ASEN 2004
Introduction to Aerospace Vehicle Design and Performance
Spring 2019

Lecture: DUANE G1B30  T/Th 8:00 am-9:15 am (Section 010)
Lab: ITLL 2B10         M/W 8:00-9:40 am (Section 011)
                        M/W 10:00-11:40 am (Section 012)
                        M/W 1:00-2:40 pm (Section 013)

Instructors
Prof. John Mah (aircraft)       Prof. Torin Clark (spacecraft)
Office: ECST 207                Office: ECAE 100
Phone: 303-492-7651             Phone: 303-915-2152
Email: John.Mah@colorado.edu    Email: torin.clark@colorado.edu
Office Hours: TBD

Lab Instructor
Prof. Trudy Schwartz
Office: ECAE 1B42
Phone: 303-735-2986
Email: Trudy.Schwartz@colorado.edu

Teaching Assistants
Dong-kyeong Lee
Office: Undergrad lounge, ECAE 124
Email: Dongkyeong.Lee@Colorado.edu
Office Hours: TBD

Andrew Lyons
Office: Undergrad lounge, ECAE 124
Email: Andrew.Lyons@Colorado.edu
Office Hours: TBD

Justine Fay
Email: Justine.Fay@Colorado.edu

Elijah Landers
Email: Elijah.Landers@Colorado.edu

Jonathan Weidner-Sheridan
Email: Jonathan.Weidnersheridan@Colorado.edu

Melinda Zavala
Email: Melinda.Zavala@Colorado.edu

Lab Assistants
Rowan Gonder
Email: Rowan.Gonder@Colorado.EDU

Venus Gonder
Email: Venus.Gonder@Colorado.EDU

Chris Brown
Email: Christopher.J.Brown@Colorado.EDU

Class Web Portal
Canvas Site:

Texts: Anderson, Introduction to Flight, 8th Ed. 2016 (hardcopy or electronic version)
Sellers, Understanding Space: An Introduction to Astronautics, 3rd Ed. 2005

Required Equipment: safety glasses/goggles and clickers, Students can register their clickers to their 9 digit
student ID here: http://www.colorado.edu/oit/tutorial/cuclackers-iclicker-remote-registration. Laboratory notebooks
are expected for tracking assignments and documenting lab progress, and may be spot checked periodically (note
that lab notebooks will be required for Sr. Projects, as well as good professional practice, so use this opportunity
to establish a good habit).
**Course Objectives:** To introduce the theory and methods for design and performance analysis of aircraft and spacecraft. Aircraft topics include wing design, propulsion, aircraft performance, and stability and control. Spacecraft topics include mission design, rocket performance, orbital mechanics and spacecraft subsystems. Emphasis is placed on introducing systems engineering aspects of design and analysis for aerospace vehicles.

**Topical Outline**

**Aircraft**
1. Elements of airplane design
2. Performance of airfoils and wings
3. Elements of airplane performance
4. Preliminary airplane stability and control
5. Preliminary airplane propulsion

**Spacecraft**
1. Elements of space mission design
2. Launch requirements and rocket performance
3. Introduction to astrodynamics
4. Overview of spacecraft subsystems
5. Introduction to spacecraft systems engineering

**Grading**

**Evaluated Outcomes**
The Department of Aerospace Engineering Sciences has adopted a policy of assigning grades according to “evaluated outcomes” in each course:

- **O1** Professional context and expectations (ethics, economics, business environment, etc.)
- **O2** Current and historical perspective
- **O3** Multidisciplinary, systems perspective
- **O4** Written, oral, graphical communication ability
- **O5** Knowledge of key scientific/engineering concepts
- **O6** Ability to define and conduct experiments, use instrumentation
- **O7** Ability to learn independently, find information
- **O8** Ability to work in teams
- **O9** Ability to design
- **O10** Ability to formulate and solve problems
- **O11** Ability to use and program computers

Evaluation of these outcomes allows an assessment of your performance and provides a major portion of the process we use for continuous assessment and improvement of the entire AES undergraduate curriculum. The model for these outcomes derives from several sources including the "Desired Attributes of an Engineer" as defined by The Boeing Company, and "curriculum reviews" from major aerospace corporations including The Boeing Co., Lockheed Martin Corp. and Ball Aerospace Corp. These inputs were combined with the AES faculty vision of the desired attributes of an aerospace engineer and the requirements of the Accreditation Board for Engineering and Technology (ABET) to produce this list of evaluated outcomes. Each assignment designed and graded to assess some combination of these outcomes.

**Grade Breakdown:** The two principal lecture and lab sections of the course, **Aero** and **Space**, are equally weighted. Your final grade is determined according to the following percentage breakdown:

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Individual</td>
<td>Quizzes</td>
<td>10%</td>
</tr>
<tr>
<td></td>
<td>Exams (2 aero &amp; 2 space)</td>
<td>40% (10% for each exam)</td>
</tr>
</tbody>
</table>

2
<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Group</td>
<td></td>
<td>10%</td>
</tr>
<tr>
<td>Lab Reports**</td>
<td></td>
<td>20%</td>
</tr>
<tr>
<td>Lab Presentations**</td>
<td></td>
<td>20%</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td></td>
<td><strong>100%</strong></td>
</tr>
</tbody>
</table>

* Although homework must be submitted individually, it can be discussed, therefore, counts as a ‘group’ grade. ** Lab reports and/or presentation scores may be adjusted by instructors for individuals based on team peer evaluations.

Grading Philosophy: Assignments and evaluations are graded to an absolute standard designed to assess your level of competency in the course material. Minor adjustments may be made in the determination of final letter grades, but there is a limited amount of “curving” in this course. The final grade indicates your readiness to continue to the next level in the curriculum, which requires a C or better to meet AES pre-req standards. The faculty have set these standards and expectations based on our education, experience, interactions with industry, government laboratories, others in academe, and according to criteria established by the ABET accreditation board.

IMPORTANT: The course grade is primarily dependent on individual measures of competency, i.e. exams and quizzes. The other course assignments are designed to enrich the learning experience and to enhance individual performance, not to substitute for sub-standard individual competency. Accordingly, group assignment grades (labs and homework) are only incorporated into the final grade when the individual grade (made up of quizzes and exams) is a C or better. In other words, if your individual score average is below a C, then the group-based grade fraction will not be averaged in to your final grade, which will now be based solely on your individual score. This policy makes it important to use the group assignments as opportunities to enhance your own learning and not simply rely on your team members to ‘divide and conquer’. If the work in the assignment is split up among group members, be sure that the learning is not also split up, but is shared among the whole group (i.e., everyone is accountable for and knowledgeable of all parts of their team’s collective product).

Important Notes and Class Policies:

1. Homework assignments are due per due date & time stated on Canvas course site date and quizzes may be given at any point during any class, so be sure to attend regularly and arrive on time! If you must miss class for an excused absence, you may submit your homework early. Late homework submittals are not accepted.

2. In the case of homework, laboratory report, presentation, or exam conflicts, you must make arrangements with the professor at least two weeks in advance. There are no unexcused make-up assignments or exams without official documentation for the absence (e.g., doctor's note, jury duty, etc.)

3. A homework assignment may have several problems and although only a few randomly selected questions will be graded for each set, your grade will reflect completion of all assigned parts. Solutions, however, will be provided to you for all the problems.

4. Group collaboration is permitted on homework, but efforts are individual. This means you may discuss the means and methods for solving problems and even compare answers, but you are not free to copy someone's work or the solutions manual. The homework you submit must be your own. Keep in mind that solving problems yourself reinforces learning the material.

5. Collaboration on quizzes or exams, using another student's work as your own, or allowing another student to use your work as their own, is considered academic misconduct and will not be tolerated. If you are caught in any of these activities, you may receive a grade of “F” for the course and a report will be made to the Office of Student Conduct & Conflict Resolution.

6. All assignments will be submitted electronically (unless otherwise stated) via the Canvas course site. All homework must be handwritten and either scanned or utilize a digital writing software...
(OneNote, Apple Notes, etc). Work must be neat and readable with adequate spacing and margins. You are responsible for legibility - no reevaluation will be granted for illegible submissions. You are responsible for ensuring your digital upload contains all your work and properly uploads to the Canvas site. Always check your uploaded assignment turn-ins! Noncompliant or unacceptably illegible submittals will be returned ungraded with a score of zero.

7. Your name (last, first), assignment number, and due date should be visible in the upper portion of each page. Final answers must be indicated with an arrow or box, or underlined. Multiple answers (when only one is required) will be counted as incorrect.

8. Experimental lab reports should be completed using digital word processing program (Word, LaTex, PDF, etc). All group member names with relevant assignment information must appear on the cover page. Bottom line - submit all work with a professional appearance. Neatness, clarity, and completeness really do count in the work world!

9. Detailed guidelines for laboratory reports and presentations will be distributed and reviewed separately. Labs are written up and presented in groups, and initially graded as a group effort. Final individual grades for each lab assignment, however, will reflect an anonymous peer evaluation of the group members and professor assessment. The peer assessment is a multiplying factor that can significantly alter your individual grade relative to the group grade. This is done to promote fairness in assigning group grades where individual contributions to the group’s work may be unequal, but also to promote equal contribution from all group members.

10. Assignment and Exam Regrade Policy: If you would like to submit a regrade request for any assignments or exams you must email the regrade request to all instructors (Prof Mah, Prof Clark, and Prof Schwartz) within 2 weeks of the graded assignment return date.
   - The regrade request must include a pdf of your graded final exam, along with a paragraph in the email stating the problem number, grading issue, and what you believe the correct grade should be.
   - Points can be added OR removed based on correctness. Therefore, if a mistake was made in grading and too few points were awarded, the regrade request may increase the final score, however if the professor finds a mistake was made in grading and too many points were awarded, then the regrade request may lower the final score.

11. Always have a clicker and a calculator in the lectures.

12. Use of MATLAB is required unless otherwise stated for labs.

13. Attendance at all scheduled lecture/discussion and laboratory periods is expected unless an excused absence is approved in advance. Some of the material covered in class is not in the textbook. Like the exams, there are no unexcused make-ups for missed quizzes, however, the lowest quiz will be dropped before the final class grade is calculated.

14. If you forget to bring your clicker to class (or your battery dies), you will be allowed to submit your answers on paper for one quiz only. A score of zero will be assigned for subsequent quizzes for a forgotten or inoperable clicker.

15. Expect new material to be presented in both the lecture/discussion and laboratory periods. Quizzes and exams can cover all material in the course including lectures, homework and laboratory work.

16. Rationale for course assignments and evaluations:
   - Assigned reading assignments and any pre-quizzes are to be completed before the start of the lecture period. The lecture discussions are used to help clarify and supplement what you have read and been quizzed on and to prepare you for the homework assignments and exams.
• Homework reinforces the mental processes that help you to become proficient in a subject. In addition to the assigned homework, we encourage you to work additional problems for practice and make summary notes for yourself. Before beginning any homework assignment, you should read the relevant text sections and work through the examples in the text.
• Experimental laboratory exercises are more complex than the homework and require special equipment (such as the wind tunnel and rocket static test stand infrastructure). You will work in teams to collect and analyze the data, as well as write up the experimental laboratory report.
• Exams and quizzes provide a gauge to determine what you have learned individually.
• Design projects help you to learn how to synthesize the basic concepts, methods, and tools presented in the course curriculum by combining theory and practice. The team-oriented lab approach will give you experience in the benefits and challenges of working and cooperating in groups as, is typical in this industry.

17. **Safety is priority #1 in the experimental laboratory.** The ITLL has a mandatory orientation. If you did not go through the orientation during the fall semester ASEN 2001/2 courses, you must do so ASAP. Anyone violating rules of safe conduct may receive a zero for the laboratory exercise and may be restricted from ITLL. Use of ITLL facilities is a privilege, not a right, and you must conduct yourself according to the ITLL rules and regulations. Those endangering themselves, others, or laboratory equipment by their unsafe conduct will not maintain their access privileges. Failure to wear appropriate safety gear will result in a 10% grade penalty for the lab.

18. For the Aero Glider Design Lab, students are expected to contribute **no more than $5 each** towards the construction of their glider. Value may be less depending on availability of lab-provided materials and individual design requirements.

19. Food and drink are not allowed in the ITLL laboratory plazas. This includes bottled water. There are water fountains in the hall.

20. Use of electronics in the classroom aside from taking notes is strongly discouraged. If you desire to view any animated images, please sit in the back of the room so as to not distract those students who are in the line of sight behind you.

21. The classroom in Duane Physics has an upper and lower section. Sitting in the balcony is not allowed.

22. Professional behavior and considerate communication practices are expected at all times. Any questions, comments or concerns you may have should be respectfully voiced to your peers or the professor either in person or via email.

**ACCOMMODATION FOR DISABILITIES**
If you qualify for accommodations because of a disability, please submit your accommodation letter from Disability Services to your faculty member in a timely manner so that your needs can be addressed. Disability Services determines accommodations based on documented disabilities in the academic environment. Information on requesting accommodations is located on the Disability Services website. Contact Disability Services at 303-492-8671 or dsinfo@colorado.edu for further assistance. If you have a temporary medical condition or injury, see Temporary Medical Conditions under the Students tab on the Disability Services website.

**CLASSROOM BEHAVIOR**
Students and faculty each have responsibility for maintaining an appropriate learning environment. Those who fail to adhere to such behavioral standards may be subject to discipline. Professional courtesy and sensitivity are especially important with respect to individuals and topics dealing with race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy. Class rosters are provided to the instructor with the student's legal name. I will gladly honor your request to address you by an alternate name or gender pronoun. Please advise me of this preference early in the semester so that I may make
appropriate changes to my records. For more information, see the policies on classroom behavior and the Student Code of Conduct.

HONOR CODE
All students enrolled in a University of Colorado Boulder course are responsible for knowing and adhering to the Honor Code. Violations of the policy may include: plagiarism, cheating, fabrication, lying, bribery, threat, unauthorized access to academic materials, clicker fraud, submitting the same or similar work in more than one course without permission from all course instructors involved, and aiding academic dishonesty. All incidents of academic misconduct will be reported to the Honor Code (honor@colorado.edu; 303-492-5550). Students who are found responsible for violating the academic integrity policy will be subject to nonacademic sanctions from the Honor Code as well as academic sanctions from the faculty member. Additional information regarding the Honor Code academic integrity policy can be found at the Honor Code Office website.

SEXUAL MISCONDUCT, DISCRIMINATION, HARASSMENT AND/OR RELATED RETALIATION
The University of Colorado Boulder (CU Boulder) is committed to fostering a positive and welcoming learning, working, and living environment. CU Boulder will not tolerate acts of sexual misconduct (including sexual assault, exploitation, harassment, dating or domestic violence, and stalking), discrimination, and harassment by members of our community. Individuals who believe they have been subject to misconduct or retaliatory actions for reporting a concern should contact the Office of Institutional Equity and Compliance (OIEC) at 303-492-2127 or cureport@colorado.edu. Information about the OIEC, university policies, anonymous reporting, and the campus resources can be found on the OIEC website.

Please know that faculty and instructors have a responsibility to inform OIEC when made aware of incidents of sexual misconduct, discrimination, harassment and/or related retaliation, to ensure that individuals impacted receive information about options for reporting and support resources.

RELIGIOUS HOLIDAYS
Campus policy regarding religious observances requires that faculty make every effort to deal reasonably and fairly with all students who, because of religious obligations, have conflicts with scheduled exams, assignments or required attendance. In this class, (Faculty: insert your procedures here). See the campus policy regarding religious observances for full details.
