

Reflecting on AQIQ Project

Name _____

When you have completed a project and learned something new, it is a good idea to reflect on the project and what you were able to accomplish. Please reflect on your experience with the AQIQ curriculum and project. Answer the following questions.

1. What did you learn about Air Quality during this project?
2. What did you learn about conducting experiments during this project?
3. What would you do differently on this project if you were to do it again?
4. What was the most challenging part of the project? How did you overcome this challenge?
5. What did you like most about the project?
