POSTDOCTORAL OPPORTUNITY in the USA

Postdoctoral fellowships are available for research in materials and nanotechnology for renewable energy at:

National Renewable Energy Laboratory (NREL)
Stanford University
Massachusetts Institute of Technology
University of Colorado Boulder
Colorado School of Mines
Colorado State University

DEADLINE: OCTOBER 30, 2015

CINEMA
Consortium for Innovation on Nanotechnology, Energy, and Materials

CINEMA aims to foster collaboration between Brazil and the United States in renewable energy and nanotechnology. Over 50 professors and researchers are looking to mentor and host Brazilian postdocs at US institutions. A competitive stipend starting at US$ 44,310 will be offered to selected candidates for 1-2 years through Brazil’s Science without Borders program and the National Council for the State Funding Agencies. The CINEMA program is administered by the Renewable and Sustainable Energy Institute (RASEI), a joint institute between NREL and the University of Colorado Boulder. Check out the website for details including research areas and how to apply.
