

University of Colorado at Boulder Visiting Scholar/Scientist Export Compliance Agreement

The University of Colorado at Boulder (“CU-Boulder” or “University”) is committed to full compliance with all applicable U.S. laws and regulations, including those related to export control. Research and scholarly activities that are subject to U.S. export controls include the physical shipment or transmission of export-controlled items, software, materials or technical data out of the U.S.; certain activities involving defense articles¹ or the provision of defense services²; release of controlled technical data, software or source code to a foreign national or foreign government in the U.S. or abroad; involvement with restricted parties; and any activity involving a sanctioned country. Any activity, including informal discussion, directly related to the development, modification, manufacture, repair, testing, assessment or deployment of military or defense equipment, systems, items, processes, software or code is a defense service and may not be conducted at CU-Boulder without explicit authorization of the CU-Boulder Office of Export Controls.

The University expects and requires all visiting scholars/scientists to abide by U.S. laws and regulations, including those related to export control. In order to prevent inadvertent violation of U.S. export controls, visiting scholars/scientists are not permitted to participate in export controlled, proprietary or confidential research programs without explicit authorization from the CU-Boulder Office of Export Controls. Further, no CU-Boulder employees or students may engage in any activity supporting, formally or informally, such defense services without explicit prior authorization from the CU-Boulder Office of Export Controls.

The University is committed to the free and open exchange of ideas outside of the scope of U.S. export control regulations. Export controls do not apply to the conduct and reporting of basic and applied research, the results of which are typically published and shared broadly within the research community (often referred to as the fundamental research exclusion or exemption, or FRE). However, research results associated with research that does not qualify for the FRE must be protected as export controlled until they are authorized for unlimited public release or dissemination.

Footnotes:

(1) *Defense article* means any item or technical data designated in 22 CFR 121.1 (the U.S. Munitions List or “USML”); this includes most space-qualified hardware. The policy described in 22 CFR 120.3 is applicable to the designation of additional items. This term includes technical data recorded or stored in any physical form, models, mockups or other items that reveal technical data directly relating to items designated on the USML. It does not include basic marketing information on function or purpose or general system descriptions.

(2) *Defense service* means (a) the furnishing of assistance (including training) to foreign persons, whether in the U.S. or abroad in the design, development, engineering, manufacturer, production, assembly, testing, repair, maintenance, modification, operation, demilitarization, destruction, processing or use of defense articles; (b) the furnishing to foreign persons of any technical data controlled under 22 CFR 120.10 whether in the U.S. or abroad; or (c) military training of foreign units and forces, regular or irregular, including formal or informal instruction of foreign persons in the U.S. or abroad or by correspondence courses, technical, educational, or information publications and media of all kinds, training aid, orientation, training exercises, and military advice.

Visiting Scholar/Scientist Statement

I have read and understand the information provided on page one of this agreement. I understand that should I have questions related to the U.S. export control regulations at any point during my time at CU-Boulder, they should be directed to the CU-Boulder Office of Export Controls (Linda Morris, 303-492-2889; Linda.Morris@colorado.edu)

By my signature below, I agree that I will not engage in export controlled, proprietary, or confidential work during my tenure at CU-Boulder without explicit authorization from the CU-Boulder Office of Export Controls.
