

# ASEN 3802: Aerospace Sciences Laboratory II

University of Colorado **Boulder**

Spring Semester 2024

## Syllabus

**Time:** Section 001: Wed. 12:50 PM - 2:40 PM  
Section 002: Thurs. 8:30 AM - 10:20 AM  
Section 003: Thurs. 10:35 AM - 12:25 PM

**Laboratory Classroom:** AERO N100

**Instructors:** Professor Erik Knudsen  
Office Location: AERO 217  
Email: [erik.knudsen@colorado.edu](mailto:erik.knudsen@colorado.edu)

Professor Jeff Glusman  
Office Location: AERO N205  
Email: [jeff.glusman@colorado.edu](mailto:jeff.glusman@colorado.edu)

Professor Samantha Sheppard  
Office Location: AERO ???  
Email: [Samantha.Sheppard@colorado.edu](mailto:Samantha.Sheppard@colorado.edu)

**Teaching Assistants/Facilitators:** Hannah Quirk (Sec. **TBD**)  
Email: [hannah.quirk@colorado.edu](mailto:hannah.quirk@colorado.edu)

Panupong (Peach) Chaphuphuang (Sec. **TBD**)  
Email: [pach2648@colorado.edu](mailto:pach2648@colorado.edu)

Matthew Menendez-Aponte (Sec. **TBD**)  
Email: [matthew.menendez-aponte@colorado.edu](mailto:matthew.menendez-aponte@colorado.edu)

**Description:** This course provides an intermediate laboratory experience in aerospace sciences, with a focus on aerodynamics, structural mechanics, thermodynamics, and heat transfer. The course emphasizes design and analysis of experiments, processing and analysis of experimental data, and model validation using experimental data.

**Last edited on:** January 2, 2024

**Learning Goals:** A student who successfully completes this course will:

1. Have an operational understanding of experimental measurement techniques used in aerodynamics, structural mechanics, thermodynamics, and heat transfer,
2. Be capable of designing and analyzing experiments to study physical phenomena, measure physical properties, and assess performance of aerospace designs,
3. Be capable of carrying out experiments,
4. Be capable of processing and critically analyzing experimental data, including characterizing and propagating uncertainties,
5. Have a basic understanding of the verification and validation process, and
6. Be capable of validating models using experimental data.

The course will also reinforce students' understanding of fundamental concepts covered in ASEN 3711 (Aerodynamics), ASEN 3712 (Structures), and ASEN 3713 (Thermodynamics and Heat Transfer).

**Required Text:** None.

*(While there are no required textbooks for this course, the textbooks associated with ASEN 3711, ASEN 3712, and ASEN 3713 are highly recommended as references for the material covered in the laboratory assignments, please see Supplemental References below.)*

**Supplemental References:**

1. J. D. Anderson, *Fundamentals of Aerodynamics*. McGraw Hill, 5th - 7th ed., 2010-2024.
2. Y. Cengel, R. Turner, and J. Cimbala, *Fundamentals of Thermal-Fluid Sciences*. McGraw Hill, 5th-6th ed., 2016-2022.
3. A. M. Keuthe and C.Y. Chow, *Foundations of Aerodynamics: Bases of Aerodynamic Design*. Wiley, 5th ed., 1997.

**Class Format:** The class meets in-person once a week for one hour and fifty minutes of active laboratory instruction. Note that the activities vary week by week with some weeks focused on formal lecture or laboratory introductions, while others may be focused on carrying out hands-on laboratory measurements, programming analysis or post-processing code, carrying out simulations or writing laboratory reports and completing other laboratory deliverables. Three primary laboratory activities will be assigned over the semester, with one laboratory activity focused specifically on each of the three course disciplines of structural mechanics, thermodynamics and heat transfer, and aerodynamics. As a result, each activity will nominally take five weeks of the, 15 week, semester. Note the specific calendar weeks for each of the three laboratory activities are identified below in the "Schedule of Lab Activities".

All of the labs will be carried out in small groups, assigned by the instructional team, which will be sized appropriately to match the amount of work expected. If students do not participate in the group (i.e. attending lab periods, group meetings, online discussions, etc.) and do not contribute sufficiently to the group work, the team will be re-arranged, and the non-participating students might have to complete the report on their own. Teams can work

together to discuss the means and methods for formulating and solving problems and even compare answers, but you are not free to copy work from other groups. Copying material from any resource (including code from another student or online) and submitting it as one's own is considered plagiarism and is an Honor Code violation. Students who are caught copying material will receive a zero grade for the class and will be reported for an "Honor Code Violation" for additional punitive action.

To complete these assignments, students must have access to a computer, basic programming skills, and familiarity with some programming languages and/or environments similar to what is covered in introductory computing courses. The minimum requirement is some proficiency with MATLAB. If you are not familiar with MATLAB, it is your responsibility to become so. In addition to writing a detailed report for each assignment, students may also be required to submit their post-processing or analysis code. When requested your code should be submitted in a single zip file, including a "driver" or "main" MATLAB script producing all requested figures. Code may be written as a group, but each individual within the group is responsible for understanding exactly how all of the code works. Each assignment will be due on the final day of the lab at 11:59 PM (as detailed in the "Schedule" below). Lab reports and code should be submitted to the appropriate Dropbox Bins via the course website by the due date, no late assignments will be accepted.

Further guidelines for each laboratory activity will be addressed in the respective lab assignment documents.

The course instructors will be available in-person during the full laboratory periods, as a result no additional office hours will be provided by the instructors for this course. If students wish to seek help on the laboratory assignments outside of class time, they should attend the consolidated Aerospace Study Hall Periods which will be supported by the teaching assistants and facilitators.

**Attendance Policy:** Attendance is expected at all scheduled laboratory periods, and students should expect new material to be presented. None of the laboratory introductions or lectures will be recorded or posted for asynchronous consumption. Thus students who miss important information during laboratory periods should coordinate with their assigned lab groups and catch-up independently on the material they may have missed.

**Course Website and Course Communications:** There will be a class website on Canvas. All relevant documents, lab assignments, schedules, and supplemental documents will be posted to this site throughout the semester. Please check back to see what has been posted. All course announcements outside of the laboratory periods will be sent as Canvas announcements, so it is the student's responsibility to make sure their Canvas settings are appropriately configured to receive these announcements.

Students should e-mail the course instructors and teaching assistants/facilitators if they have a pressing logistical or health issue, or to request a private meeting to discuss personal matters. All questions related to laboratory assignments and course content should be asked in person during the laboratory period. The teaching team will not address technical challenges with the

laboratory material (e.g. correctness of solutions, debugging code, etc.) over email, instead these questions and challenges should be resolved either during the in-person laboratory periods or at the consolidated Aerospace Study Hall periods.

**Schedule of Lab Activities:** The following presents a nominal schedule for the semester:

Week	Date	Activity/Due
<b>Lab 1: Structural Mechanics</b>		
Week 1	Jan. 17/18	Introductions & Truss Experiment
Week 2	Jan. 24/25	Data Analysis
Week 3	Jan. 31/1	Finite Element Method Simulation Practice
Week 4	Feb. 7/8	Run Simulations & Work on Report
Week 5	Feb. 14/15	Work on Report, <b>Lab Report 1 Due at 11:59pm</b>
<b>Lab 2: Thermodynamics &amp; Heat Transfer</b>		
Week 6	Feb. 21/22	Heat Transfer Demonstration/Introduction
Week 7	Feb. 28/29	Model Development, Data Analysis & Hardware Access
Week 8	Mar. 6/7	Model Development, Data Analysis & Hardware Access
Week 9	Mar. 13/14	Work on Report
Week 10	Mar. 20/21	Work on Report, <b>Lab Report 2 Due at 11:59pm</b>
<b>Lab 3: Aerodynamics</b>		
Week 11	Mar. 27/28	Spring Break (No Class)
Week 12	Apr. 3/4	Introduction to the Vortex Panel Method
Week 13	Apr. 10/11	Introduction to Prandtl Lifting Line Theory
Week 14	Apr. 17/18	Programming & Data Analysis
Week 15	Apr. 24/25	Programming, Data Analysis, & Work on Report
Week 16	May 1/2	Work on Report, <b>Lab Report 3 Due at 11:59pm</b>

**Grading:** The following presents the planned grading structure for the course. Be aware, that this is subject to change, however the class will be thoroughly notified and polled for agreement.

33.3% Structural Mechanics Laboratory Assignment

33.3% Thermodynamics and Heat Transfer Laboratory Assignment

33.3% Aerodynamics Laboratory Assignment

- Grades will be a combination of the grade for each report (as a group effort) and anonymous peer evaluations from your teammates.
- Grades are posted to the class website (Canvas).
- There will not be a final exam for this course.

**Lab Reports:** Each lab will have a final report as the main deliverable. These reports are expected to follow the AIAA format (Word and Overleaf templates can be found at <https://www.aiaa.org/events-learning/events/Technical-Presenter-Resources>). When creating figures for the reports, **screenshots and photos are not acceptable**; you must save high resolution images from MATLAB. Be sure that all labels, legends, etc. are legible in the final report.

**Remarks on Grading:** Our grading scheme is not designed to reward or punish. It is designed

to indicate your level of competency compared to the standard that we set. Do you meet the minimum level of competency? Do you exceed the minimum? Are you below the minimum? The answers to these questions should be indicated by your final grade.

The final grade indicates your readiness to continue to the next level of courses. Meeting the minimum requirements indicates that you are prepared to continue at least at the minimum level required for the next in the sequence of courses. Exceeding the minimum means you are ready to enter the next course and that you have mastery of material beyond the minimum, that is, you show some level of proficiency.

**Regrading:** All regrade requests must be made within two weeks of receiving the grade for an assignment. These requests must be made in writing (i.e. via email) to the appropriate course teaching assistant/facilitator with the appropriate course instructor copied. Regrade requests received verbally or without the instructor copied will not be considered.

**Letter Grading Scheme:** Letter grades will be assigned as follows:

Letter Grade	Percent Grade	4.00 Scale
A	93.00 - 100.00	4.00
A-	90.00 - 92.99	3.67
B+	87.00 - 89.99	3.33
B	83.00 - 86.99	3.00
B-	80.00 - 82.99	2.67
C+	77.00 - 79.99	2.33
C	73.00 - 76.99	2.00
C-	70.00 - 72.99	1.67
D	60.00 - 69.99	1.00
F	Below 60.00	0.00

**Classroom Behavior:** Students and faculty are responsible for maintaining an appropriate learning environment in all instructional settings, whether in person, remote, or online. Failure to adhere to such behavioral standards may be subject to discipline. Professional courtesy and sensitivity are especially important with respect to individuals and topics dealing with race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation, or political philosophy. For more information, see the [classroom behavior policy](#), the [Student Code of Conduct](#), and the [Office of Institutional Equity and Compliance](#).

**Requirements for Infectious Diseases:** Members of the CU Boulder community and visitors to campus must follow university, department, and building health and safety requirements and all public health orders to reduce the risk of spreading infectious diseases.

The CU Boulder campus is currently mask optional. However, if masks are again required in classrooms, students who fail to adhere to masking requirements will be asked to leave class. Students who do not leave class when asked or who refuse to comply with these requirements will be referred to Student Conduct & Conflict Resolution. Students who require accommodation because a disability prevents them from fulfilling safety measures related to infectious disease will be asked to follow the steps in the “Accommodation for Disabilities” statement on this syllabus.

For those who feel ill and think you might have COVID-19 or if you have tested positive for COVID-19, please stay home and follow the [further guidance of the Public Health Office](#). For those who have been in close contact with someone who has COVID-19 but do not have any symptoms and have not tested positive for COVID-19, you do not need to stay home.

**Accommodation for Disabilities, Temporary Medical Conditions, and Medical Isolation:** [Disability Services](#) determines accommodations based on documented disabilities in the academic environment. If you qualify for accommodations because of a disability, submit your accommodation letter from Disability Services to your faculty member in a timely manner so your needs can be addressed. Contact Disability Services at 303-492-8671 or [dsinfo@colorado.edu](mailto:dsinfo@colorado.edu) for further assistance.

If you have a temporary medical condition or required medical isolation for which you require accommodation, please notify the instructor as soon as possible so that appropriate accommodations can be made. If you are sick or require isolation please notify the instructor of your absence from in-person activities and continue in a completely remote mode, as you are able, until you are allowed or able to return to campus. Please note that for health privacy reasons you are not required to disclose to the instructor the nature of your illness or condition, however you are welcome to share information you feel necessary to protect the health and safety of others within the course. Also see [Temporary Medical Conditions](#) on the Disability Services website.

**Preferred Student Names and Pronouns:** CU Boulder recognizes that students’ legal information doesn’t always align with how they identify. Students may update their preferred names and pronouns via the student portal; those preferred names and pronouns are listed

on instructors' class rosters. In the absence of such updates, the name that appears on the class roster is the student's legal name.

**Honor Code:** All students enrolled in a University of Colorado Boulder course are responsible for knowing and adhering to the [Honor Code](#). Violations of the Honor Code may include but are not limited to: plagiarism (including use of paper writing services or technology [such as essay bots]), cheating, fabrication, lying, bribery, threat, unauthorized access to academic materials, clicker fraud, submitting the same or similar work in more than one course without permission from all course instructors involved, and aiding academic dishonesty.

All incidents of academic misconduct will be reported to Student Conduct & Conflict Resolution: [honor@colorado.edu](mailto:honor@colorado.edu), 303-492-5550. Students found responsible for violating the [Honor Code](#) will be assigned resolution outcomes from the Student Conduct & Conflict Resolution as well as be subject to academic sanctions from the faculty member. Visit [Honor Code](#) for more information on the academic integrity policy.

**Sexual Misconduct, Discrimination, Harassment and/or Related Retaliation:** CU Boulder is committed to fostering an inclusive and welcoming learning, working, and living environment. University policy prohibits sexual misconduct (harassment, exploitation, and assault), intimate partner violence (dating or domestic violence), stalking, protected-class discrimination and harassment, and related retaliation by or against members of our community on and off campus.

Visit [OIEC](#) for or more information about university policies, [reporting options](#), and support resources. If you believe you may have been subjected to misconduct, [email OIEC](#) or call 303-492-2127.

Faculty and graduate instructors are required to inform OIEC when they learn of any issues related to these policies regardless of when or where they occurred. This ensures that individuals impacted receive information about their rights, support resources, and resolution options. Visit the [Don't Ignore It](#) page to learn more about reporting and support options.

**Religious Holidays:** Campus policy regarding religious observances requires that faculty make every effort to deal reasonably and fairly with all students who, because of religious obligations, have conflicts with scheduled exams, assignments or required attendance. In this class, you must let the instructor know of any such conflicts within the first two weeks of the semester so that they can work with you to make reasonable arrangements.

See the [campus policy regarding religious observances](#) for full details.

**Mental Health and Wellness:** The University of Colorado Boulder is committed to the well-being of all students. If you are struggling with personal stressors, mental health or substance use concerns that are impacting academic or daily life, please contact [Counseling and Psychiatric Services \(CAPS\)](#) located in C4C or call (303) 492-2277, 24/7.

Free and unlimited telehealth is also available through [Academic Live Care](#). The Academic Live Care site also provides information about additional wellness services on campus that are available to students.
