SECTION: 001 or 002

## Instructions:

1. Calculators are permitted.
2. Notes, your text and other books, cell phones, and other electronic devices are not permittedexcept for calculators or as needed to view and upload your work.
3. Justify your answers, show all work.
4. When you have completed the exam, go to the uploading area in the room and scan your exam and upload it to Gradescope.
5. Don't forget to scan any back pages you used for extra space!
6. Verify that everything has been uploaded correctly and the pages have been associated to the correct problems.
7. Turn in your hardcopy exam.

On my honor as a University of Colorado Boulder student, I have neither given nor received unauthorized assistance on this work.

Signature: $\qquad$ Date: $\qquad$

Duration: 90 minutes

Problem 1. (24 points.) There are three unrelated parts to this question.
(a) Let $X$ be a random variable such that $\mathrm{P}(X=1)=1-\mathrm{P}(X=0)>0$. If $5 \operatorname{Var}(X)=\mathrm{E}(X)$, find $\mathrm{P}(X=0)$.
(b) Let $U$ and $V$ be discrete random variables with joint probability mass function (p.m.f.) given by the following table. What's the probability that $V=U^{2}$ ?

|  | $V=-1$ | $V=0$ | $V=1$ |
| :---: | :---: | :---: | :---: |
| $U=-1$ | $5 / 38$ | $1 / 19$ | $3 / 19$ |
| $U=0$ | $1 / 38$ | $3 / 19$ | $1 / 19$ |
| $U=1$ | $7 / 38$ | $4 / 19$ | $1 / 38$ |

(c) Let $Y \sim \operatorname{Geometric}(p=2 / 3)$. What's the expected value of $3^{1-2 Y}$ ?

Problem 2. (24 points.) There are three unrelated parts to this question.
(a) Let $X$ be a random variable with cumulative distribution function (c.d.f.):

$$
F(x)= \begin{cases}0 & , x<-\ln (3) \\ \frac{3 e^{x}-1}{3\left(e^{x}+1\right)} & , x \geq-\ln (3)\end{cases}
$$

Is $X$ discrete, continuous, or neither? If discrete, determine its p.m.f. If continuous, determine its probability density function (p.d.f.).
(b) The life $L$, in years, of a certain type of electrical switch has an exponential distribution with an average life of 2 years. What is the probability it fails during the first year?
(c) Let $Y \sim \operatorname{Normal}(16,16)$. Find the expected value of $\frac{Y^{2}-16}{4}$.

Problem 3. (24 points.) Each of two coins, one with $\mathrm{P}($ "Heads") $=0.6$ and the other with $\mathrm{P}($ "Heads" $)=0.002$ is tossed 500 times. Assume the result of any coin flip to be independent of any other coin flip. Let $X_{1}$ be the number of times the first coin shows heads. Let $X_{2}$ be the number of times the second coin shows heads.
(a) What's the distribution of $X_{1}$ ? What about $X_{2}$ ? (Give a common distribution name and its parameters, or write the p.m.f.)
(b) What's the expected value of $X_{1}$ ? What about $X_{2}$ ?
(c) What's the variance of $X_{1}$ ? What about $X_{2}$ ?
(d) Use appropriately the Poisson or Normal approximation to estimate $\mathrm{P}\left(X_{1} \leq 325, X_{2}=4\right)$ numerically. You may find the table at the end of the exam useful.

Problem 4. (28 points.) Let $X$ and $Y$ be a random variables with joint p.d.f.:

$$
f_{X, Y}(x, y)= \begin{cases}c \cdot(2 x+y) & , 0<x<y<1 \\ 0 & , \text { otherwise }\end{cases}
$$

for a suitable constant $c$.
(a) Find the constant $c$.
(b) Find the marginal p.d.f. of $X$.
(c) Find $\mathrm{E}[Y]$.
(d) Are $X$ and $Y$ independent? Justify your answer.

Bonus Problem. (Recover up to 4 points marked down in problems 1-4.) Let $X$ and $Y$ be independent random variables, each uniformly distributed on the interval $(0,1)$. Find the probability that $|X-Y| \leq 0.25$.

## Standard Normal Cumulative Probability Table

Cumulative probabilities for POSITIVE z-values are shown in the following table:

| z | 0.00 | 0.01 | 0.02 | 0.03 | 0.04 | 0.05 | 0.06 | 0.07 | 0.08 | 0.09 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 0.0 | 0.5000 | 0.5040 | 0.5080 | 0.5120 | 0.5160 | 0.5199 | 0.5239 | 0.5279 | 0.5319 | 0.5359 |
| 0.1 | 0.5398 | 0.5438 | 0.5478 | 0.5517 | 0.5557 | 0.5596 | 0.5636 | 0.5675 | 0.5714 | 0.5753 |
| 0.2 | 0.5793 | 0.5832 | 0.5871 | 0.5910 | 0.5948 | 0.5987 | 0.6026 | 0.6064 | 0.6103 | 0.6141 |
