

## Undergraduate Student Collaborator, Pedagogical Partner Consultant

— Fall 2023 —

*“If we want educational environments that support all students, it is clear that we actually have to involve them in creating those environments - to structure their voices into them.”* Elena Marcovici (Student Contributor, [Co-Creating Equitable Teaching and Learning](#))

The ASSETT group and the Center for Teaching and Learning are hiring a team of three undergraduate student consultants to inform the development of the “Students as Pedagogical Partners” initiative. This initiative aims to position students as collaborators with faculty, staff, and students in developing, engaging in, analyzing, and transforming the educational experience. Through these partnerships, undergraduate students and faculty work interdependently to develop, revise, or co-create course content, develop strategies to make learning more accessible, and co-design projects.

This is a one-year opportunity. During the fall term, the consultants will:

- work collaboratively with staff members to co-create the initiative by identifying critical readings, activities, assessments, and resources.
- conduct research and interviews, and use their prior experiences to inform their decisions.
- be responsible for providing iterative and actionable feedback to the staff collaborators.

During the spring term, the consultants will

- track student-faculty pedagogical partnerships with the goal of curating artifacts to tell the story of their experiences.
- collect data, compile artifacts, and provide formative and summative feedback on the initiative.

This is an ideal position for those who are self-starters, feel comfortable working on emergent projects, and desire to exercise self-advocacy, autonomy, and agency.

### Required Qualifications

- Currently enrolled in an undergraduate program at the University of Colorado Boulder
- Curiosity about disruptive pedagogies
- Interest in or experience in [Learning Experience Design](#)
- Dependable and organized, with the ability to work independently and collaboratively

### Consultant Benefits

- Receive pedagogical training
- Build upon and hone interdependence, communication, and analytical skillsets.
- Build and enhance a professional portfolio
  - Consultants will be attributed as co-designers of this new initiative
  - Gain project collaboration, curriculum design, peer-to-peer engagement experience, and other marketable post-graduation skills

These are paid (\$18.00/hour) 5-10 hour/week opportunities starting in fall 2023. Consultants will work closely with ASSETT (Arts & Sciences Support of Education Through Technology) and the Center for Teaching & Learning staff collaborators. To apply, please submit a one-page cover letter addressing your interest and qualifications related to this position, along with your resume to [Jacie Moriyama moriyama@colorado.edu](mailto:moriyama@colorado.edu). **Applications for these positions will be accepted until filled.**
