

UPCOMING SOLAR ECLIPSE

The last total solar eclipse to be seen in the continental US was back in 1979. It will once again grace the continental US this month on August 21st. The narrow band of total solar eclipse runs from Oregon to Georgia, however, a partial solar eclipse will be able to be seen by the entire continental US. While many are planning to travel to the path of totality, a partial eclipse will be visible in Boulder, CO. If you are not planning to travel, but rather you wish to stay in Boulder, you will still have an amazing sight to see.

In order to check out this event, there are various ways to see the eclipse. Eclipse glasses are available for sale at Fiske Planetarium, McGuckin Hardware, and the CU Bookstore - get them early! If you do not have eclipse glasses, you can make a pinhole camera. You can also watch NASA live video from the total eclipse [here](#).

Make sure you don't miss this incredible opportunity to see a solar eclipse!

UPCOMING EVENTS

Aug. 21st - Solar Eclipse

Aug. 23rd - New Student CAES
Orientation

Aug. 24th - Engineering Student Society
Fair

Aug. 28th - First day of classes

Aug 30th - Be Involved Fair

[For more information about the Solar Eclipse, visit the Fiske Planetarium](#)

Solar eclipse is August 21st!

NEW SPACE MINOR EVENTS CALENDAR!

The Space Minor is gearing up with all kinds of events this fall semester. And in an attempt to make it easier for everyone to see what's in store, many students requested to see a calendar of events. Therefore, a google calendar of space related events, including all the Space Minor events, has been created. You can find the [calendar here](#) as well as under the 'News & Events' tab on the Space Minor website. Along with the calendar are instructions on how to add this calendar to your own personal google or outlook calendar. Events are added all the time, so be sure to link up, or check back often to this calendar!

GET INVOLVED IN THE SPACE MINOR

Volunteering is a great way to meet new people, network and show others that you are willing to go the extra mile! If you are looking for great ways to get involved with the Space Minor, we have lots of opportunities. Along with posting some of the volunteer opportunities in each newsletter, you can also check out some other opportunities under the '[Get Involved](#)' tab on the website.

We have already collected some great Space Minor stories, and would like to feature some of these stories on the website in the future. If you have an awesome story about how the Space Minor has had an impact on you, please let us know so we can share it with other perspective students!

VOLUNTEER OPPORTUNITIES

We will be hosting a table at the UMC at the beginning of the fall semester, and are looking for volunteers to sit at the table and answer questions by perspective students.

Volunteers for each of the upcoming events are needed. Please email spaceminor@colorado.edu if you're interested.

JOB TIP

Make sure to end your summer on a positive note. Employers and coworkers you interact with during summer jobs and internships can help you along your career; leave them with good memories of your work.
