.

CHEN 4520-4. Chemical Process Synthesis. Three lect., one rec. or calculation session per week. Solution of selected comprehensive problems dealing with development, equipment, process design, process control systems, materials, product allocations, and chemical process optimization. Prereq., CHEN 3210, 3220, and 4330. Same as CHEN 5590.

CHEN 4710-3. Molecular Basis of Biological Behavior. Lect. Problems approach to neurobiology. Covers molecular biology, genetics, biochemistry, and physiology of model behavioral systems from chemotaxis in bacteria to vision in vertebrates to the brain. Prereq., CHEN 3700 and CHEN 4800 or 5800, or instructor consent. Same as CHEN 5710.

CHEN 4800-3. Recent Advances in Biotechnology. Lect. and lab. Reviews the recent developments in the fields of microbiology, molecular genetics, and genetic engineering which are of commercial value and benefit to mankind. Covers engineering implementation of such biological processes. Prereq., senior or graduate standing in engineering or science. or instructor consent. Same as CHEN 5800.

CHEN 4820-3. Biochemical Separations. Lect. and lab. Purification methods, mass transfer, coefficients, problems specific to biocatalysts, and scale-up processes. Discusses chromatography, phase extraction, supercritical fluids, sedimentation, precipitation, electrophoresis, dialysis, affinity techniques, cell separation, application of separations to bioreactors, and comparison of continuous and batch processes. Prereq., unit operations and elementary transport phenomena. Same as CHEN 5820.

CHEN 4840 through 4950 (1-3). Independent Study. Available to seniors with approval of
Chemical Engineering Department. Subject arranged to fit needs of the student.

CHEN 5090-0. Seminar in Chemical Engineering. Required of all chemical engineering graduate students. Reports on research activities and on special current topics.

CHEN 5210-3. Transport Phenomena. Fundamental relationships for fluid mechanics and heat transfer, and their application to engineering problems. Prereq., senior or graduate standing.

CHEN 5220-3. Mass Transport. Diffusive and convective mass transfer in binary and multicomponent systems; scaling conservation equations for multicomponent systems; dimensional analysis in mass transfer; macroscopic species balance; mass transfer with chemical reaction; mass transport in porous media. Prereq., CHEN 5210 or instructor consent.

CHEN 5280-3. Statistical Thermodynamics. Same as MCEN 5142.

CHEN 5360-3. Catalysis and Kinetics. Study of principles of chemical kinetics and catalytic reactions, emphasizing heterogeneous catalysis. Coreq., CHEN 4330, or prereq., CHEM 4551 and instructor consent, or graduate standing in CHEN or CHEM.

CHEN 5380-3. Macroscopic Thermodynamics. Same as MCEN 5122.

CHEN 5390-3. Chemical Reactor Engineering. Advanced study of ideal and nonideal chemical reactors, including steady state behavior, mixing effects, reactor stability, residence time distribution, and modeling of nonideal reactors. Additional topics include fluidized beds and diffusion in porous catalysts. Same as CHEN 4390.

CHEN 5420-3. Physical Chemistry and Fluid Mechanics of Interfaces. Covers thermodynamics of interfaces, surface tension measurement; adsorption at liquid-gas, liquid-liquid, and solid-gas interfaces; monolayers; conservation equations for a fluid interface; rheology of interfaces; surface tension driven flows; contact angle and wetting; double layer phenomena. Prereq., CHEN 3200 or equivalent.

CHEN 5580-3. Optimal Control and Identification for Industrial Processes. Develops optimal control and identification theory using the calculus of variations and Pontryagin's minimum principle. Stresses applications in process situations including chemical, biochemical energy, and micro-electronic industries. Prereq., senior or graduate standing.

CHEN 5600-3. Cryogenic Engineering. Same as CHEN 4600, except that special term report is required.

CHEN 5609-0. Industrial Pollution Control. Chemical and physical nature of water pollutants and solid wastes from industrial processes. Methods of reducing pollutant generation and treatment for pollutant disposal. Prereq., senior standing in CHEN and instructor consent.

CHEN 5710-3. Molecular Basis of Biological Behavior. Same as CHEN 4710, except that students are expected to participate in an independent research project.

CHEN 5740-3. Analytical Methods in Chemical Engineering. Presents applied analytical mathematical methods in the context of chemical engineering research problems. Topics include vector analysis, linear algebra, modeling techniques, and ordinary and partial differential equations. Prereq., graduate standing or instructor consent.

CHEN 5750-3. Numerical Methods in Chemical Engineering. Studies applied numerical methods commonly used to solve chemical engineering problems via digital computer programming assignments. Topics include numerical solution of ordinary and partial differential equations, design of experiments, and treatment of data. Prereq., graduate standing or instructor consent.

CHEN 5760-3. Engineering Aspects of Animal Locomotion. Survey course dealing with animal locomotion. In general, all animals swim, fly, or run. Each of these modes presents a unique physical situation to the biological system in terms of physiology, analytical mechanics, and fluid mechanics. Prereq., CHEN 3700 or instructor consent.

CHEN 5780-3. Recent Advances in Biotechnology. Same as CHEN 4800, except that a major term report is required.

CHEN 5820-3. Biochemical Separations. Same as CHEN 4820, except that reports and extra reading are required.

CHEN 5840 through 5850 (1-3). Independent Study. Available to M.S. students.

CHEN 5910 through 5919 (0-3). Selected Topics. Credit and subject matter to be arranged.

CHEN 6230-3. Chemically Specific Separations. Covers the various methods for improving the productivity and selectivity of various separations processes. Discusses fundamental approaches, applications in various processing schemes, and new research thrusts.

CHEN 6280-3. Heat Transfer 2. Same as MCEN 5172.

CHEN 6570-3. Optimal Control of Chemical Processes. Study of stability and optimal control as applied to chemical processes. Topics discussed include Lagrange stability, application to the maximum principle and variational calculus to the control of linear and nonlinear chemical systems. Prereq., CHEN 5580 or equivalent.

CHEN 6820-3. Biochemical Engineering Fundamentals. Covers design and operation of fermentation processes, microbial and enzyme kinetics, multiple substrate and multiple species of fermentation, regulation of enzyme activity, energetics of cellular growth, immobilized enzyme and cell reactors, transport phenomena in microbial systems and downstream processing. Prereq., graduate standing in CHEN, CHEM, or MCDB, or instructor consent.

CHEN 6910 through 6919 (0-3). Selected Topics. Credit and subject matter to be arranged.

CHEN 6940. Master's Candidate.

CHEN 6950-variable credit. Master's Thesis.

CHEN 7840 through 7850 (1-6). Independent Study. Available to Ph.D. students.

CHEN 8990 (1-10). Doctoral Thesis

Special Topics

CHEN 4830 through 4839 (1-4). Special Topics in Chemical Engineering. Senior topics courses offered upon demand. Prereq., senior standing or instructor consent.

CHEN 5830-5839 (1-4). Special Topics in Chemical Engineering. Graduate-selected topics courses offered upon demand. Prereq., graduate standing or instructor consent.

Laboratories

CHEN 1211-2. General Chemistry Laboratory for Engineers. In a one-hour recreation, concepts and problems from CHEN 1211 are reemphasized, homework collected, and quizzes given. During the three-hour laboratory, students perform experiments illustrating chemical concepts discussed in CHEN 1211. Students are introduced to basic techniques in chemical measurement and synthesis. Prereq., enrollment in the College of Engineering and Applied Science; one year of high school algebra; and one year of high school chemistry or satisfactory performance (grade of B or better) in CHEN 1001 or 1021. Coreq., CHEN 1211.

Civil and Environmental Engineering

Building Systems

CVEN 5010-3. HVAC System Controls. Treats the theoretical and practical design of control systems for heating, ventilating, and air conditioning of both residential and commercial buildings. Discusses computer energy management system design. Prereq., AREN 3010 or equivalent.

CVEN 5080-3. Computer Simulation of Building Energy Systems. Introduces major simulation programs for analysis of building energy loads and system performance. Uses one or more programs to develop capability for analysis of multizone structure. Prereq.: AREN 4110 or CVEN 5110.

CVEN 5090-1. Building System Seminar.

CVEN 5110-3. HVAC Design 1. Design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimating, code compliance, duct design, fan systems, applied psychometrics, cooling and heating coils, filters, hydronic systems, piping, and pumps. Prereq.: AREN 3010 or equivalent. Same as AREN 4110.

CVEN 5830 through 5839 (0-3). Special Topics. Credit and subject matter to be arranged.

CVEN 6940 through 6949-3. Master's Candidate.

CVEN 6950 through 6959-variable credit. Master's Thesis.

CVEN 8990 through 8999 (1-10). Doctoral Thesis. A minimum of 30 hours is required.

Mechanics

CVEN 2121-3. Analytical Mechanics 1. Vector treatment of force systems and their resultants; equilibrium of frames and machines, including internal forces and three-dimensional configurations; static friction; properties of surfaces, including first and second moments; hydrostatics; minimum potential energy and stability. Prereq.: PHYS 1110; prereq. or coreq.: APPM 2350.

CVEN 3111-3. Analytical Mechanics 2. Vector treatment of dynamics of particles and rigid bodies including rectilinear translation, central-force, free and forced vibration, and general motion of particles; kinematics of rigid bodies; the inertia tensor; Euler's equations of motion; energy and momentum methods for particles, systems of particles, and rigid bodies. Prereq.: CVEN 2121 and APPM 2360.

CVEN 4161-3. Mechanics of Materials 2. Concepts of triaxial stress and strain; equilibrium; kinematic relations; basic constitutive relations of engineering materials; strain energy; failure theories; thin and thick-walled cylinders; symmetric/non-symmetric bending; torsion of thin-walled members; combined loading; buckling of columns; and elastic stability. Selected experimental and computational laboratories.

CVEN 5121-3. Mechanics of Materials 3. Energy methods; inelastic behavior; torsion of open sections and torsion of non-circular sections; curved beams; thick wall pressure vessels; and failure theories.

CVEN 5511-3. Introduction to Finite Element Analysis. Same as CVEN 4511. Prereq., graduate standing.

CVEN 7161-3. Buckling in Structures. Buckling of columns, beams, frames, plates, and shells in the elastic and plastic range. Other topics are postbuckling strength of plates, beam-columns, analysis by exact and approximate methods with special emphasis on practical implications and applications of solutions. Prereq., CVEN 3161.

Surveying and Transportation

CVEN 2012-3. Plane Surveying. Observation, analysis, and presentation of basic linear, angular, area, and volume field measurements common to civil engineering endeavors. Prereq., APPM 1350 or equivalent.

CVEN 3032-3. Photogrammetry and Control Surveys. Characteristics of aerial photographs; measuring and interpreting from aerial photos for planimetric, topographic, hydrological, soil, and land use surveys; analysis and presentation of field measurements over extensive reaches. Prereq., instructor consent.

CVEN 3602-3. Transportation Engineering. Introduces technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and conveyor transportation systems. Focuses on evaluation of urban transportation systems and recent transportation innovations. Prereq., instructor consent.

Note: The following surveying and transportation courses are offered only at the Denver campus.

CVEN 4612-3. Municipal Traffic Engineering. Analysis of traffic engineering problems commonly found in urbanized areas and design of alternative solutions. Prereq., CVEN 3602 or instructor consent.

CVEN 5622-3. Urban Transportation Planning. Definition of the urban transportation problem, sociology of urban regions, history of urban growth, models of urban growth, population forecasts, land use surveys and planning, trip
Fluid Mechanics and Water Resources

Basic principles of fluid mechanics. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, boundary-layer theory, and flow in closed conduits. Prereq., CEN 2122.

3323-3. Applied Fluid Mechanics. Reviews basic fluid mechanics, incompressible flow in conduits, pipe system analysis and design, and dimensional analysis and similarity including design aspects, open channel flow, flow measurement, analysis and design of hydraulic machinery, and water resource engineering. Prereq., CEN 3313.

3443-3. Open Channel Hydraulics. Study of flow in open channels both natural and constructed. Topics include application of energy equation and momentum relationships, tractive force on erodible boundaries, water surface profiles theory and calculations, and design of transitions. Prereq., CEN 3313. Same as CEN 5343.

3443-2. Engineering Laboratory—Water Quality. Discussion of techniques for making and evaluating measurements of water quality and pollution parameters. Measurements of these parameters on local streams, drinking water, and municipal wastes. Prereq. or coreq., CEN 3414, or instructor consent.

3543-3. Open Channel Hydraulics. Graduate standing required for CEN 3543.

3555-3. Groundwater Hydrology. Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses of basic concepts to solve engineering and geohydrologic problems.

3563-3. Modeling of Hydrologic Systems. Introduces students to the techniques used in modeling various processes in the hydrologic cycle. Students develop numerical models and computer programs to be used in conjunction with existing simulation models such as HECl and HECl 2 in a design project. Prereqs., CEN 4335 and CEN 4537.

3573-3. Water Law, Policy, and Institutions. Contemporary issues in water management based on legal, economic, engineering, and political considerations. Prereq., senior or graduate standing.

3593-3. Seminar in Water Resources Development and Management. Multidisciplinary exploration of the principles governing water resources planning and development. Emphasizes the social, physical, engineering, chemical, biological, and social—and their interrelationships. Prereq., senior or graduate standing. Same as ECON 8555.

Environmental

3414-3. Introduction to Environmental Engineering. Introduces environmental protection legislation and various water, air, and hazardous waste problems. Stresses basic geochemical, ecological, mass conservation, and environmental chemistry concepts in relation to solving environmental engineering problems. Prereqs., CHEM 1211, CHEN 1221, and APPM 2350.

CVEN 5454-3. Simulation Methods in Environmental Engineering. Introduces the use of digital simulation in the analysis of water resources and environmental systems. Computer programs for the simulation of reservoir operations, watershed runoff, stream quality and lake quality are developed and existing software is utilized for the analysis of more complex problems. Prereq.: instructor consent and computer background.

CVEN 5494-3. Fate and Effects of Pollutants in the Environment. Water quality management course in which the relationships among air, water, and land pollution, water quality, and beneficial uses are examined. Major objectives are to develop the ability to recognize the consequences and impacts of pollutants in the aquatic environment and to learn how to correct or minimize the unfavorable water quality conditions. Prereq.: instructor consent.

Structures

CVEN 3515-3. Structural Design I. Introduces structural design: design philosophies and approaches, structural materials, loadings, behavior of structural members and connections, and elementary applications to the design of members and systems. Prereq.: CVEN 3505.

CVEN 4545-3. Steel Design. Application of basic principles to design of steel structures; design of tension members, columns, beams, beam-columns, and connections; continuous beams and frames; elastic and plastic design methods. One of three capstone courses available to civil engineering majors. Prereq.: CVEN 3515.

CVEN 4555-3. Reinforced Concrete Design. Application to the design of reinforced concrete structures: design of beams, columns and slabs; prestressed concrete; footings; continuous beams and frames; buildings and bridges. One of three capstone courses available to civil engineering majors. Prereq.: CVEN 3515.

CVEN 5575-3. Advanced Topics in Steel Design. Advanced topics relating to design and analysis of steel structures. Includes plate girders, moment connections for beams, design of multi-story frames, and other topics determined by class interest. Prereq.: CVEN 4545 or equivalent.

CVEN 5585-3. Advanced Topics in Reinforced Concrete Design. Advanced topics relating to design and analysis of reinforced concrete structures. Includes review of the current ACI design code, slabs, prestressed concrete, seismic design, folded plates and shells, finite element analysis, and other topics determined by class interest. Prereq.: CVEN 4555 or equivalent.

CVEN 7555-3. Structural Reliability. Students explore principles and methods of structural reliability, and formulate bases for design to insure adequate safety and performance of elements and structural systems. Prereq.: CVEN 3515, 4525, or instructor consent.

Construction

CVEN 1316-3. Introduction to Civil Engineering. Surveys the broad subject of civil and architectural engineering and professional practice, emphasizing study of construction methods including foundations, structural systems, building materials, and systems applications in building construction. Same as AREN 1306.

CVEN 3246-3. Introduction to Construction. Broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor, and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law, and financial management. Prereq.: junior level standing or instructor consent.

CVEN 5226-3. Construction Planning and Scheduling. Comprehensive study of construction management including the contractor's role in preconstruction activities; the construction contract; bonds and insurance; purchasing and subcontracts; contractor's central office and job organization; plant, tools, and equipment; methods of engineering; value engineering; labor relations and hiring; and the application of CPM/PERT. Techniques to the planning, scheduling, and control of a construction project. Students are required to apply the techniques of the course to a term project. Prereq.: AREN 4416 or equivalent. Same as AREN 4466.

CVEN 5246-3. Engineering Contracts. Applications of law in engineering practice; contracts, construction contract documents, construction specification writing, agency, partnership and property; types of construction contracts; legal responsibilities and ethical requirements of the professional engineer. Students are required to complete a comprehensive term paper on a course topic of their choice and present the paper. Prereq.: graduate standing or instructor consent. Same as CVEN 4087.

CVEN 5256-3. Construction Management. Advanced study and analysis of construction top and middle management responsibilities, particularly relating to union craft labor, on- and off-site production and workmanship, construction financing, construction safety, inspection and quality control, and disputes and claims. Stresses investigations to improve construction management efficiency and to lower construction costs. Prereq.: senior standing with AREN 4416, 4466, CVEN 4086, or instructor consent.

CVEN 5266-3. Industrialized Building Techniques and Systems. Includes factory on-site inspections of industrialized building techniques and systems. Advanced study, investigations, and analysis to effect change and innovation in industrializing the construction process from product development through manufacture and transportation to assembly. Prereq.: graduate standing or instructor consent.

CVEN 5286-3. Construction Engineering I. Introduces the economics, utilization and limitations of large-scale horizontal construction methods. Advanced study of planning, analysis, and methods improvement techniques as applied to public works and energy facilities construction. Emphasizes computer simulation of construction operations and time lapse analysis. Prereq.: graduate standing with CVEN 4147, CVEN 5708, or instructor consent.

CVEN 5296-3. Construction Engineering II. Continuation of CVEN 5286. Advanced study
of the application and analysis of construction equipment and methods. Topics include drilling, blasting, tunneling, dewatering foundations, formwork design, and construction aspects of Portland cement concrete. Course is applicable to both building and public works construction. Prereqs., graduate standing, AREN 4416, or equivalent.

Miscellaneous

CVEN 3171-1. Introduction to Civil and Environmental Engineering. Surveys the broad subject of civil and environmental engineering and professional practice. Introduces construction, environmental, geotechnical, structural, and transportation engineering specialty areas.

CVEN 3207-2. City Planning. Essential principles of city planning, with particular emphasis on the contribution that can be made by civil engineers. Includes detailed discussion of land use, land use boundaries, transportation, street systems, public buildings, parks and recreation, utility design, and zoning. Two or more problems in individual design included. Prereq., senior standing.

CVEN 3217-3. Civil Engineering Systems. Introduces systems analysis concepts and applications in civil engineering emphasizing quantitative optimization technique. Specific topics include probability theory, decision analysis, network models, linear and dynamic programming, differential optimization, gradient search, deterministic and stochastic simulation. Prereqs., APPM 2360 and junior standing.

CVEN 4087-3. Engineering Contracts. Application of law in engineering practice: contracts, construction contract documents, construction specification writing, agency, partnership, and property; types of construction contract; legal responsibilities and ethical requirements of the professional engineer. Prereq., senior standing in civil or architectural engineering or instructor consent. Same as CVEN 5246.

CVEN 4147-3. Engineering Economy. Includes application of economic and financial principles to engineering alternatives; calculation of annual costs, present worth, and prospective rates of return on investment; depreciation and replacement studies; economic aspects of public works; and preparation of engineering reports on economy studies. Prereq., senior standing. Same as MGEN 4147.

Geotechnical

CVEN 3698-3. Engineering Geology. Role of geology in engineering minerals; rocks; superficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influence; geologic exploration of engineering sites; mapping of geology of underground excavations, slopes, reservoirs, and dam sites. Includes a field trip.

CVEN 3708-3. Geotechnical Engineering 1. Basic characteristics of geological materials; soil and rock classifications; physical, mechanical, and hydraulic properties; the effective stress principle; soil and rock improvement; seepage, consolidation; stress distribution; settlement analysis. Prereq., CVEN 3161.

CVEN 4728-3. Foundation Engineering. Geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles, and drilled piers. Coverage includes bearing capacity, settlement, group effects, and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations, and analysis of pile behavior using wave equation and dynamic monitoring methods. Prereq., CVEN 3708 and 3718, or instructor consent. Same as CVEN 5728.

CVEN 5708-3. Soil Mechanics. Advanced course in principles of soil mechanics. Coverage includes topics in continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; the effective stress principle; consolidation; shear strength; critical state concepts; and constructive, numerical, and centrifuge modeling. Prereqs., CVEN 3708 and 3718.

CVEN 5728-3. Foundation Engineering. Prereq., CVEN 3708 and 3718, and graduate standing. Same as CVEN 4728.

CVEN 5738-3. Applied Geotechnical Analysis. Applications of limiting equilibrium and limit plasticity analysis methods to stability problems in geotechnical engineering, such as slopes, lateral earth pressures on retaining structures, and bearing capacities of foundations. Elastic and consolidation analyses of deformations in soil structures. Prereq., CVEN 5708 or instructor consent.

CVEN 5758-3. Seepage and Consolidation. Principles of steady and transient flow in geologic materials; problems of unconfined flow; analytical and numerical analysis of continued and unconfined flow; one-dimensional nonlinear finite strain consolidation theory; the consolidation of loaded clay layers; the use of consolidation theory to analyze and interpret laboratory and field tests; the coupled theory of consolidation; the consolidation of partly saturated soils; thaw consolidation; application of principles to the analysis and design of conventional facilities and natural phenomena. Prereqs., CVEN 3708 and 3718, or instructor consent.

CVEN 5768-3. Introduction to Rock Mechanics. Nature of rocks and rock masses; index properties, rock and rock mass classifications, deformability and strength, rock hydraulics, mechanical behavior of planes of weakness in rock, Laboratory and in situ testing. Prereqs., CVEN 3708 and 3718, or instructor consent.

CVEN 5808-3. Offshore Engineering. Analysis, design, and construction of offshore facilities: Types of offshore facilities; offshore environmental forces; marine geology; sedimentation; gravity structures; tension leg platforms; guyed towers; sea bottom completion structures; pipe lines, anchors; gravel islands; dynamics of offshore structures; stability of marine slopes. Prereqs., CVEN 3708 and 3718, or instructor consent.

CVEN 7718-3. Engineering Properties of Soils. Constitutive behavior of cohesive and cohesionless soils including stress-strain, strength, pore water pressure, and volume change behavior under drained and undrained loading conditions. Linear and nonlinear analysis techniques. Determination of constitutive properties in the laboratory. Prereqs., CVEN 5708 or instructor consent.

CVEN 7788-3. Soil Behavior. Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composition, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Applications to stabilization and improvement of soils, and disposal of waste materials. Prereqs., CVEN 3708 and 3718, or instructor consent.

CVEN 7798-3. Dynamics of Soils and Foundations. Behavior of soils and foundations subjected to self-excited vibrations and earthquake ground motions. Principles of wave propagation in geologic media; in situ and laboratory determination of engineering properties for dynamic analysis; applications of these principles and properties in design and analysis of foundations and earth structures subjected to dynamic loading. Prereqs., CVEN 3708 and 5718, or instructor consent.
Special Topics
CVEN 4839-1. Senior Seminar. A series of lectures by outstanding university faculty members in the humanities and eminent professional engineers in special fields of practice, particularly on subjects with new developments. The ETE examination is required for successful completion of this course. Prereq., senior standing.

CVEN 4839 (1-6). Special Topics for Seniors. Supervised study of special topics of interest to students, under instructor guidance. Prereq., instructor consent.

CVEN 4849 through 4879 (1-6). Independent Study.

CVEN 4889 through 4899-3. Senior Projects. Entire semester devoted to work on a project of the student's choice and the preparation of a report. Projects may include laboratory, analysis, or design efforts and may be done by individual students or by groups. The project idea can be generated by the student or suggested by a faculty member. A list of projects is available in the departmental office at registration. Students are not permitted to register for this course during their last semester in residence and must obtain registration approval for a particular project from the faculty director. Prereq., senior standing.

CSCI 5849 through 5909 (1-6). Independent Study. Available only through approval of graduate advisor. Subject arranged to fit needs of the student.

CSCI 6849 through 6909 (1-6). Independent Study. Available only through the approval of the graduate advisor. Subject arranged to fit needs of the student.

CSCI 8920 through 8929-3. Selected Topics. Credit and subject matter to be arranged. Prereq., instructor consent.

Computer Science

General Computer Science

CSCI 1200-3. Introduction to Programming 1. Presents good engineering practices for constructing, documenting, testing, and debugging computer programs. Provides an introduction to common algorithms and data structures and major characteristics of modern computers. Programming projects use Pascal. Prereq., three years of high school mathematics, including trigonometry, or concurrent enrollment in a calculus class, or instructor consent.

CSCI 1210-4. Introduction to Programming 2. Emphasizes problems encountered in building larger, more complex programs. Students gain experience in using existing software modules as building blocks for larger programs. Prereq., CSCI 1200.

CSCI 1300-4. Introduction to Computing for Managers. Intensive programming course. Students learn to analyze problems and synthesize programs for their solution, emphasizing good engineering practices for program construction, documentation, testing, and debugging. Programming projects use C. Open only to majors and others by instructor consent.

CSCI 1700-3. Introduction to Scientific Programming. Intended for students whose primary interest in computing is the solution of numerical problems in science and engineering. Provides skills in designing, writing, and debugging Fortran programs of moderate complexity. Introduces some common algorithms and data structures. Coreq., a calculus course or instructor consent.

CSCI 2270-3. Data Structures and Algorithms. Study of data abstractions (e.g., stacks, queues, lists, trees) and representation techniques (e.g., linking, arrays). Also includes the distinction between abstract concepts and implementation concerns, memory management, sorting and searching, analysis of algorithms, and algorithm design techniques (e.g., divide-and-conquer). Prereq., CSCI 1210 or 1300, and 2224, and APPM 1360 or MATH 2300.

CSCI 2900 (1-3). Independent Study. Selected topics at the elementary level for students with little or no previous computing experience.

CSCI 4900 (1-6). Independent Study. Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem or tutor lower-division computer science students. Prereq., CSCI 1200, 1300, or 1700.

CSCI 5900 (1-6). Independent Study. Provides opportunities for independent study at the master's level.

CSCI 6800-3. Master of Engineering Project. Students seeking the Master of Engineering degree must complete a creative investigation project, including a written report, supervised by a faculty member. Prereq., completion of 21 hours towards the M.E. degree.

CSCI 6940-3. Master's Degree Candidacy. For students who need to be registered for the purpose of taking the master's comprehensive exam and who are not otherwise registered. Credit does not count toward degree requirements. Graded on a pass/fail basis.

CSCI 6950 (4-6). Master's Thesis.

CSCI 7008-3. Current Topics in Computer Science. Covers research topics of current interest in computer science that do not fall into a standard sequence. Prereq., instructor consent.

CSCI 7900 (1-6). Independent Study. For doctoral students.

CSCI 8900 (1-10). Doctoral Dissertation. Investigation in some specialized field of computer science. Approved and supervised by faculty members.

Parallel Processing

CSCI 5551-3. Parallel Processing. Same as ECEN 5553.

CSCI 7111-3. Topics in Parallel Processing. Content varies, but subjects include parallel machine architecture, parallel algorithms, languages for parallel computation, and applications. Subject matter is taken from current research. Prereq., instructor consent.

Artificial Intelligence

CSCI 3202-3. Introduction to Artificial Intelligence. Surveys artificial intelligence techniques of knowledge representation, search, learning, and natural language processing. Introduces artificial intelligence programming in Lisp. Prereq., CSCI 3155 or instructor consent.

CSCI 3582-3. Artificial Intelligence. Overview of artificial intelligence methods, theories, and applications. Relationship between artificial intelligence and psychology, linguistics, and philosophy. Introduces artificial intelligence programming. Prereq., CSCI 3155 or equivalent. Same as ECEN 5583.

CSCI 5592-3. Advanced Artificial Intelligence Programming. Discusses role of programs in artificial intelligence and cognitive science as well as social implications. Further topics are theory and practice of languages (including Lisp, object-oriented extensions, production systems, high-level languages built on Lisp, logic programming, and Prolog) and algorithms (control strategies, graph search, theorem-proving, planning, rule-based systems). Prereq., CSCI 5582.

CSCI 5623-3. The Connectionist Approach to Artificial Intelligence. The connectionist (or "neural network") approach to artificial intelligence explores computation in massively interconnected networks of simple autonomous processing elements. Introduces the principles underlying the connectionist approach, as well as its limitations and weaknesses. Prereq., graduate standing or instructor consent.

CSCI 5762-3. Survey of Cognitive Science. Class led by a different faculty member of the Institute of Cognitive Science each week. Introduces graduate students to research in cognitive science currently underway within the institute. Prereq., graduate standing or instructor consent.

CSCI 5852-3. Natural Language Processing. The field of natural language processing is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs. Prereq., graduate standing or instructor consent.

CSCI 6632-3. Advanced Connectionist Modeling. Participants read and evaluate papers from the current research literature, experiment with simulations of connectionist networks, and
engage in semester-long research projects applying the connectionist approach to selected problems in machine learning, artificial intelligence, psychology, neurobiology, or linguistics. Prereq., CSCI 5622.

CSCI 7212-3. Topics in Symbolic Artificial Intelligence. Topics vary from year to year. Possible topics include search, knowledge representation and natural language understanding; deduction, planning, problem solving, and automated programming; instruction and cognitive models; vision and speech, learning, induction, and concept formation. Prereq., CSCI 5582 or instructor consent. Highly recommended prereq., CSCI 5592.

CSCI 7222-3. Topics in Non-symbolic Artificial Intelligence. Topics vary from year to year. Possible topics include human and machine vision, signal and speech processing, artificial life, mathematical foundations of connectionism, and computational learning theory. Prereq., CSCI 5622 or instructor consent.

CSCI 7782-3. Topics in Cognitive Science. Addresses different set of one to three topics each year. Foreach topic one or two faculty members of the Institute of Cognitive Science present background material and present current research. Prereq., graduate standing or instructor consent.

Operating Systems and Hardware
CSCI 3753-3. Systems. For computer science majors. Examines software comprising computing systems as it builds upon hardware to provide a programming environment. Structure and function of editors, compilers/assemblers, linked lists, etc. Basic operating systems concepts and systems programming in high-level languages. Prereq., CSCI 2270 and ECEC 2220.

CSCI 4753-3. Computer Performance Modeling. Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization, and analysis of data; design of experiment simulations, queuing theory and queuing network models. Prereq., CSCI 3753 or equivalent, and second-semester calculus. Recommended prereq., a course in statistics. Same as CSCI 5753 and ECEC 4753 and 5753.

CSCI 5513-3. Real-Time Hardware/Software System Design. Same as ECEC 5513.

CSCI 5573-3. Operating Systems. Study of supervisory programs within a computer system that interact most closely with hardware, and that allow efficient and shared access to the computer. Topics include processes (communication, synchronization), memory management (storage allocation, virtual memory), and processor management (multiprogramming, time-sharing, scheduling). Same as ECEC 5573.

CSCI 5673-3. Distributed Systems. Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics, and social issues. Recommended prereq., CSCI 5753 or a course in computer networks. Same as ECEC 5675.

CSCI 7123-3. Topics in Operating Systems. Topics selected by instructor. Possible topics are system design, measurement and evaluation, simulation, mathematical modeling, and parallelism. Prereq., CSCI 5573.

CSCI 7143-3. Topics in Computer Systems. Topics selected by instructor. Possible topics are on-line systems, multiprocessors, microprogramming, architecture, data communications, and computing networks.

Theory of Computation
CSCI 2224-3. Discrete Structures. Prepares students for a fundamental understanding of computing. Studies set theory, Boolean algebra, relations, functions, graph theory, and techniques for formal reasoning including propositional and predicate calculus, proof techniques, induction, and program logic. Prereq., college algebra or calculus, and CSCI 1210 or 1300.

CSCI 3434-3. Computer Science Theory. Introduces the foundations of formal language theory, computability, and complexity. The relationship between automata and various classes of languages is shown. Addresses the issue of which problems can be solved by computational means and studies the complexity of their solutions. Prereq., CSCI 2270 and 2300.

CSCI 5444-3. Introduction to Theory of Computation. Reviews regular expressions and finite automata. Studies Turing machines and equivalent models of computation, the Chomsky hierarchy, context-free grammars, push-down automata, and computability. Prereq., CSCI 2224 or 3434, or equivalent.

CSCI 5454-3. Design and Analysis of Algorithms. Techniques for algorithm design, analysis of correctness and efficiency, divide and conquer, dynamic programming, greedy method, balancing, amortization, and scaling. Advanced data structures, algorithms in graph theory, computational geometry, parity computation, VLSI, linear algebra, etc. Prereq., CSCI 2224 and 2270, or equivalent.

CSCI 5714-3. Formal Languages. Context-free languages: pumping lemma and variants, closure properties and decision properties. Parsing algorithms; general and special languages, e.g. LR. Additional topics chosen by instructor. Prereq., CSCI 5444 or instructor consent.

CSCI 6454-3. Advanced Algorithms. Topics include matching and network flows, matroids, computational geometry, parallel computation (PRAM, hypercube, mesh). Also includes VLSI, database theory, distributed computation, cryptography, robotics, scheduling, probabilistic algorithms, approximation algorithms, average case, and amortized analysis, time permitting. Prereq., CSCI 5454.

Programming Languages
CSCI 3153-3. Principles of Programming Languages. Studies the fundamental principles of programming language design and implementation. Examples drawn from common programming languages such as Fortran, Algo1, Pascal, C, Ada, Modula 2, Lisp, and Prolog. Provides practical experience with a small number of new languages. Prereq., CSCI 2270 and ECEC 2220.

CSCI 4553-3. Introduction to Compiler Construction. Same as ECEC 4553.

CSCI 5535-3. Fundamental Concepts of Programming Languages. Same as ECEC 5533.

CSCI 5565-3. Translation of Programming Languages. Same as ECEC 5563.

CSCI 7155-3. Topics in Programming Languages. Topics selected by instructor. Possible topics are syntax, semantics, metacomputers, compiler design, and translator writing systems. Prereq., instructor consent.

Numerical Computation
CSCI 3653-3. Numerical Computation. Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Topics include floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration. Prereq., two semesters of calculus, linear algebra, and one of the following: CSCI 1200, 1300, or 1700.

CSCI 4675-3. High Performance Scientific Computing 1. Introduces computing systems, software, and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. First course in a two-semester sequence. Prereq., CSCI 2270 and 3656, or equivalent.

CSCI 7176-3. Topics in Numerical Computation. Topics selected by instructor. Possible topics are numerical linear algebra, solution of differential equations, nonlinear algebra and optimization, data fitting, linear and nonlinear programming, and solution of large problems. Prereq., instructor consent.

Database Systems
CSCI 3287-3. Database and Information Systems. Survey course in data management, including file systems, database management systems design, physical data organizations, data models, query languages, concurrency, and database protection. Prereq., CSCI 2270.

CSCI 5817-3. Database Systems. Advanced treatment of basic database concepts. Prereqs., CSCI 2250 or 2270, and admission as a graduate student in computer science or electrical engineering. Recommended prereqs., CSCI 3287 and 3753.

CSCI 5917-3. Database Practicum. Addresses practical issues in implementation, modeling, and measurement of database systems. Centers around significant software project. Prereqs., CSCI 5817 and significant software experience, or instructor consent.

CSCI 6817-3. Readings in Database Systems. Complements CSCI 5817; introduces graduate students to classic research results and current trends in the database systems area. Prereq., CSCI 5817.

CSCI 7717-3. Topics in Database Systems. Topics such as distributed databases, database interfaces, data models, database theory, and performance measurement are studied in depth. Prereq., CSCI 5817 or instructor consent.

Software Engineering
CSCI 4308-4, 4318-4. Software Engineering Project 1 and 2. Advanced practicum in computer science for computer science majors. Students design, implement, document, and test software systems for use in local industry, university departments, or government laboratories. They gain practical experience by working closely with project sponsors from these organizations and review ongoing projects. Students also gain extensive experience in oral and written communication through presentations throughout the software life cycle. Students must take CSCI 4308-4318 continuously as the project spans entire academic year. Prereqs., CSCI 3155 and 3753, and UWRF 3030. Open only to seniors.

CSCI 5828-3. Software Engineering. Firsthand study of some of the problems connected with the development of large programs. Students, either individually or in small groups, are involved in actual design and development of modules for a large software system.

CSCI 5918-3. Software Development Workshop. In this software engineering practicum, student development teams perform specification, design, implementation and/or maintenance activities for a relatively complex software system.

CSCI 6838-3. User Interface Design. Covers techniques for creating and evaluating effective user interfaces for computing systems. Introduces relevant findings and theory from psychology and human factors, as well as implementation methods. Prereq., graduate status or instructor consent.

Graphics

Electrical and Computer Engineering
General
ECEN 1400-3. Methods and Problems in ECE. Introduces students to the types of problems that electrical and computer engineers are expected to solve; develops the theory of complex numbers, phasors, and linear algebra; introduces advanced topics such as vector graphics and computer arithmetic; develops facility with computing tools such as MATLAB and Mathematica. Prereqs., APJM 1350, and CSCI 1200 or 1700.

ECEN 1840 through 1849 (1-3). Independent Study. Opportunity for freshmen to do independent, creative work. Prereq., instructor consent.

ECEN 2100-3. Logic Circuits. Studies Boolean algebra and its application to the synthesis of digital logic circuits from logic elements such as AND, OR, NAND, and NOR gates. Such circuits are found not only in electronic engineering but also in many related fields. Also covers the design of memory elements, synchronous, and asynchronous sequential machines. Coreq., ECEN 2110.

ECEN 2110-1. Logic Circuits Laboratory. Provides laboratory experience in the design and construction of digital logic circuits. Experiments are performed in combinational circuits and sequential machines. Instrumentation introduced in the laboratory includes a Logic Source and Display station and breadboarding system. Coreq., ECEN 2110.

ECEN 2160-4. Circuits/Electronics 2. This course continues the basic circuit analysis of ECEN 2150 by introducing nonlinear circuit elements: diode, BJT, JFET, MOSFET. Emphasizes biasing, large and small signal (low frequency) operation and basic application such as amplification and switching. Develops concepts as they apply to the ideal transformer and to self-inductance. Three-phase circuits and Fourier series expansions are introduced. Prereqs., ECEN 2150 and 2550; coreq., ECEN 2560.

ECEN 2220-3. Microcomputer Architecture and Programming. Covers machine structure and assembly language programming of small computers; basic concepts of hardware and software engineering; processor architecture; interrupt handling; modular decomposition; and concurrency. Prereqs., ECEN 2100 and CSCI 1200. Coreq., ECEN 2230.

ECEN 2230-1. Microprocessor Laboratory. Provides experience in programming, interfacing, and using microprocessor systems in electrical engineering applications. Students use microprocessor development station to program and debug the systems they design. Programming is performed in Pascal, C, and assembly language. Prereqs., ECEN 2100 and 2110; coreq., ECEN 2220.

ECEN 2840 through 2849 (1-6). Independent Study. Opportunity for sophomores to do independent, creative work. Prereq., instructor consent.

ECEN 3020-3. Statistical Thermodynamics. Covers a statistical approach to the understanding of thermodynamics; thermal and diffusive equilibrium; interactions of systems with external fields; thermal radiation; thermal vibrations; noise; electrons in metals; semiconductor statistics; heat engines and heat pumps; chemical reac-
tions; and kinetic theory. Prereq., APPM 2360.
Prereq. or coreq., PHYS 2130.

ECEN 3030-3. Electronics and Electric Circuits. For students not majoring in electrical engineering. Covers analysis of electric circuits by use of Ohm's law; network reduction; superposition; node and loop analysis; Thevenin's and Norton's theorems; sinusoidal signals; phasors; power in AC circuits; transient response of simple circuits; operational amplifiers; logic circuits; and flip-flops. Prereq., APPM 2350.

ECEN 3130-3. Electromagnetic Fields and Waves. Maxwell's equations postulated for free space and applied to material regions; boundary conditions as developed. Vector algebra and calculus in three common coordinate systems are developed as needed. Uniform plane waves in free space and lossy regions exemplify dynamic field problems. Static and quasi-static electric and magnetic fields and energy are considered in detail, emphasizing the field aspects of capacitance, inductance, and resistance. Prereq., ECEN 2150 and APPM 2350.

ECEN 3170-3. Energy Conversion I. Use of magnetic fields as the transfer medium for electrical energy in transformers and for conversion of electrical energy to mechanical torque in rotating machines. Applies basic magnetism theory to inductors, transformers, relays, stepper motors, AC and DC motors and generators. Prereq., ECEN 2160 and ECEN 3130.

ECEN 3430-1. Electronics/Circuits Laboratory for Nonmajors. Intended for students not majoring in electrical engineering. Covers basic electrical instruments including oscilloscopes, electrical circuits, power measurements, transformers, and integrated circuit operational amplifiers. Coreq., ECEN 3030.

ECEN 3530-1. Circuits/Electronics Laboratory. Extends student experience in the operating characteristics of components and integrated circuits, including the silicon controlled rectifier, the solar cell, and photodiodes. Differential and high frequency amplifiers and a TTL integrated circuit are studied. This course is coupled closely with the parallel theory course. Prereq., ECEN 2560; coreq., ECEN 3230.

ECEN 3810-3. Introduction to Probability Theory. Covers the fundamentals of probability theory and random variables. Provides a foundation for study of communication theory, control theory and reliability theory. Prereq., APPM 2350 and 2360, or equivalent.

ECEN 3840 through 3849 (1-6). Independent Study. Opportunity for juniors to do independent, creative work. Prereq., instructor consent.

ECEN 4001 through 4009 (0-3). Selected Topics. Credit and subject matter to be arranged. Prereq. vary.

ECEN 4200-1. Effective Presentation. Prepares students to make polished and professional oral and written presentations. Stresses effective use of visual aids. Student presentations are critiqued by the class and videotaped.

ECEN 4400-3. Reliability and Quality Control. Concerned with evaluation of the quality and reliability of electronic components and systems and with design procedures for enhancing those characteristics. Statistical sampling and analysis procedures for quality control in production studied in detail. Prereq., ECEN 3810 or MATH 4510.

ECEN 4410-2. Careers in Electrical and Computer Engineering. Prepares students for the workplace. Includes how to perform key EE/EC industrial assignments; engineering management tools and techniques; the job search (routed to EE/EC graduates); and lectures by industry practicing engineers.

ECEN 4840 through 4849 (1-6). Independent Study. Opportunity for seniors to do independent, creative work. Prereq., instructor consent.

ECEN 5000 through 5839 (0-3). Selected Topics. Intermediate graduate-level courses of variable titles and variable credit, usually offered once by guest lecturers. See current departmental notices for details.

ECEN 5840 through 5849 (1-6). Independent Study. Opportunity for students to do independent, creative work at the master's level. Prereq., advisor consent.

ECEN 5940 through 6949-3. Master's Degree Candidate.

ECEN 6950-variable credit. Master's Thesis.

ECEN 6800 (0-8). Master of Engineering Report.

ECEN 7000 through 7839 (0-3). Selected Topics. Graduate courses of variable title and variable credit, usually offered on a one-time basis by guest lecturers. See current departmental notices for details.

ECEN 7840 through 7849 (1-6). Independent Study. Opportunity for students to do independent, creative work at the doctoral level. Prereq., advisor consent.

ECEN 8990 (0-10). Doctoral Thesis.

Bioengineering

ECEN 4811-3. Neural Signals. Analyzes information processing in the brain and peripheral nervous system in terms of fundamental signaling processes that occur at the neuronal level. Explores biophysical bases for these processes, including neural impulse generation, synaptic communication, and sensory reception in terms of molecular and membrane mechanisms. Approaches abstraction of biological neurons into computational neural elements, mainly from the viewpoint of neural networks and other forms of synthetic intelligence. Prereq., ECEN 2160 or 3030, or instructor consent. Same as ECEN 5811, ASEN 4216, and ASEN 5216.

ECEN 4821-3. Neural Systems. Extension of cellular neuroelectric concepts into the arena of integrative neurophysiology and neuroanatomy. Topics include synaptic modulation of neuronal firing patterns, interactions in dendritic trees, computer simulation of interactive neural nets, the command neuron concept, sensory information processing, and the generation of simple behaviors directly correlated with neural network organization. Prereq., ECEN 2160 or 3030, or instructor consent. Same as ECEN 5821, ASEN 4426, and ASEN 5426.

ECEN 4831-3. Brains, Minds, and Computers. Provides background for the design of artificially intelligent systems based upon our present knowledge of the human brain. Includes similarities and differences between the brain and computers, robots, and common computer models of "brain" and "mind." Emphasizes the neuron as an information processor and organization of natural as well as synthetic neural networks. Prereq., ECEN 2160 or 3030, or instructor consent. Same as ECEN 5831, ASEN 4436, and ASEN 5436.

ECEN 5811-3. Neural Signals. Same as ECEN 4811.

Communications

ECEN 4242-3. Communication Theory. Modern digital and analog communication systems; Fourier analysis of signals and systems; signal transmission; amplitude modulation; angle modulation; digital communication; and behavior of communication systems in the presence of noise, including both analog and digital systems. Prereq., ECEN 3310 and ECEN 3810 or MATH 4510.

ECEN 4632-3. Introduction to Digital Filtering. Covers both the analysis and design of FIR and IIR digital filters. Discusses implementations in both software and hardware. Emphasizes use of the FFT as an analysis tool. Examples in speech processing, noise canceling, and communications. Prereq., ECEN 3230 and 3810.

ECEN 4652-2. Communication Laboratory. Laboratory experiments demonstrating material taught in ECEN 4242. Use is made of spectrum
analysis to study baseband signals and signal processors. Topics include noise, AM, FM, PM, sampling, quantizing/encoding, TDM, FDM, equalizers, and a complete communication system. Prereq. or coreq., ECEN 4242.

ECEN 5621-2. Noise and Random Processes. Review of probability theory, convergence and probability bounds; multivariable normal theory; sequences of random variables and stochastic processes; Bernoulli and Poisson processes; wide-sense stationary processes; correlation functions; and power spectra. Linear systems with random inputs and Gaussian-Markov processes; first- and second-order properties of ARMA processes; Markov chains. Prereq., ECEN 3310, 3810, or MATH 4510.

ECEN 5622-2. Information Theory and Coding. Information and entropy. Markov chains, combined systems, continuous systems, coding theory; channel capacity, modulation, applications to communications engineering. Prereq., ECEN 3810 or MATH 4510, or consent.

ECEN 5623-2. Theory and Application of Digital Filtering. Digital signal processing and its applications are of interest to a wide variety of scientists and engineers. Covers such topics as the characterization of linear discrete-time circuits by unit-pulse response, transfer functions, and difference equations, use of z-transforms and Fourier analysis, discrete Fourier transform and fast algorithms (FFT), design of finite and infinite impulse response filters, frequency transformation, study of least squares filters for deterministic and stochastic inputs. Prereq., ECEN 3310, 3810, or MATH 4510.

ECEN 5642-2. Modern Methods of Spectral Estimation. Reviews Fourier analysis for continuous, discrete, sampled data, PAM, and subband signals; quadratic estimators of the power spectrum; autoregressive and autoregressive moving average models; modal analysis; nonstationary spectrum analysis; and least square theory of linear prediction. Covers applications to speech processing, seismic data, and radar and sonar processing. Prereq., ECEN 5612 and 5632.

ECEN 5652-3. Detection and Extraction of Signals from Noise. Introduces detection, estimation and time series analysis. Topics include hypothesis testing, detection of known form and random signals, least squares parameter estimation, maximum likelihood theory, minimum mean-squared error estimation, Kalman-Wiener filtering, prediction in stationary time series, and modal analysis. Applications include studies in communications, control, and experimental modeling. Prereq., ECEN 5612.

ECEN 5672-3. Digital Image Processing. Covers the following topics: image formation and visual perception; digitization of images; transform coding, modeling, and image compression; image enhancement; filtering and image restoration; reconstruction and tomographic imaging. Prereq., ECEN 5612 or equivalent.

ECEN 5682-3. Theory and Practice of Error Control Codes. Block codes and convolutional codes for reliable transmission of digital data over unreliable noisy channels. Characterization of cyclic codes, linear block RS codes, and trellis codes. Rate-3 codes from an algebraic as well as a digital signal processing point of view. Decoding algorithms for block codes and convolutional codes. Prereq., ECEN 3310.

Computer Systems and Digital

ECEN 4553-3. Introduction to Compiler Construction. Introduces the basic techniques used in translating programming languages: scanning, parsing, definition, translation management, operator identification and coercion, code selection and register allocation, error recovery. Students build a complete compiler, by hand, for a simple language. Prereq., ECEN 2220; enrollment restricted to students majoring in computer science, computer science and business, or electrical and computer engineering. Same as CSCE 4555.

ECEN 4572-3. Microprocessor Systems Laboratory. Design and construction of microprocessor systems in measurement and control applications. Development of medium-sized systems based upon microprocessors. Students work in teams to develop hardware and software. Design reviews and extensive documentation are required. Prereq., ECEN 2220.

ECEN 4583-3. Software Systems Development. Techniques for product requirements definition, project planning, coding, verification, validation, performance evaluation, and maintenance of medium-scale software systems. Primary emphasis is on practical application of these techniques to a specified software project. Students work in teams to produce appropriate documents for each phase and are responsible for project completion according to the specification and schedule. Course project is written in C or Unix-like systems, prior knowledge of C, Unix, and CSCE 2270 recommended but not required. Prereq., ECEN 2220 and CSCE 1200.

ECEN 4593-3. Computer Organization. Computer design at the gate level. Discusses micro-programmed and hardwired control units, memory design, arithmetic and logic units, I/O, and peripheral devices. Also briefly covers aspects of modern computer architecture such as parallel processing and reduced instruction set computers. Prereq., ECEN 2100 and 2220. Same as CSCE 4593.

ECEN 4603-2. Computer Laboratory. Students design, build, and document a digital computer based upon small- and medium-scale integrated circuits, programmable logic arrays, and gate arrays. Design includes the architecture and instruction set at the computer, as well as software. Design reviews and documentation are required. Prereq., ECEN 2100 and 4593.

ECEN 4753-3. Computer Performance Modeling. Presents a broad range of system modeling techniques with emphasis on applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets, and simulation (including parallel processing techniques). Prereq., CSCE 3752 or equivalent and second-semester calculus. Recommended: a course in statistics. Same as CSCE 4753 and 5753, and ECEN 5753.

ECEN 5513-3. Real-Time Hardware-Software System Design. Designs on the design and use of real-time computer systems. Gives special attention to the design, implementation, and testing of concurrent high-level language software in real-time applications. The design of computer/processor interfacing systems is treated in the context of representative real-time applications. Concepts developed during the junior portion of the class are reinforced with practical experience in the real-time computing laboratory. Prereq., ECEN 4593 and experience in programming sequential C or Pascal. Same as CSCE 5513.

ECEN 5523-3. Compiler Construction Tools. Practical experience using state-of-the-art CAD tools on high-performance workstations. Intended to provide skills needed to rapidly create "little languages" for specific problem domains, and familiarize students with automated software development. Prereq., ECEN 4553 or 5563, or instructor consent. Same as CSCE 5523.

ECEN 5533-3. Fundamental Concepts of Programming Languages. Considers concepts common to a variety of programming languages: how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines. Prereq., ECEN 2220, CSCE 3153, or instructor consent. Same as CSCE 5533.

ECEN 5543-3. Software System Engineering. Application of engineering principles to phases
of software product development, project planning, requirements definition, design, implementation, validation, maintenance. Emphasizes practical methods for communicating and verifying definitions and designs; pretesting, inspecting, and modeling. Includes relationship to RTS and object-oriented programming. Prereq., ECE 4583 and CSCI 4318, or equivalent industrial experience.

ECE 5553-3. Parallel Processing. Examines a range of topics involved in using parallel operation to improve computational performance. Parallel architectures, parallel algorithms and parallel programming languages are discussed. Architectures covered include vector computers, multiprocessors, network computers, and dataflow machines. Prereq., background in computer organization, introduction to programming languages, elementary numerical analysis, ECE 4135 and CSCI 3665, or instructor consent. Same as CSCI 5551.

ECE 5563-3. Translation of Programming Languages. Study of practical techniques for transferring algorithms understood by humans into programs understandable by machines. Concentrates on semantic analysis, code generation, and optimization methods supported by tools. Prereq., ECE 4553 or 5553, or instructor consent. Same as CSCI 5565.

ECE 5573-3. Operating Systems. Same as CSCI 5573.

ECE 5583-3. Artificial Intelligence. Same as CSCI 5582. Prereq., CSCI 3155 or equivalent.

ECE 5593-3. Advanced Computer Architecture. Broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a machine and the design of cache memory systems. Also studies current and historically important computer architectures. Prereq., ECE 4593 or instructor consent. Same as CSCI 5593.

ECE 5603-3. Software Project Management. Presents topics and techniques critical to the management of software product development, including planning, scheduling, quality control, reporting, team organization, people management, and legal issues. Special attention given to problems unique to software projects. Prereq., ECE 4583, 5543, and CSCI 4318, or equivalent industrial experience.

ECE 5673-3. Distributed Systems. Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics, and social issues. Recommended prereq., CSCI 5573 or a course in computer networks. Same as CSCI 5673.

ECE 5753-3. Computer Performance Modeling. Same as ECE 4755, and CSCI 4753 and 5755.

Electromagnetics

ECE 4614-3. Microwaves and Millimeter Waves. Aimed at providing senior students with an overview of devices, circuits, and systems operating in microwave and millimeter wave frequency ranges. Discusses semiconductor devices and vacuum tube sources available at these frequencies, transmission structures and circuit concepts, and system applications. Prereq., ECE 3140.

ECEC 4634-2. Transmission Laboratory. Includes experiments verifying and extending concepts learned in ECE 3140, study of UHF and SHF sources and power measurement; coaxial and waveguide slotted-line impedance measurements and matching transmission line modeling using the artificial line; time-domain reflectometry applications; s-parameter measurements using a network analyzer; microwave superheterodyne receiver characteristics; and antenna pattern measurements. Prereq., ECE 5140 or equivalent.

ECE 5104-3. Computer-Aided Microwave Circuit Design. Emphasizes the design of amplifier and mixer circuits using a CAD package. Discusses designs of impedance transformers, amplifiers, mixers, etc., and the analysis of large signal amplifier circuits and their design. Laboratory includes measurements using a network analyzer to test a typical circuit designed and fabricated by students. Prereq., ECE 5140.

ECE 5114-3. Waveguides and Transmission Lines. Intermediate-level fields course dealing with guided-wave systems at HF, microwave, and optical frequencies. Modern waveguiding structures, including circular metallic waveguides, microwave striplines, and optical waveguides are treated. Additional material may include waveguide losses, excitation of waveguides, microwave network theory, coupled-mode theory, resonators, and pulse propagation in waveguides. Prereq., ECE 5140.

ECE 5124-3. Computer-Aided Microstrip Antenna Design. Modeling, analysis, and computer-aided design of microstrip patch antennas and arrays, including circular polarized and active antennas. Emphasizes use of design software to develop antennas. Prereq., ECE 5140 or equivalent.

ECE 5134-3. Electromagnetic Radiation and Antennas. The elementary antenna source, cylindrical wire antennas, loop antennas, radiation patterns, and the gain, aperture sources such as horns and dish, linear arrays, mutual effects, ray formulations, antennas noise and temperature, and transmission formulation. Prereq., ECE 5140.

ECE 5144-3. Electromagnetic Boundary Problems. Provides mathematical and physical fundamentals necessary for the systematic analysis of electromagnetic field problems. Requires some familiarity with electromagnetic fields. Prereq., ECE 5140 or 5154, or instructor consent.

Materials and Devices

ECE 4045-3. Introduction to Optical Electronics. Introduces lasers, Gaussian optics, modulators, nonlinear optics, optical detectors, and other related devices. Prereq., ECE 3140. Same as ECE 5045.

ECE 4345-3. Introduction to Solid State. Covers basic crystallography, lattice vibrations, free electron theory, energy band theory, semi-conducting, dielectric, optical and superconducting materials and devices, emphasizing properties relevant to solid state electronics and optoelectronics. Prereq., ECE 3020 and 3130. Same as ECE 5345.

ECE 4375-3. Integrated Circuit Technology. Lab. Offers experience in monolithic silicon integrated circuit fabrication techniques, including IC layout, pattern compiling and generation, mask making, oxidation, photolithography, doping, implantation, metallization, bonding, process analysis, testing. A design project is included. Prereq., ECE 3320.

ECE 5025-3. Optical Properties of Materials. Surveys optical properties of materials important in optoelectronic and optical devices. Covers the relationships between optical constants, optical properties of semiconductors, dielectrics, ferroelectrics, liquid crystals, and metals. Prereq., ECE 4345 or 5345, or PHYS 4430, or equivalent.

ECE 5045-3. Introduction to Optical Electronics. Same as ECE 4045.

ECE 5065-3. Semiconductor Materials and Devices. Includes an introduction to semic
independent quantum mechanics and perturba-
tion theory, tunneling, application to quantum-
well electronic and optical devices, electrons in a
crystalline solid, Bloch's theorem, energy bands
and energy gaps, the effective mass approxima-
tion, a survey of energy bands for real crystals: Si,
Ge, GaAs, InP, AlGaAs, etc., band structure
engineering, and the electrical and optical prop-
eties of compound semiconductors. Prereq.,
ECEN 3020, and ECEN 4345 or 5345.
ECEN 5075-3. Semiconductor Materials and
Devices 2. Includes principles of heterojunc-
tions and superlattices, lattice vibrations and phonons,
time-dependent quantum mechanics and perturba-
tion theory, the dynamics of electrons in a crys-
tal, the Boltzmann transport equation, current,
electron scattering with impurities and phonons,
mobility, low- and high-field effects, and applica-
tions to conventional and submicron devices.
Prereq., ECEN 5065 or instructor consent.
ECEN 5085-3. Advanced VLSI Processing and
Scaling. Processes and scaling theory for submi-
cron silicon integrated circuit technology are de-
veloped. Topics covered include lithography, plasma processes, ion implantation, and metali-
zation. Submicron scaling theory and two-
dimensional process modeling are employed in
design projects. Prereq., ECEN 3320 or instruc-
tor consent. Offered alternate semesters.
Same as ECEN 4345.

Opics
ECEN 4106-3. Applied Optics/Optical Instru-
mentation. Introduces applied optics and optical
instruments, emphasizing optical engineering.
Topics include ray optics, wave phenomena,
polarization, holography, electro- and magneto-
opics, and introduction to nonlinear optics. Pre-
reqs., ECEN 3140 and 3310.
Treats optics, optical systems, and electo-optical
devices with the goal of integrating optical and
electro-optical devices into optoelectronic sys-
tems. Covers system design and emphasizes reso-
lation, field of view, signal-to-noise ratio, speed
of operation, and other system constraints. Pre-
reqs., ECEN 3140 and 4242. Same as ECEN
5616.
ECEN 5156-3. Physical Optics. Core course for the
optics program. Covers the application of
Maxwell's equations to optical waves and media.
Topics include polarization, dispersion, geomet-
rical optics, interference, partial coherence, and
diffraction. Prereq., ECEN 3140.
ECEN 5166-3. Guided Wave Optics. Builds up the
concepts necessary to understand guided
wave optical systems. Topics include slab wave-
guides, semiconductor lasers, fiber optics, and
integrated optics. Prereqs., ECEN 4045 or 5045,
and ECEN 5156.
ECEN 5060-3. Optics Laboratory. Consists of
13 optics experiments that introduce the tech-
niques and devices essential to modern optics,
including characterization of sources, photodetec-
tors, modulators, use of interferometers, spec-
trometers, and holograms, and experimentation of
fiber optics and Fourier optics. Prereq., under-
graduate optics course such as PHYS 4510.

Same as ECEN 4616.
ECEN 5686-3. Optical Communication Sys-
tems. Analysis and design of optical communi-
cation systems. Free-space, fiber-optic, and tur-
bulent atmospheric channels; modal representa-
tion of random fields. Coherent and incoherent
sources; modulation methods. Modeling and
statistical analysis of photodetectors; poisson
and related processes; thermal and shot noise.
Direct and heterodyne detection; analog and
digital transmission; signal-to-noise ratios; error
probabilities. System optimization. Prereqs.,
ECEN 3140 and 4242, or instructor consent.
ECEN 5696-3. Fourier Optics and Optical
Computing. Topics include holography, Fourier
transform properties of lenses, two-dimensional
convolution and correlation functions, spatial fil-
tering, and optical computing techniques. Also
covers coherent and incoherent imaging tech-
niques, tomography and synthetic aperture radar.
Prereqs., ECEN 3140, 3310, and 4106, or
instructor consent.

Power
ECEN 4167-3. Energy Conversion 2. Deriva-
tion of the dynamic equations of motion of elec-
 tromechanical systems; e.g., relays, transducers,
loaders and microphones, linear and rotary
motion machines based on variational principles
and basic force laws (e.g., Newton's law, Kir-
choff's laws, etc.). Equivalent circuits in abc and
dpq coordinates for AC and DC machines. Dis-
cusses conditions under which an electromag-
etic torque can be produced. Applies theory to
the most important modes of steady-state and
transient operation of electrical energy convert-
ers. Prereq., ECEN 3170.
ECEN 4517-2. Power Laboratory 1. Basic con-
cepts concerning electromagnetic energy conver-
sion principles as related to practical devices.
Overview of magnetics, transformers, and rotat-
ing machinery. Measurement techniques in
power circuits are emphasized. Prereq., ECEN
3170.
ECEN 4527-2. Power Laboratory 2. Experimen-
tal investigations of design and operating charac-
teristics of synchronous machines, induc-
tion machines, transformers, power rectifiers,
single-phase machines, and three-phase systems
and measurements. Prereqs., ECEN 3170 and
4517.
ECEN 4537-2. Power Systems Laboratory.
Emphasizes analysis and operation of power sys-
tems and interactions of power equipment under
dynamic conditions. Transient phenomena of
rotating machines. Prereqs., ECEN 3170 and
4517.
Transmission line constants, including details of
GMD methods, skin effect. Analysis of balanced
and unbalanced line using distributed parame-
ters, energy flow, traveling-wave phenomena,
and stability. Prereqs., ECEN 3130 and 3170,
or equivalent.
Topics include application of symmetrical com-
ponents to faults on transmission systems, deter-
mination of system constants, introduction to
modern methods of network analysis, measure-
ment of sequence quantities, delaying philoso-
phies, and power-flow studies. Prereq., ECEN
3170 or equivalent.
ECEN 5737-3. Adjustable-Speed AC Drives.
Presents unified treatment of complete electrical
drive systems: mechanical load, electrical
machine, power converter, and control equip-
ment. Emphasizes induction, synchronous,
and permanent-magnet drives. Simulation programs
(e.g., SPICE, Finite Element/Difference Pro-
gram) available on VAX computers are exten-
sively used to simulate drive system components
(e.g., gating, inverter, electric machine). Prereq.,
ECEN 3170.
ECEN 5747-3. Synchronous Machines. Review
of equivalent circuit of synchronous machines in
abc and dpq coordinates; phasor diagram;
steady-state, transient and subtransient operating
conditions; calculation and physical interpreta-
tion of reactances; application of theory to vari-
ous short circuits; synchronizing out-of-phase
damping torques, hunting, governor action,
starting, etc.; discussion of standard test proce-
dures. Prereq., ECEN 3170.
Topics include transient, dynamic, and steady-
state stability limits of energy transmission sys-
tems; dynamic models of synchronous machines;
citation systems; and motor loads. Prereqs.,
ECEN 4167 and 5717.
Concepts of power system operation and the use of
R-X diagrams in selection of protection needs.
Comparison of electromechanical and static pro-
tection systems. Review of problem areas such as
system stability, loss-of-excitation, and EHV line
protection. Prereqs., ECEN 2160 and 3170, or
instructor consent.
ECEN 5787-3. Power Quality Phenomena in
Power Systems. Covers single-time and periodic
disturbances of power systems and their causes
and effects on sensitive (electronic) end-use
devices. Studies and models for power system
components. Addresses measurement techniques
of the impact of such disturbances (power quality
phenomena) on devices, as well as prevention
and mitigating techniques. Prereq., ECEN
3170.
ECEN 5797-3. Power Electronics 1. Introduces
use of repetitively-switched electronic circuits for
conversion and regulation of electrical power.
Basic converters and steady-state analysis.
Dynamic modeling and analysis using state-space
averaging method. Fundamentals of inductor,
transformer, and semiconductor switch design.
Prereqs., ECEN 3170 and 3230, or instructor
consent.
topics of current interest in the power electronics
field: control of power converters, current-pro-
grammed mode, series and parallel resonant con-
vectors, and resonant switch converters. Prereq.,
ECEN 5797.

Systems and Electronics
Modeling of dynamic systems for electrical,
chemical, hydraulic, and mechanical systems
using block diagrams and signal flow graphs.
Comparison of open and closed-loop configura-
tions. Stability studies using Nyquist, Bode, and

ECEN 4618-2. Advanced Electronics Laboratory. Includes experimental work with logic gates, oscillators, operational amplifiers, phase-locked loops, A/D and D/A converters, and radio-frequency circuits. Includes several design projects. Prereqs., ECEN 3230 and 3520.

ECEN 5438-3. Robot Control. Provides a comprehensive treatment of the mathematical modeling of robot mechanisms and the analysis methods used to design control laws for these mechanisms. Prereqs., ECEN 4138 and PHYS 1110.

ECEN 5448-3. Advanced Linear Systems. State space approach to analysis and synthesis of linear systems, state transition matrix, controllability and observability, system transformation, minimal realization, state feedback and pole assignment, design of state observer, and analysis and synthesis of multi-input, multi-output systems. Prereqs., ECEN 3310 and 4138.

VLSI CAD Methods

ECEN 4019-3. Physical Design Automation for VLSI. Discusses VLSI chip design methodologies (custom, gate arrays, standard cells, PLA's) and theory, use, and limitations of design automation tools for synthesis, placement, and routing. Prereq., instructor consent.

ECEN 4029-3. Modeling and Simulation of VLSI Systems. Topics include basic theory and use of simulation tools at circuit, switch, timing (relaxation based), logic and functional levels. Presents the basic ideas behind test generation (including the D algorithm), and fault simulation (including concurrent fault simulation). Prereq., instructor consent.

ECEN 5019-3. VLSI Theory and Parallel Computation. Topics include theory of VLSI computation, including VLSI models, synthesis layout techniques and fundamental tradeoffs and layout techniques; parallel computation on fixed connection VLSI networks such as arrays, trees, hypercubes, etc.; and related topics, such as design automation, design for testability, and three-dimensional models. Prereqs., CSCE 2270 or instructor consent. Offered every few years.

Engineering Management

EMEN 5010-3. Introduction to Engineering Management. The first course in the engineering management degree program. Provides a base for assisting engineers in becoming more effective managers. Topics include the company as a business; management as a profession; Deming's philosophy; strategic planning and marketing; research, development, and design; production life cycle; manufacturing as a strategic tool; organization and personnel management; and leadership functions of the engineering manager.

EMEN 5020-3. Financial Accounting and Finance for Engineers. Familiarizes the engineer with basic financial statements used in business. Investment analysis, modeling of the enterprise, and financial structures are discussed, as are the effects of taxation and inflation.

EMEN 5030-3. Project Management Systems. Presents the basic tools required to manage a wide variety of programs—product development, software development, process development, and government projects. Systems engineering and computer decision aids are included. Students apply tools to a representative project. Topics include project planning, scheduling and control techniques, work structures, CPM/PERT, resource allocation, cost control, and earned value systems.

EMEN 5040-3. Strategy, Productivity, and Quality. The fourth required EMEN course. Provides students with the background to understand the need for and application of the new concepts and techniques required in competitive, efficient manufacturing today. Topics include the development of manufacturing as a strategic resource (technology, vertical integration, German and Japanese approaches); manufacturing control (cost systems, product cost analysis); material requirements planning; just-in-time (JIT) systems; quality theory and implementation; process variability; statistical quality control; information systems; and human and organizational aspects.

EMEN 5050-3. Leadership and Management. The fifth core EMEN course. Specialized designed to give working engineers background in leadership and management theory and enables them to develop their practical skills in leading and managing. Topics include managerial styles, organizational factors, ethics, management of change, and conflict resolution.

EMEN 6800-3. Master of Engineering Project. Students seeking the M.E. degree must complete an individual capstone project including a written creative investigation that may be related to the student's professional work. A member of the graduate faculty supervises the student.

Engineering Physics

See physics in the College of Arts and Sciences for a listing of courses.

General Engineering

GEEN 1017-2. Engineering Drawing. Beginning engineering drawing emphasizes the use of instruments, orthographic projection, pictorial drawing, sections, dimensioning, and working drawings.

GEEN 1100-3. History of Technology. Places engineering and technology in a cultural, social, and historical context. Examines the development of technology as a key to the history of civilization in a comparative, transcultural perspective. Technical innovation is made intelligible in terms of intellectual traditions, as a response to economic and political demands, and as a determinant of social change.

GEEN 1300-3. Introduction to Engineering Computing. Introduces the use of computers in engineering problem solving, processing of data, and presentation of information. Emphasizes use of personal computers. Students use BASIC, FORTRAN, and packaged software such as word processors, spreadsheets, and networking to host computers.

GEEN 1510-2. Self Management and Leadership Principles I. Develops group cohesiveness, mutual support, multicultural awareness, and leadership skills. Topics include self esteem, motivation, time management and study skills, personal assertiveness, and career awareness. Open only to new freshmen. Controlled enrollment through the MEP office.

GEEN 1520-2. Self Management and Leadership Principles II. Continuation of GEEN 1510. Prereqs., GEEN 1510 and approval of the MEP office.

GEEN 2850 (1-3). Independent Study.

GEEN 3100-3. Humanities for Engineers I. The first course in the four-semester sequence of the Herbst Humanities Program for engi-
Mechanical Engineering

Math

MCEN 1020-3. Analytical and Computational Tools. Introduces vector analysis and personal computers as engineering workstations. Students become familiar with operating systems, programming languages, word processing, and spreadsheets in order to solve engineering problems and write reports.

MCEN 5020-3. Methods of Engineering Analysis. 1. Selected topics from linear algebra, ordinary differential equations, and Fourier series. Computer exercises are assigned. Content is correlated with analysis topics in other mechanical engineering graduate courses, and emphasizes applications. Prereq.: APPM 2560 or equivalent.

MCEN 5040-3. Methods of Engineering Analysis. 2. Selected topics from the theory of complex variables, integral transform methods, partial differential equations, and variational methods. Computer exercises are assigned. Content is correlated with analysis topics in other mechanical engineering graduate courses, and emphasizes applications. Prereq.: MCEN 5020 or equivalent.

Fluids

MCEN 3021-3. Fluid Mechanics. Fundamentals of fluid flow with applications to engineering problems: Fluid statics and kinematics; conservation equations for mass, momentum, and energy; Bernoulli and Euler equations; potential flow; laminar and turbulent viscous boundary layers; laminar and turbulent pipe flow; compressible fluid flow. Prereq.: APPM 2560 and MCEN 2022.

MCEN 5021-3. Introduction to Fluid Dynamics. Physical properties of gases and liquids, and kinematics of flow fields. Analysis of streamline, vorticity, compressible flow, heat-conducting Navier-Stokes fluids; capillary effects and surface-tension-driven flow. Viscosity and circulation; ideal fluid flow theory in two and three dimensions; Schwarzschild-Schiff transformations; free streamline theory; internal and free-surface waves. Coreq.: MCEN 5020 or equivalent.

MCEN 5041-3. Viscous Flow. Exact solution of Navier-Stokes equations and fundamentals of rotating fluids. Low Reynolds number flow; similarity solutions; viscous boundary layers; jet and wakes; unsteady viscous flow. Prereq.: MCEN 5021 or equivalent.

MCEN 5121-3. Compressible Flow. Energy, continuity, and momentum principles applied to compressible flow. Normal and oblique shocks; Prandtl-Meyer expansion; methods of characteristics; one-, two-, and three-dimensional subsonic, supersonic, and hypersonic flows. Prereq.: MCEN 5021 or equivalent.

Thermal

MCEN 2022-3. Engineering Thermodynamics. 1. Fundamental concepts and basic theory. First and second laws of thermodynamics; properties; states; thermodynamic functions; cycles; mixtures; chemical and phase equilibrium. Prereq.: APPM 2560.

MCEN 4122-3. Engineering Thermodynamics. 2. Advanced topics and applications. Thermodynamics of state; entropy and probability; thermodynamic cycles; reacting and nonequilibrium mixtures. Application to engines and power generation by conventional and alternative energy technologies. Most assignments are design oriented. Prereq.: MCEN 2022.

MCEN 4132-3. Air Conditioning. Principles of heating, ventilating, and air conditioning. Physical and thermodynamic properties of water vapor and air mixtures; determination of heating and cooling loads; examination of heating and cooling systems. Prereq.: MCEN 2022 and 3022.

MCEN 5022-3. Thermodynamics. A comprehensive presentation of macroscopic and statistical thermodynamics and representative applications, from an axiomatic formulation designed to develop and clarify thermodynamic property relationships. Statistical thermodynamics deals with the evaluation of the properties of atoms and molecules and the subsequent calculation of thermodynamic properties. Includes thermodynamic functions and derivatives, quantum mechanics, kinetic theory of gases, black body radiation, chemical equilibrium, and molecular spectroscopy.

MCEN 7122-3. Combustion Phenomena. Application of multicomponent fluid equations of motion and chemical thermodynamics to a variety of combustion problems. Droplet combustion; premixed and diffusion flames; boundary layer combustion; detonation wave theory; topics related to internal combustion engines; liquid and solid rockets. Prereq.: MCEN 2022 and 3021.
Solids
MCEN 2023-3. Mechanics of Particles. Static and dynamic behavior of a single particle and a system of particles. Free-body diagrams; force and moment resultants; equilibrium states; kinematics and kinetics; momentum, impulse, energy, and work; friction, collision, and vibration. Both Newtonian and analytical mechanics are covered. Homework assignments include computer exercises documented by written reports. Prereq., APFM 1300.
MCEN 2043-3. Mechanics of Rigid Bodies. Static and dynamic behavior of rigid bodies. Free-body diagrams, distributed forces, area and mass moments of inertia, two- and three-dimensional kinematics and kinetics, momentum, impulse, energy, work, collision, and vibration; both Newtonian and analytical mechanics are covered. Homework assignments include computer exercises documented by written reports. Prereq., MCEN 2023.
MCEN 3023-3. Mechanics of Deformable Bodies. Static and dynamic behavior of deformable bodies. Components of mechanics analysis; stress and strain; linear and nonlinear material behavior; strain of frames, trusses, cables, bars, shafts and beams; vibration of and wave propagation in slender members. Homework assignments include computer exercises and a design project. Prereq., MCEN 2043 and 3020.
MCEN 5023-3. Solid Mechanics 1. Introduces stress, strain, and motion of a continuous system. Material derivatives; fundamental laws of mass, momentum, energy, and entropy; constitutive equations and applications to classical and plastic materials. Prereq., MCEN 3023 or equivalent; coreq., MCEN 5020 or equivalent.
MCEN 5043-3. Solid Mechanics 2. Solution of problems of linear elasticity, both static and dynamic. Potentials; integral representations; source problems; variational principles; thermoelectro-elasticity; viscoelasticity; finite deformation. Prereq., MCEN 5023 or equivalent.
MCEN 5143-3. Dynamics. Elements of vector analysis; particle motion; kinematics of a rigid body; rotating axes; rigid body motion; Euler's equations. Introduces analytical mechanics; Hamilton's principle, Lagrange's equations for holonomic and nonholonomic systems. Prereq., MCEN 2043 or equivalent; coreq., MCEN 5020 or equivalent.
MCEN 7123-3. Dynamics of Continuous Media. Derivation of wave equations from the basic equations of dynamic elasticity. Propagation of elastic waves in infinite and partially bounded media; Rayleigh waves and Love waves; Pochhammer solution for a rod; waves in plates and in layered and anisotropic media. Prereqs., MCEN 5020, 5040, and 5043, or equivalents. Same as PHYS 6080 and GEOL 6080.
MCEN 7143-3. Advanced Theory of Elasticity. Variational principles and three-dimensional solutions. Concentrated and line loads in complete and half space problems; plates of Kelvin, Bousinesq, and Mindlin. Transform techniques; contact stresses; anisotropic and nonlinear elasticity; thermoelastic problems. Prereq., MCEN 5043 or equivalent.
MCEN 7163-3. Theoretical Dynamics. Tractable problems of particle and rigid body dynamics. Disqualifications and nonholonomic systems; the principle of least action; the Hamilton-Jacobi equation; geometric theory; Lagrange's method. Prereqs., MCEN 5020, 5040, and 5143, or equivalents.
Materials
MCEN 3024-3. Introduction to Materials Science. Structure, properties, and processing of metallic, polymeric, ceramic, and composite materials. Perfect and imperfect solids; phase equilibrium; transformation kinetics; mechanical behavior; material design and applications. Approach incorporates both materials science and materials engineering components. Prereq., MCEN 2043, CHEM 1211, CHEM 1221, and PHYS 2130.
MCEN 5024-3. Materials Science 1: Principles. Unified presentation of scientific principles applicable to all materials systems. Concepts of material structure from localized interatomic bonding to short- and long-range order in crystalline and noncrystalline solids; the nature and consequences of imperfections in solids; phase equilibria; transformation kinetics. Consider metallic, polymeric, and ceramic materials. Prereq., MCEN 3024 or equivalent.
MCEN 5044-3. Materials Science 2: Behavior. Application of principles of materials science developed in MCEN 5024 to the study of physical and mechanical behavior of metals, poly-mers, ceramics, and their composites. Structure-property relationships; use of primary and secondary processing steps to control material behavior; influence of environment on in-service performance. Prereq., MCEN 5024 or equivalent.
MCEN 5124-3. Plasticity and Creep. Inelastic deformation of materials such as metals, alloys, glasses, composites, polymers, etc., from the phenomenological and structural points of view. Yield surface and associated flow laws; isotropic and kinematic work-hardening. Case studies of plastic and creep deformations in engineering materials. Prereqs., MCEN 4124 or 5044, or equivalent.
MCEN 5164-3, Fracture. Basic mechanisms controlling fracture in brittle materials. Reduc- tion of capacity for plastic deformation in engineer- ing materials used at high-strength levels. Selection of materials in terms of toughness as well as strength. Prereqs., MCEN 4124, 5044, or equivalent.
MCEN 5184-3, Structure and Properties of Polymers. Introduction to fundamental aspects of polymer science. Relationship between molecular structure and polymeric properties. Polymer bonding; crystallinity; physical states and transi- tions; rubber elasticity; yield and fracture behavior; linear viscoelasticity. Prereqs., MCEN 4124, 5044, or equivalent.
Design
MCEN 1025-3. Computer-Aided Drawing and Fabrication. Basic techniques in mechanical drawing and subsequent transformation into a product. Pictorial representation (orthographic projection, isometric views, dimensions, working drawings); computer-aided drafting; computer-aided manufacturing. Design/manufacturing project involves the use of CAD software and a CNC machine.
MCEN 4025-3. Component Design. Application of mechanics, thermal science, and materials science analysis to design. Detailed design of various machine components including shafts, bearings, gears, brakes, springs, and fasteners. Emphasizes application and open-ended design problems. Computers are used extensively. Prereq., MCEN 3023.
MCEN 4045-3. Mechanical Design Project. A capsule mechanical design experience. Problem definition and specifications; alternative design concepts; model development and analysis; production of engineering drawings on a CAD system; fabrication; testing and evaluation. Students orally present the final design and prepare a written report. Prereqs., MCEN 4025 and 4026; coreq., MCEN 4065.

MCEN 4125-3. Introduction to Computer-Aided Design. Review of computer languages, programming, and special requirements. Linear and nonlinear programming; matrix methods and numerical techniques; constraints; simulation; graphical displays; optimization methods. Application to design of mechanical systems. Prereq., MCEN 1620 or CSCI 1700, and APFM 2360.

MCEN 4145-3. Computer-Aided Thermal Design. Computational analysis of thermodynamic cycles; compressor, expander, and heat-exchanger component design; team design project in solar power, heating, or cooling system; oral and written reports required. Prereq., MCEN 2022 and 3022.

MCEN 4185-3. Human Factors Engineering. Limitations on the engineering design of products, machines, and man-machine systems and environments due to physiological and psychological factors. Man-machine relationships; motor activities; work and workplace design; occupational safety; human reliability. Prereq., senior standing.

MCEN 5045-3. Design for Manufacturability. Topics include general design guidelines for manufacturability; aspects of manufacturing processes that affect design decisions; design rules to maximize manufacturability; statistical considerations; value engineering and design for assembly (manual, robotic, and automatic). Case studies of successful products exhibiting DFM are presented. Prereq., MCEN 4020 or equivalent.

MCEN 5125-3. Optimal Design of Mechanical Components. Linear and nonlinear optimization methods applied to the design of mechanical components and systems. Unconstrained and constrained optimization. Formulation of objective functions, including cost, weight, response time, and deflection. Application to gears, springs, cams, and linkages. Prereq., MCEN 3030 or equivalent, and MCEN 4025.

Manufacturing and Systems

MCEN 4026-4. Manufacturing Processes and Systems. Manufacturing processes for metals, polymers, ceramics, and composites, as well as manufacturing systems that integrate these processes. Forming and cutting, joining and assembling, process integration, inventory control, information handling, system management, system simulation and optimization. Prereq., MCEN 3024.

MCEN 4146-3. Computers in Manufacturing. Design, creation, testing, and operation of computer models for manufacturing, production, and management. Renewal processes; statistical validation and simulation; policy comparison and manufacturing optimization and decision making. Prereq., MCEN 1620 or CSCI 1200 or CSCI 1700.

MCEN 5026-3. Design and Manufacturing to Cost. Evaluates the effects of material, labor, logistic costs, automated vs. manual operations, economics of design, scale, and learning upon production and product cost. Additionally, process yield, quality, and life-cycle analysis are studied using computer models. Prereq., MCEN 4045. Graduate standing required.

MCEN 5046-3. Integrated Manufacturing Systems. Two lect., 3 hours of lab. per week. Small groups of students participate in laboratory experiments, carrying out theory presented in lectures. Theory details elements of manufacturing systems from design through marketing and application of common data within the system. Prereq., undergraduate degree in engineering or closely related technical science.

Miscellaneous

MCEN 3027-3. Measurements Laboratory. One lect. and 6 hours of lab. per week. Principles of engineering measurements. Methods and transducers for measuring various physical quantities such as temperature, pressure, flow rate, strain, and vibration. Analysis of experimental data; accuracy, error, and uncertainty. Prereq., MCEN 2022, APFM 2360, and PHYS 1120.

MCEN 4027-3. Mechanical Engineering Laboratory. One lect. and 6 hours of lab. per week. Groups of students participate in laboratory projects that extend over several weeks. Experiments are taken from solid mechanics, fluid mechanics, thermal science, and materials science. Emphasizes planning an experiment, applying sound experimental procedures, keeping project records, and communicating results orally and in lab reports. Includes a laboratory research project that is presented orally to the class. Prereq., MCEN 3021, 3023, 3024, and 3027.

MCEN 4167-3. Engineering Management. Relationship of the engineer to functions and decisions of management. Design of organization systems; project administration; audit and evaluation for optimum use of resources; leadership; performance; innovation; decision making. Emphasizes case studies and individual development. Seminar format. Prereq., senior standing.

MCEN 4197-1. Senior Seminar. Presentation of a broad range of professional opportunities available to graduating seniors through discussions with practicing engineers. Prereq., senior standing.

MCEN 5027-0. Graduate Seminar. Weekly presentations by visiting speakers, faculty, and students.

Special Topics

MCEN 1208 through 1298 (1-3). Special Topics in Mechanical Engineering. Subject matter to be selected from topics of current interest. Credit to be arranged. Prereq., instructor consent.

MCEN 2208 through 2298 (1-3). Special Topics in Mechanical Engineering. Subject matter to be selected from topics of current interest. Credit to be arranged. Prereq., instructor consent.

MCEN 3208 through 3298 (1-3). Special Topics in Mechanical Engineering. Subject matter to be selected from topics of current interest. Credit to be arranged. Prereq., instructor consent.

MCEN 4208 through 4298 (1-3). Special Topics in Mechanical Engineering. Subject matter to be selected from topics of current interest. Credit to be arranged. Prereq., instructor consent.

MCEN 4848 through 4898 (1-6). Independent Study. Subjects arranged in consultation with undergraduate advisor to fit the needs of the particular student. Prereq., senior standing.
MCEN 5208 through 5298 (1-4). Selected Topics. Credits and subject matter to be arranged.

MCEN 5848 through 5898 (1-6). Independent Study. Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Prereq.: graduate standing.

MCEN 6208 through 6298 (1-4). Selected Topics. Credits and subject matter to be arranged.

MCEN 6848 through 6898 (1-6). Independent Study. Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Prereq.: graduate standing.

MCEN 7208 through 7298 (1-4). Selected Topics. Credit and subject matter to be arranged.

MCEN 7848 through 7898 (1-6). Independent Study. Available only through approval of graduate advisor. Subjects arranged to fit needs of the particular student. Prereq.: graduate standing.

**Thesis**

MCEN 6949-variable credit. Master's Degree Candidacy.

MCEN 6959-variable credit. Master's Thesis.

**Telecommunications**

TLEN 5110-3. Contemporary Issues in Telecommunications Policy. Lectures, selected readings, and class discussions of major issues in telecommunications policy. Stresses multidisciplinary approach and explores basic values and goals for telecommunications policy making. The existing policy structure is reviewed briefly and critiqued. Topics are drawn from all areas of telecommunications policy—mass communications, common carrier, and spectrum management.

TLEN 5130-3. Strategic Planning in Telecommunications. Provides a clear understanding of basic trends, dynamic forces of change, and key planning and management techniques for coping with the field of telecommunications. Considers technological innovations, market and regulatory shifts, especially those related to privatization, competition, and liberalization. Also focuses on tools and methodologies for strategic planning and management, forecasting and modeling, and heuristic and analytic techniques that can be used in strategic planning for telecommunications products and services. Case studies emphasize the practical aspects of planning and management while case projects allow practice in the use of these techniques.

TLEN 5300-3. Telecommunications Theory and Applications. Deals with certain fundamentals needed for the program. Required for all participants who do not have a good current grasp of basic concepts related to a range of topics including physical units, trigonometric functions, sines, waves, attenuation, logarithms, indices, decibels, complex numbers, elementary calculus, elementary probability, power, and circuit analysis.

TLEN 5310-3. Telecommunications Systems. Examines current and future basic technical concepts and related telecommunications operations. Includes an in-depth look at basic telecommunications terminology and concepts. Introduces voice and data networks, signalling, and modulation/multiplexing. Also includes frequency bands and propagation characteristics, spectral analysis of signals, modulation (AM, FM, PM, and PCM), digital coding/multiplexing, detection, transmission systems, switching systems, OSI model, and traffic analysis. Prereq. or coreq.: TLEN 5300 or equivalent.

TLEN 5330-3. Data Communications 1. Introductory course in data communications. Defines large segments of terminologies, standards, design considerations and processes, models and systems. Subdivided into four basic segments which support the interconnection and transmission of digital information. These segments include analog, digital, networks, and protocols. Prereq., one year of calculus and statistics.

TLEN 5350-3. Trends in Satellite Communications Systems. Fundamental concepts and parametric design parameters of communication systems. Emphasizes system throughput, sensitivity and selection of satellite orbit, frequency bands, modulation, coding, multiple access schemes, on-board switching and processing, anti-jam techniques, and user terminal characteristics. Current and planned commercial and military satellite communication systems are examined and compared to future needs and technologies. Aimed at a fundamental understanding of the design drivers of satellite communication system performance.

TLEN 5360-3. Telephone Systems. Gives students an understanding of the technological manifestations, marketplace, and regulatory arenas surrounding today's telephone industry. Presents switching and transmission system technologies in moderate depth. Principles in traffic theory are explained and applied along with telephone system design and evaluation techniques. Key systems, PBXs, and modern inside wiring schemes are presented.

TLEN 5400-3. Traffic and Queuing Theory. Concerned with analysis of equipment requirements for switched communication systems. Computational methods using tabular and graphical aids and computers are emphasized. Topics include traffic concepts, blocking theory, Erlang formulas, delay theory, computational procedures, and computer simulation of traffic problems.

TLEN 5420-3. Optical Communications. Addresses the engineering and cost benefits of optical fiber systems. Discusses and defines the important engineering parameters and applies the parameters to typical systems. Gives attention to certain matters affecting trade and commerce. Covers limitations and capabilities of certain components. Analyzes typical loss budgets and dispersion budgets, discusses cost-benefit analysis, and makes some comparison to other communication systems.

TLEN 5430-3. Data Communications 2: LANs, MANs, WANS, and FDDI. Topics include local area networks (e.g., LANs, MANs, WANS, and FDDI) and additional topics of importance such as cryptography and communications protection. For more technically inclined students. Normally follows TLEN 5330. Prereq.: TLEN 5300 and 5310 or equivalents; one year of calculus, statistics, and programming experience are strongly recommended.

TLEN 5440-3. ISDN: Digital Networks. Reviews telecommunications and digital concepts; provides an overview of standards, CCITT recommendations, basic user-network interface, multiplexing and rate adaptation, and planning and future development.

TLEN 5460-3. Telecommunications Systems Laboratory. Studies switching functions and measure transmission and traffic characteristics on models of the major business communications systems and carrier transmission facilities. Utilizes current commercial equipment in a low-cost setting including an AT&T Definity, a Northern Telecom SL-1, a Rohm CBX II, as well as an NTI DMS 250 central office. Hands-on experience through individual experiments and demonstrations, including use of the oscilloscope, modulation methods, and time and frequency awareness multiplexing. Demonstrates relevance of such concepts as bandwidth, noise interference, channel capacity, signal power, etc.

TLEN 5470-3. Data and Computer Networks. Maintains a real-world approach to the subject of networking computers and other data communications devices that are in use today or have been used in the past. This emphasis is further strengthened through the use of guest speakers from Colorado companies who discuss the nature, history, rationale, and performance of networks used by their companies. Includes both transport networks and the processors and communications software that run with them; covers networks ranging from the simplest transport network to "application" networks like SNA, and deals with operational issues such as the performance monitoring and network management.

TLEN 5500-3. Cable Television. Although technical in nature, aimed at breadth rather than depth. Thus, pertinent FCC regulations, local franchising practices, and economic modeling are mentioned in introductory lectures. The bulk of the lectures treat TV signal distribution and interconnection, subscriber terminals, headends and central processors, local origination, and interactive systems (two-way). A term paper, in an applicable area suitable to the student's background, is required and is presented orally to the class. Offered only on demand; not offered every academic year.

TLEN 5510-3. Wireless and Cellular Communications. Presents in detail the technologies and architectures employed in cellular and other modern wireless systems: discusses regulatory and other industry issues. Major topics include radio technology review, multiple access techniques, analog and digital cellular telephony, mobile and fixed (wireless LAN) packet radio systems, and personal communications networks (PCNs).

TLEN 5520-3. Telecommunications Standards. Familiarizes students with domestic and international standards involved in telecommunications and information processing studies. Presents the development, implementation, and importance
of U.S. standards in general, as well as the differences between standards and regulations in the United States. Considers the impact of the information age and related technology on the development of international standards. Special stress placed on the CCITT and its work on the ISDN.

TLEN 5600-1. Telecommunications Seminar. A series of weekly lectures with questions and discussion. Most of the speakers are nationally known experts in telecommunications. The fall and spring seminars are for 1 credit hour each, and attendance is required of all students.

TLEN 5920-3. Independent Study—Advanced Telecommunications Laboratory. Gives students an opportunity to complete a major telecommunications research project related to telephone, video or computers, or data communications, with approval of the laboratory director. Students prepare written and oral presentations of project results. 

TLEN 6940. Candidate for Degree. 

TLEN 6960. Telecommunications Project.

Special Topics

TLEN 5831-3. Special Topics: The Future of Telecommunications. Explores the development of telecommunications in the past, present, and especially the future. Examines advanced applications such as HDTV, SDTV, holography, supercomputer data relays, tele-work, tele-health, tele-education, the tele-city, tele-robotics, and mobile communications. Also explores advanced technologies such as repeaterless fiber optic cables, optoelectronic switching and computing, and infrared transmission and advanced satellite concepts. Discusses information overload time compression, the 168-hour work week, human-machine interface, tele-war, and electronic immigration and tele-colonies. Creates an analytical framework for understanding how political changes and regulatory processes shape and even stimulate technological changes.

TLEN 5832-3. Special Topics: Engineering Economics. Engineering and business projects, commonly measured in terms of financial efficiency, will seldom achieve maximum success unless they are properly planned and operated with respect to technical, social, and financial requirements. The engineer, as the one most likely to understand the technical requirements, is frequently called on to study technical and financial details of a project and thus provide analysis for a sound managerial decision. Economic analyses primarily involving engineering and technical projects (engineering economy studies) generally include the time value of money (interest), decisions among alternatives, depreciation, capital budgeting, break-even analysis, tax considerations, and the effects of risk and uncertainty.

TLEN 5833-3. Special Topics: UNIX/C/C++. Develops knowledge of the UNIX environment, including file editing, shell programming, document preparation, data manipulation, system calls, and C++/C++ programming. Studies techniques for source control and modification of large programs written by others, as is often encountered in telecommunications environments. Teaches paradigms are applicable in other environments.

TLEN 5834-3. Special Topics: Integrated Services Digital Networks (ISDN). ISDN is a significant communications event, and this course reviews the telecommunications and digital concepts, provides an overview of standards, CCITT recommendations, basic user-network interface, multiplexing and rate adaptation, and planning and future development.

TLEN 5835-3. Economics/Policy/Management Aspects of Telecommunications. A core curriculum course that addresses the key non-technical aspects of telecommunications. Includes aspects of deregulation, common carriers, tariffs, basic standards, and management.

TLEN 5836-3. Special Topics: Law and Regulation. While technology is a necessary antecedent to mass communication, a society's laws ultimately determine how the technology will be developed and how wide its reach will be. Examines past and current experiments by state and federal legislators, regulators and the judiciary in directing the development and pace of communications technology.

TLEN 5837-3. Special Topics: Management and Information Technology. Discusses trends in organizational management and information technology as they relate to new business tactics and emerging/converging communications, computing, and knowledge technologies. Focuses on business issues and how technology influences markets, economics, and business development worldwide.

TLEN 5838-3. Special Topics: Telecommunications Economics (Pricing). Covers the foundation of economics as applied to the telecommunications industry. In particular, alternative regulatory practices and cost and pricing methodologies and their impact on specific telecommunications policies are examined.

TLEN 5839-3. Advanced Topics in Telecommunications Economics. Covers advanced issues in telecommunications pricing, alternative forms of regulation, and privatization of telecommunications entities. Pricing theory includes nonlinear pricing and peak load pricing. Alternative regulation includes, in addition to rate of return regulation, the variety of incentive regulation, both theoretical and applied. Privatization examines the cases of the UK and Japan in detail and some of the Latin American cases. A background in microeconomics is required, and completion of TLEN 5838 is desired.

Cross-Listed

FACULTY

Aerospace Engineering Sciences

ROBERT D. CULP, Department Chair; Professor, B.S., University of Oklahoma; M.S., Ph.D., University of Colorado.

BRIAN M. ARGROW, Assistant Professor, B.S., M.S., Ph.D., University of Oklahoma.

PENINA AXELRAD, Assistant Professor, B.S., M.S., Massachusetts Institute of Technology; Ph.D., University of Stanford.

MARK J. BALAS, Professor, B.S., University of Akron; M.A., University of Maryland; Ph.D., University of Denver.

CHARLES A. BARTH, Professor Adjunct, B.S., Lehigh University; M.A., Ph.D., University of California, Los Angeles.

ALFRED J. JEDRAD, Associate Professor Adjunct, B.S., Boston College; M.S., Ph.D., University of Colorado.

SEDA Z. BARJESKA, Associate Professor, B.S., M.S., Robert College (Turkey); Diploma, von Karman Institute for Fluid Dynamics, D.Sc., University of Brussels.

GEORGE H. BORN, Professor, B.S., M.S., Ph.D., University of Texas.

CHARLES D. BROWN, Lecturer, B.S., University of Oxford; M.S., Southern Methodist University.

CHUEN-YEN CHOW, Professor, B.S., National Taiwan University; M.S., Purdue University; M.S., Massachusetts Institute of Technology; Ph.D., University of Michigan.

JUDITH CURRY, Associate Professor, B.S., Northern Illinois University; Ph.D., University of Chicago.

WILLIAM EMERY, Professor, B.S., Brigham Young University; Ph.D., University of Hawaii.

CHARBEL FARHAT, Associate Professor, D.E., Ecole Centrale, Paris, France; M.S., Ph.D., University of California, Berkeley.

CARLOS A. FELICIA, Professor, B.S., Universidad Nacional de Cordoba, Argentina; M.S., Ph.D., University of California, Berkeley.

FREDRICK SMITH, Professor, M.S., Ph.D., Technische Universitat (Berlin).

ELAINE HARTUNG, Lecturer, B.A., Knox College; M.S., University of Wisconsin.

DONALD HEARTH, Professor, B.S., M.S., Northeastern University.

LAKSHMI KANTHA, Professor, B.S., Bangalore University (India); M.S., Indian Institute of Science; Ph.D., Massachusetts Institute of Technology.

DONALD A. KENNEDY, Associate Professor, B.S., Ph.D., Johns Hopkins University.

JEAN N. KOSTER, Assistant Professor, Dip-Ing., Dok.-Ing., University of Karlsruhe (Germany).

CULBERT B. LANEY, Assistant Professor, B.S., University of Maryland; M.S., Ph.D., Cornell University.
MARK T. LANGHENRY, Lecturer. B.S., Purdue University; M.S., Ph.D., Auburn University.
KRISTINE LARSON, Assistant Professor. Ph.D., University of California, San Diego.
DALE A. LAWRENCE, Assistant Professor. B.S., Colorado State University; M.S., Ph.D., Cornell University.
ROBERT R. LEBEN, Research Assistant Professor. B.S., M.S., Ph.D., University of Colorado.
MARVIN W. LUTTGES, Professor. B.S., University of Oregon; Ph.D., University of California, Irvine.
PETER F. MacDORAN, Professor Attendant. B.S., California State University; M.S., University of California, Santa Barbara.
RONALD J. MacGREGOR, Associate Professor. B.S., M.S., Ph.D., Purdue University.
WILLIAM E. MCCLINTOCK, Lecturer. B.A., M.A., Ph.D., Johns Hopkins University.
MARTIN M. MIKULAS, Jr., Professor. B.S., M.S., Ph.D., Virginia Polytechnic Institute.
ALAN J. MORD, Associate Professor Adjunct. B.S., University of California, Berkeley; M.S., Ph.D., University of Oregon.
GEORGE W. MORGENTHALER, Professor. B.S., De Paul University, Concordia; M.S., University of Chicago; M.S., University of Colorado (Denver); M.S., Massachusetts Institute of Technology; Ph.D., University of Chicago.
KWANG-CHUN PARK, Professor. B.S., Inha Institute of Technology (Korea); M.S., Stanford University; Ph.D., Clarkson College.
LEE D. PETERSON, Assistant Professor. B.S., M.S., Ph.D., Massachusetts Institute of Technology.
GEORGE W. ROSBOROUGH, Associate Professor. B.S., University of Colorado; Ph.D., University of Texas.
GARY J. ROTTMAN, Lecturer. B.A., Rockhurst College; M.S., Ph.D., Johns Hopkins University.
A. RICHARD SEEBAAS, III, Dean of Engineering and Applied Science, Professor. B.S.E., M.S.E., Princeton University; Ph.D., Cornell University.
HOWARD A. SNYDER, Professor. B.S., Rensselaer Polytechnic Institute; S.M., Ph.D., University of Chicago.
KARL D. WOOD, Professor Emeritus.
NGUYEN X. XINH, Associate Professor. Licence és science, Doctor in Theoretical Physics, D.Sc., University of Paris.
HAROLD F. ZIMBELMAN, Professor Adjunct. B.S., M.S., University of Colorado. P.E., state of Colorado.

Chemical Engineering
PAUL L. BARRICK, Professor Emeritus.
CARL F. BORGKAMANN, Professor Emeritus.
CHRISTOPHER N. BOWMAN, Assistant Professor. B.S., Ph.D. (Chem.), Purdue University.
DAVID E. CLOUGH, Professor. B.S., Case Institute of Technology; M.S., Ph.D. (Chem.), University of Colorado.
ROBERT H. DAVIS, Professor. B.S., University of California, Davis; M.S., Ph.D. (Chem.), Stanford University.
JOHN L. FALCONE, Professor. B.S., Johns Hopkins University; M.S., Ph.D. (Chem.), Stanford University.
YURIS O. FUENTES, Assistant Professor. B.S., M.S., University of Chile; Ph.D. (Chem.), University of Wisconsin-Madison.
R. IGOR GAMOW, Associate Professor. B.A., M.B.S., Ph.D. (Microbial-Biophysics), University of Colorado.
HOWARD J. M. HANLEY, Professor Adjunct. B.S., Ph.D. (Phys. Chem.), University of London.
R. CURTIS JOHNSON, Professor Emeritus.
DHINAKAR S. KOMPALA, Associate Professor. B.Tech., Indian Institute of Technology, Madras; M.S., Ph.D., (Chem.), Purdue University.
WILLIAM B. KRANZT, Professor and President's Teaching Scholar. B.A., St. Joseph's College. Rensselaer; B.S., University of Illinois; Ph.D. (Chem.), University of California, Berkeley.
FRANK KREITH, Professor Emeritus.
B. ELMER LAUER, Professor Emeritus.
RICHARD D. NOBLE, Professor. B.E., M.E., Stevens Institute of Technology; Ph.D. (Chem.), University of California, Davis.
MAX S. PETERS, Professor Emeritus.
W. FRED RAMIREZ, Professor. B.S., M.S., Ph.D. (Chem.), Tulane University.
ROBERT L. SANI, Professor. B.S., M.S., University of California, Berkeley; Ph.D. (Chem.), University of Minnesota.
EDITH M. SEVICK, Assistant Professor. B.S.E., University of Pittsburgh; Ph.D. (Polymer Sci. and Engrg.), University of Massachusetts.
KLADIUS D. TIMMERHAUS, Professor and President's Teaching Scholar. B.S., M.S., Ph.D. (Chem.), University of Illinois.
PAUL W. TODD, Research Professor. B.A., Bowdoin College; S.B., Massachusetts Institute of Technology; M.S., University of Rochester; Ph.D. (Biophysics), University of California, Berkeley.
RONALD E. WEST, Professor. B.S.E., M.S.E., Ph.D. (Chem.), University of Michigan.

Civil, Environmental, and Architectural Engineering
JAMES P. HEANEY, Department Chair; Professor of Civil, Environmental, and Architectural Engineering. B.S., Illinois Institute of Technology, M.S.; Ph.D., Northwestern University.
BERNARD AMADEI, Associate Professor of Civil, Environmental, and Architectural Engineering. Dipl. Eng., School of Applied Geology and Mine Prospecting, E.N.S.G. (France); M.S., University of Toronto; Ph.D., University of California, Berkeley.
GARY L. AMY, Professor of Civil, Environmental, and Architectural Engineering. B.S., M.S., San Jose State University; Ph.D., University of California, Berkeley.
ROBERT S. AYRE, Professor Emeritus of Civil Engineering.
L. DUANE BALL, Professor Emeritus of Civil, Environmental, and Architectural Engineering.
MICHAEL J. BRANDEMUEHL, Assistant Professor of Civil, Environmental, and Architectural Engineering. B.S., M.S., Ph.D., University of Wisconsin, Madison.
STEVEN C. CHAPRA, Professor of Civil, Environmental, and Architectural Engineering. B.E., M.E., Manhattan College; Ph.D., University of Michigan.
NEVIS COOK, Assistant Professor Adjunct of Civil, Environmental, and Architectural Engineering. B.S., M.S., Ph.D., University of Colorado at Boulder.
ARTHUR T. COREY, Adjunct Professor of Civil, Environmental, and Architectural Engineering. B.S., M.S., University of Maryland; M.S., Colorado State University; Ph.D., Rutgers University.
WARREN W. DeLAPP, Professor Emeritus of Civil Engineering.
JAMES E. DIEKMANN, Professor of Civil, Environmental, and Architectural Engineering. B.S., M.S., University of Missouri; Ph.D., University of Washington.
DAVID L. DILARA, Associate Professor Adjunct of Civil, Environmental, and Architectural Engineering. B.A., Wayne State University.
JOHN O. DOW, Associate Professor of Civil, Environmental, and Architectural Engineering. B.S., General Motors Institute; M.S., University of Michigan; Ph.D., University of Colorado.
MARC A. EDWARDS, Assistant Professor of Civil, Environmental, and Architectural Engineering. B.S., SUNY Buffalo; M.S., Ph.D., University of Washington.
CHUAN CHUNG FENG, Professor Emeritus of Civil, Environmental, and Architectural Engineering.
J. ERNEST FLACK, Professor Emeritus of Civil, Environmental, and Architectural Engineering.
DAN M. FRANCOPOLO, Professor of Civil, Environmental, and Architectural Engineering. B.S., Institute of Civil Engineering (Romania); Ph.D., University of Liege (Belgium).

KURT H. GERSTLE, Professor Emeritus of Civil and Architectural Engineering.

GEORGE G. GOBLE, Professor Emeritus of Civil, Environmental, and Architectural Engineering.

MARK GROSS, Assistant Professor of Civil, Environmental, and Architectural Engineering. B.S., Ph.D., Massachusetts Institute of Technology.

MILAN F. HALEK, Senior Instructor in Civil, Environmental, and Architectural Engineering. B.A., University of Colorado; M.S., Czechoslovakia Technical University.

GEORGE HEARN, Assistant Professor of Civil, Environmental, and Architectural Engineering. B.S., The Cooper Union; M.S., Ph.D., Columbia University.

TOM HESS, Visiting Assistant Professor of Civil, Environmental, and Architectural Engineering. B.S., M.S., Ph.D., University of Colorado.

LOUIS IANNANTUNO, Senior Instructor Emeritus of Civil, Environmental, and Architectural Engineering.

TISSA ILANGASEKARE, Professor of Civil, Environmental, and Architectural Engineering. B.S., University of Ceylon; M.E., Asian Institute of Technology; Ph.D., Colorado State University.

HON-YIM KO, Professor of Civil, Environmental, and Architectural Engineering. B.S., University of Hong Kong; M.S. (CE), Ph.D., California Institute of Technology.

MONCEF KARTI, Assistant Professor of Civil, Environmental, and Architectural Engineering. Dipl.-Ing. Ecole Nationale des Ponts et Chausses, M.S., Ph.D., University of Colorado at Boulder.

JAN F. KREIDER, Professor of Civil, Environmental, and Architectural Engineering. B.S., Case Institute of Technology; M.S., Ph.D., University of Colorado.

FRANCIS G. MCLEAN, Professor Adjunct of Civil, Environmental, and Architectural Engineering. B.S., M.S., Ph.D., Northwestern University.

WALTER L. MEYER, Professor Emeritus of Civil and Architectural Engineering.

HUBERT MOREL-SEYTOUX, Professor Adjunct of Civil, Environmental, and Architectural Engineering. Ph.D., Stanford University.

JIMMY LEE NOLAND, Associate Professor Adjunct of Civil, Environmental, and Architectural Engineering. B.S., University of Maryland; M.S., University of Denver; Ph.D., University of Colorado at Boulder.

HAROLD W. OLSEN, Professor Adjunct of Civil, Environmental, and Architectural Engineering. B.S., S.M., Sc.D., Massachusetts Institute of Technology.

RONALD Y.S. PAK, Associate Professor of Civil, Environmental, and Architectural Engineering. B.E., McMaster University (Canada); M.S., Ph.D. (CE and Appl. Mech.), California Institute of Technology.

ROLAND C. RAUTENSTRAUS, President Emeritus; Professor Emeritus of Civil, Environmental, and Architectural Engineering.

PEDRO RESTREPO, Associate Professor Adjunct of Civil, Environmental, and Architectural Engineering. B.S., National University of Colombia; M.S., Ph.D., Massachusetts Institute of Technology.

VICTOR A. SAOUMA, Associate Professor of Civil, Environmental, and Architectural Engineering. B.E., American University of Beirut; Ph.D., Cornell University.

WILLIAM SAWGE, Associate Professor Adjunct of Civil, Environmental, and Architectural Engineering. B.A., Lawrence University; M.S., Syracuse University; Ph.D., Texas A & M University.

ROBERT L. SCHIFFMAN, Professor Civil, Environmental, and Architectural Engineering. B.C.E., Cornell University; M.S., Columbia University; Ph.D., Rensselaer Polytechnic Institute.

P.S. BENSON SHING, Associate Professor of Civil, Environmental, and Architectural Engineering. B.S., M.S., Ph.D. (CE), University of California, Berkeley.

JOANN SILVERSTEIN, Associate Professor of Civil, Environmental, and Architectural Engineering. B.S., M.S., Ph.D., University of California, Davis.

KENNETH M. STRZEPEK, Associate Professor of Civil, Environmental, and Architectural Engineering. Sc.B., S.M., Ph.D., Massachusetts Institute of Technology.

STEIN STURE, Professor of Civil, Environmental, and Architectural Engineering. B.S., M.S., Ph.D., University of Colorado.

KRIS SUBBARAO, Research Professor of Civil, Environmental, and Architectural Engineering. B.S., Bangalore University; M.S., Ohio State University; Ph.D., Princeton University.

LUIS L. SUMMERS, Professor of Civil, Environmental, and Architectural Engineering. B.Arch., M.S., Ph.D., University of Notre Dame.

BRUCE SUPRENANT, Associate Professor of Civil, Environmental, and Architectural Engineering. B.S., Bradley University; M.S., University of Illinois; Ph.D., Montana State University.

LEONARD G. TULIN, Professor Emeritus of Civil, Environmental, and Architectural Engineering.

WALTER A. WEERS, Associate Professor Emeritus of Civil and Environmental Engineering.

KASPAR J. WILLAM, Professor of Civil, Environmental, and Architectural Engineering. Dipl.-Ing., Technical University (Vienna); M.S., California State University; Ph.D., University of California, Berkeley.

EDITH ZAGONA, Visiting Lecturer of Civil, Environmental, and Architectural Engineering. B.S., University of Arizona; M.S., Colorado State University; Ph.D., University of Colorado.

DOBROSLAV ZNIDARIC, Associate Professor of Civil, Environmental, and Architectural Engineering. B.S., M.S., University of Zagreb; Ph.D., University of Colorado.

Computer Science

ROBERT B. SCHNABEL, Department Chair; Professor. B.A., Dartmouth College; M.S., Ph.D., Cornell University.

ELIZABETH BRADLEY, Assistant Professor. B.S., M.S., Ph.D., Massachusetts Institute of Technology.

RICHARD H. BYRD, Professor. B.A., M.A., Ph.D., Rice University.

BRIGITTA DOMIK, Assistant Research Professor. M.Sc., Ph.D., Technical University of Graz.

ANDRZEJ EHRENFEUCHT, Professor. M.A., University of Warsaw (Poland); Ph.D., Mathematical Institute of A.N. Warsaw.

MICHAEL EISENBERG, Assistant Professor. B.A., Columbia College; S.M., Ph.D., Massachusetts Institute of Technology.

CLARENCE ELLIS, Professor. B.A., Beloit College; M.A., Ph.D., University of Illinois, Urbana-Champaign.

GERHARD FISCHER, Professor. M.S., University of Heidelberg; Ph.D., University of Hamburg.

LLOYD D. FOSDICK, Professor Emeritus.

HAROLD N. GABOW, Professor. A.B., Harvard College; Ph.D., Stanford University.

JOHN GARY, Professor Adjunct. B.S., Ph.D., University of Michigan.

DIRK GRUNWALD, Assistant Professor. B.S., M.S., Ph.D., University of Illinois, Urbana-Champaign.

DENNIS HEIMBIGNER, Assistant Professor. B.S., California Institute of Technology; M.S., Ph.D., University of Southern California.

ELIZABETH R. JESSUP, Assistant Professor. B.A., Williams College; M.S., Ph.D., Yale University.

HARRY F. JORDAN, Professor. B.A., Rice University; M.S., Ph.D., University of Illinois.

ROGER A. KING, Associate Professor. A.B., Occidental College; M.S., Ph.D., University of Southern California.

CLAYTON H. LEWIS, Professor. A.B., Princeton University; M.S., Massachusetts Institute of Technology; Ph.D., University of Michigan.

MICHAEL MAIN, Associate Professor. B.S., M.S., Ph.D., Washington State University.

JAMES MARTIN, Assistant Professor. B.S., Columbia University; Ph.D., University of California, Berkeley.
OLIVER McBRYAN, Professor. B.S., M.S., National University of Ireland; Ph.D., Harvard University.

MICHAEL MOZER, Associate Professor. B.S., Brown University; M.A., Ph.D., University of California, San Diego.

EVI NEMETH, Associate Professor. B.S., Pennsylvania State University; M.S., Ph.D., University of Waterloo.

GARY J. NUTT, Professor. B.A., B.S., State University; M.S., Ph.D., University of Washington.

GRZEGORZ ROZENBERG, Professor. Adjunct. M.S., Technical University of Warsaw (Poland); Ph.D., Polish Academy of Sciences.

MICHAEL F. SCHWARTZ, Assistant Professor. B.S., University of California, Los Angeles; M.S., Ph.D., University of Washington.

PAUL SMOLENSKY, Associate Professor. A.B., Harvard College; M.S., Ph.D., Indiana University.

PAUL SWARZTRAUBER, Professor. Adjunct. B.S., University of Illinois; M.S., Ph.D., University of Colorado.

DAVID WAGNER, Assistant Professor. B.S., University of Wisconsin; M.S., Ph.D., University of Washington.

WILLIAM MCGASTINE WAITE, Professor. A.B., Oberlin College; M.S., Ph.D., Columbia University.

ANDREAS WEIGEND, Assistant Professor. B.S., Karlsruhe University; M.S., Boan University; Ph.D., Stanford University.

KARL WINKLAMM, Associate Professor. Attenant Rank. B.S., Technical University, Munich; Ph.D., Purdue University.

ALEXANDER WOLF, Assistant Professor. B.A., Queens College, City University of New York; M.S., Ph.D., University of Massachusetts.

BEN ZORN, Assistant Professor. B.S., Rensselaer Polytechnic Institute; M.S., Ph.D., University of California, Berkeley.

Electrical and Computer Engineering

WILLIAM M. WAITE, Department Chair; Professor. A.B., Oberlin College; M.S., Ph.D. (EE), Columbia University.

RICHARD K. AHRENKIEL, Professor. Adjunct. B.S., M.S., Ph.D. (Solid State Physics), University of Illinois.

SVEIN G. ANDRESEN, Associate Professor Emeritus.

JAMES P. AVERY, Associate Chair; Associate Professor. B.S., Michigan State University; Ph.D. (Analytical Chemistry), University of Illinois.

SUSAN K. AVERY, Professor. B.S., Michigan State University; M.S., Ph.D. (Atmos. Sci.), University of Illinois.

MARK J. BALAS, Professor of Aerospace. B.S., University of Akron; M.A., University of Maryland; Ph.D., University of Denver.

BEN B. BALSLEY, Research Professor. B.S., California State Polytechnic College; M.S., Ph.D. (EE), University of Colorado.

FRANK S. BARNES, Professor. B.S., Princeton University; M.S., Engineer's Degree, Ph.D. (EE), Stanford University.

PETR BECKMANN, Professor Emeritus.

DAVID E. BEEMAN, Professor Adjunct. B.S., Stanford University; Ph.D. (Physics), University of California, Los Angeles.

RICHARD C. BENTON, Professor Adjunct. B.S., M.S., Texas A&M Sc., Massachusetts Institute of Technology.

THOMPSON R. BROWN, Lecturer. B.S., Wichita State University.

PALMER W. CARLIN, Professor. Emeritus.

W. THOMAS CATHEY, Professor. B.S., M.S., University of South Carolina; Ph.D. (EE), Yale University.

ROGER S. CHENG, Assistant Professor. B.S., University of Illinois; Ph.D. (EE), University of Colorado.

WAYNE V. CITRIN, Assistant Professor. A.B., Cornell University; M.S., Ph.D., University of California, Berkeley.

TIMOTHY J. COUTTS, Professor Adjunct. B.S., University of Illinois; Ph.D., Cambridge University.

KENNETH DAVIES, Professor Adjunct. B.S., M.S., Ph.D. (EE), University of Illinois.

GORDON W. DAY, Professor Adjunct. B.S., M.S., Ph.D. (EE), University of Illinois.

SATHYENDRA K. DEB, Professor Adjunct. B.S., University of Illinois; Ph.D., Cambridge University.

VERNON E. DERR, Professor Adjunct. A.B., State University of New York; Ph.D., Johns Hopkins University.

O. F. DIAL, Professor Emeritus.

JOHN M. DUNN, Associate Dean for Undergraduate Programs; Associate Professor. B.A., Carleton College; M.A., Ph.D. (Applied Physics), Harvard University.

ROBERT W. ERIKSSON, Associate Professor. B.S., M.S., Ph.D. (EE), California Institute of Technology.

DELORES M. ETTER, Professor. B.S., University of New Mexico.

WARREN L. FLOCK, Professor Emeritus.

MARK O. FREEMAN, Assistant Research Professor. B.S., University of Minnesota; M.S., University of Wisconsin; Ph.D. (EE), University of Wisconsin.

DAVID C. FRIEDS, Research Professor. B.A., Carleton College; M.S., Ph.D. (Physics), University of Illinois.

EWALD F. FUCHS, Professor. Dipl., Dipl. Ing., Technical University of Stuttgart; Ph.D. (EE), University of Colorado.

JACKSON F. FULLER, Professor Emeritus.

ROBERT L. GALLAWA, Professor Adjunct. B.S., M.S., University of Nebraska; Ph.D. (EE), University of Colorado.

SEYMOUR GELLER, Professor Emeritus.

ROBERT L. GLESS, Professor Emeritus.

LLOYD J. GRIFFITHS, Associate Dean for Administration and Research; Professor. B.S., University of Alberta (Canada); M.S., Ph.D. (EE), Stanford University.

KULDIP C. GUPTA, Professor. B.Sc., Punjab University; B.E., M.E., Indian Institute of Science; Ph.D. (EE), Birla Institute of Technology and Science.

GARY D. HACKETT, Professor. B.S., California Institute of Technology; Ph.D. (EE), University of California, Berkeley.

WILLIAM J. HANNA, Professor Emeritus.

JOHN E. HAUSER, Assistant Professor. B.S., United States Air Force Academy; M.S., Ph.D., University of Colorado, Berkeley.

RUSSELL E. HAYES, Professor. B.S., M.S., University of Kansas; Ph.D. (EE), Stanford University.

VINCENT P. HERING, Associate Professor. B.S., University of Cincinnati; Ph.D., University of Florida.

DAVID A. HILL, Professor Adjunct. B.S., M.S., Ohio University; Ph.D., Ohio State University.

DAVID C. HOGG, Lecturer. B.S., University of Western Ontario; M.Sc., Ph.D. (Physics), McGill University, Canada.

CARL T. JOHNSON, Professor Emeritus.

KRISTINA M. JOHNSON, Associate Professor. B.S., M.S., Ph.D. (EE), Stanford University.

HARRY F. JORDAN, Professor. B.S., Rice University; M.S., Ph.D. (Physics), University of Illinois.

MOTOHISA KANDA, Professor Adjunct. B.S., Keio University; M.S., Ph.D. (EE), University of Colorado.

JERROLD H. KRENZ, Associate Professor. B.S., University of Buffalo; M.S., Ph.D. (EE), Stanford University.

EDWARD F. KUSTER, Professor. B.S., Michigan State University; M.S., Ph.D. (EE), University of Colorado.

LEONARD LEWIN, Professor Emeritus.

MICHAEL R. LIGON, Graduate Director; Professor. B.S., M.S., University of Florida; Ph.D. (EE), Carnegie-Mellon University.

MARK M. MAIER, Associate Professor. B.S., National Taiwan University; M.S., University of Illinois; Ph.D. (EE), Syracuse University.

PETER F. MACDONALD, Professor Adjunct. B.S., California State University; M.S., University of California, Santa Barbara.

ARNOLDO MAJERFELD, Professor. School of Physics and Electronic Engineering, University of Buenos Aires (Argentina); Ph.D. (EE), Stanford University.
DRAGAN MASIMOVIC, Assistant Professor, B.S.E.E. M.S.E.E. University of Belgrade; Ph.D., Caltech.

GEORGE J. MALER, Professor Emeritus.

SAMUEL W. MALEY, Professor Emeritus.

PETER MATHYS, Associate Professor, Dipl. El. Ing., Ph.D. (EE), Swiss Federal Institute of Technology, Zurich.

WILLIAM G. MAV, Professor S.B., S.M., Ph.D. (EE), Massachusetts Institute of Technology.

RUEL C. MERCURE, Professor Adjunct, B.A., M.S., Ph.D. (Physics), University of Colorado.

DAVID G. MEYER, Associate Professor, B.S., University of Wyoming; M.S., Ph.D., Stanford University.

ALAN R. MCKELSON, Associate Professor, B.S., University of Texas at El Paso; M.S., Ph.D. (EE/Physics), California Institute of Technology.

RICHARD T. MIHRAN, Assistant Research Professor, B.S., Case Western Reserve University; M.S., Ph.D. (EE), University of Colorado.

WILLIAM C. MILLER, Lecturer, B.S., University of Michigan.

GARRIT MODEL, Professor, B.S., Stanford University; M.S., Ph.D. (Appl. Phys.), Harvard University.

CLIFFORD T. MULLIS, Professor, B.S., M.S., Ph.D. (EE), University of Colorado.

NORRIS S. NAHMAN, Professor Adjunct, B.S., California State Polytechnic College; M.S., Stanford University; Ph.D. (EE), University of Kansas.

GARY J. NUTT, Professor of Computer Science, B.A., Boise State University; M.S., Ph.D., University of Washington.

JACQUES I. PANKOVE, Professor, B.S., M.S., University of California, Berkeley; Ph.D. (Phys.), University of Paris.

SVEN IVAR PEARSON, Professor Emeritus.

ANDREW R. PLESZKUN, Associate Professor, B.S., Illinois Institute of Technology; M.S., Ph.D. (EE), University of Illinois.

ZOYA POPOVIC, Assistant Professor, B.S., University of Belgrade, Yugoslavia; M.S., Ph.D. (EE), California Institute of Technology.

RUTH H. RAVENEL, Senior Instructor, B.S., Wheaton College, Illinois; M.S. (Comp. Sci.), Syracuse University.

JUAN A. RODRIGUEZ, Professor, B.E.E., City College of New York; M.S.E.E., New York University.

JON SAUER, Professor Adjunct; B.S., Stanford University; Ph.D. (Physics), Tufts University.

LOUIS L. SCHARF, Professor, B.S., M.S., Ph.D. (EE), University of Washington.

ERNEST K. SMITH, Professor Adjunct, B.A., Swarthmore; M.Sc., Ph.D. (EE), Cornell University.

FABIO SOMENZI, Associate Professor, Dr. Eng. (Electronic Eng.), Politecnico di Torino.

RICHARD G. STRAUCH, Professor Adjunct, B.S., University of Florida; M.S., University of Pennsylvania; Ph.D. (EE), University of Colorado.

RENJENG SU, Associate Professor, B.S., Chen-Kung University; M.S., D.Sc. (Systems Science and Math), Washington University.

JOHN C. TWOMBY, Professor Emeritus.

GUSTAV W. YAHN, Assistant Professor Emeritus.

BART J. VAN ZEGBROECK, Associate Professor, Dipl. Ing., Katholieke Universiteit Leuven; M.S., Ph.D. (EE), University of Colorado at Boulder.

MAHESH K. VARANASI, Assistant Professor, B.E.,Osmania University; M.S., Ph.D. (ECE), Rice University.

HOWARD WACHTEL, Professor, B.S., Cooper Union; M.S., Drexel Institute; Ph.D. (Biophys., Phys.), New York University.

KELVIN H. WAGNER, Assistant Professor, B.S., M.S., Ph.D., California Institute of Technology.

MIN-YEN WU, Associate Professor, B.S., National Taiwan University; M.S., University of Texas; Ph.D., University of California, Berkeley.

MATT YOUNG, Professor Adjunct, B.S., Ph.D. (EE), Institute of Optics, Rochester.

Mechanical Engineering

JOHN W. DAILY, Department Chair; Professor, B.S., University of Michigan; Ph.D. (ME), Stanford University.

LEONARD J. BOND, Research Professor, B.S., Ph.D. (Physics), City University, London.

MELVIN C. BRANCH, Professor, B.S.E., Princeton University; M.S., Ph.D. (ME), University of California, Berkeley.

LAWRENCE E. CARLSON, Associate Professor, B.S., University of Wisconsin; M.S., Dr. Engr. (M.E.), University of California, Berkeley.

RICHARD H. CRAWFORD, Professor Emeritus.

SUBHENDU K. DATTA, Professor, B.S., Presidency College (India); Ph.D. (A.Math.), Jadavpur University (India).

FRANKLIN ESSENBURG, Professor Emeritus.

THOMAS L. GEERS, Professor, B.S., M.S., Ph.D. (Appl. Mech.), Massachusetts Institute of Technology.

ALAN R. GREENBERG, Associate Professor, B.S., M.S., Ph.D. (Biomed/Materials E.), Drexel University.

JEAN R. HERTZBERG, Assistant Professor, B.S.E., University of Michigan; M.S., Ph.D., University of California, Berkeley.

HERBERT E. JOHNSON, Associate Professor Emeritus.

CHARLES H. KAHNG, Professor Emeritus.

DAVID R. KASSOY, Professor, B.S., Polytechnic Institute of Brooklyn; M.S., Ph.D.(Aero.,E.), University of Michigan.

YUN-CHENG LEE, Assistant Professor, B.S., National Taiwan University; M.S., Ph.D., University of Minnesota.

ROOP L. MAHAJAN, Professor, B.S., M.S.E., Punjab University, India; Ph.D., Cornell University.

SHANKAR MAHALINGAM, Assistant Professor, B.S., India Institute of Technology; M.S., State University of New York at Stony Brook; Ph.D., Stanford University.

DON R. MOSHER, Associate Professor Emeritus.

PHILLIP F. OSTWALD, Professor, B.S., University of Nebraska; M.S., Ohio State University; Ph.D.(I.E.), Oklahoma State University.

WAYNE P. ROGERS, Assistant Professor, B.A., University of Vermont; M.S., University of Massachusetts; Ph.D., University of Washington.

CHUNG-HA SUH, Professor, B.S., Seoul National University (Korea); M.S., Ph.D. (ME), University of California, Berkeley.

WILLIAM L. WAINWRIGHT, Associate Professor, B.S., M.S., Purdue University; Ph.D. (EMech.), University of Michigan.

PATRICK D. WELLMAN, Associate Professor, B.S., California State Polytechnic College; M.S., California Institute of Technology; Dipl.-Ing., Von Karman Institute (Belgium); Ph.D., (Aero.E.), University of Southern California.

ROBERT J. WILLIAMS, Professor Emeritus.

PAUL ZOLLER, Professor, Dipl., Swiss Federal Institute of Technology; M.S., Ph.D. (Phys.), University of Wisconsin.

Telecommunications

JOSEPH N. PELTON, Director, Interdisciplinary Telecommunication Program, B.S., University of Tulsa; M.A., New York University; Ph.D. (Poli.,Sci.), Georgetown University.

GARY L. BARDISLEY, Associate Director, B.S., (Telecommunications), University of Colorado at Boulder.

JAMES H. ALLEMAN, Associate Professor, A.B., M.A., Indiana University; Ph.D. (Economics), University of Colorado at Boulder.

FRANK S. BARNES, Professor, B.S., Princeton University; M.S., Engineer’s Degree, Ph.D. (EE), Stanford University.

FLOYD K. BECKER, Director Emeritus—ITP Laboratory, B.S., University of Colorado; M.S., California Institute of Technology.

STAN BUSH, Director, telecommunications Laboratory, B.S., University of Nevada; M.S., Rutgers University; M.B.A., Colorado State University.

RICHARD A. CHANDLER, Lecturer, B.S., M.S., University of Missouri; M.B.A., University of Denver.

GEORGE A. CODDING, JR., Professor, B.S., M.A., University of Washington; Docteur es Sciences Politiques, University of Geneva.
MARK R. CORRELL, Assistant Professor Adjunct. B.A., University of Colorado; M.A., Ph.D., University of Wisconsin.

THOMAS B. CROSS, Lecturer. B.S., M.S. (Telecommunications), University of Colorado at Boulder.

DELORES M. ETTER, Professor. B.S., M.S., Wright State University; Ph.D. (EE), University of New Mexico.

HARVEY M. GATES, Professor Adjunct. B.S., University of New Mexico; M.S., University of Denver; Ph.D. (EE), University of Denver.

HUSSEIN A. HADDAD, Professor Adjunct. B.S., M.S., Ph.D. (EE), University of Colorado.

DALE N. HATFIELD, Professor Adjunct. B.S., Case Institute of Technology; M.S., Purdue University.

STEPHENV B. JONES, Assistant Dean; Instructor. B.A., M.A., West Virginia University; Ph.D., University of Utah.

KENNETH J. KLINGENSTEIN, Director, Computing and Network Services; Professor Adjunct. B.A., Brandeis University; M.A., Ph.D. (Applied Math), University of California, Berkeley.

LEONARD LEWIN, Professor Emeritus. D.Sc. (Honorary), University of Colorado.

S. W. MALEY, Professor. B.S., M.S., Ph.D. (EE), University of Colorado.

PETER MATHYS, Assistant Professor. Dipl. El Ing., Ph.D. (EE), Swiss Federal Institute of Technology.

SANDRA B. McCRAVE, Lecturer. B.A., University of California at Los Angeles; M.A.T., Harvard Graduate School; J.D., University of Colorado at Boulder; L.L.M., Georgetown University.

POLLY E. McLEAN, Assistant Professor. B.A., Richmond College, City University of New York; M.S., Columbia University; Ph.D., University of Texas.

ROBERT A. MERCER, Professor Adjunct. B.S., Carnegie Mellon; Ph.D. (Physics), Johns Hopkins University.

GERALD A. MITCHELL, Lecturer. A.S., Boise State College; B.S., Regis College; M.S. (Telecommunications), University of Colorado at Boulder.

DAVID F. MONARCHI, Associate Professor of Management Science and Information Systems. B.S., Colorado School of Mines; Ph.D., University of Arizona.

JON SAUER, Professor. B.S., Stanford University; Ph.D. (Physics), Tufts University.

ALAN R. SEVERSON, Professor Adjunct. B.S., University of North Dakota; M.S., Purdue University.

JOHN THOMPSON, Professor Adjunct. B.S., Lehigh University; M.S., Ph.D. (EE), University of Rochester.

Engineering (General)

KAY BELL, Director, Student Programs. B.S., M.A. (Counseling and Guidance), West Virginia University.

MIRIAM K. MASLANIK, Director, B.S., M.S., Pennsylvania State University; Ph.D. (Chemical Engineering), University of Colorado.

ISIDRO RUBIO, Director, Minority Engineering Program. B.S., M.A., University of New Mexico; Ph.D. (Human and Organizational Systems), Fielding Institute.

JAMES C. SHERMAN, Director, Undergraduate Counseling. B.S., University of Northern Arizona; M.A., University of Arizona; M.A., Ph.D. (Higher Education Administration/International Relations), University of Denver.

MAHINDER S. UBEROI, Professor of Engineering. B.S., Punjab University (India); M.S., California Institute of Technology; Dr. Engr., Johns Hopkins University.
Graduate School

Graduate work at the University of Colorado began on a small scale in 1892. Following years of development, the Graduate School was organized in 1909 with a separate faculty. Each of the four campuses of the University of Colorado system now offers graduate degree programs, and a dean is in residence on each campus. The Universitywide Graduate School is administered by the vice president for academic affairs, in conjunction with the executive committee appointed by the president of the University and governed by the rules of the Graduate School.

Degrees
The Graduate School of the University of Colorado at Boulder offers instruction leading to the following advanced degrees:

- master of arts (M.A.)
- master of science (M.S.)
- master of basic science (M.B.S.)
- master of engineering (M.E.)
- master of fine arts (M.F.A.)
- master of music (M.Mus.)
- master of music education (M.Mus.Ed.)
- doctor of musical arts (D.Mus.A.)
- doctor of philosophy (Ph.D.)

M.A. degree programs include:

- Anthropology
- Art Education
- Chinese
- Classics
- Communication
- Communication Disorders and Speech Science
- Comparative Literature
- Economics
- Education
- English
- Environmental, Population, and Organismic Biology
- Fine Arts
- French
- Geography
- History
- Journalism
- Linguistics
- Mathematics
- Molecular, Cellular, and Developmental Biology
- Philosophy
- Political Science
- Psychology
- Religious Studies
- Sociology

- Spanish
- Theatre

M.S. degree programs include:

- Aerospace Engineering Sciences
- Applied Mathematics
- Astrophysical, Planetary, and Atmospheric Sciences
- Business Administration
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Science
- Electrical Engineering
- Geological Sciences
- Kinesiology
- Mechanical Engineering
- Pharmacy
- Physics
- Telecommunications

Ph.D. degree programs include:

- Aerospace Engineering Sciences
- Anthropology
- Applied Mathematics
- Astrophysical, Planetary, and Atmospheric Sciences
- Business Administration
- Chemical Engineering
- Chemical Physics
- Chemistry
- Civil Engineering
- Classics
- Communication
- Communication Disorders and Speech Science
- Comparative Literature
- Computer Science
- Economics
- Education
- Electrical Engineering
- English
- Environmental, Population, and Organismic Biology
- French
- Geography
- Geological Sciences
- Geophysics
- History
- Linguistics
- Mathematical Physics
- Mathematics
- Mechanical Engineering
- Molecular, Cellular, and Developmental Biology
- Music
- Pharmacy
- Philosophy
- Physics
- Political Science

Psychology
- Sociology
- Spanish
- Theatre

Inquiries regarding admission to graduate programs should be addressed to the graduate department in which the applicant wishes to study (see the directory for campus addresses).

RESEARCH SUPPORT

The University of Colorado at Boulder takes an active part in research in a wide variety of fields.

More than $117 million in sponsored research and programs was generated in 1991-92. The principal sources of these funds are research and training grants and contracts awarded by various agencies of the federal government. The University of Colorado’s research activity is also supported by appropriations from the state of Colorado, private foundations, and private donors.

RESEARCH INSTITUTES

The Cooperative Institute for Research in Environmental Sciences (CIRES) is jointly sponsored by the University of Colorado and the National Oceanic and Atmospheric Administration (NOAA). CIRES employs more than 350 faculty, students, and staff from a variety of scientific disciplines. Academic departments currently represented in CIRES are chemistry and biochemistry; environmental, population, and organismic biology; geography; geological sciences; electrical and computer engineering; mechanical engineering; and physics. The institute serves as a center for multidisciplinary collaboration of environmental scientists from Boulder and throughout the world. A visiting fellowship program enables scientists from other institutions working in these fields to spend time at CIRES.

CIRES research programs involve theoretical studies, laboratory experimentation, and field investigations. Field studies are conducted along the Front Range and in the mountains of Colorado, in the Aleutian Islands, the Arctic and Antarctic regions, Hawaii and various Pacific atolls, and elsewhere. Results of this research bear on such
practical societal problems as destruction of the Earth’s ozone shield by pollutants, acid deposition in rain and snow, degradation of air and water quality, toxic waste treatment, and earthquake prediction.

Current CIRES research programs, in which approximately 90 graduate students are involved, can be loosely grouped into four areas. In environmental chemistry and biology, ongoing research involves measurements of constituents and reactions in the atmosphere, kinetics of reactions in the stratosphere and troposphere, gas and liquid chromatography, mass spectrometry, microcomputer interfaced instrumentation, metal complex chemistry, aerosol chemistry, and leaching of toxic wastes from mining. Scientists and students in atmospheric and climate dynamics presently study air-sea interactions, dynamics of the atmospheric boundary layer, ocean dynamics, ice nucleation physics, cryosphere-climate interactions, ice sheet dynamics, and contemporary and paleoclimatology.

Current research in solid earth geophysics includes earthquake prediction and earthquake physics, plate tectonics, seismic wave propagation, nuclear test discrimination, rock deformation and fracture, strains and tilts associated with Earth tides and secular deformation, and normal modes of vibrations of the Earth.

In a major step to expand the research capabilities in remote sensing of the environment, CIRES established the Center for the Study of Earth from Space to provide a focus for the development and application of modern remote sensing techniques to research in all aspects of the environmental sciences. CIRES also administers the Center for the Study of Global Change. Scientists affiliated with this center conduct collaborative studies aimed at understanding anthropogenically induced global changes.

The Institute of Arctic and Alpine Research (INSTAAR) is an interdisciplinary research institute with ongoing programs in the Rockies, Arctic Canada, Alaska, Spitsbergen, the southern Andes, and other locations. It operates the Mountain Research Station and publishes the quarterly journal, *Arctic and Alpine Research*. In addition to about 15 research faculty, faculty from environmental, population and organismic biology, geological sciences, geography, anthropology, and other departments are associated with the institute, as are about 30 graduate students from various departments. Disciplines within INSTAAR include plant and animal ecology, paleoecology, palynology, geochronology, climatology, glaciology, and glacial geology. Current research emphases include interdisciplinary programs on long-term ecological research on the Colorado alpine ecosystem, ecology of the Alaskan North Slope, quaternary studies, especially in regard to the mode of glaciation and deglaciation, and a center for geochronological research, which is involved in amino acid, fission-track, thermoluminescence and potassium/argon dating, stable isotope geochemistry, dendrochronology, and dendroclimatology.

The Mountain Research Station, located at 2,900 m (9,500 feet) in the Front Range of the Rocky Mountains and 25 miles west of the Boulder campus, is operated for the University by INSTAAR. The station, a national center for field studies in the biological and physical sciences, is especially well known for long-term ecological, climatological, and atmospheric research. The facility has resident scientific and maintenance staff and provides lodging throughout the year and cafeteria service during summer and winter teaching programs. Classrooms, laboratories, a library, herbarium, darkroom, environmental chemistry and dendrochronology laboratories, and microcomputers are available in the John Marr Alpine Laboratory, the center of activity at the station.

The station offers researchers easy access to a variety of terrestrial and aquatic habitats at altitudes from 1,500 m to 3,800 m. A wide variety of courses is offered in summer and winter in areas such as plant and animal ecology, climatology, geomorphology, and hydrology. The station maintains the mountain climate program in support of the environmental field research conducted in the area. Weather observing stations have been operated since 1952 at four altitudes between 2,200 m and 3,750 m, and additional stations are established as required by new projects. The Mountain Research Station is a member of the newly formed Associated Field Stations of Colorado.

The Institute for Behavioral Genetics (IBG) is an organized research unit whose mission is to conduct and facilitate research on the genetic bases of individual differences in behavior and to conduct research training in this interdisciplinary area. This rapidly developing field brings to bear upon behavioral research the perspectives of biochemical genetics, cytogenetics, developmental genetics, evolutionary genetics, molecular genetics, pharmacogenetics, and quantitative genetics. Facilities are available for research on a variety of organisms, including humans, laboratory mice, and nematodes. Institute faculty currently are applying the concepts and tools of behavioral genetics to such diverse areas as aging, alcoholism, cognitive development, drug addiction, learning disabilities, neurological diseases, personality, and psychopathology.

The Institute of Behavioral Science (IBS) is an interdisciplinary research organization serving faculty and graduate students in the behavioral sciences. Its principal functions are to conduct and sponsor research programs involving two or more of the behavioral sciences and related fields; to provide research facilities, equipment, and administrative services for participating faculty; to facilitate graduate research training; and to disseminate information about its activities and findings to scientific groups and institutions.

The institute's principal administrative units conduct research in the areas of problem behavior, population processes, environment and behavior, and political and economic change. Included in IBS is the Social Science Data Analysis Center, which provides general user assistance in social science research and statistical computing.

The Institute of Cognitive Science (ICS) was established to promote interdisciplinary research in the fields of psychology, computer science, linguistics, philosophy, and other cognitive sciences. Its major research programs fall into five areas: natural language processing; human-computer interaction and knowledge-based systems; connectionist modeling; human information processing and skilled performance; and judgment and decision making. These programs include the use of artificial intelligence techniques and cognitive simulations in gaining an understanding of basic cognitive processes as well as educational and industrial applications.

The Joint Institute for Laboratory Astrophysics (JILA) was established in 1962 by an agreement between the University and the National Bureau of Standards (now the National Institute of Standards and Technology, or NIST). Located in the Duane Physics complex on the Boulder campus, the institute provides facilities for advanced research and graduate training in a number of areas involving atomic and molecular physics and astrophysics. These areas include both theoretical and experimental studies of atomic interactions, spectroscopy and line broadening, chemical physics, laser physics and laser spectroscopy, precision measurements, new geophysical measurement techniques, stellar atmospheres and radiative transfer, stellar interiors, solar physics, binary X-ray sources, and the interstellar medium and
galactic astronomy. Senior scientific staff are associated with the quantum physics and the time and frequency divisions of NIST, and with the University's physics, chemistry, and astrophysical, planetary, and atmospheric sciences departments. A brochure giving more detailed information is available on request from the institute.

The Laboratory for Atmospheric and Space Physics (LASP) is an established center for basic theoretical and experimental research in planetary, atmospheric, and solar physics. LASP also conducts research to explore the potential uses and development of space operations and information systems, as well as to develop scientific instrumentation.

Students and faculty from the Departments of Astrophysical, Planetary, and Atmospheric Sciences; Physics; Geological Sciences; the College of Engineering and Applied Sciences; and the Space Grant College can pursue their research interests under the auspices of the laboratory. LASP has experiments on several NASA spacecraft: on the Voyager mission a photopolarimeter is studying the atmospheres of Jupiter, Saturn, Uranus, and Neptune; and the Pioneer Venus mission carries a programmable ultraviolet spectrometer that is examining the Venusian atmosphere. LASP scientists are making extensive use of the Hubble Space Telescope to study the surface and atmospheric changes on Mars, and are taking part in the SOLSTICE mission, which provides information about the Sun's influence on the Earth's atmosphere. LASP has developed a unique data handling system for use with these space experiments as well as with earlier experiments such as the Mariner 9 Mars orbiter and the Orbiting Solar Observatory-8.

LASP is studying the application of its spacecraft operations and data management concepts to several NASA missions, including the space station. Laboratory experiments, such as a major program to develop sensitive, new photovoltaic array detectors for ground-based and space astronomical observations, are also pursued on a continuing basis. Active sounding rocket programs complement the research in planetary atmospheres, atmospheric processes, and solar physics.

**RESEARCH CENTERS**

The Business Research Division is responsible for the organized research activities of the College of Business and Administration, which are conducted through seven organizations. The Center for Recreation and Tourism Development supports research in recreation and tourism and conducts tourism and recreation programs in Colorado and adjoining states. The Center for Applied Artificial Intelligence focuses on the state-of-the-art artificial intelligence tools and methodologies applied to practical business and economic problems. The Technology and Innovation Management Research Center conducts research on issues related to managing high technology organizations and collaborates on projects with high tech firms. The International Center for Energy and Economic Development conducts international conferences on energy resource issues and publishes books, monographs, and a journal on these topics.

The Bureau of Business Research performs contract research and provides the Colorado business community with information and special studies on the state's economy and business problems. This unit supervises the activities of the CU Business Advancement Center and the Rocky Mountain Trade Adjustment Assistance Center. These centers provide management assistance, business information, and consulting services to small- and medium-sized businesses in the region.

The Center for Advanced Decision Support for Water and Environmental Systems (CADSWS) applies artificial intelligence techniques to water and environmental decision making and produces state-of-the-art systems. CADSWS is the U.S. Bureau of Reclamation's National Center for Research and Development of Advanced Decision Support Systems.

The Center for Astrophysics and Space Astronomy (CASA) is a research center within the Department of Astrophysical, Planetary, and Atmospheric Sciences. CASA provides a focus for campuswide expertise in experimental, observational, and theoretical astrophysics, including solar and stellar physics, interstellar medium studies, galactic and extragalactic astrophysics, and cosmology. In addition to the International Ultraviolet Explorer Satellite Regional Data Analysis Facility operated by CASA for NASA, staff members carry out research involving X-ray, far-UV, optical, infrared and radio satellite and ground-based facilities with national and international collaboration. Additional CASA staff are involved in one of the astrophysical theory centers funded by NASA in 1985.

CASA's experimental effort includes design studies of the LYMAN (far-ultraviolet spectroscope explorer) satellite and two sounding rockets for ultraviolet and high-energy astrophysics. The ultraviolet rocket successfully observed Supernova 1987A in 1988, and future UV and X-ray flights are planned to observe hot stars, interstellar matter, quasars, and cosmic X-ray sources. CASA plans to expand in three areas: development of a comprehensive "panchromatic" astronomical data analysis center; creation of a new, large optical telescope facility; and enhancement of space and ground-based astronomy instrumentation in several spectral regions.

The Center for British Studies, the only unit of its kind in the country, promotes research in all aspects of British culture, history, and contemporary life. Its resources include the outstanding research collections of the University of Colorado Libraries, including a wide range of microfilmed copies of original materials from Britain. Some of these materials were copied exclusively for CU-Boulder. The center is the leading research facility in British studies in the Rocky Mountain/ high plains area.

The center sponsors visiting lecturers, colloquium series, and conferences, and serves as a gathering point for scholars and students in the region. It welcomes outside users of the research collections and works to continue developing the research base. It also cooperates with community groups in sponsoring activities dealing with British politics, business, and the arts.

The Center for Comparative Politics promotes and provides institutional support for cross-national research on the political institutions, processes, and policy issues of contemporary nations. A major focus of research is the politics of ethnicity and intergroup conflict in plural societies. Other focuses are the development and testing of data-based models of violent conflict and political crises, and the comparative study of public policy in advanced industrial societies.

The Center for Economic Analysis formulates and conducts research projects in economics and related fields in order to further knowledge about the nature and behavior of economic variables, to develop and refine research methodology, and to provide decision makers in both the public and private sectors with data and techniques to improve the quality of their decision making. The center conducts research under contract and grant arrangements with governmental and private agencies. Economics graduate students participate as research assistants to gain professional research experience and to supplement their formal education.

The Center for International Relations serves as a base for international studies and research at the University. Its purpose
is to encourage individual and cooperative research in the field of international relations. The center also promotes the teaching of international relations at the graduate and undergraduate levels within the Department of Political Science and the College of Arts and Sciences. Support has been received from the National Science Foundation, the National Endowment for the Humanities, the International Institute for Communications, and UNESCO, as well as the College of Arts and Sciences and the Institute of Behavioral Science at the University of Colorado at Boulder.

The Center for Labor Education and Research (CLEAR) conducts labor education programs and research in various aspects of labor relations. Noncredit courses are offered for members of organized labor as the University's service to the labor community of Colorado. Graduate students may attend conferences with staff members and use available library facilities. CLEAR staff members also teach credit courses in other schools and colleges.

The Center for Public Policy Research stresses the integration of knowledge and practice to improve public policy. The research program includes policy analyses in such areas as energy, natural resources, poverty, growth management, and economic development, as well as the development of theory and methods for the policy sciences. The center also supervises the public policy curriculum for the M.A. in political science (public policy option).

The Center for Space and Geosciences Policy promotes research and teaching in two related areas: space policy, which encompasses the legal, political, commercial, economic, and international issues arising from the exploration and use of outer space; and geosciences policy, which focuses on those issues that arise from the understanding of the Earth as a closely integrated system, and from learning how people and their activities can change that system. For example, the global climate changes that occur as a result of increased atmospheric carbon dioxide may have socioeconomic implications requiring further study. These policy areas are linked in a variety of ways because much of our understanding of the Earth is a result of remote sensing from space.

Additional areas of interdisciplinary interest include relations between government and private enterprise in space, the utilization of lunar and other celestial resources (including related ethical issues), space arms control, jurisdictional determination in space, economic impacts of climate change, and responses to other long-term Earth systems changes, such as changes in ocean levels.

The Center for the Study of American Politics provides institutional support for research on political behavior, institutions, processes, and policymaking in the United States. The center is particularly concerned with the analysis of political change in the United States. The center also coordinates an undergraduate internship program on state politics and promotes the training of graduate students as research scholars in the area of U.S. politics.

The Center of Atmospheric Theory and Analysis (CATA) involves collaboration among researchers in the Department of Astrophysical, Planetary, and Atmospheric Sciences (APAS); the National Center for Atmospheric Research (NCAR); and the National Oceanic and Atmospheric Administration (NOAA). Research activities focus on theoretical and observational aspects of the Earth's atmosphere, encompassing a broad spectrum of phenomena, such as planetary wave propagation, tropical circulations and convection, gravity waves, cyclogenesis, photochemistry and transport in the upper atmosphere, climate dynamics, equatorial waves, and satellite remote sensing.

CATSA, which is headquartered in the APAS department of atmospheric sciences laboratory, operates a Pyramid 90X super minicomputer, an IRIS three-dimensional graphics workstation, and a SUN-based image analysis system, all linked to the University computing network and to NCAR's network. Numerical calculations are carried out locally and at the NCAR supercomputing facility at which NCAR's extensive atmospheric data base is available. The center also operates a Unidata satellite receiver, through which a variety of atmospheric data, including both real-time transmissions and archived products, are available. In addition to serving as a link among investigators at the University, NCAR, and NOAA, CATSA supports several visiting research appointments, enabling short- and long-term interactions with atmospheric sciences from around the world.

The Engineering Research Center coordinates the research activities of the College of Engineering and Applied Science. The center has formed a number of interdisciplinary research centers that augment discipline-based research in traditional academic fields. These centers conduct research in collaboration with industry and national laboratories.

Areas in which centers have been or are being formed include: optoelectronic computing systems, parallel processing, geotechnical engineering, astrodynamics and remote sensing, space structures and control, low-gravity fluid mechanics, and transport phenomena, energy management, artificial intelligence, computer-aided design of monolithic microwave circuits, decision support for water and environmental systems, applied mathematics, commercialization of space, space construction, and the study of Earth from space.

In addition to the interdisciplinary centers, the Engineering Research Center helps coordinate nearly 200 other projects, most conducted by individual faculty members or groups of faculty and funded by governmental agencies or industry. Graduate students and some undergraduate students actively participate in nearly all of these projects.

Research activities in aerospace engineering include experimental and computational fluid mechanics, astrodynamics, orbit determination, remote sensing, control systems engineering and design, space structures and control, space-station design and construction, and neuro-biosystems engineering.

Key activities in chemical engineering include membrane and thin-film science, biochemical engineering and biotechnology, surface science, process control, enhanced oil recovery, coal gasification and combustion, and cryogenics.

Research projects in the field of civil engineering include those in geotechnical engineering, structural mechanics and engineering, building systems engineering, construction management, and environmental and water-resources engineering.

Research in computer science includes artificial intelligence, automata, theoretical computer science, parallel and distributed processing, numerical optimization, parallel processing, systems, data base design, and software engineering.

Optoelectronics and optical computing systems are key research interests in electrical engineering, as are computer design and simulation, VLSI design, electromagnetic theory, solid-state devices and materials, microwave and optical guided wave structures, antennas and propagation, and robotic control systems.

Activities in mechanical engineering include combustion science, convective heat transfer, polymer science/engineering, nondestructive structural evaluation, wave propagation and scattering, and fluid mechanics.

The Joint Center for Energy Management (JCEM) is dedicated to excellence in energy-related education, research, and
technical assistance. Established in cooperation with Colorado State University, JCEM programs focus on the design and technology of cost-effective, energy-efficient buildings and industrial processes. Included is a major, state-of-the-art HVAC laboratory designed to test system performance under various climatic and load situations, to develop diagnostic expert systems, and to perform research on control technologies.

The Lab for Policy Studies is a unit within the School of Education that provides a focus for the educational policy activities of faculty and students. Its activities include educational policy studies and projects, instructional programs in educational policy at the graduate level, service to governmental organizations, and coordination with other policy units on campus.

The McGuire Center for International Studies, organized within the Department of Economics, is dedicated to research and graduate training in a broad range of international topics. Specialties of faculty associated with the center include international trade and finance, monetary theory and policy, monetary history and reform, and economic development and macroeconomics. Research on questions concerning international debt and trade relations in the Pacific region are given particular emphasis and support. The center offers opportunities for students and faculty interested in interdisciplinary work between international economics and areas such as international politics, conflict and peace studies, and international business.

Laboratories and Special Equipment

Laboratories, special classrooms, and specialized equipment are essential to graduate training and research. Some of the special facilities at the University of Colorado are described in the following paragraphs.

Aerospace engineering sciences laboratories have the following facilities for instruction and research: three low-turbulence wind tunnels and several hotwire anemometers, including laser Doppler anemometers for turbulence, acoustic, and unsteady aerodynamic research; a laboratory for the study of the hydrodynamics of superfluid helium and geophysical fluid dynamical modeling; and bioengineering laboratories for studies in cardiac physiology, neurophysiology, neurochemistry, closed ecological life support systems, and microgravity bioprocessing. Computer laboratories are equipped for use in upper-division and graduate courses and for graduate research, with special capabilities for computer-aided design, neural network modeling, satellite image processing, and space structures dynamics and controls. A NOAA satellite receiving station is available to the department for use in teaching and research.

The Department of Astrophysical, Planetary, and Atmospheric Sciences emphasizes studies of theoretical and observational astrophysics (including the sun), the atmospheres of the Earth and other planets, geophysical and astrophysical fluid dynamics, space physics, and plasma physics (including controlled thermonuclear fusion).

The department operates the Sommers-Bausch Observatory and laboratories in experimental fluid dynamics and plasma physics. Also used are observational facilities of Cerro Tololo Inter-American Observatory in Chile; the Kitt Peak National Observatory in Tucson, Arizona; the Very Large Array (VLA) in New Mexico; and many NASA astronomical and planetary satellites. A considerable part of the teaching and research is conducted in collaboration with the Laboratory for Atmospheric and Space Physics, the Joint Institute for Laboratory Astrophysics, the National Center for Atmospheric Research (including the High Altitude Observatory), National Oceanic and Atmospheric Administration (e.g., Space Environment Laboratory, Astronomy Laboratory), and the Cooperative Institute for Research in Environmental Sciences.

Chemical engineering research facilities are extensive and modern. Nearly all research equipment is interfaced to microcomputer systems for automated data collection, monitoring, and control.

Studies in heterogeneous catalysis and surface science use the four ultrahigh vacuum systems located in the chemical engineering laboratories. These contain three Auger spectrometers, an X-ray photoelectron spectrometer (XPS, ESCA), two low-energy electron diffraction (LEED) systems, a secondary-ion mass spectrometer (SIMS), two high-resolution electron energy loss spectrometers (HREELS), three mass spectrometers, a scanning tunneling microscope, and associated surface analysis tools. These systems have attached atmospheric pressure chambers for sample preparation and reaction on well-defined surfaces. All systems are interfaced to computers. Heterogeneous catalysis experiments on supported metal catalysts also use reactor systems equipped with a gas chromatograph, and another quadrupole mass spectrometer. Both transient and steady-state reactions can be carried out in this equipment. A static chemisorption system is used to measure surface areas.

Specially designed equipment is used to study combustion and pyrolysis in solid fossil fuels. A high voltage cell has been constructed to investigate electrocatalytic oxidation in coal. An infrared thermal video imaging camera is available to monitor the propagation of combustion, pyrolysis, and electrocatalytic fronts noninvasively. A microprocessor controlled muffle furnace is employed for laboratory core characterization studies of the overburden from underground coal gasification sites.

Process control studies make extensive use of the department's real-time computer systems, and studies are carried out on a variety of experimental units. A four-meter-high fluidized bed with high-speed radiation densitometer and pressure transducers is used. In addition, a distillation column, packed-bed catalytic reactor, and heat exchanger are used in process control studies.

The suspension fluid dynamics laboratories include hollow-tube and plate-and-frame crossflow microfilters, two sedimentation/flight extinction devices, two continuous inclined settlers, an Ethene 180XY particle size analyzer, a flocculation reactor, a disk centrifuge, and a microphotography system. Most of the experiments are interfaced with microcomputers.

There is a complete core flooding laboratory for work in enhanced oil recovery, leaching of oil shales, and modified in situ oil shale studies. Spinning drop tensiometers, a dynamic Langmuir trough, and a Wilhelmy plate apparatus are used for fluid interface characterization. Oil shale leaching experiments simultaneously measure dynamic leaching and porous media properties. A porosimeter is used to determine porosity distributions. An electromechanical vibration system for particle dynamics studies is also available.

Membrane studies use a casting machine for fabrication of asymmetric membranes. A microbalance with a computer interface is employed for gravimetric studies of evaporative membrane casting. A high pressure flow loop is used for measuring the permeation characteristics of both flat sheet and hollow fiber membranes. Both vacuum and controlled atmosphere high-temperature ovens are available for membrane annealing studies. A Perkin-Elmer differential scanning calorimeter is available for determining the glass transition temperature as well as other properties of polymeric membrane materials. An AC impedance technique is used to study ion-conducting membranes. Some studies on facilitated transport are
also carried out at the National Institute of Standards and Technology in Boulder.

The biotechnology research laboratories are equipped with ten highly instrumented and controlled fermenters in sizes ranging from 1 to 20 liters, two high-performance liquid chromatographs, a gas chromatograph, a UV-vis scanning spectrophotometer, two laminar flow hoods, two autoclaves, an automatic glucose and lactate analyzer, a biofreezer, three shaking incubators, a CO2 incubator, a sonicator, centrifuges, and other standard equipment for conducting fermentation research on bacterial yeast, mycelial, and mammalian cell cultures.

The bioengineering laboratory is also equipped for biophysical measurements. This equipment includes a variety of optical instruments, a phase contrast and polarizing microscope, a microscope video camera, a Cary spectrophotometer, a plant growth chamber, autoclave, and a sterile room.

A National Science Foundation specialized engineering research equipment grant has enabled the department to purchase a Cambridge Stereoscan 250 MK3 scanning electron microscope. A small angle X-ray scattering camera for observing crystallinity in polymers has been obtained from a similar NSF grant. The department also has an RCA transmission electron microscope. The one-million volt transmission electron microscope in the Department of Molecular, Cellular, and Developmental Biology is also used in the membrane and surface science research. The regional nuclear magnetic resonance (NMR) facility is also available.

Civil, environmental, and architectural engineering research interests and facilities include extensive research laboratories for use in the areas of structural mechanics and geotechnical engineering. Excellent facilities are available for research in water quality, environmental engineering, hydrodynamics, hydrology and water resources as well as in construction management and building energy engineering. Unique to the department are a 10 g-ton and a 400 g-ton centrifuge for geotechnical, hydraulic and structural model studies. The department has numerous computing facilities and is the college’s largest computer user.

Current research covers such topics as water and wastewater treatment, groundwater hydrology, hydraulic and hydrologic modeling, composting of wastes and activated sludge processes, research on construction contracts using artificial intelligence, design of construction operations, risk analysis, and construction management. The area of building systems engineering includes research in energy conservation, solar applications and lighting systems. Offshore structures, centrifugal modeling, excavations, tunneling, mine waste planning, and rock and soil mechanics are being studied. In structures, research includes focus on buckling, finite element techniques, reinforced concrete, earthquake behavior, masonry structures, and prestressed concrete.

The Department of Computer Science has built a network (10 Mbit/s Ethernet using the TCP/IP protocol) of computers to support faculty/student research and graduate instruction. The network has grown to include machines in most departments of the College of Engineering and Applied Science. It is managed and operated by Computing and Network Services using computer science students. These students gain valuable real-world experience and find themselves well prepared for the job market.

The network is configured as follows:

- **Aerospace engineering**
  - Pyramid 90x
  - 3 SUN 5 workstations
  - 2 microVAX IIIs

- **Applied mathematics**
  - Pyramid 90x
  - 6 SUN 3 workstations

- **Astrophysical, planetary, and atmospheric sciences**
  - Pyramid 90x
  - Silicon Graphics Iris

  - 12 SUN 3 workstations
  - VAX 11/785

A wide variety of terminals, graphics terminals, line printers, plotters, and letter quality laser is readily accessible to students.

In addition, instructional support for computer science students is excellent. Laboratories of small two-user UNIX machines (AT&T 3B2) support undergraduate courses; Pyramid 90x and VAX 11/785 mini computers support graduate courses. In addition, an artificial intelligence laboratory of 30 HP bobcats and a networking laboratory of 15 SUN workstations is available to students.

**Electrical and computer engineering** special equipment and facilities include a class 1,000 clean room facility for epitaxial growth and fabrication of microwave and optical devices; high-vacuum and vacuum deposition equipment for thin-film research; an integrated circuits laboratory; ion implantation equipment; crystal growing facilities; a modern systems laboratory; undergraduate laboratories in circuits, electronics, and energy conversion; a holography and optics laboratory; numerous special purpose computers; mini- and microprocessors and a computer laboratory; a roof-mounted antenna range; an anechoic chamber for studying propagation effects at microwave frequencies; a special microscope for laser manipulation of microorganisms in situ; and a biomicroscope laboratory.

The department has a large variety of computing equipment to support its research and instructional activities. Most machines are connected via Ethernet, which also provides access to a large number of shared computing resources on campus. Department facilities include over 75 minicomputers and workstations, including SUN and Hewlett-Packard 9000 series systems.

**Mechanical engineering** laboratories provide for experimental studies of thermal and mechanical systems. Typical areas of study include heat transfer, fluid and solid mechanics, mechanical behavior of materi-
als, combustion, and prosthetic device performance.

The combustion laboratory contains instrumentation for velocity, temperature, and composition measurements in chemically reacting flows. Included are systems for gas chromatography, laser-induced fluorescence spectroscopy, laser absorption spectroscopy, laser schlieren, laser interferometry, and laser doppler anemometry. The laboratory is also equipped for computer control of the instrumentation and automatic data reduction including graphical capabilities.

The recently renovated materials laboratory is well equipped for the measurement of the physical and mechanical properties of polymers and polymeric matrix composites. Major facilities include a pressure dilatometer with capabilities to 200 MPa and 450°C for determination of solid and melt equations of state, a forced-oscillation dynamic mechanical analyzer as well as a large capacity torsion pendulum for measurement of modulus and damping behavior, a modern servohydraulic mechanical test system for the analysis of tensile and relaxation properties, and a uniquely configured scanning electron microscope for morphological studies. In addition, standard characterization equipment such as differential scanning calorimetry and thermogravimetric analysis is available.

The Fluid Mechanics Laboratory is equipped with several basic facilities for experimentation in fluid systems. The Stokes flow apparatus is devoted to measurement of drag in highly viscous fluid flow using laser-timer instrumentation. The Taylor-Couette apparatus incorporates thermistor sensors, laser sheet visualization, and computer data acquisition to study instabilities of fluid motion between rotating cylinders with a radial temperature gradient. A humidity-controlled room provides an environment for studying the stability of rotating capillary rivets. A Ling vibration exciter provides the basis for g-jitter experiments on the stability of differentially heated fluid layers. Other modern instrumentation techniques available are hot-film anemometers for velocity measurement, conductivity probes for density stratification measurements, capacitance-controlled oscillators for amplitude measurement of propagating capillary waves, and high sensitivity piezometric gages for shock wave detection.

The Center for Space Structures and Controls (CSSC), which draws on faculty from mechanical engineering, offers a state-of-the-art computer laboratory. Its configuration calls for a network of scientific workstations—three SUN 3/50s and one SUN 3/110 with color graphics capabilities—which access a common file server. The workstations function as computational nodes that furnish powerful but inexpensive processing capacity of main memory to their users. The common file server furnishes a central data base of software, which facilitates course work, teaching, and research. The common operating system for the CSSC computer laboratory is UNIX 4.2bd. This system has been enhanced with remote file access and networking capabilities that allow the computational nodes to operate as a cluster.

This cluster is linked through a gateway Ethernet port to the Engineering Research Center network (ERCnet) of UNIX-based machines operated by the computer science department. Connection to this network allows CSSC computer laboratory users to access other college-owned machines, such as the multiprocessors Encore Multimax, Alliant/EX8, and the Hypercube iPSC. It also allows access to the Computing and Network Services cluster via remote log-in and reaches other users by electronic mail. This network is linked to UUCPnet, CSnet, and NSFnet to access off-campus facilities, such as the Princeton and Cornell supercomputer centers. The CSSC computer laboratory also uses the computing power of the CRAY2 at NASA-AMES, the CRAY X-MP/24 at NRL, and the iPSC-128 at Los Alamos.

The Automated Assembly Laboratory is equipped with an IBM 7545 SCARA assembly robot, programmed by an IBM PC. This robot has four proportional degrees of freedom, plus on/off grasp. A digital input/output interface allows individual experiments to be quickly set up and modified. An IBM PC-AT with digitizing tablet and 6-pen plotter is available for computer-aided design using CADKEY. In addition, several prototype robots, including an IBM Pompano-type and a Prab, are available for individual research projects.

Other specialized equipment includes Instron testing machines, a diffused light polariscope, a digital storage/dual beam oscilloscope, metallographs, and shaker tables.

Electrical and mechanical equipment is available for work in servo-mechanisms, modeling presses, and fabrication equipment for plastics technology: modular analog computer units; high-speed photographic equipment; a precision microscope for grain examination land film reading; time-sharing computer terminals; a servo-analyzer; an 8-track instrumentation tape recorder; and special equipment for bioengineering studies of skeletal systems and prosthetic devices.

The Nuclear Physics Laboratory, of the Department of Physics, conducts experimental and theoretical research in medium-energy nuclear physics. The work in theory is directed primarily to the study of relativistic effects in nuclear interactions and to developing advanced theoretical methods for understanding nuclear reaction mechanisms. Experimental work is focused on pion-nucleus interactions and charge-exchange reactions in the energy range of 100-1000 MeV. The laboratory is well-equipped with office space, computer facilities, and shop areas for the preparation of experimental apparatus. Graduate students and faculty of the laboratory participate in experiments carried out at the Los Alamos Meson Physics Facility, at Tri-University Meson Physics Facility (TRIUMF) in Vancouver, B.C., at the Indiana University Cyclotron Facility and elsewhere. Support for the research effort of the laboratory is provided by the U.S. Department of Energy. Research assistantship support is available for graduate student research in both theoretical and experimental medium-energy nuclear physics.

The High Altitude Observatory (HAO) is an internationally recognized center for the study of solar, solar-terrestrial, and related astrophysics with emphasis on the interrelationships between these areas. Established in 1940, HAO now has its central laboratory and administrative offices in the National Center for Atmospheric Research (NCAR) building in south Boulder.

HAO is a part of NCAR, which is sponsored by the National Science Foundation. HAO's extensive research facilities are used by graduate students pursuing advanced studies in astrophysical, planetary, and atmospheric sciences and physics.

ACADEMIC EXCELLENCE

Scholarships and Fellowships

The University of Colorado administers various forms of financial assistance for graduate students: fellowships, fellowships for protected-class individuals, traineeships, scholarships, research and teaching assistantships, and a number of awards from outside agencies.

Assistance offered by the Graduate School includes University of Colorado fellowships, protected class fellowships, chancellor's graduate fellowships, nonresident tuition differential scholarships, Patricia Roberts Harris fellowships, and Colorado graduate need grants.
University of Colorado fellowships are awarded to entering and continuing regular degree graduate students. These are awarded to entering students on the basis of academic promise and to continuing students on the criteria of academic success. The fellowships consist of a stipend or a full fellowship, including a tuition waiver. Students holding these fellowships must reapply each year to their departments for renewal.

Protected-class fellowships are awarded in the same manner as University fellowships; however, eligibility is limited to minority students and women in fields in which they have been traditionally underrepresented. GRE scores are not required for applicants.

The Chancellor's Graduate Fellowship Program was instituted in 1984-85 to recruit the most outstanding students for graduate study at the University of Colorado. Selected students receive a stipend of $15,000 for two years and a full waiver of all tuition and fees. To be considered for this award, students must be entering a master's or doctoral program and be nominated by their department.

Nonresident tuition differential fellowships are awarded to entering out-of-state and foreign students to encourage enrollment in graduate programs at the University. More than 60 of these fellowships, equal to the difference between Colorado resident and nonresident tuition, are awarded by the Graduate School to students nominated by their major department.

Patricia Roberts Harris fellowships are presently awarded to minority and protected class students in selected departments. Students should indicate their interest in being nominated for this award when applying for admission. Students receive a stipend and a waiver of all tuition and fees for a period of three years. These fellowships are awarded to specific departments by the U.S. Department of Education.

Additional fellowships are available from private sources or supplemental funds. Fellowships, traineeships, and scholarships are also offered by certain departments. Applications for financial support are due in the departments before the announced deadlines.

For further details, contact the fellowship coordinator in the Graduate School.

ACADEMIC STANDARDS

Quality of Graduate Work

Although the work for advanced degrees is specified partly in terms of credit hours, an advanced degree will not be conferred merely because a student completes a specified period of residence and passes a given number of courses. A student should not expect to gain from formal courses all the training, knowledge, and grasp of ideas necessary to meet the requirements for an advanced degree.

A student is required to maintain at least a B (3.00) average in all work attempted while enrolled in the Graduate School.

For the Ph.D., a course mark below B is unsatisfactory and will not be counted toward fulfilling the minimum requirements for the degree. For a master's degree, a course mark below C is unsatisfactory and will not be counted toward fulfilling the minimum requirements for the degree.

A student who fails to maintain a 3.00 grade point average or to make adequate progress toward completing a degree will be subject to suspension from the Graduate School upon consultation with the major department. The final decision on suspension will be made by the dean of the Graduate School.

Ethics

Students are expected to adhere to the highest codes of personal and professional ethics. Students who do not meet these standards may be dismissed by the dean upon recommendation of the graduate program director.

ADMISSION AND ENROLLMENT POLICIES

Admission Requirements

A student who is granted admission must reflect in a moral and ethical sense a personal background acceptable to the University. The University reserves the right to deny admission to applicants whose total credentials reflect an inability to assume those obligations of performance and behavior deemed essential by the University and relevant to any of its lawful missions, processes, and functions as an educational institution.

Admission to the Graduate School is not admission to candidacy for an advanced degree. A student who wishes to become a candidate for a degree must make special application at the time and in the manner prescribed by the requirements for the degree sought. A student may be admitted to the Graduate School as either a regular degree student or a provisional degree student.

Regular Degree Students

Qualified students are recommended for admission to regular degree status by the appropriate department. In addition to departmental approval, an applicant for admission as a regular degree student must:

1. Hold a baccalaureate degree from a college or university of recognized standing, or have done work equivalent to that required for such a degree and equivalent to the degree given at this University.
2. Show promise of ability to pursue advanced study and research, as judged by the student's previous scholastic record.
3. Have had adequate preparation to enter graduate study in the chosen field.
4. Have at least a 2.75 (2.00 - C) undergraduate grade point average (for engineering, 3.00).
5. Meet additional requirements for admission established by major departments.

Pass/Fail Grades

To permit a meaningful evaluation of an applicant's scholastic record, no more than 10 percent of the credit hours relevant to the intended field of graduate study shall have been earned with pass/fail grades, or more than 20 percent overall. Applicants whose academic record contains a larger percentage of pass/fail credits must submit suitable additional evidence that they possess the required scholastic ability. An applicant who does not submit satisfactory additional evidence may be admitted only as a provisional student.

PROVISIONAL DEGREE STUDENTS

Students who do not meet the requirements for admission as regular degree students may be recommended for provisional degree status by their major department. With the concurrence of the dean of the Graduate School, these students are admitted to a probationary term of either one or two semesters of full-time study or the equivalent for part-time students. At the end of the specified probationary period, provisional degree students must be either admitted to regular degree status or dismissed from the graduate program to which they were provisionally admitted.

Credit earned by persons in provisional degree status may count toward a degree at this University.

According to the terms of their provisional admission, provisional degree students are required to maintain a 3.00 grade point average or higher during each semester or summer session on all work taken, whether or not it is to be applied toward the advanced degree sought. Students who fail to maintain such a standard of performance will be subject to suspension from the Graduate School.

To be changed to regular degree status from provisional status, a student must maintain a 3.25 grade point average in 12 hours of graduate course work.
SENIORS AT THE UNIVERSITY OF COLORADO

A University of Colorado senior who has satisfied the undergraduate residence requirement and does not meet more than 6 semester hours of advanced subjects to meet the requirements for a bachelor's degree may be admitted to the Graduate School.

A University of Colorado senior enrolled in the College of Engineering and Applied Science who needs no more than 18 semester hours to meet the requirements for a bachelor's degree may be admitted to the Graduate School, but is not eligible for financial aid, scholarships, or fellowships as a graduate student until the equivalent of the minimum requirements for the bachelor's degree have been satisfied.

READMISSION OF FORMER AND SUSPENDED STUDENTS

Students who were previously admitted to a graduate degree program but who did not complete that degree and who have not been continuously registered at the University must:

1. Clarify their status with the department to determine their eligibility to return and pursue the same degree.

2. After receiving departmental approval as indicated above, submit an application to the Office of Admissions before enrollment levels are met or deadlines passed for the term in which they expect to return to the University.

In some instances, students who have left the degree program to which they were formerly admitted must submit a new graduate application form and be reconsidered for admission by the department concerned.

Former students who wish to change from undergraduate to graduate status or from one major to another must complete the appropriate forms at the time they apply for readmission.

Students transferring from one campus to another must apply and be accepted to the new campus.

A student admitted to the Graduate School for the master's program must apply for admission to the doctoral program.

A regular degree student who is suspended for failure to maintain a 3.00 grade point average is eligible to apply for readmission after one year. Approval or rejection of this application rests jointly with the student's major department and the dean of the Graduate School. The final decision will be made by the dean.

FACULTY MEMBERS

No member of the faculty above the rank of instructor may be working toward an advanced degree from this University.

Graduate Record Examinations

Graduate Record Examination (GRE) scores are normally requested of applicants for fellowships and scholarships and applicants for admission as provisional degree students. At the option of any department, the Graduate Record Examination may be required of applicants for assistantships or of any student before the student's status is determined.

Students who are applying for admission should take the GRE no later than the previous December testing date so that their scores will be available to the graduate awards selection committee. Students should allow three months after taking the test for scores to reach applicable departments at the University.

Counseling and Career Services administers the GRE and other graduate and professional qualifying examinations, but does not set admissions requirements. Since these requirements vary, students should consult the specific department before taking any graduate test.

Packers containing application/registration materials, instructions, test dates and deadlines, and fee information may be picked up at the west entrance of Willard Administrative Center. Special problems or requests must be handled by Educational Testing Service, Box 995, Princeton, NJ 08541; telephone (609) 921-9000. GRE fee waiver information is available through the Office of Financial Aid.

OTHER GRADUATE QUALIFYING EXAMINATIONS

Students entering professional schools and special programs may obtain application and registration materials for law school (LSAT), business school (GMAT), medical school (MCAT), and dental school (DAT) examinations, as well as for National Teacher Examinations (NTE) and Miller Analogies Test (MAT) at the west entrance of Willard Administrative Center.

Application Procedures

An applicant for admission must present complete application materials that include:

1. Part I and part II of the graduate application, available from academic departments.

2. Two official transcripts of all academic work completed to date.

3. A $40 nonrefundable application fee (check or money order). No application will be processed unless this fee is paid.

4. Foreign application fee is $60.

5. Four letters of reference.

6. Test scores and other materials as required by specific departments.

All credentials presented for admission become the property of the University of Colorado.

When a prospective degree student applies for admission, the chair of that department or a committee named for the purpose shall decide whether an applicant shall be recommended for admission. That recommendation is further reviewed, and the student is informed of the decision by the Office of Admissions. Applicants not recommended for admission will be informed of the decision by the department. Persons who do not wish to work toward an advanced degree should see the section titled Nondegree Students.

A completed application must be in the office of the major department at least 120 days prior to the term for which the admission is sought or earlier as required by the major department. (Exceptions may be made by individual departments.)

Foreign students coming from abroad should have complete applications on file in the Office of Admissions before March 1 for the fall semester and October 1 for the spring semester; foreign students currently studying in the United States should follow deadlines set for United States citizens.

Qualified applicants may find that their application cannot be processed for a specific term if enrollment levels have been reached.

Graduate Notification and Confirmation

After the Office of Admissions has received the department recommendation and all required credentials, the applicant will be notified regarding eligibility for admission. If eligible, the applicant will receive a statement of eligibility and confirmation form, which must be returned with the designated nonrefundable enrollment deposit before enrollment levels are reached or the deadline passed. If the confirmation is accepted, the student will be sent information regarding registration. Should enrollment levels be reached, the deposit will be returned. Applicants not accepted for admission will be notified by the appropriate graduate department.
Registration
Specific registration procedures are sent to new graduate students when they have confirmed their intent to enroll. Please refer to the Policies, Programs, and Services section of this catalog for further information.

Late Registration
Late registration will be held only if enrollment levels have not been reached. Therefore, there is no guarantee that late registration will take place. Graduate students who fail to complete registration and pay fees during the regular registration period may be charged a late registration fee if a late registration is held. Students registering as candidates for degree or for thesis hours must register during the regular registration period or be subject to the late registration fee if a late registration is held (see the Registration section of this catalog).

Limitations on Registration
A graduate student will be considered to be carrying a full load if the student is registered for not fewer than 5 semester hours in course work numbered 5000 or above, at least 8 semester hours in a combination of undergraduate, graduate, and professional course work acceptable for graduate credit, or any number of thesis hours in a regular semester.

A maximum of two-thirds of a semester of residence credit may be earned during the summer if a student registers for 3 semester hours of work in courses numbered 5000 or above, 5 semester hours of other graduate work, or any number of thesis hours.

No graduate student may receive graduate credit toward a degree for more than 15 hours in a regular semester.

The maximum number of graduate credits that may be applied toward a degree during a summer session is 6 hours per 5-week term and 10 hours per 10-week summer session.

University Employees
Full-time employees of the University may not take more than 6 credit hours per semester. Part-time employees, including assistants, may take such work as is approved by the major department.

Credit Policies
Change of Department or Major
A graduate student wishing to change department or major must submit a complete graduate application to the new department or school and request the former department to forward recommendations and credentials.

Continuing Education Course Work
Students may use the resources of the Division of Continuing Education for graduate studies only if they obtain proper academic approval in advance from the major department and the graduate dean. Continuing education credits are considered transfer hours. All transfer of credit limitations apply.

Grading System
Students should refer to the uniform grading system described in the University Policies, Programs, and Services section of this catalog and note the following:

1. Work receiving a grade below C may not be counted toward a master’s degree, nor may it be accepted for the removal of deficiencies. Marks below B are not accepted for the Ph.D.

2. Graduate students have a maximum of one academic year to complete a course for which a grade of I/W or I/F has been given.

3. Should a student enter the armed forces before completing a course and an I/W is reported, this grade may be carried on the records for the duration of the student’s service provided arrangements have been made in advance with the dean of the Graduate School.

4. An in-progress (IP) grade given for thesis or dissertation hours will be valid until the thesis or dissertation has been completed. Once a grade has been received, it will be calculated into the student’s cumulative grade point average.

No Credit
Course work to be applied toward an advanced degree may not be taken for no credit.

Courses taken for no credit cannot be used toward the minimum credit load requirement for full-time or half-time status.

Pass/Fail
No course work to be applied toward an advanced degree may be taken pass/fail. A graduate student may not take any course at the 5000 level or above on a pass/fail basis.

Probation
Any graduate student whose cumulative GPA falls below 3.00 will be placed on probation. Failure to raise the cumulative GPA within two semesters will result in the student’s immediate suspension.

Repeating a Course
A graduate student who receives a grade of C, D, or F in a course may repeat that course once, upon written recommendation to the dean by the chair of the student’s advisory committee and major department, provided the course has not previously been applied toward a degree.

In calculating a student’s grade point average for Graduate School purposes, the grade for a repeated course will substitute for the old grade. Grades earned in courses taken as an undergraduate or as a non-degree student, as well as grades earned in first- and second-year foreign language courses, will not be used in calculating the Graduate School grade point average. However, all grades received will appear on the student’s transcript.

Transfer Credit—Master’s Program
Work already applied toward a degree received from another institution cannot be accepted for transfer toward the master’s degree at the University of Colorado; extension work completed at another institution cannot be transferred; and correspondence work, except to make up deficiencies, is not recognized.

All courses accepted for transfer must be at the graduate level and be completed within five years of the final degree requirement or be validated by special examination. A course in which a grade of C or lower was received will not be accepted for transfer.

Credit will not be transferred until the student has established, in the Graduate School of this University, a satisfactory record of at least one semester in residence; such transfer will not reduce the residence requirement at this University, but it may reduce the amount of work to be done in formal courses.

Undergraduate credits from another institution may not be transferred to the Graduate School. Seniors in this University may, however, transfer a limited amount of advanced resident work (up to 9 semester hours) provided such work:

1. Is completed with a grade of B- or above in the senior year at this University;
2. Comes within the five-year time limit;
3. Has not been applied toward another degree; and
4. Is recommended for transfer by the department concerned and is approved by the dean of the Graduate School.

The maximum amount of work that may be transferred to this University, depending upon the master’s degree sought, is noted below:

<table>
<thead>
<tr>
<th>Degree</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.A. or M.S.</td>
<td>.......................... 9</td>
</tr>
</tbody>
</table>
Requests for transfer of credit to be applied toward an advanced degree must be made on the form specified for this purpose and submitted to the Graduate School. This form is to be completed by the student, endorsed by his or her advisor, the department chair or the designated representative, and the dean of the college if applicable, and sent to the Graduate School. An official transcript of credit must accompany the request. (Information required: course title, number, credit hours, when and where taken, grade received, and verification that the course work was at the graduate level.) In order to have courses considered for transfer, a student must have an overall B average in all courses taken at the University of Colorado in the Graduate School. Grades of courses accepted for transfer, however, are not calculated in the GPA.

TRANSFER OF NONDEGREE STUDENT CREDIT HOURS

A department may recommend to the graduate dean the acceptance of as many as 9 total hours of credit toward the requirements for a master’s degree for courses a student takes at another recognized graduate school, as a nondegree student at this University, or as both. In addition, the department may recommend to the graduate dean the acceptance of credit for courses taken as a nondegree student at this University during the term for which the student applied for admission to the Graduate School, provided such admission date was delayed through no fault of the student. A grade of B or better must be obtained in any course work transferred in this manner.

TRANSFER CREDIT—DOCTORAL PROGRAM

Resident graduate work of high quality earned in another institution of approved standing will not be accepted for transfer for a doctoral degree until the student has established a satisfactory record of residence in this Graduate School. Such credit must be transferred before the student applies for admission to candidacy for the degree. Such transfer will not reduce the minimum residence requirement at this University, but it may reduce the amount of formal course work required.

The maximum amount of work that may be transferred and applied toward the Ph.D. is 21 semester hours that must be graduate level and have a course mark of B or above. All requests for transfer of credit must have the approval of the student’s graduate program director.

Dropping and Adding Courses

A student who wishes to add or drop a course must follow the standard procedures and adhere to the drop/add deadlines found in that term’s Schedule of Courses (the student should pay particular attention to refund policies). After the sixth week of classes a graduate student may not drop, add, or change a course to noncredit status without presenting a letter to the dean of the Graduate School, 308 Regent Administrative Center. The letter must state the exceptional circumstances justifying the change. This letter, endorsed by the instructor of the course, must accompany the properly signed and completed special action form or a change-of-record form for a past semester.

Reciprocal Exchange Agreement Program

Reciprocal registration enables University of Colorado graduate students to attend classes at other Northern Colorado institutions, including Colorado School of Mines, Colorado State University, and the University of Northern Colorado. The following conditions must be met for registration in the program:

1. The graduate student must be registered for and assessed full tuition and fees during the semester the request is made.
2. The course requested must be part of the student’s regular load.
3. The student must be pursuing a program leading to an advanced degree.
4. The course must not be offered on the student’s home campus at a time the student can take advantage of it.
5. The request is presented prior to the home campus drop/add deadline.
6. The request is presented for any term except the graduation semester.
7. A separate request form is completed for each course taken.
8. Space is available.

For further information, contact the Office of the Registrar, Regent 125, 492-6581.

Use of English

A student who is noticeably deficient in the use and spelling of the English language may not obtain an advanced degree from the University of Colorado. Satisfaction of this requirement depends not so much upon the ability to pass formal tests, although these may be required, as upon the habitual use of good English in all oral and written work. Ability to use the language with precision and distinction should be cultivated as an attainment of major importance.

Each department will judge the qualifications of its advanced students in the use of English. Reports, examinations, and speech will be considered in estimating the candidate’s proficiency.

Withdrawal

A graduate student who desires to withdraw from the University should go to Regent Administrative Center 125 for a withdrawal interview. A student who discontinues attendance in a course without officially withdrawing will be marked as having failed the course. Except under the most extreme circumstances, graduate students are not permitted to withdraw after the last day of classes.

Animal and Human Research

Research involving the observation of human subjects or the use of animals must have the approval of the Human Research Committee or the Animal Care and Use Committee.

FINANCIAL AID FOR GRADUATE STUDY

The University of Colorado receives funds earmarked to provide financial assistance to graduate students who demonstrate financial need. Students may apply for financial assistance by submitting a financial aid application as soon as possible after January 1. To receive assistance, students must be nominated by their departments.

The Colorado Graduate Grant Program is open to graduate students who are Colorado residents. Nonresidents are eligible for student fee grants.

Graduate students may apply for long-term loans through the Stafford Loan (formerly GSL) program or the Perkins Loan program (formerly the National Direct Student Loan) and for part-time jobs through the College Work-Study program by submitting this application. Work-study eligibility also requires nomination by a department.

Graduate Part-Time Instructors and Teaching Assistants

Many departments employ graduate students as graduate part-time instructors (GPTIs) or as teaching assistants (TAs). GPTIs are full-time, regular degree graduate students who have a master’s degree or the equivalent and who have demonstrated
competence in classroom teaching. Teaching assistants are also full-time regular degree graduate students, but it is not necessary for them to have any previous experience. GPTs and TAs must have a cumulative GPA of at least 3.00. Students are compensated on the basis of the percentage of time worked. Tuition credits are also based on the student's percentage of time worked. Nonresident students employed as assistants are eligible for the nonresident tuition differential waiver for their first-year appointment only, with the exception of foreign students. Exceptions extending beyond the first year must be approved in advance by the dean.

Research Assistants
Research activities provide opportunities for graduate students to secure part-time work as research assistants in many departments. All research assistants must maintain a cumulative GPA of at least 3.00. Students are compensated and receive tuition credits based on the percentage of time they work. General fund research assistantships are subject to the one-year rule on eligibility for waiver of the nonresident tuition differential. Research assistants must be full-time regularly enrolled graduate students.

GRADUATE TEACHER PROGRAM
The Graduate Teacher Program (GTP), directed by Graduate School staff, offers teacher training to all graduate students who teach courses, labs, and recitations, or who assist with office hours and grading. The GTP conducts intensive and workshops before the beginning of fall and spring semesters and follow-up workshops throughout the year. Topics covered include effective teaching and grading strategies, communication skills, and professional ethics. A special cultural intensive is presented for foreign teaching assistants that focuses on cultural issues involved in teaching American students. The GTP also offers a graduate teacher training certificate for students who complete workshop requirements, videotape consultation, and individual and departmental consultations.

REQUIREMENTS FOR ADVANCED DEGREES

Master of Arts and Master of Science
A graduate student is responsible for becoming informed and observing all regulations and procedures required by the program pursued. Each student must be familiar with the graduate sections of the catalog that outline general regulations and requirements, specific degree program requirements, and major department requirements. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in the catalog must be approved by the Dean of the Graduate School.

After being admitted to the Graduate School, but before registering, students should consult their college and/or graduate advisor in the major department concerning courses and degree requirements, deficiencies, and special regulations of the department.

A student regularly admitted to the Graduate School and later accepted as a candidate for the master of arts or master of science degree will be recommended for the degree only after the following requirements have been met.

In general, only graduates of an approved institution who have a thorough preparation for their proposed field of study and who do graduate work of high quality are able to attain the degree with the minimum amount of work specified. All studies offered toward the minimum requirement for the degree must be of graduate rank. Courses will have graduate rank only if they are taught by members of the graduate school faculty and are within the major department at the 5000 level or above, or are outside the major department at the 3000 level or 4000 level (provided they are approved for graduate rank for a specific degree plan by the faculty of the degree-granting program and the dean of the Graduate School). Additional work required to make up deficiencies or prerequisites may consist partly or entirely of undergraduate courses.

The requirements stated below are minimum requirements; additional conditions set by the department will be found in the announcements of separate departments. Any department may make further regulations consistent with the general rules.

Students planning to graduate must obtain current deadline dates in the office of the Graduate School. It is the graduate student's and the department's responsibility to see that all requirements and deadlines are met (e.g., changing of TW grades, submission of diploma cards, and notification of final examinations).

Departments or program committees may have additional deadlines which must be met by graduate students in that department or program. It is the student's responsibility to ascertain such requirements and to meet them as designated by the department or program chair.

MINIMUM REQUIREMENTS
The minimum requirements for the master of arts or master of science degree may be fulfilled by following either plan I or plan II below.

Plan I. By presenting 24 semester hours of graduate work, including a thesis. At least 12 semester hours of this work must be at the 5000 level or above.

Plan II. By presenting 30 semester hours of graduate work, without a thesis. At least 16 semester hours of work must be at the 5000 level or above. Plan II does not represent a free option for the student. A candidate for the master's degree may be allowed to select plan II only on the recommendation of the department concerned.

For either plan I or plan II, courses below the 5000 level may be used only if they are in departments other than the student's major department.

Independent study courses cannot exceed 25 percent of the course work required by the department.

MASTER'S THESIS
A thesis, which may be a research, expository, critical, or creative work, is required of every master's degree candidate under plan I. Every thesis presented in full fulfillment of the requirements for an advanced degree must:

1. Deal with a definite topic related to the major field.
2. Be based upon independent study and investigation.
3. Represent the equivalent of 4 to 6 semester hours of work.
4. Receive the approval of the major department at least 30 days (in some departments, 90 days) before the commencement at which the degree is to be conferred.
5. Be essentially complete at the time the comprehensive-final examination is given.

Two typed copies of the thesis, including abstract and signatures, must be filed in the Graduate School by the posted due date for that semester.

The thesis must be signed by two professors in the student's major field. All approved theses are kept on file in the library. The thesis binding fee must be paid when the thesis is deposited in the Graduate School.

Graduate students who write a thesis under plan I must register for 4, 5, or 6 semester thesis hours during one semester.
or over a number of semesters. Students may not register for zero thesis hours.

The final grade will be withheld until the thesis is completed; if the thesis is not finished at the end of the term in which the student is registered, an in-progress grade (IP) will be reported.

**MASTER'S DEGREE CANDIDATE**

After a student has registered for the total number of thesis hours (plan I) or has completed all course work (plan II), he or she should, if registration is required, register as a master's candidate for degree. Students receive 3 credit hours when taking this course. However, this course does not apply toward the Graduate School's minimum credit-hour requirements for a master's degree. The student will receive a grade of pass or fail for this course, not a letter grade.

**LANGUAGE REQUIREMENT**

Candidates must have such knowledge of ancient and modern languages as each department requires. See special departmental requirements.

**TIME LIMIT**

All work, including the comprehensive-final examination and the filing of the thesis with the Graduate School (if plan I is followed), must be completed within four years from the date course work is started in the program. Students who attend exclusively during summer sessions must complete all degree requirements within 72 months. Participation in the Time Out Program does not extend the student's time limit. Students who fail to complete all requirements within this time period must submit a petition filed by the department program director stating the reasons why the program faculty believe the student should be allowed to continue in the program. Course work taken more than five years prior to the completion of final requirements (comprehensive exam and/or filing of thesis) will not be accepted for the degree unless validated by a special examination. A candidate for a master's degree is expected to complete the work with reasonable continuity.

Students whose residence in this University is interrupted by military service may apply to the dean of the Graduate School for an extension of time.

**RESIDENCE**

In general, the residence requirement can be met only by residence at this University for at least two semesters or at least three summer sessions. For full residence, a student must be registered within the time designated at the beginning of a semester and must carry the equivalent of at least 5 semester hours of work in courses numbered 5000 or above, or at least a combination of 8 semester hours of other course work acceptable for graduate credit (see Limitations on Registration for requirements for full residence credit during the summer). Students who are noticeably deficient in their general training or in the specific preparation required by the department cannot expect to obtain a degree in the minimum time specified.

Assistants and other employees of the University may fulfill the residence requirements of one year in two semesters, provided their duties do not require more than half time. Full-time employees may not satisfy the residence requirement of one year in fewer than four semesters.

**CANDIDACY**

A student who wishes to become a candidate for a master's degree must file an application in the dean's office no later than 10 weeks prior to the completion of the comprehensive-final examination.

Applications must be made on forms available in the dean's office and appropriate departments and must be signed by the major department, certifying that a student's work is satisfactory and that the program outlined in the application meets the requirements set for the student.

**COMPREHENSIVE-FINAL EXAMINATION**

Each candidate for a master's degree is required to take a comprehensive-final examination after the other requirements for the degree have been substantially completed. This examination may be given near the end of the last semester of residence while the candidate is still taking required courses for the degree, provided satisfactory progress is being made in those courses.

The following rules applying to the comprehensive-final examination must be observed:

1. A student must be registered on the Boulder campus as a regular degree-seeking student when the examination is taken.
2. Notice of the examination must be filed by the major department in the dean's office at least two weeks prior to the examination.
3. The examination is to be given by a committee of three graduate faculty members appointed by the department concerned with approval of the dean of the Graduate School. The chair of the committee must have a regular or tenured graduate faculty appointment.
4. The examination, which may be oral, written, or both, must cover the thesis, which should be essentially complete at the time, as well as other work done in the University in formal courses and seminars in the major field.
5. The examination must include all work presented for the degree. The examination on transferred work will be given by representatives of the corresponding fields of study in this University.
6. A student must have an affirmative vote from the majority of the committee members to pass. A student who fails the comprehensive-final examination may not attempt the examination again for at least three months and until any work prescribed by the examining committee has been completed. The student may retake the examination only once.

**SUPPLEMENTAL EXAMINATION**

A supplemental examination should be simply an extension of the original examination and given immediately. If the student fails the supplemental examination, three months must elapse before he or she may attempt the comprehensive examination again.

**Doctor of Philosophy**

The doctor of philosophy (Ph.D.) degree is the highest academic degree conferred by the University. To state the requirements for the degree in terms of credit hours would be misleading. Students who receive this degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field; furthermore, they must have shown the ability to work independently in their chosen field and must have made an original, significant contribution to the advancement of knowledge. The technical requirements stated below are minimal requirements for all candidates for the degree; additional conditions set by the departments are found in the announcements of separate departments. Any department may make additional regulations consistent with these general rules.

Studies leading to the Ph.D. degree must be chosen to contribute to special competence and a high order of scholarship in a broad field of knowledge. A field of study chosen by the student may be in one department or it may include two or more closely related departments. The criterion of what constitutes an acceptable field of study shall be that the student's work must
contribute to an organized program of study and research without regard to the organization of academic departments within the University.

Students planning to graduate should obtain current deadline dates in the office of the Graduate School. It is the graduate student’s and the department’s responsibility to see that all requirements and deadlines are met (e.g., changing of JW grades, submission of diploma cards, and notification of final examinations).

Departments or program committees may have additional deadlines that must be met by graduate students. Students are responsible for ascertaining such requirements and for meeting them as designated by the department or program chair.

**Minimum Course Requirement**

A minimum of 30 semester hours of courses numbered 5000 or above is required for the degree, but the number of hours of formal courses will ordinarily exceed this minimum. Unless otherwise specified by departmental requirements, all courses at the 5000 level or above taken for the master’s degree at the University of Colorado may be applied toward the Ph.D. degree at the University. Students who have been admitted to the Graduate School with deficiencies may expect to receive little or no residence credit until the deficiencies have been removed.

**Dissertation Credit-Hour Requirement**

To satisfy the requirements for the Ph.D. degree, a student must complete a total of at least 30 hours of doctoral dissertation credit, with not more than 10 of these credit hours in any one semester. Not more than 10 dissertation hours may be applied to the degree from semesters preceding the semester in which the comprehensive examinations are taken. In addition, up to 10 hours may be taken in the semester in which the student passes comprehensive. Dissertation credit does not apply toward the minimum 30 hours of required course work specified above, and will not be included in calculation of the student’s grade point average. Only the grades of A, B, C, and IP shall be used.

Course work and work on the dissertation may proceed concurrently throughout the doctoral program. However, at no time shall a doctoral student register for more than 15 hours of 5000-level and above course work or dissertation hours. Normally a student must have earned at least three and not more than six semesters of residency before admission to candidacy.

**Quality of Work**

Students are expected to complete with distinction all work in the formal courses in which they enroll. A course mark below B- is unsatisfactory and will not be counted toward fulfilling the minimum requirements for the degree. Upon recommendation of the advisory committee and the executive officer of the department and with the approval of the dean of the Graduate School, a student may be required to withdraw at any time for failure to maintain satisfactory progress toward the degree.

**Advisory Committee**

As soon as the field of specialization has been chosen, the candidate will request the faculty member with whom the candidate wishes to work to act as chair of the advisory committee. The chair, with the advice and approval of the executive officer of the department, may select two or more additional members to serve on the committee, so that several fields related to the student’s special interest will be represented. A purpose of the advisory committee (beyond guiding the student throughout graduate study) is to ensure against too narrow specialization. The student shall obtain the signature of the chair of the committee (thereby signifying the chair’s willingness to act) on the application for admission to candidacy form. Any change in the membership of the advisory committee must be reported to the Graduate School.

**Residence**

Residence must be earned for course work completed with distinction, for participation in seminars, or for scholarly research performed here or elsewhere under the auspices of the University of Colorado. Students must be properly registered to earn full-time residence credit. The minimal residence requirement shall be six semesters of scholarly work beyond the attainment of an acceptable bachelor’s degree. Mere attendance shall not constitute residence as the word is used here.

As a guiding policy in determining residence credit for employed students, those who are employed in three-fourths to full-time work that does not contribute directly to their degree program may not earn more than one-half residence credit in any semester. Students who are employed more than one-fourth time and less than three-fourths time in work that does not contribute directly to the degree may earn not more than three-fourths residence credit. Those who have one-fourth-time employment or less may earn full residence credit.

(All these provisions are subject to the definition of residence credit given in the preceding paragraph.) If the interpretation of residence credit for any student seems to be clarified, a decision will be made by the chair of the student’s advisory committee, the executive officer of the student’s major department, and the dean of the Graduate School.

Two semesters of residence credit may be allowed for a master’s degree from another institution of approved standing, but at least four semesters of residence credit, two of which must be consecutive in one academic year, must be earned for course work and/or dissertation work taken at this University.

**Preliminary Examination**

Each department will satisfy itself (by examination or other means) that students who signify intent to undertake study for the Ph.D. degree are qualified to do so. The means by which each department makes this evaluation shall be specified in departmental requirements. Students who are thus evaluated will be notified immediately of the results. The results of this preliminary examination shall be reported to the office of the Graduate School on the application for admission to candidacy form filed by the student at least two weeks before the comprehensive examination is attempted.

**Language Requirement**

Foreign language requirements for the Ph.D. degree are specified by individual departments. The campuswide foreign language requirement of the Graduate School is no longer in effect.

**Communication Requirement**

Students whose native language is not English and who are not United States citizens will, by passing their courses and completing their graduate work at the University, demonstrate sufficient ability in English to meet the communication requirement.

**Comprehensive Examination**

Before admission to candidacy for the Ph.D. degree, students must pass a comprehensive examination in the field of concentration and related fields. This examination may be oral, written, or both, and tests mastery of a broad field of knowledge, not merely the formal course work completed. The oral part is open to members of the faculty. Students must be registered on the Boulder campus as regular degree-seeking students at the time the comprehensive examination is attempted.

The examination shall be conducted by an examining board appointed by the chair.
of the department concerned and approved by the dean. The board shall consist of the advisory committee and additional members as necessary to a minimum of five. The chair and outside member must have regular or tenure graduate faculty appointments. Successful candidates must receive the affirmative votes of a majority of the members of their examination board. In case of failure, the examination may be attempted once more after a period of time determined by the examining board.

APPLICATION FOR ADMISSION TO CANDIDACY

A student must make formal application for admission to candidacy for the Ph.D. degree on forms supplied by the Graduate School at least two weeks before the comprehensive examination is attempted.

A student shall have earned at least four semesters of residence, have passed the language requirement specified by the department, and shall have passed the comprehensive examination before admission to candidacy for the degree.

Continuous Registration Requirement

Following successful completion of the comprehensive examination, students must register continuously as regular degree-seeking students on the Boulder campus. Students will register for and be charged for 7 or 10 dissertation hours of credit for each full-time term of doctoral work. To be excepted from this requirement, students not making use of campus facilities may petition the Graduate School for 5 credit hours of off-campus status; off-campus status is considered part-time enrollment. Continuous registration for dissertation hours during the academic year will be required until completion of the dissertation defense. The student and advisor are expected to consult each semester as to the number of hours for which the student will register.

DISSERTATION REQUIREMENTS

A dissertation based upon original investigation and showing mature scholarship and critical judgment as well as familiarity with tools and methods of research must be written upon some subject approved by the student's major department. To be acceptable, this dissertation should be a worthwhile contribution to knowledge in the student's special field. It must be finished and submitted in typewritten form at least 30 days (in some departments, 90 days) before the day of the final examination and must be formally approved and made available for inspection by the examining committee before the final examination may be taken.

All dissertations must comply in mechanical features with the specifications of the Graduate School.

The student is responsible for notifying the Graduate School of the exact title of the dissertation at least six weeks prior to the commencement at which the student will graduate. This title will be printed in the commencement program.

One formally approved copy of the dissertation, including abstract, plus one additional copy of the title page and abstract, must be filed in the Graduate School office by the posted deadline for the semester in which the degree is to be conferred.

The abstract, not to exceed 350 words, will be published in Dissertation Abstracts International. The determination of what constitutes an adequate abstract shall rest with the major department.

All dissertations must be signed by no fewer than two members of the major department staff who are regularly engaged in graduate instruction.

All approved dissertations are kept on file in the library.

When the dissertation is deposited in the Graduate School, the candidate must pay the dissertation binding fee and sign an agreement with University Microfilms International to allow for publication in Dissertation Abstracts International and to grant University Microfilms International the right to reproduce and sell (a) copies of the manuscript in microform and/or (b) copies of the manuscript made from microform. The author retains all rights to publish and/or sell the dissertation by any means at any time except by reproduction from negative microform.

FINAL EXAMINATION

After the dissertation has been accepted by the student's major department, a final examination on the dissertation and related topics will be conducted. This examination will be wholly or partly oral, the oral part being open to anyone. The examination will be conducted by a committee appointed by the dean of the Graduate School, which will consist of at least five persons, one of whom must be from outside the student's department. Three of the members must be Boulder campus resident faculty. The chair and outside member of the committee must have regular or tenure graduate faculty appointments. The other committee members must have either regular or special graduate faculty status. More than one dissenting vote will disqualify the candidate in the final examination.

Students must notify the Graduate School of their final oral examination at least two weeks before their scheduled examination date. Students should obtain a leaflet announcement form from the Graduate School office for this purpose. The examination must be scheduled not later than the posted deadline for the semester in which the degree is to be conferred. A student must be registered for 7 or 10 dissertation hours as a regular degree-seeking student on the Boulder campus at the time of the final examination.

In case of failure, the examination may be attempted once more after a period of time determined by the examining committee.

TIME LIMIT

Doctoral students are expected to complete all degree requirements within six years from the date they start course work in the program. A student who fails to complete the degree within the six-year time limit must file a petition for an extension with the dean. The petition must give evidence of adequate progress and request that the student be allowed to continue in the program, and it must be endorsed by three members of the student's advisory committee. If the petition is approved, the student may continue in the program for one additional year. If the dean does not approve the petition, the student may be dropped from the program, with the concurrence of the department. If the dean and the program director cannot come to an agreement, the final decision will be made by the executive committee.

The six-year rule is applied regardless of when the student passes the comprehensive examination.

SEQUESTERATION OF DISSERTATIONS

Dissertations approved by the departments and the Graduate School are released to University Microfilms Inc. and placed in Norlin Library, where they are kept on file. Occasionally, the primary academic advisor, after consultation with the student, may find it necessary to sequester his or her student's dissertation in order to protect university rights to intellectual property. The University accepts the obligation to protect potentially patentable subject matter from premature public disclosure so as to preserve entitlement to patent protection while the technology is being evaluated. This sequestration should take place only when it is absolutely required and only for the minimum time necessary.
With just cause, the primary academic advisor may request that the Graduate School sequester his or her student's dissertation for one month. Any longer period will be only the minimum time necessary to protect University intellectual property rights under patent policy or to comply with the terms of grants and contracts. Normally this period will not exceed six months. The Graduate School shall provide an explanation to the student for the decision to sequester consistent with other university policies.

INTERDISCIPLINARY PROGRAMS

See departmental listings in the college and school sections of this catalog for descriptions of graduate programs.

The following interdisciplinary programs are offered at CU-Boulder.

Behavioral Genetics

The Institute for Behavioral Genetics (IBG) offers a training program in behavioral genetics but is not a degree-granting unit of the University. The goal of the program is to train scientists capable of working both within their academic disciplines and in the broad interdisciplinary field of behavioral genetics. The program features a core set of courses and continuous research apprentice training with one or more IBG faculty members and furnishes valuable opportunities for interaction among scholars with widely varying academic backgrounds. A student wishing to specialize in behavioral genetics must be regularly enrolled as a graduate student in an academic department of the University and must satisfy all requirements of that department.

The training program has two levels: The goal of the first level is to establish minimal competency in behavioral genetics. The requirements include successful performance in PSYC 5102 (Behavioral Genetics), PSYC 5112 (Concepts in Behavioral Genetics), and two semesters of PSYC 7102 (Seminar: Behavioral Genetics). The second level includes the following additional requirements: competence in general genetics (e.g., EPOB 3200), quantitative genetics (PSYC 5122), and molecular genetics (e.g., PSYC 5232); one graduate-level statistics course; and at least two semesters of research in behavioral genetics (PSYC 7012).

Students at either level must have an IBG faculty member as an advisor to guide their course work and research. Trainees aspiring to second-level competency also must have an advisory committee consisting of faculty members from both IBG and the student's academic department. In addition to guiding the student's course work and research, the advisory committee will evaluate the student's progress and may impose additional requirements.

Further information about these interdisciplinary training programs can be obtained from the institute.

Chemical Physics

The purpose of the interdepartmental doctoral program in chemical physics is to prepare students for research in such interdisciplinary fields as atomic and molecular radiation processes, nuclear and electron magnetic resonance spectroscopy, laser chemistry and physics, X-ray crystallography, molecular quantum mechanics, statistical mechanics, chemistry, kinetic, and chemical and physical processes. Students wishing to pursue graduate work leading to the Ph.D. degree in chemical physics should apply for admission to, and be formally associated with, either the Department of Chemistry and Biochemistry or the Department of Physics, in accordance with their undergraduate backgrounds.

Entering students take the qualifying examination in the area of their undergraduate major, but the comprehensive examination will test their knowledge in the relevant aspects of both chemistry and physics. Certain requirements associated with the regular Ph.D. programs in the participating departments will be replaced by requirements in the complementary field; each student's program of course work and research will be individually planned according to the student's special needs.

Some of the courses that will be used in planning programs in chemical physics are listed below. For descriptions of their contents, refer to the listings of the specific departments.

The program is administered by an interdepartmental committee. For further information, contact either the chair, Department of Chemistry and Biochemistry, or the secretary, Department of Physics.

Environmental Policy

The graduate certificate program in environmental policy is designed to provide an interdisciplinary specialization for students in regular master's and doctoral programs. Environmental issues—such as water policy, wilderness preservation, air quality, energy development, and global change—transcend ordinary academic boundaries. Policy analysts that deal with these problems must integrate insights and information from many disciplines.

The program draws on courses in economics, geography, philosophy, political science, psychology, sociology, law, engineering, and environmental design. Two team-taught capstone seminars are offered each year—Environmental and Natural Resources Policy, and Policy Responses to Global Change. Each focuses on a policy research problem, emphasizing the contribution of different disciplines to the understanding of that problem and the integration of disciplinary perspectives in the analysis of alternative policy recommendations.

Admission to the certificate program is open to students in any regular degree program. A limited number of students already holding master's or doctoral degrees from other institutions may be admitted, provided they are admitted as nondegree students by one of the participating departments and meet the normal admission requirements of that department. To qualify for the certificate, students must complete at least 18 hours of approved course work, including the two required capstone seminars. At least 12 of the 18 hours must be in courses outside the department in which the student is currently enrolled. The certificate is awarded to recognize the additional course work beyond that required for the student's regular degree program.

Questions about the certificate program in environmental policy should be directed to the Center for Public Policy Research,
Geophysics

The interdisciplinary, interdepartmental doctoral program in geophysics is designed to encourage students with a variety of undergraduate backgrounds to pursue graduate study in the physics of the Earth, with special emphasis on the interior of the planet. They specialize in one of the subfields of geophysics while gaining a broad, general background in the discipline and in-depth education in the relevant parts of the parent fields of geology, physics, and engineering.

Students enter the program by applying for admission to the Graduate School through one of the following departments: geological sciences; physics; astrophysical, planetary, and atmospheric sciences; aerospace engineering sciences; civil, environmental, and architectural engineering; electrical and computer engineering; or mechanical engineering. The choice of department is determined by the student's long-term professional goals. The student remains affiliated with this department throughout the program. Upon satisfactory performance on the Ph.D. preliminary examination given by the home department, the student may formally apply for admission to the geophysics Ph.D. program.

The program is administered by the geophysics graduate program committee, which includes representatives from each of the participating departments. The comprehensive examination and the dissertation defense are directed by this committee, with a faculty member of the home department normally chairing these procedures. The number of specified courses required for the program is kept to the minimum needed to provide a uniform background and general preparation for research. Students are expected to fill out their course work from the broad offerings of the University in appropriate subjects. The required course work is as follows. (For course numbers and course descriptions see the listings under the specific departments.)

Earth and Planetary Physics 1, 2, 3
Intermediate-level mathematical physics or engineering analysis (one year)
Seminar in geophysics (students may register for credit twice)

Other courses that are not required of all students, but are highly recommended as part of this core program, are:

Geophysical Instrumentation
Dynamics of Continuous Media,
Advanced Seismology

Exceptional research opportunities are available through the University research institutes, especially the Cooperative Institute for Research in Environmental Sciences (CIRES) and the Joint Institute for Laboratory Astrophysics (JILA), as well as within the special laboratories of the participating departments. Financial support is provided through teaching assistantships in the student's department or research assistantships in the various research programs. Assistantships are awarded on a competitive basis and may be given to students who express a strong interest in the program when they apply for admission to the Graduate School, prior to formal admission to the geophysics program. For further information, call or write any of the participating departments listed above or write CIRES, Campus Box 449, University of Colorado at Boulder, Boulder, CO 80309-0449.

Master of Basic Science Program

This interdisciplinary program leads to the master of basic science (M.B.S.) degree. It provides an opportunity for present and prospective mathematics and science teachers, museum professionals, and others to extend and/or broaden their training in computer science, mathematics, museology, and the natural sciences at advanced undergraduate and graduate levels. Program participants include private and public school teachers, industrial scientists, engineers, and business persons.

The master of basic science degree is supervised by an administrative committee appointed by the dean of the Graduate School with representation from the following departments: anthropology; astrophysical, planetary, and atmospheric sciences; environmental, population, and organismic biology; chemistry; computer science; geological sciences; mathematics; molecular, cellular, and developmental biology; museology; and physics. The deans of the College of Arts and Sciences and the Graduate School are ex officio members. The administrative committee decides policy, procedures, and rules for the operation of the program. An executive committee is responsible for the administration of the program.

The student may elect an emphasis in mathematics, museology, or science. Wide latitude is possible in the details of a degree plan so that each student may follow a course of study pertinent to his or her interest. Each degree plan must be approved by the M.B.S. executive committee.

Requirements for Admission

To be considered for admission to the master of basic science program, a student must present at least 40 semester hours in the natural sciences and mathematics, preferably including one year of calculus. Students may be admitted to the program with a deficiency in calculus, but must remedy the deficiency within two years after admission by completing one year of calculus (or other courses in mathematical subjects approved by the executive committee) with a grade of C or better. Such remedial work does not count toward the hours required for the degree.

General regulations for admission to the Graduate School apply (see Admission Requirements). Verbal and quantitative portions of the Graduate Record Examination (GRE) are required.

Application should be made to the Master of Basic Science Program, Campus Box 249, University of Colorado at Boulder, Boulder, CO 80309-0249.

Requirements for the Master of Basic Science Degree

Courses fulfilling program requirements may be selected only from the areas listed below. See the descriptions of mathematics, museology, and science emphases that follow.

Anthropology (museology option only)
Astrophysical, planetary, and atmospheric sciences
Chemistry
Computer science
Environmental, population, and organismic biology
Geology
Mathematics
Molecular, cellular, and developmental biology
Museology (museology option only)
Physics

Plan I (with thesis). This option is available only to students electing the science emphasis. Requirements include 24 hours of basic science courses numbered 3000 and above, selected from two or more departments, which must include a minimum of 12 hours at the 5000 level and above. Included in these 24 hours are 4 to 6 hours of thesis credit, which are not counted toward the 12 hours required at the 5000 level. The thesis must meet the general requirements of the Graduate School and must be approved by the executive committee.
Plan II (without thesis). Thirty hours of basic science courses numbered 3000 and above are required. At least 12 semester hours must be at the 5000 level and above. In the science and mathematics emphases, a student may include 3 semester hours of courses or seminars in secondary school science or mathematics teaching, history of mathematics or science, or philosophy of mathematics or science. Students following plan II must submit a project paper, the topic of which must be approved by the executive committee. Approval is given on the basis of a written explanation or precis submitted no later than the end of the semester in which the student completes 21 hours of course credit, or the completion of the third year after entering the program, whichever is earlier. The final paper must be approved by the student’s committee.

Mathematics Emphasis
Requirements for the mathematics emphasis are as follows:
1. A reasonable degree of competence is required in the fields of analysis, algebra, and geometry. A minimum of 15 semester hours of upper-division courses (3000 level or above) in mathematics must be offered for the degree, including at least 3 hours of analysis, 6 hours of algebra, and 3 hours of geometry.
2. One upper-division sequence of at least 6 semester hours in any of the physical and biological sciences listed above is required. With permission, two independent one-semester courses in the same area may be substituted for one of the one-year sequences.
3. Upper-division electives in science, mathematics, or computer science are required to complete an approved 30-hour degree plan.
4. An upper-division sequence (3000 level or above) of at least 6 semester hours in one of the departments (other than museum) represented in the program.
5. Upper-division electives in science, mathematics, or computer science to complete an approved 30-semester-hour degree plan. Of these 30 hours, 12 or more must be from courses numbered 5000 and above.

Science Emphasis
Within the science emphasis there are two choices: the nontesis option or the thesis option.
1. In either option the student must take an upper-division sequence (3000 level or above) of at least 6 semester hours in each of two of the physical and biological sciences listed above. With permission, two independent one-semester courses in the same area may be substituted for one of the one-year sequences.
2. For the nontesis option, the student must complete an approved 30-semester-hour degree plan with upper-division electives in science, mathematics, or computer science. For the thesis option, upper-division electives in science, mathematics, or computer science can be used to complete an approved 24-semester-hour degree plan. Of the required hours for either option, 12 hours or more must be from courses numbered 5000 and above, not to include thesis credit. The required hours may also include 3 semester hours of upper-division courses or seminars in secondary school teaching, history of science, or philosophy of science.
3. The student who plans to present a thesis for the M.B.S. degree must report this to the executive committee of the M.B.S. program not later than the second semester. The student’s choice of a thesis advisor must be approved by the executive committee at this time. The thesis advisor may be the same person who serves as the major advisor.

Time Limit and Transfer of Credit
All students are subject to the Graduate School’s four-year time limit and transfer of credit limits for master of arts and master of science degrees.

Grades and Quality of Work
Courses at the 3000 or 4000 level will be accepted toward the degree only with grades of B or better; 5000 and above level courses will be accepted with grades of C or better. The student must have a B average in all course work taken subsequent to admission to the program, including courses not actually used to fulfill program requirements.

Master of Engineering Program
The master of engineering (M.E.) degree program is administered by the Graduate School through the engineering departments and the interdisciplinary Telecommunications Program. The requirements for admission and for quality and quantity of academic work are the same as for the master of science degree awarded in the College of Engineering and Applied Science.

The principal difference between the master of engineering and the master of science degrees is that the master of engineering degree does not require a residency on campus. It is intended to meet the needs of practicing engineers who are working full time outside the University. It also allows participants to pursue an integrated program of study by specializing in one engineering discipline and selecting courses from other engineering fields and business subjects related to the individual student’s professional work. A successful program to meet these needs requires greater flexibility in operation than is normally possible or intended under the master of science degree program.

The program is offered both on campus and through the Center for Advanced Training in Engineering and Computer Science (CATECS), which delivers graduate courses taught on the Boulder campus to business, industry, and government agencies by live television with two-way audio communication. Engineers, computer scientists, and technical managers may earn a master’s degree in several areas of concentration without driving to campus. Each year, CATECS offers over 40 graduate courses to approximately 500 students at 50 industrial sites. These courses are also available by videotape to sites outside the signal range.

Each prospective student is required to present a well-defined objective in order to be admitted to the program. Once accepted, each student will select or be assigned to a faculty advisor. An academic program is then developed to meet this objective in consultation with faculty advisors.

Requirements
The requirements for the M.E. degree are 30 credit hours plus a written report on a creative investigation, which may be related to the student’s professional work. The report must be defended orally.
Although the report does not in itself carry credit, it may be based upon work done for credit under independent study. A student must be registered during the semester of the oral defense. At least 15 credit hours must be in a particular engineering discipline at the 5000 level or above. The additional 15 credit hours may be selected from the same discipline, other engineering fields, or business. Credit in courses below the 4000 level will not apply toward degree requirements.

Requirements relating to the following items are the same as those for the master of science degree awarded in the College of Engineering and Applied Science: admission to the Graduate School, application procedures, registration, quality of graduate work, status, credit by transfer, and admission to candidacy. Applicants may petition for credit for up to an additional 3 hours of transfer credit. The time limit to complete this program is six years.

The admission of each student to graduate study, approval of the degree program, admission to candidacy for the degree, and approval of the awarding of a degree originate through a specific department of the College of Engineering and Applied Science, or the appropriate degree program steering committee, in the same manner as for the established master of science program. An advisory committee, consisting of not fewer than three faculty members, will be appointed for each student by the major department promptly upon the student's acceptance into the graduate program. At that time, a plan of study shall be completed and a copy placed on record with the department office. Changes in the plan must have the concurrence of the committee and must be reported to the departmental graduate office. The members of each advisory committee shall be chosen from the various interdisciplinary academic areas represented in the student's program and will be from more than one department. The advisory committee guides the student and is responsible for approving the individual's degree program and admission to candidacy; it approves the student's written report and the awarding of the degree.

The student should also see the requirements of the departments involved.

Mathematical Physics

In recent years the increasingly mathematical character of many branches of physics has opened up numerous opportunities for fruitful interplay between the ideas of mathematics and those of physics. At the same time, increasing specialization in both fields has reduced the possibility of communication between the two disciplines, so that students of mathematics have less time to study physics and vice versa. This relationship contrasts strongly with that during the early part of this century, when the two fields were in close contact, many great mathematicians were deeply involved in physics problems, and a number of important mathematical ideas had their origin in the study of nature itself.

Against this background, the Departments of Mathematics and Physics offer an interdisciplinary doctoral program in mathematical physics. The program has the following general objectives: to attract students to and prepare them for research in modern mathematical physics and the relevant mathematics; to promote collaboration and cooperation between the Departments of Mathematics and Physics; to institute courses pertinent to mathematical physics not already offered in either department; and to develop a strong center of mathematical physics at this University.

Initially a small number of students are involved in the program, so that the steering committee may follow their progress closely. This close individual attention does not necessitate a rigid set of requirements and regulation. The design of the program is outlined below.

Administration of the Program

The mathematical physics program is guided by a steering committee composed of members of the Departments of Mathematics and Physics. This steering committee administers the program within the rules of the Graduate School.

Admission Requirements

The requirements for entrance into the program are acceptance as a degree student either in the Department of Mathematics or in the Department of Physics and a good undergraduate background in both physics and mathematics, obtained by either a double major in undergraduate study or a major in one of the fields combined with suitable subsequent study of undergraduate courses in the other. The steering committee accepts students into the program on the basis of the foregoing requirements and academic promise. Satisfaction of the second requirement is evaluated individually, partly on the basis of the student's transcript and partly on the basis of a written examination on undergraduate work in the second field. For a student enrolled in the mathematics department, that examination is the physics GRE test. For a student enrolled in the physics department, it is a preliminary examination based on undergraduate mathematics administered by the steering committee or by a faculty member designated by the committee. The examination is partly diagnostic; as result of it, the steering committee or the student's advisor may recommend further study of certain subjects.

Advisory Committee

All students in the program, as soon as their field of specialization has been chosen, request that the staff member with whom they wish to work acts as chair of their advisory committee. The chair, with the advice and approval of the steering committee, selects one member of the graduate faculty from the Department of Mathematics and one from the Department of Physics to serve on the advisory committee. A purpose of the advisory committee (beyond guiding the student throughout graduate study) is to ensure against too narrow a specialization.

Course Requirements

To prepare for the Ph.D. in mathematical physics, each student must undertake appropriate course work in the Department of Mathematics and the Department of Physics. The program of study must be approved by the advisory committee and should be designed in part to prepare the student for the second-year examination (see below) in the department in which the student is matriculated. In addition, the candidate is expected to pass at least two distinct graduate-level core courses in the second field (see table below) and at least two semesters of the advanced mathematical physics courses (MATH or PHYS 7030, 7040, 7050, and 7060).

Core Courses in the Second Field

Mathematics Courses for Physics Students
MATH 6130 Algebra
MATH 6210, 6220 Topology
MATH 6230, 6240 Differential Geometry
MATH 6310, 6320 Real Analysis
MATH 8330, 8340 Functional Analysis

Physics Courses for Mathematics Students
PHYS 5210 Theoretical Mechanics
PHYS 5250, 5260, 7270, 7280 Quantum Mechanics and Theory
PHYS 7230, 7240 Statistical Mechanics
PHYS 7310, 7320 Electromagnetic Theory
PHYS 7770 Theory of Relativity

These courses are in addition to such subjects as ordinary and partial differential equations, linear algebra, and complex variables, which are required of all physics students and covered, for example, in mathematical physics.
EXAMINATION REQUIREMENTS
Each student in the mathematical physics program must pass the second-year examination in the department in which the student is matriculated (i.e., the physics comprehensive or the mathematics preliminary examination) according to the rules of that department. The second-year examination constitutes the comprehensive-final examination required by the Graduate School.

TRANSFERRING INTO AND OUT OF THE PROGRAM
A student may transfer into the program at any time, subject to the entrance requirements mentioned above; a student may also transfer out of it, because a student in the program retains status as a regular degree student in the department of the primary field. Formal acceptance into the program is usually deferred until the student has passed the second-year examination, but any student who is interested in the program and has an appropriate background is urged to apply for the program as soon as possible.

MASTER'S DEGREE
Master's degrees in mathematical physics are not awarded. Students who, for any reason, become master's degree candidates, will be transferred out of the mathematical physics program into a regular department major.

RESEARCH REQUIREMENTS
Each successful participant in the program is required to submit and to defend a thesis of original research. The student may carry out research under the direction of any graduate faculty member in the Department of Mathematics or the Department of Physics.

LANGUAGE REQUIREMENT
Each student in the program must fulfill the language requirement of the department in which the student has matriculated.

Population Studies
The graduate certificate program in population studies, offered through the population program of the Institute of Behavioral Science, provides master's and doctoral degree students with recognition for interdisciplinary work in demography. The population program, which is international in scope and has an applied and policy-oriented focus, fosters research on population trends and patterns and provides training in population analysis. Students who are earning graduate degrees through the departments of anthropology, economics, geography, or sociology and are majoring in demography are eligible to petition for admission to the program.

The population program emphasizes research training through direct faculty-student interaction and involvement in research projects. In addition, students develop competence in a field of specialization such as family, gerontological, or spatial demography. Students work under the close supervision of a faculty member and develop both substantive knowledge and research skills relevant to their specialization. They are also required to take three core courses: Economic Demography, Formal Population Geography, and Population Issues, Problems, and Policies. Students are granted a certificate on the basis of the three core courses, their applied research, and their thesis or dissertation.

Questions about the certificate program in population studies should be directed to the Population Program, Institute of Behavioral Science, Campus Box 484, University of Colorado at Boulder, Boulder, CO 80309-0484; (303) 492-7986.

Telecommunications
The graduate interdisciplinary program in telecommunications is unique in the breadth it gives those concerned with the technology, planning, and management of telecommunications systems. The master of science (M.S.) is offered in telecommunications; students may also receive an M.E. with an emphasis in telecommunications. The program involves a number of traditional University schools and departments, including journalism and mass communication, computer science, electrical and computer engineering, finance, management, information systems, and political science. Specifically, the program offers courses concerned with the technology of existing and future telecommunications systems, their cost effectiveness, their capacity for expansion, and the trends in telecommunications traffic. The curriculum also includes detailed study of the political aspects of telecommunications, such as government usage of telecommunications, regulation, and law, with procedures and trends at the local, national, and international levels. Also included is a study of the financing of the telecommunications industry and a consideration of the sociocultural impact of modern telecommunications.

Participants in the program include both mid-career professionals and entry-level students. Students are expected to have career interests in telecommunications even though their undergraduate study may have been in such fields as political science, business, economics, journalism, or engineering. The program of study is geared to the needs of individual students and their special areas of interest. The selection of courses is arranged with the student's faculty advisor to cover both technical and nontechnical areas.

Students entering the M.S. program are expected to be adept in mathematics through trigonometry, Students without a year of calculus and a semester of computer science will be expected to attain such proficiency as part of their curriculum.

Students selecting to receive an M.E. with an emphasis in telecommunications must have a 3.00 undergraduate GPA in electrical engineering, computer science, or engineering physics with proficiency in linear systems, probability, linear algebra, computer systems, and communications theory. In addition to course work in telecommunications technology, policy, management, and business, M.E. students must take at least 9 credit hours of graduate-level electrical engineering courses. As with all M.E. degrees, there is no residency requirement; thus, course work may be completed via CATECS or the National Technological University satellite delivery system. Students must complete 30 credit hours of course work, complete a report on a creative investigation, and make an oral defense.

The minimum duration for either the M.S. or M.E. program is 12 months. Most students, however, are expected to pursue a 16-month curriculum to enhance their background as well as gain a strong grasp of the various issues in telecommunications. For the M.S., a minimum of 32 hours, including 6 hours of thesis, is needed to graduate, but students are encouraged to take at least 40 hours. For the M.E. degree, a minimum of 30 hours and a project are required.

A suitable academic program is planned for each individual. Some of the offerings are listed below.

First Year

Fall Semester
FNCE 5050 Fundamentals of Finance (offered every semester)
INF 4500 Introduction to Management (offered every semester)
JOUR 5644 Radio/TV Station Organization and Operation
JOUR 6211 New Media and Development
MKTG 5030 Fundamentals of Marketing (offered every semester)
ORMC 5040 Fundamentals of Management and Organization (offered every semester)
PSCI 5106 The Political System and Telecommunications
TLEN 5194 Strategic Planning for Telecommunications
TLEN 5300 Introduction to Telecommunications System Theory
TLEN 5510 Telecommunications Systems
TLEN 5530 Data Communications I
TLEN 5600 Telecommunications Seminar
TLEN 6950 Master’s Thesis

Spring Semester
CSCI 7143 Topics in Computer Systems
JOUR 5821 Telecommunications Policy
JOUR 6781 Economic and Political Aspects of Mass Communication
TLEN 5310 Telecommunications Systems (offered both fall and spring semesters)
TLEN 5350 Trends in Satellite Communication Systems
TLEN 5360 Telephone Systems
TLEN 5450 Data Communications 2
TLEN 5460 Telecommunications Seminar
TLEN 5830 Telecommunications Pricing and Economics
TLEN 5831 Future of Telecommunications
TLEN 5832 Engineering Economy for Telecommunications
TLEN 5833 Introduction to UNIX, C, and CTT
TLEN 5835 LANS, WANS, and FDDI
TLEN 5836 Law and Regulation for Telecommunications
TLEN 5837 Management and Information Technology
TLEN 6950 Master’s Thesis

Second Year
Full Semester
TLEN 5340 ISDN (Integrated Systems Digital Network)
TLEN 5370 Optical Communications and Transmission
TLEN 5400 Traffic and Queueing Theory
TLEN 5920 Independent Study/Advanced Telecommunications Laboratory
TLEN 5834 Network Management
TLEN 5838 Strategic Planning for Telecommunications
TLEN 5839 The Economics of Telecommunications Policy
TLEN 6950 Master’s Thesis

M.E. degree students work with their advisor to integrate three electrical and computer engineering graduate courses into their course work.
Formal instruction in journalism began at the University of Colorado at Boulder in 1909. Journalism was made a department of the College of Arts and Sciences in 1922 and became the College of Journalism within the College of Arts and Sciences in 1957. The Board of Regents authorized a separate School of Journalism in 1962. In 1985, the name of the program was changed to the School of Journalism and Mass Communication to reflect its broad range of instructional and research activities.

The school offers its undergraduate majors superior professional and media studies instruction with a broad education in the liberal arts. It conducts research into mass communication and provides service to the mass media, other state educational institutions (including high schools), and the public at large. The school makes courses available to nonjournalism majors within the limits of space and equipment, upon which majors properly have first claim.

Accreditation
The School of Journalism and Mass Communication is accredited by the Accrediting Council on Education for Journalism and Mass Communications. It is a fundamental principle of the ACEJMC that education for journalism be broadly based. Accordingly, undergraduate journalism and mass communication students at CU-Boulder take approximately three-fourths of their college work outside the school and approximately one-fourth in the school.

Accredited programs, as described by the ACEJMC, are distinguished by the following characteristics:
1. They maintain a professional curriculum with one or more specialties leading to a bachelor's degree and/or advanced degree or degrees in journalism.
2. They carry on the professional training of general practitioners for the field of journalism while giving due consideration to service, the profession, and research.
3. They strive to serve national media as well as media of their own states.
4. They are committed to a philosophy of professional training that places strong emphasis on liberal arts studies.
5. They provide close relationships between students and teachers.

Facilities and Research Activities
Laboratories. Students work in laboratories designed for reporting, editing, advertising, graphics, radio, television, and photojournalism. They have opportunities to use video cameras and recorders, video display terminals, personal computers, radio and television studios, and the Associated Press wire service.

Reading Room. A reading room for students contains daily and weekly newspapers from Colorado and elsewhere, scholarly and trade publications, and other professional material.

Internships. Majors are encouraged to seek internships, with which the school assists. In addition to working for the school's newspaper, the Campus Press, students intern with weekly and daily newspapers, advertising and public relations agencies, social service agencies, businesses, and radio and television stations. Students also work for the Colorado Daily, the campus cable network, and KUCB (the University's student radio station).

Center for Mass Media Research. The center is responsible for encouraging and focusing interdisciplinary research in a wide array of areas involving mass communication. Students and faculty participate in its programs and projects, which focus on research in the social, cultural, economic, and policy aspects of the mass media and telecommunications.

Career Opportunities
The school offers undergraduate programs in advertising, news-editorial, broadcast news, and broadcast production management. Graduates find careers with newspapers, magazines, broadcast, cable and audio/video production companies, advertising and public relations firms, science, industry, government, and in secondary and higher education. The School of Journalism and Mass Communication assists students in career planning and job placement.

Study Abroad Programs
The School of Journalism and Mass Communication, in conjunction with the Office of International Education, encourages students to participate in the University’s study abroad programs. Since the year of study abroad usually is undertaken during the junior year, prospective majors are urged to plan early and seek advising from the Journalism and Mass Communication faculty. Programs are offered in Costa Rica, Egypt, France, Germany, Great Britain, Israel, Italy, Mexico, Spain, and Taiwan. Information and application forms are available at the Office of International Education, Environmental Design Building 92, Campus Box 123, University of Colorado at Boulder, Boulder, CO 80309-0123.

Student Organizations
Through an elected student government, students conduct a wide range of activities and assist in forming policies of the school.

The school has chapters of the Society of Professional Journalists, Sigma Delta Chi; Women in Communication; and the American Advertising Federation.

ACADEMIC EXCELLENCE
Honors
Journalism and mass communication students may graduate with general honors and/or school honors. Students interested in general honors must consult the honors program office. The school may award the bachelor's degree with honors to students who have a 3.25 cumulative grade point average and a 3.50 grade point average in journalism and mass communication courses, complete an independent study in journalism and mass communication involving scholarly research effort, and demonstrate a high degree of professional skill. Application for school honors must be made to the dean at the beginning of the student's final semester.

Students whose academic records rank in the upper 10 percent are eligible for election to Kappa Tau Alpha in recognition of outstanding scholastic achievement.

Scholarships, Loans, and Awards
The following scholarships, loan funds, and awards are available annually to officially admitted journalism and mass communication majors.

More detailed information is available in the School of Journalism and Mass Communication office. Applications must be sub-
mitted to the dean of the school by December 1 of each year.

Boulder Press Club Scholarship Burns Memorial Scholarship, awarded to an advertising major.
Gene Cervi Memorial Scholarship
Colorado Press Women Scholarship, awarded to a woman student
Denver Woman’s Press Club, awarded to a woman student
Alvin G. Flanagan Scholarship
Lisa Gorman Memorial Scholarship
Marcella Gibbons Hertzog Scholarship, endowed by Georige Carlson
Brian Hostetler Memorial Scholarship, awarded to a broadcast major
Raymond B. Johnson Award
Nannie Linn Endowed Scholarship
Winton Lemen Scholarship
Dominic Munari Memorial Scholarship, awarded to a minority and/or Colorado resident
Mile High Kennel Club Scholarship, awarded to a senior from the Denver metropolitan area
L.C. Paddock Memorial Scholarship
Gladys Van Frank Memorial Scholarship, awarded to a print journalism major
J. Ember and Agnes P. Sterling Scholarship
Raymond B. Johnson Memorial Fund, provided for student loans
William M. Long Memorial Fund, provided for student loans
Sid Wells Memorial Fund, provided for student loans

ACADEMIC STANDARDS

Scholastic Suspension
Journalism students are subject to suspension if they do not maintain a cumulative University grade point average of 2.25 and a cumulative journalism and mass communication grade point average of 2.50.

Students whose grade point averages fall below either of these levels are normally placed on probation for one semester, during which they have an opportunity to raise their averages to the required levels. Students whose averages continue below the required levels are subject to suspension from the School of Journalism and Mass Communication and will be notified in writing.

Scholastic records will be reviewed as soon as possible after each semester, and students will be informed in writing if they are to be placed on probation or suspension.

The normal period of suspension is two regular semesters (one academic year, excluding summer sessions). The period of suspension will be stated in the suspension notice to the student. A student suspended a second time will be reinstated only on the basis of unusual circumstances, which the student should state in a petition to the dean of the school.

Academic Dishonesty
The School of Journalism and Mass Communication has adopted a statement on academic dishonesty to maintain the highest standards of intellectual honesty. Copies of the statement are available from all advisors and in the school office.

ADMISSION AND ENROLLMENT POLICIES

Requirements for Admission
Students planning to major in journalism and mass communication at the University of Colorado normally enroll as pre-journalism and mass communication freshmen in the College of Arts and Sciences or complete their freshman and sophomore years in some other college institution.

PRE-JOURNALISM AND MASS COMMUNICATION
Pre-journalism and mass communication students are enrolled in the College of Arts and Sciences until they are eligible to transfer into the School of Journalism and Mass Communication, which normally occurs at the end of the sophomore year. They must have completed or be working towards completing 60 semester hours with a grade point average of at least 2.50. These students must consult with advisors in the school.

Before they can apply for admission to the school, pre-journalism and mass communication majors must make satisfactory progress in courses that meet the content areas of study requirement in the College of Arts and Sciences. They are also encouraged to take writing courses and a foreign language. Two journalism classes (JOUR 1001 and 2001) must also be taken with a GPA of at least 2.50 before application.

Students wishing to apply to the School of Journalism and Mass Communication must fill out an intramural transfer (IUT) form and a letter of application by October 1 for spring admission or March 1 for fall admission. Students must indicate the major sequence in which they wish to enroll.

Meeting these minimum requirements does not guarantee a student admission to the school.

Transfer Students
Students applying to transfer into the School of Journalism and Mass Communication from another institution should have 60 semester hours of college credit and should have completed two introductory courses in journalism with a GPA of at least 2.50 before they apply. Students without 60 hours of credit should apply to the College of Arts and Sciences, pre-journalism major.

Attendance Regulations
Students are expected to attend classes regularly and to comply with the attendance regulations specified by their instructors. At the beginning of each semester, students will be informed by their instructors of policies governing attendance in their classes. A student who does not attend any of the first week’s sessions of a class during a term will be dropped from the class.

Credit Policies
PASS/FAIL
In addition to the University’s general policies, majors in the School of Journalism and Mass Communication may not take any journalism and mass communication course pass/fail, but any other course may be taken pass/fail. Up to 16 hours of non-journalism courses may be taken pass/fail, except for transfer students, for whom the limit is 1 hour in every 8 attempted at the University of Colorado. Only 6 hours of pass/fail may be taken in any one semester.

TRANSFER CREDITS
Credit in subjects transferred from other institutions to the University of Colorado is limited to the amount of credit given for similar work at the University of Colorado. Transfer credits in journalism and mass communication are limited to 12 semester credits from four-year institutions and 6 semester credits from two-year institutions.

All transfer credit is subject to approval of the dean of the school. A proficiency examination in journalistic writing and language skills may be required of those who wish to transfer credit equivalent to JOUR 2001.

Residence Requirement
A candidate for a degree from the School of Journalism and Mass Communication must earn the last 30 hours in residence at the University of Colorado. This may include courses taken on the Boulder, Denver, or Colorado Springs campus.

Senior Requirement
Seniors should file a diploma card with the school by October 1 for December graduation, January 15 for May graduation, and June 1 for August graduation. Diploma cards are available at the office of the School of Journalism and Mass Communication.
Withdrawal
Students may withdraw at any time prior to the start of the final examination period. Students are encouraged to consider the Time Out Program when their withdrawal from the University is temporary.

UNDERGRADUATE
DEGREE REQUIREMENTS

General Education in Journalism
The following areas of knowledge are central to the undergraduate degrees in journalism and mass communication:
• knowledge of the nature and functions of contemporary mass media;
• knowledge of the history of national and international mass communication;
• appreciation of the unique role and responsibility of mass communication in a democracy;
• knowledge of the Constitutional provisions relating to freedom of the press and expression;
• knowledge of the laws controlling and supporting freedom of the press and expression;
• knowledge of the formation and influence of public opinion; and
• an understanding of social responsibility and media ethics.

In addition, students completing a degree in journalism and mass communication acquire:
• the ability to gather information from records and by asking questions;
• the ability to write correctly, concisely, and interestingly; and
• the ability to perform in a professional setting.

The following areas of knowledge are central to the degree in advertising:
• understanding of the relationship of advertising to the presentation of news and entertainment;
• knowledge of the organization of the advertising industry;
• understanding of research techniques applicable to the industry;
• knowledge of how advertising programs are planned and evaluated;
• understanding of the principles of advertising writing and design;
• knowledge of the principles of advertising campaign planning; and
• knowledge of issues and controversies surrounding the effects of the industry on society at large.

In addition, students completing the degree in advertising acquire:
• the ability to analyze a communication problem in order to determine if it's amenable to solution through advertising;
• the ability to analyze alternative solutions to a communication problem and to present succinct arguments for recommendations;
• the ability to develop a comprehensive written plan for the solution of a communication problem; and
• the ability to present complex material persuasively using oral, visual, and written forms.

The following areas of knowledge are central to the broadcast degrees:
• knowledge of the economics of broadcast production;
• knowledge of electronic media organization;
• understanding of the principles of radio and television production; and
• knowledge sufficient to evaluate broadcast media performance.

In addition, students completing either of the degrees in broadcast acquire:
• the ability to write general news pieces as well as specialized report packages; and
• the ability to use equipment to shoot and edit broadcast materials.

The following areas of knowledge are central to the news-editorial degree:
• knowledge of the structure and organization of print media in the United States;
• knowledge of the economics of print media organizations; and
• knowledge sufficient to evaluate print media performance.

In addition, students completing the news-editorial degree acquire:
• the ability to report with accuracy, fairness, and balance;
• the ability to write general news pieces as well as specialized reports;
• the ability to correct and perfect story manuscripts for publication; and
• the ability to execute appropriate publication design.

Advising
Majors and premajors are required to consult an advisor each registration period. Advising is available from faculty and staff throughout the academic year, and major advising sheets are provided for each sequence. However, students are ultimately responsible for fulfilling all degree requirements.

Requirements for Graduation
The undergraduate degree offered is the bachelor of science degree.

A total of 124 semester hours with a grade point average of not less than 2.25 overall and 2.50 in journalism and mass communication courses is required for the degree. Of these 124, at least 40 must be upper-division credits—12 hours must be upper division in an area of concentration, and 28 to 34 must be in journalism. In addition, 65 of the 124 hours must be in arts and sciences.

No student may take more than 34 hours of journalism in the 124 hours required for graduation. The upper limit is imposed to ensure wide exposure of majors to liberal arts courses. Students who wish to develop expertise in a particular specialty are advised to take courses in science, business, political science, or a relevant area.

Double-Degree Programs
Students may complete requirements in two fields and receive two degrees from the University. Such double-degree programs are available combining journalism and mass communication with business, music, or disciplines in the College of Arts and Sciences. Students must make application for a double-degree program in both the School of Journalism and Mass Communication and the College of Business and Administration, the College of Arts and Sciences, or the College of Music. Any other combined program must be arranged by consulting both schools or colleges.

SEQUENCES
Four areas of professional study (sequences) are available in the School of Journalism and Mass Communication.

A fifth sequence, Media Studies, has been approved by the faculty and is scheduled for implementation in fall 1993. Information on this sequence is available in the Journalism and Mass Communication main office.

Advertising
Advertising is designed to prepare students for careers with newspapers, magazines, radio, television, and advertising and public relations firms.

Required Courses  Semester Hours
JOUR 1001 Contemporary Mass Media...........3
JOUR 1001 Mass Media Writing A..............3
JOUR 3403 Principles of Advertising..........3
JOUR 3453 Advertising Copy and Layout......3
JOUR 3463 Advertising Media.................3
JOUR 3473 Advertising Research..............3
JOUR 3771 History of Journalism.............3
JOUR 4403 Advertising Campaigns............4
JOUR 4931 Internship or JOUR 3913
Advertising Practicum.......................3
Journalism electives..........................0-6
ECON 2020 Principles of Macroeconomics.....4
MKTG 3000 Principles of Marketing..........3

Broadcast News
Broadcast news is designed to prepare students as news directors, reporters, editors, and writers for television or radio stations.
Required Courses  Semester Hours
JOUR 1001 Contemporary Mass Media ..........3
JOUR 2001 Mass Media Writing ...............3
JOUR 3001 Reporting of Public Affairs ..........3
JOUR 3473 Advertising Research or JOUR 4791 Mass Communication and Public Opinion .......3
JOUR 3504 Radio and Television News ..........3
JOUR 3644 Principles of Broadcast Production .............................................3
JOUR 3771 History of Journalism .............3
JOUR 4624 Advanced Radio-Television News ....3
JOUR 4651 Mass Communication Law ..........3
Journalism electives .............................................1-7

Broadcast Production Management
Broadcast production management is designed to prepare students for other careers in radio or television, including positions in programming, advertising, promotion, and management.

Required Courses  Semester Hours
JOUR 1001 Contemporary Mass Media ..........3
JOUR 2001 Mass Media Writing ...............3
JOUR 3403 Principles of Advertising ..........3
JOUR 3473 Advertising Research or JOUR 4791 Mass Communication and Public Opinion .......3
JOUR 3604 Radio and Television News ..........3
JOUR 3644 Principles of Broadcast Production .............................................3
JOUR 3674 Television Production 2 ..........3

GRADUATE DEGREE PROGRAMS

Master’s Degree
A master of arts degree in journalism and mass communication is awarded after a student has demonstrated an advanced understanding of the role of mass media in society as well as competence or potential as a professional. Students may come into the master’s program with or without a foundation of educational or practical experience in journalism and mass communication. Upon completion of the program, students may enter or return to journalism, teach, or continue graduate studies in a doctoral program.

The School of Journalism and Mass Communication offers professional programs in news, integrated marketing communications, and a mass communication research program. Graduate students should read carefully requirements for advanced degrees in the Graduate School section of the catalog.

The School of Journalism and Mass Communication offers professional programs in news, integrated marketing communications, and a mass communication research program. Graduate students should read carefully requirements for advanced degrees in the Graduate School section of the catalog.

Requirements
The master’s program in news provides students with the knowledge and skills required to be literate and able in both print and broadcast media and to enter the profession at an advanced level. Students concentrate on in-depth reporting in either print or broadcast, although they are enrolled together in both required and elective courses. Further, students are advised and encouraged to develop an area of reporting specialization to combine with their professional skills training. Such specialties might include education, business, the environment, science, politics, or the arts. The program culminates with a professional project. Students complete a minimum of 30 graduate semester hours and should be able to finish the degree in three semesters. Students who enter the master’s program in news are not expected to have a background in journalism.

The integrated marketing communication (IMC) master’s degree is a marketing communication management program that concentrates on a variety of functional areas, including advertising, public relations, direct response, sales promotion, and packaging. The program’s focus is on strategic planning. Students complete a balanced curriculum that includes both theory and practice. No thesis or professional project is required. Instead, students complete an on-site audit of an organization’s marketing communication program. A minimum of 42 graduate credit hours are required for the IMC program, which students should be able to complete in 16 months.

The M.A. program in mass communication research is open to students who have a background in journalism, through either extensive professional media experience or a bachelor’s degree in journalism or mass communication. The curriculum concentrates on theories of mass communication, research methods, and concepts in law, history, politics, public opinion, international mass communication, and ethics. The degree requires a thesis. Students must complete a minimum of 51 graduate semester hours, including a thesis. They can complete the degree in three semesters.

Every effort is made to suit the course work to each candidate’s needs and interests through the Coordinator of Master’s Programs, 80309-0287.

Ph.D. Degree
The School of Journalism and Mass Communication offers a media studies track in the Ph.D. program in communication. The program examines interactions among the major components of mass communication—media institutions, their contexts and messages, and their audiences or publics—as processes by which cultural meaning is generated. It examines that process through communication and through social, economic, political, historical, and legal theories from both national and international perspectives.

Requirements
The Ph.D. curriculum includes requirements in foundation theory and perspective, methods, and elective options in the School of Journalism and Mass Communication and other appropriate academic units. Comprehensive examinations and a dissertation are also required. Students who enter the Ph.D. program without a professional or academic background in the media, will be required to augment their studies through selected course work. Under certain circumstances, students will consider granting admission to applicants without master’s degrees. For current admission requirements and curriculum information, contact the Director of the Doctoral Program, School of Journalism and Mass Communication, Campus Box 287, University of Colorado at Boulder, Boulder, CO 80309-0287.

COURSE DESCRIPTIONS
The following courses are offered in the School of Journalism and Mass Communication on the Boulder campus. This listing does not constitute a guarantee or contract that
any particular course will be offered during a given year.

For current information on times, days, and instructors of courses, students should consult the Schedule of Courses issued at the beginning of each semester.

Some courses may be open to nonmajors. Students should check for current policies.

Courses numbered in the 1000s and 2000s are intended for lower-division students and those in the 3000s and 4000s for upper-division students. Courses numbered in the 5000s are primarily for graduate students, but in some cases may be open to qualified undergraduates. Normally, courses at the 6000, 7000, and 8000 level are open to graduate students only.

Courses are organized by subject matter and are listed numerically by last digit (courses ending in the number "0" are listed before courses ending in "1, " and so on). The number after the course number indicates the semester hours of credit that can be earned in the course.

Abbreviations used in the course descriptions are as follows:

Preq.—Prerequisite
Coreq.—Corequisite
Lab.—Laboratory
Rec.—Recreation
Lect.—Lecture

Core Curriculum and General Electives

JOUR 1001-3. Contemporary Mass Media. Examines the mass media's interaction with society; looks at journalism and the mass media in historical, intellectual, economic, political, and social contexts.

JOUR 2001-3. Mass Media Writing. Introduces information gathering and writing techniques appropriate for the mass media. Emphasizes basic skills in grammar, organization, and information collection in both lecture and laboratory formats.

JOUR 4201-3. International Mass Communication. Covers mass media in the international system, including comparative examinations of national and international press organizations, methods, and content. The role of mass media in the developed and developing countries and the international flow of news and opinion.

JOUR 4561-3. Electronic Publishing. Studies emerging information dissemination techniques variously called teletext, videorec, etc. Participation in writing, editing, advertising, and promotion of school-operated cable television text-on-screen system.

JOUR 4651-3. Mass Communication Law. Studies state and federal laws and court decisions that affect mass communication in order to develop knowledge of mass media rights and responsibilities and an understanding of the legal system.

JOUR 4661-3. Newspaper Management. Covers management and organization of newspapers, including an understanding of daily management considerations and what is involved in being an employee in today's newspaper environment. Same as JOUR 5661.

JOUR 4791-3. Mass Communication and Public Opinion. Topics include opinion-shaping role of the mass media, theories of public opinion and propaganda, polling, communications effects, and communication theories. Same as JOUR 5791.

JOUR 4831-3. Publication Design and Production. Covers editorial and production aspects of magazines, both general and specialized, including company publications, industrial journals, and other types of limited-audience publications. Same as JOUR 5831.

JOUR 4841-1(3). Undergraduate Independent Study.

JOUR 4871-1(3). Special Projects.

JOUR 4931-1(3). Internship.

JOUR 5001-1(4). Research in Journalism. Students participate in research projects with faculty members or pursue their own primary research interests.

JOUR 5331-3. Scholastic Publications. Emphasizes teaching, sponsoring, organizing, and financing student newspapers, yearbooks, and literary magazines at all grade levels.

JOUR 5511-3. Newsgathering I. Covers problems and practice in reporting news of government, politics, the courts, and industry, business, science, and other areas involving public issues. For graduate students only.

JOUR 5661-3. Newspaper Management. Same as JOUR 4661.

JOUR 5831-3. Publication Design and Production. Same as JOUR 4831.

JOUR 5841-1(3). Graduate Independent Study.

JOUR 5851-1(3). Graduate Professional Project.

JOUR 5861-3. Visual Communication. Focuses on the perceptual foundations of visual communication and applies these principles to specific practices in mass communication.

JOUR 5931-1(3). Internship.

JOUR 6011-1. Proseminar in Journalism. Introduces new graduate students to the University, the school's graduate program, journalism graduate faculty, and opportunities for graduate study.

JOUR 6201-3. Readings in International Mass Communication. Covers mass communication within the international system, including similarities and differences in functions, facilities, and content; social theories of the press; and the international flow of mass communication.

JOUR 6211-3. New Media and Development. Studies and analyzes communications technologies and techniques used in addressing social problems in developing countries.

JOUR 6551-3. Telecommunication Policy. Surveys historical and contemporary developments in telecommunications policy, emphasizing social and cultural dimensions and focusing primarily on the context of the United States.

JOUR 6651-3. Press and the Constitution. Graduate seminar in communications law. Studies changing law and applied legal research techniques.

JOUR 6661-3. Media Ethics and Responsibility. Develops a theoretical framework with which to recognize and analyze ethical issues as they arise in the mass media.

JOUR 6711-3. Mass Communication and the Arts. Inquires into relationship of the arts and the mass media, including study of critics, their function, and their works.

JOUR 6721-3. Message Effectiveness. Investigates such areas as information processing and its relationship to message objectives. Students investigate such areas as how messages design decisions, and the effects of various types of communication efforts.

JOUR 6781-3. Economic and Political Aspects of Mass Communication. Economic problems and political issues relevant to newspapers, magazines, broadcasting, and CATV. Problems of telecommunications and the impact of future technology on mass communication.

JOUR 6941-3. Master's Degree Candidate.

JOUR 6951 (1-6). Master's Thesis.

JOUR 7011-3. Proseminar in Communication Theory I. Introduces the principal concepts, literature, and theoretical and paradigmatic perspectives of media studies and mass communication and their ties and contributions to parallel domains in the social sciences and humanities.

JOUR 7871-3. Special Topics.

JOUR 7951 (1-10). Doctoral Thesis.
News Editorial/Public Relations

JOUR 3902 (1-3). Newspaper Practice. News work on Campus Press. May be repeated for a total of six hours.
JOUR 4002-3. Reporting. 2. In-depth reporting and writing resulting from investigation, analysis, and critical thought. Prereq.: JOUR 3001.
JOUR 4102-3. Advanced Photography. Advanced camera and darkroom techniques, the picture story, picture editing, trends in pictorial journalism, and individual projects. Same as JOUR 5102. Prereq.: JOUR 3102.
JOUR 4282-3. Public Relations Programs. Develops and applies public relations programs, from identification of the problem through execution of the public relations techniques. Same as JOUR 5282. Prereq.: JOUR 4272.
JOUR 4503-3. Advanced Reporting. Writing news and features about actual events for publication under deadline pressure. Same as JOUR 5503. Prereq.: JOUR 4502.
JOUR 4552 (1-3). Advanced Editing. Copy editing, headline writing, page design, and news evaluating. Day-to-day newsroom operations are emphasized in a newsroom environment. Students edit the Campus Press using Composing computer equipment.
JOUR 4702-3. Critical Writing for the Journalist. Analyzes the entertainment area, especially as it pertains to the print media; emphasizes the composition of criticism and the attitudes and writing techniques of individual critics. Same as JOUR 5702. Prereq.: JOUR 3001.
JOUR 5102-3. Advanced Photography. Same as JOUR 4102.
JOUR 5272-3. Public Relations. Same as JOUR 4272.
JOUR 5282-3. Public Relations Programs. Same as JOUR 4282.
JOUR 5502-3. Advanced Reporting. Same as JOUR 4502.
JOUR 5602-3. Editorial and Opinion Writing. Same as JOUR 4602.
JOUR 5702-3. Critical Writing for the Journalist. Same as JOUR 4702.
JOUR 5802-3. Magazine Article Writing. Same as JOUR 4802.
JOUR 5943-3. Advertising Research. Introduces students to applied research methods and provides practice in using research in marketing and advertising decision making.
JOUR 5943-3. Advertising Practice. Advertising work on Campus Press. May be repeated for a total of six hours.
JOUR 5943-3. Senior Colloquium in Advertising. Focuses on current issues affecting advertising and public relations practice. Class sessions are conducted by members of the Denver advertising community at their various places of business.
JOUR 5943-3. Advertising and Society. Examines the relationship of advertising to society and the economy. Same as JOUR 5403. Prereq.: Same as JOUR 5403.
JOUR 5943-3. Advertising Campaigns. Same as JOUR 5943.
JOUR 5913-3. IMC Principles and Practices. IMC as a discipline; the relationship of IMC to public relations, marketing, and advertising; the role of public relations professionals in developing and implementing IMC strategies; the role of advertising, PR, sales promotion, and direct response in terms of their strengths and weaknesses in an integrated program. Focuses on strategy and planning, with students concentrating on integrating targets, timing, and message strategies. Looks at both U.S. and global marketing communication practices.
JOUR 5923-3. IMC Cases. A case in IMC management that use the case method to analyze and evaluate strategy and planning. The course will use real-life examples, both domestic and international, from service marketing, industrial marketing, consumer products, and non-profit organizations to give students a chance to analyze and critique the use of IMC strategies and practices.
JOUR 5933-3. IMC—Creative Strategy. Focuses on the role of the creative team in the development of an integrated strategy. Students learn to develop and implement an integrated strategy, and understand the role of advertising, PR, sales promotion, and direct response in terms of their strengths and weaknesses in an integrated program.

FACULTY

WILLARD D. ROWLAND, JR., Dean; Professor. B.A., Stanford University; M.A., University of Pennsylvania; Ph.D., University of Illinois.

LEN ACKLAND, Associate Professor. B.A., University of Colorado; M.A., Johns Hopkins School of Advanced International Studies.

SAMUEL J. ARCHIBALD, Professor Emeritus.

JOANNE EASLEY ARNOLD, Associate Dean, Associate Professor. B.A., M.A., Ph.D., University of Colorado.

JAMES E. BRINTON, Professor Emeritus.

ANDREW CALABRESI, Assistant Professor. B.A., Denison University; M.A., Ph.D., Ohio State University.

RAMON CHAVEZ, Associate Professor. B.A., Texas Tech University; M.A., University of Washington.

MALCOLM A. DEANS, Senior Instructor Emeritus.

THOMAS R. DUNCAN, Associate Professor. B.S., Northwestern University; M.A., Northwestern University; Ph.D., University of Iowa.

SHU-LING C. EVERETT, Assistant Professor. B.A., Fu-Zen University; M.S., Southern Illinois University; Ph.D., University of Tennessee.

STEPHEN E. EVERETT, Assistant Professor. B.S., Ph.D., University of Tennessee.

DON HEIDER, Instructor. B.A., Colorado State University; M.A., American University.

HAROLD E. HILL, Professor Emeritus.

LLOYD HOOPER, Associate Professor. B.A., McPherson College; M.A., Annenberg School of Communications, University of Pennsylvania.

STEPHEN J. JONES, Assistant Dean, Instructor. B.A.; M.A., West Virginia University; Ph.D., University of Utah.

PRANK L. KAPLAN, Associate Professor. B.A., M.A., University of Southern California; Ph.D., University of Wisconsin.

SAM KUCZUN, Professor. B.S., M.S., Boston University; Ph.D., University of Minnesota.

POLLY E. McLEAN, Assistant Professor. B.A., Richmond College, City University of New York; M.S., Columbia University; Ph.D., University of Texas.

WILLIAM I. McREYNOLDS, Professor Emeritus.

SANDRA E. MONIARTY, Professor. B.J., University of Missouri; M.S., Ph.D., Kansas State University.

MARGUERITE J. MORITZ, Associate Professor. B.S., M.S., Ph.D., Northwestern University.

SUE O'BRIEN, Associate Professor. B.A., Grinnell College; M.P.A., Harvard University.

PATRICIA RAYBON, Associate Professor. B.A., Ohio State University; M.A., University of Colorado.

DONALD RIDGWAY, Instructor. B.J., University of Missouri; B.A., Washburn University.

ROBERT B. RHOADE, Professor Emeritus.

BRETT ROBBS, Associate Professor. B.A., Rhodes College; M.A., Ph.D., Vanderbilt University.

ARDYTH SOHN, Associate Professor. B.A., University of Illinois; M.S., Ph.D., Southern Illinois University.

DON S. SOMERVILLE, Professor Emeritus.

MICHAEL TRACEY, Professor. B.A., University of Essex; Ph.D., University of Leicester.

ROBERT TRAGER, Professor. B.A., San Francisco State College; M.A., Ph.D., University of Minnesota; J.D., Stanford University.

A. GAYLE WALDROP, Professor Emeritus.

JAN WHITT, Assistant Professor. B.A., M.A., Baylor University; Ph.D., University of Denver.
School of Law

Gene R. Nichol, Jr., Dean

The School of Law was established in 1892. It is a charter member of the Association of American Law Schools, organized in 1901, and has been on the list of approved law schools of the American Bar Association since the first publication of such a list in 1923. Such approval is based upon high scholastic standards, a three-year program of full-time resident study, a well-qualified faculty, good library facilities, and high admission qualifications. At the University of Colorado School of Law, a relatively small student body of 475 and a favorable faculty-student ratio produce classes of a size that encourages discussion. Classes normally consist of no more than about 80 students, and many are much smaller. In addition, faculty are readily available for informal conferences with individual students.

Courses are offered in a wide range of law-related subject matter (see course descriptions). Students are free to take almost all second- and third-year courses as electives after a required first-year curriculum. Special emphasis is available in areas of particular curricular strength at the School of Law such as commercial law, natural resources, and criminal law and procedure. Graduates are academically qualified to take the bar examination in all 50 states provided that, in choosing their curricula, students comply with any individual requirements of states in which they intend to practice.

Law Building and Law Library
The School of Law is housed in the Fleming Law building, located on the southwestern corner of the campus. Teaching facilities include an excellent library, classrooms, seminar rooms, a complete trial and appellate courtroom, and videotape equipment. The building also contains suites for the Legal Aid and Defender Program, Rocky Mountain Natural Resources Clinic, Natural Resources Law Center, Indian Law Clinic, Natural Resources Litigation Clinic, offices for various student organizations, the University of Colorado Law Review, the Colorado Journal of International Environmental Law and Policy, faculty and administrative offices, and a student lounge. The building has ample space to accommodate the current student body of 475.

The law library contains one of the better legal reference collections in the western United States. The collection consists of over 280,000 volumes and microform equivalents. Students and faculty have ready access to a comprehensive collection of American case law from all jurisdictions, statutes of all states (in annotated form when available), and the major digests, encyclopedias, periodicals, and texts dealing with American law. English, Canadian, and other Commonwealth materials are almost complete. A collection of books in German, French, and other foreign languages as well as international law holdings provide a basis for comparative law studies.

Career Services
The school's Office of Career Services offers a broad range of services to students and alumni. Assistance is provided to students as they begin to define their career goals, and in their efforts to obtain part-time and summer employment during law school and full-time employment following graduation. Several services, including a monthly employment newsletter, are also provided for alumni who wish to redefine career goals and/or change employment.

The career services resource library, open to students and alumni, contains information about legal and law-related careers, as well as materials which describe the practice of law in many large and small private firms, corporations, public and community legal agencies, and government agencies at all levels.

The Office of Career Services sponsors a major on-campus interview program, providing students with the opportunity to interview with more than one hundred legal employers who recruit at the School of Law each year. In addition, the Office of Career Services sponsors numerous seminars throughout the academic year at which private and public sector employers discuss the recruitment process, different types of law practice, and career opportunities available to law graduates. The office also conducts a number of clinics in resume writing and interviewing skills each semester. Staff members provide personalized assistance to students and alumni in the preparation of resumes and cover letters and in interview techniques and job search strategies.

Lectureships and Professorships
The Charles Inglis Thomson Trust Fund, created in 1913, enables the School of Law to bring a leading authority in a selected field of law to the school as a visiting professor. Recent Thomson Professors have included Archibald Cox, the Carl M. Loeb University Professor at Harvard Law School, former solicitor general of the United States, and Special Watergate Prosecutor; Victor G. Rosenthal, professor of law at Northwestern University, former president of Reed College, and former president of the Association of American Law Schools; Father Robert Drinan, professor of law at Georgetown University Law Center, former dean of Boston College, and former U.S. congressman; Homer H. Clark, Jr., professor emeritus at the University of Colorado School of Law; and Richard Delgado, professor of law at the University of Wisconsin.

In 1955, a trust fund was established in memory of John R. Coen to bring to the School of Law each year a prominent jurist, scholar, or other public figure to deliver a lecture to the students and faculty of the School of Law. Recent lecturers in the series have included Marvin E. Frankel, former judge, United States District Court for the Southern District of New York; R. Kent Greenawalt; Cardozo Professor of Law, Columbia University; Geoffrey C. Hazard, Jr., Sterling Professor of Law, Yale Law School; Vincent A. Blasi, the Corliss Lamont Professor of Civil Liberties at Columbia Law School; and Susan Rose-Ackerman, the Ely Professor of Law and Political Economy at Yale Law School. The 1991 Coen Lecturer was Professor Martha Minow, Harvard Law School.

Clinical and Extern Programs
Under the supervision of full-time clinical faculty who are experienced trial attorneys, the Legal Aid and Defender Program allows students to represent low-income clients in civil and criminal cases in Col-
orado courts and before administrative agencies.

The Natural Resources Litigation Clinic's docket consists exclusively of environmental litigation that concentrates on water resources development and public lands protection. Clinic cases often require expert testimony and witness preparation; analysis and presentation of detailed scientific and environmental data; and submission of complex and precedent legal briefs. Students work as "associates" in a small environmental law practice representing public interest clients before administrative agencies, state and federal courts, Congress, and state legislatures. In this practice students forge and clarify the law in controversial environmental arenas, and in the process, learn not only from the clinic's staff, but also from matching the best and brightest attorneys and experts the opposition can muster.

Activities
The School of Law offers many activities in addition to those available for students in the University as a whole. The Rothergerber Moot Court Competition, trial practice competitions, and Jessup International Law Moot Court Competition offer students an opportunity to refine their research skills, as well as develop skills in advocacy at the trial and appellate levels. In these competitions, students thoroughly prepare and brief hypothetical cases and then argue before panels of distinguished judges and lawyers.

The University of Colorado Law Review, a professional journal edited entirely by students, publishes scholarly articles and comments on matters of concern to the legal profession at both the national and state levels. The Colorado Journal of International Environmental Law and Policy, a scholarly journal dedicated to examining the legal and policy implications of international environmental issues, was formed by students in the spring of 1989.

The Student Bar Association represents the interests of law students generally. Other student organizations include the American Bar Association/Law Student Division, American Civil Liberties Union, Asian American Law Students Association, Association of Law Students and their Partners, Black Law Students' Association, Business Law Association, Colorado Trial Lawyers' Association, Environmental Law Society, Federalist Society for Law and Public Policy Studies, Health Care Law Society, Hispanic Law Students' Association, Native American Law Students Association, Nicholas R. Doman Society of International Law, Women's Law Caucus, Student Trial Lawyers Association, Phi Alpha Delta, and Phi Delta Phi legal fraternities.

Lectures by leading jurists, lawyers, and scholars broaden exposure to legal issues.

ACADEMIC EXCELLENCE

Order of the Coif
The Order of the Coif is a national law school honor society founded to encourage legal scholarship and to advance the ethical standards of the profession. The University of Colorado is one of only 71 law schools entitled to award the Order of the Coif. Members are selected for demonstrated scholarship from among seniors ranking scholastically in the top 10 percent of their class.

ACADEMIC STANDARDS

Honor System
On the premise that academic dishonesty is incompatible with the dignity and responsibility of the legal profession, the School of Law operates under an honor code which is subscribed to by all entering students. The honor code is a system of rules administered by student officers and demands high ethical conduct, prohibiting, for example, resorting to unauthorized sources in examinations. The same code also allows students considerable individual freedom and responsibility.

Grading and Point System
The School of Law grades on the following numerical basis:

- A = 93-100
- A- = 90-92
- B+ = 86-89
- B = 83-85
- B- = 80-82
- C+ = 76-79
- C = 73-75
- C- = 70-72
- D+ = 66-69
- D = 63-65
- D- = 60-62
- F = 50-59

One semester hour of credit represents one 50-minute class period per week through a semester.

In courses designated as pass/fail or pass/grade, the grade of pass is given when in the judgment of the instructor the quality and quantity of work is such that on a graded basis the work would be the equivalent of at least a 72. If the instructor judges the work not the equivalent of a 72, the work is assigned that letter and numerical grade between 50 (F) and 71. (C) which the instructor determines to be appropriate.

Academic Performance Requirements
Subject to certain qualifications for which the rules of the School of Law should be consulted, students with a cumulative grade point average below 72 at the end of any session or semester are normally excluded at the end of the next semester of attendance, unless by then their cumulative grade point average has been raised to 72.

ADMISSION AND ENROLLMENT POLICIES

Prelegal Preparation
The School of Law at the University of Colorado prescribes no specific pre-law curriculum. Students should pursue their interests, the offerings of their particular colleges, and their personal objectives in studying law. In general, the prelaw student should place primary emphasis on acquiring excellent methods of study, thought, and communication, especially writing. Obviously, these skills can be acquired in a number of different areas, and successful law students and lawyers have college majors in almost every field. College courses should be chosen with care to produce a balanced pattern of skills and insights. An undergraduate major field should be one that requires rigorous application of one's abilities.

Admission Requirements and Standards
The School of Law grants admission to qualified applicants who have received a baccalaureate degree from a properly accredited institution.

The applicant must also show substantial intellectual promise and give evidence of high moral and ethical standards. The entering class in 1992 had a median GPA of 3.40 and a median LSAT score in the 95th percentile.

Admission decisions are based heavily on undergraduate grade point averages and LSAT scores. Also, other factors are weighed because they may indicate ability and motivation, and because diversity in the student body contributes to the educational process. Factors that are considered include variation in economic, social, or cultural background; geographic diversity; variation in undergraduate or graduate program or institution; unusual employment or other experience; demonstrated and unusual quality of leadership; special achievement in overcoming personal handicaps or disadvantages; and the ability to contribute the perspectives of racial or ethnic minorities or other distinct-
to notify students on the list promptly of the likelihood of their admission. Applicants who are accepted for admission must send a confirmation form and a $200 nonrefundable enrollment deposit to the School of Law by the date specified in the letter notifying the applicant of admission.

**TRANSFER AND VISITING STUDENTS**

Transfer students must meet all standards and requirements set forth above for students who have not previously attended law school.

Applicants must arrange to have sent, in addition to the above items: (1) an official transcript showing all law school work as yet undertaken, and (2) upon completion of all law school work undertaken, a letter from the law school dean stating that the applicant is in good standing and eligible to continue without condition. Class rank must be indicated on one of these official documents.

Usually fewer than 5 second-year transfer students are accepted each year. Decisions are based heavily on law school performance.

Admitted students, having previously attended other fully accredited law schools, may receive advanced standing credit for work done in such law schools in an amount and on such conditions as determined by the Office of the Dean. In no event will credit be given toward graduation for any course taken in another law school in which a grade of less than C or its equivalent has been recorded.

The School of Law may admit one or more visiting students who may study at the school for a semester or a year, but who will receive their law degree from their school of origin. Admission as a visiting student is available only to applicants who have completed one or two years of high-quality work at another law school and who have demonstrated a compelling need to attend the University of Colorado School of Law.

Application procedures are the same as for transfer applicants. In addition, however, the dean of the school of origin must send a letter agreeing to accept work satisfactorily completed at the University of Colorado School of Law for credit toward the student’s law degree. Admission as a visiting student allows enrollment in courses on a space-available basis. As a rule, financial aid for a visiting student is handled by the degree-granting institution.

**TRANSFERS—WITHDRAWAL OF ADMISSION**

At least one week prior to enrolling in the School of Law, all students who have been admitted and have confirmed their admission must submit two official transcripts from each college and law school attended, showing all college and postgraduate work completed. Such transcripts must show the student has received a baccalaureate degree from a properly accredited institution.

These transcripts must also show any subsequent work undertaken, whether or not the work was included in the LSDAS evaluation. If such subsequent work is not of substantially similar quality to that included in the LSDAS evaluation, or if the transcripts fail to show the student has received the required baccalaureate degree, the student’s prior admission may be withdrawn.

**Attendance**

Attendance is of great importance. A student who has been absent from more than 20 percent of the total number of classes in a course will ordinarily be excluded from the final examination and will not receive a passing grade in the course.

**Classification of Students**

To be ranked in the second-year class, a student must have passed 31 semester hours of work; to be ranked in the third-year class, 59 hours of work.

**Normal Course Load**

The normal course load is 14 or 15 hours per semester. Students may not register for more than 16 hours or fewer than 10 hours without special permission, and first-year students must obtain permission in order to register for less than a full schedule. A student who discontinues a course at any time without notifying the Office of the Dean and processing the necessary papers will receive an F (50). All first-year students must obtain the permission of the Office of the Dean before dropping any course.

**Dropping Courses**

No student shall be permitted to drop without discredit any seminar or other course with enrollment limited below the maximum at any time after enrollment for the course has reached capacity, except by approval of the Office of the Dean upon a petition showing good cause. Second- and third-year students may not be permitted to drop without discredit any seminar or course with enrollment limited below the maximum which did not reach capacity after the end of the fifth week, or any other course without discredit after the tenth week of any semester or the fourth week of the summer session, except by approval of the Office of the Dean of a petition showing good cause.
Summer Session
A limited summer curriculum is offered at the School of Law. Any student who has completed at least one year in an ABA-accredited law school may register for courses offered during the summer session upon submission of a summer application form together with a letter of good standing from his or her law school. A student may enroll in courses totaling no more than 8 semester hours without special permission from the dean’s office.

The summer curriculum is designed for students with advanced standing. All courses offered in the School of Law will run for the full session unless otherwise announced. A Schedule of Summer Courses with an application form may be obtained after March 1 by writing to the Office of Admissions, School of Law, Campus Box 403, University of Colorado at Boulder, Boulder, CO 80309-0403.

Transcripts of Credit
Official transcripts of credit should be ordered from the Office of the Registrar transcript section, Regent Administrative Center 105, either in person or by writing. Official transcripts are prepared only at the student’s request. Requests for letters of certification including class standing, numerical averages, and attendance dates may be made in person or by writing to the School of Law Registrar, Room 141.

Withdrawals
Students may withdraw from the School of Law at any time up to two days before the beginning of final examinations by obtaining permission of the Office of the Dean. Readmission will be at the discretion of the faculty. Tuition and fee refunds are based on withdrawal date. Consult the Law School Registrar and/or the Bursar’s Office for refund deadlines.

EXPENSES AND FINANCIAL AID
Colorado residents enrolled in the School of Law paid $3,994 in tuition and fees for the 1992-93 academic year; nonresidents paid $11,768. The School of Law’s Office of Admissions will tentatively classify applicants as resident or nonresident students, but the final decision will be made by the tuition classification officer. For more information concerning resident and nonresident classification, consult the University Policies, Programs, and Services section of this catalog.

Living expenses, books, and incidental costs in the amount of approximately $7,800 per year should be added to tuition figures in estimating yearly expenditures.

The Free Application for Federal Student Aid (FAFSA) is the only financial aid application that will be accepted for 1993-94. The FAFSA replaces the Single Form, GAPSFAS, ACT, and CSS. The FAFSA will be available from local high schools, colleges, and universities after January 1.

Students applying for financial aid, including grants, Perkins loans, college work-study, and Stafford loans, must file the FAFSA. PLUS, SLS, and Stafford loans also require a separate application, which can be obtained from the Office of Financial Aid. The Stafford loan application will be mailed out along with an award offer from the Office of Financial aid.

The School of Law also participates in the Law Access Loan Program, a program that includes the Stafford Loan and SLS as well as the Law Access Loan.

Grants are available on a limited basis to eligible resident students and are awarded on the basis of need and timeliness of filing the financial aid application. Nonresident students may not be awarded grants from state funds under present state policy but may be considered for loans and work-study.

Financial aid applications cannot be processed until students have been officially admitted to the School of Law. Students missing the admission deadline are considered late, even if they meet the financial aid application filing deadline.

All students who receive financial aid are required to understand and comply with minimum standards of reasonable academic progress. The Reasonable Academic Progress policy is available to students upon request at the University’s Office of Financial Aid.

For further information regarding financial assistance, contact either the Director of Admissions and Financial Aid, School of Law, Campus Box 403, University of Colorado at Boulder, Boulder, CO 80309-0403, (303) 492-7203, or the office of Financial Aid, Campus Box 106, University of Colorado at Boulder, Boulder, CO 80309-0106, (303) 492-5091.

Part-Time Employment
The study of law is essentially a full-time task. Most students devote from 50 to 70 hours a week to classroom attendance, preparation for class, and other activities directly related to their legal education.

These include participation in appellate briefing and argument competitions, and work in the school’s clinical program. As a consequence, the opportunity for self-support through employment while attending law school is limited. Students may not accept outside employment during the critical first year; however, law-related employment for a limited number of hours may actually enhance the educational experience of second- and third-year students. Students may not commit themselves to employment of more than 20 hours per week, or schedule employment that will interfere with class attendance.

The School of Law’s Office of Career Services assists students in obtaining part-time hourly and summer employment as well as permanent employment for graduates. The University’s Office of Career Services aids those who wish to find conventional employment or work-study placement.

DEGREE REQUIREMENTS

Methods of Instruction
Law school classes are conducted primarily as discussions rather than as lectures. Judicial opinions and statutes are critically analyzed and the principles extracted are used in arguments about hypothetical situations. Other methods of instruction include research and writing, seminars, and practical experience both in clinical programs and by simulation.

Transmission of knowledge of established law is only one element of legal education. The School of Law seeks to train students to use the law, to research and analyze relevant materials, to speak and write effectively, and to evaluate arguments. Significant changes in the law occur frequently, and knowledge of specific laws may become obsolete, but the skills to analyze, argue, and evaluate endure.

Graduation Requirements
The right to change the academic performance requirement and requirements for graduation is expressly reserved to the dean and faculty.

The Juris Doctor (J.D.) degree will be conferred on students who have satisfactorily completed the six-semester curriculum in accordance with School of Law rules. All law school work must be taken in residence; that is to say, in the classroom or under direct personal supervision of the instructor and not by correspondence or extension. No credit toward graduation from the School of Law will be given for any pre-law courses.
The requirements for the J.D. degree are:
1. Completion of 89 semester hours of credit with a numerical average of 72 or better.
2. Completion of all required courses listed under the School of Law curriculum.
3. Completion of one seminar.
4. Study for at least six semesters or equivalent in residence (i.e., passing at least 10 semester hours of study in the classroom or under direct supervision of the instructor) at this or some other accredited law school, with at least 42 hours in residence at the School of Law. If a student is not in residence at the University of Colorado School of Law during the last two semesters, a total of 60 hours in residence is required at the school.
5. Satisfaction of any conditions imposed at the time of admission.

Law Curriculum
The curriculum of the School of Law is designed to give students a thorough training in fundamental principles of English and American law, to permit moderate specialization in areas of personal interest, and to prepare them to practice in any state or country where Anglo-American law prevails.

The first-year curriculum of Contracts, Civil Procedure, Property, one semester of Torts, Criminal Law, Legal Writing, and Appellate Advocacy is required of all students. The second and third years are largely elective; the only required courses are Constitutional Law 1 and 2, Evidence, Professional Responsibility, Trial Advocacy (or comparable trial experience in a clinical course), and a seminar. Eleven clinical hours are allowed to count toward the graduation requirement of 89 hours.

Students have the responsibility of planning their second- and third-year schedules so as to complete all required courses and obtain a full schedule of work in each semester.

The value of the course in semester hour credits is indicated by the figure following the identifying department number. For example, in LAWS 5101-3, LAWS 5101 is the identifying department number, and the -3 indicates that the course is for 3 hours of credit.

The right to change the schedule of courses and instructors is expressly reserved to the dean and faculty.

Double-Degree Program

The School of Law participates with the Graduate School of Business Administration in a double-degree program through which qualified students may satisfy the requirements for both the J.D. and the M.B.A. degrees in a program of coordinated study at the two schools. Through this program, each school will accept a specified number of hours of course work taken at the other school as part of the requirements for completion of its degree. School of Law credit for work in the Graduate School of Business Administration is conditioned upon completion of the M.B.A. program and requires a grade of B or better in all business courses taken as part of the double-degree program. School of Law credit for work in the Graduate School of Business Administration is treated on a pass basis and is not computed in class rank or used in the computation of the cumulative 72 grade point average requirement for graduation from the School of Law.

To become eligible for the double J.D.-M.B.A. degree program, a student must apply separately to, and be admitted by, each of the two schools under their respective admissions procedures and standards. Students may elect the double-degree program at the time of initial application to both schools.

A student enrolled in the double-degree program may commence studies under the program in either the School of Law or the Graduate School of Business Administration. However, a student in the double-degree program is required by the School of Law to take the first year of the Juris Doctor curriculum as a unit exclusively in the School of Law. The Graduate School of Business Administration requires that the first year of the M.B.A. program also be taken as a unit. Thereafter, the student may take courses in the Graduate School of Business Administration or in the School of Law, or both, as the student desires and as may be necessary to meet the requirements of the degree programs of the two schools.

No student in the double-degree program shall be allowed to take fewer than 10 semester hours or more than 16 semester hours during any term (excluding summer terms) without receiving the consent of the program advisor in each school in which courses are being taken.

CREDIT FOR COURSES TAKEN

The School of Law will grant credit toward the Juris Doctor degree for up to 12 semester hours of acceptable performance in graduate-level courses taken by a double-degree student at the Graduate School of Business Administration. A student must earn a grade of B or higher in the business school course in order for the performance to be acceptable for School of Law credit.

The Graduate School of Business Administration currently grants up to 15 semester hours of credit for acceptable School of Law courses toward the Master of Business Administration degree. However, that degree program has been restructured, and applicants should contact the school to determine how law courses will relate to the M.B.A. degree.

TERMINATION OF DOUBLE-DEGREE ENROLLMENT OR OF GOOD STANDING

Students in the double-degree program who do not maintain the academic or ethical standards of either school may be terminated from the double-degree program. Students in good standing in one school, but not the other, may be allowed to continue in the school in which they are in good standing. However, students who do not complete the double-degree program will be required to meet the regular degree requirements (J.D. or M.B.A.) that were in effect when they entered the program for that degree.

Certificate Programs

TAX EMPHASIS PROGRAM

The School of Law offers a program of law study that leads to a Juris Doctor degree with a certificate evidencing an emphasis in the area of taxation.

This program is designed to provide a student with a credential which the School of Law believes will be attractive to many
potential legal employers, as well as employers of the accounting profession. The certificate signifies taxation law experience normally obtained by law graduates, and intermediate between the normal law school experience and that obtained in a Master of Taxation degree program. The school believes that a number of employers desire law graduates with additional experience in the taxation area, but are unwilling to incur the additional expense required, or are unable to provide the full-time work in the tax area necessary, to hire a person with a graduate tax degree.

The Tax Emphasis Program requires a participating student to earn not fewer than 95 semester hours of course credit for graduation (as contrasted with the usual 89 semester hours), and to earn at least 18 of these semester hour credits in the area of taxation. These 18 hours must include Income Taxation, Advanced Taxation, Federal Estate and Gift Tax, at least one tax planning course (Business Planning or Real Estate Planning); and Tax Policy if available at the School of Law or, if not offered, either the Tax Policy course at the Graduate School of Business Administration or Public Finance in the College of Arts and Sciences Department of Economics.

A sufficient additional number of elective credits, to make up the minimum 18 hours, may be chosen from among the tax courses in the School of Law or from among the graduate tax offerings in the business school approved for law credit.

Business school and economics courses taken for law school credit under the Tax Emphasis Program are limited to 6 semester hours of credit and must have received prior approval for cross-listing from the curriculum committee, or from the dean to the extent approval authority is delegated to the dean. (Courses that cover the same subject matter as courses taught at the School of Law will not normally be approved for cross listing under the School of Law’s cross-listing standards; however, if there is only a partial overlap in coverage, cross-listing credit may be provided for the non-overlapping portion of the course.)

A student must receive at least a B in the business school course or in the public finance course in order for the course to count for law school credit under the program. The business school or public finance courses will be treated as pass/fail courses for the School of Law transcript; that is, these courses will count toward the 95 hours required for the degree but will not be taken into account in computing the law student’s grade point average.

A student may take more than the required 18 semester hours of tax courses under the Tax Emphasis Program. However, in order to ensure that the student’s law program is sufficiently broad, the faculty requires that not less than 73 semester hours of credit must be received in courses outside of the taxation area.

A student should be able to complete this program within the normal three-year law degree period if the student plans the program of law study effectively and takes either a summer session of law study or a somewhat heavier than average load in each semester after the first year of law study. Law students who wish to participate in the program should contact the Registrar of the School of Law for enrollment forms. Students interested in this program are encouraged to complete the forms during the spring semester of their first year.

**Graduate Certificate in Environmental Policy**

Students at the University of Colorado School of Law may enroll in an interdisciplinary program in the Graduate School providing the Certificate in Environmental Policy. Environmental issues—such as water policy, wilderness preservation, air quality, energy development, and global change—transcend ordinary academic boundaries. Policy analyses dealing with these problems must integrate insights and information from many disciplines. The program draws on courses in the Department of Economics, the College of Architecture and Planning, the College of Engineering, and the School of Law.

Two to three-credit capstone seminars are offered each year. Environmental and Natural Resource Policy and Policy Responses to Global Change. Each focuses on a policy research problem, emphasizing the contribution of different disciplines to the understanding of that problem and the integration of disciplinary perspectives in the analysis of alternative policy recommendations.

Admission to the certificate program is open to students in any regular graduate degree program. To qualify for the certificate, students must complete at least 18 hours from a list of eligible courses, including the two capstone seminars. At least 12 of the 18 hours must be in courses outside the law school. Up to 6 of these 12 hours may be applied toward the J.D. degree under certain circumstances.

The award of the certificate recognizes the additional course work beyond that required for the student’s regular degree program. Questions about the certificate program in environmental policy should be directed to Larry MacDonnell, Natural Resources Law Center, Campus Box 401, University of Colorado at Boulder, Boulder, CO 80309-0401, (303) 492-1286, or to Professor Sam Fitch, Center for Public Policy Research, Campus Box 330, University of Colorado at Boulder, Boulder, CO 80309-0330, (303) 492-2954.

**Course Descriptions**

The following courses are offered in the School of Law on the Boulder campus. This listing does not constitute a guarantee or contract that any particular course will be offered during a given year.

For current information on times, days, and instructors of courses, students should consult the Schedule of Courses issued at the beginning of each semester.

Courses are organized by subject matter and are listed numerically by last digit (courses ending in the number “0” are listed before courses ending in “1,” and so on). The number after the course number indicates the semester hours of credit that can be earned in the course.

Abbreviations used in the course descriptions are as follows:

- Prereq.—Prerequisite
- Coreq.—Corequisite
- Lab.—Laboratory
- Rec.—Recitation
- Lect.—Lecture

**International**

**LAWS 6210-3. Comparative Law.** Considers foreign solutions to certain key legal problems. Focuses on general problems of legal process, rather than on substantive rules. Sample topics include the role of lawyers, civil dispute resolution, criminal procedure, and employment discrimination. Covers different legal systems in different years.

**LAWS 6400-3. Public International Law.** Examines the principles of public international law as developed and applied by all participants in international legal process, including national and international tribunals, governmental bodies, international organizations, and others. Particular attention given to the role of international law in recent events, human rights, and developing countries.

**LAWS 7200-3. Anthropology Law.** Offers a detailed review of the relationship between the social and cultural features of a society and the formal and informal legal institutions operating within them. Legal cases and materials from several different societies—Nigeria, Tanzania, Papua New Guinea, Turkey, and Tibet—are presented and compared to American cases. Considers the nature of social control and constraint, forms of judicial reasoning, fact-finding procedures, conciliation, mediation and arbitration modes, and the nature of legal discourse.
LAWS 8510-2. International Environmental Law. Deals with selected issues in environmental law that involve the United States and one or more other countries. Students prepare research papers on topics dealing with transboundary pollution, extraterritorial application of federal watercourses, export or disposal of hazardous materials, regulation of foreign aid and investment affecting the environment, options for controlling global climate change, and the use of treaties to protect the environment.

Business

LAWS 6001-4. Commercial Transactions. Examines the methodology of the Uniform Commercial Code and a study of legal devices and substantive principles thereunder relating to financing transactions in personal property and to negotiable instruments, bank deposits, and collections.

LAWS 6201-3. Agency-Partnership. Covers the partnership form of doing business. Also covers the substantive legal issues raised when people (agents) act on behalf of and subject to the control of other people (principals). Covers the concepts of vicarious tort liability, apparent authority, ratification, imputation of knowledge, and the undisclosed principal, among other matters.

LAWS 6251-4. Corporations. Covers formation of corporations and their management; relations between shareholders, officers and directors; the impact of federal legislation on directors' duties; and the special problems of closed corporations.

LAWS 6281-3. Legal Accounting. Studies accounting problems in the form they are placed before the lawyer, including a succinct study of basic bookkeeping, in-depth legal analysis of the major current problems of financial accounting, and consideration of the conduct of the financial affairs of business.

LAWS 6501-3. Labor and Employment Law. Decisions and statutes concerning the employment relationship, including issues such as employment-at-will; health and safety; drug testing; job security; and the rights of employers, unions, and employees under the National Labor Relations Act and related legislation. Also covers legal aspects of representation proceedings, collective bargaining, and strikes.

LAWS 7011-3. Creditors' Remedies and Debtors' Protection. Examines typical state rights and procedures for the enforcement of claims and federal and state law limitations providing protection to debtors in the process. Includes pre judgment remedies, statutory and equitable remedies, fraudulent conveyance principles, and exemptions and other judicial protections afforded debtors.

LAWS 7021-3. Bankruptcy. Examines briefly nonbankruptcy business rehabilitation devices, followed by basic principles of federal bankruptcy law and the bankruptcy court system. Concludes with attention to business reorganization.
**Practice and Procedure**

**LAWS 5223-1. Appellate Court Advocacy.** Students prepare appellate briefs and related documents and deliver oral arguments before a three-justice court composed of faculty, upperclass students, and practicing attorneys. Practice arguments are videotaped and critiqued.

**LAWS 5303-3, 5313-3. Civil Procedure 1 and 2.** Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the suit, subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterparts.

**LAWS 5503-4. Criminal Law.** Statutory and common law of crimes and defenses, procedures by which the law makes judgments as to criminality of conduct, purposes of criminal law, and constitutional limits upon it.

**LAWS 6103-2. Professional Responsibility.** The legal profession as an institution, its history and traditions, and the ethics of the bar with particular emphasis on the lawyer's professional responsibilities. The Code of Professional Responsibilities and the Model Rules of Professional Conduct are discussed in some detail.

**LAWS 6353-3. Evidence.** Studies the methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on relevant evidence, expert opinion testimony, the authentication and best evidence doctrines, and privileges.

**LAWS 6353-3 and 6719-2. Evidence and Trial Practice.** A 5-hour course that covers the theoretical material of Evidence (LAWS 6353) and the skills performance of Trial Practice (LAWS 6719) in which students apply the rules and doctrine of evidence in simulated trial settings, but seeks to develop them together rather than separately.

**LAWS 7003-3. Federal Courts.** Structure and jurisdiction of federal courts, with particular emphasis on problems of federalism and separation of powers and their relationship to resolution of substantive disputes.

**LAWS 7303-3. Complex Civil Litigation.** An advanced course in civil procedure in modern complex multiparty suits, including extended examination of class actions in such settings as employment discrimination and mass torts. Also studies proficiency in discovery, joinder, res judicata, collateral estoppel, and judicial management in such suits.

**LAWS 7523-2. Juvenile Law.** Takes a critical look at the juvenile justice system and how it responds to the needs of juveniles who are either delinquents or victims of abuse. Discusses the rights and responsibilities of parents, parental responsibility programs, delinquents, and the future of our juvenile courts.

**LAWS 8613-2. Seminar: Civil Liberties Litigation.** Studies issues unique to the prosecution and defense of civil liberties lawsuits. Students discuss litigation strategies with reference to several lawsuits currently pending in the federal courts.

**Property**

**LAWS 5624-3, 5634-3. Property 1 and 2.** Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls.

**LAWS 6024-3. Real Property Security.** Basic mortgage law, including use of mortgage subsidiaries, deeds of trust, and installment land contracts. Covers foreclosure, redemption, and related problems; special priority problems in land acquisitions and construction financing; special financing devices including variable interests and wrap-around mortgages; and problems relating to the transfer of the mortgagor's and mortgagor's respective interests.

**LAWS 6104-3. Wills and Trusts.** Covers intestate succession; family protection; execution of wills; revocation and revivification; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; constructional problems in estate distribution.

**LAWS 7024-3. Real Estate Planning.** Consideration of various contemporary legal problems in land use and development, including ownership, use, development, and operation of real estate. Particular emphasis on the income tax and financing aspects of commercial and residential use and development such as shopping plazas and apartment buildings.

**LAWS 7154-3. Land Use Planning.** Examines public control of local environments and private land uses through planning, zoning, and regulation of land development, including consideration of the constitutional and statutory limitations on such legislatively created techniques.

**Public**

**LAWS 5425-4. Torts.** Studies nonconsensual allocation of losses for civil wrongs, focusing primarily on concepts of negligence and strict liability.

**LAWS 6015-3. Constitutional Law I.** Studies constitutional structure; judicial review, federalism, and separation of powers.

**LAWS 6025-3. Constitutional Law II.** Studies constitutional rights of due process, equal protection, and free speech and press.

**LAWS 6045-3. Criminal Procedure.** Focuses primarily on constitutional limitations applicable to such police investigative techniques as arrest, search, seizure, electronic surveillance, interrogation, and line-up identification.

**LAWS 7005-3. Media Law.** Surveys common, statutory, and regulatory law as applied to the mass media. Focuses primarily on law as it affects the gathering and publishing of news. Also examines the regulation of the electronic media.

**LAWS 7015-3. First Amendment.** Examines speech and religion clauses of the First Amendment. Includes philosophical foundations of free expression; analytical problems in First Amendment jurisprudence; direct and indirect restraints on speech content; prior restraints; symbolic speech; freedom of thought and association; First Amendment rights of access; speech forums; academic freedom; and vagueness and overbreadth.

**LAWS 7025-3. Civil Rights Legislation.** Presents a comprehensive study of federal civil rights statutes briefly touched on in other courses. Studies federal civil rights statutes, their judicial application, and their interrelationships as a distinctly significant body of law of increasing theoretical interest and practical importance.

**LAWS 7035-2. Death Penalty in America.** Focuses on the ways the courts have attempted to deal with the multitude of problems in implementing the death penalty. Examines both the procedural aspects of a capital trial and how the courts handle issues of race and poverty.

**LAWS 7045-3. Criminal Procedure: Adjudicative Process.** Focuses primarily on criminal procedure at and after trial. Treats such topics as bail, pretrial discovery, plea bargaining, speedy trial, jury trial, the right to counsel at trial, double jeopardy, appeal, and federal habeas corpus.

**LAWS 7055-3. Education Law.** Considers a variety of issues raised by the interaction of law and education. Issues may include the legitimacy of compulsory schooling; alternatives to public schools; socialization and discipline in the schools; and questions of equal educational opportunities.

**LAWS 7065-3. Immigration Law.** Covers legal issues pertaining to noncitizens of the United States, especially their right to enter and remain as immigrants and nonimmigrants. Specific topics include admission and exclusion, deportation, and refugees and political asylum. Simultaneously a course in constitutional law, in statutory interpretation, in planning, in ethics, in history, and in policy.

**LAWS 7085-3. Law and Religion.** Uses judicial decisions as well as historical and theoretical materials to explore significant aspects of the relationship between law and religion. The religion clauses of the first amendment will be a central but not exclusive subject of study.

**LAWS 7105-3. Domestic Relations.** Examines the nature of marriage, actions for annulment and divorce, problems of alimony and property division, separation agreements, and custody of children. Also considers illegitimacy, abortion, contraception, the status of the married woman at common law and under modern statutes, and relations of parent and child.

**LAWS 7125-2. Advanced Domestic Relations.** Offers advanced study of several domestic relations subjects, including both theoretical and lawyering issues. Tentative subjects include discovery, client interviewing and deposition preparation, asset valuation, working with expert witnesses, children as clients, and alternative dispute resolution. Recommended prerequisite: LAWS 7105.

**LAWS 7205-3. Administrative Law.** Practices and procedures of administrative agencies and limitations thereon including the Federal Administrative Procedure Act, the relationship between courts and agencies.
LAW 7255-3. Local Government. State legislative and judicial control of activities, powers, and duties of local governmental units, including home rule cities and counties; some problems of federal, state, and local intergovernmental relations; and some typical state and federal constitutional and statutory limitations on governmental powers when exercised by local governmental units.

LAW 7415-3. Seminar: Bioethics and Law. Legal, moral, and economic analysis of problems posed or soon to be posed by advances in biomedical technologies. Examines problems raised by behavior control through organic intervention, including psychosurgery, psychoactive drugs, and electrical stimulation of the brain; genetic engineering; amplification of human powers and faculties by artificial means, including organ transplantation, man-machine symbiosis, and pharmacologically induced enhancement of mental functioning; death and dying and regulation of experimentation with human subjects. Discusses problems in distributive justice posed by limited availability of biotechnological commodities, as well as issues arising from enforced treatment.

LAW 7425-2. Health Law. Acquaints students with the issues arising at the interface between law and medicine through analysis of cases and other materials. Critically analyzes the methods used by courts and legislatures to address medical and legal problems in an effort to determine whether the legal resolution was reasonable and appropriate in light of medical, social, and political considerations.

LAW 7725-3. American Indian Law. Investigation of the federal statutory, decisional, and constitutional law which bears upon American Indians, and Indian reservation transactions.

LAW 8015-3. Seminar: Constitutional Theory. Examines the role of courts and other branches of government in defining and enforcing constitutional values. Relevant readings are from philosophy, social sciences, and legal scholarship, as well as cases.

LAW 8035-2. Seminar: Freedom of Speech Theory. Examines the role and the significance of traditional theories of freedom of speech in light of contemporary thinking about the character of speech, rationality, and language. Readings are drawn from philosophy and social sciences as well as legal scholarship.

LAW 8055-2. Seminar: Church and State Relations. Explores religion clause issues on both a theoretical and a practical level. Initially considers themes or ideals that courts and commentators have thought pertinent to doctrine in this area, such as neutrality, separation of church and state, and voluntarism. Applies this theoretical analysis to recurring practical controversies that the courts have had to address, including the role of religion in public schools, public sponsorship of religious symbols, special privileges conferred on the basis of religious belief, and similar issues.

LAW 8065-2. Seminar: White-Collar Crime. Focuses on issues related to the prosecution and defense of so-called "white-collar" criminal offenses. Includes substantive law under frequently used federal statutes such as mail fraud, RICO, and forfeiture provisions. In addition, the course examines the perceived tendency to undercriminalize the harmful conduct of purportedly "reputable" defendants of high social and economic standing.

LAW 8075-2. Seminar: Race, Racism, and American Law. Focuses on issues of race reform law, in particular the group of issues dealing with Black Americans. (Students of all hues and persuasions are welcome.) The class has an interpretive or critical dimension, rather than a litigation-oriented one. The idea will be to gain an understanding of how race reform law works, and how attitudes and historical forces have shaped that body of law.

LAW 8365-2. Seminar: Refugees and Asylum. Covers the law and policy governing the admission of refugees to this country and the granting of asylum. Prereq., LAW 7065.

LAW 8445-2. Seminar: Alternative Dispute Resolution. A study of alternative dispute resolution (ADR) theory, its application in specific contexts (e.g., civil rights), different procedural approaches to ADR, and advantages and disadvantages of using ADR procedures.

LAW 8455-2. Seminar: Disabilities and the Law. Focuses on both federal and Colorado law relating to disabilities, especially mental and learning disabilities. Likely discusses Medicare and Medicaid funding, Colorado law relating to civil commitment and the rights of the mentally ill, and the new federal statute making illegal discrimination based upon mental or physical handicap.

Research and Writing

LAW 5226-2. Legal Writing. After intensive introduction to the resources available for legal research, students prepare written material of various kinds designed to develop research skills, legal writing style, and analysis of legal problems.

LAW 6846-1, 6856-2. Advanced Legal Research. In-depth analysis of legal research methodology. Considers the types and classes of research sources. Includes preparation of a research bibliography. The second credit hour requires a special research project.

LAW 7106-1. Rothkofer Moot Court Competition. Intensive involvement in legal research, appellate brief writing, and oral arguments in a competitive context. Student finalists may continue involvement in regional and national competitions.

LAW 7406-1. International Moot Court Competition. Open only to students who actively participate in the seminar preparing for the competition, in the preparation of memorials for the competition, and in the practice oral arguments or regional oral arguments.

LAW 7846-1, 7856-2. Independent Legal Research. (Two semester hours maximum.) Independent study and preparation of a thesis under supervision of a faculty member. Specific permission of the supervising faculty member required before registering.

LAW 7896-1, 7906-2. Independent Legal Research: Law Review. Participation in research, writing, and editing activities involved in publishing the Colorado Law Review. Standards for awarding of credit are set and applied by the faculty.

LAW 7916-1 and 7926-2. Independent Legal Research: International Environmental Law Journal. Students participate in the research, writing, and editing activities involved in publishing the Colorado Journal of Environmental Law and Policy. Standards for the awarding of credit are set and applied by the faculty.

Taxation

LAW 6007-4. Income Taxation. Basic course in taxation with major emphasis on fundamentals of the federal income tax system. Generally approached from the standpoint of the impact of the federal income tax system on the individual.

LAW 6107-3. Advanced Taxation. Considers impact of the federal income tax system on the business enterprise. Emphasizes the partnership and corporate area. Based on a series of problems involving taxation of partnerships and corporations and the participants in these forms of business entity.

LAW 6157-3. Corporate Taxation. Covers traditional corporations. Discusses formation and distributions lightly, then focuses on reorganizations (mergers, divisions, recapitalizations), liquidations, sales of interests in corporations, and carryover of tax attributes. May cover problems of international and interstate corporate taxation.

LAW 6167-3. Taxation of Partnerships and S Corporations. Same as ACCT 6430. Examines the taxation of partnerships, S corporations, and the owners of these entities. Covers partnership formation and operation, sale or exchange of partnership interests, distribution of partnership property, partners' deaths or retirements, and tax shelters. If taken with LAW 6157, satisfies the advanced tax requirement in the tax emphasis program.

LAW 7207-3. Federal Estate and Gift Tax. Analysis of federal estate and gift taxation of inter vivos and testamentary transfers; introduction to the income taxation of estates and trusts; elementary estate planning.

LAW 7217-2. Estate Planning. Discusses problems and solutions for owners of various estates and different types of assets, including jointly held property and stock in closely held corporations and farms. Analyzes federal taxation of generation-skipping transfers in trust; covers post-mortem estate planning and drafting of trusts and wills. Recommended pre req., LAW 6104 and 7207.

LAW 7307-3. Taxation of Natural Resources. Considers federal income tax aspects applicable to the exploitation for, the development of, and the operation of natural resources, as well as the financing thereof. The natural resources include oil and gas, hard minerals, and timber and water. Recommended pre req., LAW 6007.
LAW 7507-3. Tax Policy. Same as ACCT 6440. Research seminar exploring policy issues of taxation. Areas reviewed include recent legislative proposals of tax simplification, flat-rate taxation, and the value-added tax. Students prepare a publishable research paper on a tax policy topic mutually agreed upon with the instructor. Does not meet the School of Law seminar requirement.

LAW 7617-3. International Taxation. Covers basic aspects of the United States taxation of income earned abroad by its citizens and the taxation of income derived by foreign persons from U.S. sources, including the implications of income tax treaties.

LAW 8157-3. Seminar: Issues in Corporate Finance and Capital Markets. Explores current issues in corporate finance and the capital markets. Topics include bondholders' rights, workouts, insolvency reorganizations, hybrid securities, the organizational structure of securities, leveraged buyouts, and monetary and exchange regulation. Seminar participants are from banks, brokers, dealers, and exchanges, and the role of institutional investors.

LAW 8402-2. Seminar: Tax Policy. Considers questions of fairness, efficiency, and promotion of social goals as they arise in federal, state, and local systems of taxing revenue through use fees and through taxation of income, sales, property, and estates and gifts. Seminar papers have covered the taxation of business organizations, the value-added tax, the social security tax, the taxation of farming, and the tax exemption of religion.

Jurisprudence

LAW 6128-2. Legislation. Examination of theories of legislation and of the relation between legislatures and courts, emphasizing problems of statutory interpretation and other issues in the judicial use or misuse of statutes.

LAW 7058-3. Conflict of Laws. Discusses methods of choosing the appropriate law in cases or transactions involving the differing laws of several states. Review of foreign jurisdiction of courts and of foreign judgments, choice of law rules, constitutional limitations on choice of law rules, and law applied in federal courts in conflicts cases.

LAW 7128-3. Jurisprudence. Considers a variety of themes and issues central to legal thought, including the controversy between positivism and natural law, the meaning of "interpretation" in law, the nature of judicial decision-making, and the strengths and weaknesses of "policy," "rights," and other kinds of approaches to legal problems.

LAW 7218-2. Legal History. Focuses on understanding and interpreting developments in Anglo-American legal history, including development of common law; origins of equity courts; the origins of the jury; and reception of English law in America.

LAW 7708-3. Law and Social Science. Introduces some of the major thinkers and traditions of scholarship in the area of law and society, focusing on the actual and potential uses of social-scientific research in the American legal process. Topics include methods of asking for, gathering, and interpreting information for Bandeir briefs and the role of social-science data in cases of discrimination in education, obscenity, civil rights, and other areas.

LAW 8518-2. Seminar: Problems in Law and Economics. Examines one or more current problems for which economic analysis has been offered as a means of solution. Topics include one or more of the following: economics and law as contrasting systems of rhetoric, theory of property rights, intellectual property, and institutional design.

LAW 8428-2. Seminar: Women in Law and Literature. Considers both legal and literary depictions of women and their legal and extralegal situations. Topics covered may include women as mothers, women as sexual beings, women's silence, women's violence, women as criminals, women at work, and women as the "other" in law and literature.

LAW 8528-2. Seminar: Modern Legal Theory. Examines some of the theories that inform contemporary legal thought. Readings are drawn from a variety of approaches, including legal realism, naturalism, and social theory principles, law and economics, critical legal studies, and feminist jurisprudence.

LAW 8548-2. Seminar: Theory of Punishment. Explores the various justifications that philosophers have developed to explain why we have the right to punish. Examines the historical evolution of our punishment system, and focuses on the death penalty as a critical contemporary issue in the debate about the proper role of punishment in our society.

LAW 8628-2. Seminar: Law, Power, and Politics. Draws upon various works of political theory, social theory, and jurisprudence to examine various conceptualizations of politics, power, law, and their relations.

Practice—Clinical

LAW 6009-4, 6019-3. Legal Aid: Civil Practice 1 and 2. Emphasizes procedural and practical remedies and defenses available in civil litigation. Students are assigned civil cases related to course material. Develops working knowledge of courtroom skills. A separate per-semester fee for malpractice insurance is charged for this course.

LAW 6029-4, 6039-3. Legal Aid: Criminal Practice 1 and 2. Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills. A separate per-semester fee for malpractice insurance is charged for this course.

LAW 6109-2. Trial Advocacy. Student exercises simulate trial events: jury voir dire, opening statement, direct and cross examination of witnesses, and closing argument.

LAW 6179-2. Trial Practice. See LAW 6355, Evidence and Trial Practice.

LAW 7029-3. Appellate Advocacy Clinic. Enables students to work on briefs of criminal cases being handled by the Appellate Division of the Public Defender.

LAW 7159-2. Advanced Trial Advocacy. Advanced course covering trial practice elements. Open only to students who have taken LAW 7109.

LAW 7169-2. Motions Advocacy. Provides practical training in preparing and arguing pre-trial, pre-verdict, and chambers motions to an experienced federal judge based on materials from actual case files.

LAW 7209-3. Natural Resources Litigation Clinic. Offers hands-on experience in the practice of natural resources law in the Rocky Mountain region to a select number of clinic students. Affords an inside view into both complex environmental litigation as well as alternative dispute resolution. Students participate in traditional litigation, administrative advocacy, legislative drafting, and the conduct of complex negotiations and settlements.

LAW 7309-3. American Indian Law Clinic. Clinical education course. Students work on cases arising in the Denver metropolitan area under the Indian Child Welfare Act and other laws unique to Native Americans. The clinic also accepts cases originating on Indian reservations throughout the West that implicate Indian natural resources and/or tribal sovereignty. Prereq., LAW 7735.

LAW 7409-3. Legal Negotiation and Dispute Resolution. Explores fundamentals of effective negotiation techniques and policies for litigants. Students engage in mock negotiations of several legal disputes. Examines a variety of dispute resolution processes such as mediation, arbitration, mini-trials, and court-annexed settlement procedures as alternatives to traditional court adjudication.

LAW 7509-1. Trial Competition. Students further develop trial and advocacy skills in a competitive mock trial format involving two or more rounds of trials. Preparation of trial briefs and drafting of orders, court plenaries and documentation is required. Credit limited to the top two teams (six students). Students may continue involvement in regional and national competitions.

LAW 7529-1. Appellate Advocacy Competition. Faculty member critiques an intramural appellate advocacy competition, in which a brief must be filed and reviewed. School of Law Rule 3-2-9 (b) should be consulted before enrolling.

FACULTY

GENE R. NICHOL, JR., Dean and Professor, B.A., Old Dominion State University; J.D., University of Texas School of Law.

NORMAN F. AARONSON, Clinical Professor of Law, Legal Aid and Defender Program, B.A., Brandeis University; J.D., Boston University Law School.

BARBARA BINTLEFF, Library Director and Associate Professor, B.A., Central Washington State College; J.D., M.L.L., University of Washington.

EMILY M. CALHOUN, Professor, B.A., M.A., Texas Tech University; J.D., University of Texas School of Law.

PAUL F. CAMPOS, Associate Professor, A.B., A.M., University of Michigan; J.D., University of Michigan Law School.

HOMER H. CLARK, JR., Moses Lasky Professor Emeritus.

RICHARD B. COLLINS, Professor, B.A., Yale College; LL.B., Harvard Law School.

JAMES N. CORBRIDGE, Chancellor of CU-Boulder; Professor, A.B., Brown University; LL.B., Yale Law School.

RICHARD DELGADO, Professor, A.B., University of Washington; J.D., University of California, Berkeley.

VINE DELORIA, Jr., Professor; Adjunct, B.S., Iowa State University; Master of Sacred Theology, Lutheran School of Theology; J.D., University of Colorado School of Law.

ROBERT J. DIETER, Director and Clinical Professor of Law; Legal Aid and Defender Program, B.A., Yale College; J.D., University of Denver College of Law.

ANN LAQUER ESTIN, Associate Professor, A.B., Dartmouth College; J.D., University of Pennsylvania Law School.

TED J. FIJLER, Professor, B.S., Northwestern University; LL.B., Harvard Law School.

REBECCA FRENCH, Professor, J.D., University of Washington Law School; L.L.M., Yale Law School.

H. PATRICK FURMAN, Clinical Professor of Law, Legal Aid and Defender Program, B.A., University of Colorado; J.D., University of Colorado School of Law.

WAYNE M. GAZUR, Associate Professor of Law and Business Administration, B.S., University of Wyoming; J.D., University of Colorado School of Law; L.L.M., University of Denver College of Law.

B. GLENN GEORGE, Associate Professor, B.A., University of North Carolina; J.D., Harvard University Law School.

DAVID H. GETCHES, Professor, A.B., Occidental College; J.D., University of Southern California School of Law.

CAROL GLOWINSKY, Clinical Professor of Law, Legal Aid and Defender Program, B.A., State University of New York at Albany; J.D., University of Denver School of Law.

DAVID S. HILL, Associate Professor, B.S., University of Nebraska; J.D., University of Nebraska School of Law.

J. DENNIS HYNES, Professor, B.A., University of Colorado; LL.B., University of Colorado School of Law.

HOWARD C. KLEIN, Professor Emeritus.

BETSY LEVIN, Professor, A.B., Bryn Mawr College; LL.B., Yale Law School.

MARK J. LOEWENSTEIN, Associate Dean; Professor, A.B., University of Illinois; J.D., University of Illinois College of Law.

THOMAS LUSTIG, Associate Professor Adjunct, A.B., Washington University; M.S., University of Michigan; J.D., University of Colorado School of Law; Ph.D., Massachusetts Institute of Technology.

LAWRENCE J. MACDONNELL, Professor Adjunct, A.B., University of Michigan; J.D., University of Denver College of Law; Ph.D., Colorado School of Mines.

DANIEL B. MAGRAW, JR., Professor, A.B., Harvard College; J.D., University of California, Berkeley.

OSCAR J. MILLER, Professor, A.B., A.M.L.S., University of Michigan School of Law.

HIROSHI MOTOMURA, Professor, B.A., Yale College; J.D., University of California, Berkeley.

CHRISTOPHER B. MUELLER, Henry S. Lindsley Professor of Procedure and Advocacy, A.B., Harvard College; J.D., University of California, Berkeley.

ROBERT F. NAGEL, Ira C. Rothberg, Jr. Professor of Constitutional Law, B.A., Swarthmore College; J.D., Yale Law School.

DALE OESTERLE, Professor, University of Michigan Law School.

COURTLAND H. PETERSON, Nicholas Rosenbaum Professor of International Law, B.A., University of Colorado; LL.B., University of Colorado Law School; M.Comp.L., University of Chicago School of Law; Dr.Jur., University of Freiburg School of Law (Germany).

WILLIAM T. PIZZI, Professor, A.B., Holy Cross College; M.A., University of Massachusetts; J.D., Harvard Law School.

KEVIN R. REITZ, Associate Professor, B.A., Dartmouth College; J.D., University of Pennsylvania Law School.

WILLIAM E. RENTFRO, Professor, B.A., University of Colorado; Th.M., Iliff Graduate School of Theology; LL.B., University of Denver College of Law.

PIERRE J. SCHLAG, Professor, B.A., Yale College; J.D., University of California, Los Angeles.

DON W. SEARS, Professor Emeritus.

PETER N. SIMON, Associate Professor, B.S., M.D., University of Wisconsin; J.D., University of California, Berkeley.

STEVEN D. SMITH, Professor, B.A., Brigham Young University; LL.B., Yale Law School.

NORTON L. STEUBEN, Professor, A.B., University of Michigan; J.D., University of Michigan School of Law.

ARTHUR H. TRAVERS, JR., Professor, B.A., Grinnell College; LL.B., Harvard Law School.

DANIEL A. VIGIL, Associate Dean for Student Affairs and Professional Programs; Professor Adjunct, B.A., University of Colorado at Denver; J.D., University of Colorado School of Law.

MICHAEL J. WAGGONER, Associate Professor, A.B., Stanford University; LL.B., Harvard Law School.

MARIANNE C. WESSON, Professor, A.B., Vassar College; J.D., University of Texas School of Law.

CHARLES F. WILKINSON, Moses Lasky Professor; B.A., Denison University; LL.B., Stanford Law School.

Library Faculty

BARBARA ALLEN, Head of Collection Development and Organization, B.A., Monmouth College; M.L.S., University of Denver.

GEORGIA BRISCOE, Head of Technical Services, B.S., Washington State University.

STACY WYNNE DORIAN, Reference/Government Documents/L.L.C./CompuServe Librarian, B.A., Colgate University; M.L.S., University of Texas at Austin.

ROBERTA STUDWELL, Associate Director, Law Library, B.A., Arizona State University; M.L.S., University of Washington; J.D., University of Miami.

JANE THOMPSON, Assistant Law Librarian for Public Services, B.A., University of Missouri; J.D., M.A., University of Denver.

LEANNE KUNKLE WALTER, Assistant Law Librarian, B.A., Cedar Crest College; M.A., University of Denver.

Legal Writing Faculty

KATHERINE DuVIVIER, Lecturer in Legal Writing and Appellate Advocacy, B.A., Williams College; J.D., University of Denver College of Law.

LESLEY M. REED, Lecturer in Legal Writing and Appellate Advocacy, B.A., University of Colorado; J.D., University of Colorado School of Law.

JO FRANCES WALSH, Lecturer in Legal Writing and Appellate Advocacy, B.A., Colorado College; M.S., University of Colorado; J.D., University of Colorado School of Law.

Professional Staff

IRENE L. HONEY, Director of Career Services and Alumni Relations, B.S.N., George-town University; M.S. Ed., Syracuse University.

BARBARA B. LICKTEIG, Registrar, B.S., University of Colorado.

JUDY LUCERO, Director of Alumni Publications, B.A., University of Denver; J.D., University of Denver College of Law.

CAROL NELSON-DOUGLAS, Director of Admissions and Financial Aid, B.A., Michigan State University; M.S.A., University of Notre Dame.
The College of Music was established by the Regents of the University of Colorado in 1920 and is a full institutional member of the National Association of Schools of Music.

The College of Music provides specialized training in music to prepare students for professional work or advanced study, for teaching music in the elementary and secondary schools, and for general cultural attainment.

The widely varied functions of music in the world today present many challenging and interesting opportunities for persons in the profession as teachers, performers, creative artists, technicians, and commercial personnel. While these different pursuits require specialized emphases, the faculty of the College of Music recognize the musical and educational experiences that are common to all. Each curriculum of the College of Music is designed, therefore, to present music as an integrated whole. Solo performance and technique, ensemble performance, historical and theoretical studies, concert and recital opportunities, and elective courses both inside and outside the college are intended to give students a balanced approach to musical understanding and musicianship. The faculty has assumed responsibility for making students aware of this unity in the curriculum and will strive to point out the relevance of each part to the whole. It is the students' responsibility to attempt to develop all the techniques and approaches presented in the curriculum. Only with the contributions of both faculty and students can the aim of the curriculum be achieved: the development of well-trained musicians.

In addition to training in the various professions of music, the college provides general music studies and activities for the non-major; a broad cultural program (concerts, recitals, lectures) for the University community, as well as the public; at large; favorable conditions for research in music; and service activities to the state and nation.

Major Fields and Degrees

Undergraduate instruction in the College of Music leads to the bachelor of arts (B.A.) in music, the bachelor of music (B.Mus.), and the bachelor of music education (B.Mus.Ed.) degrees. In addition to a substantial core of studies in music, the B.A. in music program allows a wide choice of study in areas outside of music. B.Mus. areas of concentration are in composition, history and literature of music, performance, and voice theatre. The major areas in the B.Mus.Ed. program are in teaching, choral, genreal, or instrumental music.

Qualified students may receive both the bachelor of music and bachelor of music education degrees by taking the required extra work (approximately 30 additional hours). Intent to be admitted to candidacy for both degrees should be indicated as soon as possible, preferably in the sophomore year. Written approval of the dean of the College of Music is required.

Additional information concerning undergraduate degrees is presented in the various undergraduate curricula listed elsewhere in this catalog. Questions regarding particular details of the various curricula and questions concerning how students may work toward double degrees in music and engineering, music and business, and others may be directed to the Associate Dean for Undergraduate Studies, College of Music.

Graduate instruction in the College of Music leads to the degrees master of music (M.Mus.), master of music education (M.Mus.Ed.), doctor of musical arts (D.Mus.A.), and doctor of philosophy (Ph.D.). Major fields in the master of music and doctor of musical arts degrees are conducting, composition, pedagogy, and performance. The master of music degree is designed to provide advanced instruction for teachers in the elementary and secondary schools. The Ph.D. is a research degree for all fields of music and music education.

Graduate degrees are offered through the Graduate School and additional information will be found in the Graduate School section of this catalog as well as in the curriculum listed later in this section. Correspondence regarding details not included in this publication should be directed to the Associate Dean for Graduate Studies, College of Music.

Facilities

The Imig Music building and Macky Auditorium contain studios, classrooms, rehearsal rooms, and practice rooms in which students work. Macky Auditorium houses seven practice organs, as well as two performance organs—a large four-manual Austin and a Casavant tracker.

The Music Library, located in the music building, contains 100,000 books, scores, sound recordings, and periodicals. These include 40,000 scores, 40,000 sound recordings, 20,000 books, and 250 periodicals. Computerized facilities are provided for listening to recordings and practicing ear training. A computer terminal is available for computer-based reference searching.

The library provides a collection of scores, collected editions and complete works of composers, bibliographies, dictionaries, histories, and treatises. The record collection contains many rare music recordings for research and teaching purposes. The library also houses the American Music Research Center, one of the largest collections of American music in the country. The collection contains books, music, reference materials, recordings, and a slide collection from the seventeenth through twentieth centuries.

The total facilities of the College of Music include 86 practice rooms; 54 studios and offices; band, choral, opera and orchestral rehearsal halls; a piano laboratory; three electronic music studios, including a microcomputer MIDI classroom; and auditoriums with seating capacities of 2,000, 500, 250 and 120.

Programs

Each year the college offers over 400 recitals, concerts, lectures and other programs by students, faculty and distinguished visitors. Most of the programs are free and open to the public.

International Study

The college encourages the educational breadth that comes with study abroad. For instance, the program in Regensburg, Germany, offers study in music history and music education. This program is coordinated in conjunction with the Office of International Education, which may be contacted for further information.
Student Organizations
The student body of the College of Music has its own government, represented by the Associated Students of the College of Music and the Graduate Music Student Council. Honoray music fraternities are Phi Mu Alpha, Sigma Alpha Iota, Kappa Kappa Lambda, and Tau Beta Sigma. Pi Kappa Lambda, the national scholastic honorary music fraternity, is also an active organization on this campus. Music education majors are eligible for membership in the student chapter of the Music Educators’ National Conference.

ACADEMIC EXCELLENCE

Honors
Upon recommendation of the faculty, honors may be awarded to students who show outstanding ability and who have demonstrated superior musicianship and scholastic accomplishment through a minimum 3.70 GPA.

Scholarships and Awards
Several scholarships and awards are designed specifically for students in the College of Music:
- Applied Music Scholarships
- Brownlow-Wilson Music Education Scholarship
- Charles A. Byers Scholarship in Choral Music Education
- Charles Hardin Piano Scholarship
- College of Music Associates Scholarship
- Envelopment Awards
- Dean’s Honor Awards
- Frank “Cricket” Sweeney Memorial Scholarship
- Glenn Miller Scholarships
- Howard Wall Scholarship
- Jessie and Albert Henry Scholarships
- Miller High Band Music Education Scholarship
- Music History Academic Achievement Award
- Peter F. Roth Memorial Scholarship
- Phyllis Parmelee Memorial Piano Scholarship
- Talent and Creativity Awards
- Theodore Hester Scholarship
- Wallace F. Fiske Memorial Scholarship
- William Glendenin History Award

ACADEMIC STANDARDS

Academic Ethics
Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery, or falsification of official records, and similar acts or the attempt to engage in such acts are grounds for suspension or expulsion from the University.

In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as their own. It is recommended that students consult with their instructors as to the proper preparation of reports, papers, etc., in order to avoid this and similar offenses.

Scholastic Requirements
Any undergraduate student who has a cumulative or semester grade point average below 2.00 will be automatically placed on probation for the following three semesters. (Cumulative grade point average is calculated on grades earned at this University.) If, at the end of each semester and cumulative probationary period, the semester grade point average is not 2.00 or above, automatic suspension for the following two semesters will result.

Undergraduate students who have a cumulative or semester grade point average of 1.00 or below will be automatically suspended. These students must attend a summer term or continuing education courses to raise their grade point average. Those attempting to do this must successfully complete 12 credits in one semester with no withdrawals and no incomplete grades.

Undergraduate students under scholastic suspension may petition for readmission and may receive a personal hearing before the associate dean for undergraduate studies. Students who have been dismissed must reapply for admission to the University after being reinstated by the college, unless they are dismissed in May and raise their cumulative GPA to 2.00 during the following semester.

Graduate students should see “Quality of Graduate Work” under the Graduate School portion of this catalog for scholastic requirements.

Appeals
Students have the right to appeal decisions of academic dishonesty and to petition for exceptions to the academic policies stated in this catalog. Appeals should be directed to the Office of the Dean.

College of Music policies stated below are in addition to the campus policies found in this catalog.

ADMISSION AND ENROLLMENT POLICIES

Admission Requirements
In addition to the entrance requirements of the University outlined in the Undergraduate Admission section, freshmen and transfer students must meet College of Music entrance requirements. A knowledge of the rudiments of music and basic sight reading ability is assumed. Possession of elementary skills on piano is useful in all areas of music study. History and literature majors should have a performance skill. Instrumental majors and singers should possess a well-grounded technique sufficient to play and sing music of moderate difficulty.

AUDITIONS
An audition is required for all entering undergraduate music majors. Auditions are typically held on the Boulder campus on Saturdays in late January and February, with a separate Saturday audition date for string instruments in early March. Additional dates may be arranged by calling the College of Music. Applicants may substitute a non-returnable cassette recording which should be approximately 10 minutes in length. Write to the Associate Dean for Undergraduate Studies, College of Music (see the Directory in this catalog) for audition-interview application for more information.

PROVISIONAL ADMISSION
Applicants who meet all admission requirements except the minimum academic preparation standards (MAPS) may petition the associate dean for undergraduate studies for admission as a provisional student. Such applicants must offer at least three units of English and six additional units in academic fields.

TRANSFER STUDENTS
Transfer students from within the University and from other universities must meet the general requirements of the University and the specific requirements of the College of Music, including the audition. Further, resident students who have taken course work only through the Division of Continuing Education must have a 2.00 (C) grade point average in such work before being eligible to apply for admission to the College of Music. Nonresident students must have a 2.50 grade point average.
NONDEGREE STUDENTS

With the written permission of the instructor, nondegree students may take any class offered by the College of Music except private applied instruction. However, those students intending to become degree students the following semester may petition the dean for permission to register for private applied instruction.

ATTENDANCE REQUIREMENTS

Students are expected to attend classes regularly and to comply with the attendance requirements specified by their instructors. For performance groups, these requirements include attendance at concerts and trips as well as rehearsals. Unexplained absences from three consecutive class periods will be reported to the student's associate dean by the instructor.

CONVOCATIONS AND RECITALS

All degree students are required to register for Music Convocation (CONV 1990) for a minimum of six semesters. Transfer students are not required to register during their last two semesters. Graduation will not be permitted until this requirement is met. Deficiencies can be removed only during the academic year.

Each semester, students will be given a list of 22 convocations and recitals from which a minimum of seven must be attended to receive a passing grade. Events in which the student participates will not count toward this requirement. Monitors will be present at each event to distribute and collect attendance slips.

ENSEMBLES

All students enrolled in applied music must participate in a University ensemble appropriate to and required by their degree program. Any student who studies applied music beyond degree requirements must participate concurrently in a University ensemble. Double majors can be in only one ensemble at a time. Waivers in degree requirements for ensembles or substitutions will be awarded only through petition to the dean. University ensembles that meet ensemble requirements are Concert Band, Marching Band, Symphonic Band, Symphony Orchestra, Wind Ensemble, University Choir, University Singers, Women's Chorus (limit 2 years), Opera Production (limit 2 semesters), Collegiate Chorale, Collegium Musicum, and Piano Chamber Music/Accompanying.

COURSE LOAD

The normal academic load for an undergraduate student in the College of Music is 16 to 19 semester hours. Schedules of fewer than 12 or more than 19 hours must have approval of the associate dean for undergraduate studies of the College of Music.

See limitations on registration under the Graduate School portion of this catalog for graduate student course load stipulations.

DROPPING A COURSE

Students may drop a course in the College of Music any time up to six weeks from the first day of class by obtaining the written permission of their instructor and their associate dean. However, students will be charged tuition for all classes in which they are registered after the thirteenth day of the semester.

PASS/FAIL OPTION

The pass/fail option is open only to undergraduate students. Pass/fail hours are to be selected from nonmusic courses and are in addition to those that may be taken in honors, physical education, and student teaching. Courses so elected will be taken according to the pass/fail policies of the college or school concerned.

Pass/fail hours that transfer students can apply toward degree requirements from departments within the University are limited to 1 in every 8 semester hours earned in the College of Music.

RESIDENCE REQUIREMENT

Of the hours required for an undergraduate degree, 56 must be completed in residence in the College of Music. This may be reduced by the faculty for excellent work done in this University and for high scholarship exhibited at previous institutions attended. In no case shall the minimum be fewer than 40 hours distributed over three semesters. At least 9 hours in applied music (private instruction) must be earned in this college for the degree bachelor of music and bachelor of music education, and 6 hours for the bachelor of arts in music.

STUDENT WORK

A copy of all scholarly student papers that generate credit (dissertations, theses, projects, lecture recitals and other document-producing activities), whether undergraduate or graduate, will be placed in the Music Library. More than one copy may be required in individual degree programs. To ensure that degree requirements have been met and the document is appropriate for placement in the Music Library, all faculty-approved documents must be presented to the appropriate associate dean's office at least two weeks before the graduation date.

Any recital required for graduation will be recorded. Arrangements are to be made through the College of Music Concerts Office, and a recording fee will be charged. The original tape recording will be placed in the Music Library.

WITHDRAWAL

Students may withdraw from the College of Music through the six week of the semester by obtaining the signature of the associate dean of undergraduate studies.

UNDERGRADUATE DEGREE PROGRAMS

The degrees of Bachelor of Arts in music, Bachelor of Music, and Bachelor of Music Education will be granted by the University, upon recommendation of the faculty of the College of Music, to those who have successfully completed prescribed requirements.

Students must file an appropriate request-to-graduate form by May 1 in the Office of the Associate Dean for Undergraduate Studies if they anticipate completing requirements in December, May, or August of the following academic year.

GENERAL EDUCATION IN MUSIC

The following areas of knowledge are central to the undergraduate degrees in music:

- knowledge of solo performance and technique, including knowledge of the various musical styles used in compositions for students' musical instruments;
- understanding of each composition performed, notation and editorial signs used in the compositions performed, and repertoire for students' performance medium;
- knowledge of ensemble performance, including familiarity with the names and styles of major composers in the student's performance medium and knowledge of the techniques necessary to blend a number of individual musicians into an ensemble;
- knowledge of concert and recital opportunities, including familiarity with literature composed for different performance forces;
- knowledge of theoretical studies, including tonal harmony, counterpoint, voice-leading, and notation; formal principles and analytical techniques for tonal music; and instruments in score, including the concert pitch of transposing instruments and nomenclature used in scores;
- knowledge of historical studies, including representative works in the canon of musi-
cal literature, from chant to the present, the general outlines of the history of music from the Middle Ages to the present, music in the United States, and musical cultures other than those of Europe.

In addition, students completing any of the degrees in music are expected to acquire:

- abilities in solo performance and technique, including the ability to communicate through the performance medium, technical ability to perform selections with demonstrated musicianship, competence to display musicality appropriate to innate talent, and proficiency to display musical style and interpretation appropriate to the composition;
- abilities in ensemble performance, including the ability to interact with fellow musicians;
- abilities in concert and recital opportunities, including the ability to select performances that will have the largest benefit to the student’s musical growth;
- abilities in theoretical studies, including sight-reading ability and ear training skill; and
- abilities in historical studies, including the ability to analyze musical works in score oraurally for elements of style that determine historical placement; the beginning of an ability to integrate historical analysis and style into personal performance; and an appreciation of music other than those immediately available upon entrance into the college.

**BACHELOR OF ARTS IN MUSIC**

The bachelor of arts in music degree has as its goal a broad education in music within a liberal arts context. Although students may elect within their programs special courses that will permit them to pursue graduate study or a profession in such areas as arts management, composition, music journalism, music librarianship, or musicology, the major emphasis is on development of musical musicianship, an ability to perform music, and a broad knowledge of intellectual principles of music as an art.

A minimum of 124 semester hours with an overall grade point average of 2.00 must be earned for the B.A. in music degree. Of these hours at least 72 must be in nonmusic courses. Thirty must be at the 3000 or 4000 level. A minimum of 40 hours and a maximum of 54 hours is required in music courses.

The normal pattern for private applied instruction in this degree is one half-hour lesson per week for 2 semester hours of credit or one one-hour lesson for 3 semester hours credit, although some of this study may take place in class instruction. The minimum proficiency is equal to the bachelor of music education sophomore level. Not more than 15 semester hours of credit in private instruction may be used toward the degree.

Students are required to register for 2 hours of ensemble and may elect 2 additional hours to be applied to the degree.

A recital may be given with permission of the chair of the faculty concerned and the student's advisor.

Honors students in theory and history may elect to write a senior thesis in accord with their goals and interests. Topics are selected and prepared in a junior research seminar. The approved thesis is due in the Office of the Associate Dean for Undergraduate Studies two weeks before the end of the semester of graduation. See Guidelines for the Preparation of Formal Undergraduate Thesis (available in the associate dean's office) for complete procedures relating to the thesis. Other students take the junior research seminar and elect a 4000-level music history or theory class to substitute for the thesis.

Students may choose to complete requirements from a wide selection of courses offered. If students wish to select courses forming a concentrated area of interest, this determination must be made in consultation with the major advisor by the beginning of the sophomore year. Possible areas of interest are listed following the degree requirements.

**Minimum Requirements**

In addition to the general requirements listed above, the following specific requirements must be met:

1. One semester of English composition and a passing grade on the University writing proficiency examination (or two semesters of English composition).
2. Basic proficiency in one foreign language equal to three semesters at the university level. This requirement also may be fulfilled by three years of study in high school in one language or by passing a University proficiency examination.
3. Nonmusic electives to fulfill the minimum requirement of 72 semester hours of credit. Of the nonmusic electives, 43 semester hours of credit must be fulfilled through the College of Arts and Sciences' content areas of study (see page 51).

**Courses and Curricula**

For the B.A. in music degree, students must complete the courses listed below.

**Concentrated Interest Areas**

Requirements are not specified for any of the concentrated interest areas. All courses in interest areas are selected with the agreement of students and their advisors.

**AMERICAN FOLK MUSIC**

The basic requirements in performance are two years of study (30 minutes per week) in voice and/or American folk instruments—banjo, fiddle, guitar, mandolin. Among these five media, students have one major area (two semesters) and two minor areas (one semester each). Continuing education registration and fee payment arrangements must be cleared through the College of Music dean’s office.

Students may select, in consultation with their advisor, courses in Afro-American Studies, American literature, folklore, American art history, American history, American society and thought, jazz, world music, American popular song, and America’s art and vernacular music.
ARTS MANAGEMENT
In addition to Arts Management Techniques (MUSC 4907), students are encouraged to take courses in the College of Business and Administration. These courses are considered part of the requirement of 72 hours outside of music. Students must inform the Associate Dean for undergraduate studies in music of specific courses they will be taking by the tenth week of the preceding semester. Courses in journalism and in critical writing are frequently recommended for this concentration. With approval from the Associate Dean for undergraduate studies, an internship may be substituted for the senior thesis.

JAZZ STUDIES
Students may select courses in history of jazz, jazz performance, and jazz improvisation and arranging as well as independent studies in jazz theory to make up a concentration in jazz studies.

MUSIC-BROADCASTING
Courses under the music-broadcasting concentration are recommended in communication, journalism, and theatre and dance, as well as in such special music courses as History of Opera.

MUSIC-BUSINESS
Permission to elect business courses may be obtained from the Associate Dean for undergraduate studies, after which the student must petition the business Dean for permission to enroll in core business courses. Information concerning available courses will be available through advising.

MUSIC-DANCE
A broad distribution of courses in all areas of dance is recommended for this concentration.

MUSIC-ELEMENTARY EDUCATION CERTIFICATE
This concentration of courses allows a student to study music and, at the same time, gain certification for teaching in the elementary classroom. It does not lead to certification for teaching music.

Informed concerning requirements for certification should be obtained from the School of Education. Students should choose MUSC 3103, Teaching General Music, and coordinate courses rather than the more general music requirements for elementary certification. This concentration requires very careful planning.

MUSIC HISTORY
A broad distribution of analysis and music history courses is recommended for this concentration. Planning with a member of the history and literature faculty is required.

MUSIC-JOURNALISM
Courses in all aspects of journalistic writing in addition to all areas of music literature are recommended for this concentration.

MUSIC-THEATRE
Students may select courses in all aspects of theatre: acting, stage design, and history of theatre.

MUSIC THEORY
The concentration in music theory is concerned with all courses involved in music theory: analysis, counterpoint, scoring and arranging, and elementary composition.

PEDAGOGY
Each area of performance has studies in literature, performance, and pedagogy which may be selected with the advisor for concentration in pedagogy.

BACHELOR OF MUSIC
The four-year professional curriculum leading to the bachelor of music degree emphasizes creative skill, academic achievement, and artistic performance in music. Concentration areas are offered in church music, composition, history and literature of music, performance, and voice theatre. The performance areas include guitar, organ, piano, string instruments, voice, and wind/percussion instruments.

Performance concentration area students will devote a large portion of their time to developing their vocal or instrumental skills. Proficiency levels (freshman, sophomore, junior and senior) have been established for each instrument and voice and are checked at least once a year by juries. Students who cannot meet the proficiency requirements after two semesters of study will receive a grade of incomplete fail (FP) or incomplete withdrawal (IW) and cannot progress to the next level until the proficiency is achieved. Advisors will provide students with proficiency and repertoire requirements. Attendance at a literature-performance class is required in conjunction with applied study.

A half recital in the junior year and a full public recital in the senior year are required of students in the performance concentration areas except church music and voice theatre. Students should check with their advisor about preview policies.

A thesis is required of students in the composition area and in the history and literature area. For composition students, the thesis will be an original composition; for history and literature students, a major paper. Students should check with their advisor for details.

A thesis is required of church music students and may consist of several minor research projects, choral arrangements, composition projects, or the preparation and production of a short cantata. A senior project is required of students in the voice theatre area. This project may be a senior recital, major role, or direction or design of a major show.

Specific performance group requirements are controlled by the degree plan in each concentration area and are subject to the advisor's judgment in the best interest of the student.

Requirements in theory, history and literature of music, and electives in general education give the performance major an excellent theoretical and cultural background.

A minimum of 244 credit points, with a C overall grade point average and 122 semester hours, must be earned for the bachelor of music degree. Most concentration areas require more than 122 hours.

BACHELOR OF MUSIC EDUCATION

The program leading to the bachelor of music education degree is designed to provide superior preparation for the teaching of music in the primary and secondary schools. The various demands made upon music teachers and the opportunities open to them have been carefully considered in formulating the courses of study.

Although most students may ultimately specialize in either general music, choir, band, or orchestral work, some may be called upon in their first professional positions to teach in two or three of these fields. Even the music educator who teaches in only one of these areas must have a sufficiently broad knowledge of the entire music program to be able to understand the role of music in contemporary American education and interpret the music program to colleagues and laymen. The courses of study are designed to provide a suitable balance between specialization and generalization.

Courses and Curricula
Three basic curricula are provided for the candidate pursuing the bachelor of music education degree: choral, general music, and instrumental emphases. Within each basic curriculum, options are provided so that students may vary their programs in accordance with their needs and interests.

A minimum of 130 semester hours with an overall grade point average of 2.75 must be earned for the B.Mus.Ed. degree. With no grade below C in a music course, forty semester hours in the liberal arts are required.

Liberal Arts Requirements
All students entering the music education program, whether freshmen, transfers, or those holding a degree, shall take the general education core curriculum courses designated by the College of Music curriculum committee for the bachelor of music education degree. Students should check with their advisor each semester before final selection of courses.

Admission to the Teacher Certification Program
Teacher education is a campuswide function at the University of Colorado. Admission to the music education program in the College of Music does not constitute admission to the teacher certification program. Students must apply to the School of Education through the chair of the music education faculty for admission to this program no later than the second semester of their junior year. Students may not register for EDUC 4122 and student teaching until they are admitted to the teacher certification program.

Requirements for recommended admission to the teacher certification program are:
1. Minimum grade point average of 3.00 in music and music education, and a minimum overall grade point average of 2.75.
2. Minimum grade of B in the key methods course in the teaching area.
3. Satisfactory completion of, or registration for, all required courses through the junior year.
4. Satisfactory functional piano ability as demonstrated by passing the proficiency examination or completing prescribed course work.
5. Satisfactory performance ability as demonstrated by meeting the sophomore proficiency requirements in an applied area of study.
6. Satisfactory scores on the California Achievement Test.
7. Recommendation by the music education faculty.

An interview with each student is held by the members of the music education faculty during the second semester of the sophomore year to review the student's progress and qualifications for admission to the teacher certification program.

Student Teaching
Students wishing to receive a student teaching assignment must make application to the School of Education through the chair of the music education faculty early in the semester preceding the student teaching semester. Prerequisites for student teaching are:
1. Admission to the teacher certification program.
2. A minimum grade point average of 2.75.

3. Completion of all required music education and education courses in a music education curriculum.
4. Satisfactory performance ability as demonstrated by meeting the junior proficiency requirements in a private applied area of study.
5. Recommendation by the music education faculty.

**Choral Music Emphasis**
The required hours in a performance class minor may be used to meet minor voice requirements and/or piano proficiency. Four of the required seven semesters of ensemble registration must be in a choir.

**General Music Emphasis**
The required hours in a performance class minor may be used to meet minor voice requirements and/or piano proficiency. Four of the required seven semesters of ensemble registration must be in a choir.

**Instrumental Music Emphasis**
The required hours in performance class minor may be used to meet minor voice requirements and/or piano proficiency. For string players, four of the required seven semesters of ensemble registration must be in an orchestra. For wind and percussion players, four semesters must be in a band of which two must be in marching band.

UNDERGRADUATE
CERTIFICATE PROGRAMS

Certificate in Jazz Studies
The certificate in jazz studies is designed to allow a select number of students to study jazz more in depth and at a higher level than music degrees currently require. The curriculum is in addition to requirements of each degree plan and consists of a minimum of 18 credit hours, including topics such as jazz theory, aural foundations to jazz improvisation, jazz improvisation, history of jazz, scoring and arranging, jazz keyboard, electronic music, jazz combo, and jazz ensemble. Entrance into the program is by audition in the sophomore year.

Certificate in Music Technology
The certificate in music technology provides a limited number of students with an opportunity to study music technology in greater depth than music degrees currently allow. Each participating student must select the certificate's curriculum in addition to the normal requirements of their degree program. The certificate is available to students in the College of Music only. The curriculum consists of 18 credit hours and includes such topics as an introduction to music technology, computer programming for musicians, music and media, sound synthesis, and electronic music ensemble. Entrance into the program is by audition in the sophomore year.

GRADUATE
DEGREE PROGRAMS

All graduate degrees in music are granted by the Graduate School of the University of Colorado upon the recommendation of the faculty of the College of Music and approval by the administrative officers of the Graduate School. The information supplied here is supplemental to and must be read in conjunction with the information contained in the Graduate School section of this catalog. Information applicable to master of music and master of music education degrees is discussed under the heading Master of Arts and Master of Science in the Graduate School section; information pertaining to doctor of philosophy in music and doctor of musical arts degrees is discussed under the heading Doctor of Philosophy. Other information regarding rules applying to graduate degree students in music may be found in supplements to the catalog and in the Graduate Studies in Music Handbook, both available in the Office of the Associate Dean for Graduate Studies.

Admission Requirements
Admission requirements for specific degree programs that supplement the Graduate School requirements are discussed in the degree program descriptions which follow. Students are urged to take the analytical and subject (advanced music) portions of the Graduate Record Examination in addition to the verbal and quantitative sections. GRE scores are required both for fellowship and for admission to the Ph.D. in music program.

Preliminary Examinations
Students who expect to begin work on a master's or doctoral degree must report to the College of Music before the beginning of their first term for preliminary examinations. At least one week before that time, the student must give written notice to the College of Music Office of the Associate Dean for Graduate Studies.

Areas covered in these examinations include analysis, aural perception, counterpoint, history and literature, the major field, and written theory. Any deficiencies uncovered by these examinations must be removed early in the program. No instance can application for candidacy or required examinations be approved until the deficiencies are removed. Thesis and dissertation projects may not be completed while preliminary-examination deficiencies remain.

Results from the major-field examination serve as one basis for recommending specific course work in the program. The major-field examination in composition covers music literature and compositional methods; in history and literature, essay questions cover score analysis and identification of terms; the music-education examination covers general knowledge of philosophy and history of music education, organization and supervision of music teaching, and methods and materials for the individual areas of vocal, string, and instrumental music, and for performance majors, musical styles as well as problems of performance and pedagogy are covered.

College Teaching Area
For graduate students in music who intend to teach at the college level and who have had no prior college teaching experience, a teaching module of at least 6 hours of courses is recommended. This module can consist of professional education courses, music-education courses, teaching-skills courses, or teaching practice. The teaching area module is not normally used toward the minimum 30-hour course requirement for master's or D.Mus.A. programs.

Financial Aid
In addition to the opportunities for financial aid described in the Graduate School section, the College of Music grants teaching assistantships to approximately fifty students each year. Applications for these positions must be filed with the Office of the Associate Dean for Graduate Studies by March 1 of the preceding academic year. There are also scholarships offered by the various faculties and grants-in-aid given for various college-related responsibilities.

MASTER OF MUSIC

The major fields for this degree are composition, conducting, literature of music, performance, and the double major of performance and pedagogy. Conducting students may concentrate in choral, orchestral, or wind ensemble/band areas. Performance and pedagogy majors may concentrate in piano, string instruments (including guitar), voice, or wind/percussion instruments. Major work in the conducting degrees includes advanced conducting, analytical studies, score reading, orchestration, arranging, performance-related writing, and conducting practice. In music literature, courses in music history and literature and a thesis are required. In pedagogy, courses in the psychology of music and the pedalogy and literature of a specific performing area and a written thesis are required. In performance, students complete applied study, recitals, and recital-related papers.

Conducting, percussion, string, and wind majors are required to participate in a music ensemble. Faculty chairs advise students concerning the appropriate choice of ensemble.

Prerequisites
As noted in the Graduate School section, students are expected to present undergraduate preparation equivalent to that
expected for the bachelor's degree at this University. Normally this will be a bachelor of music degree in the proposed concentration.

Before admission, composition majors should submit both scores and tapes of their original work, and music-literature majors examples of their research papers; performance majors must submit a repertoire list and arrange for an audition or submit a nonreturnable cassette tape of their performance.

Program of Study
The Graduate School considers the master of music (M.Mus.) degree a plan II program, which requires a minimum of 30 semester hours of course work including thesis projects. Most students will find it necessary to exceed this minimum in order to meet the musical and academic standards demanded by the qualifying and comprehensive-final examinations. Outlines of specific programs may be secured from the Office of the Associate Dean for Graduate Studies.

There are three specific areas of study for the M.Mus degree: composition, music literature, and performance/pedagogy (including conducting). A student must select a major (at least 10 hours) from one of these areas and a minor (at least 6 hours) from music education, music history and literature, or music theory. Students selecting music education as their minor area should check with the Office of the Associate Dean for Graduate Studies for a list of approved music education courses. Students may also elect a secondary emphasis consisting of at least 8 hours in another area of music or outside of music. A minimum of 10 hours in music courses must be elected outside the major in all master of music degrees.

Each student's program will be directed by the faculty chair for the chosen major (or a designated substitute), a second professor from the major area, and a professor from the minor area. During the first semester of residence, the student should complete a tentative degree plan and obtain the approval of the advisor(s) and the Associate Dean for graduate studies.

Examinations
In addition to the preliminary examinations, master's degree students in music must take qualifying and comprehensive-final examinations. The procedures and deadlines for registering for these examinations, except the master's qualifying examination, will be found in the Graduate School section of this catalog. The qualifying examination must be taken no later than the semester preceding that of the comprehensive-final examination.

Recital/Thesis Requirements
For the major in composition: composition during the period of graduate study of several works of major proportion, at least one of which must receive public performance.

For the major in conducting: a public practicum and a performance-related or other scholarly document.

For the major in music literature: two written projects that provide focus to the candidate's work.

For the major in performance: recital(s), performance preparation from a repertoire list, and research papers, or a combination of part or all of these, as required by the major faculty.

For the major in performance and pedagogy: a full-length recital or proficiency examination before a faculty committee and documentation of research in pedagogy.

MASTER OF MUSIC EDUCATION
The master of music education (M.Mus.Ed.) program is designed to augment the student's undergraduate preparation in music education with the more advanced training required for service as both a teacher and a supervisor. In addition to contemporary methods and materials, this advanced study includes attention to aesthetic, philosophical, and psychological theories and principles of teaching music in today's schools.

Prerequisites
Applicants are expected to present undergraduate preparation equivalent to that required for the bachelor of music education degree at this University. No audition is required, except for those using conducting as a specialization. They should audition in person or send a videotape of a rehearsal or concert.

Program of Study
The master of music education degree has three components: a professional music education component, a minor area of study within music, and an area of specialization related to music education. Each component is approximately 10 hours, with a total of 30 semester hours comprising the minimum requirement for the degree.

The professional music-education component focuses on history of music education, philosophy, psychology of music and musical learning, research, curriculum, and administration. Two courses are required in this area: Foundations of Music Education and Research in Teaching Music. Elective courses within professional music education will complete study in this area. Examples of desirable electives are Psychology of Music Learning and Teaching Music through Performance.

The minor area of study is provided to develop both knowledge and craft in music to a more highly refined level. Six hours must be elected in music history, music performance/pedagogy, or music theory. Studies in music performance, as well as other study, must be at the graduate level. One member of the student's committee will be from the minor area, and it is assumed that at least some part of the student's study will be with that faculty member.

The area of specialization will be selected and structured by the student and an advisor, based on the student's interests and abilities. Concentration may be in the traditional areas of choral, general, or instrumental music. Other options include the related arts, e.g., music and dance, musical theatre, music and fine arts, etc., or a more individualized area relating to the student's professional interests.

An important aspect of the master of music education degree is the culminating paper. This paper will be completed and reported on in the course Topics in Music Education. Ideas for the paper should be formulated to some degree throughout the student's program.

Normally the course work for the degree can be completed in one academic year plus two summers. However, since courses in music education are available in late afternoons, teachers within commuting distance to Boulder can earn a significant portion of credit toward the degree during the academic year without taking a leave from their teaching position.

DOCTOR OF MUSICAL ARTS
The doctor of musical arts (D.Mus.A.) is a professional degree for creative and performing students who possess the talent as well as the breadth of knowledge, background, outlook, and scholarly capacity requisite to a doctoral program. Fields of study are composition, instrumental conducting and literature, literature and performance of choral music, performance, and performance and pedagogy. Performance concentration areas are organ, piano, and string instruments. Performance and pedagogy concentration areas are piano, string instruments, voice, and winds/percussion. Outlines of specific programs may be
obtained from the Office of the Associate Dean for Graduate Studies.

**Prerequisites**

Entrance requirements include a master's degree in music or demonstrated equivalency comparable to that of the master of music degree at this University; submission of performance tapes or, for composers, original scores and tapes of compositions; a personal audition and interview, when possible; and evidence of writing proficiency (in English) and scholarly research, such as term papers or theses.

**Program Requirements**

The following program description supplements the requirements applying to all graduate students found in the Graduate School section and in the introductory section of Graduate Degree Programs in this College of Music section. Information on quality of work, credit by transfer, application for admission to candidacy, comprehensive examination, and final examination found under the Ph.D. description is applicable to the D.Mus.A. degree. D.Mus.A. degree work must be completed within six years of first registration.

**Residence Requirements.** Residence includes three semesters or the equivalent in summer sessions beyond the master's degree, of which at least two academic-year semesters must be in residence at this University and must be consecutive. Not more than one-half semester of residence credit may be earned in a summer session. Students must be registered as a full-time student to earn residence credit.

A student who drops out of school before earning residency must apply for readmission as a new student. Such students should investigate the Time Out Program before dropping out, in order to ensure their readmission.

**Continuous Registration.** After the residence requirements for the doctor of musical arts program have been satisfied, a student must enroll and pay tuition for fall and spring semesters of each year until attaining the degree or formally resigning. After a student has enrolled in all required dissertation courses, he or she will enroll in TMUS 8019, Precandidate for Doctor of Musical Arts Degree, until having become a candidate for the degree. After becoming a candidate, the student will enroll in TMUS 8029, Candidate for Doctor of Musical Arts Degree, until the degree is completed. This continuous registration is independent of residence at the University.

**Degree Plan.** A degree plan should be presented to the associate dean for graduate studies and the doctor of musical arts committee no later than the second semester of residence. The major-area D.Mus.A. program coordinator and the student's major professor(s) are responsible for helping the student formulate this plan. The plan will include proposed members of the student's doctoral committee, projected remedial and supporting course work, suggested dissertation projects, and tentative dates for the comprehensive and final examinations.

**Language Requirement.** The one foreign language used to satisfy the D.Mus.A. language requirement must be approved by the student's advisory committee. Additional language work will be required for voice students.

**Course Requirements.** Students must take a minimum of 30 hours of seminar and dissertation work. Two doctoral seminars, one each in music history and theory, are required; prerequisites include 6 hours each in graduate-level music history and theory. Some areas require specific course work prior to or in conjunction with work on dissertation projects. In other instances students may be advised to take course work in preparation for the comprehensive examination. Applied music instruction may be elected for the duration of the residency requirement.

**Dissertation.** The D.Mus.A. dissertation consists of a specified number of performances, projects, and documents. The student's permanent advisory committee will assist the student in meeting degree requirements. While dissertation outlines for the various major areas are listed below, individual instances may require the permanent advisory committee to exercise discretionary flexibility in tailoring dissertation requirements to the student's artistic and educational advancement.

Normally, if students show only minor weaknesses on their preliminary examinations, they will be advised to begin work on the dissertation concurrently with preparation for the comprehensive examination.

DOCTOR OF PHILOSOPHY IN MUSIC

The doctor of philosophy (Ph.D.) in music degree is intended for those students who seek a terminal degree with emphasis on research. The three principal areas of study are music education, musicology, and music therapy; however, a combination of these or other emphases is possible, depending on student research interests and the availability of faculty. See the Ph.D. description found in the Graduate School section of this catalog for information concerning minimum course requirements, dissertation-credit-hour requirements, quality of work, advisory committees, residence, preliminary examinations, language requirements, comprehensive examinations, application for admission to candidacy, dissertation requirements, final examinations, and time limits. The sections that follow supplement that information.

Prerequisites

Students applying to the Ph.D. program should have a master’s degree or equivalent in a music field related to their intended area of study. Letters of recommendation, completed major papers, and satisfactory scores on the Graduate Record Examination (the verbal, quantitative, and advanced test in music are required) are a part of the student’s application for the degree. Upon acceptance to the degree program, students must pass the preliminary examinations and begin working toward basic requirements, i.e., foreign language, statistics, music courses, or any other work that must be taken at the precandidate level, during the first year of study.

Elective Music

EMUS 1081-3. Basic Music Theory. Introduction to tools used in notating, performing, creating, and listening to music. For nonscience majors only. Offered in fall and spring.

EMUS 1832-3. Appreciation of Music. Basic knowledge of music literature and development of discriminating listening habits. In addition, each section emphasizes a different aspect: aesthetics, history, concert attendance. For nonscience majors only. Offered in fall and spring.

EMUS 1852-3. Music of the Rock Era. History of music in the U.S., concentrating on music after 1950. Includes consideration of precursor styles (e.g., Black music tradition, rock and roll, folk), discussion of stylistic changes, and evolution in current popular styles. For nonscience majors only. Offered in spring only.

EMUS 2752-3. History of United States Folk and Popular Music. Stylistic and historical examination of trends that have influenced present-day American music. Offered in fall and spring.

EMUS 2762-3. Music and Drama. Techniques used in combining music and dramatic arts through examples from musical and dramatic literature of the West from circa 1000 to present. Offered in fall only.

EMUS 2772-3. World Musics. Musics outside western art tradition, using current ethnomusicological materials. Offered in fall only.

EMUS 3082-3. American Popular Music. Historical survey with focus on popular song literature of 1820-present, including pop of peripheral influences such as jazz, folk, country, etc.

EMUS 3642-3. History of Jazz. Study of origins, development, and current trends. Offered in fall and spring.

EMUS 3652-3. Music of the Twenty-First Century. Explores the contemporary trends of the art of music to discern which paths the future may take. Experimental learning through use of synthesizers and global musical ensembles featured as well as study of the future as history. For nonscience majors. Offered in fall only.

EMUS 3822-3. Music Literature 1. Study of music literature from choral, orchestra, chamber music, and operatic repertoire. For nonscience majors only. Offered in fall only.

EMUS 3832-3. Music Literature 2. Continuation of MUSC 3820. Offered in spring only.

EMUS 4752-3. Women Composers. Survey of western music through works composed by women, with emphasis on eighteenth through twentieth centuries. Offered in fall only.

EMUS 4892-3. Latin American Music. Music of cultures south of the United States—Mexico, Peru, Brazil, Cuba, and other countries having substantial musical heritage—emphasizing relationship of folk, popular, and art styles. Offered in spring only.

COURSE DESCRIPTIONS

The following courses are offered in the College of Music on the Boulder campus. This listing does not constitute a guarantee or contract that any particular course will be offered during a given year.

For current information on times, days, and instructors of courses, students should consult the Registration Handbook and Schedule of Courses issued at the beginning of each semester.

Some courses may be open to nonmajors. Students should check for current policies.

Courses numbered in the 1000s and 2000s are intended for lower-division students and those in the 3000s and 4000s for upper-division students. Courses numbered in the 5000s are primarily for graduate students, but in some cases may be open to qualified undergraduates. Normally, courses at the 6000, 7000, and 8000 level are open to graduate students only.

Courses are organized by subject matter and are listed numerically by last digit (courses ending in the number "0" are listed before courses ending in "1," and so on). The number after the course number indicates the semester hours of credit that can be earned in the course.

Abbreviations used in the course descriptions are as follows:

Prereq.—Prerequisite
Coreq.—Corequisite
Lab.—Laboratory
Rec.—Recitation
Lect.—Lecture
Music Ensembles

A variety of both large and small ensembles is offered in all fall and spring semesters for all University students. Participation in all ensembles is voluntary.

- Bands: Concert Band, Marching Band, Wind Ensemble
- Choirs: Collegiate Choirs, University Chorus
- Orchestras: Chamber Orchestra, Symphony Orchestra

Ensembles: Bell, Chamber Music, Wind, Woodwind

Opera: Opera, Musical Theatre

Music

Theory and Composition

MUSC 1001-3, 1011-3. Theory 1 and 2. Commodore course in the various elements of music theory, including composition, structural analysis, and principles of two-voice, three-voice, and four-voice writing. Coreq. MUSC 1011. Offered in fall only, 1011 offered in spring only.

MUSC 1021-1, 1031-1. Theory and Ear Training Laboratory 1 and 2. Practice in rhythmic, melodic, harmonic, and contrapuntal singing and ear training. Coreq. MUSC 1021. Offered in fall only, 1031 offered in spring only.

MUSC 1091-1. Rudiments of Music Laboratory. Elementary training and sight singing for music majors only. Credit may not be used toward a degree in music. Coreq. MUSC 1091. Offered in fall only.

MUSC 1101-2. Semester 1 Theory. Introduces the fundamentals of tonal harmony and voice leading, focusing on four-voice writing and analysis of excerpt from music literature. Offered in fall only.

MUSC 1111-2. Semester 2 Theory. Continuation of MUSC 1101. Covers principles of harmony and voice leading, using all common diatonic triads and 7th chords. Introduces modulation, contrapuntal chord functions, and elementary structural analysis of excerpts from music literature. Coreq. MUSC 1101. Offered in spring only.

MUSC 2001-3. Theory 3. Continuation of Theory 2. Offered in fall only.

MUSC 2021-1, 2021-2. Theory and Ear Training Laboratory 3. Continuation of Ear Training Laboratory 2. Offered in fall only.

MUSC 2101-2. Semester 2 Theory. Continuation of MUSC 1111. Reviews melodic and rhythmic figuration, covers dissonance and chromaticism, including modal mixture, 7th chords with added dissonance, non-spherical 7th chord, and augmented 6th chord. Provides structural analysis of musical excerpts. Coreq. MUSC 1111. Offered in fall only.

MUSC 2401-1, 2401-2. Instrumentation. Introduction to the study of the instruments of the orchestra, and problems of scoring for diverse groups and full orchestras. Offered in spring only.

MUSC 3051-2. Elementary Composition. A course for non-composition majors. Introduction to the craft of musical composition with analysis and writing in various styles. Offered in spring only.

MUSC 3071-3. Jazz Improvisation. Offers assistance and guidance for the student acquiring necessary skills and gaining insights for achieving creative musical results. Offered in fall and spring.

MUSC 4001-3. Contemporary Theory. Study of established theoretical principles applied to advanced and recent idioms. Creative work included. Offered in fall only.

MUSC 4011-2. Sixteenth-Century Counterpoint. Study of the style of Palestrina and his contemporaries through analysis and written examples. Offered in spring only.

MUSC 4021-2. Eighteenth-Century Counterpoint. Stylistic study of main contrapuntal forms of the period including inversion, counterpoint, and fugue. Stress analysis and written examples. Offered in fall only.

MUSC 4031-2. Scoring and Arranging. Practical problems, creative arranging, and scoring for various choral and instrumental groups. Offered in spring only.

MUSC 4041-2. Orchestration. Study of advanced orchestration techniques through score analysis and student projects. Offered in fall only.

MUSC 4061-2. Analysis 1. Selected works through the eighteenth century. Offered in fall only.

MUSC 4071. Analysis 2. Selected works of the nineteenth and early twentieth centuries. Offered in spring only.

MUSC 4101-3. Theory and Aural Skills Review. A concentrated review of tonal harmony, voice leading, and essential aural skills. Includes diatonic triads and 7th chords, modulation, chromaticism, and structural analysis of representative compositions. Designed to prepare graduate students for more advanced work in music theory. Offered in fall only.

MUSC 5001-3. Contemporary Theory. Study of established theoretical principles applied to advanced and recent idioms. Creative work included.

MUSC 5051-3. History of Theory: Study of important theoretical writings from ancient Greece to the present.

MUSC 5061, 5071-3. Advanced Analysis 1, 2.

MUSC 5101-3. Advanced Counterpoint.

MUSC 5301-1. Theory Teaching Practicum. Experience in planning, teaching, and evaluating undergraduate theory composition courses.

MUSC 7801-3. Doctoral Seminar in Music Theory. Advanced studies in theory are undertaken. Each student presents results of research on individually chosen topics or aspects of a topic central to the class. A major paper or project is required.

History and Literature of Music

MUSC 1802-3. Introduction to Music 1. Introduction to the study of music including bibliographic, listening, score-reading, critical reading, and writing skills; music terminology; a survey of selected music genres (symphonic and chamber music); and building of general music repertoire. Offered in fall only.

MUSC 1812-3. Introduction to Music 2. Continuation of MUSC 1802 with further emphasis on developing critical reading and writing skills, enhancing the general repertoire, and beginning new areas of study: American music, world music, and music aesthetics. Offered in spring only.

MUSC 3802-3, 3812-3. History of Music. Survey of western art music with stylistic analysis of representative works from all major periods.

MUSC 3802 offered in fall only, 3812 offered in spring only.
MUSC 4712-3. Renaissance Music. Repertoire and analysis of polyphonic music circa 1400-1600. Offered in fall only.

MUSC 4762-3. History of Choral Literature. Survey of ensemble vocal music from chant to the present. Offered in fall only.

MUSC 4772-3. History of Opera. Survey of operatic literature from early Baroque to contemporary productions. Offered in fall only.

MUSC 4792-3. Twentieth-Century Music. Major trends and developments are explored while focusing on specific compositions of important composers. Offered in fall only.

MUSC 4822-3. Ancient and Medieval Music. Survey from early times to circa 1400. History major and others desiring extended study in this epoch should enroll for 3 hours credit. Offered in spring only.

MUSC 4852-3. Seventeenth- and Early Eighteenth-Century Music. Style and repertory of music from 1700 to 1750. Offered in spring only.

MUSC 4712-3. Renaissance Music. Seminar in which students are encouraged to participate in the performance of works from the early Baroque to the present.

MUSC 5762-3. History of Choral Literature. Seminar in analysis of musical style, chant to present. Those wishing review of literature and repertory may enroll for 4 hours credit.

MUSC 5772-3. History of Opera. Survey of operatic literature from early Baroque to contemporary productions.

MUSC 5792-3. Twentieth-Century Music. Major trends and developments explored while focusing on specific compositions of important composers.

MUSC 5802-3. History of Vernacular Music in the U.S.

MUSC 5822-3. Ancient and Medieval Music. Survey from early times to circa 1400. Two regular class meetings per week, plus seminar for variable credit. Those wishing to study black menural notation in seminar should enroll for 4 hours credit.

MUSC 5872-3. Late Eighteenth- and Nineteenth-Century Music. Music and documents of Classic and Romantic periods, 1750-1900, are examined extensively, with a concentration on representative musical works and theoretical writings that contributed to the formulation of significant aesthetic and compositional principles.

MUSC 5882-3. Seminar: Studies in Late Eighteenth- and Nineteenth-Century Music. Meeting as a seminar, class examines selected topics in Classical and Romantic music, 1750-1900, which vary from year to year.

MUSC 5892-3. Latin American Music. Music of cultural school countries of the U.S. (Mexico, Peru, Brazil, Cuba, and other countries having substantial musical heritage), emphasizing relationships of folk, popular, and art styles.

MUSC 5902-3. Seminar: Women in Music. Meeting as a seminar, class examines recent research in selected topics in the history of women's contributions as composers, performers, and critics. Topics vary from year to year.

MUSC 5782-3. Seminar in Musicology. Required of all musicology majors prior to completion of comprehensive examinations. A different research area is designated each semester. Periodic reports to musicology colloquium required.

Music Education

MUSC 2103-3. Introduction to Music Education. Music education within aesthetic education is the principal focus of study. Patters of music curricula in schools will be explored through class study, school observations, and participation. Special consideration given to methods and materials in general music. Offered in fall only.

MUSC 3013-3. String Class. Required course for music education majors with choral/general emphasis. Students gain substantial technique on violin, viola, cello, and double bass. Pedagogical skills developed, using most recent methods as they relate to school teaching. Offered in fall only.

MUSC 3023-1. Woodwind Class. Presents techniques of playing and teaching woodwind instruments as well as selection of methods and equipment for use with students of woodwind instruments. Offered in spring only.

MUSC 3033-1. Brass Class. Presents techniques of playing and teaching brass instruments as well as selection of methods and equipment for use with students of brass instruments. Offered in fall only.

MUSC 3103-3. Teaching General Music. Intensive study of general music teaching at all levels through development of philosophy of music within aesthetic education, musical structure as content and child development objectives; methods and approaches: Orff, Kodaly, Dalcroze, MMCC, eclectic approaches; evaluation. Offered in fall of even-numbered years.

MUSC 3113-3. Introduction to the Arts. Survey of the arts in western culture, including architecture, painting, sculpture, poetry, prose, music, dance, comedy, tragedy, and film, along with a presentation of various approaches relating to the arts. Offered in spring only.

MUSC 3123-3. Teaching Choral Music. Music materials, pedagogical techniques, and administrative procedures used in choral music programs for junior and senior high school students. Offered in fall of odd-numbered years.

MUSC 3132-3. Teaching Orchestral Music. Basic skills for understanding and using the orchestra, guitar, autoharp, and percussion instruments in the general music classroom at all school levels. Offered in fall of odd-numbered years.

MUSC 3143-3. Teaching Instrumental Music. Basic course covering broad principles for organizing, administering, and teaching instrumental music programs in public schools. Offered in fall only.

MUSC 3153-3. Teaching Woodwind Instruments. Instruction in playing and teaching all woodwind instruments. Students perform in heterogeneous and homogeneous groupings. Offered in spring only.

MUSC 3163-3. Teaching String Instruments. Instruction in playing and teaching all string instruments. Students perform in heterogeneous and homogeneous groupings. Offered in fall only.

MUSC 3192-3. Vocal Pedagogy and Literature for Young Voices. Presents an overview of how the singing voice functions. Additional areas of study include health care of the voice, group techniques, and corrective ideas for vocal problems commonly encountered in the studio and choral rehearsal. Both solo and ensemble repertoire for junior and senior high school singers are explored. Provides instrumentals with knowledge and skills needed to work with singers in both private studio and public school choral settings. Offered in spring only.

MUSC 3203-3. Music for the Classroom Teacher. New approach to giving elementary teachers the knowledge and skills needed to meet the certification requirement designed to develop minimum knowledge and skills.

MUSC 3223-3. Teaching Brass Instruments. Instruction in playing and teaching all brass instruments. Students perform in heterogeneous and homogeneous groupings. Offered in fall only.

MUSC 3243-2. Marching Band/Jazz Band/String Techniques. Techniques of arranging and arranging for marching band, techniques and literature of the jazz ensemble, or alternative string ensemble techniques. Offered in spring only.

MUSC 4103-1. Introduction to Student Teaching. Instructional aide experiences in the schools. First half of the professional year.

MUSC 4153-1. Perussion Class and Pedagogy. Offered in fall only.

MUSC 4193-1. Student Teaching Seminar. Required of all students while student teaching.

MUSC 5103-3. Teaching General Music. For graduate music education majors whose emphasis is general music.
MUSC 5123-3. Choral Music Techniques and Materials. For graduate music education majors whose emphasis is choral music.

MUSC 5143-2. Developing Children's Choirs. Aesthetics includes children’s vocal development, music learning through performance, organization of children’s choirs, and literature for young voices.

MUSC 5203-3. Topics in Music Education. Preparation of individual topics in a seminar setting. Final project is the major research document for master’s degree students in music education.

MUSC 6113-3. Foundations of Music Education. Survey of historical, philosophical, psychological, and aesthetic bases of contemporary music education.

MUSC 6133-4. Comprehensive Musicianship for Teachers. Application of structural and analytical principles of music to teaching, conducting, and performing music for musician-teachers in schools.

MUSC 6153-2. Administration and Supervision of Public School Music. Focuses on the organization, administration, and supervision of music education in the public schools. Topics addressed include contemporary issues relating to curriculum development, teacher training and guidance, program evaluation, and philosophy of music education.

MUSC 6173-2. Directions of Contemporary Aesthetic Education.

MUSC 6193-1. Selected Studies in Music Education. May be repeated for additional credit. Prereq., consent of instructor and chairman of the music education faculty.

MUSC 7103-3. History of Music Teaching. Historical understanding of music teaching from Middle Ages to present. Students explore methods, materials, and philosophies from the past and study how these factors have evolved and influenced today's pedagogy.

MUSC 7123-2. Research Practicum—Music Education.

**Voice**

MUSC 1443-2. Italian/English Diction and Repertoire. Phonetics of Italian and English, and coaching of classic arias and art songs. Offered in fall only.

MUSC 4464-2. French/German Diction and Repertoire. French and German diction and coaching in art song and liedter. Open to singers and pianists. Offered in spring only.

MUSC 5404-2. Words and Music. Discussion of the development of art song in western civilization. Performance practices, texts, and musical styles are discussed.

MUSC 5434-2. Russian Song Repertoire. Russian phonetics and coaching of art songs.

MUSC 5444-2. Vocal Pedagogy. Study of the physiology, acoustics, and functional interdependence of the singing voice. Recommended for all graduate students in voice.

MUSC 5454-2. Pedagogy 2: Repertoire for Young Voices.

MUSC 5464-2. French Song Literature. Extensive analytical and historical discussion of French song literature styles, from the middle ages through the twentieth century.

MUSC 5474-2. German Song Literature. Extensive analytical and historical discussion of German song literature styles, from the middle ages through the twentieth century.

MUSC 5484-2. Graduate Seminar in Vocal Pedagogy. Demonstration teaching by class members. Examination and evaluation of comparative methodology. Practical aspects of studio teaching, including corrective techniques, group procedures, and recital programming. Prereq., MUSC 5444 or instructor consent.

**Organ and Church Music**

MUSC 2265-2. Service Playing Techniques. Methodology of playing for a church service including directing from the console, modulation, accompanying, and hymn playing.

MUSC 4265-2, 4275-2. Improvisation. Same as MUSC 5265, 5275.

MUSC 4285-3, 4295-3. Organ Survey. Historical survey of organ music and organ construction, studying both forms of composition and types of organ for which the music was originally written. Trips to various churches in area will give the student an opportunity for firsthand observation. Same as MUSC 5285, 5295.

MUSC 5235 (2-8). Church Music Research.

MUSC 5255-2. Service Playing Techniques. Thorough study of music of the liturgies of Lutheran and Anglican services. Includes techniques of hymn playing, modulation, transposition, and accompanying and directing from the console.

MUSC 5265-2, 5275-2. Improvisation. Same as MUSC 4265, 4275.

MUSC 5285-3, 5295-3. Organ Survey. Same as MUSC 4285, 4295.

**Piano**

MUSC 1325-1. Piano Sight Reading. Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble, choral, and theatrical literature. Also covers score reading and transposition. Offered in fall only.

MUSC 2325-2. Applied Harmony for the Keyboard. Intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, transposition, on-site harmonic analysis, and playing by ear. Offered in spring only.

MUSC 2365-2. Introduction to Accompanying. Includes chamber music for pianists and music-making potentials. Performance required in a variety of accompanying roles; critiqued and coached by class and instructor.

MUSC 3345-2. Piano Pedagogy 1. Discussion of teaching philosophies, objectives, and procedures. Examination and evaluation of methods and materials. Practical aspects with which the private teacher is concerned. Offered in fall only.

MUSC 3355-2. Piano Pedagogy 2. Learning theories, student teaching, examination and evaluation of materials for intermediate and early advanced piano students, developing artistry, approaches to technique, sight-reading, memorizing, the independent studio teacher in the business and professional world. Offered in spring only.

MUSC 4325-2. Piano Literature. Survey from eighteenth century to present. Offered in fall only.

MUSC 4365-2. Piano Accompanying. Discussion and performance of selected art songs and sonata literature, emphasizing performance and preparation procedures. Special projects. May be repeated for additional credit. Offered in spring only.

MUSC 5335-2. Piano Music of the Twentieth Century. Study of specific contributions to piano literature by such composers as Schoenberg, Webern, Bartok, Stravinsky, Dallapiccola, Boulez, Stockhausen, Berio, Copland, Crumb, Martirano, and others.

MUSC 5345-2, 5355-2. Research: Piano Literature and Pedagogy. Individual or group research related to piano pedagogy or literature for piano.

MUSC 5365-2. Piano Accompanying. Continuation of MUSC 4365. May be repeated for additional credit.

MUSC 6345-3, 6355-3. Group Process. Student participation in groups with two to four individuals (studio-performance instruction); classes with five to twelve individuals (keyboard-skills instruction).

MUSC 6365-3, 6375-3. Practicum. In-depth experiences in organizing, teaching, and cri-
ing all phases of the group-environments program. Registration required until the following are completed: performance examination consisting of all keyboard skills, TMUS 8239, Dissertation Project; and comprehensive examination for candidacy.

MUSC 5385-3. Group/Class Piano in College. Educational and musical issues; organization and guidance of groups (studio-performance instruction) and classes (keyboard-skills instruction). Supervised teaching in children’s laboratory and college class program.

**Instrumental**

MUSC 1264-1. Guitar Sight Reading, Studies 19th- and 20th-century approaches to improving sight reading, including practical applications and exercises.

MUSC 3176-2, 3186-2. Conducting 1, 2. Introduction to conducting and rehearsal techniques. MUSC 3176 offered in fall only, 3186 offered in spring only.

MUSC 4106-2. Guitar Literature: An analytical and historical study of guitar literature from the Middle Ages through the 20th century.

MUSC 4666-2. Chamber Music Literature: Winds and Percussion. Syllabus-historical survey in various genres from Baroque era to present. Same as MUSC 5666.

**Theses and Recitals**

MUSC 3987-1. Bachelor of Arts in Music Research Seminar. Concentration on conceptual aspects of research, the psychology and ordering of a library search that leads to formal paper. Applies student’s interests and curricular goals to specific topic; includes preparation of a prospectus for senior thesis.

MUSC 3997-1. Junior Recital.

MUSC 4987-2. Arts Management Techniques. Includes marketing, fund raising, budget, personnel management, contracts, and other facets of arts management.

MUSC 4997-1. Senior Thesis.

MUSC 4997-1. Senior Recital.

**Choral Music**

MUSC 5158-2. Symposium in Choral Music. Advanced conducting and analytical study. Required of all choral graduate students for three semesters.

**Graduate Interdepartmental Courses**

MUSC 5708 (2-3). Introduction to Music Bibliography and Research. Basic information sources about music and musicians and a study of bibliographic forms, research, and writing techniques employed in music research papers, theses, and dissertations. Required in all master's degree programs.

**Performance Music**

Courses in composition and vocal or instrumental technique and interpretation may be found under the DMUS section of the Registrars Handbook and Schedule of Classes. For individual applied music instruction, the equivalent of one hour of individual instruction (lesson) and one hour of literature are required. Undergraduate performance majors carry 4 credit hours per semester; music education majors, 3 hours per semester (1 hour recitation); bachelor of arts in music majors, 2 or 4 hours per semester; minors, 2 hours per semester. Graduate performance majors normally carry 3 hours per semester (including ensemble credit if required); minors, 2 hours per semester.

**Thesis Music**

TMUS 4403-4493 (1-3). Special Studies. Advanced studies in specific areas or special projects in selected areas. For undergraduate majors only. See current Registration Handbook and Schedule of Courses for specific course numbers. May be repeated for additional credit.

TMUS 5504-5594 (1-3). Special Studies. Graduate studies in specific areas or special projects in selected areas. For master's degree students only. See current Registration Handbook and Schedule of Courses for specific course numbers. May be repeated for additional credit.

TMUS 5605-5695 (1-3). Special Studies. Advanced graduate study in specific areas or special projects in selected areas. For doctoral degree students only. See current Registration Handbook and Schedule of Courses for specific course numbers. May be repeated for additional credit.

TMUS 6948-3. Master's Degree Candidate.

TMUS 8019-1. Precandidate for Doctor of Musical Arts.

TMUS 8029-1. Candidate for Doctor of Musical Arts.

TMUS 8219-3. Dissertation Project 1 (Solo Recital, Choral Concert, Composition).

TMUS 8229-3. Dissertation Project 2 (Solo Recital, Choral Concert, Composition, Vocal Pedagogy Project).

TMUS 8239-3. Dissertation Project 3 (Chamber Music Recital, Vocal Pedagogy Project, Choral Project, Composition Recital).

TMUS 8249-3. Dissertation Project 4 (Chamber Music Recital, Choral Project, Composition Recital, Wind/Percussion Recital).

TMUS 8269-3. Dissertation Project 6 (Research Lecture).

TMUS 8319-3. Repertoire Project.

TMUS 8339 (4-6). Major Composition.

**FACULTY**

ROBERT FINK, Dean; Professor (Theory). B.Mus., M.Mus., Ph.D., Michigan State University.

PHILIP AARHOLM, Professor (Clarinet). B.A., M.M., University of Wisconsin; D.M.A., University of Arizona.

MICHAEL ALLEN, Instructor (Tuba). B.M., University of Denver.

WAYNE BAILEY, Assistant Dean; Assistant Professor. B.M., Iowa State University; M.M., University of Michigan; D.Mus.A., University of Colorado.

FRANK BAIRD, Professor Emeritus.

GREITZEN HIERONYMUS BEALL, Professor Emerita.

GIORA BERNSTEIN, Professor (Viola). Diploma, The Juilliard School; M.F.A., Brandeis University; D.M.A., Boston University.

RICHARD BOLDREY, Associate Professor and Associate Director; Lyric Theatre Program. B.Mus., Chicago Musical College; Roosevelt University; M.Div., Trinity Evangelical School.

JAMES BRODY, Associate Professor (Oboe). B.M., Ohio State University; M.M., Indiana University.

STEVEN M. BRUNS, Assistant Professor (Theory, Composition). B.M.E., Northern State College; Aberdeen, SD; M.M., Ph.D., University of Wisconsin.

STORM BULL, Professor Emeritus.

CHARLES BYERS, Professor Emeritus.

THOMAS CAMEVA, Associate Director of Bands; Instructor. B.Mus.Ed., University of Illinois; M.Mus., University of Texas.

ANGELA CHENG, Assistant Professor (Piano). B.Mus., The Juilliard School.

ALVIN CHOW, Assistant Professor (Piano). B.Mus., University of Maryland; M.Mus., The Juilliard School.

WALTER COLLINS, Professor Emeritus.

GUY DUCKWORTH, Professor Emeritus.

GREGORY DYES, Assistant Professor.
B.M.E., M.M., Northwestern University; D.M.A., University of Colorado.

CHARLES EAKIN, Professor (Theory; Composition). B.M., Manhattan School of Music; M.A., Carnegie Institute of Technology; Ph.D., University of Minnesota.

OLIVER ELLSWORTH, Associate Professor (History and Literature). B.A., M.A., Ph.D., University of California, Berkeley.

PAUL ERHARD, Assistant Professor (Double Bass). B.M., Eastman School of Music; M.M., University of Michigan.

ELIZABETH FARR, Assistant Professor (Organ, Harpsichord). B.M., Stetson University; M.M., Juilliard School; D.M.A., University of Michigan.

CATHERINE FITTERMAN, Lecturer (Arts Management). B.M., East Carolina University; M.A., University of Cincinnati.

JOHN GALM, Assistant Professor (History, Percussion). B.M., M.Mus., Performer’s Certificate, Eastman School of Music.

TANYA GILLE, Assistant Professor (Piano). B.Mus., M.Mus., Indiana University; D.Mus.A., Eastman School of Music.

JUDITH GLYDE, Associate Professor (Cello). B.M., Hartt College of Music; M.M., Manhattan School of Music.

ROBERT HARRISON, Associate Professor (Voice). B.A., Milton College; M.M., University of Wisconsin; D.M.A., University of Arizona.

DEBORAH HAYES, Associate Professor (History and Literature). A.B., Oberlin College; A.M., Ph.D., Stanford University.

WILLIE I. HILL, Jr., Assistant Dean; Associate Professor (Music Education). B.S., Grambling State University; M.Mus.Ed., Ph.D., University of Colorado at Boulder.

EVERETT HILTY, Professor Emeritus.

WARNER IMIG, Dean and Professor Emeritus.

YOSHITAKI ISHIKAWA, Associate Professor (Bassoon). B.M.E., M.M., Northwestern University; D.M.A., University of Michigan.

DENNIS JACKSON, Professor (Voice). B.A., Texas Wesleyan College; M.M., Wichita State University; D.M.A., University of Michigan.

LAWRENCE KAPTEIN, Associate Professor (Choral, Music Education). B.Mus.Ed., Willamette University; M.A., Portland State University; D.M.A., University of Southern California.

WILLIAM KEARN, Professor Emeritus.

DENES KOROMZAY, Professor Adjunct (Viola). Artist Diploma, Franz Liszt Academy of Music.

DORIS PRIDONOFF LEHNERT, Professor (Piano). Attended University of Southern California, The Juilliard School, and University of Connecticut.

OSWALD LEHNERT, Professor (Violin; Viola). Special Studies, Chicago Musical College; The Juilliard School; University of Connecticut.

ALAN LURHING, Associate Professor (History and Literature). B.A., University of Minnesota; M.A., Ph.D., Stanford University.

JOSEPH LUKASIK, Director of Music Technology. B.M., Eastman School of Music; M.M., University of Michigan.

KATIE RAYE MASON, Assistant Professor. B.Mus.Ed., B.M., Murray State University; M.M., University of Illinois; Ph.D., University of Wisconsin.

KEVIN McCARTHY, Associate Dean for Undergraduate Studies; Associate Professor (Music Education). B.Mus.Ed., University of Notre Dame; M.Mus., Michigan State University; Ph.D., Case Western Reserve University.

ALDEN MCKINLEY, Professor Emeritus.

HUGH McMILLIN, Professor Emeritus.

ALLAN McMURRAY, Director of Bands, Professor (Trumpet). B.A., California State University; Long Beach, M.Mus., University of Wisconsin. Additional study, University of Michigan.

JANET MONTGOMERY, Associate Professor (Music Education). B.Mus.Ed., M.Mus.Ed., Wichita State University; Ph.D., University of Wisconsin-Madison.

TOM MYER, Instructor (Saxophone). Assistant Director of Bands; Director of Jazz Ensembles; B.S., University of Wisconsin-LaCrosse; M.M., North Texas State University.

LAURA OKUNIEWSKI, Lecturer (Harp). B.M., Cleveland Institute of Music; M.M., Cleveland State University.

PAUL PARMELLE, Professor Emeritus.

PAT PETERSON, Assistant Professor (Voice). B.M., Salem College; M.M., D.M.A., University of Colorado.

DAVID PINKOW, Associate Professor (Horn and Theory). B.Mus., Eastern School of Music and Music; M.F.A., Carnegie-Mellon University; D.M.A., University of Maryland.

THOMAS RIIS, Professor (Music History). B.A., Oberlin College; M.A., Ph.D., University of Michigan.

BRENDA ROMERO, Instructor (History and Literature, Ethnomusology). B.M., M.M., University of New Mexico.

BARBARA KINSEY SABLE, Professor Emeritus.

GORDON SANDFORD, Professor (Music Education). A.B., San Jose State College; A.M., University of Redlands; Ph.D., University of Southern California.

TERRY SAWCHUK, Assistant Professor (Trumpet). B.M., M.M., University of Michigan.

F. WAYNE SCOTT, Professor Emeritus.

JULIE SIMSON, Assistant Professor (Voice). B.Mus., Western Michigan University; M.Mus., University of Illinois.

ROBERT SPILLMAN, Professor (Piano). B.M., M.M., Eastman School of Music.

WILLIAM STARR, Professor Adjunct (Violin; Viola). B.A., M.M., Eastman School of Music.

RICHARD TOENSING, Professor (Theory and Composition). B.Mus., Sc Olaf College; M.Mus., D.M.A., University of Michigan.

YAYOI UNO, Instructor (Music Theory). B.A., Lewis and Clark College; M.A., SUNY Stony Brook.

DON VOLLSTEDT, Professor Emeritus.

MARK WAIT, Assistant to the Vice President for Academic Affairs; Professor (Piano). B.M., Wichita State University; M.Mus., Kansas State University; D.M.A., Peabody Conservatory.

KEITH WALLINGFORD, Professor Emeritus.

DOUGLAS WALTER, Assistant Professor (Percussion). B.M., University of North Texas; M.M., University of Michigan; D.M.A., Temple University.

HOWARD WALTZ, Professor Emeritus.

LYNN WHITEN, Associate Dean for Graduate Studies; Professor (Choral). B.A., Wayland College; M.M., University of Texas; D.Mus.A., University of Southern California.

CHARLES WOLZIEN, Assistant Professor (Guitar). B.Mus., San Francisco Conservatory; M.Mus., D.Mus.A., University of Colorado.

KAREN YONOVITZ, Associate Professor (Flute, Woodwind Chamber Music). B.Mus.Ed., Baldwin-Wallace College Conservatory of Music; M.Mus., Yale University.

Takacs Quartet

ANDRAS FEJER, Assistant Professor (Cello). Graduate, Franz Liszt Academy of Music, Budapest.

GABOR ORMAI, Assistant Professor (Viola). Graduate, Franz Liszt Academy of Music, Budapest.

KAROLY SCHRANZ, Assistant Professor (Violin). Graduate, Franz Liszt Academy of Music, Budapest.

GABOR TAKACS-NAGY, Assistant Professor (Viola). Graduate, Franz Liszt Academy of Music, Budapest.
Preprofessional Programs

Preprofessional programs have been developed at CU-Boulder to prepare undergraduate students for later study at professional schools. None of Boulder’s preprofessional programs offers an undergraduate degree, and completion of any of the programs does not guarantee later admission to a professional school. However, these programs are linked to professional schools within Colorado, and completion of a preprofessional program can prepare a student well for later professional study.

Preprofessional programs include:

- Pre-Health Sciences
  - Pre-Child Health Associate
  - Pre-Dental Hygiene
  - Pre-Dentistry
  - Pre-Medical Technology
  - Pre-Nursing
  - Pre-Pharmacy
  - Pre-Medicine
  - Pre-Veterinary Medicine
- Pre-Journalism
- Pre-Law

Students can prepare to enter undergraduate professional health science programs at the University of Colorado Health Sciences Center in Denver in the areas of child health associate, dental hygiene, medical technology, nursing, pharmacy, and physical therapy by taking classes on the Boulder campus.

Students whose goals include entering the medical or dentistry schools at the University of Colorado Health Sciences Center in Denver, or the veterinary medicine program at Colorado State University in Fort Collins, can complete any undergraduate major at CU-Boulder. In most cases, these students are required to complete a baccalaureate degree before entering professional school.

CU-Boulder houses the School of Journalism and Mass Communication, to which students can apply after completing the requisite course work, and the School of Law. Students typically earn an undergraduate degree before entering law school.

Advising for preprofessional study in the health sciences and law is conducted through the Office of Preprofessional Advising in the Advising Resource Center, Willard 400, (303) 492-8811. Students can receive information about course requirements, test deadlines, and enrollment limitations, and discuss other concerns about professional study. See the section of this catalog titled Preprofessional Advising under Campus Facilities and Resources for more information.

PRE-HEALTH SCIENCES

Students with vocational interest in a health field usually apply to a professional program after completing three years of college work, which must include specific preprofessional courses. At the time of application to a professional school, students are judged on several factors, including performance in undergraduate courses. For this reason, no required course may be taken on a pass/fail basis. Some fields require specific preprofessional examinations before application. For most fields, interviews are an essential part of the application process. In all cases, admission committees are concerned with students’ compassion, coping and decision-making abilities, intellectual capabilities, realistic self-appraisal, sensitivity in interpersonal relations, and staying power (physical and motivational). In addition to formal course work, students should have experience in people-related activities (especially those related to their field of choice), so they can be more certain of their motivation for health careers.

Some of the professional programs at the University of Colorado Health Sciences Center give preference to Colorado residents and residents of WICHE (Western Interstate Commission for Higher Education) states; interested students should check with individual programs for specific policies. Students from other states usually can obtain at CU-Boulder the preprofessional courses required by their state schools, but should check with those schools in advance. Students are encouraged to apply both to their state school and to private professional schools to increase their chances of gaining acceptance to the professional program of their choice.

During the preprofessional years, personal intellectual development leads many students to change professional goals. Since there are usually more applicants for these programs than there are spaces available, many students need to pursue alternative goals. Under these circumstances, students should plan college programs to give themselves the greatest flexibility in considering other vocations.

Most students in certain fields (dentistry, medicine, physical therapy, and veterinary medicine) complete an undergraduate degree before entering the professional program. Other fields (e.g., child health associate, dental hygiene, medical technology, nursing, and pharmacy) do not require an undergraduate degree. Students entering these latter programs are not required to satisfy degree requirements on the Boulder campus. However, it is prudent for students, while working to satisfy professional requirements, to also protect themselves by satisfying requirements for an undergraduate degree at CU-Boulder. Care in selection of courses permits the same courses to be used to satisfy several sets of requirements. For example, CHEM 1051 and 1071 satisfy minimal requirements for such fields as nursing, and physical therapy, but are not accepted for the other health fields. On the other hand, CHEM 1111, 1131, 3511, 3521, 3531, and 3541 permit students to apply to any health program and also satisfy degree requirements for any major requiring chemistry.

Students who plan to apply to medical, dental, or veterinary medicine school may do so from any major. For example, premedical and prescience students may be found majoring in both science and nonscience departments in the College of Arts and Sciences, as well as in such colleges as engineering, business, and music. Such students are therefore urged to examine carefully their academic strengths and weaknesses, as well as vocational alternatives, in planning a program of study. Generally, there is no advantage of one college or academic department over another in gaining admission to a professional program. Students who plan to apply to other health sciences programs are not required to be preprofessional majors in those fields in order to be eligible to apply to any of them. However, to be assured of receiving pertinent information and advising, such students should declare a major in the field of their primary interest. All students are urged to
consult with advisors in their major department, as well as with advisors in the pre-health fields.

A summary of current preprofessional health science requirements for Colorado programs follows, together with the number of openings in the program and information on the time a student normally applies. This information may change without notice. Students should therefore check with the preprofessional advisor at CU-Boulder or with the preprofessional program for current admission requirements and policies. For information about other health-related fields not specifically available at the University of Colorado, check with the preprofessional advising or career services offices.

Transfer students who have completed the necessary preprofessional work should apply for admission directly to the desired program.

**Child Health Associate**

The professional program at the University of Colorado Health Sciences Center requires three years in addition to three years of preprofessional work at CU-Boulder. A B.S. degree is required at the end of the first year of professional study. At that time students may apply for acceptance into the M.S. degree program, which can be completed by the end of the third professional year.

The application deadline is November 30 for 15 to 20 positions. A minimum of 90 semester hours is required for admission. Many applicants have more than minimal college requirements.

**Required Courses**

- Biology (EPOB 1210 and 1230, 1220 and 1240, or MCDB 1050 and 1060, 1070 and 1080) ............... 8
- Chemistry, general (CHEM 1111 and 1131) .................. 10
- English composition (ENGL 1191 and 2021 or 2051 or 3152) .... 3
- Speech (COMM 1010) ......................................... 3
- SOCY 1001 ..................................................... 3
- PSYC 1001 ..................................................... 3

**Dentistry**

The University of Colorado Health Sciences Center offers a four-year program leading to the doctor of dental surgery (D.D.S.).

Students normally apply between their junior and senior years for entry into the dentistry program after they have earned their bachelor’s degree. Students planning to enter with 90 hours can also apply, between their sophomore and junior years, and have the option of earning a bachelor’s degree and a dental degree. This double-degree program takes seven years. Students can satisfy all course requirements for the bachelor’s degree by counting hours from the dental curriculum.

The application deadline is April 1 for 36 positions. Out-of-state residents (particularly from WCHE states) may be accepted. The Dental Admission Test (DAT) is required for admission.

**Required Courses**

- Biology (EPOB 1210 and 1230, 1220 and 1240, or MCDB 1050 and 1060, 1070 and 1080) ............... 8
- Chemistry, general (CHEM 1111 and 1131, or CHEM 1115 and 1171) .................. 10-12
- Chemistry, organic (CHEM 3311 and 3321, 3331 and 3341, or CHEM 3351 and 3361, 3371 and 3381) .... 8-10
- Physics, general, with laboratory .................. 9-10
- Literature ................................................... 6
- English composition (ENGL 1191) .................. 3

**Medical Technology**

This one-year program at the University of Colorado Health Sciences Center leads to the bachelor of science degree in medical technology, program certification, and eligibility to sit for national certification exams.

Students normally apply during the fall of their junior year. The application deadline is January 1; 18 positions are available. Colorado residents have priority for admission. A minimum of 80 semester hours is required for admission (CU-Boulder hours may exceed minimum requirements shown).

**Required Courses**

- Biology, general (EPOB 1210 and 1230, 1220 and 1240, or MCDB 1050 and 1060, 1070 and 1080) ............... 8
- Chemistry, general (CHEM 1111 and 1131, or CHEM 1115 and 1171) .................. 10-12
- Chemistry, organic (CHEM 3311 and 3321, 3331 and 3341, or CHEM 3351 and 3361, 3371 and 3381) .... 8-10
- Physics, general, with laboratory .................. 9-10
- Mathematics (minimum college algebra and trigonometry) .................. 6
- Literature ................................................... 6
- English composition ...................................... 3

**Nursing**

The two-year program at the University of Colorado Health Sciences Center leads to the bachelor of science degree in nursing.

The general application deadline for June admission is October 1; 100 positions are open. The minimum GPA is 2.50. A minimum of 60 semester hours is required for admission (CU-Boulder hours may exceed minimum requirements shown).

Students should check periodically for possible changes in requirements.

**Physical Therapy**

The 22-month program at the University of Colorado Health Sciences Center leads to a master of science degree in physical therapy.

Students must apply by January 2 for entrance in June of the same year; 48 positions are open. Preference is given to Colorado and WICHE students. The minimum GPA is 3.00, and the Graduate Record Examination (GRE) is required. A baccalaureate degree is required (CU-Boulder hours may exceed minimum requirements shown).

**Veterinary Medicine**

The Colorado State University School of Veterinary Medicine offers this four-year program leading to the doctor of veterinary medicine (D.V.M.)

A minimum of 68 semester hours, including the following courses, is required for admission into the program. Most accepted applicants already have a bachelor's degree, although it is not necessary for admission.

Pre-veterinary majors are encouraged to follow the required courses of an EPOB or MCDB major, since the courses listed below are most consistent with those areas of study. Other majors will require additional course work.

PRE-LAW

Students who plan to apply for law school upon completion of their baccalaureate degree have no specific requirements to complete for this purpose. Instead, they should major in the discipline that best suits their intellectual concerns, one that can serve as the basis for an alternative career should they elect not to apply to law school or should they not be accepted. Pre-law students should seek a rigorous and broad-based education that will ensure them a fundamental understanding of American society and its institutions as well as an appreciation for other cultures. They need to become familiar with mathematical analysis and scientific reasoning and to develop excellent oral and written communication skills.

Advising and support services are available through the preprofessional advisor in the Advising Resource Center. In addition, the associate dean of the College of Arts and Sciences serves as chair of a panel of faculty advisors who have special interest and expertise in the theoretical and practical aspects of the law and judicial systems. These faculty advisors are available for consultation with all undergraduates on the Boulder campus. Contact the Advising Resource Center for more information.
The Presidents Leadership Class is a specially designed two-year curriculum that focuses on leadership development, personal development, and community service initiatives. Skills are developed in an interdisciplinary, experiential environment through exposure to government, education, the humanities, business, and science. Students from each of the schools and colleges participate in the Presidents Leadership Class curriculum in addition to their regular course work.

The Presidents Leadership Class is a program of the Student Leadership Institute and is overseen by a 30-member Board of Trustees representing the Colorado business, educational, and governmental community.

Admission and Enrollment

Admission to the Presidents Leadership Class is considered one of the highest honors awarded to incoming University of Colorado at Boulder students. Presidents Leadership Class scholars are admitted prior to the beginning of their first year. Selection criteria include academic excellence, a demonstrated commitment to community service, and leadership potential. A separate application process must be obtained from the Student Leadership Institute Office and returned prior to February 1. Applications may be obtained by writing the Institute's Executive Director, Campus Box 363, University of Colorado at Boulder, Boulder, CO 80309-0363 or by calling the institute office at (303) 492-8342.

Only students who are accepted into the Presidents Leadership Class are eligible to enroll in PRLC courses. Each year, approximately 60 first-year scholars are enrolled, comprising 50 Colorado residents and 10 out-of-state students. Only first-year scholars may continue into the sophomore year program. Students are awarded credit hours for participating in PRLC, which vary by school and college.

Upper-division scholars (juniors and seniors) are encouraged to continue their participation in the Presidents Leadership Class as class advisors and administrative staff members. Staff members continue to receive merit-based scholarships during their tenure in the Presidents Leadership Class.

Two-Year Academic Program

The Presidents Leadership Class is a rigorous academic and experiential two-year program that focuses on leadership development at personal, organizational, community, and global levels. The curriculum is centered on empowerment of others, open-mindedness, a bias toward action, service to the broader good, the ability to balance reason and intuition, the ability to recognize and work with interconnectedness, ethical considerations, and the ability to inspire a shared vision.

Fundamental skills are developed in the program, including effective research ability, speaking and writing, multicultural and gender communication, critical thinking, ethical thinking, interdisciplinary thinking, introspection and self-awareness, facilitation of group processes, and basic teaching ability.

First-year courses focus on leadership theory and its application, ethical considerations of leadership, and community issues in leadership. Experiential programs include outbound bound activities, a weekly speaker series, off-campus seminars, and a group community service project.

Sophomore-year courses focus on global issues in leadership (such as environmental issues, hunger, and human rights) and multilevel analysis of leadership issues (issues originating at the organizational level that carry community and global implications). Experiential programs include outbound bound activities, a monthly workshop series, individual contract learning, and a group community service project. An important capstone experience is the "walkabout," a semester-long 15-hour-per-week internship with an area institution.

Scholarship Programs and Opportunities

First-year and sophomore scholars receive a minimum merit-based scholarship of $2,000 ($500 each semester of participation). Scholars must enroll in PRLC course work to maintain their scholarship.

Scholars are also eligible to receive a variety of other merit-based scholarship programs, including the Roger L. Reith Scholarship Fund ($6,000 over four years) and the Alvin G. Flanagan Scholarship Fund (annual $1,000 minimum awards).

Junior and senior staff members also receive merit-based scholarship awards.

COURSE DESCRIPTIONS

PRLC 1810-3. Ethical Leadership. Students are introduced to fundamental principles of leadership and ethics. Emphasis on application of the principles for self-development and organizational effectiveness.

PRLC 1820-3. Community Issues in Leadership. Explores major community issues such as drug abuse, poverty, decline of infrastructure, care of the aged, etc. Gives particular attention to the development of effective leadership responses to community difficulties at university, city, state, and national levels.

PRLC 2810-3. Global Issues in Leadership. Examines the challenges of leadership posed by major global issues affecting everyone. Explores issues such as human rights, hunger, disease, large-scale collective violence, and environmental degradation with a special emphasis on effective, long-term leadership strategies.

PRLC 2820-3. Multilevel Issues in Leadership. Studies multilevel issues that originate in organizational settings but carry community and global implications. Students are encouraged to fully explore the complexity and interrelatedness of issues with a special emphasis on leadership and ethical implications.

FACULTY

RONALD G. BILLINGSLEY, Associate Director; Associate Professor of English. A.B., University of Redlands; M.A., Ph.D., University of Oregon.

ADAM J. GOODMAN, Executive Director. B.S., M.P.A., University of Colorado.
Enrollment in Reserve Officers Training Corps programs is open to both men and women, and ROTC courses are open to all students whether or not they are enrolled in ROTC programs.

All services provide undergraduate and selected graduate students with the opportunity to combine academic study with a military officer's educational program. The three services conduct courses in their respective areas leading to a regular or reserve commission (regular only for AFROTC) upon graduation. The Navy also offers a program leading to a regular or reserve commission in the Marine Corps.

AIR FORCE AEROSPACE STUDIES

U.S. Air Force ROTC offers several programs leading to a commission in the U.S. Air Force in conjunction with the receipt of a baccalaureate or graduate degree.

Standard Four-Year Program

This program is composed of three parts: the general military course for lower-division (normally freshman and sophomore) students, the professional officer course for upper-division (normally junior and senior) students, and the leadership laboratory attended by all students. Completion of the general military course is a prerequisite for entry into the professional officer course. Completion of a four-week summer training course is required prior to commissioning.

Modified Two-Year Program

This program is offered to full-time, regularly enrolled degree students. It requires at least two years of full-time college work at the undergraduate or graduate level. Students selected for this program must complete a six-week field training program during the summer months as a prerequisite for entry into the professional officer course the following fall semester.

Other Air Force ROTC Programs

Other programs are frequently available, based on current Air Force needs. Any AFROTC staff member at CU-Boulder can discuss alternative programs. As selection is on a competitive basis, interested students should contact the office, (303) 492-8351, as early as possible to learn about opportunities. There is no obligation until a prospective candidate enters into a formal contract.

Air Force College Scholarship Program

Students participating in Air Force ROTC may be eligible to compete for Air Force ROTC college scholarships. Students selected for this program are offered scholarships that pay up to full tuition, a book allowance, nonrefundable educational fees, and a subsistence of $100 per month, tax free. All cadets enrolled in the professional officer course receive $100 per month subsistence during the regular academic year. Scholarships that are available include two, two-and-one-half, three, and three-and-one-half year scholarships. These scholarships are available to both men and women in all academic disciplines.

Flight Opportunities

During the third year of the AFROTC program, qualified AFROTC students can compete for pilot allocations. In the summer following their junior year, qualified pilot candidates generally attend light aircraft training near San Antonio, Texas.

USAF Medical Programs

Qualified students can compete for premed or nursing scholarships and programs. These scholarships and programs can lead to a rewarding career as an Air Force Officer, serving as a doctor or nurse.

Military Science (U.S. Army)

The Department of Military Science offers programs leading to an officer's commission in the active Army, U. S. Army Reserve, or National Guard in conjunction with receipt of an undergraduate or graduate degree. Military science courses are designed to supplement a regular degree program by offering practical leadership and management experience.

Four-Year Program

The four-year program consists of two phases: the basic course (freshman and sophomore years) and the advanced course (junior and senior years). The basic course offers a 2- or 3-credit course each semester, covering Army history and organization as well as military leadership and management. Laboratory sessions provide the opportunity to apply leadership skills while learning basic military skills. Enrollment in the basic course incurs no military obligation.

The advanced course covers leadership, tactics and unit operations, training techniques, military law, and professional ethics, and includes a leadership practicum each semester. A summer advanced camp at Fort Lewis, Washington, provides challenging leadership training, and is a prerequisite for commissioning.

Two-Year Program

The two-year program consists of the advanced course, preceded by a six-week summer ROTC basic camp. Veterans or students who have participated in Junior ROTC, Civil Air Patrol, or similar organizations may be eligible to enroll in the advanced course without attendance at the basic camp or completion of the basic course. Inquiries on advanced placement should be directed to the professor of military science.

Scholarship Programs

Four-year college scholarships are available to high school seniors, who should apply before December of their senior year. Competition for three-year scholarships is open to all University of Colorado students, whether or not they are currently enrolled in ROTC. Scholarship students receive tuition ($8,000 or 80%, whichever is higher), laboratory fees, a book allowance, and an allowance of $100 per month for each academic year. Scholarship cadets may be required to serve up to four years on active duty after commissioning. Students interested in the scholarship program should contact a professor of military science no later than the beginning of the spring semester to apply for the following academic year.
Simultaneous Membership Program
Students entering the advanced phase of instruction will be given the opportunity to participate with a Reserve or National Guard unit as an officer trainee. Students participating in this program can earn over $100 per month in addition to the monthly allowances from the Reserve or National Guard.

Professional Education
The Army ROTC course curriculum cuts across traditional subject boundaries. It involves elements of various disciplines and encourages students to integrate their academic training with the problem-solving and decision-making challenges they will encounter as junior officers in the Army. Additionally, the formal curriculum is supplemented by field trips, guest speakers, and specialized military training. The goal is to involve superior academic students in activities emphasizing the responsibilities and challenges of junior officers in an Army undergoing the greatest leadership and technological changes in its history.

Leadership Laboratories. These ninety-minute periods are an integral part of all military science courses. The laboratory periods concentrate on tasks which provide cadets with practical training needed in the Army. Diagnostic evaluations are administered during laboratory periods.

Professional Military Education. This program provides cadets with an academic foundation to support continued intellectual growth. It is required of all officers. Requirements include receipt of the bachelor's degree and completion of one course in written communications, human behavior, military history, computer literacy, and mathematics. Courses in management and national security studies are strongly recommended but not required. A list of courses that meet these requirements is available from the instructor.

Foreign Language. All scholarship cadets are required to take one semester of a modern foreign language. Advanced placement that indicates proficiency at the first semester level can be substituted.

Preprofessional Programs. Students pursuing medical or nursing degrees may enroll in military science and may be eligible for specially funded programs in these disciplines.

NAVAL SCIENCE
Naval science course work is offered in the fall and spring semesters only.

All naval science students enroll in NAVR 1010, 3030, 3040, and 2020.

Those desiring commissions in the U.S. Navy enrollment in NAVR 3020, 4010, 4020, and 4030 for upper-division work.

Those desiring commissions in the U.S. Marine Corps enroll in NAVR 3101 and 4101 for upper-division work.

Scholarship Programs
NROTC offers two-, three-, and four-year scholarship programs, and two-year and four-year college (non-scholarship) programs. Navy scholarships may be earned while students are enrolled in the college program. Scholarship students receive tuition and fees, books, and a $700 per month subsistence allowance. College program students receive a $100 per month subsistence allowance during their last two years in the program.

Naval science scholarship students must complete course work in calculus, physics, one year of English, one semester of American military affairs or national security policy, and one semester of computer science. Students should check with their naval science instructor to determine specific course offerings which fulfill the above requirements.

Degree Credits
The number of NROTC semester hours of credit that may count toward degree requirements is determined by the individual colleges. Students should therefore consider their college's policy when formulating their degree plan.

Commissioned Service
Opportunities for commissioned service are presently available in the unrestricted line (surface, subsurface, and aviation) and staff corps (nursing, intelligence, cryptology, public affairs, supply and civil engineering) in the U.S. Navy. Opportunities in ground and aviation specialties are available in the U.S. Marine Corps. Men and women students interested in other programs leading to commissions in either the U.S. Navy or U.S. Marine Corps are encouraged to contact the NROTC unit on campus. All commissioning programs require that the student be working toward, and receive, a college degree.

COURSE DESCRIPTIONS
The following courses are offered in the ROTC programs on the Boulder campus. This listing does not constitute a guarantee or contract that any particular course will be offered during a given year.

For current information on times, days, and instructors of courses, students should consult the Schedule of Courses issued at the beginning of each semester.

Courses are organized numerically by ROTC unit. The number after the course number indicates the semester hours of credit that can be earned in the course.

Abbreviations used in the course descriptions are as follows:
Prereq.—Prerequisite
Coreq.—Corequisite
Lab—Laboratory
Rec.—Recitation
Lect.—Lecture

Air Force Aerospace Studies
AIRR 1010-1. Development of Air Power 1. One 1-hour lect.-rec. and one 1 1/2-hour lab per week. Introduction to the development of air power, management, and use of aerospace power today. Laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities, and life and work of an Air Force junior officer.

AIRR 1020-1. Development of Air Power 2. Continuation of AIRR 1010. One 1-hour lect.-rec. and one 1 1/2-hour lab per week.

AIRR 1020-1. The Air Force Today 1. One 1-hour lect.-rec. and one 1 1/2-hour lab per week. A survey course describing aerospace support functions of U.S. military forces. Laboratory introduces students to leadership experiences in a practical, supervised training environment.

AIRR 2020-1. The Air Force Today 2. Continuation of AIRR 2010. One 1-hour lect.-rec. and one 1 1/2-hour lab per week.

AIRR 3010-3. Air Force Management and Leadership 1. Two 1 1/2-hour seminars plus one 1 1/2-hour lab per week. Individual motivation, leadership, communication, and group dynamics are studied and applied in actual case studies. Communicative skills development is stressed. Laboratory provides opportunity for application and testing of management/leadership training.

AIRR 3020-3. Air Force Management and Leadership 2. Continuation of AIRR 3010. Two 1 1/2-hour seminars and one 1 1/2-hour lab per week. Emphasizes basic managerial processes, communicative and counseling skills development.

AIRR 4010-3. National Security Forces in Contemporary American Society 1. Two 1 1/2-hour seminars and one 1 1/2-hour lab per week. Focuses on the armed forces as an integral part of society. Special themes include societal attitudes, professionalism, U.S. defense strategy, and military foreign policy decision making, emphasizing communicative skills.
AIRC 4020-3. National Security Forces in Contemporary American Society. 2. Continuation of AIRC 4010. Two 1 1/2-hour seminars and one 1 1/2-hour lab per week. Special themes include defense strategy and conflict management, formulation and implementation of U.S. defense policy and organizational factors and case studies in policy making, international laws of warfare, and the Uniform Code of Military Justice.

Military Science (U.S. Army)

MILR 1011-2. History and Evolution of the United States Army. 1. Survey and analysis of the origin and development of the Army as an American institution from its origins through the conclusion of World War I. Term paper and oral presentation required. $35.00 lab fee.

MILR 1021-2. History and Evolution of the United States Army. 2. Continues the survey and analysis of the United States Army’s history from the conclusion of World War I through the present. Term paper and oral presentation required. $35.00 lab fee.

MILR 2031-3. Methods of Leadership and Management. 1. Comprehensive review of contemporary leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self-development. $35.00 lab fee.

MILR 2041-3. Methods of Leadership and Management. 2. Continuation of MILR 2031 stressing practical application of leadership concepts. Students are required to be mid-level leaders for their cadre organization. $35.00 lab fee.

MILR 3052-3. Military Operations and Training 1. Examines the structure and organization of the Army and the roles of officers and noncommissioned officers. Various leadership styles and techniques are reviewed along with methods of small unit leadership. Basic military skills are introduced and practiced in small unit operations. $35.00 lab fee.

MILR 3062-3. Military Operations and Training 2. Explores the student to basic tactical functions of small unit leadership in a variety of operational environments. Covers operations and tactics, operations orders, and small unit weapons systems. $35.00 lab fee.

MILR 4072-3. Officer Leadership and Development 1. Examines management and leadership functions within organizations of the Department of Defense. Focuses on variables such as information flow, leadership, morale, decision-making processes, correspondence formats, and presentations. $35.00 lab fee.

MILR 4082-3. Officer Leadership and Development 2. Examines the characteristics of a profession; the historical evolution of a profession; and ethical reasoning and decision-making. Also examines personal and professional values and value conflicts. Students are introduced to the military justice system. $35.00 lab fee.

Naval Science

NAVR 1010-2. Introduction to Naval Science. Introduction to the structure, missions and functions of the United States Navy and Marine Corps. Additional introductions to military law, naval history, and concepts of sea power.

NAVR 2020-3. Seapower and Maritime Affairs. Study of the importance of sea power in history including naval, maritime, and other commercial uses of the sea. Includes in-depth study of Soviet foreign affairs. Additionally, Soviet naval history, hardware, and strategy are examined.

NAVR 3020-3. Naval Operations and Maneuvering. Thorough examination of the Inland and International Rules of the Nautical Road, including court interpretations, principles of relative motion and vector analysis with the maneuvering board, ship handling procedures, weather, communications, and tactical operations.

NAVR 3040-3. Weapons and Systems Analysis. Introduction to theoretical concepts upon which modern naval weapons systems are designed and constructed. Specific areas of study include physics of sound propagation, pulse radar theory, automatic tracking principles, and fundamentals of missile guidance.

NAVR 3101-3. Evolution of Warfare. Traces the development of warfare, focusing on the impact of military theorists and technical developments. Student acquires a sense of strategy, develops an understanding of military alternatives, and sees the impact of historical precedent on military actions.

NAVR 4101-3. Amphibious Warfare. Surveys the development of amphibious doctrine. Emphasizes the evolution of amphibious warfare in the twentieth century. Explores present-day potential and limitations on amphibious operations, including the rapid deployment force concept.

NAVR 4010-3. Leadership and Management 1. Comprehensive study of organizational behavior and management in the context of the naval organization. Topics include planning, organizing, and controlling; individual and group behavior; motivation and leadership; decision making, communication, responsibility, authority, and accountability.

NAVR 4020-3. Leadership and Management 2. Study of junior naval officer responsibilities in naval administration. Includes counseling methods, military justice, human resources management, directives, and correspondence, personnel administration, material management, and maintenance and supply systems.

FACULTY

Aerospace Studies

BRENT W. BALAZS, Colonel, USA; Professor of Aerospace Studies. B.S., United States Air Force Academy; M.S., North Carolina State University; M.A., U.S. Naval War College, R.I.

RUSSELL A. ARMSTRONG, Major, USA; Assistant Professor of Aerospace Studies. B.A., University of Akron; M.A., Wright State University.

BARRY F. THOMA, Captain, USA; Assistant Professor of Aerospace Studies. B.S., United States Air Force Academy; M.S., Air Force Institute of Technology.

DARRELL L. ARTIS, Captain, USA; Assistant Professor of Aerospace Studies. B.A., University of Maine; M.A., University of Nevada (Las Vegas).

RICK L. SHIMON, Captain, USA; Assistant Professor of Aerospace Studies. B.A., University of Colorado at Boulder; M.P.A., University of Wyoming.

Military Science (U.S. Army)

JOHN F. TROY, JR., Professor of Military Science. B.S., Loyola University; M.S.A., Alabama University.

KEVIN BOSTICK, Assistant Professor of Military Science. B.A., Fresno State University; M.Ed., Drury University.

JOHN P. CUMMINGS, Assistant Professor of Military Science. B.S., East Stroudsburg University; M.B.A., Oklahoma City University.

BRENDAN L. WILSON, Assistant Professor of Military Science. B.S., James Madison University; M.B.A., Oklahoma City University.

Naval Science

GEORGE M. MILLER III, Captain, USN; Professor of Naval Science. B.S., U.S. Naval Academy; M.S., Naval Postgraduate School. Nuclear Propulsion Plant Engineer Qualified.

CRAIG R. GRUNZKE, Commander, USN; Associate Professor of Naval Science. B.S., Bemidji State College; M.A., Naval War College; M.A., Salve Regina College.

JAMES T. McMANUS, Lieutenant, USN; Instructor. B.A., Fordham University.

JAMES I. MOREFELD, Lieutenant Commander, USN; Assistant Professor of Naval Science. B.S., University of Kansas M.S.; University of West Florida.

MARK S. MURPHY, Captain, USMC; Assistant Professor of Naval Science. B.A., Northern Michigan University; M.A., University of Michigan.

JOHN C. WOUGHTER, Lieutenant, USN; Assistant Professor of Naval Science. B.S., U.S. Naval Academy. Nuclear Propulsion Plant Engineer Qualified.
