Medical schools, like individuals, are very different—in their philosophies, faculties, curricula, and the type of students they attract. Consequently, selecting the "best" medical school for you can be very challenging. The following set of questions was compiled by medical students from across the country to assist you in evaluating the schools you will visit. This list is by no means complete; it was designed to serve as a base for your own questions. Keep in mind that the interview represents a wonderful time for you to learn, so don’t be shy about asking anyone your questions. Congratulations on your career choice and good luck with interviews!
