Support of Education Through Technology

PROGRAMS & LEARNING OPPORTUNITIES

Teaching Technology Assistance Program

The Teaching Technology Assistance Program (TTAP) pairs a faculty member interested in implementing technologies into their classroom with a Student Fellow who provides technical support to the instructor and students.

Special Interest Groups

Special Interest Groups (SIGs) are small interdisciplinary groups of faculty who meet a few times each semester to discuss scholarly readings on teaching, learning and technology challenges.

Learning Events

Throughout the year, we offer a variety of workshops, community meet-ups, and other learning opportunities. Be sure to look for information about upcoming events through our flyers, monthly newsletters, and website.

Visualizing Instructional Practices Service

The Visualizing Instructional Practices (VIP) service offers a data-driven means for A&S faculty to self-reflect on their teaching. This service provides structured classroom observations, a meaningful report and visualizations of data, and a follow-up consultation.

Faculty Fellows

Faculty Fellows are A&S faculty who stimulate departmental and cross-departmental explorations of teaching, learning and technology. Fellows engage in deep and focused discussions, provide departmental leadership and resources for best teaching practices, and serve as ambassadors and liaisons for ASSETT.

ONLINE RESOURCES

Learning Resources for Students

A guide for technologies and learning tools that can be used by students as they complete projects, tasks, and assignments.

OUR TEAM

Teaching & Learning Consultants

The Teaching and Learning Consultants (TLCs) engage teaching and learning communities that create rich student learning experiences. TLCs are available to consult with faculty, lead small group sessions and facilitate workshops.

Education Researcher

The Education Technology Researcher (ETR) helps assess the learning impact of technologies that are integrated into the classroom, and consults with faculty regarding teaching assessment. The ETR also conducts assessments to help develop ASSETT services.

Student Fellows

Student Fellows (SFs) are undergraduate partners who consult with faculty on integrating technologies into their classes, providing in- and out-of-class technical support for their students, and collect classroom observation data.
