

ASEN 5151: FUNDAMENTALS OF GAS DYNAMICS

Spring 2024

Time:	Tue./Th. 1:00 – 2:15 PM	Location:	AERO 232/Zoom/Recordings
Instructor:	Prof. Robyn Macdonald	Email:	robyn.macdonald@colorado.edu
Teaching Assistant:	Sam Goodwin	Email:	sam.goodwin@colorado.edu

Course Page: <https://canvas.colorado.edu/>

Course Slack Channel: [Invite Link](#)

Office Hours:

Day	Time	Location	
Monday	4:30 - 5:30 PM	Zoom	Robyn Macdonald
Tuesday	4:30 - 5:30 PM	AERO 359 & Zoom	Robyn Macdonald
Thursday	4:00 - 5:30 PM	AERO 359 & Zoom	Sam Goodwin

Lecture & Office Hours Zoom Link: <https://cuboulder.zoom.us/>

Text: There is no required textbook for this course. Notes will be posted on the course website for each section. Some useful references are listed below which are available digitally or in the course reserves at the Gemmill Library. At the beginning of the notes for each section is a list of sources from which the notes were compiled.

- Anderson, J. D., Jr., *Modern Compressible Flow with Historical Perspective*, Second Edition, McGraw-Hill, 1990. Available in course reserves.
- Zucrow, M. J. and Hoffman, J. D., *Gas Dynamics*, Vol. I, Wiley, 1976. Available in course reserves.
- Zucrow, M. J. and Hoffman, J. D., *Gas Dynamics*, Vol. II, Wiley, 1977. Currently checked out of CU Library.

Prerequisites: A first course in fluid mechanics or aerodynamics, including ASEN 3111 or ASEN 3711. I will assume that you are familiar with typical topics from an introductory compressible flow course, including isentropic flow with area change, normal shock waves, oblique shock waves, Prandtl-Meyer flow, associated applications such as converging and converging-diverging nozzles, etc. I expect students to be proficient with programming which will be used for some assignments.

Grading Policy: Homework (40%), Exam 1 (25%), Exam 2 (35%).

Homework: Homework will be assigned periodically as the appropriate material is covered, and will include both handwritten problem sets and programming assignments (most assignments will include some of both). There will be approximately 6 homework assignments. The due date for each assignment will be announced when the assignment is made. All students will submit assignments through the course Gradescope website. The late penalty for homework will be 10% per day, for up to 5 days. Beyond 5 days late, the assignment is worth 0%. You may receive help from a classmate

or the instructor/TA on homework assignments, but the submitted assignment must be your own work. This includes both handwritten solutions, as well as programming assignments.

Exams: There will be two exams in this course. The first will cover material from the first half of the class (to be specified later) and the second will be cumulative, but focusing on material in the second half of the course. Students registered for the asynchronous remote section will have the option to take the exam remotely with a proctor. Professor Macdonald will reach out to you 2 weeks before the exam date to coordinate the remote proctoring of the exam. The exam dates are as follows:

	Day	Time	Location
Exam 1	Wednesday, March 13	6:00 - 8:00 PM	TBD
Exam 2	Saturday, May 4	1:30 - 4:00 PM	AERO 232

Class format: This class operates in two modalities: in-person and asynchronous remote. All lectures will be recorded via Classroom Capture and will be made available to all students. In addition, a Zoom link is provided for the lecture for those who wish to attend lecture remotely.

Classroom Behavior: Students and faculty are responsible for maintaining an appropriate learning environment in all instructional settings, whether in person, remote, or online. Failure to adhere to such behavioral standards may be subject to discipline. Professional courtesy and sensitivity are especially important with respect to individuals and topics dealing with race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation, or political philosophy.

For more information, see the [classroom behavior policy](#), the [Student Code of Conduct](#), and the [Office of Institutional Equity and Compliance](#).

Requirements for Infectious Disease: Members of the CU Boulder community and visitors to campus must follow university, department, and building health and safety requirements and all applicable campus policies and public health guidelines to reduce the risk of spreading infectious diseases. If public health conditions require, the university may also invoke related requirements for student conduct and disability accommodation that will apply to this class.

If you feel ill and think you might have COVID-19 or if you have tested positive for COVID-19, please stay home and follow the [guidance of the Centers for Disease Control and Prevention \(CDC\) for isolation and testing](#). If you have been in close contact with someone who has COVID-19 but do not have any symptoms and have not tested positive for COVID-19, you do not need to stay home but should follow the [guidance of the CDC for masking and testing](#).

Accommodation for Disabilities, Temporary Medical Conditions, and Medical Isolation: If you qualify for accommodations because of a disability, please submit your accommodation letter from Disability Services to your faculty member in a timely manner so that your needs can be addressed. Disability Services determines accommodations based on documented disabilities in the academic environment. Information on requesting accommodations is located on the [Disability Services website](#). Contact Disability Services at 303-492-8671 or dsinfo@colorado.edu for further assistance. If you have a temporary medical condition, see [Temporary Medical Conditions](#) on the Disability Services website.

If you have a required medical isolation for which you require adjustment due to a missed in-person assessment (exam), please alert Professor Macdonald of your absence via email but do not include specific information about your illness due to privacy laws. Because attendance is not required in

this class, if you miss a class you do not need to inform Professor Macdonald but can watch the lecture asynchronously on Canvas.

Preferred Student Names and Pronouns: CU Boulder recognizes that students' legal information doesn't always align with how they identify. Students may update their preferred names and pronouns via the student portal; those preferred names and pronouns are listed on instructors' class rosters. In the absence of such updates, the name that appears on the class roster is the student's legal name.

Honor Code: All students enrolled in a University of Colorado Boulder course are responsible for knowing and adhering to the [Honor Code](#). Violations of the Honor Code may include but are not limited to: plagiarism (including use of paper writing services or technology [such as essay bots]), cheating, fabrication, lying, bribery, threat, unauthorized access to academic materials, clicker fraud, submitting the same or similar work in more than one course without permission from all course instructors involved, and aiding academic dishonesty.

All incidents of academic misconduct will be reported to Student Conduct & Conflict Resolution: honor@colorado.edu, 303-492-5550. Students found responsible for violating the [Honor Code](#) will be assigned resolution outcomes from the Student Conduct & Conflict Resolution as well as be subject to academic sanctions from the faculty member. Visit [Honor Code](#) for more information on the academic integrity policy.

Sexual Misconduct, Discrimination, Harassment and/or Related Retaliation: CU Boulder is committed to fostering an inclusive and welcoming learning, working, and living environment. University policy prohibits [protected-class](#) discrimination and harassment, sexual misconduct (harassment, exploitation, and assault), intimate partner violence (dating or domestic violence), stalking, and related retaliation by or against members of our community on- and off-campus. These behaviors harm individuals and our community. The Office of Institutional Equity and Compliance (OIEC) addresses these concerns, and individuals who have been subjected to misconduct can contact OIEC at 303-492-2127 or email cureport@colorado.edu. Information about university policies, [reporting options](#), and [support resources](#) can be found on the [OIEC website](#).

Please know that faculty and graduate instructors must inform OIEC when they are made aware of incidents related to these policies regardless of when or where something occurred. This is to ensure that individuals impacted receive outreach from OIEC about resolution options and support resources. To learn more about reporting and support for a variety of concerns, visit the [Don't Ignore It](#) page.

Religious Accommodations: Campus policy requires faculty to provide reasonable accommodations for students who, because of religious obligations, have conflicts with scheduled exams, assignments or required attendance. Please communicate the need for a religious accommodation in a timely manner. In this class if you must miss an in-class assessment (exam) due to a religious obligation, please contact Professor Macdonald at least two weeks prior to coordinate an accommodation.

See the [campus policy regarding religious observances](#) for full details.

Mental Health and Wellness: The University of Colorado Boulder is committed to the well-being of all students. If you are struggling with personal stressors, mental health or substance use concerns that are impacting academic or daily life, please contact [Counseling and Psychiatric Services \(CAPS\)](#)

located in C4C or call (303) 492-2277, 24/7.

Free and unlimited telehealth is also available through [Academic Live Care](#). The [Academic Live Care](#) site also provides information about additional wellness services on campus that are available to students.
