The Ballroom renovation demo is well under way!

The stage is gone as are the partitions between the three ballroom spaces. A new, lower stage is forthcoming, and the new partitions will provide sound barriers between the three spaces.

Look up! We are replacing the old lighting system with a modern system that can be controlled from the ground (Program Council is excited!). A center drop down screen and ceiling mounted projector will be added as well.

Demo in the catering kitchen allows us to make way for new equipment, a new layout, and exciting new foods. We are counting the days until we can showcase them to you!
