APPM 2460 $\hfill$ Spring 2018

Location: ECCR 143
TA: Sabina Altus, Pat Sprenger
Office: Sabina: STAD 152, Pat: ECOT 218
Email: *sabina.altus@colorado.edu*, *patrick.sprenger@colorado.edu*

Course Objective: In this course, students will learn the basics of Matlab and how to use software tools to solve problems related to differential equations and linear algebra.

Office Hours: All TA office hours will all be held in the Applied Math help room, **ECCR 211**. During weeks projects are due you can go to any TA's office hours, though you should reserve 2460 questions for Sabina or Pat. Our office hours are at the following times

Sabina	Tuesday 11:00-1:00 Thursday 10:00-11:00
Pat	Wednesday 11:00-2:00

Homework/Grading: Homework is assigned most Tuesdays during class, and is due the following Monday at 11:59 PM. On weeks where we spend class time working on APPM 2360 projects there will be no new additional homework. Submit the homework assignment on the lab D2L dropbox. **PDF FORMAT ONLY**. Please note the following:

- Grades in this course are assigned on a Pass/Fail basis.
- Late homework will not be accepted.
- Homework is graded on completion as Pass/Fail.
- Missing 4 or more HW assignments will result in a Fail for the course.
- Missing 3 or more classes will result in a Fail for the course.

Academic Honesty: Students are highly encouraged to collaborate on homework in this course, however, **all work turned in must be your own.** For more information regarding the CU Student Honor code refer to *http://www.honorcode.colorado.edu*
