Introduction to Hypersonic Aerothermodynamics
ASEN 5519-001, Fall 2020

Last updated: August 24, 2020

Instructor: Dr. Ross Chaudhry, ross.chaudhry@colorado.edu
Office hours: By appointment, over Zoom (email me to schedule, I am typically flexible)
Schedule: 1:15-2:30 PM, Tuesday and Thursday
In-person location: AERO 114
Remote location: Recurring Zoom meetings, https://cuboulder.zoom.us/j/92875130958
Website: https://canvas.colorado.edu/courses/66311

Grading

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>8 problem sets</td>
<td>5% each</td>
</tr>
<tr>
<td>1 midterm exam</td>
<td></td>
</tr>
<tr>
<td>1 final exam</td>
<td></td>
</tr>
<tr>
<td>Total</td>
<td></td>
</tr>
</tbody>
</table>

The assignments will be approximately evenly spaced throughout the semester. The late penalty for assignments is 10% per day, for up to 5 days. Beyond 5 days late, the assignment is worth 0%. Email me for accommodations due to illness or other extenuating circumstances.

Reference texts

There is no required textbook, but interested students may refer to the following books for further discussion and resources. Reading may be assigned from these books, but they will either be available online through the CU Library or the relevant sections will be provided.

- Vincenti and Kruger, “Physical Gas Dynamics”, Krieger, 1965. Old but good, it fills a similar role (for this course) as Boyd and Schwartzentruber below.

Course Modalities

This course is offered in several modalities:

- **Hybrid: ASEN 5519-001** – students enrolled in this course code should attend class synchronously, either in person or remotely via zoom meeting. The zoom link is the same for each class: https://cuboulder.zoom.us/j/92875130958.
- **Online: ASEN 5519-001B** – students attend class asynchronously by watching recordings of the ASEN 5519-001 lectures on their own time.
You should be registered in the class code corresponding to the mode you expect to dominantly use. However, all students are permitted to attend the zoom meetings synchronously, and recordings will be made available for all students. Lecture notes or slides will also be posted, when applicable.

Course Material and Outline

1. Introduction [1 lecture]
   - Course outline
   - Broad overview of hypersonics
2. Hypersonic flight mechanics [3 lectures]
   - Trajectory equations
   - Ballistic entry (missile)
   - Equilibrium glide (Space Shuttle)
   - Air-breathing, powered flight
3. Aerothermodynamics phenomena [7 lectures]
   - Review of compressible gas dynamics
   - Real gas effects and simplified air chemistry
   - Nonequilibrium thermochemical kinetics
   - Guest lecture: Prof. Robyn MacDonald
   - Fluid conservation equations
   - Transport phenomena
   - Review of aerodynamics
4. Surface pressure [3 lectures]
   - Stagnation point
   - Newtonian models
   - Aerodynamics
5. Boundary layers [3 lectures]
   - Self-similar equations
   - Solution for flat plate
   - Fay-Riddell stagnation point convective heat transfer
6. Heat transfer and skin friction [3 lectures]
   - Surface temperature
   - Eckert’s reference temperature method
   - Laminar and turbulent boundary layers
7. Hypersonic propulsion [2 lectures]
   - Rockets
   - Air-breathing systems (ramjets, scramjets)
   - Air-breathing inlets
8. Thermal Protection Systems [3 lectures]
   - Design drivers
   - Passive (Space Shuttle, X43)
   - Ablative (Stardust)
   - Guest lecture: Prof. Tim Minton
9. Cutting-edge capabilities [2 lectures]
   - Computational tools (CFD, transition prediction)
   - Experimental facilities
10. Conclusions and exam preparation [1 lecture]
Classroom Behavior

Both students and faculty are responsible for maintaining an appropriate learning environment in all instructional settings, whether in person, remote or online. Those who fail to adhere to such behavioral standards may be subject to discipline. Professional courtesy and sensitivity are especially important with respect to individuals and topics dealing with race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy. For more information, see the policies on classroom behavior and the Student Code of Conduct.

Requirements for COVID-19

As a matter of public health and safety due to the pandemic, all members of the CU Boulder community and all visitors to campus must follow university, department and building requirements, and public health orders in place to reduce the risk of spreading infectious disease. Required safety measures at CU Boulder relevant to the classroom setting include:

- maintain 6-foot distancing when possible,
- wear a face covering in public indoor spaces and outdoors while on campus consistent with state and county health orders,
- clean local work area,
- practice hand hygiene,
- follow public health orders, and
- if sick and you live off campus, do not come onto campus (unless instructed by a CU Healthcare professional), or if you live on-campus, please alert CU Boulder Medical Services.

Students who fail to adhere to these requirements will be asked to leave class, and students who do not leave class when asked or who refuse to comply with these requirements will be referred to Student Conduct and Conflict Resolution. For more information, see the policies on COVID-19 Health and Safety and classroom behavior and the Student Code of Conduct. If you require accommodation because a disability prevents you from fulfilling these safety measures, please see the “Accommodation for Disabilities” statement on this syllabus.

Before returning to campus, all students must complete the COVID-19 Student Health and Expectations Course. Before coming on to campus each day, all students are required to complete a Daily Health Form. Class time will not be provided to complete this form.

Students who have tested positive for COVID-19, have symptoms of COVID-19, or have had close contact with someone who has tested positive for or had symptoms of COVID-19 must stay home and complete the Health Questionnaire and Illness Reporting Form (the daily health form) remotely. In this class, if you are sick or quarantined, alert me by email about your absence, although you should not state the specific nature of your illness due to privacy laws.

Accommodation for Disabilities

If you qualify for accommodations because of a disability, please submit your accommodation letter from Disability Services to your faculty member in a timely manner so that your needs can be addressed. Disability Services determines accommodations based on documented disabilities in the academic environment. Information on requesting accommodations is located on the Disability Services website. Contact Disability Services at 303-492-8671 or dsinfo@colorado.edu for further
assistance. If you have a temporary medical condition, see [Temporary Medical Conditions](#) on the Disability Services website.

**Preferred Student Names and Pronouns**

CU Boulder recognizes that students’ legal information doesn’t always align with how they identify. Students may update their preferred names and pronouns via the student portal; those preferred names and pronouns are listed on instructors’ class rosters. In the absence of such updates, the name that appears on the class roster is the student’s legal name.

**Honor Code**

All students enrolled in a University of Colorado Boulder course are responsible for knowing and adhering to the Honor Code. Violations of the policy may include: plagiarism, cheating, fabrication, lying, bribery, threat, unauthorized access to academic materials, clicker fraud, submitting the same or similar work in more than one course without permission from all course instructors involved, and aiding academic dishonesty. All incidents of academic misconduct will be reported to the Honor Code ([honor@colorado.edu](mailto:honor@colorado.edu); 303-492-5550). Students found responsible for violating the academic integrity policy will be subject to nonacademic sanctions from the Honor Code as well as academic sanctions from the faculty member. Additional information regarding the Honor Code academic integrity policy can be found at the [Honor Code Office website](#).

**Sexual Misconduct, Discrimination, Harassment, and/or Related Retaliation**

The University of Colorado Boulder (CU Boulder) is committed to fostering an inclusive and welcoming learning, working, and living environment. CU Boulder will not tolerate acts of sexual misconduct (harassment, exploitation, and assault), intimate partner violence (dating or domestic violence), stalking, or protected-class discrimination or harassment by members of our community. Individuals who believe they have been subject to misconduct or retaliatory actions for reporting a concern should contact the Office of Institutional Equity and Compliance (OIEC) at 303-492-2127 or [cureport@colorado.edu](mailto:cureport@colorado.edu). Information about the OIEC, university policies, [anonymous reporting](#), and the campus resources can be found on the [OIEC website](#).

Please know that faculty and instructors have a responsibility to inform OIEC when made aware of incidents of sexual misconduct, dating and domestic violence, stalking, discrimination, harassment and/or related retaliation, to ensure that individuals impacted receive information about options for reporting and support resources.

**Religious Holidays**

Campus policy regarding religious observances requires that faculty make every effort to deal reasonably and fairly with all students who, because of religious obligations, have conflicts with scheduled exams, assignments or required attendance. In this class, please let me know of the conflict by email and I will work to accommodate your specific situation.

See the [campus policy regarding religious observances](#) for full details.
