Contact person: John McKenzie

Email: john.mckenzie@innovastat.com Phone: (303) 516-1200

Number of interns requested for spring: 2 Summer: 2 Fall: 2

Nature of project(s) and skills required:

InnovaSTAT, is a Boulder non-profit that provides consulting and training in applied decision and risk analysis - locally, nationally, and internationally. Interested in the international agricultural community, InnovaSTAT offers seminars and consultation to farmers in the developing world.

InnovaSTAT believes that without the benefits of today’s corporate technologies, small-scale organizations are at a disadvantage when making important decisions. The projects of InnovaSTAT aim at assessing and quantifying risk, so farms and businesses can make informed decisions incorporating uncertainty. The goal of the projects is to improve the decision-making capabilities of these businesses by assisting them and developing individual, whole business plans that incorporate local economics, as well as cultural and market risk factors. Participation from these farms and small businesses is vital as their knowledge of their production and environmental constraints provides the data for analysis. The small farms and businesses will be trained on how to use these models.

As an intern, you will help InnovaSTAT find contacts, conduct research, and work on projects and data analysis. Experience with Microsoft Excel is preferred.

InnovaSTAT does need assistance to all aspects of the non-profit world including fundraising, marketing, and promotion.

Please do contact us and we will be happy to discuss what we are doing in more detail.
